News in Brief

Faculty Aide Program to help graduate students

The University has implemented a new Faculty Aide Program to help graduate students meet the cost of education, according to Dr. B.F. Howell Jr., associate dean of the Graduate School.

Faculty aides will receive \$6 per hour for assisting faculty or administrators in their official University duties. The aide's responsibilities will be similar to those of a graduate teaching or research assistant.

Faculty interested in obtaining an aide to work with them should phone the Office of Student Aid, which is coordinating the program, at 865-6301. Award amounts will be determined by the student's financial need as demonstrated by the Financial Aid Form and by the number of credits he or she is carrying.

"We are hoping that faculty will urge needy graduate students to apply for an aide position as soon as possible in Room 135 Boucke," Dean Howell says. "The student must complete the Financial Aid Form, which will be evaluated by College Scholarship Service, a process that requires several weeks and costs the student \$4.75.

"If the student already has applied to borrow money through the University, he or she will probably have completed the Financial Aid Form, and thus need only complete the shorter aide application."

The University is providing 20 percent and the federal government 80 percent of the funds used to pay students working through this program.

Terrace Room schedule

The HUB Terrace Room Cafeteria will be open on a regular schedule of Monday through Friday only, during the 1979-80 academic year. Lunch will be served from 11:30 a.m. to 1:15 p.m. and dinner from 4:45 p.m. to 6:45 p.m. In addition, the Terrace Room will be open on each Saturday of a home football game. The hours for these special Saturday openings will be lunch from 10:30 a.m. to 1 p.m. and dinner from 4:30 p.m. to 6 p.m.

Songs from black musicals to be performed Sept. 6

"Black on Broadway," a program of songs from all-black Broadway musicals, will be presented at 8 p.m. Thursday, Sept. 6, in Schwab Auditorium.

Among the shows tapped for the performance are *Treemonisha*, *Carmen Jones*, *House of Flowers*, *Lost in the Stars*,

Purlie and Porgy and *Bess*. The cast includes Cassandra Hayes, soprano; Marla McDaniel, mezzo-soprano; Michael Austin, tenor; and Don Kawash, piano.

There is no admission charge for the performance, which is sponsored by the Paul Robeson Cultural Center.

Cartwright to chair University Park United Way

Dr. Carol A. Cartwright, professor of education, has been named chairperson of the University Park Campus United Way.

In announcing the appointment, President Oswald said: "I am very pleased that a person of Dr. Cartwright's competence and commitment has agreed to give leadership to the United Way this year."

As University Park Campus United Way chairperson, Dr. Cartwright will head up a steering committee and oversee the implementation of the 1979 campaign.

Dr. Cartwright, a member of the faculty since 1967, is in charge of graduate programs in curriculum and instruction in the College of Education.

Amplification

INTERCOM obviously needs its consciousness raised. The Aug. 16 issue carried an announcement from the University Park Bookstore of temporary openings during the first two weeks of Fall Term.

These positions are open to all spouses of faculty and staff members—not just to wives as the original article said. Contact William McVicker, 863-0205.

Graduate assistantships available at Computation Center

Several assistantships have unexpectedly become available at the Computation Center. Students with sufficient background and interest in the use of computers need not be majors in computer science in order to qualify.

Duties include consulting for research users of computer facilities. Applicants should have at least two computer courses or equivalent programming experience. A knowledge of statistics and JCL is valuable.

Applications should be filed with D.L. Benitt, Room 214 Computer Building, 863-0422. Concurrence of the applicant's department head will be sought, and the appointments will be offered as soon as possible, to be effective starting Fall 1979.

Independent Study course receives national award

Penn State's Department of Independent Study by Correspondence has been awarded the "Meritorious Independent Study Course Award" for its informal correspondence course, Nutrition 7385.

The national award is presented annually by the National University Extension Association for the most innovative non-credit correspondence course developed.

The University's course, which is entitled "Fat Chance," is designed to improve the food selection, eating habits and activity patterns of the family. The program emphasizes preventative as well as corrective measures in addressing the problems of diet and weight control. "Fat Chance" was authored by Dr. Anthony R. D'Augelli, associate professor of human development, and Dr. Helen Smicklas-Wright, associate professor of nutrition.

This is the eighth consecutive award The Department of Independent Study by Correspondence has received for the development of original credit and non-credit correspondence programs.

Concert Choir holding auditions for Berlioz "Requiem"

Penn State's Concert Choir, under the direction of Raymond Brown, is now holding auditions for new members in the Choir Office, Room 214 Eisenhower Chapel.

The major work for this year's choir season will be the Berlioz *Requiem* (*Messe des morts*), written for tenor, chorus, orchestra and brass bands. It will be performed in Pittsburgh in February 1980 with the Pittsburgh Symphony Orchestra, Andre Previn conducting.

The Berlioz *Requiem* was written for a choir of unusual proportions. Twice as many male voices are needed as female; so the emphasis in the auditions will be on male candidates.

Anyone interested in auditioning for the concert choir should call 865-6548 and ask for the Choir Office.

Exhibit on black women on view at Robeson Center

"Black Women: Achievements against the Odds" will be on view at the Paul Robeson Cultural Center, Walnut Building, from Sept. 6 to Oct. 7.

The exhibition, which is touring under the auspices of the Smithsonian Institution Traveling Exhibition Service, was organized by the Anacostia Neighborhood Museum. In its examination of the achievements of black women in America, it focuses on both known personalities and little recognized figures.

The exhibition is divided into nine major sections: literature, medicine, civil rights, education, law and judiciary, government, fine arts, performing arts, and business and industry. The accomplishments of some 150 women are presented through the use of printed biographical and historical materials, photographs and silk-screened illustrations.

New look

With this issue, INTERCOM gets a new look. It is being printed on newsprint, part of a process that will result in significant financial savings to the University.

For the benefit of those members of the University community who were not in residence during Summer Term, we repeat the announcement which appeared in the July 12 issue, notifying readers that INTERCOM and the PENN STATE REPORTER have been combined into a single weekly publication. In addition to the dollar savings, a careful editorial analysis of the two publications over a three-month period found that 42.6 percent of the material appearing in both publications overlapped.

INTERCOM will be mailed regularly to all members of the University community. It will make every effort to represent the interests of its readers, and comments will be welcomed.

Everything you always wanted to know about the Faculty — Staff Directory . . .

How do I obtain a listing in the Directory?

On joining the University, all full-time members of the faculty and staff are supposed to fill out an Office Address and Telephone Information Form (OATI) and a W4 form. The former supplies the information contained in its title, along with permission to publish it. The W4 form contains your home address and phone number. These forms are kept on file in the Payroll Division, as is information on job titles, which is supplied by individual departments on a Personnel Recommendation Form. These three information sources generate the data for the Telephone Directory Information Form.

When is the deadline for changing my listing?

5 p.m. tomorrow (Aug. 31).

What happens if I forget to return my Directory form?

Your listing will be based on the information on that form.

Last year I changed my office address and telephone number on the directory form. Why doesn't the change appear on the 1979-80 form?

You cannot use the directory form to make a permanent change in your office address or number. This can only be done by sending in a new OATI form. To change your job title, you should file a Payroll Change Form.

How can I make a permanent change in my home address and telephone number?

You must fill in a new W4 form.

Why was my name omitted even though I returned my form?

Last year when the printer pasted up

the Directory, a number of names were lost. This year Management Services has compiled a count of the names to be included. The printer will also keep a tally, so if the two don't match, corrections can be made.

Can I obtain a listing in the Directory if I work part-time?

That's up to the department for which you work. Telephone Services will be happy to list you if your department says you need to receive telephone calls. Part-time personnel, adjunct professors and visiting professors are eligible for listings.

When will the Directory appear?

The printer is supposed to deliver the directories by the 15th working day in October.

Why isn't the Directory ready in September when school opens?

Departmental listings are prepared by Telephone Services, and camera ready copy for this section has already been completed. However, many faculty appointments are not processed until August. Management Services then needs two or three weeks to make additions and changes. Telephone Services will receive a computer printout of all faculty-staff listings by Sept. 14 for checking, and by Sept. 25 all the tapes will be delivered to the Office of Publications for transmittal to the printer.

Who is entitled to a Directory?

Each department receives one Directory for each of its telephones.

How much does it cost to print the Directory?

Nothing! The printer produces the Directory free of charge for the privilege of selling advertising in it.

University Park Calendar

FALL TERM 1979

Thursday, August 30

Preregistration for Winter Term, 1980, Room 112 Shields, through Sept. 24.

Friday, August 31

Registration for Fall Term, 8 a.m.-5 p.m., IM Bldg.

Continuing Education registration, 9 a.m.-5 p.m., Room 101 Kern.

University Choirs audition, 9 a.m.-4 p.m., Rooms 212 Chapel & 112 Music Bldg. 865-6548 for information.

HUB Craft Center registration, noon-5 p.m., Room 312 HUB. Also Sept. 1-2 and 4-8.

Week of Sept. 3

Monday, Sept. 3

Labor Day, Holiday, University offices closed.

Tuesday, Sept. 4

Fall Term classes begin, 8 a.m.

HUB station for Drop/Add, weekdays, 1-4 p.m., through Sept. 24.

Air Pollution Seminar, 2:30 p.m., Room 140 Fenske. Robert J. Heinrich, mechanical engineering, on "Pennsylvania Air Pollution Regulations."

Wednesday, Sept. 5

HUB Craft Center demonstration, 11:30 a.m., Fisher Plaza.

Commonplace Theatre, *The Maltese Falcon*, 7 p.m.; *Casablanca*, 9 p.m., Room 112 Kern.

Sports: soccer, vs. Lock Haven.

Thursday, Sept. 6

Meteorology Seminar, 3:55 p.m., Room 112 Walker. A.K. Blackadar, meteorology, on "Some Views of Life and the Practice of Meteorology in the Peoples Republic of China."

Commonplace Theatre, *The Maltese Falcon*, 7 p.m.; *Casablanca*, 9 p.m., Room 112 Kern. HUB Craft Center Open House, 7:30-9:30 p.m., Room 112 HUB.

Robeson Cultural Center, *Black on Broadway*, with Cassandra Hayes, soprano; Maria McDaniels, mezzo-soprano; Michael Austin, tenor; Don Kawash, piano, 8 p.m., Schwab. Free.

Friday, Sept. 7

Last date for registering with foreign language depts. (other than French and Spanish) for written language examinations.

France-Cinema, Werner Herzog, *Aguirre, The Wrath of God*, 7 and 9 p.m., Room 112 Kern.

Artists Series Film, *Gone With the Wind*, 8 p.m., Eisenhower Auditorium.

Saturday, Sept. 8

Sports: field hockey, Lady Lion Invitational, through Sept. 9.

PSOC Hiking Division, ascent of Mount Nittany, via north face, 1:30 p.m., rear of HUB.

Commonplace Theatre, *Tommy*, 7 and 9 p.m., Room 112 Kern.

Sunday, Sept. 9

Free University registration, 11 a.m.-4 p.m., HUB Ballroom.

Commonplace Theatre, *Tommy*, 7 and 9 p.m., Room 112 Kern.

Week of Sept. 10

Monday, Sept. 10

Shakespeare Film, *Oliver, Richard III*, 6:30 p.m., Room 112 Chambers. Free.

France-Cinema, *Aguirre, The Wrath of God*, 7 and 9 p.m., Room 112 Kern.

Tuesday, Sept. 11

Gallery talk, 10:30 a.m., Museum of Art. Mary Lou Kruttschnitt on "Pennsylvania German Illuminated Manuscripts."

Comp. Lit. Luncheon, 12:15 p.m.; talk, 1 p.m., Hotel State College. William Schaefer, executive vice chancellor and provost, UCLA, on "The Future of Foreign Languages."

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Shakespeare Film, *Oliver, Richard III*, 6:30 p.m., Room 112 Chambers. Free.

Penn State International Dancers auditions, 7 p.m., Room 133 White. 865-7591 for information.

Artists Series Film, *Tom Jones*, 8 p.m., Eisenhower Auditorium.

English Colloquium, 8 p.m., Room 101 Kern.

William Schaefer, former executive director, MLA, on "The Future of the Profession: or. The Elephants Are Kindly but They're Dumb."

Wednesday, Sept. 12

Shakespeare Film, *Hall/Rigg, A Midsummer Night's Dream*, 6:30 p.m., Room 112 Chambers. Free.

Dept. of Architecture Films, *Mr. Freedom*, a social satire, 7 p.m.; *Fahrenheit 451*, 9 p.m., Room 112 Kern.

Black Studies Open House, 7:30 p.m., HUB Gallery Lounge.

Humanities Lecture, 8 p.m., Room 101 Kern.

Stephen Toulmin, National Humanities Institute, Univ. of Chicago, on "Vienna and the Spirit of Modernism."

Thursday, Sept. 13

Late registration deadline.

Add deadline.

Nelson W. Taylor Lecture in Materials Science, 4 p.m., Room 26 Mineral Sciences. Turner Alfrey, Jr., The Dow Chemical Company, on "Polymeric Materials - A Historical Review."

Shakespeare Film, *Hall/Rigg, A Midsummer Night's Dream*, 6:30 p.m., Room 112 Chambers. Free.

Dept. of Architecture Films, *Mr. Freedom*, 7 p.m.; *Fahrenheit 451*, 9 p.m., Room 112 Kern.

Friday, Sept. 14

Sports: soccer, vs. Long Island.

France-Cinema, Claude Chabrol, *Violette*, 7 and 9 p.m., Room 112 Kern.

Nelson W. Taylor Lecture in Materials Science, 4 p.m., Room 26 Mineral Sciences.

Turner Alfrey, Jr., The Dow Chemical Company, on "The Effects of Mechanical Processing on the Structure and Performance of Thermoplastic Polymers."

Artists Series, Anthony and Joseph Paratore, duo piano, 8:30 p.m., Schwab.

Saturday, Sept. 15

Sports: football, vs. Rutgers, Beaver Stadium. Commonplace Theatre, *If, 7 p.m.*; *Oh Lucky Man*, 9 p.m., Room 112 Kern.

Performing Arts Festival, John Sowers, magician, 7 p.m.; Penn State Singers, 8 p.m., Schwab.

Sunday, Sept. 16

Commonplace Theatre, *If, 7 p.m.*; *Oh Lucky Man*, 9 p.m., Room 112 Kern.

Week of Sept. 17

Monday, Sept. 17

Last date for Nov. graduates to activate diploma cards in Registrar's Office and to pay these fees in Bursar's Office.

France-Cinema, *Violette*, 7 and 9 p.m., Room 112 Kern.

Performing Arts Festival, Rustical Quality String Band & Red Rose Cotillion Band, 8 p.m., Schwab.

Tuesday, Sept. 18

Gallery Talk, 10:30 a.m., Museum of Art. Roy Buck and Dick Jones, organizers of "Heritage Sampler," walk through the exhibit.

Comp. Lit. Luncheon, 12:15 p.m.; talk, 1 p.m., Hotel State College. Murray Martin, University Libraries, discusses Nobel Prize-winning novelist Patrick White.

Comp. Lit. Film Series, Sidney Lumet, *The Seagull*, 6:45 and 9:05 p.m., Room 112 Kern.

Performing Arts Festival, Contemporary Dance Company, 7 p.m., HUB Ballroom.

Wednesday, Sept. 19

Alard String Quartet, 8:30 p.m., Music Bldg. Recital Hall. Free.

Thursday, Sept. 20

Board of Trustees meeting, Keller Bldg.

Sports: field hockey, vs. Millersville.

Performing Arts Festival, Lou Sopoci, piano; Unity Christian Dance Ministry; Donna Jagiello, 8 p.m., Music Bldg. Recital Hall.

Friday, Sept. 21

Pass/Fail.

Last date for applying for Graduate School Tuition Grant-in-Aid for Winter Term 1980.

Board of Trustees meeting, Keller Bldg.

Sports: soccer, vs. Alderson-Broadus. Commonplace Theatre, *The Apprenticeship of Duddy Kravitz*, 7 and 9 p.m., Room 112 Kern.

Performing Arts Festival, women singers and performers, 7 p.m., Robeson Cultural Center.

Artists Series, Forrest Tucker and Butterfly McQueen in *Showboat*, 8:30 p.m., Eisenhower Auditorium.

Saturday, Sept. 22

Hot Show, 10 a.m.-9 p.m., tents in Flower Gardens.

Sports: football, vs. Texas A&M.

France-Cinema, Eric Rohmer, *Perceval*, 7 and 9:30 p.m., Room 112 Kern.

Performing Arts Festival, Orchestra Dance Company, 7 p.m., Robeson Cultural Center.

Sunday, Sept. 23

Hot Show, 10 a.m.-4 p.m. Sales of some show materials, 4 p.m., tents in Flower Gardens.

Commonplace Theatre, *The Apprenticeship of Duddy Kravitz*, 7 and 9 p.m., Room 112 Kern.

Performing Arts Festival, "Encore-Best Performances of Festival," 8 p.m., HUB Ballroom.

Artists Series, Estelle Parsons in *Miss Margerida's Way*, 8:30 p.m., Schwab.

Week of Sept. 24

Monday, Sept. 24

Pass/Fail.

Drop deadline.

Course repeat deadline.

Preregistration deadline for Winter Term 1980.

New deadline for Winter and Spring Terms. IAHS faculty research grant applications, Isheng Cottage.

France-Cinema, *Perceval*, 7 and 9:30 p.m., Room 112 Kern.

Tuesday, Sept. 25

Last date for written foreign language examinations (other than French and Spanish) for advanced degree candidates.

Comp. Lit. Luncheon, 12:15 p.m.; talk, 1 p.m., Hotel State College. Peter Clemoes, medievalist, Cambridge Univ., speaker.

Sports: soccer, vs. West Chester.

Comp. Lit. Film Series, Antonioni, *The Red Desert*, 7 and 9 p.m., Room 112 Kern.

Archaeological Institute of America Lecture, 8 p.m., Room 101 Kern. Brunilde Ridgway.

Bryn Mawr College, on "Architect and Sculptor in the Sixth Century Athens."

Artists Series Film, Akira Kurosawa, *Seven Samurai*, 8 p.m., Schwab.

English Colloquium, 8 p.m., Room 305 HUB.

Peter Clemoes, Cambridge Univ., on "Symbolic Language in Old English Literature."

Wednesday, Sept. 26

Raymond Page, viola, 8:30 p.m., Music Bldg. Recital Hall. Free.

Thursday, Sept. 27

CSA, Macrame Workshop, 7:30 p.m., Room 112 Kern.

Friday, Sept. 28

Last date for applying for 1980 Study Abroad (Fulbright) Awards.

Commonplace Theatre, *Kentucky Fried Movie*, 7 and 9 p.m., Room 112 Kern.

Artists Series, Pinchas Zukerman, violin, 8:30 p.m., Eisenhower Auditorium.

Saturday, Sept. 29

Last date for Nov. graduates to deliver doctoral theses to committee.

Sports: field hockey, vs. Lock Haven.

France-Cinema, Rainer Werner Fassbinder, *The Bitter Tears of Petra Von Kant*, 7 and 9 p.m., Room 112 Kern.

Sunday, Sept. 30

Commonplace Theatre, *Kentucky Fried Movie*, 7 and 9 p.m., Room 112 Kern.

Week of Oct. 1

Monday, Oct. 1
Outdoor Pool closes officially. Open on temporary basis if weather permits.
Fixed date for meetings involving Commonwealth Campus faculty.
France-Cinema, *The Bitter Tears of Petra Von Kant*, 7 and 9 p.m., Room 112 Kern.
HUB Craft Center Open House, 7:30-9:30 p.m., Room 112 HUB. Also registration for 2nd session classes, Oct. 1-6.
June Miller, organ, 8:30 p.m., Music Bldg. Recital Hall. Free.
Tuesday, Oct. 2
Fixed date for meetings involving Commonwealth Campus faculty.
Comp. Lit. Luncheon, 12:15 p.m.; talk, 1 p.m., Hotel State College. Terry Peavler, Spanish & comp. lit., on "Teaching Film and Literature: A Few Principles."
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.
Sports: field hockey, vs. Maryland.
Comp. Lit. Film Series, *Juri Menzel, Closely Watched Trains*, 7 and 9 p.m., Room 112 Kern.
Artists Series Film, *Wuthering Heights*, 8 p.m., Schwab.

Wednesday, Oct. 3
Afro-American Studies Forum, 7:30 p.m., Room 112 Kern. Stanley E. Baker, Virginia Commonwealth Univ., on "Reading and Language Arts Teaching: A Case for Judicial Intervention."
Thursday, Oct. 4
GSA, Chinese Cooking Workshop, 7:30 p.m., Room 102 Kern.
Sports: field hockey, vs. Delaware.
University Theatre, *The Michael Christofer, The Shadow Box*, 8 p.m., The Playhouse.

Friday, Oct. 5
HUB Craft Center demonstration, 11:30 a.m., Kern Lobby.
Sports: soccer, vs. Lafayette.
Commonsplace Theatre, *Psycho*, 7 p.m.; *North by Northwest*, 9 p.m., Room 112 Kern.
University Theatre, *The Shadow Box*, 8 p.m., The Playhouse.
Saturday, Oct. 6
Last date for final oral examinations for Nov. graduates.
Last date for Nov. graduates to deliver masters' theses or papers to Graduate School.
Sports: field hockey, vs. Ohio State.
Artists Series, Neil Simon, *Chapter Two*, 3 p.m. and 8:30 p.m., Eisenhower Auditorium.

Week of Oct. 29

Monday, Oct. 29
Last day to sign Fall Term NDSL and University Long Term Loans, Room 108 Shields.
Late drop deadline.

Tuesday, Oct. 30
Comp. Lit. Luncheon, 12:15 p.m.; talk, 1 p.m., Hotel State College. Wendell Harris, English, speaks.
Comp. Lit. Film Series, *Ray, Aparajito*, 7 and 9 p.m., Room 112 Kern.

Archaeological Institute of America Lecture, 8 p.m., Room 101 Kern. Alan Borgheold, classics, Brown University, on "Epigraphy as a Tool in Archaeological Research."

Wednesday, Oct. 31
Colloquy Halloween Special. Ed and Lorraine Warren, seekers of the supernatural, speak, 8 p.m., Room 102 Kern.
Penn State Brass Choral, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, Nov. 1
GSA, Vegetarian Cooking Workshop, 7:30 p.m., Room 102 Kern.
French Dept., *Saint-Exupery, Le Petit Prince*, performed by Compagnie Bernard Uzan, 7:30 p.m., Schwab.

Friday, Nov. 2
Sports: soccer, vs. Temple.
Artists Series, Music from Marlboro, 8:30 p.m., Schwab.

Saturday, Nov. 3
Sports: football, vs. Miami (Fla.).

Week of Nov. 5

Monday, Nov. 5
France-Cinema, Wim Wenders, *The American Friend*, 7 and 9 p.m., Room 112 Kern.
Mieja Ahn, piano, 8:30 p.m., Music Bldg. Recital Hall. Free.

Tuesday, Nov. 6
Comp. Lit. Luncheon, 12:15 p.m.; talk, 1 p.m., Hotel State College. Lorraine Kapitanoff, Slavic languages, on "Art Treasures of Russia."

Comp. Lit. Film Series, *Ray, World of Apu*, 7 and 9 p.m., Room 112 Kern.
Artists Series Film, *Women in Love*, 8 p.m., Schwab.

Wednesday, Nov. 7
Shakespeare Film, *Scotfield/Brook, King Lear*, 6:30 p.m., Room 112 Chambers. Free.
Robert Tudy, baritone, 8:30 p.m., Music Bldg. Recital Hall. Free.

Thursday, Nov. 8
Shakespeare Film, *Scotfield/Brook, King Lear*, 6:30 p.m., Room 112 Chambers. Free.

Friday, Nov. 9
Sports: soccer, vs. Connecticut

Saturday, Nov. 10
Last date to submit petition to Records Officer to graduate in absentia in Nov.
Sports: men's fencing, Men's Open, 8 a.m., through Nov. 11.
Penn State Symphony Orchestra Young People's Concert, 10:30 a.m., Eisenhower Auditorium.

Week of Nov. 12

Monday, Nov. 12
Fall Term classes end, 9:55 p.m.
Last day to sign Fall Term Emergency Loans, Room 108 Shields.

Tuesday, Nov. 13
Final examinations.
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Wednesday, Nov. 14
Final examinations.

Thursday, Nov. 15
Final examinations.
Board of Trustees meeting, Keller Bldg.

Friday, Nov. 16
Final examinations.
Board of Trustees meeting, Keller Bldg.

Saturday, Nov. 17
Sports: football, vs. Temple, exhibition basketball, "Athletes in Action."
Residence Halls close for Fall Term, 3 p.m.

Week of Nov. 19

Monday, Nov. 19
Fixed date for meetings involving Commonwealth Campus faculty.

Tuesday, Nov. 20
Fixed date for meetings involving Commonwealth Campus faculty.

Thursday, Nov. 22
Thanksgiving Day, University offices closed.
Saturday, Nov. 24
Sports: football, vs. Pittsburgh.
Sunday, Nov. 25
Residence Halls open for Winter Term, 10 a.m.
Fall Term Commencement, 1:30 p.m., Rec. Hall.

Exhibits

Ferguson Lobby:
Jerry Rebyurn, "Games Made of Wood," through Sept. 28.

HUB Galleries:
"Roma Interrotta," original architectural drawings, through Sept.
Rome Hanks and Mary Edith Miller, photographs, month of Oct.
Homecoming exhibits, Oct. 1-15.
HUB Craft Center exhibits, month of Nov.

Kern Commons Galleries:
Richard Chavka, glass, through Sept. 1.
Mahn Chanbati, ceramics, Sept. 4-22.
Harley Strauss, photographs, "Cities, U.S.A.," photos, Sept. 8-29.
Tsing-fang Chen, paintings, Sept. 29-Oct. 27.
Harriet Rosenberg, multi-media, Oct. 6-20.
Roy Fender, hamburger ceramics, Oct. 20-Nov. 3.

BFA/MFA candidate: exhibit, prints and papermaking, "Year of the Child," exhibit from United Nations Association, Oct. 27-Nov. 17.
Mitchell Weiss, ceramics, Nov. 3-24.

Museum of Art:
Open daily noon-5 p.m., except Mondays. Free tours on Sundays, 1:30 p.m.
Works by Arthur B. Davies, on the collection of Mr. and Mrs. Herbert Brill, through Sept. 9.

"Heritage Sampler," through Sept. 23.
Recent work by George Zoretich, Sept. 16-Oct. 21.
French drawings from the former Armand Goblet collection, opens Nov. 11.

Pattee Library:
Diane Pease, papermaking, East Corridor Gallery, through Sept. 17.

Robeson Cultural Center:
"Black Women: Achievements Against the Odds," biographical and historical texts, photographs, silk-screened illustrations, Sept. 8-Oct. 7.

Zoller Gallery:
Undergraduate students' exhibit, through Sept. 9.
Faculty exhibit, Sept. 16-Oct. 7.
Siskind Photographic Shop, Oct. 14-Nov. 4.
Betty Parsons and Clinton Hill exhibits, opens Nov. 11.

Penn Staters

Dr. Forrest J. Remick has been appointed as one of six voting members of the Governor's Energy Council. Dr. Remick is assistant to the Vice President for Research and Graduate Studies and professor of nuclear engineering. The Council's charge is to develop a comprehensive energy plan for the Commonwealth and to coordinate and distribute federal and private energy funds to implement planning and conservation efforts, and research and development of new energy sources. It will also collect and disseminate information relating to energy conservation and innovative uses of available resources; evaluate existing and new energy plans, policies and programs; prepare a data base for existing resources and uses; and operate the state emergency allocation set aside program.

Dr. Harold E. Mitzel, associate dean for research in the College of Education, has been named editor of the forthcoming fifth edition of the *Encyclopedia of Educational Research*. Dr. John H. Best, head of the Division of Education Policy Studies and professor of education, and Dr. William Rabinowitz, professor of educational psychology, have been named associate editors. The *Encyclopedia of Educational Research* is a publication of the American Educational Research Association.

Dr. Larry O. Gamm, associate professor of community development and chairman of the Center for Community Research, presented a paper at the recent organizational meeting of the International Voluntary Action Research Organization, held at the University of Grenoble's Institute of Economic and Social Administration. The paper, entitled "Citizen Involvement in Solid Waste Siting," was developed with the support of the Institute for Research on Land and Water Resources.

Dr. David A. Long, associate professor of civil engineering, has received the Hazeltine Award of the Water Pollution Control Association of Pennsylvania in recognition of his contributions in the water quality management field.

Dr. H. Seymour Fowler, professor of education, recently presented a paper at sessions of the International Confederation of Associations for Science and the Caribbean Regional Organization of Associations for Science Education meeting in Barbados. His topic was "Using the Environment to Teach Science."

James W. Hilton has been promoted to assistant professor of agricultural engineering and agricultural education, effective Sept. 1. He received his Ph.D. from Iowa State University Aug. 15.

Bookshelf

Dr. Robert B. Eckhardt, associate professor of anthropology, is the author of a book, *The Study of Human Evolution*, published recently by The McGraw-Hill Book Company.

The 596-page book is designed for beginning students in biological anthropology, a diverse audience which includes undergraduates and graduate students. Its use by those at different levels of sophistication is made possible by having the core text augmented by more advanced mathematical methods and case studies that are identified as supplements within chapters and as appendices at the ends of chapters.

The organizing theme for all of the subject matter is evolution, which is the central theoretical principle in modern population biology. The approach taken within this framework is to describe our knowledge of the genetic and environmental determinants of variation in living humans and our nonhuman primate relatives, emphasizing the dynamics of how this knowledge has been acquired,

rather than suggesting that the subject consists of a static body of unchanging facts. From this perspective, with the present serving as a guide to the past, the last one hundred million years of primate and human evolution are reconstructed.

The Study of Human Evolution is used in Introductory Physical Anthropology (Anthropology 21) at Penn State. All royalties on copies sold at Penn State will be placed in the Davis Fund for the Study of Human Evolution, established to honor the author's father-in-law, Dr. Joseph Davis, a physician and scholar who is now retired. Dr. Davis was instrumental in guiding Dr. Eckhardt into the study of human evolution. The fund may be augmented by contributions from individuals and organizations interested in the field, with the proceeds to support Penn State students working in this area.

Dr. Joan D. Mandel, assistant professor of sociology at the Delaware County Campus, is the author of *Women and Social Change in America*, published recently by Princeton Book Company.

The 240-page work is a sociological account of women in American society, particularly since 1960. It analyzes and integrates ideological, demographic, economic, technological and collective personality factors in social change, and explores the relationship between them and the changing status of women.

It also demonstrates how these changes triggered the emergence of the Women's Liberation Movement and contributed to its organization, structure and goals. Finally, it explores the possible effects of the Movement itself on women's lives and on broader social change.

The book is intended as a college reference book in courses dealing with social change, social movements, and sex roles.

Retirements

Dr. Simon Belasco, professor of Romance linguistics and head of the Linguistics Program, has retired with the rank of professor emeritus of Romance linguistics.

Recently, Dr. Belasco was named recipient of the Educator-of-the-Year Award of the Pennsylvania Modern Language Association, and he will receive the award at the Association's annual conference this fall in Edinburgh, Pa.

A Fellow of the Institute for the Arts and Humanistic Studies, Dr. Belasco joined the faculty in 1953 after teaching at the University of Pennsylvania.

He has written or co-authored several books on applied linguistics and on the teaching of French in high school and college, and was editor and co-author of two versions of *The Manual and Anthology of Applied Linguistics in French, German, Italian, Russian and Spanish*.

Temple University conferred his B.S. degree, and his M.A. and Ph.D. were earned at the University of Pennsylvania.

Currently, Dr. Belasco is conducting research on several dialects of southern France. He is residing in Columbia, S.C., where he will be affiliated with the University of South Carolina.

Dr. Barbara Raffel Price, assistant professor of law enforcement and corrections in the Division of Community Development, College of Human Development, retired from the University on June 30 after 10 years of service.

Dr. Price, who will continue to reside in State College, has accepted the position of associate professor of criminal justice in the Department of Law and Police Science at CUNY's John Jay College of Criminal Justice.

Dr. Price's research has focused on analyses of complex organizations, particularly criminal justice organizations, from a sociological perspective. She is author of the book, *Police Professionalism: Rhetoric and Action*, and co-author of *Justice and Crime Treatment*.

She earned her B.A. in sociology from Smith College and her M.A. and Ph.D., both in sociology, from Penn State.

Mary E. Godfrey, assistant professor of art education, retired July 1 after 22 years of service with the University.

After receiving the B.F.A. from Pratt Institute and an M.A. from Columbia University, she was employed as a high school teacher and supervisor of art. From 1947 to 1957 she was assistant state supervisor of art education for the Virginia Department of Education.

Prof. Godfrey joined Penn State's art education faculty in 1957, teaching courses in elementary and secondary art education, supervision, and introduction to crafts. She has studied art education laboratories in Pennsylvania, as well as art rooms and facilities for junior high schools. Her paintings and craft works have been exhibited in both Pennsylvania and Virginia.

Staff Vacancies

The following vacancies for positions classified as staff exempt from staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Sept. 4, 1979. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

INSTRUCTIONAL RESOURCES SPECIALIST, College of Medicine Responsible for production, dissemination and maintenance of all electronic and photographic audiovisual media and their related physical assets. He/she will be responsible for the direction of all television productions. Operate and maintain reproduction and dissemination equipment within the department.

APPLICATIONS ANALYST/PROGRAMMER — OFFICE OF THE UNIVERSITY REGISTRAR, University Park Responsible to the Coordinator of Data Systems and Procedures for conducting analysis of data processing problems, relating to the scheduling of classes, pre-registration, registration and record keeping. Determine detailed requirements to solve problems, prepare and modify computer programs to satisfy desired end results. Investigate systems equipment and techniques and make recommendations for installation. Bachelor's degree or equivalent and one to two years of directly related experience in computer programming and analysis.

RECORD SUPERVISOR, DHIA — COLLEGE OF AGRICULTURE, University Park Check DHIA barn sheets daily; return any reports with errors or information missing to the supervisors for correction. Maintain file on the status of each herd. Audit each new herd entering the program for the basic data needed. Report status of herds to county agents monthly. Assist with DHIA short courses and special projects as necessary. Supervise filling of processed reports; audit special reports which are forwarded to the breed association offices. Answer telephone questions about status of and/or errors in DHIA reports. Inform DHIA fieldman of needed changes in reporting procedures by DHIA supervisors. High school graduation or its equivalent with one to two years of directly related experience in dairy farming, report forms and the principles of data processing required.

RESEARCH AIDE, COLLEGE OF AGRICULTURE, University Park Collect data on field experiments in spring, summer and fall. Conduct laboratory analyses throughout the winter and in other periods as time permits. Measure soil pH and soil losses under field conditions. Measure soil texture, bulk density, infiltration rates, and soil structure by suitable means. Determine applications of irrigation water. Prepare and care for field experiments, sampling soil at appropriate times by specifically chosen procedures. Plant, care for and harvest crops on each experiment. Obtain field soil samples for laboratory measurements. Record and summarize data. Bachelor of science degree and up to

Marie E. Smith, a residence hall worker in Housing and Food Services, retired Sept. 1. She had been a member of the staff since July 29, 1969.

Obituaries

Dr. John R. Bracken, head of the landscape architecture program from 1926 to 1957, died Aug. 23. He was 87.

Dr. Bracken served for five years on the faculty of the University of Wisconsin following his 1957 retirement as professor emeritus of landscape architecture from Penn State.

He was among the first graduates in landscape architecture at Penn State, receiving a B.S. in 1914. He worked with landscape architectural firms in Pittsburgh and Philadelphia until 1924, when he was named to the agricultural extension staff at Penn State.

He later studied at Harvard University and the University of Michigan, and received his master of landscape design degree in 1934 and doctor of philosophy degree in 1945, both from the University of Michigan.

James W. Jacobs, assistant coordinator for contracts and business services in the College of Education, died Aug. 18. A 1954 graduate of the University, he was born April 15, 1931, in Altoona.

Allice R. Crilly, a stenographer in the College of Agriculture from 1931 to 1955, died Aug. 13 at the age of 89.

one year of directly related experience in soil research required.

ASSISTANT COORDINATOR — CONTINUING EDUCATION, University Park Responsible to the Coordinator of Contracts and Business Services for assisting in the administration of policies and procedures concerning the preparation and development of proposals for funding various types of continuing education programs and the completion of a variety of details involved in facilitating the development of and operation of programs. Bachelor's degree, plus two to three years of related experience.

ASSISTANT DIRECTOR FOR ADMINISTRATION — STUDENT AFFAIRS, University Park Responsible to the Director of University Health Services for planning, organizing, coordinating, directing and controlling non-medical functions and activities of the Health Center in accordance with established policies and procedures. Master's degree or equivalent in hospital administration or health services, with over two, up to and including four years of directly related experience is required. Special emphasis on business, finance and/or management is preferred.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS — STUDENT AFFAIRS, Altoona Campus Responsible to the Dean of Student Affairs for the supervision and program direction of the Altoona Campus student union facilities and student religious affairs. Specific duties and responsibilities include: advising of active recognized campus organizations; maintaining a schedule of activities for the student activities building and the campus chapel; develop a weekly calendar of activities for the campus community; plan and direct the use of cultural programming; management, scheduling and supervision of the All Faith Chapel; and direction of an on-going religious affairs program and other duties as assigned by the Dean of Student Affairs. Master's degree or equivalent in college student personnel or related field of study, plus up to one year directly related experience.

COUNSELOR — STUDENT AFFAIRS, University Park Responsible to the Director of Career Development and Placement Center for providing career development and placement services to the University Park Campus. Master's degree in clinical or counseling psychology, counselor education or related area, plus one to two years of directly related experience are required.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

News in Brief

William Schaefer

UCLA Provost IAHS guest next week

Dr. William D. Schaefer, executive vice-chancellor and provost of UCLA and former executive director of the Modern Language Association, will visit the University on Monday, Sept. 10, and Tuesday, Sept. 11, as the guest of the institute for the Arts and Humanistic Studies.

In addition to meetings with students and faculty, Dr. Schaefer will talk to the Comparative Literature Luncheon on Sept. 11, his topic being "The Future of Foreign Languages."

He will address the English Colloquium at 8 p.m. Sept. 11 in Room 101 Kern on the topic, "The Future of the Profession; or, The Elephants Are Kindly but They're Dumb."

Dr. Schaefer, who received his B.A. from New York University and the M.A. and Ph.D. from the University of Wisconsin, joined the UCLA faculty in 1970. He was promoted to professor of English in 1970 and to his present administrative post in 1976.

From 1971-78, he served as executive director of the MLA, the largest organization of University-level scholars in the United States. He is the author of numerous articles and two books on 18th century English literature.

Dental plan deductible for families explained

Questions have arisen which suggest that some members of the University community do not understand fully the family deductible provision of the University's dental plan.

The dental plan requires an annual \$25 deductible of the first eligible charges incurred by an individual before the plan begins making payments for that individual. However, if there are more than two covered members in a family, once any two such members of the family each has satisfied a deductible for charges, the rest of the covered family members do not have to satisfy a deductible to have their charges covered for the balance of that calendar year.

This provision is similar to the \$100 major medical deductible in the UNICARE plan. When each of two eligible family members has satisfied a \$100 UNICARE deductible, future covered charges for the remainder of that calendar year for all of the covered eligible family members are reimbursable without further deductibles.

The Challenge of the '80s

Editors Note: These articles are the first in a series in which the academic deans reflect on what lies ahead for their colleges in the '80s.

Even with declining numbers of high school graduates in the eighties, a Penn State education will still be in demand, Earth and Mineral Sciences Dean Charles L. Hosler believes.

"The future strength of our College and of Penn State's other professional and science-oriented colleges is assured if for no other reason than the public's realization that it needs the things we do," Dean Hosler says.

"We already have the faculties, the scientific equipment and the physical facilities to adjust to a growing demand to train professional people able to produce the goods this country must have and to support an economy increasingly dependent upon exports. At the same time, we will be called on to train people from developing countries as their populations demand higher standards of living."

"So overall I'm not discouraged by the demographic data on high school graduates. I think the universities in the United States with strong science and technology programs will be able to sustain their size or perhaps even to grow."

Dean Hosler points out that 30 years

(Both articles continue on page 4)

The 1980s will make continuing demands on the College of Agriculture's research and extension expertise while bringing a somewhat reduced baccalaureate teaching load, according to Dean James M. Beattie.

"Looking ahead five to ten years, undergraduate enrollments in Agriculture may decline by as much as 10 percent from their 1978 high of 3,762," Dean Beattie notes, but he adds:

"From our point of view, this isn't all bad. Our baccalaureate degree enrollment grew by nearly 200 percent between 1970 and 1978, making us one of the largest agricultural colleges in the country. At the same time, constraints in State and federal funding prevented us from increasing the size of our teaching faculty. So from the standpoint of doing a good job of quality teaching, a modest decline in student numbers isn't all bad."

In the foreseeable future, Dean Beattie believes that student interest will remain high in horticulture, agronomy and dairy and animal science. He also predicts continuing interest in environmental resource management, a major which the College introduced in 1971.

"We began with about 49 majors," he

Continuing ed cable television network arrives

A cable television network that will provide continuing education services to the entire state of Pennsylvania came into existence Tuesday, Sept. 4, at the University.

The new network, the first statewide TV system of its type in the country, was formed with the signing of an agreement by President Oswald and George Barco, president of the Pennsylvania Educational Communications Systems (PECS).

"The establishment of this network reflects an excellent spirit of cooperation between a land-grant university and private industry," Dr. Oswald commented. "Because of the efforts of PECS in funding and administering the project and the University's work in mobilizing its learning resources, millions of Pennsylvanians will have access to higher education without ever leaving their homes."

Initially, the network, to be known as PENNARAMA, will make college courses available to 283,000 cable subscribers in Northeastern Pennsylvania. Will begin promptly to extend the service statewide through an extensive microwave relay system.

Eventually, college courses will be available to all cable-subscribing households in the State. Currently this represents 1.2 million households.

PENNARAMA will offer a full range of credit and non-credit courses for adults, from general liberal education programs to professional and occupational programs. Students will enroll through Penn State's

Senate to discuss degree requirements

A proposal to require students to earn at least a 2.00 cumulative average in their major courses in order to graduate is the sole legislative item facing the University Faculty Senate when it opens its new academic year Tuesday, Sept. 11, at 2:10 p.m. in Room 112 Kern Graduate Building.

The legislation appears on page 8. A number of informational reports are also on the agenda, including an oral report by Donald G. Dickason, recently appointed dean of admissions. Oral reports will also be made by Graduate School Dean James B. Bartoo, chairman of a joint faculty-administrative committee charged with making policy recommendations on promotion and tenure, and by Foreign Studies Director W. LaMar Kopp.

Other informational committee reports appearing on the docket include:

- Curricular Affairs: Curricular Procedures and Implementation of BDR III;
- Committees and Rules: Procedures Governing Attendance, Resignation and Exception Requests;
- Extended Degrees: Policies Governing Extended Degree Program Proposal and Review;
- Intra-University Relations: Initiation of 198 Courses; and
- Planning and Development: Year-End Report on University Physical Plant.

Penn Staters

Dr. John W. Burnside, associate professor of medicine and chief of internal medicine at Hershey has been named one of six Robert Wood Johnson Health Policy Fellows by the National Academy of Sciences Institute of Medicine. Dr. Burnside has been granted a sabbatical, effective Sept. 1, for a year's study and congressional work assignments in Washington, D.C. The Robert Wood Johnson Foundation has provided a grant to the University as a one-year stipend and fringe benefits support for Dr. Burnside.

The fellowship program was established by the Institute of Medicine with support from the Johnson Foundation in 1974 and is conducted in cooperation with the American Political Science Association (APSA). It is designed to provide outstanding mid-career health professionals working in academic settings with a better understanding of the major issues of health policy and a knowledge of how federal health programs are established.

Dr. Burnside received both his B.S. and M.D. degrees from the University of Illinois. He took his internship and residencies in medicine and pathology at the Massachusetts General Hospital. During this time, he held teaching, research and clinical fellowships at Harvard Medical School.

Dr. Rupert P. Amann, professor of dairy physiology, recently received The American Society of Animal Science Award in Animal Physiology and Endocrinology, awarded annually by the American Cyanamid Co., in recognition of his outstanding research in the area of male reproductive physiology.

Dr. Jerry C. Olson, associate professor of marketing, has been elected president of the Association for Consumer Research. ACR consists of 1,000 academic, business and government members who share research interests in consumer behavior. During 1979-80, Dr. Olson will serve as president-elect and as president in 1980-81. He is currently serving as program chairman of the ACR's 10th Annual Conference.

Dr. Napoleon Chagnon, professor of anthropology, has been invited to serve on the Honorary Committee of the third annual Margaret Mead Film Festival. Dr. Chagnon participated in the two earlier festivals, both as a member of the Honorary Committee and as filmmaker. Several of his award-winning films on the Yanomamo Indians were screened.

Bookshelf

Dr. Stanley Weintraub, research professor of English and director of the Institute for the Arts and Humanistic Studies, is the author of *The London Yankees: Portraits of American Writers and Artists in England, 1894-1914*, published recently by Harcourt Brace Jovanovich.

The 408-page work probes those prodigiously talented Americans who crossed the Atlantic to make, or restore, their reputations in the two decades preceding the first shots of World War I.

"For the American aspiring to a creative life," Dr. Weintraub writes, "London had a sentimental allure, a psychic value, a professional practicality. It meant the presence of the past as a working influence on one's daily life, and although there was a palpable past in Rome or Florence or Paris, it was not accessible in one's own language, and the intellectual ambience was somehow askew."

Dr. Weintraub has sketched portraits, sometimes from an unfamiliar perspective, of Mark Twain, Bret Harte, Stephen Crane, James McNeill Whistler, John Singer Sargent, Henry James, Ezra Pound, T.S. Eliot, Robert Frost and other Yankees who reached the pinnacle of fame and influence around the turn of the century. While some of them resisted

assimilation into British culture, others reveled in it, the author demonstrates. Stephen Crane, author of *The Red Badge of Courage*, played at being a country squire while churning out copy to stave off his new debts and exhorting the anglicization of Mark Twain, "the wild, free son of nature" who had become a stuffed shirt in "collars and a coat." Bret Harte, looking very much the respectable English clubman, continued to write nostalgically of the vanished American West he could no longer accurately recall.

So influential were some Yankees in London that the *Yellow Book* — the quintessential magazine of the 1890s — was founded and edited by one of them, Henry Harland. And the commission for the official coronation portrait of Edward VII was offered to Philadelphia's Edwin Abbey, who, like London's leading portraitist, John Singer Sargent, refused a knighthood rather than relinquish his citizenship.

The *London Yankees* has been reviewed by *The New York Times Book Review*, *The Washington Post Book World*, and *Newsweek*, among others.

Dr. Joseph W. Michels, professor of anthropology, has authored a book entitled *The Kaminaljuyu Chieftom*. The first comprehensive study of a Mesoamerican chieftom based on archaeological findings, this book presents a detailed reconstruction of its social, political and economic organization. The evolution of a Pre-Columbian chieftom throughout 2,000 years is synthesized from data gathered by the Penn State Kaminaljuyu Project. The 283 page book is published by The Pennsylvania State University Press.

Dr. Michels has been involved in the archaeology of Kaminaljuyu, Guatemala, for a decade, was co-director of field investigations there for four years, and is co-editor of the *Pennsylvania State University Press Monograph Series on Kaminaljuyu*.

Dr. Arthur Goldschmidt Jr., associate professor of history and chairman of the University's undergraduate program in Middle East studies, has written a new text, *A Concise History of the Middle East*, published in this country by Westview Press, Inc., and in Great Britain by Wm. Dawson and Sons, Ltd. The book traces events up to early in 1979, and includes a brief reference to the signing of the Camp David accord last March.

Dr. Goldschmidt focuses on the evolution of Islamic institutions and culture, the influence of the west, the rise of Arab nationalism and Zionism and the development of the Arab-Israeli conflict. An overriding theme is the great influence of religion upon almost all matters of personal status, social class and economic activity in the Middle East.

"I have tried to show how the various parties in political and economic disputes have seen the issues and why they reacted as they did in specific cases," he says. "It's very difficult to boil down to its essence the history of so many different peoples over so long a time in such a complicated region."

Written primarily as an introductory textbook for students, the volume is informal in tone and includes an extensive glossary for the beginner in Middle East studies. It may also interest other readers who want to know more about the background of the current Middle East conflict.

Educated at Colby College, the American University of Beirut and Harvard University, Dr. Goldschmidt has lectured and conducted research in several Middle Eastern countries. His book is available in both hard cover and paperback.

Obituaries

Grace Glossner, a counterwoman with Housing and Food Services from 1953 to 1966, died June 23. She was 77.

Robert R. Beatty, a group leader — maintenance at the Fayette Campus, died Aug. 24. He was 55. Mr. Beatty had been employed at Fayette since 1968.

Joseph T. Green, a maintenance worker and pipefitter with the Office of Physical Plant, died Aug. 24. Born in Milesburg, Pa., May 20, 1905, Mr. Green was employed at the University from 1942 until his retirement in 1970.

Mildred Kreck, a clerk in the Office of Gifts and Endowments, died Aug. 28. She was 48. She began working at the University in 1972 as a clerk in the Division of Instructional Services, moving to OGE last year.

From the Press

Hemingway's Hidden Craft: The Writing of 'A Farewell to Arms.' by Bernard Oldsey. 123 pages. \$8.95

An account of Hemingway's composition of his classic war novel, this book provides new evidence of Hemingway's exact and sensitive craftsmanship.

This evidence includes transcripts of two handwritten chapters constituting the earliest beginning of the novel known to exist, as well as 41 variant endings — material published here in full for the first time by permission of Mary Hemingway.

Following an introduction describing the novel's publishing history in the context of the novelist's career, Dr. Oldsey examines Hemingway's selection of a title; his development of settings, characters, and plot elements inspired by his own war experiences; his struggle to find an opening with the best possible "poetic method, dramatic structure, and narrative overview"; and his search for the right ending to complete the novel's circle "by a geometry of his own."

Dr. Oldsey, a former Penn State faculty member, is professor of English at West Chester State College.

In a Rebellious Spirit: The Argument of Facts, the Liberty Riot, and the Coming of the American Revolution. By John Phillip Reid. 168 pages. \$13.75.

Prof. Reid offers a fresh view of the legal arguments leading to the American Revolution. He presents a case for the argument that rebellious acts called "lawless" mob action by British authorities "were sanctioned by 'whig law' in the eyes of the colonists. The book also holds that leading historians have been misled by taking both sides' forensic statements at face value.

The focus is on three events: the Malcolm affair (1766), a parade in Boston to celebrate the second anniversary (1768) of the repeal of the Stamp Act, and the Liberty riot (1769). Legal inquiries into the three events were marked by hyperbole on the part of the whigs and the Tories. Both sides had extralegal motives, both succeeded in their polemic aims, and both have galled most historians.

A professor of law at New York University, Dr. Reid is the author of two earlier books published by Penn State's Press, *In a Defiant Stance* and *A Better Kind of Hatchet*. He has also written two books on early American judges.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Promotions

Faculty

George M. Radakovic to assistant professor of economics at McKeesport.

Clerical

Cindy L. Breen to senior clerk — scholarships and grants in Student Affairs.

Doris L. Carter to secretary C in Continuing Education.

Constance A. Colyer to technical secretary B in Office of University Registrar.

Beverly Crabtree to secretary B at Altoona.

Mary P. Daily to secretary B in Continuing Education.

Bonnie B. Griffith to secretary B in Controller's Office.

Mardi D. Hockenberry to clerk, records A in Office of University Registrar.

Nancy D. Karschner to clerk typist A in Liberal Arts.

Claudia Keith to secretary C in Continuing Education at Altoona.

Debra Kennedy to clerk typist A in Earth & Mineral Sciences.

Cynthia A. Krusch to secretary C in Agriculture.

Diane M. Lasher to secretary B in Continuing Education.

Kathy L. Mulberger to clerk A in Continuing Education.

Patricia A. Pastorik to clerk, interlibrary loans A in Library.

Mary B. Ripley to clerk expeditor A in Business Services.

Marjorie P. Rosefsky to clerk, typist A in Physical Plant.

Suzanne M. Seamans to secretary B in Gifts and Endowments.

Rose Ann Wallace to secretary B in Personnel Administration.

Staff Exempt

Lydia P. Abdullah to audit manager in Controller's Office.

Stanley F. Crilly to scientific photographic instructor in Agriculture.

June Emanuelson to administrative assistant for academic services at New Kensington.

Edward E. Faust to supervisor, cinematography/videography in Continuing Education.

H. Roger Kohn to cinematographer/videographer in Continuing Education.

Elaine E. Martin to administrative aide in Engineering.

William A. McVicker to operations manager in Penn State Bookstore.

Mary Menair to assistant director for University Relations at New Kensington.

Robert K. Reese Jr. to assistant buyer in Housing & Food Services.

Michael P. Salmon to manager of pharmacy at Hershey.

Timothy E. Swartz to cinematographer/videographer in Continuing Education.

Staff Nonexempt

Anthony M. Cavaliere to senior research technician at Hershey.

Maria R. English to junior computer operator at Hershey.

Technical Service

Samuel C. Emigh to truck operator, waste sludge in Physical Plant.

Jay R. Kramer to stockroom clerk B in Physical Plant.

Barbara A. Sinclair to patient service aide at Hershey.

Edward A. Telesha to group leader, heating, ventilating and refrigeration at Hershey.

University Park Calendar

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Sept. 6-16 Special Events

Thursday, Sept. 6
Commonsplace Theatre, *The Maltese Falcon*, 7 p.m.; *Casablanca*, 9 p.m., Room 112 Kern.
HUB Craft Center Open House, 7:30-9:30 p.m., Room 312 HUB.
Religious Affairs Film, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.
Calligraphy demonstration, 8 p.m., Room 312 HUB.
Robeson Cultural Center, *Black on Broadway*, 8 p.m., Schwab. Free.

Friday, Sept. 7
Last date for registering with foreign language depts. (other than French and Spanish) for written language examinations.
Print exhibit and sale, 8:30 a.m.-5 p.m., Kern Lobby.
HUB Craft Center registration, through Sept. 8, noon-5 p.m., Room 312 HUB.
France-Cinema, Werner Herzog, *Aguirre, The Wrath of God*, 7 and 9 p.m., Room 112 Kern.
Interlandia Folk Dance Group, folk dance lessons, 7:30-9:30 p.m., requests, 9:30-11:30 p.m., HUB Ballroom. Everyone welcome, each Friday.
Artists Series Film, *Gone With the Wind*, 8 p.m., Eisenhower Auditorium.

Saturday, Sept. 8
Sports: field hockey, Lady Lion Invitational, through Sept. 9.
PSOC Hiking Division, ascent of Mount Nittany, via north face, 1:30 p.m., rear of HUB.
Commonsplace Theatre, *Tommy*, 7 and 9 p.m., Room 112 Kern.

Sunday, Sept. 9
University Chapel Service, The Reverend Robert Boyer, PSU United Ministry, 11 a.m., Eisenhower Chapel.
Free U registration, 11 a.m.-4 p.m., HUB Ballroom.
Commonsplace Theatre, *Tommy*, 7 and 9 p.m., Room 112 Kern.

Monday, Sept. 10
Shakespeare Film, Olivier, *Richard III*, 6:30 p.m., Room 112 Chambers. Free.
France-Cinema, *Aguirre, The Wrath of God*, 7 and 9 p.m., Room 112 Kern.

Tuesday, Sept. 11
Gallery Talk, 10:30 p.m., Museum of Art. Mary Lou Krumrine, doctoral candidate, art history, on "Pennsylvania German Illuminated Manuscripts." #
Comp. Lit. Luncheon, 12:15 p.m.; talk, 1 p.m., Hotel State College. William Schaefer, executive vice chancellor and provost, UCLA, on "The Future of Foreign Languages."
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.
Shakespeare Film, Olivier, *Richard III*, 6:30 p.m., Room 112 Chambers. Free.
Penn State International Dancers auditions, 7 p.m., Room 133 White. 865-7591 for information.
Artists Series Film, *Tom Jones*, 8 p.m., Eisenhower Auditorium.
English Colloquium, 8 p.m., Room 101 Kern.

BECAUSE IT'S THERE — Mt. Nittany readies itself for the annual PSOC Hiking Club assault on Saturday.

William Schaefer, former executive director, MLA, on "The Future of the Profession; or, The Elephants Are Kindly But They're Dumb."

Wednesday, Sept. 12
Shakespeare Film, Hall/Rigg, *A Midsummer Night's Dream*, 6:30 p.m., Room 112 Chambers. Free.
Dept. of Architecture Films, *Mr. Freedom*, a social satire, 7 p.m.; *Fahrenheit 451*, 9 p.m., Room 112 Kern.
Black Studies Open House, 7:30 p.m., HUB Gallery Lounge.
Humanities Lecture, 8 p.m., Room 101 Kern. Stephen Toumin, National Humanities Institute, Univ. of Chicago, on "Vienna and the Spirit of Modernism."

Thursday, Sept. 13
Late registration deadline.
Add deadline.
Nelson W. Taylor Lecture in Materials Science, 4 p.m., Room 26 Mineral Sciences. Turner Alfrey, Jr., The Dow Chemical Company, on "Polymer Materials — A Historical Review."
Shakespeare Film, Hall/Rigg, *A Midsummer Night's Dream*, 6:30 p.m., Room 112 Chambers. Free.
Dept. of Architecture Films, *Mr. Freedom*, 7 p.m.; *Fahrenheit 451*, 9 p.m., Room 112 Kern.
Religious Affairs, ten-part film series, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.

Friday, Sept. 14
Sports: soccer, vs. Long Island.
France-Cinema, Claude Chabrol, *Violette*, 7 and 9 p.m., Room 112 Kern.
Nelson W. Taylor Lecture in Materials Science, 7:30 p.m., Room 26 Mineral Sciences.
Turner Alfrey, Jr., The Dow Chemical Company, on "The Effects of Mechanical Processing on the Structure and Performance of Thermoplastic Polymers."
Artists Series, Anthony and Joseph Paratore, duo piano, 8:30 p.m., Schwab.

Saturday, Sept. 15
Sports: football, vs. Rutgers, Beaver Stadium.
Commonsplace Theatre, *If, If*, 7 p.m.; *Oh Lucky Man*, 9 p.m., Room 112 Kern.
Performing Arts Festival, John Sowers, magician, 7 p.m.; Penn State Singers, 8 p.m., Schwab.

Sunday, Sept. 16
University Chapel Service, 11 a.m., Eisenhower Chapel. The Reverend Carl Derk, PSU Coalition for Christian Outreach, speaker.
Commonsplace Theatre, *If, If*, 7 p.m.; *Oh Lucky Man*, 9 p.m., Room 112 Kern.

Thursday, Sept. 13
Physics, Harry Suhli, UC, San Diego, on "Oscillatory Generation of CO-Over Platinum and Some General Conditions for Oscillatory Langmuir-Hinshelwood Reactions," 3:50 p.m., Room 117 Osmond.
Meteorology, Van Bowersox, graduate student, on "Analysis of Precipitation Chemistry," 3:55 p.m., Room 112 Walker.

Exhibits

Ferguson Lobby: Jerry Reyburn, "Games Made of Wood."
HUB Galleries: "Roma Interrotta," original architectural drawings.
Kern Commons Galleries: Mahin Ghanbari, ceramics; Harley Strauss, photographs, and "Cities, U.S.A.," photographs, open Sept. 8.
Museum of Art: Works by Arthur B. Davies from the collection of Mr. and Mrs. Herbert Bull, through Sept. 9; "Heritage Sampler," works from the permanent collection; recent work by George Zoretich, opens Sept. 16.
Pattee Library: "Maps: Alternate Form of Communication," Main Lobby.
Robeson Cultural Center: "Black Women: Achievements Against the Odds," opens Sept. 8.
Zoller Gallery: Undergraduate students' exhibit, through Sept. 9; faculty exhibit, opens Sept. 16.

Seminars

Thursday, Sept. 6
Fuel Science, James D. Frethaut, fuel science, on "Effects of Coupled Thermal Transport and Chemicals Kinetics upon Coal Devolatilization," 4 p.m., Room 301 Steidle.

Some Artist Series season tickets still available; sale closes Sept. 10

Forrest Tucker

A limited number of season tickets remain for each of the Artists Series 1979-80 series.
A concert by duo pianists Anthony and Joseph Paratore will open the year's events at 8 p.m. Friday, Sept. 14, in Eisenhower Auditorium. This program is part of the Fine Arts Series, which also includes The Aeolian Chamber Players, Music from Marlboro, harpsichordist Fernando Valenti, the New York Chamber Soloists and the Beaux Arts Trio.
Jerome Kern's classic, *Showboat*, with Forrest Tucker and Butterfly McQueen, will start off the Music Series on Sept. 21, replacing the New York City Opera Theatre, which has cancelled its tour.
Other highlights of the Music Series are violinist Pinchas Zukerman, the Dresden State Orchestra, the Glinka Chorus of Leningrad, the Pittsburgh Symphony

Orchestra and pianist Garrick Ohlsson.
Still another September event is Estelle Parsons' appearance on Sept. 23 in *Miss Margarida's Way*, part of the Drama Series, along with William Windom in "Thurber II" and Fionnuala Flanagan as "James Joyce's Women."
Featured on the program for the Theatre/Dance Series will be Neil Simon's *Chapter Two*, the Murray Louis Dance Company, the Krasnaya Dance Company, the Claude Kipnis Mime Theatre, the Royal Winnipeg Ballet and Ira Levin's *Deathtrap*.
Series tickets for these events may be purchased at Pine Cottage from 9:30 a.m. to 12:30 p.m. and from 1:30 to 3:30 p.m. weekdays. The season ticket sales end Monday, Sept. 10, and the Artists Series notes that patrons should act promptly since sales of remaining tickets are moving briskly.

Pennsylvania German "Fraktur" to be discussed

Mary Lou Krumrine, a doctoral candidate in art history at the University, will present a gallery talk at the Museum of Art on "Pennsylvania German Illuminated Manuscripts" at 10:30 a.m. on Tuesday, Sept. 11. The talk, open to the public, in conjunction with the Heritage Sampler Exhibit currently at the Museum. It is sponsored by the Friends of the Museum.
Ms. Krumrine will examine several examples of "Fraktur," the illustrated documents that served the Pennsylvania Dutch as birth, baptismal and marriage records. They were usually done by itinerant ministers or schoolteachers who were self-taught and used paints they mixed themselves from natural materials.
Beginning in the 1850s, many Fraktur were printed. The forms would then be filled in with the appropriate names and dates, and hand-colored.

The College of Earth and Mineral Sciences

(Continued from page 1)

ago, leaders in the then College of Mineral Industries anticipated and wrote extensively about today's environmental, energy and resource problems. Programs were set up and maintained in the earth and mineral sciences and mineral engineering which today are unique in Pennsylvania and, indeed, in the eastern United States.

Its long-standing expertise has given the College an international reputation. "When a developing country wants to utilize its resources to gain a better standard of living," Dean Hosler says, "it looks to a College like ours to learn how to explore and mine and process materials."

The entire University gains when the uniqueness of a professional college such as E&MS is exploited, Dean Hosler points out.

"Obviously we don't educate people solely in the professions or technology. Our students need a solid base in the physical sciences and communications skills and an appreciation of the arts and humanities. The growth in the number of students in the professional schools will, of course, increase enrollment in the service courses of the more traditional colleges, including Liberal Arts and Arts and Architecture."

While the character of universities could be altered if there were fewer majors in the humanities or the arts, the need to enrich and provide service to the programs of the professional schools should help sustain families in other areas, Dean Hosler believes.

"We must broaden our educational planning as a nation to put it in the context of world as well as national needs."

"It seems to me," he says, "that universities have an obligation to respond to needs as society perceives them. One could debate the merits of this pragmatic trend in society, but I don't think one can debate the existence of the market for people in certain fields, nor can one question the need for public universities to respond to this need."

"We must broaden our educational planning as a nation in order to put it in the context of world as well as national needs. Billions of people in the world are hungry. We cannot let them starve, be ravaged by disease, and exposed to the elements if we have the knowledge they can use to improve their condition. As educators or as citizens we ignore these needs at our own peril. We have to assess our immediate predicament, and I see our situation as being much more precarious than many people do. I think we could face a worldwide disaster if we don't satisfy people's material needs to a greater degree than we are today."

Oil reserves are on everyone's mind right now, but relatively minor disruptions in either our oil or water resources could tumble our own economic structure, Dean Hosler points out. "If we've been able to maintain any semblance of value for the dollar in international markets, it's because of our agricultural exports," he continues. "And they hang on a thin thread of precipitation in a band between Chicago and the Rocky Mountains. We have stretched all of our resources by increasing the numbers of people without regard for the variability of the sources of sustenance."

The many sensitive pressure points in our society make E&MS and a number of other colleges and departments in the University extremely important at this time, in Dean Hosler's opinion. "We have the ability to make people aware of our

Dean Hosler

Dean Beattie

precarious situation and at the same time teach them how to build a society and technology that will enable them to absorb some of the geopolitical and natural storms."

Dean Hosler visited The People's Republic of China in July as part of a delegation from the American Meteorological Society. The trip strengthened his view that there is an urgent necessity to improve the standard of living in the underdeveloped countries. Educational planning in the United States must take into account the needs of the rest of the world, he says.

"The educational vacuum that exists for two-thirds of the world's population will influence the perceived mission of American colleges and universities in the decades to come," he points out. "The opportunity exists both to train graduate students and to supply education on a contract basis. Raising the technological level of underdeveloped countries will reduce material disparities and bring about greater understanding between diverse cultures, thereby helping to reduce international tensions."

Looking to the future of the College of Earth and Mineral Sciences, Dean Hosler does not foresee any great growth. During the past 15 years, undergraduate enrollment in E&MS increased by 275 percent to some 1,600 students, while graduate enrollment went up by 52 percent to 500 students. The faculty increased by 52 percent to 135 persons. Research is up 500 percent for the same period.

"I think our existing points in terms of students and research," Dean Hosler says.

"This is probably good, since a number of institutions which dropped mining and mineral programs in the fifties are resuming them and competing with us for faculty and students. Most of our faculty would like to continue at the present level of operation. We have shared with Science and Engineering the top position with regard to academic quality of entering freshmen, and we want to continue to be able to select the best students."

He foresees a need for the College's expertise for many years to come as the discovery and exploitation of mineral resources become increasingly complex.

"In past years," he notes, "if a man wanted to open a strip mine, he didn't need any education. He'd just go out and buy a shovel and start tearing things up."

"Today you need engineers, managers, lawyers, biologists, agronomists, and health physicists to plan and operate a mine. What used to be done by brute force, by guess and by gosh, is now a highly technical engineering enterprise. One has to be aware of the chemistry of acid mine drainage, of the hydrology of the region, of the environmental and societal impact of the mine."

"So we in Earth and Mineral Sciences feel pretty secure in the knowledge that society needs us. We have a long history in this business of mineral science education and an excellent reputation. We feel we can help the rest of the University in many ways, not the least of which is as a drawing card for many highly qualified students."

"We also appreciate being a part of a large, diverse and outstanding university, for this gives us great strengths and many unique advantages."

The College of Agriculture

(Continued from page 1)

recalls, "and today we have nearly 500. At first it took a bit of doing to find jobs for everyone; but once a few students had been placed, our reputation began to grow, and now most of our ERM graduates are employed."

Since America's environmental problems are not likely to fade away suddenly in the eighties, Dean Beattie sees no slackening of demand for trained ERM graduates in such places as state and federal regulatory agencies, highway departments, public utility companies and private industry.

Young people see a "future in farming."

"There may be some tapering off of student interest in forest resources," Dean Beattie continues. "We feel an obligation to caution students that the employment history in this area is not as good as we would like. But if students are determined to major in forestry, it's our inclination to let them."

Dean Beattie is convinced that young people "see a future in farming." As evidence, he cites the fact that today twice as many students go into production agriculture (about 17 percent of the College's graduates) as did ten years ago. He also believes the interest of women in agriculture will hold up. Currently women comprise about 36 percent of the College's student body — many of them in horticulture and pre-veterinary medicine curricula.

While each of Penn State's colleges has resident instruction and research functions, the College of Agriculture has a unique role within the University because of its commission to maintain the Agricultural Experiment Station.

Under the terms of the Morrill Act of 1862, Penn State was designated as Pennsylvania's land-grant university, with

the responsibility of carrying out agricultural research. In a partnership arrangement with federal, state and local governments, the nation's land-grant institutions are also responsible for disseminating the results of their research through the Cooperative Extension Service.

"Our research and Cooperative Extension activities are funded in substantial part through monies appropriated by the United States Congress under the provisions of the 1887 Hatch Act and the Smith-Lever Act of 1914," Dean Beattie reports. "The Commonwealth also recognizes the College's special role in its annual appropriation to the University."

For a number of years, however, both State and federal funding have failed to keep pace with inflation, Dean Beattie points out, forcing Penn State to collapse 47 Extension positions. This year the Legislature passed and the Governor signed a \$1 million supplemental appropriation for Extension.

"It has enabled us to restore 33 badly needed people to our Extension staff," Dean Beattie says. "Requests for Extension services have been increasing, and I think they will continue to grow during the next decade because our programs touch the lives of so many people so broadly."

Extension has four major program thrusts:

- (1) Agriculture and natural resources, whose specialists help Pennsylvania producers of food and disseminate information on the protection and use of forest resources, soils and waters;
- (2) Community resource development, through which Extension personnel offer leadership training and planning help in areas ranging from health care to land use;
- (3) Family living, in which home economists deal with such matters as financial planning, clothing, child care and nutrition; and
- (4) 4-H and youth programs affecting some 93,000 young Pennsylvanians. "We have had so many demands for additional specialists and area agents that we can't keep up with them," Dean Beattie comments.

He attributes this, in part, to the special funds which the federal government has made available to bring Extension services to urban areas — the Expanded Food and Nutrition Program and the urban gardening program are examples. City children now have their own 4-H clubs, and Dean Beattie sees great potential for growth in urban youth programs.

Looking ahead to the research areas which are likely to engage the attention of agricultural scientists in the eighties, Dean Beattie thinks that problems dictated by

(Continued on next page)

Dow researcher to deliver Taylor lectures

Dr. Turner Alfrey Jr., research scientist with The Dow Chemical Company, who is internationally known for his work in polymer science, will serve as the 1979 Nelson W. Taylor Lecturer in Materials Science at the University.

He will speak on "Polymeric Materials — A Historical Review" at 4 p.m., Thursday, Sept. 13, and on "The Effects of Mechanical Processing on the Structure and Performance of Thermoplastic Polymers," at 7:30 p.m. Friday, Sept. 14. Both lectures will be in Room 26 Mineral Sciences Building.

A member of the National Academy of Engineering, Dr. Alfrey is the author of one book, *Mechanical Behavior of High Polymers*, and co-author of two, *Copolymerization and Organic Polymers*.

He received his B.S. in chemical engineering in 1938 and his M.S. in physical chemistry in 1940; both from Washington University in St. Louis, Mo. His Ph.D. in polymer science was granted by the Polytechnic Institute of Brooklyn in 1943.

Most recently, he has been involved in modeling the complex behavior present when a polymer undergoes simultaneous interacting processes such as cooling, crystallization, and biaxial orientation.

The Taylor Lectures honor the memory of Dr. Nelson W. Taylor who served as head of the then Department of Ceramics at the University from 1933 to 1943.

College of Agriculture

(Continued from preceding page)

energy shortages and inflation are likely to be paramount.

Research will continue on minimum tillage methods for field crops, he says, to refine methods which allow farmers to "prepare the soil," plant seed, and apply fertilizer and herbicides all at the same time. Since heating is the biggest single cost in greenhouse crop production, researchers will try to perfect the use of solar energy, which holds out the promise of halving fuel costs.

Efforts will also go forward to improve varieties of cultivars and to reduce dependence on chemical pesticides through programs of integrated pest management.

But no one discipline can provide all the answers to the problems which food producers face, so Dean Beattie predicts the development of a systems approach to agriculture. To confront such problems as developing better methods of growing crops, research teams will be formed which bring together the skills of agronomists, entomologists, plant pathologists, agricultural engineers and agricultural economists.

"I see agriculture continuing to be a strong element of the University in the foreseeable future," Dean Beattie concludes. "Penn State came into being as The Farmers High School in 1855, and agriculture has had an important position all through the institution's growing years. I think we will maintain this in the future, both because we are the land-grant institution in Pennsylvania and because agriculture is the second largest business in the Commonwealth — second only to the steel industry. Each year the farm gate rates for agricultural products run about \$2 billion.

"We're all used to sitting down to three good meals a day, and I don't think we'd like it very well if we couldn't. The only way to maintain the ability to feed ourselves is to teach young people about agriculture as a profession, to continue to do research to provide the answers to questions that producers of food and fiber must have, and then to disseminate the information to the people who need it through the Cooperative Extension Service.

"So I think the College of Agriculture has a viable, strong, positive future.

Study examines characteristics of PSU dropouts and persisters

A new study has found significant differences between dropouts and persisters in the Penn State system in such areas as academic performance, housing, extracurricular activities and educational financing.

The report, "An Analysis of Student Attrition at Penn State," is based on telephone interviews with some 500 dropouts (students who left voluntarily or involuntarily) and 250 persisters drawn from a larger, random, University-wide sampling. The study was conducted by Carol L. Everett of the Planning and Research Group in the Office of Budget and Planning.

Ms. Everett notes that of the approximately 8,700 full-time undergraduate students who enrolled as baccalaureate freshmen in Fall Term 1977, 18 percent dropped out during the first year, and an additional 10 percent had left by the end of their second year.

On the basis of past trends, an additional 13 percent will leave at some point during their third, fourth or fifth years. "An average dropout rate over five years of 41 percent," the report states, "implies an annual loss in tuition of approximately \$10 million — holding other factors such as new admissions constant."

Among the report's general findings were:

- Persisters were more satisfied with their majors, but they were also more likely to have changed majors (37 percent) than dropouts (24 percent).

- Persisters made significantly higher grades; only 35 percent had cumulative grade point averages under 2.5. Sixty percent of the dropouts fell below that figure.

- Baccalaureate persisters were three times as likely as dropouts to have lived in a residence hall and twice as likely to have lived in an apartment. Sixty two percent of the dropout population lived at home, as compared to 45 percent of the persister population.

- Extracurricular activities were another significant variable. Seventy nine percent of the persister sample, but only 42 percent of the attrition sample, participated in at least one extracurricular activity.

- While half of both groups received financial aid and half were getting some aid from their families, persisters were significantly more likely to have financed their educational costs through student savings, a loan, scholarships or campus jobs. Dropouts were more likely to have worked odd jobs or had a grant, and to have worked more than 20 hours per week.

- Obtaining career counseling, financial aid counseling and/or academic counseling (other than from a faculty advisor) was a strong indicator that a student was likely to drop out. More than half of those who left the University had seen a professional counselor.

The study found that the graduation rate of Commonwealth Campus students (42 percent) was below the University-wide average (59 percent) and significantly below that of students who begin their studies at University Park (70 percent). But it points out that "the academic dismissal rate... is not higher at the Commonwealth Campuses, indicating that large numbers of those who leave are voluntary withdrawals. Furthermore, results of the attrition survey indicate 25 percent of CWC dropouts transferred to another institution. The vast majority of those (80 percent) voiced a preference for attending a school close to home and expressed little interest in attending University Park. Perhaps Penn State's 'feeder' system should be redefined as a 'scatter' system."

In an exploration of the policy implications of the research findings, the following suggestions are offered in the report:

- Efforts should be directed toward providing the most effective faculty advising. Seventy three percent of all dropouts cited academic problems, suggesting the importance of faculty advising and faculty/student relationships in general upon retention.

- Since students with on-campus jobs of any nature were three times more likely to stay in school, efforts to increase on-campus job opportunities might help prevent withdrawals. (The new federal funding for work-study projects which was recently authorized may provide significant help in implementing this recommendation.)

- Institutions should try to simulate the good features of campus housing for non-resident students in light of the significance of residence hall living on persistence.

- Because retention is a multidimensional problem, the resources of Financial Aid, Student Affairs, Admissions and Recruitment, Undergraduate Studies, Public Information and the Faculty Senate should be brought to bear on the problem.

Among other suggestions offered was the restructuring of the exit interview to offer in-depth counseling and the positioning of it earlier in the withdrawal process. Special guidance programs were proposed for "high risk" dropouts, those who live at home and work more than 15 or 20 hours per week.

The University might also try to encourage educational financial planning at an earlier stage in the student's academic career, the report advises, and should follow up on students who do withdraw to see if they are interested in readmission.

300 employees from 1966-67 cardiovascular screening to be reevaluated in new study

Approximately 300 present and former University employees between the ages of 50 and 70 will be invited to the Laboratory for Human Performance this coming academic year for a physical evaluation, according to Dr. Patricia C. MacKen, research associate in the Laboratory.

The evaluations are essential to a study, for which Dr. MacKen is principal investigator, being funded by a grant from the National Heart, Lung and Blood

Institute.

The participants will be selected from the group of 1,376 male Penn State employees who were screened during the winter of 1966-67 in the Cooperative Study on Physical Activity and Cardiovascular Disease. This earlier study, funded by the U.S. Public Health Service, involved the collaboration of researchers at Penn State and the Universities of Wisconsin and Minnesota.

Heating is due to be turned on about Sept. 24

Heating in University Park residence halls and the Ritenour Health Center is now available if needed, according to Ralph E. Zilly, chairman of the University's Executive Energy Conservation Committee.

Comfort air conditioning will be turned off in academic and administrative buildings approximately Sept. 10, and the heat in those buildings will be turned on Sept. 24.

Seasonal systems air conditioning in research areas will be turned off Sept. 24, unless there is a special need.

"In setting these transition dates, the committee is relying on a Meteorology Department study covering 30 years of hourly temperature history," Mr. Zilly said. "Minor adjustments may occur if short-range weather forecasts indicate the need."

He added that some minor problems can be expected with systems that have been off for the summer, and any problems should be reported to the Office of Physical Plant Service Desk by calling 865-4731.

The committee has also discussed plans for detailed procedures necessary to comply with President Carter's Emergency Energy Plan.

The various duties of the Office of Physical Plant, the Executive Energy Conservation Committee and individual building occupants were considered.

The implementation plan calls for the Maintenance and Operations Department to identify and correct existing heating, ventilating and air conditioning problems and to check all thermostats to see that they are properly calibrated.

"In most areas, of course, the responsibility for proper room thermostat setting rests with the individual working in that area," Mr. Zilly said.

Other discussions have centered on the role of the Executive Energy Conservation Committee in keeping the University community posted on what is being done and where the responsibilities rest for different energy matters.

The responsibilities of the Colleges, administrative units and Commonwealth Campuses in signing the federal compliance certificates were also considered, along with the policy for filing exemptions to the new regulations.

"Compliance with these regulations is not a simple matter," Mr. Zilly said.

National Energy Conservation Plan No. 2 mandates 78 degrees Fahrenheit as the minimum temperature for comfort air conditioning under most circumstances. In addition, 65 degrees is mandated as the upper limit for heating, and 105 degrees is the limit for domestic hot water use for personal hygiene.

Residence hall rooms are viewed as the equivalent of private residences under the new regulations, and the temperature regulations, therefore, do not apply. Lounges, activity areas and dining rooms, however, must comply.

Some other areas exempt from the room temperature restrictions are research labs containing temperature dependent equipment or processes, certain computer areas, animal quarters, and health care spaces — but not waiting rooms or ordinary offices.

The forthcoming follow-up evaluations will include blood analysis, medical examination, determination of body composition, and treadmill exercise and pulmonary function tests. They will assess the physical status of participants who are 12 years older, providing information as to how health attitudes and practices (particularly as they pertain to habitual physical activity) relate to the clinical and laboratory findings.

Penn State's "missionaries" — preaching the gospel of good nutrition

They knock on doors in crowded, inner-city tenements. They seek out cabins in isolated Appalachian hollows where strangers are seldom seen.

They are not unlike missionaries, but their gospel is good nutrition.

They are Penn State's 190 nutrition aides, apostles of one of the University's most successful — though little remarked — operations: the Expanded Food and Nutrition Education Program (EFNEP), conducted by the Penn State Cooperative Extension Service.

Their mandate from EFNEP is simple, yet eloquent: "To help families living in or near poverty — especially those with young children — to acquire knowledge, skills and changes in behavior to achieve adequate diets providing normal nutrition."

And their efforts are paying off. Since EFNEP's inception 10 years ago, nutrition aides have converted nearly 57,000 Pennsylvania families to better dietary habits. This year alone, aides are working with some 7,300 families, according to EFNEP Coordinator Tammy Kinneman.

A nationwide program sponsored by the U.S. Department of Agriculture, EFNEP was launched in response to mounting evidence in the mid-sixties that millions of Americans living below the poverty line were malnourished.

"Many public officials felt at the time that welfare and food assistance programs weren't doing enough," Ms. Kinneman explains. "Even with access to food, many poor people still suffered from malnutrition because of badly balanced diets."

So EFNEP was conceived as a means of showing families how to make the best nutritional use of the food that was being made available.

"The nutrition aides are the heart and soul of the program," Ms. Kinneman says. "They live in the areas they work in, so they know how to relate to their clients. We feel that 10 paraprofessionals will have more success working with people of similar backgrounds than 10 professionals would."

The aides are University employees who work a 40-hour week out of their own homes, Ms. Kinneman adds. To be hired, a process conducted by the local County Extension Office, a candidate must reside in the area in which she would work, and must show an interest in helping others.

As a result, for nutrition aide positions are found by placing classified ads in local newspapers and by alerting local employment agencies, which keep lists of job-seekers.

"The majority of their work is on a one-to-one basis with the homemaker — the person who's responsible for buying and preparing the food," Ms. Kinneman

continues.

"After a working relationship — and often a friendship — has been established, the aides encourage the homemaker to join group meetings, especially in urban areas. That makes better use of everyone's time, and the homemakers seem to come along faster when they see their friends and neighbors learning and doing the same things."

Either way, nutrition aides teach a variety of skills related to proper diet: budgeting; menu planning; food preparation, preservation, storage, sanitation and safety; gardening and whatever else the homemaker wants to learn. All of it, however, revolves around EFNEP's central theme: the importance of the four basic food groups to proper nutrition.

"We measure nutritional progress by the number of servings from each of the four basic food groups eaten during a 24-hour period," Ms. Kinneman notes. "Two or more servings each of milk and meat, and four or more servings each of vegetables/fruit and of bread/cereals are considered to be an adequate or 2-2-4-4 diet."

"The number of homemakers reporting a 2-2-4-4 diet more than doubles after they've participated in EFNEP for one year," she adds. "If the homemaker shows sufficient progress, she's 'graduated' from the program in about two years."

Agnes Mayewski, a nutrition aide supervisor in Greensburg, has helped hundreds of impoverished families since she started working for EFNEP 10 years ago.

"When we first began, we had no way to get the word out other than knocking on every door," she says. "In nine out of 10 homes, I would get in the first time and they were very happy to see me."

Eventually, I got into every home that might be categorized as low-income."

Now, in addition to the paperwork involved in supervising seven aides, Ms. Mayewski carries a caseload of 50 EFNEP families whom she sees at least once a month, usually in small groups. Her territory is a poverty pocket in eastern Westmoreland County.

"I did a canning demonstration there a couple of weeks ago, and I still can't believe the response," she exclaims. "Every woman in town must have been there. Every booklet I brought with me was gone after two hours. They want me to go back soon to do another one."

Aside from demonstrations and group meetings, Ms. Mayewski still teaches nutrition in one-to-one sessions, especially with new clients. No longer does she have to knock unannounced, however. Other social service agencies may refer a client to her, or the homemaker will "hear from a

Nutrition Aide Bernice Wright (left) and an EFNEP homemaker watch a nutrition slide show.

friend that I'm coming to the area and ask to see me, so we make an appointment."

She doesn't hesitate to take her homemakers grocery shopping. "I usually go at check time; otherwise, they'll buy a lot of pop and junk food if I'm not there to show them the four food groups."

Ms. Mayewski has steered some families away from their inclination to buy inexpensive, second-hand refrigerators or stoves, urging them to buy a new one that will last. In this way, some families have been able to establish credit. In one case, she helped a family obtain a government loan for a new home. "They've handled the payments well and have fixed it up, and what they originally paid \$8,000 for is now worth \$45,000."

Similar success stories are not uncommon to EFNEP.

Bernice Wright, a nutrition aide in Lancaster, recalls a mother and father who were threatened with the removal of their children.

"The children were underfed, and the home was a mess, but there was love in this family. In fact, I've never seen such closeness," Ms. Wright says.

"I could see that the family could relate to me, so I began working with them, along with people from two or three other agencies. We started from scratch, working on sanitation, nutrition, how to prepare food, and little by little began to make progress. Eventually, the family moved into a nice home, but they still call me if they've got a problem. All of this took place over eight years, but it makes me happy to see such a big improvement."

Ms. Wright also works closely with the Queen's Corner Food Buying Club, a cooperative through which she gets many referrals.

Overall, she's convinced EFNEP helps to change lives for the better. "It's a slow process sometimes, but I think most of the young mothers I work with are trying to do the best they can for their children," she observes.

An equally important component of

EFNEP is its youth program, organized into 4-H nutrition clubs and groups. Nutrition aides and community volunteers assist the youth program, but in a number of communities EFNEP's professional nutrition assistants have primary responsibilities for club organization.

Contradicting the notion that young people are interested in anything but nutrition, EFNEP has reached 145,000 low-income youths in Pennsylvania through its 4-H nutrition clubs.

Usually, the clubs are built around a core program of nutrition education projects, but each strives to meet the particular interests of the youth in its area.

Nutrition Assistant Frank Simmons coordinates two unique groups: the Altoona Trailblazer 4-H Club and the Blair County Physical Fitness 4-H Club.

"When low-income youngsters get involved with the 4-H program," he says, "we see great progress in their participation in other school activities and a growth in personal development."

For his initial recruiting six years ago, he used his contacts in the community to find low-income youngsters who might be interested. "Once we got a core group of kids, they began pulling in other kids; it works almost entirely by personal contact."

The Trailblazers now has 30 members; the physical fitness club, 50.

"When we first talk to prospective members, we do tell them that we're primarily a nutrition program but that it's based on a topic that we work nutrition into," Mr. Simmons explains.

"For instance, the Trailblazers emphasizes backpacking and camping, and teens have a natural interest in that. We work nutrition into it by learning how to buy food in supermarkets where we set out and how to prepare meals when we get there."

Ms. Mayewski sums up: "We go into homes that some agencies wouldn't even step into. There's no other work that's more important, and there's nothing else I'd rather be doing."

Roger Williams

Agnes Mayewski (back to camera) introduces herself to a new client.

Campus Update

The Advisory Search Committee appointed by President Oswald to assist him in identifying candidates for the position of Director at the Beaver Campus will accept nominations and applications until Sept. 30, 1979.

The Committee will identify those candidates who can provide the ablest possible academic leadership and competent administration of the Beaver Campus. Candidates should possess a doctoral degree or equivalent and several years' experience in teaching at the university level and/or administration of higher education.

Applications and letters of nomination should be directed by Sept. 30 to Dr. Robert Quinn, Room 111 Old Main, University Park, PA 16802.

The Department of Chemistry at University Park has received a highly valued electron microscope free of charge, courtesy of Western Electric and the Berks Campus.

Earlier this year, Dr. Wilmer Stowe, assistant professor of biology at Berks, was using the microscope and an atomic absorption unit at the Western Electric plant in Reading to conduct his research on algae. Western Electric officials offered to donate the equipment to Penn State.

After some investigating, Campus Director Harold W. Perkins learned from Dr. Joseph A. Dixon, head of the Department of Chemistry, that the microscope could be put to good use at University Park. The absorption unit would be used in Berks Campus labs.

The microscope has a current market value of approximately \$30,000.

Continuing ed network

(Continued from page 1)

program of Independent Study by Correspondence and will receive printed study materials, evaluation of written work by faculty and — in credit courses — examinations.

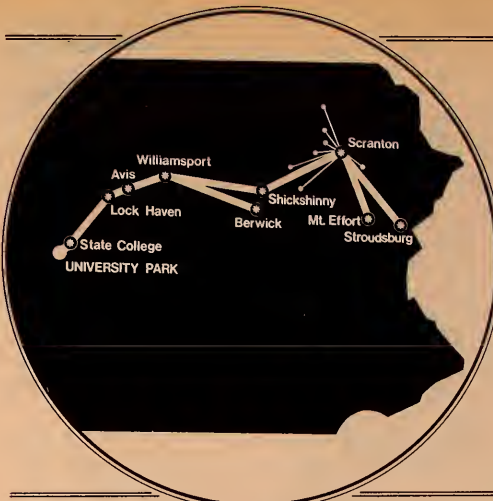

All programming will originate from Penn State's University Park Campus. The system, however, will be available for use by other colleges and universities.

PENNARAMA has been in the research stage since January 1976, when an experimental channel was established in the Scranton-Wilkes-Barre area. Robert W. Naismith, associate professor of biology at Penn State's Worthington Scranton Campus, initiated the project with partial funding from the U.S. Department of Health, Education, and Welfare.

Joseph S. Gans, owner of Northeast Cable TV, donated equipment and facilities.

Under today's agreement, a nonprofit corporation of cable operators will be responsible for building and maintaining a statewide network linking participating cable systems. The cable companies will provide channel space for the network.

PENNARAMA will be administered through Penn State's Division of Media and Learning Resources in Continuing Education. The resources of the University's Broadcasting Services (WPSX-TV), Independent Study by Correspondence, Audio-Visual Services and Student Services in Continuing Education all will play a part in the program. The services are being coordinated by Richard Wolfe of Broadcasting Services.

PENNARAMA, a cable television network that will provide continuing education services to all of Pennsylvania, initially will make college courses available to 283,000 cable subscribers in the northeastern sector, as shown above.

Marlowe Froke, director of media and learning resources in Continuing Education, and A. Arthur Hungerford, a retired faculty member, have led the University effort to develop the system.

Mr. Barco, of Meadville, Pa., and his daughter Yolanda, both attorneys, and Mr. Gans have worked since 1972 to establish the relationship between the State's cable firms and Penn State.

Seven undergraduate course improvement proposals totalling \$61,695 receive approval for funding

Seven course improvement proposals have been approved for funding by Dr. Robert E. Dunham, vice president for undergraduate studies. The proposals and the amounts are:

Community Development 7, \$12,000; Computer Science 203, \$10,229; Geological Sciences 20, \$9,461; Health Education 303, \$7,385; Individual and Family Studies 129 and 329, \$3,960; Mechanical Engineering 22, \$11,700; and Nursing 320, \$6,960.

Dr. Donald W. Johnson, director of the Division of Instructional Services, explains that the grants are made to academic departments to support the improvement of basic courses or groups of courses which serve significant numbers of students at several campus locations or meet some other critical need.

Community Development 7 enrolls about 1,500-1,900 students yearly. Currently, different instructors offer modules in the areas of criminal justice, juvenile justice, human services and land use. As some Campus, instructors are present in the classroom; at others, telephone hook-ups are used.

COM D 7 is taught by a number of different instructors. Consequently, in order to insure commonality of content presentation at all locations, the grant will be used to: (1) prepare lecture outlines with written scripts; (2) produce short videotape segments to illustrate specific content areas; (3) assemble a set of reading materials for each module; and (4) prepare a student study guide.

These revisions will allow students to learn basic concepts with a minimum dependence on specialized faculty.

Computer Science will use its grant to update and standardize CMPSC 203, an introductory three-credit course for majors in the College of Business.

The previous format was a two-lecture, double-period recitation course enrolling 200 students. This fall 400 students will hear two lectures weekly, and, in groups of

33, attend two single period recitations.

In cooperation with the College of Business, the Computer Science Department will develop a standard course approach and syllabus for use with CMPSC 203. A comprehensive course guide and visual aids will be prepared for the instructors and teaching assistants responsible for the course. Testing and evaluation of students will be standardized through the use of machine graded exams, zero-credit quizzes and outside programming assignments.

Course improvement goals for GSCI 20 involve making the laboratory work more immediately useful to the some 2,000 non-geology students who take the course each year. New lecture-demonstration devices and a new lab manual are being developed. Demonstrations will be made more exciting and dramatic, "hands-on" student participation increased, and the overall emphasis of the course directed to topics of immediate interest and relevance to the general student rather than to the pre-professional major. As a side benefit, costs to the students will be reduced, since an "in-house" produced laboratory manual will sell for less than the current one.

Instructional improvement efforts in HL ED 303, Emergency Care, will also focus on the essential laboratory portion of the course. At present six to ten new lab instructors must be trained each fall, and uniform instructional materials are lacking. This will be corrected when a training manual for lab instructors has been developed and audio-visual materials prepared for the some 900 students who take the course annually.

By systematically developing the instructional content of specific skill-oriented techniques for each of the ten modules offered in the self-paced laboratory, the ability of students to move at their own pace will be enhanced — and as learning is individualized, more students can be accommodated.

The Division of Individual and Family

Studies proposes to establish a data bank, which will include a catalog of the videotaped materials developed for two IFS multi-media courses, IFS 129, Introduction to Individual and Family Development across the Life Span, and IFS 329, Infancy and Early Childhood. A session-by-session instruction manual, similar to one created this year for IFS 129, would be prepared for IFS 329 to aid new instructors at the Commonwealth Campuses in their course presentations.

With the exception of chemical engineering majors, all engineering students are required to take ME 22, Engineering Thermodynamics. Originally taught with sections of 40-50 students, the course now attracts as many as 120 undergraduates per section, making it difficult, with the current format, to maintain acceptable quality.

The Department of Mechanical Engineering plans to experiment with a new format involving a 50-minute lecture meeting three times a week for which slides and other audio-visual aids will be prepared. There will also be a 75-minute weekly tutorial session.

Solutions to the homework problems, which are an essential part of the course, will be made available to students through the Listening and Learning Centers. Slide-audio tapes with solutions to each assigned problem will be produced and made available. Quizzes and the final exam will be machine graded for the first time in the course's history.

The course materials developed for NURS 230, Nursing Process and Associated Skills, will be used by students during their clinical nursing courses. Videotape presentations will deal with the development of communication skills of aid nurses in their interactions with clients. Actual nurse-client conversations will be presented, along with appropriate scenes illustrating the principle involved. The materials will benefit 250 resident instruction students and some 2,300 extended degree nursing students.

News in Brief

(Continued from page 1)

Chicago scholar to give first lecture on Vienna

Stephen Toulmin, director of the National Humanities Institute at the University of Chicago, will be the first speaker in a series of lectures this year on the art, science, literature and philosophy of Vienna from 1890 through the 1930s. Professor Toulmin, co-author of the book, *Wittgenstein's Vienna*, will speak on the topic "Vienna and the Spirit of Modernism" at 8 p.m. Wednesday, Sept. 12, in Room 101 Kern Bldg.

The series is being organized by Penn State faculty members affiliated with the interdisciplinary graduate program in the humanities, with assistance from the Institute for the Arts and Humanistic Studies.

The emphasis will be on the interaction among various disciplines during a period of high achievement in the arts, humanities and sciences in Vienna. The lecture series will include talks by scientists, art and music historians, and philosophers, among others. Several Penn State faculty members will be among the speakers.

Art classes are offered

Eleven art classes will be offered this fall at the Saturday Morning Art School conducted by the School of Visual Arts.

Classes begin Sept. 15 and are held each Saturday through Nov. 3 from 9 a.m. to 11 a.m.

Course offerings include: Creative Arts for the Young, ages 5-6; Drawing and Painting, ages 6-7; Arts and Crafts, ages 8-12; Drawing and Painting, ages 8-12; Exploring Sculpture, ages 8-12; Photography, ages 8-12; Artist Studio for Teenagers and Adults; Ceramics for Teenagers and Adults; Jewelry for Teenagers and Adults; and Weaving for Teenagers and Adults.

Courses are taught by advanced art education majors and are supervised by Dr. Robert Ott, associate professor of art education, and Mrs. Pamela Sturgess, doctoral candidate in art education and assistant professor at the Nova Scotia College of Art and Design.

To register, contact Ruth Barner, secretary for the School of Visual Arts, at 865-6579. Registrants may also come to Room 207 Chambers Building. A small fee will be charged to cover costs of art materials.

Library orientation slated for new faculty

Special orientation tours of Patten Library will be given for all new faculty members. The tours will begin in General Reference, Room 105 East Patten, at 9:30 a.m. and 2-3 p.m. daily during the week of Sept. 10-14. If these times are not convenient or if there are any questions, please contact Bruce Bonta at 865-6366.

Craft classes to begin

Craft classes in Batik tie-dye, wheel and hand-built pottery, weaving and stained-glass will begin at the HUB Craft Center Sunday, Sept. 9.

Registration will continue through Sept. 8, from noon to 5 p.m. daily at the Center, Room 312 HUB.

Folk dancing starts Friday

The Interlaria Folk Dance Group will offer both instruction and general folk dancing each Friday night during Fall Term in the HUB Ballroom.

Lessons will be available from 7:30 to 9:30 p.m., with the following two hours devoted to requests. No experience is necessary, and non-students are welcome.

The Copyright Act of 1976 has created the need for actions by the University and its authors to clarify copyright ownership of scholarly works.

The Copyright Act of 1976 became effective on Jan. 1, 1978. Many of the provisions of this statute affect the University community. The interim procedures set forth below are to be effective until a revision of the University Copyright Policy has been completed and implemented by the University's Board of Trustees.

The University has an established University Copyright Policy which has provided that all works categorized as "scholarly" — including all works created by University authors either on their own initiative or as an assigned University duty, without the execution of a written Agreement prior to the creation of the work — shall belong to the authors. The Copyright Act of 1976 provides that the ownership of the copyright in a work prepared by an employee within the scope of his or her employment belongs to the employer unless a written instrument is signed by both the employee and the employer, setting forth that the parties have expressly agreed otherwise. To enable University authors to own any right in their works which are created within their "scope of employment," a written instrument must be signed by each faculty member.

Specific sections of the Copyright Act of 1976 and their relationship to University authors and their copyrightable works are set forth below:

IMMEDIATE STATUTORY FEDERAL COPYRIGHT —

The Copyright Act of 1976 preempts the state common law with respect to copyright and provides for immediate statutory federal copyright protection for the author of a work from the instant the work is fixed in any tangible medium of expression (before publication).

WORKS MADE FOR HIRE —

A significant limitation concerning copyright ownership is set forth with respect to works created by employees in 17 USC 201:

— (b) Works Made for Hire — In the case of a work made for hire, the employer — is considered the author for purposes of this title, and, unless the parties have expressly agreed otherwise in a written instrument signed by them, owns all of the rights comprised in the copyright. 2 . .

DEFINITION OF WORK MADE FOR HIRE

— The definition of the term "work made for hire" is set forth in 17 USC 101:

— A "work made for hire" is —
(1) a work prepared by an employee within the scope of his or her employment; or
(2) a work specially ordered or commissioned for use as a contribution to a collective work, as a part of a motion picture or other audiovisual work, as a translation, as a supplementary work, as a compilation, as an instructional text, as a test, as

Ownership of Journal Articles and Other Scholarly Works under The Copyright Act of 1976

answer material for a test, or as an atlas, if the parties expressly agree in a written instrument signed by them that the work shall be considered a work made for hire. For the purpose of the foregoing sentence, a "supplementary work" is a work prepared for publication as a secondary adjunct to a work by another author for the purpose of introducing, concluding, illustrating, explaining, revising, commenting upon, or assisting in the use of other work, such as forewords, afterwords, pictorial illustrations, maps, charts, tables, editorial notes, musical arrangements, answer material for tests, bibliographies, appendices, and indexes, and an "instructional text" is a literary, pictorial or graphic work prepared for publication and with the purpose of use in systematic instructional activities. —

CONTRIBUTIONS TO COLLECTIVE WORKS —

Further, the Copyright Act of 1976 has a separate provision for "Contributions to Collective Works," 17 USC 201(c):
— Copyright in each separate contribution to a collective work is distinct from copyright in the collective work as a whole, and vests initially in the author of the contribution. In the absence of an express transfer of the copyright or of any rights under it, the owner of copyright in the collective work, is presumed to have acquired only the privilege of reproducing and distributing the contribution as part of that particular collective work, any revision of that collective work, and any later collective work in the same series. —

TRANSFERS —

Further, the transfer of copyright ownership is formalized in 17 USC 204:
— (a) A transfer of copyright ownership — is not valid unless an instrument of conveyance, or a note or memorandum of the transfer is in writing and signed by the owner of the rights conveyed or such owner's duly authorized agent. —

Since the University desires to continue the present University Copyright Policy with respect to "Contributions to Collective Works" created by University authors, such as journal articles, and since many of these works are prepared within the scope of employment, clear title to the copyright will not rest with the author unless a written instrument is signed by the University and the author. The University will provide and execute the necessary written instrument covering

contributions to collective works for any University author. A copy of this Interim Written Instrument Covering Contributions to Collective Works was published last year in INTERCOM.

JOURNAL ARTICLE COPYRIGHT

TRANSFER FORMS — The most frequent contact with the Copyright Act of 1976 for most faculty authors is the execution of forms which are required by scholarly journals before publication of contributions. The forms submitted to faculty authors by the journals are to be executed by (a) faculty authors as individuals; or (b) an authorized University representative.

In order to comply with this Act, the following types of works require the execution of "copyright clearance and transfer forms" as follows:

- (1) The forms covering works classified as scholarly under the University Copyright Policy which have been (a) created outside the scope of employment or (b) created within the scope of employment after the signing of an Interim Written Instrument Covering Contributions to Collective Works should be signed by the authors.
- (2) The forms covering works classified as scholarly under the University Copyright Policy which have been created within the scope of employment before the signing of an Interim Written Instrument Covering Contributions to Collective Works should be signed by an authorized University representative.
- (3) The forms covering works covered by a standard or modified Contributed or Commissioned Copyright Agreement between the authors and the University should be signed by an authorized University representative.

The Dean or Administrative Officer is the authorized University representative for these forms.

Further, since the Copyright Act of 1976 has a separate provision for "Contributions to Collective Works," many journals provide two types of forms or "Releases" for the author to execute:

- (a) a first, and "most common" type, assigning all copyright in the contribution to the journal or its parent organization, but reserving the right for the authors and their employing organization to make reproductions "not-for-sale"; and
- (b) a second, and "special handling" type, requiring that the authors place "their own copyright notice" on the first page of their contribution, thereby preserving

their individual copyright for later disposition, and "permitting" the journal to "publish in all forms," but by their "prior consent," rather than as owner of the copyright.

University authors must determine whether their contributions require "special handling." The ownership of the copyright may subject the authors to repeated requests for copies and permissions.

OTHER SCHOLARLY WORKS — In addition to the Interim Written Instruments Covering Contributions to Collective Works which have been generally available as discussed above, (1) "Written Instruments Covering an Identified Literary Work" suitable for all literary works other than contributions to collective works, and (2) "Written Instruments Covering an Identified Literary Work (with License)" to cover those instances in which a license to the University for University purposes and/or to the Federal Government or other sponsor is necessary will also be available to all Deans and Administrative Officers for use on an interim basis.

WRITTEN INSTRUMENTS — Deans and Administrative Officers will provide the three types of Written Instruments described above to faculty and staff upon request. The Office of the University Provost will provide for execution of these Written Instruments on behalf of the University after execution by authors. University authors of scholarly works to be published commercially should request the appropriate "Written Instrument" and obtain its execution before the creation of the work in order to preserve the best copyright coverage obtainable. If the appropriate "Written Instrument" is not obtained prior to creation of the work in order to place copyright ownership in the author it may be necessary for the University to transfer the ownership to the author; such a transfer can result in a copyright of shorter duration than if the "Written Instrument" is obtained prior to the work's creation.

REVISION OF UNIVERSITY COPYRIGHT POLICY —

The University is carefully considering revisions to University Copyright Policy required by the Copyright Act of 1976. The objectives of these revisions are: (a) to preserve the authors' rights to their own scholarly works as has been the case in the past, (b) to accommodate the 1976 Law with as little change and form signing as practical, and (c) to protect the faculty and the University. These revisions will be reviewed by appropriate representatives of the faculty and University administrators and will become effective when approved by the University Board of Trustees.

Dr. Robert F. Custard, University patent counsel, (865-1765) will assist faculty and staff who have University-related copyright problems.

A Faculty Senate Legislative Report

Change in Policy 82-40 — Cumulative Grade-Point Average Requirement — in "Academic Policies and Procedures for Undergraduate Students"

Background and Rationale:

To graduate, a student must have a cumulative grade-point average of 2.00. Many faculty have expressed the desire for a grade-point average of at least 2.00 for course requirements in the candidate's major. The Committee feels that students should demonstrate passing grades in the area they have chosen to pursue as a career. Students who earn a degree with

less than C average grades in any area of their major field do not present an academic record that aids the academic quality of a Penn State degree. If approved, the responsibility for implementation rests with the program faculty and College Dean.

The Committee recommends the following change, by addition, to Policy 82-40.

82-40 — Cumulative Grade Point Average Requirement

(Current)

To graduate, a candidate must complete the course requirements for the candidate's major and earn at least a C (2.00) average for all courses taken at the University subject to the

conditions of Section 51-50. The cumulative average is based solely on the courses taken at the University and is computed according to Section 51-50.

(Add)
IN ADDITION, BACCALAUREATE DEGREE CANDIDATES WILL BE REQUIRED TO EARN AT LEAST A C (2.00) CUMULATIVE AVERAGE IN COURSES DESIGNATED IN THE BACCALAUREATE DEGREE PROGRAMS CATALOG AS "PRESCRIBED COURSES" AND "ADDITIONAL COURSES" IN THE CATEGORY DESIGNATED "REQUIREMENTS FOR THE MAJOR." A CHECK OF PROGRESS

IN FULFILLING THIS REQUIREMENT WILL BE MADE TOGETHER WITH THE AUDIT OF UNFULFILLED REQUIREMENTS (POLICY 32-80).

Penn State Intercom

News in Brief

One-way traffic pattern to be used for home games

The Sept. 15 Rutgers opener will bring some 76,000 fans to Beaver Stadium, necessitating special traffic plans for that Saturday — and each of the six other home games.

Based on last year's successful traffic plan, the following schedule will be followed:

- From 10 a.m. until the 1:30 p.m. game time, four streets will become one-way in the direction of the stadium. They are:
 - Porter Road from Benner Pike to Curtin Road.

- University Drive from South Atherton Street to Curtin Road.
- Park Avenue from North Atherton to University Drive.

- Park Road from Bigler Road to the University maintenance building.

Immediately after the game, the one-way flow on the four streets will be reversed until traffic returns to normal.

In addition, Curtin Road from Shortridge Drive to Porter Road will become a pedestrian corridor from 10 a.m. until game time and again immediately after the game.

While the game is in progress, the walkway will be maintained only from University Drive to Porter Road. Vehicle traffic on the pedestrian corridor will be limited to emergency vehicles and certain buses.

University Safety Director David E. Storner counsels fans approaching from the west on Rt. 322 to use the State College By-Pass to reach the stadium. Signs marked "Stadium Traffic" will lead to a parking lot east of the stadium.

Motorists headed west on Benner Pike who have to reach the Mountainview Unit of Centre Community Hospital are urged to use the Puddintown Road. Those

approaching the hospital from the north or west should travel south on Atherton Street to Beaver Avenue and east on Beaver to Benner Pike and onto Puddintown Road.

Mr. Storner noted that police will monitor and broadcast emergency traffic information on CB radio Channel 15.

Coffee hours sponsored by Faculty Women's Club

New faculty women and wives of new faculty and staff are invited to attend any of three remaining hospitality coffees sponsored by the Faculty Women's Club. The object of the coffees is to acquaint newcomers with the club, the community and the facilities of the University.

The coffees will be held tonight (Thursday) at 7:30 p.m. at the home of Mary Egleton, 445 Cricklewood Drive; Sunday, Sept. 16, at 2 p.m. at the home of Diane McKinnon, 416 Shadow Lane; and Wednesday, Sept. 19, at 7:30 p.m. at the home of Rita Foderaro, 301 S. Gill.

Persons wishing further information may call Ms. McKinnon at 237-8854.

Meat Lab sales begin Sept. 14

Retail sales of meat will be offered each Friday during the term from 1:30 to 4 p.m. at the University's Meat Lab, beginning Sept. 14. The Meat Lab is located on the east side of Beaver Stadium.

The meat is from the University's herds and is butchered by students in animal industry classes.

The store carries all the retail cuts of beef, pork and lamb, including steaks, chops, hamburger and sausages, at prices competitive with those in the area.

Customers are advised to appear at the lab by 1:30 p.m., since everyone must draw a number. Those with the lowest numbers are waited on first, and there is a limit of about \$75 on sales.

Assistant Provost named

Richard Chait

Dr. Richard P. Chait, educational chairman of Harvard University's Institute for Educational Management, has been named assistant provost at the University, effective Jan. 15, 1980.

Dr. Chait is a nationally recognized authority on academic tenure and related personnel policies.

His responsibilities will include interpretation and coordination of faculty personnel matters, special projects in the Provost's Office and representing the Provost on some University committees. He will serve as liaison between the Provost and certain academic areas and administrative offices.

Dr. Chait will replace Dr. Richard L. Morrill, who resigned to accept the presidency of Salem College.

"Penn State is fortunate to have joining us an educator with Dr. Chait's high academic and administrative credentials," Provost Edward D. Eddy said in announcing the appointment.

Born in New Jersey in 1944, Dr. Chait graduated Phi Beta Kappa from Rutgers University in 1966, with a major in history. Subsequently, he earned an M.A. in American history and a Ph.D. in higher education administration at the University of Wisconsin.

His professional career also began at Wisconsin, where he was assistant to the director of the Integrated History Unit, a federally funded program to develop a black history curriculum for public schools.

In 1970, Dr. Chait became assistant for academic planning at Stockton State College during the period when the New Jersey college was preparing to open. Following the opening in 1971, he became assistant to the president.

In 1974, he was appointed director of the Institute for Educational Management under the joint sponsorship of the Harvard Graduate Schools of Business Administration and of Education. He held the directorship until 1977 when he decided to relinquish it to become educational chairman of the Institute and assistant professor in the Graduate School of Education, the dual position enabling him to play both an academic and an administrative role.

Dr. Chait has written extensively on tenure policies and affirmative action. His co-written book, *Alternatives to Traditional Tenure Practices*, will be published this winter by Jossey-Bass Publishers.

His articles have been published in such journals as *Change Magazine*, *Press*, the *New York Times*, the *Chronicle of Higher Education*, and *ACB Reports*.

In addition, he has done extensive case studies and consulting work for a number of universities, foundations, and other institutions.

Chemistry Ph.D. winner of top ACS award

Dr. Wayne L. Gladfelter, who earned his doctorate in chemistry at Penn State in 1978, is the first (1980) winner of the American Chemical Society's new Nobel Laureate Signature Award for a Graduate Student in Chemistry.

An announcement of the \$2,000 award, sponsored by the J. T. Baker Chemical Co., was made Sept. 10 at the Society's week-long meeting in Washington, D.C.

Dr. Gladfelter, who is now an assistant professor of chemistry at the University of Minnesota, was cited for pioneering predoctoral research conducted with his preceptor, Dr. Gregory L. Geoffroy, associate professor of chemistry. The research focused on organometallic cluster compounds that serve as new types of "homogeneous" catalysts. (Catalysts speed chemical reactions and have a wide range of uses.)

One potential application of catalysts from organometallic cluster compounds is the conversion of synthesis gas, a mixture of carbon monoxide and hydrogen made from coal, into ethylene glycol. These catalysts also may have application in nitrogen fixation and hydrogen conversion processes.

At Penn State, Dr. Gladfelter developed a synthetic method for the rational synthesis of mixed-metal clusters; synthesized six new clusters using this method, including the first two examples of clusters comprised of three different transition metals; modeled many of the spectral changes using computer assigned line-shape analysis; and provided the first definitive evidence of intermetallic rearrangement in clusters.

Campus Update

With a \$256,000 grant from the U.S. Environmental Protection Agency (EPA), the Capitol Campus will develop a course to provide technical knowledge to citizens and state and local officials who serve in an advisory capacity to EPA wastewater treatment and water quality management programs.

According to Dr. Theodore L. Gross, provost/dean of Capitol Campus, the EPA grant is the largest single award the Campus has ever received from an outside sponsor.

Capitol Campus will develop and provide an instructor's guide, participants' (Continued on page 2)

The Alard Quartet is opening its 25th season at Penn State with a Sept. 19 concert. (See story, page 4.) From top: Donald Hopkins, Leonard Feldman, Raymond Page, Joanne Zagst Feldman.

Penn Staters

Dr. Laurie M. Gunter, professor of nursing and human development, has been named a Fellow of the American Academy of Nursing. The Academy is composed of registered nurses who have made significant contributions to the nursing profession. Dr. Gunter has pioneered as an educator, researcher and clinician in the development of geriatric and gerontological nursing.

Dr. Joseph Jordan, professor of chemistry, presented invited lectures on "Electroanalytical Chemistry of Sulfur Compounds" and "Glassy Carbon Electrodes" at the Sept. 1-7 meeting of the International Union of Pure and Applied Chemistry in Davos, Switzerland. He also presented invited lectures at the University of Paris, the National French Science Foundation in Paris, and Louis Pasteur University in Strasbourg. Next month he will deliver seminars at the University of Minnesota and at Iowa State University. At the former institution, he will speak on "Electro-analytical Modelling of Biological Systems;" at the latter, he will discuss "Electrochemical and Thermochemical Resource Development in the Analytical Chemistry of Sulfur Compounds for the New Coal Conversion Technologies."

Otto E. Mueller, who retired in 1977 as assistant vice president in charge of Housing and Food Service Operations, has been named to receive the Association of College and University Housing Officers Award. The award, the highest honor that ACUHO can bestow, recognizes outstanding achievements in the field of college housing and food service.

Dr. Sumer C. Aggarwal, professor of management science, last month chaired a session of the Fifth International Conference on Production Research held in Amsterdam. He also presented a paper at the conference entitled "Productivity: A Measure or a Mirage."

Dr. Patricia Ward, associate professor of French and comparative literature, recently gave a paper on "Medievalism in the Romantic Novel" at the seventh triennial congress of the International Comparative Literature Association. The congress was held at Innsbruck, Austria, with 37 countries represented among the participants.

Rodelle Weintraub, assistant professor of English, presented an invited paper, "The Irish Lady in Shaw's Plays," at the triennial International Conference of the International Association for the Study of Anglo-Irish Literature (IASAIL). The Conference was held at Maynooth College, The University of Ireland, July 9-14.

Dr. Richard A. Queney, associate professor of engineering mechanics, recently presented a paper at the Third International Conference on the Mechanical Behaviour of Materials, meeting at Cambridge University. His paper, "Fatigue and Fracture Response of Metal-Infiltrated Sintered Powder Metals," discussed the mechanical design limitations of composite materials commonly manufactured in Pennsylvania.

George W. Bieri, director of the Wilkes-Barre Campus, has been elected to the Board of Directors of The Economic Development Council of Northeastern Pennsylvania. The EDCNP furthers the social, economic, and physical development of a seven-county area through research, planning, development, and related public information activities.

Obituaries

Samuel C. Sabeau, professor emeritus of art and former assistant dean of the College of Arts and Architecture, died Sept. 9 at the age of 76. He was appointed to the faculty in 1957 and retired in 1967. A graduate of the Minneapolis School of Art, he had a B.A.

Paul Ebaugh, associate dean for research in the College of Engineering, retired Aug. 31 after 34 years of service with the rank of professor and associate dean emeritus.

After receiving his A.B. from Denison University, he worked with the Owens-Corning Fiberglass Corporation, where he developed the original coatings and lubricants for fiberglass textiles. He spent a year in research on low and intermediate temperature bonds for basic open-heart steel furnace refractory aggregates with Basic Refractories, Inc., of Tiffin, Ohio. From 1943 to 1945 he was a research associate at the Harvard Underwater Sound Laboratory, conducting electronics and acoustics research.

Dean Ebaugh joined the faculty in 1945 as an assistant professor at the Ordnance Research Laboratory, where he was

engaged in underwater acoustics research and later served as project engineer for two homing torpedo development programs. In 1952 he was promoted to professor of engineering research and in the same year became assistant to the dean of engineering research and assistant director of the Department of Engineering Research. In this capacity he was responsible for planning, organizing and directing research activities of the College.

In 1957 Dean Ebaugh became associate dean for research. Among his many administrative duties was the directorship of the Space Science and Engineering Laboratory. He also was acting director of the Pennsylvania Transportation and Traffic Safety Center when it was first established in 1968.

Author of several technical articles and papers on acoustics and research administration, Dean Ebaugh is the holder of four patents.

He has served as secretary, conference committee member and chairman of the National Conference on the Administration of Research. He was also chairman of the Engineering Research Council, a member of the board of the American Society of Engineering Education, a trustee of the Upper Atmosphere Research Corporation and a member of the Council of Institutions in the Universities Space Research Association.

Dean Ebaugh and his wife, Jean, will continue to reside in State College.

On Oct. 1, Thomas C. Houtz will retire from his position as group leader-landscape in Physical Plant. He joined the University staff as a groundskeeper on June 16, 1943, and was promoted to group leader in 1962. As group leader, Mr. Houtz was responsible for supervising a crew of approximately 20 people. He was in charge of maintaining the athletic areas, including Beaver Stadium, the soccer field, baseball diamonds, tennis courts and I.M. Building. The crew was also responsible for snow removal in winter and spraying for Dutch elm disease.

Mr. Houtz is a State College native.

John A. Eisenhauer, a patrol officer at the Hershey Medical Center, retired Sept. 1. He had been employed by the University since Aug. 5, 1968.

Promotions

Staff Exempt

Jack D. Brown to director, facilities planning, maintenance and laundry operations in Housing and Food Services.

Polly A. O'Neill to coordinator for in-service training and quality control at Hershey.

John C. Simpson to supervisor, central copy centers in Business Services.

Staff Nonexempt

Mary Ann Biddle to research technician at Hershey.

Dianne Formicone to senior nutritional care technician at Hershey.

Barbara Kopystecki to library assistant, microfoms cataloging in University Libraries.

Clerical

Hallye A. Bathurst to secretary C in Education.

Joy Creeger to secretary C in Liberal Arts.

Karen L. Harpster to secretary B in Engineering.

Jean C. Kagaris to secretary B in Human Development.

Joanne L. Kempher to secretary A in Human Development.

Anna M. Madden to secretary B in Liberal Arts.

Sandra B. Nichols to secretary B at Hershey.

Gloria K. Sampsel to secretary C in Education.

Virginia A. Strelitz to clerk, records A at Hershey.

Pamela J. Williams to clerk, accounting A in Controller's Office.

Technical Service

Roderick E. Barnaby to stock clerk assistant in Intercollege Research Programs.

Barbara A. Bush to animal caretaker A at Hershey.

John L. Ferencik to maintenance mechanic A at Beaver.

Buskirk, assistant professor in the graduate Urban and Regional Planning Program, will be co-director.

Freshmen entering the associate degree program in wildlife technology at the DuBois Campus this Fall will compose, two years hence, the 10th graduating class in this field.

Since its inception in 1970, the program has graduated 350 students. Sherwood S. Stutz, who implemented the curriculum, remains as program head.

Wildlife Technology, a department in the School of Forest Resources of the College of Agriculture, is recognized by other schools. A reciprocal plan in wildlife biology is in effect with Edinboro State College. Graduates from the DuBois Campus may have all of their courses applied toward a B.A. or B.S. at Edinboro. Edinboro students may attend the last two years at the DuBois Campus in the wildlife technology program and receive a bachelor's degree from Edinboro simultaneously with the associate degree in wildlife technology from Penn State.

The Department of Obstetrics and Gynecology at The Milton S. Hershey Medical Center has been expanded to provide a full range of primary care and referral services, Department Chairman

Robert K. Fulton to refrigeration technician at Hershey.

Luella Goshnau to patient service aide at Hershey.

Paul B. Jones to group leader, bindery in Business Services.

Neil B. Kimer Jr. to airport attendant in Business Services.

Billie B. Kress to group leader-food production in Housing and Food Services.

Steve A. Kuczel to maintenance worker (general) B at McKeesport.

Doris Litten to machine operator in Housing and Food Services.

Lynne A. Merryman to stock clerk-truck driver in Housing and Food Services.

Marjorie E. Schaeffer to dining hall worker A in Housing and Food Services.

Edward M. Shirk Jr. to patrol officer at Hershey.

Linda L. States to campus bus driver in Business Services.

Gary W. Walters to relief operator in Business Services.

Dr. Ronald A. Chez has announced.

With the appointment of five new physicians, the department's medical staff has been increased to 10. Six practice both obstetrics and gynecology and four are limited to gynecology.

The department now provides services in obstetrics, gynecologic oncology, gynecologic urology, sexual dysfunction, chronic pelvic pain, gynecologic endocrinology, infertility, family planning, high risk obstetrics, adolescent medicine and the peri-menopausal period.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Special Events

Thursday, Sept. 13
Shakespeare Film, Hall/Rigg, *A Midsummer Night's Dream*, 6:30 p.m., Room 112 Chambers. Free.

Dept. of Architecture Films, Mr. Freedom, 7 p.m.; Fahrenheit 451, 9 p.m., Room 112 Kern.

Religious Affairs, 10-part film, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.

Friday, Sept. 14
Sports: soccer, vs. Long Island.

France-Cinema, Claude Chabrol, Violette, 7 and 9 p.m., Room 112 Kern.

Nelson W. Taylor Lecture on Materials Science, 7:30 p.m., Room 26 Mineral Sciences.

Turner Alfrey, Jr., The Dow Chemical Company, on "The Effects of Mechanical Processing on the Structure and Performance of Thermoplastic Polymers," Artists Series, Anthony and Joseph Paratore, duo piano, 8:30 p.m., Schwab.

Saturday, Sept. 15
Sports: football, vs. Rutgers, Beaver Stadium.

Commonplace Theatre, If, 7 p.m.; Oh Lucky Man, 9 p.m., Room 112 Kern.

Performing Arts Festival, John Sowers, magician, 7 p.m.; Penn State Singers, 8 p.m., Schwab.

Sunday, Sept. 16
University Chapel Service, 11 a.m., Eisenhower Chapel. The Reverend Carl Derk, PSU.

Coalition for Christian Outreach, speaker, Shaver's Creek Nature Center, Fall Wildflower and Weeds Walk, 2 p.m., Stone Valley.

Commonplace Theatre, If, 7 p.m.; Oh Lucky Man, 9 p.m., Room 112 Kern.

Monday, Sept. 17
Last date for Nov. graduates to activate diploma cards in Registrar's Office and to pay these fees in Bursar's Office.

France-Cinema, Violette, 7 and 9 p.m., Room 112 Kern.

Color Slide Club meeting, 7:30 p.m., Room 189 MRL.

Performing Arts Festival, Rustical Quality String Band and Red Rose Cottillon Band, 8 p.m., Schwab.

Tuesday, Sept. 18
Gallery talk, 10:30 a.m., Museum of Art. Roy Buck and Richard Jones, organizers of "Heritage Sampler," walk through the exhibit.

Comp. Lit. Luncheon, 12:15 p.m.; talk, 1 p.m., Hotel State College. Gerald Moser, Romance languages, emeritus, on "The 6th Conference of Afro-Asian Writers."

Comp. Lit. Film Series, Sidney Lumet, The Seagull, 6:45 and 9:09 p.m., Room 112 Kern.

Performing Arts Festival, Contemporary Dance Company, 7 p.m., HUB Ballroom.

Wednesday, Sept. 19
Alard String Quartet, 8:30 p.m., Music Bldg. Recital Hall. Free.

Thursday, Sept. 20
Pass/Fail.

Board of Trustees meeting, Keller Bldg. Sports: field hockey, vs. Millersville.

Religious Affairs, 7:30 p.m., "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.

Performing Arts Festival, Lou Sopoci, piano; Unity Christian Dance Ministry; Donna Jagiello, 8 p.m., Music Bldg. Recital Hall.

Friday, Sept. 21
Pass/Fail. Last date for applying for Graduate School Tuition Grant-in-Aid for Winter Term 1980.

Board of Trustees meeting, Keller Bldg. Sports: soccer, vs. Allersom-Broadus.

Commonplace Theatre, The Apprenticeship of Duddy Kravitz, 7 and 9 p.m., Room 112 Kern.

Performing Arts Festival, women singers and performers, 7 p.m., Robeson Cultural Center.

Artists Series, Forrest Tucker and Butterfly McQueen in Showboat, 8:30 p.m., Eisenhower Auditorium.

Saturday, Sept. 22
Hori Show, 10 a.m.-9 p.m., tents in Flower Gardens.

Sports: football, vs. Texas A & M.

France-Cinema, Eric Rohmer, Perceval, 7 and 9:30 p.m., Room 112 Kern.

Performing Arts Festival, Orchestis Dance Company, 7 p.m., Robeson Cultural Center.

Sunday, Sept. 23
Hori Show, 10 a.m.-4 p.m. Sales of some show materials, 4 p.m., tents in Flower Gardens.

University Chapel Service, 11 a.m., Eisenhower Chapel. The Reverend John J. Wenzke, PSU Lutheran Student Parish, speaker.

Commonplace Theatre, The Apprenticeship of Duddy Kravitz, 7 and 9 p.m., Room 112 Kern.

Performing Arts Festival, "Encore - Best Performances of the Festival," 8 p.m., HUB Ballroom.

Artists Series, Estelle Parsons in Miss Marguerite's Way, 8:30 p.m., Schwab.

Physics/Computer Science, Rolf W. Landauer, IBM, on "Fundamental Physical Limitations of the Computational Process," 3:50 p.m., Room 445 Davey.

Wednesday, Sept. 19
Interdisciplinary Discussion of Sports, Aaron Druckman, philosophy (retired), on "Sport: Muscles, Morality and Metaphysics," faculty informal bag-lunch gathering, noon, Room 104 White.

Thursday, Sept. 20
Chemistry, Jon Clardy, Cornell Univ., on "Structural Studies on Natural Products," 12:45 p.m., Room 333 Whitmore.

Fuel Science, M. A. Vannice, chemical engineering, on "Catalytic Hydrogenation of CO to Produce Fuels and Chemicals," 4 p.m., Room 301 Steidle.

Mathematics, John Nohel, Univ. of Wisconsin, Madison, on "A Nonlinear Volterra Equation Arising in Heat Flow," 4 p.m., Room 102 McAllister.

Exhibits

HUB Galleries: "Roma Interrotta," original architectural drawings.

Kern Commons Galleries: Mahin Ghanbari, ceramics, through Sept. 22; Harley Strauss, photographs, and "Clites, U.S.A.," photographs.

Museum of Art: "Heritage Sampler," through Sept. 23; European works and 19th century American paintings from the permanent collection; recent paintings and drawings by George Zoretich, opens Sept. 16.

Pattee Library: "Maps: Alternate Form of Communication," through Sept. 17, Main Lobby; "American Scene," prints from the University Libraries fine prints collection, opens Sept. 18, East Corridor Gallery.

Robeson Cultural Center: "Black Women: Achievements Against the Odds,"

Zoller Gallery: Faculty exhibit, opens Sept. 16.

"Lots 60 and 63" by Peter Jogo in Zoller Gallery faculty show.

Seminars

Monday, Sept. 17
Plant Pathology, Gary Schroeder, graduate student, on "The Use of Nitrogen to Control Weed Molds in Commercial Mushroom Compost," 3:55 p.m., Room 213 Buckhout.

Tuesday, Sept. 18
Organic/Inorganic Chemistry, Loren Keys, graduate student, on "Recent Mechanistic Studies on Aliphatic Hydroxylations by Cytochrome P-450," 12:45 p.m., Room 333 Whitmore.

Air Pollution, Stephen R. Turns, Mechanical engineering, "Air Pollution and the Automobile," 2:20 p.m., Room 140 Fenske.

Arts Roundup

Zoretich exhibit at Museum

The Museum of Art will host a show of new works executed by George Zoretich, professor of art, during his 1978-79 sabbatical. The exhibition opens Sunday, Sept. 16, with a reception from 3 to 5 p.m. in the Museum.

Included in the show are 14 large acrylic paintings, two watercolors and six pen and ink drawings. Mr. Zoretich describes his work as "rooted in nature," adding: "I am not dealing with direct, observable fact but rather with the essence of nature."

Gallery talk on Sept. 12

Roy C. Buck and Richard Jones will conduct a "Walk through the Heritage Sampler Exhibition" at the Museum of Art at 10:30 a.m. Tuesday, Sept. 18.

The two men, both avid collectors of Central Pennsylvania early domestic arts and crafts, assembled the 104 items currently being shown in the second floor gallery of the Museum.

Mr. Jones resides in Mifflinburg. Dr. Buck is professor of sociology and social sciences at the University. Their talk is sponsored by the Friends of the Museum.

Duo piano team to perform works by Mozart, Brahms, Schubert

Selections from Mozart, Brahms, Strauss and Schubert—including the "Fantasia in F minor"—will be performed by duo pianists Anthony and Joseph Paratore as part of their Artists Series-sponsored concert at 8:30 p.m. Friday, Sept. 14, in Eisenhower Auditorium.

The Paratore brothers studied at Juillard with Rosina Lhevinne, the internationally known teacher, and it was she who suggested that they concentrate on duo piano.

The Paratore brothers have toured throughout Europe, and in 1974 they won the Munich International competition. They have

performed in the United States with orchestras ranging from the Boston Pops to the New York Philharmonic.

Tickets for their performance will be on sale through Sept. 14 at Eisenhower Auditorium box office and the Artists Series HUB booth.

Faculty show opens Sept. 16

The newly created School of Visual Arts will present its first faculty show, opening Sunday, Sept. 16, in Zoller Gallery.

The exhibition, which, in the words of Dr. Harlan Hoffa, acting director of the School, offers "the first opportunity for the art and art education faculties to hang together," will feature works by 40 members of the faculty. Among them are several artists from Commonwealth Campuses.

A wide variety of media will be represented, including painting, sculpture, printmaking, papermaking, weaving, graphic design, ceramics, photography and drawing.

There will be an opening reception from 3 to 5 p.m. in the Gallery on Sept. 16.

(Continued on page 4)

The advantages of a liberal arts education . . .

One of the enduring benefits of a liberal arts education, it is said, is the ability to adapt to a variety of situations as one courses through life.

True as that may be, few graduates ever get to flex their talents for transition like Christine Irvin, a State College native who earned her B.A. in general arts and sciences from the University in 1967 and works now as a secretary for the Artists Series.

From 1975-78, Ms. Irvin was the administrative manager of a 100-acre commercial vineyard in the south of France. There, she developed the business executive's skills for dealing with customers and bureaucrats, the agriculturalists' preoccupation with the whims of nature, and, of course, the connoisseur's tongue for the delights of the vine.

"I didn't go to France to work in the wine industry," she says. "After graduation, I wasn't sure of what I wanted to do. So in 1969 I left for France, thinking I wanted to be a fashion buyer."

Finding fashion not to her liking, she secured employment in Brentano's, a bookstore where she handled English language correspondence.

"During my four years in Paris, I began to get interested in wine," she notes. "There were plenty of opportunities to read about it and taste it, because a little bit of all of France collects in the wine stores."

Through a friend, she met Bernard Laudon, owner of Domain des Feraud, a vineyard in Provence. "When I first tasted his wine, I could hardly believe how good it was," she exclaims. "Provence is hardly the best wine section of France."

M. Laudon, an absentee owner, offered Ms. Irvin a position as secretary, and soon after enlarged her responsibilities to administrative manager.

"My duties were to deal with the six representatives of the firm and to act as their liaison with the proprietor, to do the payroll, to organize and coordinate all operations between the various people involved in filling our customers' orders both in France and abroad, to keep all company records, including the wine storage, to handle all government papers dealing with the transport of wine, and to conduct tours and give tastings."

The paperwork was generated by the abundance of government controls designed to discourage fraud, "to ensure that the wine in the bottle is exactly what is indicated on the label and that the label accurately states this," Ms. Irvin points out.

Government controls were tightened further during her tenure, when the Cotes de Provence was raised in status from V.P.Q.S. (Vins Délimités de Qualité Supérieure) to A.O.C. (Appellation d'Origine Contrôlée).

"The amount of wine the vines in the Cote de Provence were allowed to produce was cut back, as the emphasis was placed on quality instead of quantity," she says.

"The inspectors wanted winemakers in Provence to prune the vines in February—bad for us because we liked to wait until April to prevent frost damage. We were forbidden to sugar anything, whereas some areas may sugar the wine because the alcohol content is normally so low; in the south, long, hot, sunny days made sugaring unnecessary."

Nevertheless, Ms. Irvin notes, it is weather, not governmental restrictions, that plays the most important role in a vineyard.

"A vineyard requires a tremendous amount of work, and you have to be there all the time," she observes. "It gives back what you put into it—if you're lucky!" Domain des Feraud, she notes, lay in a depression that was especially susceptible to killing frosts.

"But M. Laudon was a tremendous innovator, which is why he could produce one of the finest wines in Provence. One of his innovations was to prune the vines differently from the normal pruning method in the region. He cut off everything except for one or two runners

Christine Irvin

which were attached to wires and were better able to withstand the frosts, a method called 'la taille-longue'."

"Another of his innovations was to plant varietals that are not characteristic of Provence, such as the cabernet-sauvignon and syrah, giving him a surprisingly elegant and well made red for Provence, and semillon, the grape for the beautiful sweet wines of Sauternes and which M. Laudon used to make his luscious dry whites."

Still, the frosts took their toll. In Ms. Irvin's first year, Domain lost half its crop to frost and another fourth to rot, caused by excessive rainfall.

And if the vines made it through spring and began to flower, there was a host of other problems.

"Pests tend to attack the plants during the flowering in late May and early June," she says. "We also prayed for wind; bees don't touch the vines, so vintners are entirely dependent on the wind for cross-pollination."

Her section of Provence was often hit by violent summertime storms, which arose quickly and occasionally produced damaging hail.

"We could feel when it was going to hail," Ms. Irvin says. "M. Laudon's answer to that was to fire a cannon-type gun into the clouds beforehand. This affected the temperature so that the precipitation came in the form of rainfall instead of hail."

Heavy rains often came to the south of France in mid-September, but Domain tried to postpone its harvest till late September "so the grapes could get as much sun as possible," Ms. Irvin explains. "If we didn't get our 12 percent alcoholic content, we didn't get our label."

Domain usually hired about 40 extra workers for the month-long harvest. "We tried to get it in as quickly as possible," she says, "because too much rain would reduce the sugar, which is so necessary for the staying power of wine, as well as the acidity which keeps a wine healthy and balanced."

Last year was the Domain's "most fantastic season," Ms. Irvin notes. "We had such good quality wine and so much of it—a change for us."

It was also her last. M. Laudon decided to sell Domain, and after nine years in

France, Ms. Irvin felt it was time to return home.

She very much likes her position with the Artists Series, though she harbors the thought of someday owning her own vineyard.

"You drink up the sunshine, the rain and the hotness of the place and become part of the cycle of nature," she says. "You see all the struggles that a vine has to go through and the people who sweat blood over it, then you put it into a glass for the first time and find that it's beautiful. You get the feeling of what it is like to create a work of art, as indeed a bottle of fine wine is. And that's worth all the struggles and heartaches."

— Roger Williams

Shostakovich Quartet on Alard program

The Alard String Quartet, the University's quartet-in-residence, will launch its 25th year with a concert at 8:30 p.m. Wednesday, Sept. 19, in the Music Building recital hall.

Included on the program is Dmitri Shostakovich's Quartet No. 8, opus 110, a piece the Alard premiered in the United States in 1962. Completed in 1960, the Quartet No. 8 reflects the composer's experiences during the siege of Leningrad in World War II.

Mozart's Quartet in B-Flat Major, K. 589 is also on the program, along with Franz Schubert's Quartet in D Minor, opus posthumous, written in 1824. The variations in the slow movement of the latter are based on one of the composer's earlier songs, giving the piece its nickname, "Death and the Maiden."

The Alard String Quartet is composed of Joanne Zagat Feldman and Donald Hopkins, violinists, Raymond Page, violist, and Leonard Feldman, cellist. All are associate professors of music.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 845-1287 (network line 473-1387). Applications for these staff vacancies will be accepted until 5 p.m. Sept. 20, 1979. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT DIRECTOR OF NURSING — COLLEGE OF MEDICINE, Hershey
Responsible to the Assistant Hospital Director/Director Nursing Services for assisting with the administration of the Department of Nursing Services within assigned patient care areas, including the planning, organizing, staffing, coordinating, and evaluating activities necessary for continuation of nursing care and supervision of nursing care. M.S.N. in nursing administration or related field, preferred; or equivalency, and three to four years of directly related experience with a hospital setting and relating to the area of accountability. Current licensure as a registered nurse by the Pennsylvania Board of Nurse Examiners.

STAFF DEVELOPMENT INSTRUCTOR — COLLEGE OF MEDICINE, Hershey
Responsible to the In-service Program Coordinator for planning and teaching various nursing service educational programs. Strives to increase the level of knowledge among the professional staff through various programs of orientation, skill training, continuing education and leadership training. Bachelor's degree with one to two years of directly related experience in hospital nursing, preferably with one year as a staff development instructor, or diploma graduate with two to four years directly related experience in hospital nursing, with a minimum of two years as an in-service instructor.

FIELD SUPERVISOR, DHIA — COLLEGE OF AGRICULTURE, University Park Conduct field training and monitor the work of DHIA supervisors in assigned geographical area; instruct new supervisors in methods of weighing and sampling milk, data collection procedures on feed, prices, breeding, etc. Check the accuracy of the scales used for weighing and sampling milk in the DHIA Program. Assist in checking barn sheet data as required. Make corrections to incorrectly reported data. Provide interpretation of DHIA rules and regulations to supervisors and dairymen. Provide advice and counsel to DHIA local directors on the conduct of their program; report on supervisors' performance; provide recommendations regarding hiring and firing of personnel. Associate degree or equivalent in an agricultural program, preferably dairy science, plus one to two years of directly related experience. Knowledge of milk sampling procedures, feed management and data collection techniques related to dairy operations is desirable.

RESEARCH AIDE — COLLEGE OF AGRICULTURE, University Park Prepare soil samples for laboratory analysis. Determine the proper amount by weight and volume to be used for each experiment. Prepare solutions used for instrumental analysis. Insure that solutions rigidly adhere to experimental specifications and that experiment conditions are followed exactly. Chemically and physically analyze soils. Determine percentage or weight content of elements of salts, silica, alumina, etc., utilizing volumetric, gravimetric, spectrophotometric, flame photometer, atomic absorption processes and the centrifuge. Utilize the University computer facilities when possible to aid in soil experiments. Associate's degree in agronomy or science or two years of degree credits with courses in quantitative analysis, biochemistry and soil chemistry required. Over three months and up to and including 12 months of directly related experience in a soil or plant research laboratory is necessary.

BUSINESS MANAGER, DuBois
Campus Responsible to Campus Director for all University business matters, including maintenance and operation of buildings and grounds, personnel and employee relations, services, purchasing, coordination of physical plant planning and construction activities, security, etc. Bachelor's degree, plus two to four years of directly related experience in the areas of physical plant management, ground maintenance, purchasing, inventory control, budgets, safety programs, etc.

President expresses support for goals of United Way

Since 1971, the University has authorized deductions for one major voluntary charitable fund raising effort on each campus. In the following interview, Dr. Oswald departs from his traditional letter of official authorization for a United Way as the University-endorsed charitable program. He explains his personal views and commitment to United Way and reasons behind the University's support of the program.

QUESTION: Dr. Oswald, your involvement with United Way nationally as a member of the United Way of America Long Range Planning Committee and sub-chairman of the Committee on Volunteerism and Public Policy indicates a personal commitment to United Way.

What are your personal views on the importance of United Way?

ANSWER: For many years it has seemed to me that cooperation and coordination of the compassionate efforts of many individuals are the most effective, efficient, and economical means to accomplish our good intentions for our fellow man. The accumulated experience in the United Way seems to me to serve each one of us in our charitable giving.

QUESTION: You've also been supportive of United Way's America's recent "corporate development" program. The Penn State campus system is seen as an educational or non-profit prototype for a similar complex effort, one coordinated

approach in a dispersed number of locations. What does this mean to a member of the Penn State family?

ANSWER: Nearly 200 large corporations in the United States with subsidiaries across the country are now conducting a unified campaign at all locations. The outline of the campaign, including materials, is similar for all, but the emphasis continues to be a close tie-in with local United Way agencies. The results of such an effort have been significant. And, of course, colleges and universities are similarly involved.

Penn State, with its 22 campuses and eight-year old history of supporting United Way through payroll deductions

Senate raises graduation requirements; PS-23 discussed

The University Faculty Senate at its Sept. 11 meeting passed and sent to the Provost legislation requiring a C average for graduation in courses listed in the undergraduate University Bulletin as "Prescribed" or "Additional Credits" under "Requirements for the Major."

Senator Arthur O. Lewis, associate dean of Liberal Arts, offered the following amendment which will be considered by the Senate at its October meeting:

"Nothing in the new addition to 82-40 just passed shall be interpreted as changing higher graduation standards previously approved by the Senate for specific academic units, as listed in the 1979-80 undergraduate Bulletin."

The College of the Liberal Arts currently stipulates that, "A student who receives two grades below C in required courses in the major may be dropped from that major, not later than the beginning of the student's tenth term."

Senate Chairman George J. McMurtrey, noting that the Senate had taken a very important step in amending Policy 82-40, said: "There are many strategies which universities might follow in attempting to hold their enrollments high . . . one

way . . . is to lower standards in order to attract more students and receive more tuition. . . .

"I don't think that I'm letting out any great secrets when I say that one of the very strong themes that runs through the current draft of the Plan for the '80s is to maintain high quality at this institution. It seems to me that the amendment that the Senate passed today was a very strong supporting step in that direction. We really have said that this University intends to maintain and, in fact, even strengthen its requirements and therefore keep its program quality very high."

In presenting a progress report on the implementing of BDR III requirements, Daryl K. Heasley urged senators to monitor in their own colleges the consultation process which should now be taking place between or among units to prepare the listing of BDR III courses for each undergraduate program. These program requirements are due by Jan. 15, 1980.

The composition of the BDR III Subcommittee was announced. It includes, in addition to Dr. Heasley, an associate

(Continued on page 2)

Editor's note: Below is the text of the President's report on promotion and tenure presented to the Senate on Sept. 11.

Mr. Chairman and Ladies and Gentlemen of the Senate. In the very first section of the Senate booklet, the Constitution and Bylaws and Standing Rules of this body are set forth. On the first page is a list of the legislative and consultative or advisory functions in the Constitution of the Senate. Among the latter I refer to consultative functions, number eight, which is entitled "Faculty Affairs including Academic Personnel Policy." Certainly one of the most key and critical of the academic personnel policies of an institution such as this is the one setting forth the procedures and criteria for promotion and tenure. And as we know in this University, these are now incorporated in a policy known as PS-23. This policy, under which we are operating, was approved by my office in the summer of 1975 to go into effect Sept. 1, 1975 — after a long and complete consultative process, first with the Faculty Affairs Committee of this body, and then with the entire Senate itself. As early as 1973, I

indicated in a document addressed to the entire University community the need for a complete review of the tenure policies at the University. About the same time, some of you will recall, there was established a Joint Faculty/Administrative group known as the Friedman Committee, under the chairmanship of Bob Friedman, to review the governance procedures of the University. This group made several recommendations to this body and to me, and jointly to both of us. Many of them related to promotion, tenure, peer review, and similar issues. During the two years of 1973 to 1975, much discussion took place in the Faculty Affairs Committee about the development of a possible new policy to cover tenure and promotion. Recognizing that whatever developed would involve both the Senate in its key role as a consultative group and ultimate Presidential approval, the Senate officers agreed that a representative from my office might serve in an ex-officio capacity with the Faculty Affairs Committee during this drafting period. Our former Vice President Stan Ikenberry served in this role, working very closely with the Faculty Affairs

UCLA Vice President urges return to teaching of reading and writing

The posture of the humanities — specifically English and foreign languages — in the face of declining student interest and enrollments was the subject of two talks by UCLA executive vice president William D. Schaefer last week.

Dr. Schaefer, a professor of English and former executive director of the Modern Language Association, addressed the English Colloquium and the Comparative Literature Luncheon Sept. 11.

Tracing the change in the public's attitude toward a liberal arts education, Dr. Schaefer pointed to the 1960s as the time when educators "became enamored with the idea of a multiversity which could encompass all kinds of educational endeavor. Since large numbers of students meant increased expenses, higher

education found it convenient to justify the high cost of college degrees through financial arguments. Because college graduates earn more, or so it was claimed, an entire generation of college graduates would somehow be good for the national economy.

"Higher education in effect sold out,"

Dr. Schaefer told the English Colloquium. "No wonder that by the 1970s there were demands for taxpayers for fiscal accountability and from students for courses and majors that could lead, if not to pots of gold, then to jobs. Higher education was no longer viewed as an end in itself but as a means to an end — to jobs, careers and financial security."

Humanists ignored or acquiesced in these developments, overwhelmed by the sheer numbers of students and dazzled by the funds at their disposal. "We began to play the game ourselves," Dr. Schaefer said, recalling a pamphlet distributed by the MLA heralding English as "the pre-professional major."

"But it is not our game," he warned, "and we would be well advised to get out of it and stay out of it. At least as regards the undergraduate curriculum, we cannot persuade the public of the value of a liberal education with a dollar sign."

A second major cause for the present "sorry state" of liberal education, according to Dr. Schaefer, has to do not with the population explosion but with the knowledge explosion, with the

proliferation of new courses, majors and disciplines.

In language and literature, Dr. Schaefer noted, the explosion was not so much in subject matter as approach — elitism became the order of the day.

"We have," he said, "a whole new breed of Ph.D. candidates trained in the subtle art of unintelligibility. . . . I suggest that as a profession we come off it, that we address the head count crisis by developing innovative new courses in which we talk to students about books, knowledge, plays and poets — about what they say and mean and how they say and mean it."

But before literature can be made accessible to students, students must be taught to read and write, and Dr. Schaefer expressed concern that the profession sometimes seems to go out of its way to denigrate the teaching of reading and writing.

He described the very real satisfactions he has personally found in teaching literature, "in working with language, form, imagery, and meaning and watching them explode and come to life in the mind

of the student. . . .

"In many ways it is more difficult to teach a freshman composition class than a seminar on John Donne," he commented.

"All of us must somehow get into the business of teaching basic reading and writing every day," Dr. Schaefer continued. "We in the humanities have to do this because the study of literature, our discipline, cannot survive unless, to borrow a phrase from affirmative action, we develop a 'pool of qualified applicants,' people who can read. Reading and writing are our stock in trade, and until we recognize and reward those who teach and do research in the teaching of reading and writing, until we restore or introduce into our graduate curriculum courses in the teaching of rhetoric and stylistics, we can forget about Chaucer because we won't have enough Chaucer students to worry about teaching."

Dr. Schaefer expressed hope that the pendulum may be swinging back from vocational to liberal education. He cited core course requirements in the humanities which are being reinstated as part of

(Continued on page 3)

Penn Staters

Dr. Antonio C. Lasaga, assistant professor of geochemistry, will receive the 1979 F.W. Clarke Medal of the Geochemical Society at its annual meeting in November in San Diego, Calif. The award recognizes a young scientist for an outstanding paper in geochemistry or cosmo-chemistry published within five years of the completion of his formal studies. Dr. Lasaga was selected for co-authoring a chapter, "The Mathematics of Cation Diffusion and Exchange between Silicate Minerals during Retrograde Metamorphism," that appeared in the book, *Energetics of Geological Processes*, published in 1977 by Springer-Verlag.

Louise W. Hamilton, professor of foods and nutrition extension, received the Doctorate of Food Science Medallion from the 36,000-member National Association of Food Equipment Manufacturers at its annual awards banquet Sept. 17 in St. Louis, Mo.

Dr. Howard E. Morgan, Evan Pugh Professor of Physiology at the Hershey Medical Center, was head of the U.S. Delegation attending the Fourth U.S.-U.S.S.R. Symposium on Myocardial Metabolism, held in Tashkent, U.S.S.R., Sept. 14-15.

Dr. Yupo Chan, assistant professor of civil engineering, has been named a Congressional Fellow with the Office of Technology Assessment (OTA). Dr. Chan, whose appointment is for at least one year beginning Sept. 1, is one of four fellows chosen from 67 applicants in nationwide competition. OTA's basic function is to help legislators anticipate and plan for the effects of technological changes and to examine the ways technology affects people's lives.

Paintings by Bill Hanson, associate professor of art, are included in the final exhibition of the summer season at Wingspread Gallery, Northeast Harbor, Me. Selections for this group exhibition were made by Robert Neuman, professor of art at the University of New Hampshire.

Dr. Joseph L. French, professor of special education and educational psychology, has been elected chairman of the Council of Directors of School Psychology Programs.

Dr. Beverly Lindsay, assistant professor of education, has been named an American

Council of Education Fellow for 1979-80. She will assist in the development of a national policy-research agenda on issues affecting minorities in higher education through the year 2000 and will also prepare policy papers on higher education policy for fiscal 1980-81 for National Institute of Education directors and associate directors. During July and August, she was academic director of Cross Africa Research and Studies Programs for the American Forum for International Study and for Adelphi University.

Retirements

Dr. Harry D. Zook, assistant vice president for research and graduate studies, associate dean of the Graduate School and head of the Intercollege Research Program and Facilities at the University, will retire Sept. 30.

Dr. Zook joined the Penn State faculty in 1942 as an instructor in chemistry. He became an assistant professor in 1946, associate professor in 1955 and full professor in 1960.

From 1965 to 1967 he served as assistant to the vice president for research and director of the Institute for Science and Engineering. In 1967, he was named assistant vice president for research.

Dr. Zook served as the assistant head of the Department of Chemistry from 1960 to 1965. On leave from Penn State during the 1962-63 academic year, he was appointed visiting lecturer in chemistry at Stanford University.

In 1975, he was presented the John E. Wilkinson Award for Administrative Excellence. The award is presented annually to an administrator at the University for outstanding achievement in the administrative field.

Dr. Zook is a 1938 graduate of Penn State with a B.S. in chemistry. He received his Ph.D. in organic chemistry at Penn State in 1942. His M.S. was granted by Northwestern University in 1939.

His research focused on the nature and reactivity of carbanions, and he published 25 papers on his work. He is co-author of the book, *Synthetic Organic Chemistry*.

Edna S. Moore, a food service worker in Housing and Food Services since Sept. 11, 1960, retired Aug. 14.

Cloyd Ruby, a landscape architecture technician in Arts and Architecture since Dec. 15, 1967, retired Sept. 8.

Senate

(Continued from page 1)

professor of rural sociology extension. Dr. Mary G. Chisholm, assistant professor of chemistry at Behrend College; David Schlow, instructor in economics at Shenango Valley; Dr. E. Willard Miller, associate dean for resident instruction, Earth and Mineral Sciences; Dr. Michael P. Hottenstein, professor of management; Joanne Zagst Feldman, associate professor of music; Dr. Eugene R. Melander, assistant vice president for undergraduate studies; and Provost Edward D. Eddy. The leadership of the Faculty Rights and Responsibilities Committee was also announced. Dr. Donald R. Olson, professor and head of mechanical engineering, will serve as chairman; Dr. Ronald J. Harshbarger, associate professor of mathematics at Beaver, vice chairman; and Liberal Arts Dean Stanley F. Paulson, secretary.

Provost Eddy introduced Donald G. Dickson, dean of admissions, who described the reorganization of the Admissions Office and its present thrust. (See story on page 4.)

Merged as of July 1 were the Office of Secondary School Relations, which reported to the Vice President for Student Affairs, and the previous Admissions Office, which reported to the Vice President for Undergraduate Studies. In concert with the Commonwealth Campus admissions offices, these groups will now report through Dean Dickson to the Provost.

Dr. Francis H. Witham, associate professor of biology, is the new head of the Department of Horticulture.

He succeeds Dr. Craig S. Oliver, assistant dean for extension, who has served as interim head since June 1978.

Since 1967, Dr. Witham has been a faculty member of the Department of Biology, responsible for the undergraduate program in plant physiology. He came to Penn State in 1966 as an assistant professor of botany.

Dr. Witham has had three major research interests in plant physiology — the isolation and chemical characterization of compounds which stimulate cell division in normal plant tissues and tumors, determining the chemical basis for interaction between plant hormones and nucleic acids, and investigating the physiological and biochemical basis of cold tolerance in plants. He has published about 30 papers on these topics.

A native of Waltham, Mass., Dr. Witham earned his B.S. and M.S. degrees in botany and zoology at the University of Massachusetts. In 1964, he received a Ph.D. in plant physiology from the University of Indiana, with minors in zoology and chemistry.

He and Prof. Carlos O. Miller, a University of Indiana botanist, pioneered the work on the discovery, chemical characterization and biological activity of Zeatin, a highly potent regulator of cell division in plants.

A textbook consultant in plant physiology for Van Nostrand Reinhold Publishing Co., Prentice Hall and Springer-Verlag, Dr. Witham is the senior author of the widely used laboratory text, *Experiments in Plant Physiology*, and a scientific advisor in chemistry and biology to the J.T. Baker Chemical Company.

Winfred M. Phillips, professor of aerospace engineering, was appointed associate dean of research for the College of Engineering, effective Sept. 1. He succeeds retiring Dean Paul Ebaugh.

Dean Phillips received a B.S. in mechanical engineering from the Virginia Polytechnic Institute and an M.S. and D. Sc. in aerospace engineering from the University of Virginia. He joined the Penn State faculty in 1966 as an assistant professor. He was promoted to associate professor in 1974 and to professor in 1978. During 1976-77, he was a visiting professor at the Institut de Pathologie Cellulaire of the University of Paris, and Hôpital de Bicêtre. Last year he was acting chairman for the Intercollege Bioengineering Program at the University.

His research interests include fluid mechanics, hemodynamics and the development of a total artificial heart and heart assist devices. He has contributed to four biomedical engineering books and is the author or co-author of more than 80 articles, technical papers, reviews and abstracts. In 1971, he received a Dow Award for Outstanding Young Faculty Members, and he currently holds a Research Career Development Award from the U.S. Public Health Service.

Elwood M. Wagner, records officer, has been appointed associate registrar in a reorganization of the University Registrar's Office.

Other changes announced by Warren Haffner, University registrar, include: Ardell Tyson as coordinator of data systems and procedures; Richard T. Sodergren as director of registration and scheduling; and Gary L. Hile as director of records.

Bryn Mawr archaeologist to lecture Sept. 25

Brunilde S. Ridgway, of the Department of Classical and Near Eastern Archaeology at Bryn Mawr College, will speak on "Architect and Sculptor in Fifth Century Athens" at 8 p.m. Tuesday, Sept. 25, in Room 101 Kern Building.

Her public lecture, which will be illustrated with slides, is sponsored by the Central Pennsylvania Society of the Archaeological Institute of America.

In her talk, Dr. Ridgway will discuss the problem of which decisions in major monuments were made by the architects and which by the sculptors.

Prof. Ridgway was born in Italy and received her education there and in Abyssinia. She holds a Ph.D. in classics from Messina University and a second Ph.D., this one in archaeology, from Bryn Mawr. In 1977 she was named Rhys Carpenter Professor of Classical and Near Eastern Archaeology.

She has been a member of the Institute for Advanced Study at Princeton, director of the Summer Session at the American School of Classical Studies in Athens, and Andrew Mellon Visiting Professor in Fine Arts, University of Pittsburgh. She is also a panelist and consultant for the National Endowment for the Humanities.

In addition to numerous articles and book reviews, her publications include the following books: *The Severa Style in Greek Sculpture*, *Classical Sculpture*, and *The Archaic Style in Greek Sculpture*.

"I think that particular reporting relationship is important," Dean Dickson pointed out. "It says that admissions is first and foremost an academic affair of the University..."

He noted that the "old" Admissions Office did an outstanding job in the 1978-79 year, and that admission data, as of Sept. 6, were up about 10 percent over last year at University Park, and slightly more at the Campuses.

Dean Dickson also told the Senate of his intent:

— To incorporate Commonwealth Campus admissions representatives as thoroughly as possible into the admissions process;

— To generate a tracking system for student inquiries and to make "intelligent use of marketing techniques";

— To explore with the Senate ways of becoming "more flexible in our admissions standards" to "identify and capture many different kinds of talented students";

— To try to increase minority student enrollment, which now constitutes about 2 to 3 percent of the entering student body; and

— To intensify efforts to obtain financial aid for students.

The Senate also heard a report from W. LaMarr Kopp, director of the Foreign Studies Program. Dr. Kopp noted that some 3,200 students have thus far participated in overseas programs, and that in 1979 the grade point average of Penn State students studying in foreign countries was 3.31.

He also pointed out that students are sometimes discouraged from applying for foreign studies programs because they fear they cannot afford it.

"If a student can afford to be at University Park, he or she can afford to be in Taiwan," Dr. Kopp said.

A brief status report was made by Graduate Dean James B. Bartoo, chairman of the Joint Faculty/Administration Commission To Review and Make Recommendations on Policy Governing Promotion and Tenure.

Dean Bartoo said that the Committee had prepared 10 preliminary recommendations and was now in the process of receiving input from the Faculty Affairs Committee, the Council of Academic Deans, the Council of Commonwealth Campus Directors, and the Caucus of Commonwealth Campus Senators.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Special Events

Thursday, Sept. 20
GSA Jogging Workshop,
7:30 p.m., Room 101 Kern.
Office of Religious Affairs 10 part film, "How
Should We Then Live?" 7:30 p.m.,
Memorial Lounge, Eisenhower Chapel
Performing Arts Festival. Lori Sopoci, piano;
Donna Jagiello, dance, 8 p.m., Music Bldg.
Recital Hall.

Friday, Sept. 21
Pass/Fail.

Last date for applying for Graduate School
Tuition Grant-In-Aid for Winter Term 1980.
Board of Trustees meeting, Keller Bldg.
Performing Arts Festival. University Choirs,
12:30 p.m., Pattee Library steps; speakers,
Sue Kogan on "Women in the Arts," and
Karen Pollock on "A Pencil on the Arts,"
1:30 p.m., HUB Main Lounge; women
singers and performers, 7 p.m., Robeson
Cultural Center.
Geography Dept. coffee and lecture, 3:45 p.m.,
Room 319 Walker. Kent Forster, history, on
"Are There Yugoslavs in Yugoslavia?"
Sports: soccer, vs. Alderson-Broadus, 7:15
p.m.

Artists Series, Show Boat, with Forrest Tucker
and Butterfly McQueen, 8:30 p.m.,
Eisenhower Auditorium.

Saturday, Sept. 22
Hort Show, 10 a.m.-9 p.m., tents in Flower
Gardens.

Sports: men's cross-country, Alumni
Invitational, 10:30 a.m.; women's cross
country, Lady Lion Invitational, 11 a.m.;
football, vs. Texas A & M, 1:30 p.m.
France-Cinema. Eric Rohmer, *Perceval*, 7 and
9:30 p.m., Room 112 Kern.

Performing Arts Festival, Orchestra Dance
Company, 8 p.m., Robeson Cultural Center.
Sunday, Sept. 23
Hort Show, 10 a.m.-4 p.m., tents in Flower
Gardens. Sales of some show materials, 4
p.m.
University Chapel Service, 11 a.m., Eisenhower
Chapel. The Reverend John J. Wenzke, PSU
Lutheran Student Parish, speaker.
Shaver's Creek Nature Center, "Wild Plant

Seed Dispersal," 2 p.m., Stone Valley
Commonplace Theatre. *The Apprenticeship of
Duddy Kravitz*, 7 and 9 p.m., Room 112
Kern.

Performing Arts Festival. "Encore - Best
Performances of the Festival," 8 p.m., HUB
Ballroom.

Artists Series, Estelle Parsons in Miss
Margarita's Way, 8:30 p.m., Schwab.

Monday, Sept. 24
Pass/Fail.
Drop deadline.
Course repeat deadline.
Preregistration deadline for Winter Term 1980.
New deadline for Winter and Spring Terms
IAHS faculty research grant applications,
Hilgert Cottage.
France-Cinema, *Perceval*, 7 and 9:30 p.m.,
Room 112 Kern.

Tuesday, Sept. 25
Last date for written foreign language
examinations (other than French and
Spanish) for advanced degree candidates.
Comp Lit. Luncheon, 12:15 p.m., talk 1 p.m.,
Holt State College. Peter Clemoes,
medievalist, Cambridge Univ., speaker.
Sports: women's volleyball, vs. Indiana (Pa.), 6
p.m.; soccer, vs. West Chester, 7:15 p.m.
Comp. Lit. Film Series, Antonioni, *The Red
Desert*, 7 and 9 p.m., Room 112 Kern.

Archaeological Institute of America Lecture, 8
p.m., Room 101 Kern. Brunilde Ridgway
and Bryn Mawr College, on "Architect and
Sculptor in fifth century Athens."

Samurai*, 8 p.m., Schwab.
English Colloquium, 8 p.m., Room 305 HUB.
Peter Clemoes, Cambridge Univ., on
"Symbolic Language in Old English
Literature."

Wednesday, Sept. 26
Kern Commons Concert. Rustical Quality
String Band, noon-1:30 p.m., Kern Lobby.
Raymond Page, viola, 8:30 p.m., Music Bldg.
Recital Hall, free.

Thursday, Sept. 27
GSA, Macrae Workshop, 7:30 p.m., Room
112 Kern.
Faculty Women's Club Fall Reception, 7:30-9:30
p.m., Kern.
Religious Affairs, 10 part film, "How Should
We then Live?" 7:30 p.m., Memorial
Lounge, Eisenhower Chapel.

Friday, Sept. 28

Last date for applying for 1980 Study Abroad
(Fulbright) Awards.

Geography Dept. coffee and lecture, 3:45 p.m.,
Room 319 Walker. Arthur Anderson,
architectural, on "Visual Stimulation."

Commonplace Theatre, *Kentucky Fried Movie*,
7 and 9 p.m., Room 112 Kern.

Artists Series, Pinchas Zukerman, violin, 8:30
p.m., Eisenhower Auditorium.

Saturday, Sept. 29

Last date for November graduates to deliver
doctoral theses to the Committee.

Sports: women's golf, Penn State Fall
Invitational, through Sept. 30; women's
tennis, Penn State Invitational, through
Sept. 30; field hockey, vs. Lock Haven, 1
p.m.

France-Cinema, Rainer Werner Fassbinder, *The
Bitter Tears of Petra Von Kant*, 7 and 9 p.m.,
Room 112 Kern.

Sunday, Sept. 30

University Chapel Service, 11 a.m., Eisenhower
Chapel. Dr. John W. Davis, PSU Center for
Air Environment Studies, speaker.
Commonplace Theatre, *Kentucky Fried Movie*,
7 and 9 p.m., Room 112 Kern.

Seminars

Monday, Sept. 24
Microbiology/Cell Biology/Biochemistry/
Biophysics, Loretta Leive, NIH, on
"Mutants in Lipopolysaccharides that Affect
Permeability of *Escherichia coli*," 3:55 p.m.,
Room 101 Althouse.

breadth requirements on many campuses;
other schools, he said, are developing
broadly based lower division sequences
which bring many disciplines to bear on a
particular theme.

And he referred to the efforts of the
Presidential Commission now preparing a
report on language and area studies and to
the funds currently available to the
National Endowment for the Humanities.

"Things are happening - it is all too
little or too late? I don't know," he said.

The factors working in favor of English
studies may also help foreign language
programs, according to Dr. Schaefer.

In his address to the Comparative
Literature Luncheon, he urged his
colleagues if "we seriously believe in the
importance of language acquisition to
insist that our institutions take steps to
ensure that language studies receive a high
priority."

This priority, however, should not be
given to programs which force students to
complete a set number of course credits.

"I believe the foreign language course
requirement is responsible more than any
other single factor for the dismal state of
language in our schools," Dr. Schaefer said.
"The course becomes an end in itself.
What we need is a stipulated, specific level
of attainment."

Language studies must "be brought out
of the closet," Dr. Schaefer said, "to
occupy a meaningful place in our
communities," so that students can expand
their proficiency by actually using the
language they are studying.

"But we will never reach the promised
land until we recognize that both the

Physics, Kenneth Brecher, Boston Univ., on
"Do Neutron Stars Obey the Laws of
Physics?" 3:55 p.m., Room 117 Osmond.

Fuel Science, Ashok Moza, fuel science, on
"Slag Formation in Coal Combustors," 4
p.m., Room 301 Steele.

Mathematics, J. Cima, Univ. of North Carolina,
on "Some Properties of Bloch Functions," 4
p.m., Room 102 McAllister.

Exhibits

Chambers Gallery: David Van Dommelen,
"Tents and Tapestries," woven wall
hangings.

HUB Galleries: "Roma Interrotta," original
architectural drawings, through September.

Kern Commons Galleries: Mahin Ghanbari,
ceramics, through Sept. 22; Harley Straus,
photographs, and "Cities, U.S.A.,"
photographs, both through Sept. 29; Tsing-
fang Chen, paintings, opens Sept. 30.

Museum of Art: "Heritage Sampler," through
Sept. 23. European works and 19th century
American paintings from the permanent
collection, recent paintings and drawings by
George Zoretich; 19th century American
prints and drawings from the permanent
collection, opens Sept. 30.

Pattee Library: "American Scenes," prints
from the University Libraries fine prints
collection. East Corridor Gallery.

Zoller Gallery: Faculty exhibit.

News in Brief

Deposit slips to be put in interdepartmental mail

Effective Oct. 1, all employees who have
their salaries deposited directly in the bank
will have the deposit slips showing payroll
deductions and amount of deposit
delivered to their place of work every
payday via interdepartmental mail.
Deposit slips will no longer be mailed to
the home address each quarter as in the
past.

All members of the staff who will be
involved in routing this information are
asked to cooperate in making the new
system work by seeing that deposit slips
are delivered to the proper recipients as
promptly as possible.

W-2 forms, which must be filed with
income tax returns, will also be delivered in
January via interdepartmental mail.

Roma Interrotta exhibit brought to Penn State

The Roma Interrotta, an exhibition of the
20th century redesigning of Giambattista
Nolli's famous map of the city of Rome, is
on display at the HUB Gallery through
Sept. 23.

The Penn State exhibition is the second
of only two engagements the show will
have in this country. The first was held in
the Cooper-Hewitt Museum in New York
City.

The Interrotta comprises the efforts of
twelve 20th century architects who
superimposed present-day forms on the
18th century Nolli plan. The redesign of
the map shows the variety of formal and
philosophical attitudes regarding urban
design which are held by these architects.

The 1746 Nolli plan contains not only
contemporary structures but famous
monuments such as St. Peter's Basilica.
Remaining ancient and Christian structures
of the capital also are recorded.

The unique feature of the Nolli map is
the distinction between public and private
areas of the city. Public spaces, interior and
exterior, are drawn in a deliberate, detailed
architectural manner; while those areas
designed as private spaces are outlined
only for the purpose of clarifying
boundaries, then shaded in.

The map, respected by architects and
urban designers world wide, became a
source for the later development of Rome,
as well as an inspirational guide for other
cities in the 19th and 20th centuries.

The Roma Interrotta showing at Penn
State is sponsored by the Department of
Architecture.

Page to offer violin, viola recital Sept. 26

Raymond Page, associate professor of
music, will present his first recital of the
year at 8:30 p.m. on Wednesday, Sept. 26,
in the Music Building Recital Hall.

During the first part of the program,
Mr. Page will perform J. S. Bach's Sonata
in E Minor and Bela Bartok's Sonata No. 2
on the violin. He will be accompanied on
the piano by Steven Smith, an associate
professor of music.

During the second part of the program,
Mr. Page will perform the viola part of
Hindemith's "Meditation," accompanied
by pianist Phyllis Triolo.

The program will conclude with a
performance by the Camerata Trio of
Johannes Brahms' Trio for Viola, Cello and
Piano. The trio consists of Mr. Page, Ms.
Triolo and Earl Williams. Dr. Williams
earned his Ph.D. in acoustics at Penn State
last year.

(Continued from page 1)

Committee in the drafting period of the document that ultimately came to the Senate. In the Spring of 1975, there was much discussion and debate about the recommendations that came forward from the Senate Committee on Faculty Affairs, and ultimately a totally new policy was passed by this body and recommended to be late in the Spring of 1975. I approved the Senate recommendations in total — only after making a few necessary editorial changes and adding a section covering research personnel, who at that time were not a part of this body and therefore were not considered in the document prepared by the Senate. This document became effective on Sept. 1, 1975. It was also necessary to develop administrative guidelines each year in order to have certain dates set, specific regulations regarding membership on committees and various procedural steps. But I always make it a policy to review these administrative guidelines with the Faculty Advisory Committee, as you heard from Chairman McMurtry. I have done this year already, for the guidelines for next year. PS-23 is basically administered by the Provost's Office. After the first year of implementation in 1975-76, and much more so after the second year of '76-77, several suggested changes in PS-23 were forthcoming from various segments of the University. Some of these changes were basic in character, and others of them were rather minor and more procedural in nature.

I personally was very reluctant to make any basic alterations in PS-23 before a five-year period of experience, recognizing the need for any such policy as important as this to have stability and continuity and not to be subject to constant changing, and therefore, represent some uncertainty as related to individual faculty members. In September of 1977 I discussed the matter at length with the Faculty Advisory Committee, who agreed with this position. At that time it was agreed that there should be established a Joint Faculty/Administration Commission that would keep under continuous review — and I emphasize the word "continuous" — a continuous review of

the effectiveness of the University policy on promotion and tenure. The Commission would make recommendations that might be considered after the policy had been in effect some five years. This joint commission was appointed by the then Chairman of the Senate, Professor Thomas Daubert, and myself, in October of 1977, and Dean James Bartoo was named by the two of us as chairman of the joint commission.

At the September '77 meeting of the Senate I also reported on the statistics of the operation of PS-23 for the first two years. I was asked if I would make a similar report each year thereafter; that is, to indicate the various statistics that this group would find of interest. I also at that time announced the plan to avoid any fundamental changes in PS-23 during that first five years of operation, and also indicated the intention to establish the Joint Commission. I also, however, indicated some four or five minor issues to which the Faculty Affairs Committee might give immediate consideration concerning possible changes. Thus during the Spring of '77-78, there were some nine changes recommended by this body to me. Of these I approved six; one other was interpreted as already permissible; the two remaining of them, however, were considered major in character and were referred to the Joint Commission chaired by Dean Bartoo. I also again a year ago at this time reported on the third year of operation of PS-23.

I now give the report of the operation during the past year. In the year 1978-79, the University Review Committee considered 91 recommendations for tenure. The Committee gave these very careful reviews and I cannot emphasize too strongly the appreciation that I have, and that I think you would have had also, for the amount of time and care and concern the Committee puts into the process of review. Of the 91 recommendations for tenure, 80 were recommended by the Committee to be awarded; and 11 were recommended not to be awarded. This represented 88 percent positive recommendations by the University Committee. Provost Eddy and I reviewed every one of the 91 cases, and particularly those cases where there was a clear difference of opinion within the University Committee. We not only received the Committee's report, but we received the

position taken by each one on the Committee as well as the total results. This year we had no disagreements with those 11 recommended negatively by the Committee. Of those 11, one was from Behrend College; six were from University Park; and four were from the Commonwealth Campuses. As far as promotion and promotion to full professor in '78-79, 45 were considered by the University Committee, and the ultimate result was that 39 of these were promoted and six of these were not promoted. Of these six, four were individuals at University Park, and two were from the Commonwealth Campuses. Insofar as the relationships between the recommendations of the Committee and the ultimate action of the President and the Provost on these, we differed on three cases. The Committee had recommended 42 yes and three no. The final decision was 39 yes and six no. There were three cases in which there was disagreement out of the 45 cases.

In promotions recommended to associate professor last year, there were 81 considered. Sixty-eight of these were from University Park, Capital, Hershey, and Behrend, and 13 were from the Commonwealth Campuses. Of the 68 from the four campuses other than the Commonwealth Campuses, 42 were recommended for promotion, and 26 were recommended not to be promoted. Of the 13 from Commonwealth Campuses, 10 were recommended to be promoted; three were recommended not to be promoted. Of the 81 total, 52 were recommended to be promoted; 29 not, or 64 percent. Out of that 81, there were five cases with which the Provost and the President differed with the recommendations of the Committee. I must emphasize that in each of these there were major differences within the Committee also. There were many cases where the reports of the Committee would be six for promotion, five against promotion, or there were a number of cases where there were five for promotion, five against, and one abstained. Those were not what I would call recommendations; they gave us, however, an idea of the very close call that was necessary. So I bring this report to you which does not differ very much from the previous year.

I will offer just three more sets of figures. In the case of tenure throughout the entire University (as you know, tenure can be denied

at the department or college level, as well as at the University level), of those originally recommended for tenure throughout the University, 69 percent received tenure. At University Park, 72 percent recommended for tenure received tenure; from the Commonwealth Campuses, 74 percent recommended for tenure received tenure. So the percentages were almost identical. For promotion to professor, of those recommended, 38 percent were promoted; for University Park, the figure was 38 percent; for the Commonwealth Campuses, it was 60 percent, which represented, however, three out of five as compared to a much, of course, higher figure at University Park. For total University, at the associate professor level, 35 percent of those proposed were promoted; at University Park, 36 percent were promoted; for the Commonwealth Campuses, 43 percent of those proposed were promoted to associate professor. I am often asked about these figures and how they compare among locations of the University. These figures, of course, will be made a part of the record.

Before closing my remarks on tenure, let me make one last comment. This Commission that has been appointed and which Dean Bartoo chairs, is not appointed as an ad hoc group, but rather as a continuing group to keep PS-23 under continuous review. Therefore, after it makes its final report to the Chairman of the Senate and to me sometime this Winter and the Faculty Affairs Committee begins its work in drafting possible legislation concerning changes, I am going to ask this Commission to stay in operation long enough to review these drafted proposals before they get too far along the line. This group of faculty and administrators in the Commission have probably been giving more thought to the operation and problems and the complexity of PS-23 than any other group within the University. After this next review, the Chairman of the Senate and I will take steps to begin rotation of membership in this Commission. In this way, although it is a continuous commission, the individual members will be changed from time to time. We will set forth a method whereby there is some continuity in the group.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Sept. 27, 1979.

COMPUTER OPERATOR — UNIVERSITY LIBRARIES, University Park Responsible for preparing the computer for program processing and for satisfactory completion of scheduled computer operation. Duties include setting up for various programs and operations, preparing peripheral equipment, maintaining equipment, diagnosing causes for interruptions, verifying output, recording usage, and completing job run sheets. High school graduate with operator's training in basic computer systems, equal to two years of college. One to two years of effective experience.

E.H.S. SHIFT SUPERVISOR, COLLEGE OF MEDICINE, Hershey Responsible to the Manager Environmental Health for overall quality control planning, scheduling and supervising the work of the project cleaning crews. Conduct training sessions for janitorial workers, evaluate new materials, equipment and techniques. High school with a minimum of 3-4 years effective experience, including some supervisory experience in janitorial service or related area.

MAINTENANCE SUPERVISOR — MEADE HEIGHTS, HOUSING AND FOOD SERVICES, Capitol Campus Responsible to Manager of Housing and Food Services at Capitol campus for general housekeeping and maintenance of Meade Heights houses, residence halls, married student apartments, and ground keeping services in the Meade Heights area. High school diploma required, trades or apprenticeship training in maintenance for two to four years of experience in maintenance type operations.

FOOD SERVICES SYSTEMS ASSISTANT, Human Development Responsible to the faculty of FSHA for assisting students in the efficient and effective procurement of foodstuffs and supplies and for coordinating the internal operation of the dining facilities. Duties include: advising students on food ordering and delivery systems, checking accuracy of student orders, coordinating order-receiving of foodstuffs, checking orders and delivery and return for credit inappropriate supplies. Locate vendors for unusual products, maintain balance in central journals, approve and process invoices, maintain inventories, maintain storage area. High school graduate, plus up to two years of experience in quantity food operations. (This position requires 33-37 weeks of service — usually Sept. 1-May 20 — and will be tied directly to the terms. Vacation will be taken between terms.)

United Way

(Continued from page 1)

and working with local United Ways, could be viewed as a model for higher education.

For a member of the Penn State family, our participation in this program changes little. In the next few years, with the help of United Way professional staff persons, we hope to improve even more our methods for telling Penn Staters the hows and whys of United Way, so that everyone can make an informed decision. This year's program, beginning with this interview, is the start.

QUESTION: Why has the University chosen to endorse United Way instead of a series of individual agency campaigns?

ANSWER: Across the State, United Way represents a large number of community help agencies. Because of the number of agencies that can be helped by one drive and because those agencies are selected by local people, participating in United Way is an efficient way of helping many people with a minimum of time and expense.

QUESTION: How does the University benefit from participation in United Way?

ANSWER: Although there are no statistics available to us, we know that through United Way agencies across the State many of Penn State's more than 12,000 employees and its 50,000 students and many of their families are helped either directly or indirectly. In addition, the University is a prime employer in some localities and accepts a responsibility to give leadership to charitable efforts in the area. For example, in Centre County, the University Park campus is the county's largest employer and the United Way is significantly affected by the response of the University community.

QUESTION: The campaign literature stresses that an individual's contributions are confidential. How is that confidentiality ensured?

ANSWER: An individual's participation

in United Way is confidential whether he or she has chosen to contribute or not. Our concern is that every employee has the opportunity to reply. Local United Way agencies receive the information directly and tabulate it. Their records are confidential, too. But to make sure all persons have had the opportunity to participate, the names of persons who haven't replied by certain deadlines are made available. As in the case of salary information, payroll deductions are also confidential. An individual's deductions, for credit union, insurance or United Way, are not released outside the Payroll Department to anyone else in the University.

QUESTION: What is our procedure and goal for Penn State and the authorized charitable solicitation this year?

ANSWER: I encourage and urge each person to join me in receiving, reading and acting on the materials sent out.

Van Dommelen exhibits woven hangings in Chambers

"Tents and Tapestries," an exhibit of woven wall hangings by David B. Van Dommelen, professor of art education, will continue through Oct. 2 at the Chambers Gallery.

The hangings in the exhibit use assorted materials, including paper and textiles. "The examination of textures in juxtaposition with each other is exciting to me, while the discovery of unusual materials opens up new and rewarding avenues of personal expression," Prof. Van Dommelen says.

"My interest in tents during the last year is an outgrowth of my imaginary world of fantasy and make-believe, which I believe all of us should live in — at least part of the time."

Admissions Office reorganized into teams

The Undergraduate Admissions Office has been reorganized into four regional teams, according to Donald G. Dickason, dean of admissions.

"The regional teams are designed to serve the Eastern, Western and Central/Northeastern sections of Pennsylvania," Dean Dickason says. "In addition, we've formed an Out-of-State Regional Team."

Previously, the Penn State admissions process had been conducted through a system of specialists working in individually defined areas. There were, for example, separate admissions counselors for freshmen, advancing standing students, provisional and non-degree students, those seeking readmission and students being admitted through EOP.

The reorganization, Dean Dickason says, will enable the Admissions Office to serve better the 20 Penn State campuses which are involved with undergraduate instruction as well as the prospective applicants themselves.

Under the reorganization, which takes effect Oct. 1, Dr. James T. McKel, director of undergraduate admissions, will be the overall director of the regional teams.

Geoffrey J. Harford will be the Eastern Regional Coordinator, and Diane Freytag will be assistant director. The Central/Northeastern Regional Coordinator will be Henry E. Schmidt, with Nancy J. Klosterman as assistant director. Western Regional Coordinator Samuel W. Haggerty will be assisted by Sara K. Ness, and James Winck will head the Out-of-State team.

It was announced earlier that Dr. Glenn C. Carter is the assistant dean for admissions. Other appointments in the reorganization of the office are George T. Clark, assistant to the dean in charge of minority admissions; and Paul Kenep, director of academic information systems.

Penn State Intercom

News in Brief

Faculty, staff members to receive benefits statement

Each regular, full-time faculty and staff member appointed prior to Jan. 1, 1979, will receive a personal statement highlighting the major provisions of the comprehensive program of benefits provided to faculty and staff members and their families by Penn State.

The individual statements will be mailed in early October to the home address and will provide basic information on the group life insurance, hospital, surgical and major medical and dental coverage, retirement, social security, accidental death and dismemberment insurance, disability benefits and worker's compensation. Also, an estimated dollar value of the benefits will appear on each statement.

President Oswald requested that these statements again be provided to faculty and staff members to inform new employees about their benefits and to update information for faculty and staff members who received the initial benefits statements issued in 1977.

The information shown on the statements reflects data as of July 1, 1979, and includes salaries as increased effective that date. However, any changes in

information since that date will not be reflected in the statement.

Faculty or staff members who have any questions about their statement should contact the Employee Benefits Division.

Senate to meet Oct. 2

The University Faculty Senate will hold its October meeting at 2:10 p.m. Tuesday, Oct. 2, in Room 112 Kern Graduate Building.

The Senate will debate and vote on a motion proposed as an addition to Policy 82-40, passed by the Senate last month. Academic policy 82-40 requires that in order to graduate a student must earn at least a C cumulative average for all courses designed as "Requirements for the Major," including "Prescribed Courses" and "Additional Courses."

The new motion asks that nothing in the new addition be "interpreted as changing higher graduation standards previously approved by the Senate for specific academic units as listed in the 1979-80 Undergraduate Bulletin."

The Senate will also discuss legislation delegating responsibility for curricular matters to the College of Medicine. The text of this proposal appears on page 6. This legislation will be voted on in November.

(Continued on page 6)

The Challenge of the '80s

Editor's note: This article is part of a series in which the academic deans reflect on what lies ahead for their colleges in the '80s.

The millions of Americans who have taken to jogging, paddleball and cross-country skiing mean good news for the College of Health, Physical Education and Recreation in the eighties.

The national obsession with physical fitness has significantly altered both the academic mission of the College and the job prospects of its graduates, according to Dean Robert J. Scannell.

"Historically we were a teacher training college," he points out. "Until the 1960s, no one graduated from HPER without a teaching certificate."

But as doctors began to herald the benefits of exercise and a prospering economy produced the leisure and cash rewards necessary to enjoy it, new industries burgeoned — and with them new job opportunities.

"We've moved away from a purely institutional orientation," Dean Scannell

explains. "In the mid-sixties, a recreation major could look forward to being recreation program, usually for a government agency. A physical education major could look forward to being employed as a teacher by a school district."

"Now less than half of our graduates take that route. One of the biggest demand areas in recreation, for example, is in nursing homes. Twenty years ago, no one had even thought of hiring a recreation major for this kind of work. Health education is another rapidly changing job area. Hospitals and clinics need training personnel to 'translate' the complicated instructions physicians prescribe for their patients."

"I don't see this phenomenon going too much further in terms of changing the nature of the College," Dean Scannell continues. "We expect the job market for physical education teachers to begin to strengthen even though the school population has declined."

"Many of the World War II veterans who flooded the field are approaching retirement, while teachers who were unable to find jobs have entered other professions. They aren't going to return to teaching because they can't afford to take the salaries that accompany entry-level positions. And finally, the downward trend in the population curve seems to be leveling off."

"So I think we've hit the bottom, even if we haven't quite finished adjusting to it." The action will be in the health-related areas during the next decade, Dean Scannell predicts.

"I think we will see some kind of national health insurance or similar legislation pass the Congress," he says. "Whatever form it eventually takes, it's bound to create tremendous changes in job opportunities and needs. And it will be implemented at the same time that a large

(Continued on page 7)

Dr. Grubb

From the Trustee Docket

Dr. R.E. Grubb appointed as Senior Vice President

Dr. Richard E. Grubb, who has held several different administrative positions during 18 years of service to the University, has been promoted to senior vice president for administration, effective immediately.

The University's Board of Trustees approved the advancement of Dr. Grubb, the Board's associate secretary and vice president for administrative services.

Dr. Grubb succeeds Dr. Stanley O. Ikenberry, who became president of the University of Illinois on Sept. 1.

In recommending Dr. Grubb for the promotion, President Oswald noted that, over the last several years, he "has essentially served as Dr. Ikenberry's key assistant and has filled in for him on many occasions in a most effective manner."

"There is no question that he will bring great strength to the administrative team of the University and especially to his new areas of responsibility."

The senior vice president for administration, as one of the University's top officers, is primarily responsible for the operation of the non-fiscal, administrative services within the University, and for the relationship with its many external constituencies.

A recent review, said Dr. Oswald, has led to "minor administrative realignments that are effective with Dr. Grubb's appointment. These changes will help to serve the current needs of the University more effectively."

Three administrative units are being transferred from the Office of the Vice President for Student Affairs to the Office of the Senior Vice President for Administration. They are the Ritenour Health Center, including the Mental Health Center; the Office of Career Development and Placement; and the Office of Financial Aid.

"It is an advantage," said Dr. Oswald, "for these service units to be organizationally located with other essential administrative services of the University."

"This reorganization also permits the Vice President for Student Affairs, and the Provost, to whom he reports, to

concentrate further on the quality of student life and upon those programs that support and augment a student's total academic experience."

Under further realignment, Loren Furiado, director of planning and budget, will now report to Provost Eddy on planning matters and to Robert A. Patterson, senior vice president for finance and operations, on budget-related affairs. He previously had a reporting relationship to both Mr. Patterson and Dr. Ikenberry.

Dr. Grubb will maintain a staff relationship with the Office of the Special Assistant to the President for Governmental Affairs, which will continue to report directly to Dr. Oswald.

Offices that will continue to report directly to Dr. Grubb are:

Management Services, the Department of Publications, Administrative Records, the Assistant Secretary of the Board of Trustees, the Alumni Association, and the offices of Educational Relations, Gifts and Endowments, and Public Information and Relations.

Dr. Grubb's former position, as vice president for administrative services, will be eliminated.

The recommendations for Dr. Ikenberry's successor were made by an Internal Screening Committee, composed of members of the faculty and staff. In addition, an Ad-Hoc Committee of the Board of Trustees consulted with Dr. Oswald on his ultimate recommendation to the Trustees.

Dr. Grubb joins the six-member President's Administrative Policy Council, which also includes the President, the Provost, the Senior Vice President for Finance and Operations, the Provost of

(Continued on page 4)

Appropriation request receives approval

The Trustees approved submission of the 1980-81 State appropriation request which, according to President Oswald, addresses "only the most urgent financial needs of the University."

Included in this preliminary request was an increase of \$19.8 million over the 1979-80 appropriation. This amount is based on a 10 percent increase in the University's general fund budget which supports the basic educational programs of teaching, research and public service.

"Nearly all of this increase is related to inflation," Dr. Oswald said. "The University, like other educational institutions, public agencies and private enterprises, has been hard pressed to cope with the effects of inflation."

In presenting the budget, President Oswald emphasized that Penn State is well aware of the overall financial problems of the Commonwealth, and is doing its part to keep costs to a minimum. "The real

(Continued on page 7)

Fall enrollment up

Fall Term enrollment at the University totals 53,680 students — a record high — according to preliminary figures announced to the Board of Trustees.

New enrollment records also were set for Penn State's Commonwealth Campus system, the Behrend College, the College of Medicine at Hershey and five individual Commonwealth Campuses. Dr. Robert E. Dunham, vice president for undergraduate studies, told the Trustees.

(Continued on page 4)

Dean Scannell

Penn Staters

Dr. Robert Ginsberg, professor of philosophy at the Delaware County Campus, addressed the Fourth International Congress of Neo-Latin Studies last month in Bologna, Italy, on "Grotius and the Problem of War." He also spoke on "Contemporary Interpretations of Rousseau's Social Contract" at the Fifth International Congress on the Enlightenment, held in Pisa, Italy.

Dr. Michael Kiernan, associate professor of English, has been awarded a National Endowment for the Humanities-Huntington Library Fellowship to complete work on a critical edition of Francis Bacon's Essays that will be published jointly by Oxford and Harvard university presses.

Dr. John J. Romano, assistant dean for undergraduate studies and assistant professor of social science in Liberal Arts, recently returned from West Germany where he took part in a conference called "Germany Today," which was organized by Bonn University and supported by the West German government. Dr. Romano was one of 37 scholars from six countries asked by the Federal Republic of Germany to examine political, economic and cultural developments in the Republic since its inception 30 years ago.

Dr. Martin Quinn, assistant professor of English at the Beaver Campus, has been selected to serve as a Fulbright lecturer at Al-Azhar University, Cairo, Egypt, for 1979-80. Dr. Quinn lectures on 19th and 20th century American literature. During the past two years, Dr. Quinn served as a Fulbright lecturer at the University of Tehran, Iran. After the change in governments there, he was transferred to Egypt.

Dr. Richard L. Frantschi, professor and head of the Department of French, recently presented a paper at the Fifth International Congress on the Enlightenment in Pisa, Italy. The subject of his paper was a model for the quantification of narrative voice in Lesage's novel Gil Blas, with comparisons with other novels of the period for contrastive purposes.

Dr. Larry Gamm, associate professor of community development and chairman of the Center for Community Research, has been elected to a two-year term on the board of directors of the Community Development Society of America.

Dr. James D. Gallagher, director of the Worthington Scranton Campus, has been appointed to the Board of Directors of the Economic Development Council of Northeastern Pennsylvania.

Dr. Philippos Loukissas, assistant professor of urban and regional planning in the Man-Environment Relations program, presented a paper at the annual congress of the International Association of the Scientific Experts in Tourism, held recently in Varna, Bulgaria. The paper, "Environment/Behavior Training for Mid-Career Tourism Professionals," was developed in cooperation with Dr. Leo M. Renahan, assistant professor and head of the Food Service and Housing Administration program.

Paul Cerula, business manager at the Hazleton Campus, has been elected President of Can Do, Inc., a non-profit industrial development agency for the greater Hazleton area. This agency secures new industry for the area, and over the past 20 years some 7,000 new jobs have been created. Mr. Cerula also was elected to the board of directors of The Economic Development Council of Northeastern Pennsylvania.

Dr. Wasyli O. Luciw, head of the Slavic Library Program, was a visiting professor again this summer at the Ukrainian Free University in Munich, West Germany. He taught "History of Kievian Rus."

Dr. Rustum Roy, chairman of the Science, Technology and Society (STS) program and director of the Materials Research Laboratory, has been appointed editor-in-chief of a new international scholarly journal, *The Bulletin of Science, Technology and Society*, to be published by Pergamon Press.

The journal will use the open-review system by which a board of associate editors will review and communicate papers directly to the editorial office, to be situated in Room 202 Materials Research Laboratory under the direction of Kathleen Mourant, managing editor.

Dr. Daniel B. Litvin, associate professor of physics at the Berks Campus, was a visiting U.S. scientist with the department of physics at Technion-Israel Institute in Haifa, Israel, during July. Earlier this summer, Dr. Litvin was an invited participant in seminars at both the University of British Columbia and CUNY, City College, where he discussed "Wreath Products of Groups and Applications in Solid State Physics."

An exhibition of paintings and monographs by David Rubello, assistant professor of art, is being shown throughout September at the Alumni Gallery at Mansfield State College. The exhibition is supported by a grant from the Ford Foundation to the School of Visual Arts and a grant from the Institute for the Arts and Humanistic Studies.

Two University faculty members recently returned from Poland where they presented papers as invited participants in a conference on Technology and the Future of Society. They are Dr. Irwin Feller, professor of economics and director of the Institute for Policy Research and Evaluation, and Dr. Thomas Knight, associate professor of American studies and history and associate dean of the College of the Liberal Arts. Dr. Feller's paper was titled "A Comparative Systems Approach to the Diffusion of Innovations in the Public Sector." Dr. Knight's topic was "Toward a Methodology for Technology Transfer in International Affairs." The conference, held in Jablonna-Warsaw, was sponsored by the Institute for Philosophy and Sociology, Polish Academy of Science.

Dr. Marshall Wilcher, assistant professor of political science at New Kensington, delivered a paper, "Political Education in the United States," at a conference on Political Education in an Open Society. Sponsored by the European-Atlantic Movement, the conference was held at Oxford University in July.

Dr. Tom Yawkey, associate professor of education, gave seminars on child's play at the Children's Center, Athens, Greece, and delivered an invited research paper with Margaret Yawkey at the plenary session of the biennial Congress of the International Council for Children's Play in Paris, France. The paper was entitled, "The Effects of Play Training on Selected Cognitive and Affective Abilities of Five Year Old Children."

Dr. Margaret A. Newman, professor of nursing, has been designated an American Council of Nursing Scholar. Dr. Newman is the author of numerous articles and several books, including the recently published *Theory Development in Nursing*.

Dr. Gerald G. Johnson Jr., associate professor of computer science, recently presented a series of invited lectures in Hungary, West Germany, and the Soviet Union. His topics included "Computer Identification of Undetermined Powder Diffraction Patterns," "Image Processing," and "A Serious Look at Laboratory Automation."

Dr. James W. Kelz, professor of education and coordinator of the Rehabilitation Education Programs, has been appointed to the editorial board of the American Journal of Family Counseling. He was also elected to the Executive Board of the Pennsylvania Rehabilitation Association.

Appointments

Dr. Paul Axt, professor of mathematics, has been named director of the University Scholars Program, according to Dr. Robert E. Dunham, vice president for Undergraduate Studies.

The program, approved earlier this year by the University Faculty Senate, is designed to provide special opportunities for superior students.

As director, Dr. Axt will consult with Colleges and Campuses and will work closely with Dr. Dunham to define the program precisely and develop plans for its implementation.

The position is expected to occupy approximately half of Dr. Axt's professional time.

Dr. Axt has been active in Faculty Senate and department matters and served as head of the Mathematics Department from 1971-1975. He has been at Penn State since 1963 and before that was a faculty member at Michigan State University and Lehigh University.

He earned his bachelor's degree at Northwestern University and his doctorate at the University of Wisconsin.

Dr. Bruce M. Siegenthaler has been named research professor of speech pathology and audiology in the College of Education. A faculty member since 1951, Dr. Siegenthaler has served as professor-in-charge of the Speech Pathology and Audiology Program and director of the Speech and Hearing Clinic since 1964. As research professor he will concentrate on investigating hearing disorders and clinical audiology.

Dr. Siegenthaler has completed more than 70 professional articles and research projects and is a Fellow of the American Speech and Hearing Association. He holds B.S. degrees in industrial arts and mathematics from Bowling Green State University. His M.A. and Ph.D. in speech pathology and audiology were granted by the University of Michigan.

Three appointments to the Continuing Education staff of the College of Business Administration have been announced. Dr. Kenneth R. Graham, a lecturer in business logistics, has been named assistant director for Executive Programs. Shirley S. Hendrick, an instructor in the College, has been appointed academic coordinator for Continuing Education; and Albert A. Vicere, a doctoral candidate in higher education, is the new assistant to the director of Executive Programs.

Doan Harshbarger has been named Dean of Student Affairs at the Behrend College. Previously assistant dean and then acting dean at Penn State's Beaver Campus, he came to Behrend as assistant dean in 1978 and was made interim dean when Benjamin A. Lane left that post to head the admissions office at Behrend. Dean Harshbarger holds degrees from Drew University and the Hartford Seminary Foundation.

25-year chair

Wesley G. Houser, program chairman of the Electrical Design Engineering Technology Program and associate professor of engineering at the Capitol Campus, received his 25-year chair from the University recently.

After five years as senior engineer with the Philco Corp. in Philadelphia, Prof. Houser joined Penn State's Ordnance Research Laboratory at University Park in 1954. As a project engineer at the laboratory, he was involved in torpedo and underwater acoustic research programs.

He joined the Capitol Campus faculty in 1967, and was appointed head of its Electrical Design Engineering Technology Program in 1971.

Prof. Houser received his B.S. in electrical engineering in 1949 from Lehigh University and his M.S. in the same field from Penn State in 1958. He is a senior

Retirements

Juanita Thurman retired Sept. 1 after working for the College of Agriculture for 16 years. Ms. Thurman began her University career on Jan. 1, 1963, as a statistical clerk and remained at that position until her retirement. Her duties included working with various census materials and searching for working trends in Pennsylvania.

Mary E. Good, senior assistant librarian at Altoona, retired Sept. 1.

Ms. Good received her B.A. from Westminster College and her M.L.S. from the University of Pittsburgh. She taught history and music at Roaring Spring Elementary School and English at Claysburg-Kimmel High School before coming to Altoona in 1969. Her first position at the Altoona Campus Library was as professional assistant. She was promoted in 1973 to senior assistant librarian.

Stanley M. Sowa, a maintenance worker in the Wilkes-Barre Campus since Aug. 11, 1968, retired Sept. 8.

Obituaries

Helen M. King, a secretary in the College of Agriculture from 1924 until her retirement in 1967, died Sept. 12. She was 76.

Paul L. Edinger, professor emeritus of agricultural extension, died Sept. 19 at the age of 88.

Mr. Edinger graduated from Penn State in 1917. He became the first county agent of Cumberland County and served there for 12 years. In 1923, he took a leave of absence to study at Cornell University, and a year later received his M.S. in agricultural economics.

He was appointed to the faculty in 1928 as assistant director of agricultural and home economics extension and remained on the extension staff until his retirement in 1956.

Charles E. Watkins, a plasterer in the Office of Physical Plant from 1952 to 1979, died June 6. He was born April 10, 1917, in College Township.

member of the Institute of Electrical and Electronic Engineers and a member of Sigma Xi, honorary science society.

Viewpoint

To: The Penn State Science Community

An article in the Sept. 14 issue of *Science* (pp. 1108-1109) left several erroneous impressions, if only by implication, starting with the title, "Agricultural Network Fights Unwelcome Gift." No doubt there will be letters to the Editor in response; some of these may be equally biased on the opposite side of the issue, but hopefully a balanced, accurate picture can be presented overall. In any event, I felt that the research community of Penn State University deserved to be made aware of some relevant facts and to hear the perspective of the Pennsylvania Agricultural Experiment Station.

The article in *Science* and earlier publications by AAAS appear to present both sides of issues. However, by some direct statements, but more often by implication, several errors come through. I would especially like to address three major errors in the *Science* article. First of all, it is implied that Agricultural Experiment Stations are against basic research. Secondly, the article does not accurately state our position on competitive grants. Thirdly, by making the comment that financing "— traditional research at a steady level while increasing funds for competitive grants," the article implies that this certainly should be acceptable to Agricultural Experiment Stations.

We in the Agricultural Experiment Stations are not against basic research. Considerable variation exists among the states in the emphasis placed on basic research, reflecting in part the pressures exerted by state legislatures and constituencies, and the general pattern of science in total at each land-grant university. Of course, the purpose of Agricultural Experiment Stations dictates that the mix of research activities include a large percentage of projects which are aimed at solving specific problems.

Overall, research supported through the Pennsylvania Agricultural Experiment Station was recently classified 33% basic, 63% applied and 4% developmental. We fully appreciate that strong science disciplines are important components of agricultural research. Many of our projects are what has been called "mission oriented basic research," i.e., basic research techniques and approaches focused to seek solutions to real-world problems. Regardless of positioning on the continuum between basic and applied research, we must certainly strive for excellence in the quality of our science.

The National Agricultural Research, Extension and Teaching Policy Act of 1977 (Title XIV of PL 95-113) created the program within USDA for Competitive and Special (and Facilities) grants for agricultural research. However, it is clear in the minds of many persons responsible for the creation of this Act and clear from the dollar authorizations involved that competitive grants were to be additions or supplements to a continued strong formula (Hatch, McIntire Stennis and Title V Rural Development) funding program for the State Agricultural Experiment Stations (SAES). The dollar authorization levels in the Act are listed as follows:

Fiscal Year	
'78 '79 '80 '81 '82	
\$ Million	

Competitive Grants	20	35	40	20
SAES Research	125	145	170	195

Thus, the legislation clearly allowed for the two programs to increase proportionately in level of support.

The *Science* article correctly points out that attempts to cut formula SAES support while increasing funds for Competitive Grants has met considerable opposition. For most of us in the Experiment Stations, that does not mean we are opposed to competitive grants. Rather, we want to see the Act implemented as planned.

Furthermore, it is a grave injustice to imply that the Experiment Stations should be happy with "a steady level while increasing the funds for competitive grants." Inflation is real and actual costs

go up every year for programs of the same scope. We simply cannot maintain the same program on last year's level of funding. For the Pennsylvania Agricultural Experiment Station, over 80% of the formula federal funds are assigned to salaries. These funds must carry their proportionate share of salary increases. Thus, for FY'80, we need over \$225,000 more than for FY'79 simply to pay for salary increases. If we were to receive only a "steady level," we would have to terminate positions to yield the \$225,000 (plus enough more to compensate for inflated costs of materials and services purchased with the other 15-20% of formula funds).

We strongly believe that formula funds have certain inherent advantages and should be continued as the firm foundation for agricultural research. The advantages (as listed by Dr. H.R. Fortmann of this office) include:

1. Continuity, i.e., dependability of getting funds year after year permits you to build a staff and plan a program. This is the major part of the talent pool which can be marshalled to meet emergencies (crises). They constitute a talent pool available to apply for "grants."
 2. The staff spends most of its time, talents and energy planning and doing research, and only a modest amount of time prospecting for funds.
 3. Stable administrative units and staff can be molded into effective local, regional and national team efforts. The structure is there to do it.
 4. The independence and autonomy of the components of the SAES system is predicated on the continuing formula funds. This autonomy mitigates against stereotyping research and research programs. Research planning functions from the bottom up.
 5. Capacity to work on long term projects.
- and we would add:
6. Enables research attention to be directed toward the solution of very important state and local problems, many of which would never be top priority on a national grant-fund list.
 7. Effective research in the area of plants and animals is not something which can be turned off and on abruptly. Things such as new disease-resistant plant varieties and livestock efficiency break-throughs only come step by step through sustained efforts of dedicated researchers who have a clear long-term assignment to a specific mission.

On the other hand, Competitive Grant Programs provide mechanisms to enlarge efforts on a few key and emerging problems of high national priority. Such programs have the capacity to initiate a prompt response at the research level and to concentrate efforts at a significant level at a few competitively chosen locations. Furthermore, I strongly encourage our faculty members to pursue vigorously extra-mural sources of funding which will enhance our ability to carry out our mission.

We live in times which seem to reward continual change. We must be reminded that not all change is progress. Attacks on various "establishments" also are popular. Some of these so-called establishments, such as the Agricultural Experiment Stations and the related formula-funding Acts, are part of the very foundation which has enabled the United States to become the world leader in agriculture and food production.

While we must always strive for improvement on the course of our quest for truth and excellence, we also should remember what an old sage once said, "If it ain't broke, don't fix it."

B.R. Baumgard,
Associate Dean for Research and
Associate Director for the Pa.
Agricultural Experiment Station

Bookshelf

Dr. Luis Gonzalez-Cruz, associate professor of Spanish at New Kensington, is the author of a new book, *Neruda: De "Tentativa" a la Totalidad*, published by ABRA — Las Americas of New York.

Prof. Gonzalez-Cruz treats the text as a "poetic integration" or "whole." He analyzes the sources of the poem and the influences it received as well as its repercussions in Neruda's later works. He shows that *Tentativa of the Infinite Man* is "an early summa of essential aspects in the symbology and themes of Neruda's complete works" and its "original nucleus."

The first chapter of the book surveys themes, motifs, stylistic devices and important Nerudian symbols. Chapter two examines the female character and the autobiographical background of the poem. The third chapter analyzes the entire poem. The question of the work's unity (why it should be considered a "whole," a *todo* where essential aspects of Neruda's cosmivision are synthesized) is discussed in chapter four. The following chapter establishes what pre-Surrealist and Surrealist elements exist in the text and it considers, at some length, several clue poems by Rimbaud and Apollinaire which must have influenced Neruda deeply. The final chapter contains an assessment of the intention of this poem within the context of Neruda's works.

Luis F. Gonzalez-Cruz is the author of two previous books on Neruda, as well as of numerous scholarly articles and two books of poems.

Dr. Edwin L. Herr, professor and head, Division of Counseling and Educational Psychology is the author of *Guidance and Counseling in the Schools: Perspectives on the Past, Present, and Future*. The 242-page book, published by the American Personnel and Guidance Association, grew out of a federally funded project to study the status of guidance and counseling in the schools.

Over 500 counselors, counselor supervisors, counselor educators, educational administrators, and leaders representing the handicapped, minority students, parent-teacher associations, and allied professional fields were convened in ten regional and one national conference to provide data summarized in several parts of the book.

The book provides an analysis of historical and social factors affecting guidance and counseling in the schools, the contemporary status of such provisions, emerging directions in implementation and in professional preparation and standards, as well as a comprehensive treatment of unresolved problems and recommended actions.

Dr. Barnes W. McCormick, professor and head of the Department of Aerospace Engineering, is the author of a new textbook, *Aerodynamics, Aeronautics, & Flight Mechanics*, published by John Wiley & Sons, Inc.

The book is designed for undergraduate and graduate programs in aerospace engineering and as a reference for practicing engineers. It provides a single, comprehensive, in-depth guide to modern aerodynamics, aeronautics and flight mechanics.

Specifically, the work covers the fluid mechanics and aerodynamics of incompressible and compressible flows, paying particular attention to the prediction of the lift and drag characteristics of air foils and wings. Also covered is an introduction to propellers, piston engines and turbojet engines, along with methods for analyzing the performance of an airplane throughout its operating regime. Finally, static and dynamic longitudinal and lateral-directional stability and control are discussed, with emphasis on flying qualities.

Aerodynamics, Aeronautics & Flight Mechanics contains considerable data relating to currently operating airplanes and engines — including lift and drag data, stability derivatives, and engine

performance curves. Numerical methods are emphasized throughout, and many working graphics are included.

American Buddhism, the fourth book written by Dr. Charles S. Prebish, associate professor of religious studies, has been published by Duxbury Press in North Scituate, Mass.

The product of seven years of research, the book discusses Buddhism as an American religious phenomenon. It is divided into three parts.

Part One sets the historical context and cultural backdrop for the Buddhist movement in 20th century America. Part Two is a case study of eight well established Buddhist groups currently active on the American scene. Part Three discusses the future of Buddhism in America.

Dr. Audrey T. Rodgers, associate professor of English, is the author of *The Universal Drum: Dance Imagery in the Poetry of Eliot, Crane, Rothke and Williams*, published by the Pennsylvania State University Press.

Despite temperamental and artistic differences, each of the four major poets studied by the author was preoccupied with finding an order beneath the surface of visible things. Their choice of the dance as a source of life-affirming images was not accidental, according to Dr. Rodgers, since humanity's quest for cosmic order always has been expressed in dancing — "before words were and when words failed."

The book shows why and how the dance became central to the poets' perception of experience. All four found models in the poetry of Whitman and Yeats, both lovers of the dance. All four were sensitive to cultural movements, three of which were concurrent with their poetic development — the revitalization of classical ballet, the explosion of modern dance, and the "mythic renaissance" — a fresh exploration of myth and ritual by scientists and humanists alike.

The Universal Drum begins with an overview of the early 20th century intellectual and artistic crosscurrents which provided a congenial climate for the poets' experimentation with language, form and theme. This introduction is followed by detailed analyses of dance imagery in the poems of the four subjects of the book.

Promotions

Clerical

Deborah S. Ault to clerk, typist A in Earth and Mineral Sciences.

Rosalie A. Bailey to secretary C in Personnel Administration.

Wanda S. Bamberger to data prep. operator B in Management Services.

Paula K. Dunlap to data prep. operator B in Management Services.

Catherine J. Emanuel to clerk, typist A in Agriculture.

Meloyde K. Mashaly to clerk, typist A in Agriculture.

Marie S. Nellis to accounting clerk in Controller's Office.

Jeannette C. Parson to senior clerk in Library.

Dorlene S. Sharer to technical secretary C in Applied Research Laboratory.

Susan L. Webster to secretary C in Agriculture.

Kim N. Williams to secretary C in Engineering.

Ossie Williams to clerk A, catalog in Library.

Susan B. Witherite to data prep. operator B in Management Services.

Janice E. Yost to secretary B in Health, Physical Education and Recreation.

Technical Service

Charles M. Behter Sr. to seed service and agronomy technician A in Agriculture.

Trustee Docket

(Continued from page 1)

Dr. Prystowsky

Prystowsky named to Policy Council

Dr. Harry Prystowsky, provost of The Milton S. Hershey Medical Center and dean of the College of Medicine, has been named to a newly created seat on the President's Administrative Policy Council (PAPC), the top administrative advisory group to President Oswald.

University Trustees authorized the action.

"Dr. Prystowsky has been one of my most important advisers and a key member of the University administration since he joined Penn State in 1973," Dr. Oswald told the Trustees. "As a matter of practice, he has met on many occasions with this council, and his presence has been very helpful to its effective functioning."

Other members of PAPC include the University Provost, the Senior Vice President for Administration, the Senior Vice President for Finance and Operations and the Chairman of the Council of Academic Deans.

Dr. Prystowsky became provost and dean at Hershey in 1973. Previously, he was professor and chairman of the Department of Obstetrics and Gynecology at the University of Florida College of Medicine.

A nationally known medical educator, Dr. Prystowsky also has been on the medical school faculties at John Hopkins University and Yale University. He has been a visiting professor at New York University, the Universities of Alabama, California, Georgia, Iowa, Kentucky and Wisconsin.

WDFM policies approved

New policies and procedures governing WDFM, the campus radio station, have been approved by the Trustees.

"The new policy clarifies the responsibilities of the Trustees who hold the station's Federal Communications Commission license," Dr. Richard E. Grubb, newly named senior vice president for administration, told the Board. "The structure specifies the delegation of authority from the Trustees to the general manager of the station."

The Trustees have charged responsibility in order of succession to the president of the University, Dr. John W. Oswald; the vice president for student affairs, Dr. Raymond O. Murphy; and the general manager of the station, Michael Titterton.

In addition, governance of the station will be influenced by two advisory boards, the Policy Advisory Board and the Community Advisory Board.

The Policy Advisory Board will include students, faculty and one member of the administration. Members will advise the general manager of the station.

The Community Advisory Board will consist of members of the listening audience and will advise the Vice President for Student Affairs.

Human Development reorganized; interim dean named

An administrative reorganization in the College of Human Development has been announced.

"The remarkable growth of the College during the past decade, the changing characteristics of higher education and the changing needs of society have necessitated a reworking of its organizational structure," Provost Eddy informed the Trustees.

The eight academic programs in the College will be organized into two academic divisions, Dr. Eddy said, replacing the four-division structure that has been in operation since the College's inception in 1968. The two new divisions are:

- The Division of Individual and Family Studies, Nursing, and Nutrition, which incorporates the baccalaureate programs in these areas, as well as the graduate programs in Human Development and Family Studies, Nursing and Nutrition.

- The Division of Community Systems and Services Planning, which incorporates baccalaureate programs in Health Planning and Administration (HPA), Community Development (Com.D.), Administration of Justice (Adm.J.), Food Service and Housing Administration (FSHA), and Man-Environment Relations (MER).

The latter Division also offers graduate programs in Community Systems Planning and Development (including specializations in HPA, Com.D. and Adm.J.) and Man-Environment Relations (including specializations in FSHA and MER).

Power Plant will get emission control system

A particulate emission control system, designed to make the University's West Campus Power Plant comply with applicable air pollution laws, will be built under terms of a consent decree between the University and the State Department of Environmental Resources.

Penn State Trustees approved the terms of the consent decree.

Under the agreement, the University will build a "bag house" to remove particulates from the emissions of boilers 1, 2, 6 and 8.

This will bring the plant into compliance with federal and State law and also will permit us to burn coal exclusively, resulting in considerable fuel cost savings," Robert A. Patterson, senior vice president for finance and operations, said.

Currently the power plant attempts to meet clean air standards by burning a mixture of coal, oil and natural gas.

Mr. Patterson said Penn State is seeking \$7 million in a capital program request to pay for the new facility.

American Indian Education Policy Center is established

An American Indian Education Policy Center has been established in the College of Education.

"Establishment of the Center is based on nine successful years of experience by the College of Education in conducting a graduate training program for Native American school administrators," Provost Eddy reported.

Dr. Grayson Noley, a Choctaw Indian, will be director of the Center. He is also director of the Native American Graduate Program in Education.

Dr. Eddy said the Center would "serve as a catalyst" for scholarly work in American Indian studies within education and social-behavioral science disciplines.

The Center will conduct research on government and tribal education policy development and will coordinate training programs for leadership personnel in American Indian Education.

Since 1970, the Native American Graduate Program in Education at Penn State has enrolled approximately 100 students in master's or doctoral degree programs.

Evan Pattishall

Dr. Evan G. Pattishall Jr., associate provost for health education and professor and chairman of the Department of Behavioral Science at Penn State's College of Medicine, has been named interim dean of the College of Human Development, effective Oct. 1.

Dr. Pattishall joined Hershey's faculty in 1966 to form a Department of Behavioral Science as a basic biological science that has become a model for medical schools throughout the nation and the world.

From 1962 until 1966, he served as associate professor of psychiatry and psychology and chief of the Division of Behavioral Sciences at the University of Florida. Prior to that he was on the faculties of the University of Virginia and Appalachian State College.

He also has been a research psychologist in the Office of Naval Research and an instructor in educational psychology at the University of Michigan.

A native of Richmond, Va., Dr. Pattishall has an unusually diverse educational background. After attending Davidson College as a premedical student, he interrupted his schooling to serve as a Navy officer in the Pacific Fleet during World War II.

After the war, he earned bachelor's and master's degrees in music from the University of Michigan. In 1951, he was awarded a doctorate in educational psychology from Michigan.

In 1958, he interrupted his teaching career to enroll at Western Reserve University, where he earned the doctor of medicine degree in 1962.

Dr. Pattishall has written widely in the field of behavioral science and medical research, and his articles have been published in numerous professional journals.

Enrollment up

(Continued from page 1)

"In addition, University Park experienced its best year ever in freshman admissions," Dr. Dunham said.

"The Commonwealth Campus enrollment is a record 16,772, another indication that this system is doing its primary job of serving the higher education needs of communities around the State."

Dr. Dunham said enrollment records were set by the Allentown Campus (415 students, up 17.9 percent); Altoona (1,797, up 9.3); Hazleton (1,030, up 8.5); Ogontz (2,153, up 5.6); and York (955, up 14.1).

Behrend College enrollment is a record 1,825, an increase of 299 over last year, and the College of Medicine is up by 52 students to a record 556.

Enrollment at University Park totals 31,792.

Since all figures are preliminary, most probably will be slightly higher when final tabulations are completed later this year, Dr. Dunham said.

Dr. Grubb

(Continued from page 1)

The Milton S. Hershey Medical Center, and the Chairman of the Council of Academic Deans.

A Penn State employee since 1961, Dr. Grubb has been vice president for administrative services and associate secretary of the Board of Trustees since 1971.

Dr. Grubb, a long-time resident of State College, is a graduate of State College High School and received his bachelor of science degree in agricultural economics and rural sociology from Penn State in 1958. He also holds an M.S. in agricultural economics and a doctorate in higher education from the University.

After joining the Penn State staff as a Continuing Education Conference Coordinator in 1961, Dr. Grubb occupied positions of increasing responsibility.

He became deputy assistant director of Continuing Education in 1965 and a year later was named administrative assistant in the office of the president and assistant secretary of the Board of Trustees.

Following a leave of absence to complete his doctoral dissertation in 1970, Dr. Grubb returned as a special assistant to the president prior to being named a vice president.

Dr. Grubb is chairman of the University Computer Advisory Committee and the University Systems Advisory Committee and has served on various ad hoc advisory and search committees.

New option is offered

A new two-year program in surface mining, leading to an associate degree in mining technology, has been established at the University. Trustees were informed.

The new "surface mining option" is designed to provide more and better trained people for the surface mining operations, which produce over half the coal mined annually in Pennsylvania.

The first year of the new surface mining option will be offered at the University's Altoona, Fayette, New Kensington, Hazleton, Schuylkill, Wilkes-Barre and Worthington Scranton Campuses. The final year will be offered only at Altoona, the campus closest to the state's largest concentration of strip mines. These are found in Clearfield, Jefferson, Indiana, Armstrong and Clarion Counties.

Unique Associate Degree program is established

To meet a rapidly growing need for experts in a burgeoning field, the University's Wilkes-Barre Campus now offers a two-year Associate Degree in Telecommunications Technology.

The Trustees were informed of the new degree, believed the first of its kind in the nation. Texas A&M University offers a four-year telecommunications program, designed to train engineers and technicians for careers in telecommunications equipment technology.

"Penn State's new program is expected to graduate about 20 telecommunications technologists in 1981," said Provost Eddy. "Together with the 20 new graduates annually from Texas A&M, these experts will barely begin to meet the needs of an industry which is rapidly expanding because of exploding technology."

The new degree, offered as an option under the existing Electrical Engineering Technology major, will provide both new technologists and increased training for industry personnel. The program will expand current cooperation between the University's College of Engineering and its Wilkes-Barre Campus, on the one hand, and nine Pennsylvania telephone companies.

The telecommunications industry has pledged to support the new program, with funds and equipment.

Mandatory retirement age raised from 65 to 70

The raising of the University's mandatory retirement age from 65 to 70 was given Trustee approval.

The action brings the University into compliance with a 1978 federal law that prohibits mandatory retirement before age 70.

Exceptions are tenured employees, for whom the mandatory age, by federal exemption, will continue to be 65 until June 30, 1982, and certain executives, whose retirement age will remain 65 indefinitely. Exceptions in the latter category may be granted in the interests of the University.

Under the new Penn State policy, the mandatory retirement will be on the day after the last examination day of the academic term in which an employee's 70th birthday occurs, or the day after the birthday if it occurs between terms.

Giving to University rose 29.5% last year

Gifts received by the University during the year ending June 30, 1979, totaled \$10,302,772, a 29.5 percent increase over the \$7,954,930 contributed to Penn State the previous year.

Some 42,458 gifts were received from private sources in 1978-79.

President Oswald reported to the Board that alumni and friends of Penn State contributed \$3,267,406 for the year, up 14.3 percent from the \$2,858,437 contributed the previous year.

Also in 1978-79, corporations and businesses contributed more than \$3.3 million, while foundations and organizations gave more than \$2.5 million.

Most gifts — more than 97 percent — are restricted to special purposes specified by the donor. Student aid and enrichment of the educational programs of the Colleges are two major areas that receive support. The undesignated contributions are allocated to a limited number of special projects by the Board of Trustees.

Engineer to be retained for Shaver's Creek study

The University will retain an engineer to study conditions at the Shaver's Creek Dam at the Stone Valley Recreation Area.

"An inspection in April indicated that the dam fails to meet some requirements of the 1978 National Dam Inspection Program," Ralph E. Zilly, vice president for business, told the Board Committee on Physical Plant.

The inspection was carried out for the U.S. Army Corps of Engineers and recommendations for survey, analysis and monitoring came to the University in a letter from the Pennsylvania Department of Environmental Resources.

"In order to develop the necessary response to the Department of Environmental Resources, the services of a dam specialist will be employed to study conditions at Shaver's Creek," Mr. Zilly said.

The Department recommended a detailed analysis of the dam be undertaken to determine accurately the volume of water that could be handled by the spillway in the event of flooding.

Seepage and wet areas below the dam were also noted. The inspectors suggested that a study of the wet areas be undertaken "to indicate the need for further analysis."

It was also suggested that the University improve access to the dam so that it may be reached during periods of flooding and that regular monitoring of the spillway will be developed to check for movement.

The development of a warning system, including round-the-clock surveillance during periods of unusual rainfall and formulation of emergency procedures, was also urged.

Penn State was also directed to develop an annual inspection program for the dam, with 1980.

Board of Advisors named for Capitol Campus

The Capitol Campus has organized a Board of Advisors, with Ralph Peters, a Camp Hill businessman, serving as chairman.

"The willingness of these outstanding community leaders to join the University's work in the Greater Harrisburg area is a firm indication that they share our perception of the exciting prospects the Capitol Campus offers for both the University and south-central Pennsylvania," President Oswald commented.

Dr. Oswald noted that Dr. Theodore L. Gross, provost and dean of PSU/Capitol, was most instrumental in getting the Board of Advisors organized.

At the Capitol Campus, located in Middletown, Dr. Gross said that the Board of Advisors is "a remarkable group of talented and dedicated individuals. In accepting this responsibility, they have expressed a commitment to PSU/Capitol and Central Pennsylvania which promises a new and exciting relationship between the University and the community."

Mr. Peters is the president of Berger Associates, a Camp Hill Engineering firm.

His lifelong commitment to Central Pennsylvania has seen him in leadership roles with the United Way, the Chamber of Commerce and University Center among other institutions.

Other advisors named are:

Jeannette Alexander, a civic leader in Harrisburg; Judge Genevieve Blatt, Commonwealth Court of Pennsylvania; Charles E. Boyer, president, Lower Swatara Township Board of Commissioners; Edward R. Book, president, HERCO; Bruce D. Brenner, president, AMP, Inc.; Joseph E. Cooper, Harrisburg attorney; Paul E. Doutrich, Jr., mayor of Harrisburg.

Thomas J. Fleming, plant manager, Fruehauf Corp.; Maurice K. Giddard, former secretary, State Department of Environmental Resources; John O. Hershey, president and chairman of the board Milton Hershey School; Lee Javitch, president, Giant Food Stores, Inc.

Clifford L. Jones, secretary, State Department of Environmental Resources; Saul Kohler, executive editor, The Patriot-News Co.; Wilson Lewis, chairman of the board, Dauphin Deposit and Trust Co.; John E. Minnich, chairman, Dauphin County Board of Commissioners.

Gilbert Nurick, Harrisburg attorney; Sandra Osler, a civic leader from Wormleysburg; Sheldon Parker, general manager, Pennsylvania Public Television Network; Robert G. Reid, mayor of Middletown; James R. Rowland, Harrisburg attorney; Dr. Donald Spigner, medical director, Hamilton Health Center, Inc.

Bishop Dean T. Stevenson, Episcopal Diocese of Central Pennsylvania; John C. Tuten, chairman of the board, National Central Bank; John Vartan, president, Vartan Associates; and Judge Roy Wilkinson Jr., Commonwealth Court of Pennsylvania.

Mr. Peters noted the significant influence of Ohio State University on Columbus, and of the University Park Campus of Penn State on State College. "It is the job of this board," he said, "to help Ted Gross create that kind of atmosphere with PSU/Capitol."

"A vital and growing Capitol Campus of Penn State will bring outstanding speakers to this community and serve as a center for cultural activities," said Mr. Peters. "The University sponsors, and the community benefits."

Recent months at Capitol have seen the creation of a local Alumni Association, the beginnings of major fund-raising and development efforts, administrative reorganization and several appointments of new personnel.

The Board of Advisors will be participating in many of those efforts and will also be working on the creation of a five-year master plan for the Campus, planned physical alterations, and the expansion of academic programs, especially on the graduate level.

Capitol library to be named for Richard H. Heindel

The Library Area in the Olmsted Building and the Library Annex at Capitol Campus will be named the Richard H. Heindel Library in honor of the world-renowned authority in international relations.

"It is fitting that a research center be named for a man like Richard Heindel, whose scholarship and dedication to learning brought so much glory to himself and to Penn State," President Oswald said.

Dr. Heindel was the first dean of faculty at the Capitol Campus. He joined Penn State in 1967 as professor of international relations and dean of faculty, positions he held until 1973 when he decided to return to full-time teaching and research. Named professor emeritus of international relations in 1977, Dr. Heindel died July 31, 1979.

Architect to be appointed for Hershey addition

Trustee approval was given to the appointment of an architect to prepare plans for construction of an estimated \$10 million addition at The Milton S. Hershey Medical Center.

The proposed facilities would provide office and research laboratory space for faculty in the College of Medicine's clinical departments, which have become overcrowded in recent years due to the medical school's rapid enrollment growth, according to President Oswald.

"The College of Medicine's space was built to handle 256 medical students and the enrollment is now 388," Dr. Oswald said. He pointed out that the opening of the Basic Sciences Cancer Research Wing in 1974 provided additional space for basic science faculty, but that clinical faculty have been crowded into existing office and laboratory spaces and that temporary quarters have had to be set up in conference rooms and lobby areas.

"The new facilities also will permit the rounding out of academic programs in both undergraduate and graduate medical education in subspecialties in which the medical school has had limited or no faculty to date."

The project would add two bays to the east end of the crescent-shaped front of the Medical Center as provided for in the long-range design prior to its construction. Expected to be completed by the Fall of 1982, the addition will consist of nine floors, seven above ground, providing 32,650 square feet.

All funds to be used for employment of an architect, planning, and subsequent construction of the addition will come from a combination of a federal grant for this purpose, and from funds generated at the Medical Center. These funds are available only for use at the Medical Center. No State funds or student tuition funds are involved in the financing of the project.

Hershey affiliation agreement approved

Affiliation agreements between the University's College of Medicine and Morsour Medical Center in Jeannette and Oil City Hospital have been approved by the Board of Trustees.

Under the pact, medical students will be able to choose these hospitals for elective clinical clerkships, and a variety of hospital staff members will be able to attend co-sponsored continuing education programs.

Morsour Medical Center and Oil City Hospital become the 15th and 16th hospitals with which the Medical Center has affiliations.

Physicians from these institutions who make significant contributions as volunteer teachers of medical students will receive clinical appointments to the Penn State College of Medicine faculty. Both the University and these institutions will note their affiliation in their publications.

Office of Vice President for R&GS to reorganize

The Office of the Vice President for Research and Graduate Studies will be reorganized effective Oct. 1.

The purpose of the reorganization is to consolidate administrative responsibilities," Provost Eddy informed the Trustees, adding that the reorganization plan was initiated and coordinated by Dr. Richard G. Cunningham, vice president for research and graduate studies.

Dr. Forrest R. Remick, assistant to the vice president for research and graduate studies and director of the Institute for Science and Engineering, will be promoted to assistant vice president for research and graduate studies and director of Intercollege Research Programs and Facilities.

Dr. Remick, a professor of nuclear engineering, succeeds Dr. Harry D. Zook, professor of chemistry, who will retire Sept. 30.

With the promotion of Dr. Remick, the position of assistant to the vice president will be abolished. The same position had been held by Dr. George P. Barron, who retired earlier this year.

In addition, the designation of the "Institute for Science and Engineering" will be abolished. Its component research and service units will remain intact, but will be administered collectively with the life sciences, social sciences, arts and humanities units in the Intercollege Research and Service Facilities program.

The Center for Study of Environmental Policy will be discontinued on Jan. 1, 1980, Dr. Eddy said. Environmental and energy-related policy issues will be handled through the Institute for Policy Research and Evaluation.

The Office of the Vice President for Research and Graduate Studies provides general administrative supervision of Penn State's organized research activities. Aside from coordinating and strengthening research programs, the Office is responsible for:

- Administering and coordinating the organized research units composing the Intercollege Research Programs, including the establishment, modification and termination of units;

- Coordinating research policies and research facilities with the dean of the Graduate School in the planning and operation of graduate programs;

- Working with the University Faculty Senate Committee on Research in assessing research organizations and activities;

- Processing academic programs and proposals from the University to prospective sponsors and negotiating the resulting grants and contracts;

- Coordinating reallocation of resources in support of research and graduate studies; and

- Integrating intercollege research units with research and graduate programs in typical college disciplines.

Cooperative Extension to fill 33 vacancies

The University will use 87 percent of \$1 million in supplementary Cooperative Extension funds for direct program costs.

President Oswald informed the Board that the bulk of the funds will be used to fill 33 vacant positions in the Cooperative Extension Service. Only 13 percent will be used for associated indirect costs, such as administrative expenses, Dr. Oswald said. The State provided the supplementary money as part of Penn State's 1979-80 appropriation.

The University operates the Cooperative Extension Service for the State. Through offices in local communities, it provides information and education on everyday problems. About two million Pennsylvanians — one out of every six people in the State — use the Extension Service each year.

News in brief

(Continued from page 1)

PR workshop slated for University employees

The University will sponsor a public relations workshop from 1:15 to 3:45 p.m. Monday, Oct. 1, in Room 112 Kern Building. The workshop is designed for public contact employees who were unable to attend the two similar sessions in August.

The objectives of the workshop are to acquaint public contact employees with good public relations practices and to teach them how to be more responsive to people who approach them for information and assistance. Speakers and topics will include:

- University President John W. Oswald, on "Good Public Relations is Everybody's Business."
- Dennis W. Keiser, coordinator of employee and management development, on "Importance and Treatment of Our Customer — Student Body, Outside Public," and on "Review of Some University Practices and Procedures in Telephone Communications."
- Regina Euker, educational consultant for Bell Telephone, on "You and Your Telephone."
- Arthur V. Ciervo, director of public information and relations, on "Ten Commandments of Good Public Relations."

University employees interested in attending should contact their personnel representatives immediately.

Insurance may be changed

Since 1964, the University has offered a voluntary plan for accidental death and dismemberment insurance to all regular faculty and staff members. The plan provides optional amounts of insurance ranging from \$10,000 to \$150,000 and also provides accidental death and dismemberment coverage for dependents.

The month of October is the period when membership or coverage in this plan may be changed. One or more of the following actions may be taken during the month: (1) change the dollar amount of insurance coverage; (2) change from individual coverage to family coverage or vice versa; (3) enroll in the plan as a new member; (4) withdraw from the plan.

To accomplish any of the above changes, obtain a VADD enrollment card from your personnel representative or business manager, complete and send it to the Employee Benefits Division, Room 133 Willard Building, by Oct. 31, 1979. All changes received by that date will become effective Nov. 1, 1979.

If you wish to check your present coverage, examine the section of your paycheck stub marked "VADD." The deduction will indicate the amount of coverage you have.

Coverage	Monthly Deduction	Biweekly Deduction
\$ 10,000	\$.41 single \$.63 family	\$.19 single \$.29 family
\$ 25,000	\$1.03 single \$1.58 family	\$.48 single \$.73 family
\$ 50,000	\$2.05 single \$3.15 family	\$.95 single \$1.45 family
\$100,000	\$4.10 single \$6.30 family	\$1.90 single \$2.90 family
\$150,000	\$6.15 single \$9.45 family	\$2.85 single \$4.35 family

If you are unable to check in this manner, information about your coverage may be obtained from the Employee Benefits Division.

No action is needed to continue your current coverage without change.

What's in a name?

The office secretaries have solved the problem of how to answer the telephone for the recently formed Department of Microbiology, Cell Biology, Biochemistry and Biophysics.

They call it MC — 38.

Club will hold reception

The Faculty Women's Club will hold its annual Fall Reception tonight (Thursday) from 7:30 to 9:30 p.m. at the Kern Graduate Center. All faculty women and wives of Penn State faculty and staff members are invited. Those attending will be able to sign up for various interest groups sponsored by the Club.

New phone numbers listed

The telephone number for the Office of the University Registrar has been changed. Each section within the office has been assigned its own number, and direct dialing to the desired section will permit faster access.

The new section numbers are: Registration, 863-1918; Scheduling, 865-6571; Records, 865-6357; Transcripts, 863-1923; and Registrar, 863-1913.

Computation Center offers workshops and seminars

The Computation Center is offering a series of workshops and seminars on four different topics. Persons wishing to attend need not register, and there is no charge for instruction. Topics are:

1) A Practical Look at Computer Arithmetic: A Tutorial, Tuesday Oct. 2, at 2:30 p.m. in Room 110 Computer Building. This is an applied tutorial dealing with some of the properties, consequences, and practical tips associated with finite precision computer arithmetic. The purpose of this presentation is to help people who work with computers or computer output to avoid or detect algebraically wrong answers related to the limited precision of computer arithmetic. Class size is limited to 30.

2) Introduction to the Computation Center. This will be offered at two different times, first at 12:45 p.m. on Oct. 3 and again at 11:10 a.m. on Oct. 4, both in Room 110 Computer Building. This seminar will give an overview of the Center's services and procedures, covering the basic concepts of the IBM 3033 computer and the Operating System (OS/370 MVT). A tour of the Center will also be made. Class size is limited to 30.

3) APL. Six sessions at 7:30 p.m. in Room 108 Forum Building on Oct. 8, 11, 15, 18, 29 and 31. APL is an interactive programming language. The seminars will not assume or require any previous computer experience, but those who do have such experience may find that APL can offer an alternative. Prospective attendees should have the use of a research or course preparation account, together with an APL user identification (These may be obtained in Room 229 Computer Building).

Much discussion has centered around APL and its use, and many claims have been made that it greatly increases programming productivity. As an aid to people considering the use of APL, the following guidelines appear to form a consensus:

APL is not appropriate for applications which have

- a) a very high data transfer volume (e.g. merging large jobs)
 - b) a high run frequency with few or no changes (e.g. payroll)
 - c) large main storage requirements
- APL is appropriate when
- a) requirements are uncertain and/or changing
 - b) a high degree of interaction with the user is necessary
 - c) developing a proto-type of a production program

4) JCL. Six sessions at 7:30 p.m. in Room 112 Walker Building on Dec. 3, 5, 10, 12, 17 and 18. Concepts and facilities of the IBM operating system will be covered, and an overview given of the techniques for storing and transferring data when using magnetic tapes, disks, etc. JCL is the language used by the operating system to manage jobs and data, and it provides a great deal of flexibility in manipulating files of data. Prospective

attendees should have a background equal to at least one introductory programming course.

Persons wishing further information about any of the above programs should contact Lisa Jodon, 863-0422.

C-account applications must show authorization

Effective Monday, Oct. 1, it may be necessary for a faculty member applying for a computer C-account to show on the application an authorization amount approved by a representative of the Dean's office in the area in which the course is offered.

A C-account may be established to provide access to Computer Center services for course preparation by faculty members and their teaching assistants. It is expected that a C-account will be applied for only in connection with courses and sections actually included in the teaching assignment of the faculty member. The C-account is not a substitute for an I-account for actual student instructional use, nor is it to be used as a substitute for special I-accounts using interactive systems such as APL and RJE.

The C-account is valid for a particular section of a given course taught during a specific term. Generally, a C-account may be opened by the senior faculty member responsible for a particular course section no more than one term in advance of the term the course is offered. It remains open until the conclusion of the specific term in which the course is taught, unless closed by request or overdraw. A C-account may not be renewed, but the authorized amount may be increased with the approval of the Dean's representative.

The following individuals are the Deans' representatives for authorizing C-account use after Oct. 1: Agriculture — R.F. Hutton; Arts and Architecture — W.H. Allison; Business Administration — P.H. Rigby; Capitol Campus — J.T. Redington; Earth and Mineral Sciences — A. Muan; Education — H.E. Mitzel; Engineering — W.G. Braun; Health, Physical Education and Recreation — K.G. Stoedeker; Human Development — D. Brassington; Intercollege Graduate Degree Programs — E.H. Ludwig; Liberal Arts — T.F. Magner; Medicine — P.J. Campbell Smith; Radnor Center for Graduate Studies and Continuing Education — H.E. Weber; Science — L.N. Zimmerman.

Commonwealth Campus faculty should submit C-account applications to the Dean's representative in the college having cognizance over the course to be taught.

Dylan talk is Monday

Prof. Christopher Ricks, a faculty member at Christ College, Cambridge University, will speak on "Bob Dylan and Poetic Tradition" at 8 p.m. Monday, Oct. 1, in Room 103 Chambers Building.

Prof. Ricks has written extensively on Keats, Milton, Tennyson and other poets. His talk is sponsored by the English Department.

'Pivot' is on sale

A new edition of *Pivot*, a "little magazine" of poems published annually in State College, is now at State College bookstores. This issue is the 29th published by editor Joseph L. Grucci.

Mr. Grucci started the magazine in 1951 when he was teaching English and conducting a poetry workshop at Penn State. He was a member of the faculty from 1950 until his retirement in 1974.

Movement education program for children begins Oct. 2

A program of basic movement skills, educational gymnastics and games will be sponsored by the College of Health, Physical Education and Recreation for children in kindergarten through third grade.

The program will be held on Tuesdays

from 4 to 5 p.m., beginning Oct. 2 and running through Nov. 6, in Room 126 White Building. Registration will be Oct. 2 at 3:45 p.m. in the White Building lobby.

Classrooms to be locked after 5 p.m. daily

University Park classrooms are being locked after 5 p.m. daily to facilitate cleaning and to conserve energy, the Office of Physical Plant has announced.

Rooms will be opened only for activities scheduled through the University Scheduling Office. Evening reservations can be made at Room 110 Shields Building or by calling 865-6571. Requests should be submitted at least 24 hours in advance.

A Senate Report

Editor's Note: Below is the text of a legislative proposal to be debated at the Oct. 2 Senate meeting.

Background

The request for delegation of responsibility for curricular affairs for The Pennsylvania State University College of Medicine, The Milton S. Eisenhower Medical Center, was made to the Senate Chairman following approval by the Faculty Organization and administration of the College of Medicine. The Senate Chairman referred the request to the Intra University Relations Committee.

Request

"The authority for course approval for those courses taken by medical students in the Medical Curriculum (700-level courses) shall be vested within the College of Medicine."

Rationale

The Pennsylvania State University College of Medicine is the only College of Medicine with The Pennsylvania State University System. It is authorized to train medical doctors by the American Association of Medical Colleges and its curriculum, clinical facilities, research programs and so forth are regularly surveyed that group for purposes of accreditation. At the present time, full accreditation has been granted for the next seven years.

Curricula and grading represent an integral component of that accreditation. Because of the special nature of medical education and training requirements, it is difficult for members of other disciplines to evaluate courses (both need and quality) required in a Medical School. For this reason, it is proposed that a Committee of the Medical College be established to evaluate both curricula content, new and revised programs and other matters dealing with the education of premedical physicians. This committee would be the Associate Dean for Education of the College of Medicine, who would present them to the Provost and Dean of the Medical Center.

In an effort to comply with current University policy and to prevent confusion, it is proposed that courses restricted to medical students be listed in a series starting with the number 700. All graduate courses will require review by the Graduate Council prior to implementation (as in the past).

The major intent of the proposal is to operate within The Pennsylvania State University system taking into consideration the special needs and problems of medicine and the requirement for continued involvement of the Graduate Council to maintain the quality of the graduate programs established at the College of Medicine.

The Senate Committee on Intra-University Relations approved the request at its meeting Sept. 11, 1979.

Recommendation

"The Senate Committee on Intra-University Relations recommends that the following be added to the Senate Bylaws, Article VII, as Section 4:

THE FACULTY OF THE COLLEGE OF MEDICINE, AS REPRESENTED BY THE FACULTY ORGANIZATION OF THE COLLEGE OF MEDICINE, IS DELEGATED RESPONSIBILITY FOR THE APPROVAL OF COURSES AND THEIR CONTENT TAKEN BY MEDICAL STUDENTS IN THE MEDICAL CURRICULUM (700-LEVEL COURSES). THIS DELEGATION OF RESPONSIBILITY IS SUBJECT TO REVIEW BY THE SENATE. THE REVIEW PROCESS SHALL INCLUDE THE SUBMISSION OF ALL 700-LEVEL COURSES TO THE CURRICULUM REORDER FOR INCLUSION ON THE CURRICULAR AFFAIRS BLUE SHEETS AND WILL BE SUBJECT TO THE SAME HOLD AND APPROVAL PROCEDURES AS THOSE LISTED IN THE CURRICULAR AFFAIRS PROCEDURES GUIDE.

The '80s challenge

(Continued from page 1)

percentage of our population is aging and thus requires more medical assistance."

As the demands on physicians and health facilities grow, higher education will be called on to produce graduates with the expertise to make the system work, Dean Scannell points out.

Computer-trained health specialists will be needed, for example, to cope with the explosion in medical record keeping resulting from any national health care plan. Countless technologists will have to be prepared to operate increasingly complicated medical equipment.

Dean Scannell foresees new program opportunities in such areas as physical therapy, X-ray technology or radiation therapy. "We will need to develop the flexibility to regroup faculty to offer these programs without loosening their essential ties to their disciplines," he notes.

Overall, Dean Scannell believes HPER enrollments will stabilize in the '80s — "I don't see us being any better or worse off than the University as a whole." But the same exercise boom that is benefiting the College's academic programs is also creating problems in another area for which HPER has responsibility — intramural programs.

Anyone who has tried to get a squash court at the noon hour or to run on the Rec Hall track on a rainy day knows that these facilities are being used to capacity. "We have intramural basketball tournaments scheduled every hour of every night Rec Hall is open," Dean Scannell says. "The only thing we can do is to try to give everyone access — but to give them less time. I don't think the pressure is going to abate; it's a societal condition."

Nor do the pressures in intercollegiate sports — the College's third area of responsibility — seem likely to lessen. "We are really going to have to struggle to keep things in balance," Dean Scannell says. "Between the media and public interest, it's harder and harder to keep

things in proportion.

"Somehow we have to continue to make our players realize that they are here primarily for an education and that only one in a thousand is going to make it in professional sports. But unless you're deliberately going to downgrade your programs, the only thing I know to do is to ride the phenomenon and capitalize on it so that you can offer creative opportunities to all the students.

"We're walking a tightrope, and it won't be getting any easier in the next decade. Ten years ago you used to have freshman athletes with national potential sitting in a classroom, and no one knew who they were. Today they're identified before they even enroll. If a student-athlete flunked out, it was between him and his professors. Now such cases are national news."

Dean Scannell hesitates to predict whether the same sports that are drawing crowds today will be as popular ten years hence.

"Public interest changes," he notes. "We got into gymnastics ten years before television had developed the fans' interest in the sport. I would expect volleyball to become increasingly popular during the next four to five years because kids are growing up with it now. It's the same thing that we're seeing in soccer. Our team is drawing as many as 5,000 spectators to Jeffrey Field. It's the result of the biddy sport programs which have sprung up all over the country. They're bigger than Little League in many communities, and they're even replacing sandlot football."

One major change Dean Scannell is willing to predict for the next decade is "a decline in the novelty of women's teams."

"The opportunity for women is going to be there, and they're going to develop a following," he says. "Women gymnasts are taken for granted now, and that will also happen in sports like basketball."

"I think the public will accept the fact that the players are all students and that there really isn't that much difference between women's and men's teams."

On the income side, said Dr. Oswald, the plan "includes an average 5 percent tuition rate increase for all students, except doctor of medicine students, for whom tuition rates are already at the \$5,550 level. This budget plan recognizes the probable need for a modest tuition rate increase, while, at the same time, attempting to bring into better balance the contribution of students and the State."

Among the considerations in the proposed budget are:

- No significant change in size or mix of enrollment is anticipated in the 1980-81 year.
- Nearly entire emphasis on the proposed budget is placed on provisions that cope with the rapidly escalating rate of inflation, which affects the goods and services which the University must purchase. The budget seeks to:
 - Provide essential salary adjustments for employees. Any salary adjustments will conform with Federal Wage and Price Guidelines.
 - Meet the requirements for mandated fringe benefits cost increases (primarily Social Security base and rate changes.)
 - Provide for increases in the costs of operation, including supplies, services, fuel and utilities.
 - Provide for the rapidly escalating costs of library books and materials and instruction and research equipment.
 - Provide for increased costs of critically needed maintenance of the University's physical facilities.

— Funds are requested for operation and maintenance of new or newly renovated buildings. These include a new Human Resources Center at the Berks Campus, a Library Learning Center at the Delaware County Campus, a maintenance building at the Altoona Campus, and an addition to the Recreation Building at Fayette

Campus Update

David E. Mark, deputy director of the U.S. State Department's Bureau of Intelligence and Research, will visit the Delaware County Campus on Tuesday, Oct. 2. In a public address scheduled for 1:30 p.m., he will discuss the background of American foreign policy related to SALT II and some of the issues surrounding the Senate ratification hearings.

His visit was arranged by Dr. Stephen J. Cimbal, associate professor of political science at Delaware, who participated in the department's scholar-diplomat program last year. Mr. Mark, a former U.S. ambassador to Burundi, will also address Dr. Cimbal's international relations class.

The Capital Campus has received a \$27,300 federal cooperative education grant from the U.S. Office of Education. This marks the fifth year of cooperative education funding for the Campus, and will enable it to expand cooperative education offerings.

At present, undergraduate students from the following majors participate in the program — electrical design engineering technology, accounting, general business, computer science, and social science. Public administration graduate students also participate.

Students alternate six-month periods of full-time study with like periods of work. During 1978, approximately 60 students participated in the cooperative education project. Plans to increase this number to between 75 and 100 are currently underway.

The Milton S. Hershey Medical Center is one of 11 hospitals participating in a two-year pregnancy outcome survey involving some 8,000 women living within a 10-mile radius of Three Mile Island.

The survey, conducted by the state Department of Health, is an extension of its prenatal care pregnancy outcome study which has been conducted in recent years in the Greater Harrisburg area.

Women contacted will have given birth or terminated a pregnancy 10 weeks or more between March 28, 1979, the date of the TMI incident, and March 27, 1981, the final day of the survey. Dr. Ronald Choe, professor and chairman of the Department of Obstetrics and Gynecology at Hershey, will provide obstetric consultation for the survey.

Campus, all of which are expected to open during the 1980-81 fiscal year. Newly renovated buildings at University Park include McAllister Building, Willard Building, the Special Education Building, and the Engineering Units.

— An increase in per capita appropriation for medical students from \$7,465 to \$11,085 is requested in the budget. Dr. Oswald noted that the State's medical education appropriation has not increased since 1971-72, while tuition has risen 455 percent (from \$1,000 to \$5,550 per year).

— As in all recent years, no funds are requested for new programs. Any new program initiatives will be provided for by internal reallocation of resources or from outside sources of income, Dr. Oswald said.

The total appropriation requested is \$139,920,000 for the 1980-81 year. Also approved by the Trustees was a Capital Program Request that outlines proposed spending for the first year of a five-year capital improvement program.

Included in the program are requests for funds to make sewage plant improvements and to renovate several buildings at University Park, to perform deferred maintenance at all locations and to improve University utility systems — all urgent priority projects important to the effective functioning of the University and its programs.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Oct. 4, 1979. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religious, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

PRODUCER/DIRECTOR, COLLEGE OF AGRICULTURE, University Park. Serve as producer and coordinator of daily operations in audio and video taping in studio and on location in field and laboratory on assigned projects. Keep abreast of the various forms of audio-visual equipment capable to extension and college needs to assure correct purchase and replacement of equipment. Produce and host video tape and film or live features of a special nature for "Farm, Home and Garden" television program. Produce various materials for audio-visual presentations with college faculty and special guests for use with specific groups of extension program participants, students, state and federal agencies. Consult with, advise and supervise county-level extension specialists and professionals in proper selection, operation and application of various items of television and audio-visual equipment. Write, rewrite and edit material for radio and television use. Bachelor's degree (or equivalent) in broadcasting, journalism, speech, mass communications, or similar disciplines, plus one to two years of effective experience in radio and/or television programming, programming, or teaching that have a relationship to Cooperative Extension Service objectives, philosophy, and public service. Master's degree highly desirable.

COOPERATIVE EDUCATION SPECIALIST, Capital Campus. Responsible to the Coordinator, Career Planning and Placement, for the development of Cooperative Education positions for Capital Campus students and for assisting in the overall administration of the program. Bachelor's degree or equivalent, plus one year and up to and including two years of directly related experience in higher education, cooperative education or business and industry is required. Position is funded only until Aug. 31, 1980.

FINANCIAL AID AND ADMISSIONS COUNSELOR, Capital Campus. Coordination of student aid program with University Park Campus and on-campus student employment program. Responsibilities include interviewing applicants for admission, counseling them and maintaining information and advice to students in need of financial assistance. Experience with various state and federal forms highly desirable. Bachelor's degree with transferable experience required.

VETERANS COUNSELOR, STUENT AFFAIRS, University Park. Responsible to the Coordinator of Veterans Affairs for services to be rendered by the Office of Veterans Affairs such as veterans counseling, veterans certification and records, and coordinating liaison with the Office of Student Aid, Student Loans, Career Development and Placement, Mental Health and University Admission. Master's degree or equivalent in student personnel administration, plus two to three years of related experience.

The Office of Personnel Administration would like to remind faculty and staff of the University policy regarding the placement of help wanted advertising.

The Manager of the Employment Division is responsible for reviewing the wording of all help wanted advertisements, to ensure that they comply with State and federal legislation and that a standard of public relations is maintained (See PS-33, Help Wanted Advertising in the University Policy Manual).

Anyone wishing to place classified advertisements for faculty or staff vacancies should contact Robert L. Kidder, Manager, Employment Division, 865-1387 (Network number 475-1387) before taking any formal action.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University. **USPS 351-170**

Appropriation request

(Continued from page 1)

challenge," he said, "has been to cut costs without seriously jeopardizing the quality of our academic programs."

"For example, since the early 1970s," Dr. Oswald added, "Penn State's faculty and staff have been conducting reviews of the 100-plus academic programs at the University. This has resulted in the allocation of available resources on the basis of priorities.

"During the last nine years," he reported, "the University has reallocated a total of \$21.2 million from operating budgets to other areas of even greater need."

Dr. Oswald noted that the 7.3 percent increase in State appropriations this year demonstrated an increased commitment by state government to higher education. He added, however, that Penn State "is operating with a State appropriation per student which, in terms of real purchasing power, has declined by over 18 percent since 1972-73."

In addition to the internal budget reallocations, it has been necessary to increase tuition for 12 consecutive years to bridge the gap between expenditures and income.

"It is realistic to assume, therefore," Dr. Oswald continued, "that some increase in tuition rates will be necessary for the 1980-81 fiscal year. In a period of such rapid double-digit inflation, it is appropriate for students to share to a degree in the cost increases."

In recent years, because State appropriations have increased at a level below the general rate of inflation, students and their families have been required to pay a larger portion of the University's cost increases. The proposed 1980-81 budget includes a request for a 10 percent increase in the University's general funds budget.

University Park Calendar

Sept. 27-Oct. 3

Special Events

Thursday, Sept. 27

Faculty Women's Club, Fall Reception, 7:30-9:30 p.m., Kern Lobby.

GSA, Macroe Workshop, 7:30 p.m., Room 112 Kern.

Religious Affairs Office, 10:30 p.m., "How Should We Then Live," 7:30 p.m., Memorial Lounge, Eisenhower Chapel.

Friday, Sept. 28

Last date for applying for 1980 Study Abroad (Fulbright) Awards.

Geography Dept. coffee and lecture, 3:45 p.m., Room 319 Walker. Arthur Anderson, architecture, on "Visual Simulation."

Commonsplace Theatre, *Kentucky Fried Movie*, 7 and 9 p.m., Room 112 Kern.

Lamb Fellowship Lecture, Larry Tomczak and C.J. Mahoney, Gathering of Believers, Washington, D.C., on "Restoration and Relationships," 7:30 p.m., Schwab, Also Saturday.

Shaver's Creek Nature Center, Night Explorer's Adventure Series, for children 8 and older - by registration only, 8:05-10:15 - 7:30 p.m. Saturday, Stone Valley.

Astronomy Open House, 8-10 p.m., 6th floor, Davey Lab. Cloud date, Sept. 29.

Artists Series, Pinchas Zukerman, violin, 8:30 p.m., Eisenhower Auditorium.

Saturday, Sept. 29

Last date for Nov. graduates to deliver doctoral theses to Committee.

Sports: women's golf, Penn State Fall Invitational, through Sunday; women's tennis, Penn State Invitational, through Sunday; field hockey, vs. Lock Haven, 1 p.m.

Shaver's Creek Nature Center, Elliot Abrams, *Acu-Weather*, on "Rain or Shine," 1 p.m., Stone Valley.

Fance-Cinema, Rainer Werner Fassbinder, *The Bitter Tears of Petra von Kant*, 7 and 9 p.m., Room 112 Kern.

Sunday, Sept. 30

University Chapel Service, 11 a.m., Eisenhower Chapel, John W. Davis, PSU Center for Air Environment Studies, speaker.

Shaver's Creek Nature Center, "An Afternoon about Mammals," 2 p.m., Stone Valley.

Commonsplace Theatre, *Kentucky Fried Movie*, 7 and 9 p.m., Room 112 Kern.

Monday, Oct. 1

Outdoor Pool closes officially. Open on temporary basis if weather permits.

Fixed date for meetings involving Commonwealth Campus faculty.

Cinema-Cinema, *The Bitter Tears of Petra von Kant*, 7 and 9 p.m., Room 112 Kern.

HUB Craft Center Open House, 7:30-9:30 p.m., Room 312 HUB. Also registration for 2nd session classes, Oct. 1-6.

English Dept. Lecture, 8 p.m., Room 103 Chambers. Christopher Ricks, *Christ College*, Cambridge Univ., on "Bob Dylan and Poetic Tradition."

June Miller, organ, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, Oct. 2

Fixed date for meetings involving Commonwealth Campus faculty.

Comp. Lit. Luncheon, 12:15 p.m.; talk, 1 p.m., Hotel State College. Terry Fowler, Spanish & Comp. Lit., on "Teaching Film and Literature: A Few Principles."

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Sports: field hockey, vs. Maryland, 3 p.m.

Comp. Lit. Film Series, Jiri Menzel, *Closely Watched Trains*, 7 and 9 p.m., Room 112 Kern.

GSA, Copyrighting Workshop, 7:30 p.m., Room 101 Kern.

Artists Series Film, *Wuthering Heights*, 8 p.m., Schwab.

Wednesday, Oct. 3

Commons Noontime Concert, Chris Lee, vocalist, Kern Lobby.

Sports: exhibition baseball, vs. St. Francis, 2 p.m.

Afro-American Studies Forum, 7:30 p.m., Room 112 Kern. Stanley E. Baker, Virginia Commonwealth Univ., on "Reading and Language Arts Teaching: A Case for Judicial Intervention."

Thursday, Oct. 4

Sports: field hockey, vs. Delaware, 3 p.m.

GSA, Indian Cooking Workshop, 7:30 p.m., Room 102 Kern.

Religious Affairs Office, 10:30 p.m., "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.

University Resident Theatre Company (URTC), Michael Christoffer, *The Shadow Box*, 8 p.m., The Playhouse.

Penn State Students for Life Lecture, 8 p.m., HUB Ballroom. John T. Noonan, Jr., Univ. of Cal. Law School, on "The Culture of Abortion."

Friday, Oct. 5

HUB Craft Center demonstration, 11:30 a.m., Kern Lobby.

Geography Dept. coffee and lecture, 3:45 p.m., Room 319 Walker. Alistair Fraser, meteorology, on "Non-existent Lands."

Commonsplace Theatre, *Psycho*, 7 p.m.; *North by Northwest*, 9 p.m., Room 112 Kern.

Sports: soccer, vs. Lafayette, 7:15 p.m.

URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Saturday, Oct. 6

Last date for final oral examinations for Nov. graduates.

Last date for Nov. graduates to deliver masters' theses or papers to Graduate School.

Sports: field hockey, vs. Ohio State, 10 a.m.

Artists Series, Neil Simon, *Chapter Two*, 3 p.m. and 8:30 p.m., Eisenhower Auditorium.

France-Cinema, Fassbinder, *Germany in Autumn*, 7 and 9 p.m., Room 112 Kern.

URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Sunday, Oct. 7

University Chapel Service, 11 a.m., Eisenhower Chapel. Yoshio Fukuyama, religious studies, speaker.

Sports: exhibition baseball, vs. Mansfield, 1 p.m.

Commonsplace Theatre, *Psycho*, 7 p.m.; *North by Northwest*, 9 p.m., Room 112 Kern.

Exhibits

Chambers Gallery: David Van Dommelen, "Tents and Tapestries," woven wall hangings, through Oct. 2.

HUB Galleries: Rome Hanks and Mary Edith Miller, photographs; Homecoming exhibits, all open Oct. 1.

Kern Commons Galleries: Harley Straus, photographs, and "Cities, U.S.A.," photographs, both through Sept. 29; Tsing-fang Chen, paintings, opens Sept. 30; Harriet Rosenberg, mixed media, opens Oct. 6.

Museum of Art: European works and 19th century American paintings from the permanent collection; recent paintings and drawings by George Zorelich; 19th century American prints and drawings from the permanent collection, opens Sept. 30.

Pattee Library: "American Scene," prints from the University Libraries fine prints collection, East Corridor Gallery: Patricia Drew, "For the Very Purpose," mixed media, Lending Services Lobby.

Robeson Cultural Center: "Black Women: Achievements Against the Odds."

Zoller Gallery: Faculty exhibit.

Seminars

Monday, Oct. 1

Plant Pathology, Ali Hamid on "Why is the SR6 Gene of Wheat Expressed at 25°C?" 3:55 p.m., Room 213 Buckhout.

Tuesday, Oct. 2

Chemistry and Properties of Macromolecules, A.G. Walton, Case Western Reserve Univ., on "Interesting Properties of Some Synthetic Polypeptides," 11:10 a.m., Room 333 Whitmore.

Organic/Inorganic Chemistry, Roy Noble, grad. student, on "Studies on the Mechanism of Transamination Reactions," 12:45 p.m., Room 333 Whitmore.

Air Pollution Control, Eva J. Pell, plant pathology and Center for Air Environment Studies, on "Can Ozone Alter Food Quality?" 2:20 p.m., Room 140 Fenske.

Computation Center, Herman D. Knoble, research assoc., on "A Practical Look at Computer Arithmetic," 2:30 p.m., Room 110 Computer Bldg.

Geosciences, Selwyn Sachs, Carnegie Institution of Washington, on "Deep Seismic Processes in Earth's Mantle," 3:45 p.m., Room 112 Walker.

Organic/Inorganic Chemistry, Frank Hauser, Oregon Graduate Center, on "Regiospecific Syntheses of Naturally Occurring Polynuclear Aromatic Systems," 8 p.m., Room 333 Whitmore.

Wednesday, Oct. 3

Computation Center, Chester M. Smith, computer science, on "An Introduction to the Computational Center," 12:45 p.m., Room 110 Computer Bldg.

Thursday, Oct. 4

Ceramic Science, Robert Wolfe, GTE Sylvania, on "Phosphor Ceramics," 11 a.m., Room 301 Steidle.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Computation Center, "An Introduction to the Computational Center," 11:10 a.m., Room 110 Computer Bldg. Repeat.

Chemistry, Frederic M. Richards, Yale Univ., on "Areas, Volumes and Protein Structures," 12:45 p.m., Room 333 Whitmore.

Physics, Joseph S. Levinger, Rensselaer Polytechnic Institute, on "The Three Body Problem," 3:50 p.m., Room 445 Davey.

Meteorology, Mark Mathewson, graduate student, on "Real Time Radar Data Displays at AFOS," 3:55 p.m., Room 112 Walker.

Computer Science, E.G. Coffman, Jr., Bell Labs., on "Packings in Two Dimensions," 4 p.m., Room 325 Whitmore.

Fuel Science, Mark Morgan, fuel science, on "Major Inorganic Constituents in Lignite," 4 p.m., Room 301 Steidle.

Mathematics, Hans Berliner, Carnegie-Mellon Univ., on "Computers and Games," 4 p.m., Room 102 McAllister.

Arts Roundup

Zukerman to perform

Pinchas Zukerman, an internationally acclaimed violinist, will appear in concert at 8:30 p.m. Friday, Sept. 28, in Eisenhower Auditorium. A limited number of tickets to this Artists Series event will be on sale today until 4 p.m. at the Artists Series Booth in the HUB and in Eisenhower Auditorium.

Zukerman, 31, has performed with leading orchestras throughout the world since his New York debut in 1969 with Leonard Bernstein and the New York Philharmonic.

He began his study of the violin at the age of seven, and a year later entered the Israel Conservatory and the Academy of Music in Tel Aviv. In 1961, Isaac Stern and Pablo Casals heard him play and recommended he further his studies in the United States; he did so, at Juilliard. In 1967, Zukerman won first prize in the 25th Leventritt International Competition.

Bringing together the academic and professional worlds of theatre in an atmosphere that will be productive for both is the goal of Penn State's new University Resident Theatre Company (URTC).

According to Douglas N. Cook, head of the Department of Theatre and Film, the company will import different professional actor/teachers to the University each term to familiarize students with the professional theatre world and bring them into contact with career problems and prospects.

A combination of the University Theatre, the Festival Theatre and the Arts Company, URTC will be producing plays year-round, utilizing visiting actor/teachers, faculty, and graduate and undergraduate students in the company.

During the current Fall Term, three actor/teachers have joined the company. Stephen D. Keener, a graduate of the Goodman School of Drama in Chicago, has appeared with the Goodman Theatre's professional repertory company and the Missouri Repertory Theatre. Edith Owen, who holds a B.A. from Hunter College and an M.A. from Columbia University, has worked with the Chautauque Summer Theatre and the Missouri Repertory Theatre. Broadway actress Gloria Rossi has appeared in *Gypsy*, *The Old Glory* and *The Desert Song* and toured with the road production of *Rosecrantz and Guidersten* at Are Dead.

All three actors are working with URTC's first production of the season, Michael Christoffer's *The Shadow Box*, which opens Thursday, Oct. 4, in the Playhouse. Ticket and season subscription information is available by calling 865-1886 from 1-6 p.m. Mondays through Saturdays or by stopping by the company office in Room 137 Arts Building.

Organ program is Monday

A program of German and French music from the Baroque period to the 20th century will be presented by associate professor June Miller, an organist, at 8:30 p.m. Monday, Oct. 1, in the Music Building Recital Hall.

Several selections by J.S. Bach, the Prelude and Fugue in C and two chorale preludes, will open the program. Prof. Miller will perform the Prelude in E Minor by Nicholas Bruhns and two movements from the "Messe pour les Couvents" by Francois Couperin. She will close the Baroque part of the concert with another piece by Bach, the Fantasy in G.

Music from the romantic period and 20th century music comprise the second part of the program. Prof. Miller will offer the first performance in this area of Jehan Alain's Three Movements for Flute and Organ. Felix Mendelssohn's Sonata No. 3 in A and Olivier Messiaen's "The Nativity" will conclude the program.

Flute recital scheduled

Ezra Laderman's Duet for Flute and Dancer will highlight a recital by Overda Page, flutist, at 8:30 p.m. Wednesday, Oct. 3 in the Music Building Recital Hall.

The Laderman work is unique because the American composer rhythmically notated the dancer's part on the musical score. Kathy Stuart will perform the dance which was choreographed by assistant professor Pat Heigel-Tanner.

Other works on the program are Beethoven's Serenade in D Major; two short pieces for flute and piano, "Fantasie - Caprice" by Jolivet and "Morceau de Concerts" by Faure; and Jacob's Concerto for Flute and String Orchestra.

Ms. Page is an instructor in the School of Music.

News in Brief

University complying with DOE regulations

Certificates of Compliance to Department of Energy Emergency Building Temperature Restrictions are now being placed in University buildings, according to Ralph E. Zilly, vice president for business and chairman of the Executive Energy Conservation Committee.

The certificates, signed by appropriate deans or administrative officers, signify compliance with the 78 degree restriction on air conditioning, 65 degrees on heating and 105 degrees on domestic hot water.

"Of course, there are some exemptions for buildings housing research animals and sensitive equipment or processes. Residential areas are also excluded from the restrictions," Mr. Zilly said.

Maintenance and Operations employees are currently resetting water temperatures and checking the calibration of wall thermostats so that room occupants can exercise proper control of temperatures, he added.

The regulations of President Carter's Emergency Energy Conservation Plan No. 2 make occupants of a room or area responsible for the air temperatures in the area.

In locations without thermostats, occupants are responsible for temperature control through the use of radiator hand valves, univent controls, or other control devices in a room. They are also responsible for turning air temperatures back to 55 degrees when an area is not to be occupied for eight hours or more.

Where control devices exist in classrooms, the instructors in those classrooms are responsible for maintaining proper temperatures and they also have the duty of setting temperatures back to 55 degrees when the class ends.

When classrooms are not scheduled for use, building coordinators have responsibility for temperatures during the normal working day. Mr. Zilly noted.

"Because the small thermometers frequently found on thermostats are notoriously inaccurate," he said, "persons suspecting that their room or area is too warm or cold should notify their building coordinator. Physical Plant personnel will check the temperature and take any necessary follow-up action."

At Hershey Medical Center, Behrend College, Capitol Campus, and the Commonwealth Campuses, the provost or director is responsible for compliance and for reporting directly to the Department of Energy on all exemptions claimed.

Use of car flashers may prevent tickets

Some faculty and staff members have received parking tickets that could have been prevented by just turning on the vehicle's emergency flashers, according to Allan Derzak, University parking coordinator.

Short-time parking for loading and unloading, pick-up or delivery is permitted in parking areas and in loading zones provided the vehicle's emergency warning flashers are operating. The maximum time limit for pick-up or delivery parking is 15 minutes. If a vehicle is not equipped with emergency flashers, an acceptable alternative is turning on the vehicle's head lamps.

A note affixed to the windshield or displayed on the dashboard is not an acceptable alternative. Additional information concerning University parking privileges is provided on the reverse side of the faculty staff parking map.

Graduate School will help sponsor speakers

Faculty members or organizations who wish assistance in bringing distinguished speakers to the University may request it in writing from the Graduate School by Oct. 31.

"Each year the Graduate School assists several departments or other administrative units in bringing distinguished speakers to the campus for presentations that can be expected to evoke a wide spectrum of interest," says Dr. B.F. Howell Jr., associate dean. "The type of speaker we like to sponsor often can be obtained only by planning six months to a year in advance."

Requests for assistance should name the speaker, provide a brief vita, state the general area of his or her talk, explain why the talk should hold wide appeal and to whom it would be of interest, and state how much financial assistance (up to \$500) is desired from the Graduate School. Requests should be addressed to: Graduate Council Committee on the Lecture Series.

c/o B.F. Howell Jr., 320 Kern Graduate Building.

For 1979-80, the Graduate School is co-sponsoring a lecture by Prof. Herbert A. Simon on March 27, and has invited John Marshall to premiere his film on the life of a bushman.

Liberal Arts institutes Humanities Doctoral Minor

The College of the Liberal Arts has instituted a new program of studies — the Doctoral Minor in the Humanities (DMH) — which is available to interested doctoral students throughout the University.

According to Dr. Leon F. Lyday, professor of Spanish and director of DMH, the interdisciplinary program is designed both to enhance employment opportunities for interested students and

to provide them with a richer and more varied educational experience.

"The DMH is an individualized program involving 15 to 18 credits in a broadly humanistic area," Dr. Lyday said. "Teaching experience in this minor area will be provided in every possible instance, normally through the general humanities program."

"DMH may be counted as a doctoral program minor, or as an option, and students may enter it in either category," he added.

Students successfully completing the program will be awarded a certificate (minor or option) of accomplishment by the College of the Liberal Arts at the time the doctoral degree is awarded.

For brochures and other information pertaining to the DMH program, write Dr. Lyday at Room 132 Sparks Building or call 863-0524.

United Way fund drive begins

Editor's note: The following article has been prepared by the Office of Campus Relations, responsible for coordinating the Penn State United Way campaign.

United Way fund raising drives have begun across the nation in support of some 39,000 human service agencies, and Penn State employees across the Commonwealth are being asked to do their part by contributing to the local United Way agency where they work or live.

The University's support of this single fund-raising drive for all employees is designed to allow individuals to support local agencies with a minimum of time and expense.

In families where more than one person is a member of the Penn State family, duplicate information is mailed. It is essential that each person return the card with name and appropriate response indicated to avoid costly follow-up procedures.

The United Way is unique in that it is a community-based drive designed to assist people with a broad range of human services. Funds raised by each community are used to support local agencies needed by the people who live in the area.

The United Way campaigns are conducted by volunteers from the community. The single, united campaign effort is efficient because it reduces

campaigning costs; on average, less than 10 percent of every dollar goes for administration and fund-raising costs. Agencies supported by United Way are reviewed by volunteer boards to determine their financial need and value to the community.

For more information as to how United Way helps people where you live, contact your Campus United Way coordinator: Allentown, John Cooney, 485-4811; Altoona, W. Dennis Stewart, 946-4321; Beaver, Don Hicks, 775-2751; Behrend College, Ernest Fryer, 456-6414; Berks, Arthur Moberly, 375-4211; Capitol, Sherry Shaffer, 787-7737; Delaware County, Eugene Cloud, 565-3300; DuBois, Janet L. Yates, 371-2600; Fayette, Melvin Henderson, 437-2801.

Hazleton, Dr. Harold Aurnad, 454-8731; Hershey, Dr. Alphonse LeureduPree, 534-8521; McKeesport, Dr. Herbert McGibbeny, 687-9501; Mont Alto, T.D. Wilkinson, 749-3111; New Kensington, R. Arbuckle, 339-7561; Ogontz, Dr. Robert Bernoff, 886-9400; Radnor, Pamela Peck, 337-3612; Schuylkill, Steve Littell, 487-2334; Shenango Valley, George Gerhart, 981-1640; University Park, United Way Hotline, 863-1520; Wilkes-Barre, G. Bierly, 675-2171; Worthington Scranton, Frank Yatsko, 961-4757; York, Dr. David

Penn Staters

The Rev. Dr. Derald W. Stump, campus pastor to Episcopal students, and the Rev. Dr. Quentin L. Schaut, O.S.B., rector of the Penn State Catholic Center, have been invited to a morning service of prayer and meditation with Pope John Paul II in Trinity College Chapel, Washington, D.C., on Oct. 7. Their invitations came from Cardinal William Baum, Archbishop of Washington. The service involves the Ecumenical Society for Christian Dialogue, a transdenominational group to which both pastors belong.

Dr. T.T. Tsong, professor of physics, recently gave invited lectures and papers in the Soviet Union and West Germany. From Aug. 13-28, he was a guest of the U.S.S.R. Academy of Sciences. In Leningrad, Dr. Tsong gave lectures and seminars at the A.F. Ioffe Physics-Technical Institute; in Kiev, at the Physics Institute of the Ukrainian Academy of Sciences; and in Moscow at the Institute of Crystallography. From Sept. 4-10, he presented papers and served as chairman for the first session of the 26th International Field Emission Symposium in West Berlin.

Dr. Bruce M. Stephens, associate professor of humanities and religious studies at the Delaware County Campus, was one of 20 U.S. scholars selected to participate in a six-week seminar this summer at the Institute for the Teaching of the Post-Biblical Foundations of Western Civilization. The seminar was sponsored by the National Endowment for the Humanities and conducted by the faculty of the Jewish Theological Seminary of America in New York City. In addition, Dr. Stephens' monograph, *God's Last Metaphor*, will be published by the American Academy of Religion through the University of Montana's Scholar Press, as part of its "Studies in Religion" series. The monograph is a study of themes related to the doctrine of the Trinity in New England theology in the period between Jonathan Edwards and Horace Bushnell.

Dr. Dorothy V. Harris, professor of physical education, recently returned from Tokyo where she was invited to address the Olympic coaches on the topic of "Anxiety Management in Competitive Sport." She also conducted a seminar in "Professional Preparation" at the University of Tsukuba.

Dr. Beno Weiss, associate professor of Italian, has recently been appointed to the position of Bibliographer of the *MLA International Bibliography*. This annual bibliography is the most comprehensive in the field of modern languages and literatures. Prof. Weiss will collaborate in the compilation of Italian sources and materials.

Philip Klass, professor of English, opened the colloquium season at West Chester State College on Sept. 19 with an address titled "Science Fiction: Infraliterature or Ultraliterature?"

Dr. B. Lakshminarayana, professor of aerospace engineering, was a visiting scientist and professor at the Indian Institute of Science in Bangalore, India, last summer. His appointment was sponsored jointly by the National Science Foundation, the Council of Scientific and Industrial Research, and the Indian Institute of Science. He conducted seven seminars at the Institute and gave one lecture at the National Aeronautical Laboratory, also in Bangalore.

Brenda Gaylord Hameister, a former instructor of speech pathology, has been appointed coordinator for handicapped students at the University, effective immediately. She received her B.S. *summa cum laude* in speech pathology and audiology from SUNY at Geneseo and her M.S. in speech pathology from the University of Michigan.

William G. Yendo, professor of entomology, was one of seven guest lecturers and agricultural exchange delegates to the People's Republic of China this past summer. The delegation was assembled by the International Science and Education Council to exchange information related to biological control of crop pests. His trip was organized under the Agricultural Exchange Accord, established in November 1978 by officials of the U.S. Department of Agriculture and the Chinese Ministry of Agriculture. The delegation presented lectures for scientists representing Fudan University, the Chinese Academy of Science at Beijing, Zhongshan University, Shanghai Institute of Entomology, and officials from national and provincial governments.

Brant Shoemaker, associate professor of English and humanities at the Ogonitz Campus, has been named to the board of directors of the Leonardo Da Vinci Academy, the arts and sciences organization of the United Nations.

Bookshelf

Dr. Wendell V. Harris, professor and head of the Department of English, is the author of *British Short Fiction in the Nineteenth Century: A Literary and Bibliographic Guide*, published recently by Wayne State University Press, Detroit.

In this study, Dr. Harris surveys and evaluates the body of British short fiction during a golden age when authors and publishers responded to the interests of an expanded reading public. It was a time when periodicals and annual gift books regularly offered short fiction by writers such as Sheridan Le Fanu, William Carleton, and "Baron Corvo;" the wealth and variety of these stories, however, have been largely neglected in the twentieth century.

Dr. Harris restores some forgotten authors to their rightful positions in literary history, and provides a context for the shorter works of well-known novelists such as H.G. Wells and Sir Edmund Bulwer Lytton. Pointing out that the true short story did not emerge until near the end of the century, Dr. Harris approaches the shorter forms on their own terms, identifying subgroups, analyzing representative or intrinsically important individual works, and suggesting previously overlooked patterns of influence.

In addition to chapters devoted to significant trends and subgenres, there is an extensive, detailed bibliographic appendix designed to guide the researcher or student through the maze of volumes in which the tales and stories may now be found. It includes listings of the contents of individual volumes and indicates the most useful published bibliographies.

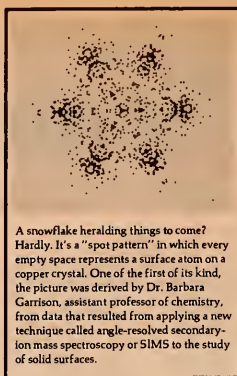

25-year chairs

Three employees of Housing and Food Services recently celebrated a combined 75 years of service to the University. Guy F. Auman, Robert J. Isaacson and Gerald R. Mansell have received 25-year chairs.

Guy F. Auman began working at Penn State in 1953 as a houseman. His title later changed to resident hall worker A. In 1971, he was promoted to truck driver in Repair Services. Another promotion in 1977 took him to his present job as maintenance worker in Repair Services. Mr. Auman is a resident of Aaronsburg.

In 1954, Robert J. Isaacson also began his University career as a houseman. His job title changed to resident hall worker A and then to resident hall maintenance worker. In 1978 he took his present job as resident hall utility worker in North Halls. Mr. Isaacson lives in Grassflat.

Gerald R. Mansell joined the University staff in 1954 as a utility worker. In 1969, his title changed to dining hall worker A in Simmons Dining Hall — Mr. Mansell's present title. He and his wife, Frances, reside in Bellefonte.

A snowflake heralding things to come? Hardly. It's a "spot pattern" in which every empty space represents a surface atom on a copper crystal. One of the first of its kind, the picture was derived by Dr. Barbara Garrison, assistant professor of chemistry, from data that resulted from applying a new technique called angle-resolved secondary-ion mass spectroscopy or SIMS to the study of solid surfaces.

Retirements

Charles W. Huston, business manager at Ogonitz, retired Sept. 30 after 10 years of service to the University. He came to Ogonitz three years ago from a similar position at the Wilkes-Barre Campus. He had previously had a long and varied business career.

Sarah S. Anderson, a janitorial worker in the Office of Physical Plant, retired Oct. 1. She began employment with the University on Jan. 17, 1967. Ms. Anderson resides in Pine Grove Mills.

Sara T. Nerhood, a residence hall worker in Housing and Food Services since June 13, 1978, retired Oct. 1.

Promotions

Technical Service

Jerre T. Ferguson to utilities equipment operator A at Hershey.

Patricia A. Millbyter to food service worker in Housing & Food Services.

Lois H. Miller to senior milk testing machine operator in Agriculture.

Virginia A. Mulreaney to snack bar attendant in Housing & Food Services.

Gerald K. Riggar to group leader, maintenance worker utility at Fayette.

Angelo Rose to maintenance worker utility in Physical Plant.

Priscilla Strasser to food preparer B, Housing & Food Services.

Viola R. Vonada to food preparer B, Housing & Food Services.

PSU Greeters make visitors feel at home

Perhaps your department or college is hosting:

- A Russian visitor who wants to see a typical U.S. supermarket.

- An Alumni Fellow whose wife is interested in obedience training for German shepherds.

- A job candidate whose family wants to tour the State College community.

The Penn State Greeters will be delighted to show them around. In fact, members of the Greeters, a hospitality group of the Faculty Women's Club, have already conducted visitors on just such specialized excursions, and they're only too happy to rise to new challenges.

The Greeters was formed at the suggestion of Rose Oswald, who had seen a similar group in action when she and the President were at UC-Berkeley. Its mission is to try to make visitors to University Park feel at home.

Either alone or with spouses, Greeters attend various University and alumni functions. "Often people don't know we're there officially," says Jim Eberhart, who, with Beverly Eckess, is co-chairing the group this year. "We try to see that each guest has someone with whom to talk, or perhaps assist older people with special needs."

With the constant flow of visitors into University Park, occasions arise when a department has no one available to look after a guest or a visiting family. A call to the Greeters will remedy that.

Depending on the visitor's interest, the volunteers will drive over the mountain to take in the Amish Market in Belleville, make the rounds of the local antique dealers, tour campus museums, or just visit over lunch.

If no official University host is available, a member of the Greeters will go to the airport to pick up a guest. The group welcomes the opportunity to arrange activities for children of visitors, and, with a little notice, can organize a small tea or reception.

"All of our 40-some members enjoy meeting new people, and we're eager to present the University and the community in a good light," Mrs. Eberhart says.

Any department interested in inquiring further about the Greeters' services should call either Mrs. Eberhart (238-8259) or Mrs. Eckess (238-6911).

Left to right: Robert Isaacson, Guy Auman, Gerald Mansell

University Park Calendar

Oct. 4-14

Special Events

Thursday, Oct. 4
CSA, Indian Cooking Workshop, 7:30 p.m., Room 102 Kern.
Religious Affairs Office, 10 part film, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.
Students for Life Lecture, 8 p.m., HUB Ballroom.
John T. Noonan, Jr., Univ. of Cal. Law School on "The Culture of Abortion."
URTC, Michael Christofore, *The Shadow Box*, 8 p.m., The Playhouse.

Friday, Oct. 5
Mary Danahy, pottery demonstration, 10:30 a.m.-1:30 p.m., Fisher Plaza (Kern Lobby if weather uncooperative).
Interdisciplinary Symposium on Value Lecture, 1 p.m., Hotel State College. John Noonan, history of law, Univ. of Cal., Berkeley, on "The Relationship of Legal and Moral Considerations in the Problem of Abortion."
Geography Dept. coffee and lecture, 3:45 p.m., Room 319 Walker. Alistair Fraser, meteorology, on "Non-existent Lands."
Commons place Theatre, *Psycho*, 7 p.m.; *North by Northwest*, 9 p.m., Room 112 Kern.
Sports: soccer, vs. Lafayette, 7:15 p.m.
URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Saturday, Oct. 6
Last date for final oral examinations for November graduates.
Last date for November graduates to deliver masters' theses or papers to Graduate School.
Sports: field hockey, vs. Ohio State, 10 a.m.
Artists Series, Neil Simon, *Chapter Two*, 3 p.m. and 8:30 p.m., Eisenhower Auditorium.
France-Cinema, Fassbinder, *Germany in Autumn*, 7 and 9 p.m., Room 112 Kern.
URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Sunday, Oct. 7
University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Yoshio Fukuyama, religious studies, speaker.
Sports: exhibition baseball, vs. Mansfield, 1 p.m.
Shaver's Creek Nature Center, Autumn Ramble, 2 p.m., Stone Valley.
Commons place Theatre, *Psycho*, 7 p.m.; *North by Northwest*, 9 p.m., Room 112 Kern.

Monday, Oct. 8
Shakespeare film, Olivier, *Hamlet*, 6:30 p.m., Room 112 Chambers. Free.
France-Cinema, *Germany in Autumn*, 7 and 9 p.m., Room 112 Kern.
Raymond Brown, baritone, 8:30 p.m., Music Bldg. Recital Hall. Free.

Tuesday, Oct. 9
Comp. Lit. Luncheon, 12:15 p.m.; talk, 1 p.m., Hotel State College. Margaret Allan, author, on "The Achievement of Margaret Fuller."
Shakespeare film, Williamson, *Hamlet*, 6:30 p.m., Room 112 Chambers. Free.
Comp. Lit. Film Series, Kurosawa, *Throne of Blood*, 7 and 9 p.m., Room 112 Kern.
Public discussion of "Issues in Aging" and viewing of Ingmar Bergman film, *The Naked Night*, 7 p.m., Room 209 Henderson.
URTC, *The Shadow Box*, 8 p.m., The Playhouse.
Artists Series, Murray Louis Dance Company, 8:30 p.m., Eisenhower Auditorium.

Wednesday, Oct. 10
Commons Concert, Tom Robinson, vocalist, noon, Kern Lobby.
Friends of the Museum Gallery Talk, 8 p.m., Museum of Art. William Davis, assistant director of Museum, on "The Setting Up of a Museum Exhibit."
URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Thursday, Oct. 11
Commons Videotape, "TV Quarterback," noon, Kern Lobby.
Sports: field hockey, vs. East Stroudsburg, 3 p.m.

Friday, Oct. 12
Religious Affairs Office, 10 part film, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.
URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Friday, Oct. 12
Sports: JV football, vs. Milford Academy, 2 p.m.; soccer, vs. Maryland, 8 p.m.

Arts Roundup

Some tickets remain for "Chapter Two"

The Artists Series will present Neil Simon's *Chapter Two* comedy at 8:30 p.m. Saturday, Oct. 6, in Eisenhower Auditorium. The subscription performance scheduled for 3 p.m. that day is sold out, but tickets for the 8:30 performance are still on sale at Eisenhower Auditorium.

The show, now in its third year on Broadway, tells the story of a novelist — grieving over the recent death of his wife of 12 years — who impulsively marries a recently divorced actress. Mr. Simon has said: "This play is my comment on love in marriage."

The production stars Dawn Wells, who played the role of Mary Ann in TV's "Gilligan's Island" and has guest-starred on more than 100 television shows. David Faulkner, who plays George, has television credits that include feature appearances on "Kojak" and on the NBC children's special "Piece of Cake." He also has appeared in several serials on daytime television.

Brown to present baritone recital

Heinz Werner Zimmermann's *Psalmkonzert* — which features an ensemble of three trumpets, vibraphone, double bass, organ, choir and boys' choir — will be presented in a recital by baritone Raymond H. Brown at 8:30 p.m. Monday, Oct. 8, in the Music Building Recital Hall.
Opening the recital will be four

Italian compositions, "Amarilli Mia Bella" by Caccini, "Beato Chi Puo" by Cavalli, "Pieta, Mio Caro Bene" by Bononcini and "Tu Se Morta" by Monteverdi, "Evening Hymn" by Henry Purcell and "Lord, What is Man" with realizations by Benjamin Britten will follow. Also included in the first half of the recital are four compositions by Richard Strauss and a song cycle by Ralph Vaughn Williams. Philip Dettra will accompany Mr. Brown on piano for the first half of the program.

Psalmkonzert comprises the second half of the recital. Conducted by Tommie Irwin, the 1957 composition features Carol Lindsay on vibraphone, Richard Laird on double bass, June Miller on organ, the Penn State Singers, and Christopher Kirkpatrick directing the Schola Cantorum of Our Lady of Victory Church, State College.

Mr. Brown is professor of music and director of the University choirs. Monday's recital, sponsored by the School of Music, is free and open to the public.

Exhibit of paintings continues at Kern

An exhibit of paintings by Tsing Fang Chen will continue at the Kern Graduate Commons Gallery through Oct. 27.

Mr. Chen's neo-iconography has been described as complex, demanding and ultimately rewarding. The display features icons from different ages, cultures, and original intents. A graduate of Taiwan University, Mr. Chen lived in France for 12 years before coming to the United States in 1975.

Tuesday, Oct. 9

ARL, Earl Williams, research assistant, on "Low Frequency Plasma Radiation Using a Near Field Microphone Array," 10:45 a.m., Walker Conference Room, Applied Science Bldg.

Organic/Inorganic Chemistry, Jeffrey Ross, grad. student, on "Extended X-ray Fine Structure (EXAFS) Spectroscopy: Characterization of Dispersed Metal Catalysts," 12:45 p.m., Room 333 Whitmore.

Air Pollution Control, Anne K. Bennett, grad. student, mechanical engineering, on "Improved Procedure for the Design of Industrial Ventilation Systems," 2:20 p.m., Room 140 Fenske.

Logic, C. Alves, mathematics, on "Ultrafilters over Measurable Cardinals," 2:20 p.m., Room 118 McAllister.

Geosciences, Lauren A. Wright, geosciences, on "Crustal Evolution Between Las Vegas Valley and the Sierra Nevada: Some Interpretations and Remaining Problems," 3:45 p.m., Room 112 Walker.

Biology, Zane B. Carothers, Univ. of Illinois (Urbana-Champaign), on "Comparative Blepharoplast Morphology: A New Line of Inquiry into Bryophyte Evolution," 4 p.m., Room 8 Mueller.

Wednesday, Oct. 10

Philosophy of Sport, Peter Gould, geography, on "The Structure of Team Games," 12 noon, Room 104 White.

Thursday, Oct. 11

Ceramic Science, James McCauley, Army Materials and Mechanics Research Center, on "Mica-Toughened Ceramics," 11 a.m., Room 301 Sieidle.

Chemistry, Francis K. Fong, Purdue Univ., on "Chlorophyll Water Splitting and Photosynthesis Outside of Green Plants," 12:45 p.m., Room 333 Whitmore.

Anthropology, Nancy Berte, Mark Flinn and Carolyn McCommon, grad. students, on "Ethnological Research Among Central American Peoples — Belize, Trinidad and Honduras," 3:30 p.m., Room 107 Carpenter.

Physics, M.B. Webb, Univ. of Wisconsin, on "Noble Gas Adsorption on Ag," 3:30 p.m., Room 445 Davey.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Meteorology, Joanne Simpson, Goddard Space Flight Center, on "Interaction and Impact of Cumulus Clouds," 3:35 p.m., Room 112 Walker.

Fuel Science, P.R. Solomon, United Technologies Research Center, on "Use of FTIR to Predict Coal Pyrolysis Behavior," 4 p.m., Room 301 Sieidle.

Mathematics, Anton Zettl, Northern Illinois Univ., on "Some Results in Ordinary Differential Equations," 4 p.m., Room 102 McAllister.

Computation Center, Daniel L. Bernitt, senior research associate, on "APL (2 of 6)," 7:30 p.m., Room 108 Forum.

Exhibits

HUB Galleries: Rome Hanks and Mary Edith Miller, photographs; Homecoming exhibits.

Kern Commons Galleries: Penn State Press, "Best Designed University Press Books of Past Year," 9 a.m.-4 p.m., Oct. 4 and 5 only; Tsing-Fang Chen, paintings; Harriet Rosenberg, mixed media, opens Oct. 6.

Museum of Art: European works and 19th century American paintings, prints and drawings from the permanent collection; recent paintings and drawings by George Zaretch.

Pattet Library: "The American Scene," prints from the University Libraries fine prints collection, through Oct. 8; Peter Green, recent drawings, opens Oct. 9; East Corridor Gallery, Patrice Drew, "For the Very Purpose," mixed media, through Oct. 8, Lending Services Lobby.

Robeson Cultural Center: "Black Women: Achievements Against the Odds," through Oct. 7.

Zoller Gallery: Faculty exhibit, through Oct. 7; Sickel Photographs Show, opens Oct. 14.

Hemingway scholars on "Talkabout" show

The 50th anniversary of the publication of Ernest Hemingway's *A Farewell to Arms* is not going unnoticed at the University, recognized internationally as a center for Ernest Hemingway studies.

Tonight at 10 p.m., WPXS-TV's "Talkabout" will feature an interview with two Hemingway scholars: Dr. Bernard Oldsey, professor of English at West Chester State College and a former Penn State faculty member, and Dr. Philip Young, research professor of English at Penn State.

In the "Talkabout" program — to be rebroadcast at 6 p.m. Saturday, Oct. 6, and at 8:30 a.m. Thursday, Oct. 11 — interviewer Bruce Adams asks Professors Young and Oldsey about the circumstances leading to the resounding success of the struggling author's World War I novel, which attained a sale of 79,000 in the first two months after its Sept. 27, 1929, publication, despite the stock market crash a month later.

Both Drs. Young and Oldsey are authors of books on Hemingway that have been published by The Pennsylvania State University Press. Published last month, Dr. Oldsey's *Hemingway's Hidden Craft: The Writing of 'A Farewell to Arms'* "clearly" categorizes the novelist's massive rejected material, and "then places it firmly in the context of Hemingway's life and the process by which he shaped his art," according to Choice.

In Dr. Young's *Ernest Hemingway: A Reconsideration* (1966), he shows "convincingly," according to *Time* and *Tide*, how Hemingway's writing "was a self-cure." Dr. Young also is co-author, with Charles W. Mann, University Librarian; chief, Special Collections and professor of English, of *The Hemingway Manuscripts: An Inventory*, published by the University Press in 1969.

Four new funds established

Four new funds have been established at the University. They are:

— A John N. Ramsey Memorial Scholarship to assist outstanding students who need money to complete their educations.

The initial principal of the fund, \$187,515, has been received from a trust established by John N. Ramsey, who died May 2, 1978, in Bradenton, Fla. Mr. Ramsey, who graduated from Penn State in 1910 with a degree in civil engineering, was the founder of the Vegler-Ramsey Co., a consulting engineering firm in the Pittsburgh area.

Consideration for the scholarship will be given to all students eligible for admission to the Penn State Scholars Program. Each John N. Ramsey Memorial Scholarship will be awarded for one academic year. It may be renewed if the recipient continues to meet eligibility requirements and funds remain available.

— A Sara Lowrie Love Memorial Fund to provide monies for approved and essential expenditures for which general funds are not available.

The initial principal of the fund, in excess of \$150,000, has been received from the estate of Sara Lowrie Love, a Tyronne, Pa., native who died recently in Orlando, Fla. Mrs. Love, a graduate of Goucher College, was the wife of Robert A. Love, a Penn State alumnus (Class of '16), who preceded her in death.

Income from the fund may be used for: travel and travel accommodations; membership in professional and/or allied organizations; entertainment of special University guests; meeting unusual needs brought on by emergency personnel situations of faculty or staff. The number of expenditures and the amount of each will depend upon the fund's earnings. Expenditures will be authorized by the University Controller and approved by the University Treasurer.

— A New England Scholarship to assist

outstanding students who are residents of Massachusetts or any of its adjacent states.

The initial principal of the scholarship fund, \$9,614.80, has been obtained by closing the New England Penn State Alumni Scholarship Fund and transferring its assets, with the consent of the New England Penn State Alumni Club.

Consideration for the scholarships will be given to full-time undergraduates from the New England states who are enrolled, or who plan to enroll as such, at Penn State. These students must demonstrate financial need and show evidence or promise of superior academic achievement. Nominees of the New England Penn State Alumni Club will be given preferential consideration.

Each scholarship will be awarded for one academic year. It may be renewed if the recipient continues to meet all requirements and funds remain available.

— An Engineering Science Award Fund to provide financial aid to outstanding undergraduates majoring in engineering science.

The initial principal of the fund, \$1,500, has been contributed by Dr. John R. Hummel, of Utica, Mich. Dr. Hummel, who earned his B.S. in engineering science (1973) and his M.S. in meteorology (1975) from Penn State, is a research scientist for General Motors.

Consideration for the award will be given to undergraduates enrolled in engineering science in the College of Engineering who have superior academic records, sophomore standing, and a need for financial aid. One award of \$100 will be made annually from the earnings of the fund. Recipients will be recommended by Engineering Science Department faculty members and selected by the Scholarship Committee of the College of Engineering. The award may be renewed.

Staff Vacancies

The following vacancies for positions classified as staff except or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Oct. 11, 1979. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ADMISSIONS COUNSELOR II — DEAN OF ADMISSIONS, University Park Responsible to the Associate or Assistant Director of Admissions for general assistance in handling the more complex of admissions matters in an assigned regional area. Participation in and administration of admissions activities for freshmen, advanced standing, transfer, provisional and nondegree students who are baccalaureate or associate degree candidates for University Park Campus and for assigned Commonwealth Campus/Behrend College. Jurisdiction of these candidates is based on the geographic home address of the candidate. Bachelor's degree and one to two years effective experience in educational administration or in related fields such as industry, military service or the like.

ADMISSIONS COUNSELOR I — DEAN OF ADMISSIONS, University Park Responsible to the Associate or Assistant Director of Admissions, for general assistance in handling of the more routine admissions matters in an assigned regional area. Participating in and administration of admissions activities for freshmen, advanced standing, transfer, provisional, and nondegree students who are baccalaureate or associate degree candidates for University Park Campus and for assigned Commonwealth Campus/Behrend College. Jurisdiction of these candidates is based on the geographic home address of the candidate. Bachelor's degree and six to nine months of effective experience in education administration.

BUDGET AND PERSONNEL OFFICER — VICE PRESIDENT FOR BUSINESS, University Park Responsible to the Assistant Vice President for Business Services for management of the University accounting and personnel programs within the Office of Business Services. Act as Personnel Representative for the Office. Assist with the development, implementation, and administration of internal accounting and personnel policies and procedures. Prepare financial and statistical reports to be used in administrative decision making. Supervise clerical support personnel. Bachelor's degree or equivalent

business administration, with a major or minor in accounting, plus three to four years of effective experience in budget control, accounting operations and personnel administration.

PRODUCER-OPERATIONS SUPERVISOR, PENN STATE RADIO — CONTINUING EDUCATION, University Park Planning, production and management of the Penn State Radio series, "The Sound of Progress", and other special programs as assigned. Candidates should have an interest and background in science and technology topics. Ability to schedule and conduct interviews with program guests, select segments of interviews for use in programs as the regular host. Will coordinate contact with approximately 100 radio stations and be responsible for distribution logistics. Bachelor's degree in English, journalism, radio-television or related fields plus at least two years' experience in radio programming or related areas are required. Announcing audition or preferably sample tape indicating candidates writing and announcing capabilities required.

FINANCIAL AID COORDINATOR, University Park Responsible to the Director of Student Aid for counseling students on financial aid matters and for assistance in internal administration of financial aid programs. Also, coordinate University Athletic Grant Program and maintain liaison with Athletic Department. A master's degree or equivalent in student personnel services, counselor education, or higher education, plus up to one year of effective experience, is required. Appointment will expire June 30, 1980.

SENIOR PLANNING ANALYST — OFFICE OF PLANNING AND BUDGET, University Park Responsible to the Associate Director for Planning and Research, position involves developing, conducting, and monitoring planning and analytical studies, representing the Office of Planning and Budget on University-wide committees and performing such other staff functions as may be requested by the Director or Associate Director of the Office of Planning and Budget and the senior executives of the University. Master's degree or equivalent in higher education or other educational field, business administration, public administration, economics, or related field, and from two to three years of effective experience in higher education or corporate planning activity, are required. Earned doctorate or equivalent and from one to two years of effective experience are preferred.

PLANNING ANALYST — OFFICE OF PLANNING AND BUDGET, University Park Responsible to the Associate Director for Planning and Research, position involves the development and execution of research and/or planning studies, conducting extensive research of pertinent literature, and participation in developing recommendations on strategic policy planning issues as they affect the University. Bachelor's degree or equivalent in higher education or other educational field, business administration, economics, public administration, sociology, political science, or related field, and from two to three years of effective experience in policy, research, and planning activities in higher education or business and industry, are required. Master's degree or equivalent and from one to two years of effective experience are preferred.

During the years they spend at the University, some employees acquire new skills or knowledge as the result of taking courses, participating in training programs or through individual study. They may also gain experience in another field through outside activities.

When employees apply for promotion to another job, it is important that this new information be in their files, the Employment Division points out. However, unless employees provide such information about themselves, their files cannot be brought up to date.

The Employment Division urges that all employees periodically consider whether they can add to the information currently in their files. Persons who wish to add to their files should request a supplemental employment data sheet from the Employment Division, Room 117 Willard Building, 865-1387 (Network 475-1387).

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Tourism, travel committee set up

In recognition of tourism/travel as its growing field of academic study and its importance in the economic and social life of communities, a Tourism and Travel Research Committee has been established at the University.

The new committee will operate under the Regional Analysis Center of the Institute for Research on Land and Water Resources, according to Dr. Philippos J. Loukissas, assistant professor of urban and regional planning and one of the committee's organizers.

The decision to form the committee was made recently at a meeting of interested faculty members from such programs and departments as Man-Environment Relations, Food Service and Housing Administration, Sociology, Recreation and Parks, Regional Planning, Geography, Business Logistics, Community Development, and the Cooperative Extension Service. Paul Decker, director of the State Bureau of Travel Development, was a guest at the session.

Faculty interested in joining the committee should contact Dr. Loukissas, Man-Environment Relations, 5-126 Henderson Human Development Building, 865-1467.

Bergman film Oct. 9

Interested persons are invited to a classroom showing of Ingmar Bergman's *The Naked Night* from 7 to 10 p.m. Tuesday, Oct. 9, in Room 5-205 Henderson Human Development Building. The film will be shown in connection with IFS 598, "Issues in Aging."

Using an electric sander, a workman weaves a circular pattern as he smooths out the rough spots on the traffic deck over the HUB's old Terrace Room. The project is providing a new, weather-proof surface for the facility.

Penn State Intercom

The outdoor pool is still open for the hardy.

Senate passes 82-40 qualifier

Confronted by both amending and substitute motions for legislation affecting Academic Policy 82-40, the University Faculty Senate passed an interpretive motion originally proposed last month and sent the new measures to committee for study.

The motion passed at the Oct. 2 Senate meeting in essence confirms the right of the College of the Liberal Arts to maintain higher graduation standards than those previously approved by the Senate.

Liberal Arts is currently the only academic unit to whom the motion applies, but the two new motions would afford other colleges an opportunity to request more rigorous graduation requirements.

Senate Chairman George McMurtry, ruling that the amending and substitute motions constituted new legislation, referred them to the Committee on Undergraduate Instruction.

The only piece of new legislation before the Senate concerned the delegation of responsibility to the College of Medicine for its curricular matters.

It received strong support from the Intra-University Relations Committee and from President Oswald and Graduate School Dean James B. Bartoo. They pointed out that medical students are the only ones eligible to take the 700-level courses offered at Hershey, and indeed cannot enroll in any other courses, making the College unique in the Penn State system.

The Senate will vote on this legislation at its Nov. 13 meeting.

Post correspondent to speak

Karen DeYoung, the Latin American correspondent for the Washington Post, will speak on "Nicaragua and the Latin American Revolution" at 6:30 p.m.

Wednesday, Oct. 17, in Room 101 Chambers Building.

Her appearance is sponsored jointly by the Latin American Studies Committee, the School of Journalism and the College of the Liberal Arts. Ms. DeYoung will share insights gained during her recent assignments in Latin America, and particularly in Nicaragua, and will discuss the events now taking shape in the Caribbean.

Four films to be shown

The Central Pennsylvania Society of the Archaeological Institute of America will present four films, beginning at 7:30 p.m., on Tuesday, Oct. 16, in the HUB Assembly Room.

Two of the films — "The Viking Ships of Roskilde" and "The 100,000 Pieces Jigsaw Puzzle" — deal with the problems of shipwreck recovery and conservation. Produced for the Danish Government Film Office, these color films portray the technical difficulties and great bodily risks involved in working underwater.

The third film, "Archaeology of the Grand French Battery, Yorktown, Virginia," documents the excavation of the allied forces' siege line, which was constructed in 1781 and occupied by French troops. Aerial views of the excavation will be shown, counterpointed by close-ups of the reconstruction of the battery.

The program will conclude with "The Ancient World: Egypt."

The program is free and open to the public as part of the AIA's 100th anniversary celebration.

Open fires banned

Open fires, including camp fires, are not permitted at any time on the University farms and only in designated picnic areas on other University property, Howard O. Triebold Jr., manager of the Safety Services Division, reminds.

The Challenge of the '80s

Editor's Note: This article is the fourth in a series in which the academic deans reflect on what lies ahead for their colleges in the '80s.

The College of Engineering will be coping with the problems of success during the 1980s.

As of this Fall, Penn State will probably have the largest number of engineering students in the country, counting enrollments in mining, petroleum and natural gas engineering, which are lodged in the College of Earth and Mineral Sciences.

"The upsurge in enrollments is a national phenomenon," Dean Nunzio J. Palladino points out. "I think it's due to a perception on the part of parents and students that jobs exist at the end of the pipeline and that starting salaries are high. Their expectations are being fulfilled — to such an extent that our seniors feel disappointed if they have to continue fewer than three job offers and top students are getting six or more."

Government, industry and academe are all seeking more engineers, the result of greater public interest in improving control of the environment, increased government regulation, and the need to become more efficient in the face of energy inadequacies.

"I don't think that's going to change in

Dean Palladino

the next decade," Dean Palladino continues. "Greater emphasis is being put upon the reliability and liability aspects of everything manufacturers do. Even in the nuclear power field, which has faced recent setbacks in this country as far as

advances in the application of nuclear power, manpower needs continue to grow. As the government increases the intensity of its inspection of all nuclear engineering processes, manufacturers and utilities have to respond by adding technical personnel."

Nuclear engineering is hardly alone in its manpower needs. Dean Palladino points to a tour he made of the Beaver Valley region, which has both coal fired and nuclear power plants.

"Federal regulations require that coal fired plants incorporate huge scrubbers," Dean Palladino says, "and there have been many problems debugging them and keeping them on line. That's a reliability problem. Then there's all the sludge from coal firing. Attention to the disposition of waste of every kind will also make great demands on engineering talent for quite some time into the future."

"That's not to say that the demand for engineers will grow at a steady pace indefinitely," Dean Palladino adds. "There will still be perturbations as government changes its thrust. I'm certain that there will be some reaction to over-regulation eventually, and the government will reduce its hiring demands and then so will industry. There will then be a reaction to that, and another cycle of upsurge will begin. But I do believe the cycles will be minor compared to overall demand."

"So with respect to employment opportunities — and college enrollments —

I see the '80s representing a new and higher plateau around which minor oscillations will persist."

At Penn State, engineering freshman enrollments system-wide have grown from 1,005 in 1973 to close to 2,100 this Fall — an increase, incidentally, not shared by all engineering schools in Pennsylvania. At the University of Pittsburgh, for example, freshman enrollments in engineering actually declined slightly last Fall.

To handle the large number of students seeking engineering programs, the College

"I see the '80s representing a new and higher plateau around which minor oscillations will persist."

last year instituted a policy which permits them to enroll as freshmen, but requires them to earn at least a 2.3 cumulative grade point average before being allowed to enter a major.

In addition, engineering faculty members, used to teaching advanced courses in small sections, are seeking new instructional modes. A workshop was held in September to draw on the expertise developed by other colleges in handling

(Continued on page 4)

Penn Staters

Dr. Peter T. Luckle has been named professor of mineral engineering and chairman of the mineral processing section in the Department of Mineral Engineering. Since 1975, he has been corporate director for research and development for McNally Pittsburgh Manufacturing Corp. at its Kennedy Van Saun Corp. subsidiary in Danville, Pa.

Dr. Luckle, who has three degrees from Penn State — a B.S. in fuel technology (1960), an M.S. in mineral preparation (1969) and a Ph.D. in mineral processing (1972), has been an adjunct associate professor of mineral processing at the University since 1976.

He joined the Kennedy Van Saun Corp. in 1972 and was promoted in 1975 to the position he is now leaving. For the past four years, he was responsible for directing a diversified research program, including work in such areas as pyroprocessing, comminution, fluid-bed drying, flowsheet analysis, coal preparation ahead of liquefaction and gasification, and pyrite sulfur reduction.

Dr. William S. Pierce, professor of surgery at Hershey, co-chaired the first United States-Union of Soviet Socialist Republics Symposium on Mechanically Assisted Circulation, held in Tbilisi, Georgia, U.S.S.R., Sept. 20 to 22. Dr. Pierce presented a paper at the symposium entitled, "Total Heart Replacement with Modified Sac-Type Ventricles."

During her recently completed leave of absence, Jean Sabatine, an associate professor in the Department of Theatre and Film, was commissioned by the Kennedy Center to choreograph the "Three Dance Episodes" from Bernstein's *On the Town* for the National Symphony Magic of Musical Theatre program at the Kennedy Center in Washington, D.C. Prof. Sabatine was also commissioned by the New Hampshire Commission on the Arts to choreograph two works for a newly formed Jazz Dance Company.

Dr. John W. White, professor of floriculture, has received the Alex Laurie Award for Education and Research from the Foundation of Floriculture. The award was presented at the recent annual meeting of the Society of American Florists in San Francisco and recognizes Dr. White's research in the physiology and nutrition of floral crops.

Dr. Lee C. Eagleton, professor and head of the Department of Chemical Engineering, has been named a Fellow of the American Institute of Chemical Engineers. He was elected for his contributions to the advancement of the vaporization of liquids, kinetics of catalytic processes and reactor design.

Dr. Don N. Page, assistant professor of physics, presented a series of invited lectures on black holes at the William Jewell College in Liberty, MO, last month. Dr. Page also presented a paper, "Green's Functions for Gravitational Multi-Instantons" this week at the physics seminar of S.U.N.Y.-Stony Brook's Institute for Theoretical Physics.

Dr. Frederick F. Weiner has been named professor-in-charge of the Speech Pathology and Audiology Program and director of the Speech and Hearing Clinic. Dr. Weiner came to Penn State in 1976 as an associate professor of speech pathology. He had previously served on the faculties of the University of Maryland and Ohio University. His bachelor's, master's and doctoral degrees were granted by Wayne State.

Dr. Emily Toth, assistant professor of English, is co-editor of a new book, *A Kate Chopin Miscellany*, with Per Seyersted of the University of Oslo. The book includes Chopin's diaries, letters, unpublished stories and criticism, along with a bibliography. It is the first book published by the Northwestern State University Press in Natchitoches, LA.

Dr. Emilla E. Martinez-Brawley, assistant professor of social welfare, has been appointed to the editorial board of *Human Services in the Rural Environment*, a national journal published by the School of Social Work at the University of Tennessee.

Dr. Robert W. Ott, associate professor of art education, recently presented a seminar on museum education at the University of Regina in Saskatchewan, Canada. Dr. Ott was also an interviewed guest on "A.M. Canada," CBC, a Canadian national television program similar to NBC's "Today Show."

Dr. Joachim F. Wohlwill, professor of human development, was an invited speaker at a Conference on Developmental Psychology held at the Technical University in Berlin Oct. 1-3. He spoke on "Ecological Approaches in Developmental Psychology."

Mark D. Shaw, associate professor of agricultural engineering, was part of a 15-person delegation of American engineers, scientists and technologists who visited the People's Republic of China Aug. 18-Sept. 8. The group discussed methods of cooperative technological exchange. Prof. Shaw had previously worked in China in 1946-50 with the American Friends Service Committee.

Kenneth R. Beittel, professor of art education, spent a week in residency as a Visiting Artist at Shepherd College, Shepherdstown, WV, Sept. 17-24.

Women's gymnastics coach Judi Avenier has been appointed to the Association for Intercollegiate Athletics for Women National Gymnastics Committee.

Stephen Sherman, assistant professor of art, is displaying his work in a one-man show at the College of William and Mary through Nov. 1.

David F. Wood was promoted to assistant professor of business administration at the Beaver Campus, effective Sept. 1.

Retirements

Elizabeth J. Morrow retired as an admissions counselor in the Division of Admissions, Records and Scheduling on Oct. 1. She had held that position for 25 years.

Ms. Morrow taught music in West Sunbury and Warrior's Mark before joining the Penn State staff in 1954. She was not a newcomer to Penn State, however. Her father, David McFarland, served as head of the Metallurgy Department, and Ms. Morrow graduated from Penn State in 1937, earning her degree in music education.

As an admissions counselor, Ms. Morrow interviewed and evaluated applicants who hoped to come to Penn State as undergraduate students.

Ms. Morrow, who has one daughter, resides in Centre Hall.

Elizabeth H. Thomas retired from her position as associate librarian at the Mont Alto Campus on Oct. 1.

Ms. Thomas received her A.B. from Smith College and an M.S. in library science at the Catholic University. She held positions as a librarian at the University of New Hampshire and Mount Vernon Junior College before joining the University's staff in 1963.

At first, she recalls, Mont Alto's library was hardly more than "a pile of books on the floor" housed in a classroom. But by the time she retired, the library had moved into its own building and the collection had grown to some 30,000 books.

As associate librarian, Ms. Thomas made the final decision on book purchases, supervised para-professionals, part-time help and student workers, and handled the many other varied duties necessary to keep a library in operation.

Ms. Thomas plans to spend much of her retirement time in her Chambersburg home writing a book on the history of the Pennsylvania State Forest Academy, from which Mont Alto evolved.

Appointments

Allentown

Wendy N. Greenburg as assistant professor of French, B.A., Barnard College; M.A., M.Phil., Ph.D., Columbia U. Formerly instructor, Columbia U.

Altoona

Michael Volpe as assistant professor of speech communication, A.B., Temple U.; M.A., Penn State; Ph.D., Temple U. Formerly assistant professor, U. of Virginia.
Bradley W. Jackson as assistant professor of mathematics, B.S., U. of Oregon; M.A., Ph.D., U. of Maryland.

Beaver

Constantin Pomponiu as assistant professor of physics, M.S., Ph.D., U. of Bucharest. Formerly research physicist, Carnegie-Mellon U.
Abbas M. Shakir as assistant professor of mechanical engineering, B.S., M.S., Weimar U., Germany; Ph.D., U. of Leipzig, Germany. Formerly head of Electro-Mechanical Dept., Aiken Technical College, Aiken, SC; head of Mathematics Dept., Boggs Academy, Keysville, GA.
Robert S. Cole as instructor of accounting, B.S.B.A., Shippensburg State College; M.S.B.A., U. of Northern Colorado.

Behrend College

Kent M. Beck as assistant professor of history, B.A., Cal State U.-Fullerton; M.A., Ph.D., U.C.-Irvine. Formerly visiting assistant professor, U. of Nebraska-Lincoln; instructor, Cal State-Fullerton.
James M. Davis Jr. as assistant professor of English, B.A., U. of Maryland; M.A., Johns Hopkins U.; Ph.D., U. of Southern Mississippi. Formerly instructor, U. of Southern Mississippi, Allegany Community College, Cumberland, MD.

Juan Fernandez-Jimenez as assistant professor of Spanish, B.A., Escuela Normal de Jaen, Spain; M.A., Ph.D., U. of North Carolina. Formerly visiting assistant professor, North Carolina State U.

John F. Wellington as assistant professor of business, B.S., Gannon College, Erie; M.S., Lehigh U.; Ph.D., S.U.N.Y.-Buffalo. Formerly instructor, S.U.N.Y.-Buffalo; assistant professor, Gannon College.

Dana D. Anderson as instructor in psychology, B.A., Antioch College; M.A., A.B.D., Ohio State U. Formerly intern, Shands Teaching Hosp., Gainesville, FL.
John F. McDiarmid as instructor of English, B.A., Swarthmore College, M.Phil., Yale U. Formerly instructor, Southwest Texas State U.; assistant professor, St. Anselm's College, Manchester, NH.

James W. Weber as instructor of political science, B.A., Illinois State U.; M.A., U. of Kansas; Ph.D. candidate, U. of Kansas. Formerly visiting instructor, Northern Illinois U.

Capitol Campus

Harold J. Hoy as instructor of marketing, B.S., Penn State; M.B.A., U. of Hartford; Ph.D., U. of Connecticut. Formerly instructor, Central Conn. State College.

Special Events

Thursday, Oct. 11
Exhibiting "79 Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.
Religious Affairs Office, 10 part film, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.
URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Friday, Oct. 12
Penn State Press exhibit, "Best Designed Books of the Year," 9 a.m.-4 p.m., Kern Lobby.
Aeolian Chamber Players perform Schuller's "Serenata," 11 a.m., Music Bldg. Recital Hall. Free. Sponsored by IAHS.

Sports: JV football, vs. Millford Academy, 2 p.m.; soccer, vs. Maryland, 8 p.m.
Geography Dept. coffee and lecture, 3:45 p.m., Room 319 Walker. Joseph Kockelmann, philosophy, on "Critique of Scientific Reason."

Homecoming '79 Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.

Homecoming parade, 7 p.m., College Ave.; followed by **Clee Club** Collegiate Ceremony, Old Main steps, bonfire, 10 p.m., Beaver Stadium; all night vigil, midnight, Lion Shrine.

France-Cinema, *Scola, We All Loved Each Other So Much*, 7 and 9 p.m., Room 112 Kern.

Colloquy/USG/IFC, Gil Eagles discusses ESP and hypnosis, 8 p.m., Eisenhower Auditorium. Free.

Shaver's Creek Nature Center, Star Watch with John Farr, 8-9 p.m., parking lot on Rt. 26 south of State College. Cancelled if cloudy.

URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Artist Series, The Aeolian Chamber Players, 8:30 p.m., Schwab.

Saturday, Oct. 13

Sports: men's fencing, vs. Alumni, 8 a.m.; women's and men's cross country, Penn State Open, 10:30 a.m.; football, vs. Army (Homecoming), 1:30 p.m.

Homecoming Oktoberfest, Nittany Lion Inn, following football game.

Commonsplace Theatre, *Pink Floyd: Live at Pompeii*, 7, 8:30 and 10 p.m., Room 112 Kern.

Campus 4-H All-University Square Dance, 7:30 p.m., Room 312 HUB.

Penn State Glee Club, Homecoming Concert, 7:30 p.m., Eisenhower Auditorium. Free.

URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Sunday, Oct. 14

PSOC Hiking Division, "Flaming Fall Foliage Hike," Thickhead Wild Area, 9 a.m., HUB parking lot.

University Choirs Special Homecoming Chapel Service, 11 a.m., Music Bldg. Recital Hall.

Sports: soccer, vs. LaSalle, 1:30 p.m.

Shaver's Creek Nature Center, Winter Weeds Walk, 2 p.m., Stone Valley.

Commonsplace Theatre, *Pink Floyd: Live at Pompeii*, 7, 8:30 and 10 p.m., Room 112 Kern.

Opening Reception, Aaron Siskind, photographer, 7-9 p.m., Zoller Gallery.

Monday, Oct. 15

HUB Craft Center, members and instructors work accepted for Nov. show, through Oct. 17, Room 312 HUB.

Shakespeare Film, *Oliver, Hamlet*, 6:30 p.m., Room 112 Chambers. Free.

France-Cinema, *We All Loved Each Other So Much*, 7 and 9 p.m., Room 112 Kern.

Color Slide Club meeting, 7:30 p.m., Room 189 MRL.

Monday, Bedford, oboe, 8:30 p.m., Music Bldg. Recital Hall. Free.

Tuesday, Oct. 16
Deadline for reserve reading lists for Winter Term 1980, Reserve Reading Room, W 11 Pattee.

Comp. Lit. Luncheon, 12:15 p.m.; talk, 1 p.m., Hotel State College. Edwin Whitmore, specialist in African studies and a poet, Univ. of Singapore, speaks.

Sports: exhibition baseball, vs. Indiana, 2 p.m.; women's volleyball, vs. Pittsburgh, 7 p.m.; Campus Collegues, Social Hour, 4:30-6:30 p.m., Assembly Room, Nittany Lion Inn.

Archaeological Institute of America Films, 7:30 p.m., HUB Assembly Hall. "Ancient Egypt" "The Viking Ships of Roskilde," "The 100,000 Piece Jigsaw Puzzle," "Archaeology of the Grand French Battery, Yorktown, Va." Free.

GSA, Insurance Workshop, 7:30 p.m., Room 101 Kern.

Artists Series Film, Akira Kurosawa, *Dersu Uzaa* (The Hunter), 8 p.m., Schwab.

URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Beverly (Gloria Rossi) tells her ex-husband, Brian (Stephen D. Keener), and his friend, Mark (John Berg), how she got her jewelry. The three are cast in *The Shadow Box*, a Pulitzer Prize winning drama by Michael Cristoforo. The play, which drew unanimously enthusiastic reviews from the New York critics, is at the Playhouse through Oct. 20. Reservations and tickets are available at 865-1884.

Wednesday, Oct. 17

Commons Center, Weststone Run String Band.

URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Alard String Quartet, 8:30 p.m., Music Bldg. Recital Hall. Free.

Thursday, Oct. 18

Commons Videotape, "TV Quarterback," noon, Kern Lobby.

GSA, Sick Plant Clinic, 7:30 p.m., Room 101 Kern.

Religious Affairs Office, 10 part film, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.

Amnesty International Lecture, 8 p.m., Room 101 Kern. Helen Scoville, Amnesty International, Washington, D.C., speaker.

URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Friday, Oct. 19

Commonsplace Theatre, *Alice's Restaurant*, 7 and 9 p.m., Room 112 Kern.

Sports: soccer, vs. Fordham, 7:15 p.m.

Shaver's Creek Nature Center, slide program of birds of prey, "Raptors of New England," 7:30 p.m., Stone Valley.

URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Saturday, Oct. 20

Sports: women's tennis, vs. Michigan, 10 a.m.; men's cross country, vs. Auburn, St. Joseph's and Wisconsin, 11 a.m.

Artists Series, *Little Red Riding Hood*, opera for children, 10:30 a.m. and 2:30 p.m., Schwab.

France-Cinema, *Clara Corretta, The Lacemaker*, 7 and 9 p.m., Room 112 Kern.

URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Shakespeare Film, WPSX-TV, BBC's *Romeo and Juliet*, 9 p.m., Room 123 Chambers.

Sunday, Oct. 21

Sports: women's tennis, vs. Harvard, 10 a.m.

Exhibits

Chambers Gallery: Graduate and Undergraduate Students' Drawings.

HUB Galleries: Denise Faleski, recent works; Penn State Room, PSU memorabilia; LaVie exhibit, Art Alley. Rome Hanks and Mary Edith Miller, recent photographs, Browsing Gallery. Nick Webb and John Warfel, pots, The Gallery.

Kern Commons Galleries: Tsing-fang Chen, paintings; Harriet Rosenberg, mixed media; through Oct. 20; Roy Fender, "Hamburger Ceramics," opens Oct. 20.

Museum of Art: European works and 19th century American paintings, prints and drawings from the permanent collection, recent paintings and drawings by George Zoretich, through Oct. 21.

Pattee Library: Peter Gould, photographs, "Wittgenstein's Vienna," Main Lobby. Peter Greene, paintings, Lending Services Lobby.

Visual Arts Bldg. Zoller Gallery: Siskind Photographic Show, opens Oct. 14.

Seminars

Thursday, Oct. 11

Engineering Science and Mechanics, Gian Felcher, solid-state science division, Argonne National Laboratory, on "Intense Pulse Neutron Source (IPNS) in Condensed Matter Research," 4 p.m., Room 152 Hammond.

Philosophy, Donald Verene, philosophy, on "Rhetoric and Imagination: Topic and Metaphor Giambattista Vico," 4 p.m., Room 75 Willard.

Computation Center, Daniel L. Bernitt, senior research associate, on "APL (2 of 6)," 7:30 p.m., Room 108 Forum.

Monday, Oct. 15

Plant Pathology, Jaime Castano, grad. student, on "The Role of Water Loss in Etiology of Physiological Deterioration of Harvested Cassava Roots," 3:55 p.m., Room 213 Buckout.

Computation Center, Daniel L. Bernitt on "APL (3 of 6)," 7:30 p.m., Room 108 Forum.

Tuesday, Oct. 16

Chemistry and Properties of Macromolecules, A.N. Gent, polymer physics, Univ. of Akron, on "Physical and Chemical Aspects of Adhesion," 11:10 a.m., Room 333 Whitmore.

Organic/Inorganic Chemistry, Stephen Ransom, grad. student, on "NMR of Living Organisms," 12:45 p.m., Room 333 Whitmore.

Air Pollution Control, Nelson Kelly, General Motors Research Center, Warren, MI, on "Ozone Measurements at a Remote

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Geosciences, MacKenzie Keith, geochemistry emeritus, on "Cretaceous Volcanism and the Disappearance of the Dinosaurs," 3:45 p.m., Room 112 Walker.

Astronomy, Craig L. Sarazin, Univ. of Virginia, on "Beam Models for SS433," 4 p.m., Room 445 Davy.

Wednesday, Oct. 17
College of Agriculture, R.W. Richardson, retired director, The Division of Natural and Environmental Sciences, Rockefeller Foundation, on "Seeking Funds from Private and Public Foundations," 4 p.m., Room 301 Ag. Admin. Bldg.

Thursday, Oct. 18

Ceramic Science, Joseph Balsacio, Motorola, Inc., on "Growth and Characterization of Quartz Crystals," 11 a.m., Room 301 Steidle.

Chemistry, John Sinfied, Exxon Research and Engineering Co., Linden, NJ, on "The Structure of Metal Catalysts," 12:45 p.m., Room 333 Whitmore.

Physics, V. Narayanamurti, Bell Labs, on "Phonon Optics," 3:50 p.m., Room 445 Davy.

Meteorology, Robert F. Abbey, Jr., U.S. Nuclear Regulatory Commission, on "The NRC's Meteorology Research Program in Meteorology: Severe Storms and Atmospheric Dispersion," 3:55 p.m., Room 112 Walker.

Fuel Science, Norman Deno, chemistry, on "Simplicities in the Chemical Structures of Coals," 4 p.m., Room 301 Steidle.

Computation Center, Daniel L. Bernitt, on "APL (4 of 6)," 7:30 p.m., Room 108 Forum.

Friday, Oct. 19

Mathematics, Jean Pierre Serre, College de France, on "Varieties Over Finite Fields: From Weil to Deligne," 4 p.m., Room 104 McAllister.

Philosophy, Mikael Dufrenne, Univ. of Paris, on "Sublimation and Desublimation in Art," 4 p.m., Room 101 Kern.

Campus Update

Construction of the new physical education/convoocation building at the Berks Campus is ahead of schedule. The \$1.3 million building will be under roof by mid-October. Dr. Harold W. Perkins, Campus director, says the building's completion is scheduled for June 1980, and the new facility should be available for use by next fall.

An endowment fund has been established at the Fayette Campus to support projects and activities for which general funds are not available.

The initial principal of the fund, \$5,000, has been contributed by the Fayette Campus Advisory Board, according to Campus Director Hugh M. Barclay.

Expenditures from the fund may be made for, but not limited to, the following purposes: capital improvements to existing structures, improvement of Campus grounds, financial assistance to Fayette Campus students, library acquisitions, purchase of specialized instructional equipment, special projects which enhance the academic programs, and support of the arts through programs of art exhibits, professional entertainment and other cultural events.

The number of expenditures approved each year, and the amount of each, will depend on the earnings the fund generates. Expenditures will be approved by a committee consisting of the Campus Director, the Executive Committee of the Fayette Campus Advisory Board, and the Chairman of the Fayette Campus Faculty Senate.

The Aeolian Chamber Players (above) will perform selections from Brahms, Crumb and Schuller, Friday night as a part of the Artists Series. An exhibition of photographs by Aaron Siskind will open at the Zoller Gallery. Siskind's photography was influenced by the works of the abstract expressionists. "Lima 59" at right was part of an exhibit, "Homage to Franz Kline" which Siskind had at the University of Chicago in 1973.

Arts Roundup

Aeolian Chamber Players to offer Brahms, modern works

The Artists Series will present the Aeolian Chamber Players in concert at 8:30 p.m. Friday, Oct. 12, in Schwab Auditorium.

The Aeolian Chamber Players was formed in 1961 by Lewis Kaplan to preserve the rich, but rarely heard, chamber repertoire for the mixed timbres of strings and winds.

Attracted by the group's flexible instrumentation and musical excellence, such composers as Berio, Crumb, Rochberg, and Subotnick have written especially for them. The Aeolians have thus developed an extensive repertoire of traditional and contemporary works.

The members of the ensemble include its founder, Mr. Kaplan, a violinist and a member of the faculty at Juilliard School; Ronald Thomas, cello, winner of the 1974 Young Artists Auditions; Thomas Hill, clarinet, a graduate of the New England Conservatory and soloist with the Boston Symphony and the Cleveland Symphony; and Jacob Maxin, piano, a graduate of the Juilliard School, where he also taught.

The program will include "Dream Sequence" by George Crumb, Sonata-Serenata by Gunther Schuller, and Trio in A Minor, Op. 114 by Johannes Brahms.

Tickets are on sale at Eisenhower Auditorium Box Office until 4 p.m. on Oct. 12. The Schwab Auditorium Box

Office will open at 7 p.m. the evening of the performance.

Alard to present premiere of Play Quartet

The Alard Quartet will present the U.S. premiere of Play's Quartet in E Flat Major, Opus 1, Number 2 at 8:30 p.m. Wednesday, Oct. 17, in the Music Building Recital Hall.

Playel, an Austrian, was a student of Haydn. His quartet was discovered in a library in Munich by members of the Vilnius Quartet, a group of Lithuanian players, who gave it to the Alard.

Other works on the program include Ginastera's Second String Quartet and Debussy's Quartet in G Minor, Opus 10. The Alard's members, who are associate professors of music, include Joanne Zagst Feldman and Donald Hopkins, violins; Raymond Page, viola; and Leonard Feldman, cello.

Reception to be held for photographer

A reception for photographer Aaron Siskind will be held from 7 to 9 p.m. Sunday, Oct. 14, in the Zoller Gallery, where his photographs will be on display through Nov. 4.

Mr. Siskind, who began his career as a documentary photographer in the early '30s, became interested in the concept of photography as art through his acquaintance with the work of the abstract

expressionist painters. Exhibitions of his work have been held at New York's Egan Gallery and the George Eastman House in Rochester. Mr. Siskind is currently on the faculty of the Rhode Island School of Design.

Sunday's reception is free and open to the public.

Britton work featured in Bedford recital

"Six Metamorphoses After Ovid" by Benjamin Britten will be featured in a recital by oboist Monte Bedford on Monday, Oct. 15, at 8:30 p.m. in the Music Building Recital Hall.

According to Mr. Bedford, the Britten piece is "a descriptive instrumental setting for classical poetry" and the first major composition written for unaccompanied oboe.

Also on Mr. Bedford's program is the Concerto VI in B Flat Major by Francois Couperin, Sonata III by Thomas Arne and two sonatas by Domenico Scarlatti.

Mr. Bedford will perform another early piece for unaccompanied oboe, Ernst Krenek's Sonatina, followed by "Arioso" by J.H. Flocco. The "Siciliano" from the E Flat Flute Sonata by J.S. Bach is also on the program, and the recital will conclude with Alessandro Marcello's Concerto in C Minor.

Mr. Bedford will be accompanied in the recital by cellist Leonard Feldman and by harpsichordist Frances Bedford of the University of Wisconsin-Parkside.

The 80's

(Continued from page 1)

large classes. In another step toward this goal, Mechanical Engineering has received an instructional improvement grant to create various audio-visual devices necessary for communication with the growing number of students taking thermodynamics courses.

"The same job market that has brought students flocking to engineering colleges is also luring faculty away and that exacerbates our problems in handling the increased teaching load," Dean Palladino notes. "The problem is further compounded because there isn't a large pool of engineers in State College on whom we can draw for temporary instructors."

Prospective faculty members are not the only ones in engineering to desert academe for high paying jobs in the marketplace. Attracting able graduate students has become increasingly difficult, according to Dean Palladino. It's hard to convince a senior who has been offered an entry level salary of \$17,000 (or more) of the value of an advanced degree.

"Our location works against us here to some extent, too," Dean Palladino comments. "Schools in metropolitan areas can offer evening master's degree programs for engineers already in the field."

"A lack of graduate students, combined with heavier undergraduate teaching loads, hampers the research productivity of our faculty members. Bolstering graduate enrollment will be one of our priorities for the eighties."

Engineering's biggest problem during the next decade, according to Dean Palladino, will be equipment obsolescence. Much of Penn State's equipment is aging and is becoming technically obsolete. Replacement costs have soared.

"I think the College is going to have to mount a massive campaign — \$4 or \$5 million will be needed — to deal with this problem," Dean Palladino says. "One of the things we are going to try to do this year is to begin to plan how to attract more funds from industry and alumni."

What does Dean Palladino see as the major growth areas for engineering enrollments during the next decade?

"Chemical engineering is probably the fastest growing department in the College right now," he says. "When the Penn State Scholars came in last summer, we didn't select a room big enough to accommodate all the students who wanted to talk to someone about chemical engineering."

"I think we will see continued growth in industrial, mechanical and electrical engineering. Architectural and civil engineering have had big growth spurts, and they are beginning to level off. As for nuclear engineering, Penn State has one of the best university nuclear reactor facilities in the nation; we are still holding our own in enrollment, but whether we continue to grow remains to be seen. Bioengineering is another area with great potential, particularly for graduate students. Penn State's work in producing a new heart pacemaker and in developing an artificial heart has attracted worldwide attention."

One of the challenges facing society during the eighties, Dean Palladino believes, is providing academic balance in college and university curricula, not only for engineers but for students in other disciplines.

"Many students in non-engineering programs graduate as technical illiterates," he says. "Too often people who have no idea of what happens, for example, when they switch on a light, will go out and protest against the building of a new refinery or power plant."

"I think we as educators must develop programs that make educated people conversant with the systems and equipment with which they daily deal."

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt are being listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Oct. 18, 1979. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (P5-3) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

COORDINATOR, ONCOLOGY PROGRAM, Hershey. — Responsible to the Chief, Division of Oncology, for administrative details and day to day functioning of the Central Pennsylvania Oncology Program. Bachelor's degree in business administration or equivalent and one to two years' effective experience required.

SENIOR PLANNING ANALYST - OFFICE OF PLANNING AND BUDGET, University Park. — Responsible to the Associate Director for Planning and Research. Position involves developing, conducting and monitoring planning and analytical studies, representing the Office of Planning and Budget on University-wide committees, and performing such other staff functions as may be requested by the Director or Associate Director of the Office of Planning and Budget and the senior executives of the University. Requirements include a master's degree or equivalent in higher education or other educational field, business administration, public administration, economics, or related field, and from two to three years of effective experience in higher education or corporate

planning activity. Earned doctorate or equivalent and from one to two years of effective experience are preferred. Special consideration will be given to candidates with a graduate degree in one of the disciplines and with experience as a faculty member in a university. THIS IS A REANNOUNCEMENT OF AN EARLIER POSITION VACANCY ANNOUNCEMENT. APPLICANTS WHO HAVE EXPRESSED INTEREST IN THE EARLIER ANNOUNCEMENT NEED NOT REAPPLY.

PLANNING ANALYST - OFFICE OF PLANNING AND BUDGET, University Park. — Responsible to the Associate Director for Planning and Research. Position involves the development and execution of research and/or planning studies, conducting extensive research of pertinent literature, and participation in developing recommendations on strategic policy planning issues as they affect the University. Bachelor's degree or equivalent in higher education or other educational field, business administration, economics, public administration, sociology, political science, or related field, and from two to three years of effective experience in policy, research, and planning activities in higher education or business and industry are required. Master's degree or equivalent and from one to two years of effective experience are preferred. Special consideration will be given to candidates with experience in institutional research and both a conceptual and working knowledge of statistical applications. THIS IS A REANNOUNCEMENT OF AN EARLIER POSITION VACANCY ANNOUNCEMENT. APPLICANTS WHO HAVE EXPRESSED INTEREST IN THE EARLIER ANNOUNCEMENT NEED NOT REAPPLY.

The University annually receives grants for projects designed to fulfill specific research responsibilities.

Often the research grant or project is of

relatively short or temporary duration. In most instances, University project administrators must react quickly in making selections of support staff personnel for their projects. Therefore, it is desirable to have an available pool of faculty and staff members who are interested in applying for such research support staff positions.

This announcement is made so that qualified individuals may make their interests known. The types of temporary research support staff positions typically available are: Senior Project Associate, Project Associate, Project Assistant, Senior Research Technologist, Research Technologist and Research Technician.

The types of discipline backgrounds required vary depending on the projects involved. They may include physics, engineering, agriculture, mathematics, and chemistry, but are not limited to these areas.

If you apply, your name will be placed in the pool of candidates that will be considered as such opportunities arise. An announcement similar to this will be made each six months.

If you feel that you are interested in and have background related to typical University research projects, you may apply now or in the future for such temporary research support staff positions by calling the University's Employment Div., 865-1387 (network 475-1387).

Penn State Intercom

News in Brief

MIT psychohistorian to visit Oct. 22-23

Bruce Mazlish, historian and the author of several books combining psychoanalytical and historical perspectives, will visit the University for two days of lectures and seminars on Monday and Tuesday, Oct. 22 and 23.

Dr. Mazlish is the author of recent major studies of Henry Kissinger, James and John Stuart Mill and Richard Nixon. A new book, *Jimmy Carter: A Character Portrait*, is scheduled for publication in January.

At 8 p.m. on Oct. 22, he will address the Religious Studies Colloquium in Room 101 Kern Bldg. on the topic, "The Narcissistic Character of our Time." Following a 12:15 p.m. luncheon at the Hotel State College on Oct. 23, he will speak at 1 p.m. on "Freud and Biography."

At 3:45 p.m. on Oct. 23, he will address the History Colloquium on "The Uses and Abuses of Psychohistory: Kissinger and Carter" in Room 101 Kern Bldg. All three programs are free and open to the public.

Dr. Mazlish is professor of history and head of the Humanities Department at the Massachusetts Institute of Technology. He previously served on the faculties of Columbia University and the University of Maine, and was director of the American School in Madrid.

A Fellow of the American Academy of Arts and Sciences, he was a visiting member of the Institute for Advanced Study in Princeton in 1972-73. He has also been a consultant to the American Psychiatric Association's Task Force on Psychohistory.

In 1960 he co-authored *The Western Intellectual Tradition* with Jacob Bronowski.

His visit to the University is sponsored by the Episcopal Ministry at Penn State, Lutheran Student Parish, Penn State Catholic Center, United Ministry at Penn State, Office of Religious Affairs, Department of Religious Studies, Department of History and Institute for the Arts and Humanistic Studies.

Mathematician to offer Chemerda lecture series

Mathematician Mark Kac, a member of the National Academy of Sciences, will offer the second annual John M. Chemerda Lectures in Science from Oct. 29 through Nov. 1.

Each of Dr. Kac's four public lectures will be presented at 4 p.m. in Room 333 Whitmore Laboratory. His topics will be "When is Random Random? I and II" and "Probabilistic Aspects of Some Problems: Mathematics and Mathematical Physics I and II."

The lectures are sponsored by the College of Science. Dr. Kac, who is professor of mathematics at the Rockefeller University, is an authority on probability theory and on its relation with mathematical analysis and physics. As a speaker, he is noted for his effective and sometimes dramatic presentation of the relationships between mathematics and the applied sciences.

He has published more than 150 articles, monographs and books on probability theory, mathematical analysis, and statistical physics, including the well known volume, *Probability and Related*

After 29 years at Penn State, tree surgeon Joseph Gardner has been around long enough to begin taking down some of the trees he planted.

Topics of Physical Sciences.

He has been the recipient of numerous professional honors and awards, including the 1950 and 1968 Chauvenet Prizes of the Mathematical Association of America. In 1976 he received the Jurzykowski Foundation Award in Science and in 1978 the Birkhoff Prize of the American Mathematical Society and the Society for Industrial and Applied Mathematics. He is a member of the American Academy of Arts and Sciences, the American Philosophical Society and the Royal Norwegian Academy of Science.

The Chemerda Lectures are named in honor of John M. Chemerda '35 and are supported by a grant from Dr. Chemerda's former employer, Merck & Co., Inc., in recognition of Dr. Chemerda's research contributions to the company.

Bloodmobile at HUB

The Bloodmobile will be at the HUB Ballroom from 10 a.m. to 4 p.m. on Tuesday and Wednesday, Oct. 23-24.

Comparative economics to be discussed by two speakers

The Department of Economics will bring two distinguished speakers to the University next week as part of its public lecture series on comparative economic systems.

Prof. Alec Nove, head of the Department of International Economic Studies at the University of Glasgow, Scotland, will speak on "Soviet Economic Reforms" at 7:30 p.m. Monday, Oct. 22, in Room 115 Electrical Engineering West. Prof. Nove is editor of *Soviet Studies* and the author of *The Soviet Economic System*, *The Soviet Economy*, and numerous studies on Soviet economics. His lecture is being co-sponsored by the Slavic and Soviet Language and Area Center.

Prof. Eugene Zaleski, of the University of Paris and a member of the Centre Nationale de la Recherche Scientifique, will speak on "Disturbances in the Soviet Economy: From Stalin to Brezhnev" at 7:30 p.m. Thursday, Oct. 25, in Room 101

Kern Graduate Building. Prof. Zaleski, editor of the journal, *Comparative Economics*, is the author of several books on the Soviet economy.

Save bumper stickers

Faculty and staff members who trade vehicles can save \$10 by returning all the fragments of their University parking bumper stickers or permits to their parking representatives.

If complete remnants are not returned, a \$10 fee must be charged for the issuance of replacement stickers, according to Allan Derzak, University parking coordinator. Automobile dealers in the area are aware that remnants are needed, and most have tools that will remove bumper stickers easily.

Aging is Colloquium topic

Interested faculty and graduate students are invited to participate in a colloquium (Continued on page 2)

The Challenge of the '80s

Editor's Note: This article is the fifth in a series in which the academic deans reflect on what lies ahead for their colleges in the '80s.

One of the students currently enrolled in the College of Engineering came to Penn State because he also wanted to study violin.

Arts and Architecture Dean Walter H. Walters likes to point to him as a symbol of what lies ahead for the arts.

"Our public universities are currently providing some of the best training and experiences available in the arts today," he says. "While there are perhaps four or five outstanding conservatories devoted to the arts in this country, only the public universities can offer a real breadth of educational experiences at a time when it is so important in the student's development. Many people feel that with energy

shortages and inflation looming large in our future, funding for the arts will be the first thing to be cut. I don't see it that way. We at Penn State are fortunate because the arts are in the mainstream here. I know it's a cliché, but we are educating the government, the civic, the educational and business leaders of the future. We enroll more than 26,000 students a year in our general arts and service courses, and I think we are building an arts constituency that is going to help us in the future."

The future of the service aspect of the College's teaching load does indeed seem bright. The new baccalaureate degree requirements established by the University

Penn Staters

Dr. Barton Hodes has been appointed as professor and chief of ophthalmology in the College of Medicine. Formerly an associate professor at the Northwestern University Medical School, Dr. Hodes earned his B.A. in anthropology from the University of Pennsylvania and his M.D. from Jefferson Medical College. He served his internship at Evanston (Illinois) Hospital and completed residency training at Jefferson.

Provost Edward D. Eddy was re-elected to the Board of Directors of the Pittsburgh Symphony Society at the annual meeting Oct. 17. Dr. Eddy has served on the board for 18 years. This re-election marks his seventh consecutive three-year term. Dr. Eddy is also a member of the Advisory Board for the Pittsburgh Public Theatre and a member of the Board of Directors of the Pittsburgh Chamber Music Society.

Dr. Joseph W. Michels, professor of anthropology, and Lorraine T. Kapitanioff, assistant professor of Russian, have collaborated in a translation of the book *Axum* from Russian into English. The 348 page volume has just been published by The Pennsylvania State University Press.

Yuri M. Kobishchanov, the Soviet author of the book, worked closely with Dr. Michels and Prof. Kapitanioff in their respective capacities as editor and translator, supplying much new material for this expanded and revised edition. The book is now the most up-to-date and authoritative work available in any language on the history and culture of the Axumite civilization of highland Ethiopia.

The Axumites played a major role in trade between the classical world of the Mediterranean and countries bordering the Red Sea and the Indian Ocean. With its origins in the civilization of South Arabia, the Axumite Kingdom evolved by the fourth century A.D. into one of the most powerful states in contact with the classical world. It took a thousand years for the Axumite Kingdom to run its course, and it profoundly affected the more recent history of Ethiopia.

Kobishchanov covers such major topics as political history, political and economic organization, ideology, and the social system.

The author has added an appendix to the original book which critically discusses the documentary sources available to Axumite scholars. Another special feature of the volume is Dr. Michels' introductory essay on Axumite archaeology, which not only summarizes 75 years of excavations but also reports upon recent efforts at archaeological interpretation.

E. Lynn Miller, associate professor of landscape architecture, has been awarded the Bradford Williams Medal by the American Society of Landscape Architects. Two such awards are given each year for articles published in *Landscape Architecture Magazine*. Prof. Miller's article, "Homesteading 'DR'-Style at Arthurdale, W. Va.," appeared in the September 1978 issue.

Raniero Corbelli, professor and head of the Department of Architecture, has been appointed chairman of the Task Force on Professional Education of the National Council of Architectural Registration Boards. He is one of five council members on the committee who represent major geographical areas in the United States.

Dr. B. Lakshminarayana, professor of aerospace engineering, has been appointed as an associate editor of the *Journal of Fluids Engineering*, ASME Transactions.

25-year chair

A husband-wife team, Carl M. and Doris N. Smith of Rebersburg, are soon to mark their 25th anniversary as University employees.

Two-child family — the Smiths.

Mrs. Smith works in Old Main as a Centralized Copy Center operator for Printing Services, operating a Multilith press, collator, copy machine and photo reducer. She began her employment at Penn State on Oct. 25, 1954, as a janitress in Pattee Library. In 1958 she transferred to Housing and Food Services as a maid in Simmons and Thompson residence halls. In 1962, she began working with Printing Services.

Mr. Smith is a storeroom clerk stock selector for the Purchasing Dept. of General Stores, where he fills incoming orders for University departments and the Commonwealth Campuses. He joined the Physical Plant staff on Nov. 1, 1954, working as a janitor in Rec. Hall. In 1959, he assumed his present position at General Stores.

The Smiths have two sons, Steve and Wayne, the latter employed by the University as an audio/visual repair technician in Willard Building. They also have five grandchildren.

Retirements

Jay H. Runkle, a laboratory animal caretaker for the Department of Veterinary Science, retired from the University on Oct. 1 with 33 years of service.

Mr. Runkle joined the University on April 1, 1964, working as a cattle herdsman in the Department of Dairy Production. He later became a swine herdsman, and moved to the Department of Veterinary Science in 1953.

His career interests extend to his private life. He and his wife, Anna, reside on a 147-acre farm near Spring Mills, where they raise prize lambs, cattle and swine and show them at county fairs throughout the State.

The Runkles have a daughter, Sara Anne, and a son, Tom, who is employed in data processing at Shields Building. Mr. Runkle plans to devote more time to his farm, which he operates in partnership with his son.

William F. Shawley had acquired 21 years of service to the University when he retired

as a maintenance worker in the Office of Physical Plant on Sept. 8.

Mr. Shawley began working at Penn State in 1958 as a pool attendant for the College of Health, Physical Education and Recreation. He worked in Physical Plant for 12 years, beginning in 1967. His job titles there included janitor, floor waxer, janitorial worker and finally maintenance worker.

He and his wife, Savilla, live in Bellefonte.

Kathryn M. Matis retired Sept. 15 from her position as a food preparer in Housing and Food Services.

In 1954, Mrs. Matis began her University career as a counter woman in Simmons Hall. She worked as an early cook/assistant cook at Redifer and Warnock Dining Halls before assuming the position of food preparer at Pollock Dining Hall in 1969.

Mrs. Matis and her husband, Michael, presently reside in Bellefonte. They have three sons, Michael, Richard and Joseph, and seven grandchildren.

Frederick Kissingner ended his University career last month when he retired from his job as maintenance mechanic.

On Dec. 16, 1963, Mr. Kissingner began working at Berks Campus as a janitor. Six years later he assumed the title of

News in brief

(Continued from page 1)

on the history of aging and the history of gerontology, to be held Friday and Saturday, Oct. 19-20, in Room 305 HUB.

Co-sponsored by the Gerontology Center, the Division of Individual and Family Studies and the Office of Continuing Education, the colloquium has been organized by Dr. Michel Philibert, professor of philosophy and director of the Multidisciplinary Gerontology Center at the University of Grenoble, France, and a visiting professor of human development at Penn State.

Sessions on Friday will be devoted to a brainstorming session on the history of aging, and epistemological considerations on history and future developments in the experience and the study of aging. Saturday's two sessions are: the history of gerontology and the feasibility of developing a course of study and guidebook on the subject, and new methods for future study in human development and aging.

For further information call Dr. Daniel J. Logo or Dr. Joseph H. Britton at 865-1717, or Prof. Philibert at 865-1447.

Pioneer festival on Oct. 21

Frontier foods, demonstrations of pioneer skills and folk music will highlight the fourth annual Pioneer Crafts Festival, sponsored by the Shaver's Creek Nature Center at the Stone Valley Recreation Area Sunday, Oct. 21, from 1 p.m. to 5 p.m.

Basketry, spinning, weaving, blacksmithing, leather tooling and natural dyeing will be among the crafts demonstrated by Nature Center personnel and local craftsmen in authentic pioneer costumes.

Many types of pioneer foods will be for sale, and visitors to the festival will be encouraged to participate in crafts and will be permitted to keep anything they make.

A special children's section will include baking demonstrations, cornhusk doll making and games. A hay ride also is planned.

The Interludia Dance Group will give a folk dance demonstration during the afternoon. Also scheduled is a demonstration of antique cameras. A photographer will take formal portraits of visitors in old-fashioned clothing, which will be provided.

Admission to the festival is 50 cents per person, but the maximum charge per car will be \$1.50, and in an effort to encourage car pooling, cars with more than four riders will be admitted free.

custodian, and in 1972 took on the responsibilities of maintenance mechanic. Mr. Kissingner is a Womelsdorf, PA resident.

George R. Thomas retired Oct. 1 from his position as a letterpress printer in Business Services after working there for 13 years.

Mr. Thomas worked as a printer for the Centre Democrat and the Somerset American before joining Penn State in 1963. His first three years at the University were spent as a cutting machine operator in General Services. As a printer, he set type and operated presses, producing tickets, business cards, envelopes and stationery for the University.

Mr. Thomas and his wife, Myrtle, live in Bellefonte. They have one daughter, Connie, and four grandchildren.

John E. Berkeheimer, a group leader, carpenter at the Hershey Mechanical Center, will retire Oct. 27. He has been employed at the University since Aug. 18, 1969.

Obituary

Harry A. Eshbaugh, a maintenance worker with the Office of Physical Plant when he retired in 1970, died Sept. 28. Mr. Eshbaugh began employment with the University in 1966. He was 74 years of age at his death.

Camus film, 'Bahia,' at Kern

The Comparative Literature Film Series will present the Marcel Camus film, *Bahia*, at 7 and 9 p.m. on Tuesday and Wednesday, Oct. 23-24, in Room 112 Kern Building.

Camus, who directed the award-winning *Black Orpheus*, wrote the script for the film with Jorge Amado. *Bahia* is based on Amado's novel, *Shepherds of the Night*. Set against a backdrop combining voodoo-related folk religion and Christianity, the film tells the story of the love of a young prostitute for Martin, chief "street-hustler" in Mata Gato.

Mail orders being taken for Johnny Cash concerts

Mail orders are being taken for two concerts by country singer Johnny Cash, sponsored by the Artists Series, Saturday, Nov. 17, in Eisenhower Auditorium. Cash will perform at 7:15 and 9:30 p.m.

Cash has sold more than 50 million records and composed some 1,000 songs. He has won 4 Grammys and 4 Country Music Awards. Gardner Webb College in North Carolina has presented him with a Doctorate of Humanities degree, and he has received the Faith in America Award of the Religious Heritage of America, Inc. and a Doctorate of Humane Letters from National University in San Diego.

Tickets may be ordered by sending a check, made payable to The Pennsylvania State University, to the Penn State Artists Series, P.O. Box 8000, University Park, PA 16802. A stamped, self-addressed envelope should be enclosed. Ticket prices are \$8 for Section 1 and \$7 for Section 2.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Special Events

Thursday, Oct. 18

GSA, Slick Plant Clinic, 7:30 p.m., Room 101 Kern.

Religious Affairs, 10 part film, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.

URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Friday, Oct. 19

Open House to see new nursing facilities, 1-5 p.m., Human Development East, Commonsplace Theatre, *Alice's Restaurant*, 7 and 9 p.m., Room 112 Kern.

Sports: soccer, vs. Fordham, 7:15 p.m. Interlinda, Polish Dance Workshop with Ada Djezwatowska, 7:30 p.m.-through Sunday noon, Walnut Bldg.

Shaver's Creek Nature Center, slide program of birds of prey, "Raptors of New England," 7:30 p.m., Stone Valley.

URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Saturday, Oct. 20

Sports: women's tennis, vs. Michigan, 10 a.m.; men's cross country, vs. Auburn, 11 a.m. Joseph's and Wisconsin, 11 a.m.

Artists Series, *Little Red Riding Hood*, opera for children, 10:30 a.m. and 2:30 p.m., Schwab.

France-Cinema, Claude Corretta, *The Lacemaker*, 7 and 9 p.m., Room 112 Kern URTC, *The Shadow Box*, 8 p.m., The Playhouse.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium, Free.

Shakespeare Film, WPSX-TV, BBC's *Romeo and Juliet*, 9 p.m., Room 123 Chambers.

Sunday, Oct. 21

Sports: women's tennis, vs. Harvard, 10 a.m.; lacrosse, Penn State Fall Invitational, 11 a.m. University Chapel Service, 11 a.m., Eisenhower Chapel. The Reverend Dr. Derald Stump, PSU Episcopal Ministry, speaker.

Shaver's Creek Nature Center, Pioneer Crafts Festival, 1-5 p.m., Stone Valley.

Commonsplace Theatre, *Alice's Restaurant*, 7 and 9 p.m., Room 112 Kern.

Monday, Oct. 22

Last date for November grads to deliver theses to Graduate School.

Last date for Departments to certify to Graduate School completion of required papers for November grads.

First day to sign Winter Term NDLS and University Long Term Loans, Room 108 Shields.

France-Cinema, *The Lacemaker*, 7 and 9 p.m., Room 112 Kern.

Comparative Systems lecture series, 7:30 p.m., Room 115 EE West, Ale Nové, international economic studies, Univ. of Glasgow, on "Soviet Economic Reforms."

Colloquy Lecture, 8 p.m., Eisenhower Auditorium. Vincent Bugliosi, attorney and author of *Helter Skelter*, speaker.

Tuesday, Oct. 23

Bloodmobile, 10 a.m.-4 p.m., HUB Ballroom. Comp. Lit. Luncheon, 12:15; talk 1 p.m., Hotel State College. Bruce Mazlish, MIT, on "Freud and Biography."

Sports: field hockey, vs. Cortland, 2:30 p.m.; soccer, vs. Pittsburgh, 7:15 p.m.

College of Agriculture Faculty meeting, 4 p.m., Room 301 Ag. Admin. Bldg.

Comp. Lit. Film Series, Marcel Camus, *Bahia*, 7 and 9 p.m., Room 112 Kern.

Colloquy, Dick Gregory, speaker, 8 p.m., Eisenhower Auditorium.

English Colloquium, 8 p.m., Room 101 Kern.

Thomas Rogers, English, reads from his new novel.

Wednesday, Oct. 24

Bloodmobile, 10 a.m.-4 p.m., HUB Ballroom. Commons Concert, Allegheny String Band, noon, Kern Lobby.

STS/Two Cultures Dialogue on "Technology Assessment and Risk Analysis," lunch, noon; presentation and discussion, 12:20 p.m., Room 101 Kern. Frank Clemente, sociology, on "Factors in Determining How Safe is Safe Enough."

Comp. Lit. Film Series, *Bahia*, 7 and 9 p.m., Room 112 Kern.

Musicia Camera, 8:30 p.m., Music Bldg.

Rectal Hall, Free.

Thursday, Oct. 25

Commons Videotape, "TV Quarterbacks," noon, Kern Lobby.

Comparative Systems lecture series, 7:30 p.m., Room 101 Kern. Eugene Zaleski, Univ. of Paris, on "Soviet Economic Disturbances: From Stalin to Brezhnev."

GSA, Silk Screening Workshop, 7:30 p.m., Room 102 Kern.

Religious Affairs, 10 part film, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.

Penn State Thespians, George Firth/Stephen Sondheim, *Company*, 8:30 p.m., Schwab.

Friday, Oct. 26

Sports: JV football, vs. Wesley Jr. College, 2 p.m.

Geography Dept. coffee and lecture, 3:45 p.m., Room 319 Walnut. Heinz Henrich, history of photography, on "Early Photography in Eastern Europe."

PSOC Hiking Division, all night vigil on Mount Nittany for the Great Pumpkin, through Saturday.

France-Cinema, *Sweet Away*, 7 and 9 p.m., Room 112 Kern.

Barbara Thompson, organ, 8:30 p.m., Music Bldg, Rectal Hall, Free.

Penn State Thespians, *Company*, 8:30 p.m., Schwab.

Saturday, Oct. 27

Sports: football, vs. West Virginia, 1:30 p.m.

France-Cinema, *Sweet Away*, 7 and 9 p.m., Room 122 Music Bldg, Rectal Hall.

GSA, Commons Halloween Party, 8 p.m., Room 102 Kern.

Artists Series, Dresden State Orchestra, 8:30 p.m., Eisenhower Auditorium.

Penn State Thespians, *Company*, 8:30 p.m., Schwab.

Sunday, Oct. 28

University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Ernest H. Freund, philosophy emeritus and Friends Meeting of State College, speaker.

Karen Ekenroth, soprano, 2:30 p.m., Music Bldg, Rectal Hall, Free.

France-Cinema, *Sweet Away*, 7 and 9 p.m., Room 101 Kern.

Seminars

Thursday, Oct. 18

Computer Science, Nick Pippenger, IBM Watson Research Center, Yorktown

Heights, NY, on "On Simultaneous Resource Bonds," 4 p.m., Room 325 Whitmore (new listing).

Computation Center, Daniel L. Bernitt, senior research associate, on "APL (4 of 6)," 7:30 p.m., Room 108 Forum.

Friday, Oct. 19

Computer Science, Sheila A. Greibach, Univ. of California, Los Angeles, on "The Equivalence Problem for 2-Tape Deterministic Finite State Acceptors," 11 a.m., Room 325 Whitmore.

Analytical Chemistry, George Strojek, Ohio State Univ., on "Infrared Attenuated Total Reflectance Studies of the Solid-Liquid Interface," 11:10 a.m., Room 333 Whitmore. History of Aging and Gerontology.

"Brainstorming on the History of Aging," 2 p.m., Room 305 HUB. Michel Philibert, visiting professor of human development, on "Epistemological Considerations on Past History and Future Developments in the Experience and the Study of Aging," 8 p.m., Room 305 HUB.

Computer Science, Jack W. Carlyle, Univ. of California, Los Angeles, on "Grammars for Parallel Development on Maps and Graphs," 4 p.m., Room 325 Whitmore. Mathematics, Jean Pierre Serre, College de France, on "Varieties Over Finite Fields: From Weil to Deligne," 4 p.m., Room 104 McAllister.

Philosophy, Mikel Dufrenoy, Univ. of Paris, on "Sublimation and Desublimation in Art," 4 p.m., Room 101 Kern.

Saturday, Oct. 20

History of Aging and Gerontology, "History of Gerontology and the Feasibility of Developing a Course of Study and Guidebook on the Subject," a working session, 9 a.m.; "New Methods for Future Study in Human Development and Aging," a working session, 1 p.m., both Room 305 HUB.

Monday, Oct. 22

Plant Pathology, Christine Stockwell, grad student, on "Salinity Stress: The Role of Tissue Culture in Selection of Tolerant Plant Material," 3:55 p.m., Room 213 Buckhout. Biology/Ecology, George Estabrook, botany, Univ. of Michigan, on "The Compatibility of Hypotheses of Evolutionary Relationship," 4 p.m., Room 140 Fenske.

Religious Studies, Bruce Mazlish, MIT, on "The Narcissistic Character of Our Time," 8 p.m., Room 101 Kern.

Suites for nursing program faculty in the new Human Development East Building consist of a research workroom area where (foreground, left to right) Dr. Joan M. Rinchart, Dr. Laurie M. Gunter and Dr. Lois K. Waters discuss a project. In adjoining private offices (background, left to right) are Dr. Ruth O'Brien and Dr. Margaret P. Mandrillo.

Human Development East open house Oct. 19

The University community is invited to attend an open house in the new Human Development East building — which houses the expanded facilities of the Nursing Program — from 1 to 5 p.m. Friday, Oct. 19.

"The building reflects the program's philosophy of nursing and the role of nursing education — a strong commitment to both practice and research, as well as teaching, with an emphasis on health," says Dr. Janet A. Williamson, Nursing Program head.

A unique feature is the Nursing Consultation Center, occupying the entire first floor. The center contains lounge facilities for the older adult, rooms for infant and child health care, consultation rooms for individuals and families, observation and testing rooms, a wet lab, and space for research projects.

The building also houses the College's computer suite and the offices of the Dean for Continuing Education and Commonwealth Campuses.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Tuesday, Oct. 23

ARL, Arthur Goldschmidt, history and Middle East Studies Committee, on "The Contemporary Middle East: An Update," 10:45 a.m., Walker Conference Room, Applied Science Bldg.

Biology/Ecology, George F. Estabrook, botany, Univ. of Michigan, on "Vegetation of the Chapada dos Veadeiros of Central Brazil," 11 a.m., Room 2 S Freer.

Organic/Inorganic Chemistry, Philip Kasprzyk, grad student, on "Mechanism Based Inactivation of Transaminases, Suicide Substrates," 12:45 a.m., Room 333 Whitmore.

Air Pollution Control, Thomas T. Warner, meteorology, on "Atmospheric Transport and Dispersion of Air Pollutants," 2:20 p.m., Room 140 Fenske.

Math Logic, Michael Jamieson, mathematics, on "A Partition Property of \mathbb{N}_1 ," 2:20 p.m., Room 106 McAllister.

History, Bruce Mazlish, MIT, on "The Uses and Abuses of Psychohistory: Kissinger and Carter," 3:30 p.m., Room 101 Kern.

Astronomy, Henry L. Shipman, Univ. of Delaware, on "White Dwarfs," 4 p.m., Room 445 Davey.

Organic/Inorganic, Richard Eisenberg, Univ. of Rochester, on "Homogeneous Catalysis and Activation of C-H Bonds," 8 p.m., Room 333 Whitmore.

Wednesday, Oct. 24

College of Agriculture, Dale E. Baker, agronomy, Hays B. Gamble, land and water resources, Stuart Patton, Evan Pugh Research Professor, Samuel H. Smith, plant pathology, on "The Success and Professional Consequences of Seeking and Obtaining Funds," 4 p.m., Room 301 Ag. Admin. Bldg.

Thursday, Oct. 25

Ceramic Science, Arnulf Muan, geochemistry, on "Mineralogy, Ceramics and Refractories," 11 a.m., Room 301 Steidle. Chemistry, Jacob Schaffer, Monomani, St. Louis, on "High Resolution NMR Studies of Solids — 'N Studies of Metalloids,'" 12:45 p.m., Room 333 Whitmore.

Physics, Leonard Mandel, Univ. of Rochester, on "Photon Antibunching," 3:50 p.m., Room 445 Davey.

Meteorology, Hans A. Panofsky, Evan Pugh Professor of Meteorology, on "Treats to the Ozone Layer: A Progress Report," 3:55 p.m., Room 112 Walker.

Mathematics, J. Lehner, Univ. of Pittsburgh, on "Automorphic Functions and Discrete Groups," 4 p.m., Room 102 McAllister.

Friday, Oct. 26

Analytical Chemistry, Karey Holland on "Liquid Chromatography/Electrochemical Detection of Lactate and Lactate Dehydrogenase," 11:10 a.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: Graduate and Undergraduate Students' Drawings.

HUB Galleries: Penn State Room, PSU memorabilia; LaVie exhibit; Denise Faleski, recent works, through Oct. 27, Art Alley.

Rome Hanks and Mary Edith Miller, recent photographs, through Oct. 28, Browning Gallery. Nick Webb and John Warfel, pots, through Oct. 27, The Gallery.

Kern Commons Galleries: Tsing Fang Chen, paintings, through Oct. 27; Harriet Rosenberg, mixed media, through Oct. 20; Roy Fendler, "Hamburger Memories," opens Oct. 20; prints and papermaking by BFA and MFA candidates and United Nations Assoc. "Year of the Child" exhibit, both open Oct. 27.

Museum of Art: European works and 19th century American paintings, prints and drawings from the permanent collection; recent paintings and drawings by George Zoretich, through Oct. 21.

Pattee Library: Peter Gould, photographs, "Witgenstein's View," Main Lobby.

Cherry King, paintings, Lending Services Lobby; Peter Greene, paintings, prints and drawings, East Corridor Gallery.

Visual Arts Bldg. Zoller Gallery: Siskind Photographic Show.

The '80s

(Continued from page 1)

Faculty Senate (BDR III) require students to take six credits in the arts — the previous requirement was six credits in arts and humanities.

"It's high time," Dean Walters says, "to present the arts on a level with our other great humanistic, scientific and social programs. There will, of course, always be people who want to be professional in their field, either as historian-theoreticians or as performers, planners or designers, and we will have to provide instruction, experience and internships for them. But during the next decade, we have to give a large share of our attention to the needs and interests of the general student. We've worked hard to establish the concept of the arts as a part of daily life, and now it's our turn to meet that need."

But if more and more students can be expected to express an interest in arts education as consumers, enrollments in Arts and Architecture majors will probably continue in a steady state. This picture is projected nationally as well, according to a report prepared by the Fine Arts Commission (which Dean Walters chairs) of the National Association of State Universities and Land-Grant Colleges (NASULGC).

Among the more than 1,500 majors currently enrolled in A&A, those in architecture and landscape architecture count themselves lucky to be there. Last year the Department of Architecture sifted through some 700 applications for 65 openings. Because Penn State has the only undergraduate program in landscape architecture in the Commonwealth — there are only about 35 in the country — that Department also does not lack for students.

"In terms of job opportunities," Dean Walters notes, "landscape architecture is one of the top 20 professions in the nation."

Students who plan careers as professionals in theatre, art or music usually don't choose them because they're interested in job security. "We try to make

"... success in the arts is based on competition ..."

it quite clear to our students that success in the arts is based on competition," Dean Walters continues, "and I think that they understand that their future depends on their abilities."

The combining of the Departments of Art and Art Education into the School of Visual Arts and of Music and Music Education into the School of Music will present these areas with new opportunities in the '80s, according to Dean Walters.

"Music and art educators are in a good position to build on previous achievements," he points out. "I think society will ask of universities that, rather than concentrating solely on the training of young people, they extend their influence beyond their traditional spheres of influence to encompass the teaching of adults."

"Music is already doing this to some extent by making available very specific instruction — a continuing education program on how to produce a high school musical, for example, or a summer program for string players."

"Continuing education courses can also be developed in architecture and landscape

architecture to keep graduates in touch with new developments in their professions. The appointment of a PENNTAP representative in the Department of Architecture, for example, will extend architectural design services throughout the state.

Another promising program prospect for the next decade, both at Penn State and its sister NASULGC institutions, is arts therapy, the application of the arts in the service of the hospitalized, the aged, or the physically or mentally handicapped. Museology is a rapidly growing field, and, abetted by the national sentiment for conservation, so is historic preservation. The University has also moved to meet a growing demand for arts administrators by developing programs for them in conjunction with the College of Business Administration.

At the same time that universities are creating new programs to produce participants in and enthusiasts for the arts, they are also supplying a continuous live audience.

"The professionals in the arts — in theatre, music and dance — would be in deep trouble," Dean Walters points out, "if they only had a New York season. We in the universities provide crucial support through such operations as our Artists Series and Nittany Mountain Summer. Performers need both the experience and revenues these tours of the university circuit yield."

The role of the public universities in support of the arts — "the best network of cultural centers in the country," Dean Walters calls them — received government recognition this year. Partly at the urging of the land-grant fine arts deans, a post was created to provide liaison between the U.S. Office of Education and the National Endowment for the Arts.

Even though funding problems will always be endemic to the arts, Dean Walters believes that the move toward greater regional participation will continue. "New York is the summit, the model where critical standards are set," he says. "But the population of this country is becoming so sophisticated that it will not

"The population of this country ... will not put up with shoddy work."

put up with shoddy work. I would encourage professionalism in the arts regionally wherever it can be supported."

"We are proud at Penn State to be a part of this growth in regionalism. Our Museum of Art, which is still in its first decade of life, has brought the resources of a professional art museum to not only the campus, but also the whole of Central Pennsylvania. We are hoping for a similar regional service through our newly formed University Resident Theatre Company, which has just been established this fall and will give the area a year-round professional theatre."

Dean Walters calls attention to a Fine Arts Commission report of a recent Louis Harris poll showing that six of every 10 persons 16 years of age and over attend arts events; that 86 percent of those surveyed want arts events made available in all parts of the country; and that a majority favor increased federal, state and local support for the arts.

"I think the outlook for the arts — in the nation and in our universities — is healthy," Dean Walters concludes.

Ag seeking associate dean

The Dean of the College of Agriculture has announced the formation of a Search Committee for the position of Associate Dean of Resident Instruction.

The primary responsibility of the Associate Dean is to administer the academic programs of the College and to provide leadership and administrative support to the faculty of the College may pursue their teaching and advising/counseling responsibilities effectively and efficiently.

Further responsibilities include interfacing with faculty and students in the University system, as well as with alumni, agri-business, and other interests within the Commonwealth. Candidates must have an earned doctorate in an agricultural or closely related discipline; and must have academic administrative experience, or have demonstrated this potential, within a land-grant university.

Both nominations and applications are welcome. Nominations should include a brief statement about the nominee's accomplishments and qualifications. Applicants must submit a resume and names and addresses of three references. Send data to Dr. Howard W. Thiele, Chairman, Search Committee, Room 201B Agricultural Administration Building.

Closing date for applications is Dec. 1, 1979, or until a qualified candidate is selected. Position will become available July 1, 1980.

Arts Roundup

French horn player to appear with orchestra

French horn player Christopher Callahan will be the soloist in a concert by the Penn State University Symphony Orchestra Saturday, Oct. 20, at 8:30 p.m. in Eisenhower Auditorium.

The 63-member orchestra is conducted by Dr. D. Douglas Miller, associate

Staff Vacancies

The following vacancies for positions classified as staff except for staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m. Oct. 25, 1979. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

SYSTEMS PROGRAMMER — MANAGEMENT SERVICES, University Park — Responsible for documentation of software and hardware and interfacing with application programmers and operations on programming and operational problems. Systems Programmer needed for MVS with JES2 shop. Other systems including TSO, ROSCOE, CICS, VTAM, and NCP. Working knowledge of BAL is also desired. Experience in

supporting any of the above software would be helpful. Experience in TP software is also a plus. Bachelor's degree or equivalent, with one to two years of effective experience in data processing, plus a good working knowledge of at least one programming language (COBOL, PL/I, ASSEMBLER). Also an understanding of Job Control Language, system utilities, and basic data set structures is required.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS, Behrend College — Responsible to the Dean of Student Affairs, Behrend College, for the supervision and program direction of the Behrend College Student Union facilities and the coordination of student organization activities and programs. Master's degree in student personnel administration or related area, or bachelor's degree, with maturity and significant related experience. Three to five years of experience preferred.

MAINTENANCE FOREMAN, York Campus — Plan, layout, schedule and assign work to Maintenance Mechanic, Grounds Maintenance Man, Maintenance Worker, Janitors, and part-time help for various trades, including carpentry, plumbing, heating, electrical, painting, sheetmetal, landscaping and

housekeeping. Maintain necessary records, including time cards, work orders, reports, shop drawings, catalogs, prints, sketches and related data. Inspect all buildings and outside areas to determine need for maintenance repairs; recommend to the Business Manager necessary maintenance and/or repair. High school education with two years of vocational training or equivalent, plus two to four years of effective experience in building and grounds maintenance and/or construction. Part of this experience should be of a supervisory nature.

COMPUTER PROGRAMMER, Radnor Center for Graduate Studies and Continuing Education — Responsible to the Director for various programming tasks required to assist faculty and students, to produce reports, update records, and make mathematical computations. Individual will operate the computer terminal and various auxiliary equipment. Associate degree in computer science or equivalent to two years of college level training in mathematics with organized computer training in IBM basic computer systems, plus one to two years of directly related experience. Knowledge of engineering and business problem formulations and programming skills of various computer languages essential.

Campus Update

Parents of first year students at the Osgood Campus will have an opportunity to experience classroom situations similar to those of their sons and daughters during Freshman Parents Day on Sunday, Oct. 21.

The first event of its kind since 1969, Freshman Parents Day was resurrected to provide parents, the ones who are paying the bills, with the opportunity to see the campus in operation.

Twenty-one presentations will be offered concurrently and repeated three times, giving those who attend the opportunity to choose any three. Most of the presentations are actual "mini-classes," covering a cross-section of such course offerings as Chemistry, Population Pressure and the Good Life, The Art of the Cinema, or Basic Concepts of Financial Accounting.

The McKeessport Campus has dedicated two buildings in honor of advisory board members. In ceremonies held Oct. 10, the

Campus library was named for the late Dr. J. Clarence Kelly, a surgeon and McKeessport civic leader; the physical education building was named for John M. Wunderley, an advisory board member for 24 years and its current vice president. President John W. Oswald was the main speaker at both ceremonies.

A core endocrine laboratory has been established at The Milton S. Hershey Medical Center to aid in the diagnosis of unusual glandular or endocrine disorders. Several of the tests conducted originated at Hershey, and tests such as Prostaglandins and bile acid procedures are currently available at no other facility in the United States.

"This laboratory enables physicians, hospitals and reference laboratories throughout Pennsylvania to send blood specimens to Hershey for specialized endocrine testing, rather than as far as California, as required previously," said Dr. Laurence M. Demers, core endocrine laboratory director and associate professor of pathology.

Penn State Intercom

News in Brief

Mobile book show at McAllister

Faculty are invited to visit The College Traveler Mobile Book Exhibit today (Thursday) and tomorrow from 9 a.m. to 4 p.m. The Bookmobile exhibit will be parked at McAllister Building, near the Penn State Bookstore which is sponsoring the event.

Books from more than 200 publishers, ranging from freshman through graduate level texts, will be on display, and most are available for complimentary examination. This year, a special section has been added with professional, trade and reference books.

Tickets on sale

for "Le Petit Prince"

On Thursday, Nov. 1, the Department of French will sponsor a production of Antoine de Saint Exupéry's classic, *Le Petit Prince*, by the Compagnie Bernard Uzan of Boston. The performance, in Schwab Auditorium, will begin at 7:30 p.m. and the doors will open at 7 p.m.

Tickets, which cost \$3, may be ordered from the Department of French office, Room 316 Burrowes Building, (telephone 865-1492), or purchased at the HUB desk beginning today (Oct. 25). Tickets will also be available at the door.

FORTRAN workshop

to be offered at term break

The Computation Center will be offering a workshop on beginning FORTRAN during the break between Fall and Winter terms.

This workshop will cover basic computer concepts and techniques of programming in the FORTRAN IV language. The lectures are oriented toward those who have NO previous computer experience, and are open to all faculty, staff and graduate students.

Lectures have been scheduled for five days — Monday, Tuesday and Wednesday Nov. 19, 20 and 21, and Monday and Tuesday, Nov. 26 and 27. Sessions will be given throughout each day, beginning at 9 a.m. and resuming at 1:30 p.m., after a lunch break, in Room 112 Walker Building.

In addition to the lecture and study of sample programs, practice problems will be assigned, and participants will have the use of a T-account for the duration of the workshop and all of Winter Term. It is suggested that the entire five days be devoted to a workshop to gain the maximum benefit.

Registrations will be accepted by Darlene Klinefelter, Room 229 Computer Building (863-0422) beginning Oct. 22. A charge of \$3 (payable by cash, check or interdepartmental transfer) to cover course materials should be made in advance for each registrant. There is no charge for the use of the account.

Big band dance concert

at Rec. Bldg. Saturday

A big band dance concert, reminiscent of those in the '30s, '40s and '50s, will be sponsored by the Penn State Alumni Association in Recreation Building Saturday, Oct. 27, from 8 p.m. until midnight.

Featuring music for listening or dancing, the Stan Rubin Orchestra, which

plays regularly at the Glen Island Casino in New York, is making Penn State its first stop on a college tour. Rubin, who has been an orchestra leader since the '50s when he played at the wedding of Grace Kelly and Prince Rainier in Monaco, has compiled a library of 200 original arrangements of the hits of well known bands of the swing era.

Tickets are on sale at the Eisenhower Box Office and the HUB. They will also be available at the door of Recreation Building on the night of the dance.

Athens lawcourt of 350 B.C. to be reconstructed

"A Day at Court in Athens in 350 B.C." will be the topic of Dr. Alan Boegehold, of Brown University's Department of Classics, on Tuesday, Oct. 30, at 8 p.m., in Room 101 Kern Graduate Building.

Prof. Boegehold will reconstruct from archaeological evidence the daily proceedings in the Greek lawcourt.

His talk is sponsored by the Central Pennsylvania Society of the Archaeological Institute of America, with the support of Penn State's Department of Anthropology and the Institute for the Arts and Humanistic Studies.

Argentine fiction is talk topic

Saul Sosnowski, chairman of the Department of Spanish and Portuguese at the University of Maryland, will present a public lecture on Tuesday, Oct. 30, at 8 p.m. in Room 102 Chambers. His topic is "How To Do Things with Words:

Cortazar and Recent Spanish American Fiction." Prof. Sosnowski is editor of the journal *Hispamerica* and a recognized scholar of Argentine letters.

MARLIN librarians meet

Twenty-five librarians and library computer specialists representing the nine universities of the Mid-Atlantic Research Libraries Information Network (MARLIN) met at University Park Oct. 11-12.

The representatives were invited by University Libraries Dean Stuart Forth to observe and evaluate the developing computer system for Penn State's Libraries, to discuss regional and national network developments and to consider cooperative ventures within MARLIN.

In addition to Penn State, the MARLIN institutions are Princeton, Johns Hopkins, Rutgers, Temple, and the Universities of Delaware, Pennsylvania, Maryland and Pittsburgh.

(Continued on page 4)

Draft copies of Perspective on '80s distributed

Copies of the initial draft of "A Perspective on the '80s: A Plan for The Pennsylvania State University" are being distributed to the Board of Trustees and to the University community for discussion and consideration, Provost Edward D. Eddy reports.

Dr. Eddy, in a letter accompanying the document, expressed the hope that "extensive discussion of this draft will ensue over the next month at department, campus and college faculty meetings and meetings of student organizations."

"Members of the Steering Committee and its staff would welcome invitations to attend and participate in these meetings," the Provost noted. "Any individual or group within the University community wishing to submit written comments to the Steering Committee is encouraged to do so. A special forensis session to discuss this draft will be held at the regularly scheduled November meeting of the University Faculty Senate. The draft will be discussed also by the Educational Policy Committee of the Board of Trustees."

To facilitate consideration by the University community, copies of the draft will be placed in the offices of all college deans, Commonwealth Campus directors, and department and division program heads. All faculty senators will receive the document, and copies will be available at Pattee and at each Campus library.

In addition, INTERCOM will publish a special issue containing highlights from the Plan.

"The Plan revolves around the themes of quality, selectivity and flexibility," Dr. Eddy said. "Although we anticipate that many discussions and recommendations in the Plan will be singled out, reviewers are requested to consider the Plan in broader context. Do the pieces fit? Are proposed solutions consistent? Are we sufficiently realistic? The Plan is an attempt to establish a direction, not to specify details."

"The Steering Committee will consider all responses in its continuing deliberations. Appropriate modifications will be made by the Committee. A final report is scheduled to be recommended to the Board of Trustees in December for possible endorsement in January."

Wind energy workshops available

Penn State Continuing Education will offer workshops on the fundamentals of wind energy at five Commonwealth Campuses and the Behrend College during the next four weeks.

The workshops are intended for homeowners, experimenters, technologists, and elected officials interested in wind as a source of energy. Topics will include: wind energy fundamentals, economics of wind systems, determining wind power, site evaluation, system components, and selection of wind generators to heat and light homes and businesses.

The speaker will be Paul Gibbs, a consultant on wind energy who has published articles and reports on the

Macrame was the medium Barbara Merritt chose when she made these unusual Halloween decorations for the Office of the Provost, where she is a secretary.

Volunteer Service Center needs more workers

The Volunteer Service Center is trying to reach out to the community, but it needs more arms.

"We have many groups who are enthusiastic about getting help from our program, but we just don't have enough volunteers to go around," says Tim Fitzgerald, an assistant to the manager of the HUB and the liaison with the Center. "We definitely need more input from faculty and staff members."

The Center is dedicated to the placement of volunteers in human and social service agencies within a 50 mile radius of State College. Although the volunteers placed by the Center are primarily students, an increasing effort is being made to recruit faculty and staff members.

"Faculty and staff members have

something many of our student volunteers lack — expertise," Mr. Fitzgerald says. "We want to tap that resource for the greatest benefit to the community."

Among the agencies requesting volunteers from the Center are Park West Manor Nursing Home, Mountainview Hospital, Laurelton Center, Easter Seals, Hilltop Day Care Center, Boy Scouts of America and the Bureau of Vocational Rehabilitation.

Requests also come in for volunteers to work with individuals who are physically or mentally handicapped or elderly.

Another project of the Center is a tutoring service, and Mr. Fitzgerald is hoping to get faculty members to submit names of students who might be interested

Penn Staters

Nine faculty members have been awarded Research Fellowships for the coming Winter and Spring Terms by the Institute for the Arts and Humanistic Studies. They are:

Kenneth Beittel, professor of art education, for creative work in porcelain for an exhibit in Japan; **James Beneshoff**, assistant professor of music, for master studies in conducting with Thomas Michalak, conductor of the New Jersey Symphony;

Gary L. Collison, assistant professor of English at York, for preparation of transcriptions of the letters of Theodore Parker for the first of a five-volume edition; **John Cook**, professor of art, for the study of Italian funerary sculpture in Milan and Genoa;

Anthony Cutler, professor of art history, for the study of late antique and early Christian villas in principal European collections; **Roland Fleischer**, professor of art history, for research and study of the paintings of the 17th century Dutch artist, **Ludolf de Jongh**;

Stephen Porter, associate professor of art, for development of two sculptures using silicon bronze and other weathering and stain-resistant materials; **Adam Sackin**, assistant professor of English at Delaware County, for a study of comic and ironic structure in American fiction; and **Brent Wilson**, professor of art education, for a study of narrative drawings of American Indian children.

Dr. Karl H. Beyer Jr., clinical professor of pharmacology at Hershey, and a research associate of his from private industry were presented the 1979 CIBA Award for hypertension research from the American Heart Association. **Dr. Beyer** and **Dr. James Sprague** were selected for their discovery of thiazide diuretics, which the Council for High Blood Pressure Research termed "the most important and meritorious research conducted in the field of high blood pressure."

Dr. S. V. Martorana, professor of education and research associate, Center for the Study of Higher Education, was chosen by the Middle States Association of Colleges and Schools to chair the Association's team to evaluate the University of Puerto Rico's Regional College in Ponce, Puerto Rico. The regional college system of the University of Puerto Rico developed from a plan formulated by **Dr. Martorana** as presented to the Legislature in 1956. At that time he served as Specialist for Community Colleges in the U.S. Office of Education.

"Contemporary Brass Ensemble Music in the United States" was the subject of a lecture delivered by **James Beneshoff** at the International Congress for Brass Musicians in London on Oct. 5. **Mr. Beneshoff** is conductor of the Penn State Brass Choral and an assistant professor of music.

Dr. Robert Zelis, professor of medicine and physiology and chief of cardiology at Hershey, has been installed as the new president of the board of directors of the Pennsylvania affiliate of the American Heart Association.

Gideon Golany, professor of urban and regional planning, has edited a recently published book, *Arid Zone Settlement Planning: The Israeli Experience*.

In this book, **Dr. Golany** says he has "tried to bring together in a comprehensive approach all the Israeli experience in planning and developing desert areas." As editor and contributor, he wrote the introduction and various chapters on the opportunities and policies of arid zone planning. The chapters comprising the rest of the book, dealing with topics varying from desert architecture to agricultural planning, were written by prominent Israeli researchers.

Philip Klass, professor of English, was

guest of honor at the Midwest Science Fiction Conference held recently in Chicago. He delivered two talks, "The Wounded Technology" and "Flying Saucers and Reality." Prof. Klass is an internationally known author of science fiction novels and short stories under the pen name of **William Tenn**.

Philip A. Klein, professor of economics, presented a joint paper, "Further Applications of Leading Indicators to Forecasting Foreign Trade Flows and Balances," at the 24th Conference of the Centre for International Research on Economic Tendency Surveys, held last month in Lisbon. He also served as a consultant on setting up growth cycle chronologies and indicator systems to government agencies in Sweden, Denmark and Holland.

Henry

McCaslin

Four members of the University's staff joined the ranks of retirees on Oct. 1. They are **Milford O. Etters**, **Wilmer Geist**, **Harold R. Henry** and **Leah McCaslin**.

Mr. Etters was a sanitation maintenance worker with Housing and Food Services, assigned to the Food Stores Building. He had been a University employee since Sept. 19, 1960.

Mr. Geist started out in the University's Dairy Barns in 1939, milking cows and bottling the results. He was promoted to records supervisor at the Dairy Barns in 1959 and to records supervisor for the College of Agriculture in 1960. **Mr. Geist** was responsible for checking all dairy reports, maintaining files on each of Penn State's herds, and working with fieldmen.

Two years after **Mr. Geist** joined Penn

Obituaries

Vance G. Sprague, a retired professor of agronomy, died Oct. 15 at the age of 70. **Dr. Sprague** came to Penn State in 1937 as an associate agronomist at the U.S. Regional Pasture Laboratory, retiring in 1969. He was a graduate of Northland College, Ashland, WI, and held master's and Ph.D. degrees from the University of Wisconsin.

He was widely known for his research on the physiology and growth characteristics of forage grasses and legumes. He was a Fellow of the Agronomy Society of America.

Charles M. Hepfer, an employee of the Nittany Lion Inn from 1960 to his retirement in 1976, died Oct. 11 at the age of 65.

Geist

Etters

State's staff, **Mr. Henry** started out as a landscape worker. From there he moved to Engineering as a maintenance mechanic and machinist, and at his retirement was shop superintendent in the College of Science. Working with faculty and graduate students, especially those in chemistry and physics, he helped develop and build instrumentation for testing. Certified in three trades, **Mr. Henry** did welding, electrical and machine work.

A cook at Ritenour Health Center, **Ms. McCaslin** started out there as a dining room waitress in 1960. Working at Ritenour requires a grounding in nutrition since the staff prepares diets for patients. **Ms. McCaslin's** specialty was baking. Two of the **McCaslins'** three children are Penn State alumni.

Promotions

Staff Exempt

Samuel T. Auker to cost accountant — overhead accounting in Controller's Office.

David L. Baker to sports information director in Health, Phys. Ed. and Recreation/Public Info. and Relations.

Richard H. Brown to director, fleet and airport services in Business Services.

Lawrence S. Cote to assistant director, Radnor Center in Continuing Education.

June L. Gingrich to foreman, environmental health at Hershey.

Herman Haas to environmental health shift supervisor at Hershey.

David C. Martin to programmer in University Libraries.

Margaret L. Nastase to accountant in Controller's Office.

Paul D. Ruskin to executive producer in Agriculture.

M. Joan Schumacher to assistant director, student employment in Student Affairs.

Staff Non-Exempt

Carol Facer to junior buyer at Hershey.

George L. Hall to library assistant, receiving in University Libraries.

Mark G. Hoskinson to computer operator at Hershey.

Carol J. Lutz to heart station supervisor at Hershey.

Clerical

Kathy Bell to secretary A in Undergraduate Admissions.

Lisa J. Fredricks to senior medical transcriptionist at Hershey.

Tracey K. Hodge to secretary C in UD15.

Terri J. Lutz to secretary C in Agriculture.

Nanette E. Myers to secretary B in Graduate School.

Ines C. Quaranta to clerk-records in Lib. Arts.

Educated mind is society's best protection against authoritarianism

Editor's note: Following is the text of the introductory remarks delivered last week by Provost Edward D. Edly to the Conference on Modern Authoritarianism in Eastern Europe. The conference, which met at Penn State, was organized by The Slavic and Soviet Language and Area Center.

Society's best — and perhaps only — protection against man's authoritarian impulse is the educated mind. The free — perhaps even the outrageously impudent — university is our answer to authority at its corrosive worst. It enables us to see the larger picture and to comprehend what men and women can become if they but have the chance to choose. The institution which deserves to call itself a university can be recognized by four dominant characteristics.

First, logical thought is our base. The logical mind becomes the cornerstone which supports all else. Without logic, we are lost. Authority grows from small decisions, not merely from the seizure of power. And there is danger in small decisions because they accumulate. They become the vast body of rules and regulations which smother creativity. And they become the hiding place for the people of little minds.

If we had but one course to require of all undergraduate students, my clear preference would be a course in logical reasoning — taught superbly in keeping with its essentiality. As it is, we could and should teach logic in every course.

The creative mind is the second characteristic of the free university. Some years back the Carnegie Corporation commissioned a study of creative people. The results indicated that a dominant sign of creativity was a high tolerance of

ambiguity — a willingness to listen to and, indeed, to protect other points of view, other kinds of people, other convictions and persuasions. The insistence on a single point of view is the beginning of authoritarianism, whether in the university or the state.

"The ability to go one step further — not just to tolerate but to enjoy ambiguity — is a sign of higher learning and freedom at its creative best. It is also a sign of an inhospitable climate for the development of the authoritarian impulse."

A third characteristic is the ability to think beyond the self — and here, perhaps, we fail more noticeably if not with our students, then with ourselves. Each of us probably has a favorite definition of education. My current favorite is from the pen of Thornton Wilder. One character in his novel *The Eighth Day* asks, "What is education, Roger?" What is education, George? "And then he answers almost to himself: 'It is the bridge man crosses from the self-enclosed, self-favoring life into a consciousness of the entire community of mankind.' To cross the bridge the university itself must emerge as an academic community, not merely a collection of logical, creative individual 'I's' and 'Me's.'"

The sign of an executive worthy to serve the free university is the frequency of "we" in both formal and informal speech, rather than the dominant "I." Too many among us confuse ourselves with the institution. We speak of "my campus," "my faculty," "my program." Or we cannot keep from re-assuring ourselves about what "I have done for you, you striving but ignorant human creature." The "we" and the genuine "our" of the

academic community save us from our pettiness which accumulates and festers into authoritarianism.

The fourth and final characteristic is curiously indicative of the logical ambiguity which forces us to talk at one time about both community and individual. The free university — our protection against the excess of authority — is a citadel of learning for the individual human being. It is he or she who ultimately has dignity and value in the eyes of us all. The cause is of no great moment, so long as the individual human being is truly curious. Free society is a collection of individual human beings who deserve the opportunity to acquire knowledge and then to serve that society according to their particular abilities.

When she received the Aspen Award for the Humanities some years ago, the great artist of the dance, **Martha Graham**, accepted with these words: "The main thing, of course, always is the fact that there is only one of you in the world — just one! You come from a certain background, you were born at a certain time, a certain instant in the history of the world. And, as such, you are unique. If that uniqueness is not filled, then something precious has been lost."

The free university is our protection against the loss of "something precious." It is the responsibility of each of us to protect the wealth of all of us. And we can say to student and teacher alike, walk here with dignity. You are a precious commodity — a logical mind, a creative spirit, and an essential part of a scholar's community. In such a place, authority never has a chance to become authoritarian.

University Park Calendar

Oct. 25-Nov. 4

Special Events

Thursday, Oct. 25

Comparative Systems Lecture Series, 7:30 p.m., Room 101 Kern. Eugene Zaleski, Univ. of Paris, on "Soviet Economic Disturbances: From Stalin to Brezhnev."
GSA, Silk Screening Workshop, 7:30 p.m., Room 102 Kern.
Office of Religious Affairs, 10 part film, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.
Slide Lecture, Tsing Fang Chen, 7:30 p.m., Kern Lobby.
Colloquy Lecture, 8 p.m., HUB Ballroom. Simas Kudirka, Lithuanian dissident and defector, speaker.
Thespians, George Furth/Stephen Sondheim, Company, 8:30 p.m., Schwab.

Friday, Oct. 26

Penn State Bookstore, College Traveler Mobile Book Exhibit, 9 a.m.-4 p.m., outside McAllister.
Sports: JV Football, vs. Wesley Jr. College, 2 p.m.
Geography Dept. coffee and lecture, 3:45 p.m., Room 319 Walker. Heinz Henisch, history of photography, on "Early Photography in Eastern Europe."
France-Cinema, *Suport Asway*, 7 and 9 p.m., Room 112 Kern.

Barbara Thomson, organ, 8:30 p.m., Music Bldg. Recital Hall. Free.
Thespians, Company, 8:30 p.m., Schwab.
PSOC Hiking Division, all night vigil on Mount Nittany for the Great Pumpkin, through Saturday.

Saturday, Oct. 27

Sports: football, vs. West Virginia, 1:30 p.m.
France-Cinema, *Suport Asway*, 7 and 9 p.m., Room 122 Music Bldg. (Recital Hall).
Penn State Alumni Association, Big Band Dance Concert, "Swing the Thing," Stan Rubin Orchestra, 8 p.m., Rec. Hall.
Artists Series, Dresden State Orchestra, 8:30 p.m., Eisenhower Auditorium.
Thespians, Company, 8:30 p.m., Schwab.

Sunday, Oct. 28

University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Ernest H. Freund, Friends Meeting of State College and philosophy emeritus, speaker.
Shaver's Creek Nature Center, nature talk on winter trees and evergreens, 2 p.m., Stone Valley.
Karen Eckenrodt, soprano, 3:30 p.m., Music Bldg. Recital Hall.
France-Cinema, *Suport Asway*, 7 and 9 p.m., Room 101 Kern.
Office of Religious Affairs Conference, "Religion, Values and Public Education," 7:30 p.m., Fireside Lounge, HUB.

Monday, Oct. 29

Last day to sign Fall Term NDSL and University Long Term Loans, Room 108 Shields.
Late drop deadline.
Office of Religious Affairs Conference, "Religion, Values and Public Education," 12:30 and 7:30 p.m., Fireside Lounge, HUB.
College of Science, John M. Chermela Lecture, 4 p.m., Room 333 Whitmore. Mark Kac, Rockefeller University, on "Chance and Randomness in Mathematics and Science: When is Random Random (II)?"

Tuesday, Oct. 30

Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Wendell Harris, English, speaker.
Office of Religious Affairs Conference, "Religion, Values and Public Education," 12:30 and 7:30 p.m., Fireside Lounge, HUB.
Chermela Lecture, 4 p.m., Room 333 Whitmore. Mark Kac, "Chance and Randomness in Mathematics and Science: When is Random Random (II)?"
College of Engineering, Distinguished Mechanical Engineering Lecture, 4 p.m., Room 105 Mechanical Engineering Bldg. Robert W. Mann, Whitaker professor of biomedical engineering, MIT, on "Cybernetic Prosthesis - Motor and Sensory."
Halloween Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Series, Ray, Aparajito, 7 and 9 p.m., Room 102 Forum.
Archaeological Institute of America Lecture, 8 p.m., Room 101 Kern. Alan Boegehold,

WHAT ELSE - but an exhibit from "The Great American Hamburger" at Kern Commons Gallery. Ceramicist is Roy Fender.

Brown Univ., on "A Day at Court in Athens in 350 B.C."
Dept. of Spanish/Italian/Portuguese Lecture, 8 p.m., Room 102 Chambers. Saul Sosnowski, Univ. of Maryland, on "How to Do Things with Words: Cortazar and Recent Spanish American Fiction."

Wednesday, Oct. 31

Commons Concert, Tim Craven, folk music, noon, Kern Lobby.
Chermela Lecture, 4 p.m., Room 333 Whitmore. Mark Kac on "Chance and Randomness in Mathematics and Science: Probabilistic Aspects of Some Problems in Mathematics and Mathematical Physics (I)." Halloween Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.
Office of Religious Affairs Conference, "Religion, Values and Public Education," 7:30 p.m., Fireside Lounge, HUB.
Colloquy Halloween Special, 8 p.m., Eisenhower Auditorium. Ed and Lorraine Warren, seekers of the supernatural, speakers.
Penn State Brass Chorale, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, Nov. 1

Faculty Women's Club, Brown Bag Lunch and Lecture, 11:45 a.m., Faculty Bldg. Charlotte Murphy on "Energy Saving Appliances." Commons Videotape, "TV Quarterbacks," noon, Kern Lobby.
Chermela Lecture, 4 p.m., Room 333 Whitmore. Mark Kac on "Chance and Randomness in Mathematics and Science: Probabilistic Aspects of Some Problems in Mathematics and Mathematical Physics (II)." French Dept., Antoine de Saint Exupery, *Le Petit Prince*, performed by Compagnie Bernard Uzan, 7:30 p.m., Schwab.
GSA, Skiers Conditioning Workshop, 7:30 p.m., Room 102 Kern.
Office of Religious Affairs, 10 part film, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.

Friday, Nov. 2

Sports: JV Football, vs. Nassau Community College, 2 p.m.; soccer, vs. Temple, 7:15 p.m.
Geography Dept. coffee and lecture, 3:45 p.m., Room 319 Walker. Rodney Erickson, geography, on "The Changing Location of Jobs and the Death of Life of the Great American Cities."
UnCommon Theater, preview, *Piccadilly Silly*, 8 p.m., Room 112 Kern.
Artists Series, Music from Marilboro, 8:30 p.m., Schwab.

Saturday, Nov. 3

Sports: football, vs. Miami (Fla.), 1:30 p.m.
UnCommon Dinner/Theatre, 6:30 p.m., Room 102 Kern; *Piccadilly Silly*, 8 p.m., Room 112 Kern.
France-Cinema, *The American Friend*, 7 and 9 p.m., Room 122 Music Bldg. (Recital Hall).
Shakespeare Film, WFSX-TV, BBC's *Julius Caesar*, 9 p.m., Room 123 Chambers.

Sunday, Nov. 4

University Chapel Service, 11 a.m., Eisenhower

Chapel. Dr. George Lucas, Ashland, Va., speaker.

UnCommon Dinner/Theatre, 6:30 p.m., Room 102 Kern; *Piccadilly Silly*, 8 p.m., Room 112 Kern.

Seminars

Thursday, Oct. 25

Anthropology, Charles Leslie, Univ. of Delaware, on "Disease, Illness and Health Planning," 3:30 p.m., Room 107 Carpenter (new listing).

Friday, Oct. 26

Analytical Chemistry, Karcy Holland on "Liquid Chromatography/Electrochemical Detection of Lactate and Lactate Dehydrogenase," 11:10 a.m., Room 333 Whitmore.

Monday, Oct. 29

Genetics, Brian Stanton on "A Comparative Study of Plus-Tree Selection Methods for Superior Growth Rates in Paper Birch," 3:55 p.m., Room 111 Tyson.
Plant Pathology, Nicole Palazzolo, grad student, on "Differential Plant Tolerance to Cadmium," 3:55 p.m., Room 213 Buckhout.
Computation Center, Daniel L. Bernitt, senior research associate, on "APL (5 of 6)," 7:30 p.m., Room 108 Forum.

Tuesday, Oct. 30

Macromolecules, P.H. Gel. Univ. of Illinois, on "Molecular Motion and Chain Folding in Polymers," 11:10 a.m., Room 333 Whitmore.

Organic/Inorganic Chemistry, Richard Rosen, grad student, on "Recent Advances in Homogeneous Activation of Carbon Monoxide," 12:45 p.m., Room 333 Whitmore.

Air Pollution Control, Henry Alexander, Bureau of Air Quality, Pa. DER, on "Volatile Organic Compound (VOC) Regulations and Photochemical Oxidants," 2:20 p.m., Room 140 Fenske.

Math Logic, Judith Tanselle, grad student, on "Some Properties of Analytic Sets of Real Numbers," 2:20 p.m., Room 106 McAllister.
Anthropology, Richard Gould, Univ. of Hawaii, on "To Have and Have Not: Ecology and Social Behavior in Two Hunting and Gathering Societies," 3:30 p.m., Room 107 Carpenter.

Geosciences, Deane K. Smith, geosciences, on "The Powder Diffraction File: It's Roots and Fruits," 3:45 p.m., Room 112 Walker.

Astronomy, Melville P. Unger, Northwestern Univ., on "X-ray Structure of Clusters of Galaxies," 4 p.m., Room 445 Davey.
Mathematics, David Russell, Univ. of Wisconsin and Mathematics Research Center, on "A Class of Holomorphic Semigroups Associated with Structural Damping," 4 p.m., Room 102 McAllister.
Chemistry, Gregory L. Geoffroy, chemistry, on "How to Seek and Find Employment in Chemistry," 8 p.m., Room 333 Whitmore.

Wednesday, Oct. 31

Computation Center, Daniel L. Bernitt on "APL (6 of 6)," 7:30 p.m., Room 108 Forum.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Thursday, Nov. 1

Ceramic Science, Gary L. Messing, Battelle Columbus Laboratory, on "Consolidation of Ceramic Powers," 11 a.m., Room 301 Steidle.

Chemistry, M. Frederick Hawthorne, Univ. of California, Los Angeles, on "Metallo-carbonates in Catalysis," 12:45 p.m., Room 333 Whitmore.

Physics, Lorenz Narducci, Drexel Univ., on "Optical Bistability," 3:50 p.m., Room 445 Davey.

Meteorology, Leonard Neumann, Brookhaven National Laboratories, on "Is It Possible that Acid Rain is Acidic?" 3:55 p.m., Room 112 Walker.

Engineering Science and Mechanics, David E. Carlson, RCA Laboratories, Princeton, on "Amorphous Silicon Solar Cells," 4 p.m., Room 152 Hammond.

Fuel Science, E. Kendall Pye, Univ. of Pennsylvania, on "Alcohol Fuels from Biomass," 4 p.m., Room 301 Steidle.
Philosophy, Deborah Modrak, philosophy, on "Aristotle on Imagining, Thinking and Knowing," 4 p.m., Room 75 Willard.

Friday, Nov. 2

Analytical Chemistry, Albert Robbat, grad student, on "Electroanalytical Determination of Selected Sulfur Heterocycles Found in Coal Liquefaction Processes," 11:10 a.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: Graduate and Undergraduate Students' Drawings.

HUB Galleries: Penn State, PSU memorabilia; LaVie exhibit; Denise Faleksi, recent works, through Oct. 27; Art Alley, Robin Hanks and Mary Edith Miller, recent photographs, through Oct. 28; Browning Gallery, Nick Webb and John Warfield, pots, through Oct. 27; The Gallery.

Kern Commons Galleries: Tsing Fang Chen, paintings, through Oct. 27; Roy Fender, "The Great American Hamburger," ceramics, and School of Visual Arts Students, "Glass Works from Penn State," through Nov. 3; prints and papermaking by BFA and MFA candidates and United Nations Assoc., "Year of the Child" exhibit, both open Oct. 27.

Museum of Art: European works and 19th century American paintings, prints and drawings from the permanent collection.

Pattee Library: Peter Gould, photographs, "Wittgenstein's Vienna," through Oct. 29. Main Lobby: Cheryl King, paintings, through Oct. 29. Lending Services Lobby: Peter Greene, paintings, prints and drawings, through Oct. 29 and traveling exhibit celebrating the 100th anniversary of the U.S. Geological Survey Dept., opens Oct. 30. East Corridor Gallery.

Visual Arts Bldg. Zoller Gallery: Skindin Photographic Show, through Nov. 4.

Staff Vacancies

The following vacancies for positions classified as staff openings or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by filing the Employment Division, 865-1187 (network line 475-1187). Applications for these staff vacancies will be accepted until 5 p.m., Nov. 1, 1979. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment Practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT MANAGER, HOUSING AND FOOD SERVICES, Hazleton Campus. Responsible to Manager, Housing and Food Services-Commonwealth Campuses for assisting in supervising the overall operation of the Housing and Food Service units. Associate degree in institutional management or equivalent, plus two years' related experience in food supervision.

Review of health care deductions urged

University faculty and staff members should review periodically the deductions being taken for their group health care (UNICARE and Dental) to be certain that they are paying for the correct coverage.

A change in family status may affect your costs and your coverage. For example, when you get married, when you have a first child, or when your spouse stops working for the University, you run the risk of having inadequate dependent coverage.

You should consider changing your coverage if any of the following circumstances arises:

- 1) You add a dependent through marriage or birth. (Note: a baby is covered automatically for 31 days following birth, however, to provide for coverage beyond that time a change of dependent coverage form must be completed).
- 2) Your spouse or only dependent child begins or ceases working for the University as a regular employee.
- 3) Your spouse or only dependent child dies.

- 4) You are divorced (or separated) or no longer wish to provide dependent coverage).
- 5) Your only dependent child enters military service or reaches age 19 (or 23 in the case of a full-time student).
- 6) Your only dependent child gets married.

To determine whether or not you have the right coverage or are paying the right amount, compare the amount that is shown on your salary check stub with the amount you should be paying according to the table below.

If a change should be made, call, write, or visit the Employee Benefits Division, Room 133 Willard Building, 865-1473. A faculty or staff member who is not at University Park may receive assistance by contacting his/her Personnel Officer or Business Manager.

The University has no way of knowing whether a change should be made, so it is the responsibility of the employee to keep his/her records up to date and accurate. No refunds for over-payment will be made, unless it can be shown that the University was in error.

Insured Persons	UNICARE		Dental	
	monthly	bi-weekly	monthly	bi-weekly
Employee Only	NONE	NONE	NONE	NONE
Child or Children	\$1.75	\$0.80	\$4.33	\$2.00
Employee, Spouse	\$3.60	\$1.66	\$4.33	\$2.00
Employee, Spouse Child or Children	\$5.00	\$2.30	\$4.33	\$2.00

Act 101 State conference held

"Innovations in Higher Education: The Challenges of the '80s" is the theme of the Act 101 Statewide Conference currently in session at the Sheraton Penn State Inn, State College.

Act 101, the Higher Education Equal Opportunity Program, encourages colleges and universities to admit low income students who, due to poor performance on standardized tests or modest high school academic achievement, would not regularly be admitted.

The conference has assembled college administrators, faculty members, and Act 101 program staff from around the State to discuss the focus of higher education in the next decade.

Seventy-one public, private and community colleges and universities participate in the Act 101 grant program, established by the State in 1971. These institutions recruit highly motivated students who show potential to succeed in college and provide special academic support services for the students.

Penn State's Developmental Year Program is a participant and serves 200 freshmen students annually, according to Leon E. Wiles, coordinator of the program.

Conference registrants were welcomed yesterday (Wednesday) by Provost Edward D. Eddy, along with Commissioner Ronald K. Lewis of the Pennsylvania Department of Education and Conrad D. Jones, director of the department's Bureau of Equal Educational Opportunity.

Approximately two dozen discussion and workshop sessions are being held on such topics as admissions, recruitment and retention of students; institutional research; curriculum and instruction; academic policies; servicing the disabled students; and grantsmanship and proposal development.

Workers needed

(Continued from page 1)

in this kind of work.

"I feel that many faculty and staff members may be hesitant to come to the HUB to volunteer their services because it is a student building," Mr. Fitzgerald says. "We want them to know that we would be delighted to meet with them any time, anywhere to set something up. We can get them into a situation where they can call their own shots."

To help reach faculty and staff members, the Center's office hours have been expanded to Tuesday nights from 7-9 p.m., in addition to the normal hours of 9 a.m. to 4 p.m. Monday through Friday.

An orientation program scheduled for the first week of Winter Term will pull together all the agencies requesting volunteers. Mr. Fitzgerald hopes this will provide volunteers with a better understanding of what is involved should they give some of their time.

The Center is located in Room 210 HUB, and the phone number is 865-3431.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Arts Roundup

Kaufman-Hart play next URTC offering

Penn State's University Resident Theatre Company (URTC) has begun rehearsals for its second production, *You Can't Take It With You*. Hailed as one of the funniest comedies of the American theatre, the play won a Pulitzer Prize for its writers, George Kaufman and Moss Hart.

The URTC production is being directed by David Dannenbaum, assistant professor of theatre, and is scheduled to open Nov. 29 at The Pavilion. For reservations call 865-1884 from 10 a.m. to 6 p.m. Mondays through Saturdays.

Brass Choral opens season Oct. 31

"Fanfare" by Alexander Tcherenpin, a piece written in the early '60s, will open the Penn State Brass Choral's program when the group presents its first concert of the season Wednesday, Oct. 31, at 8:30 p.m. in the Music Building Recital Hall.

The Brass Choral will also perform Morley Calvert's "Introduction, Elegy and Caprice," composed as the test piece for the 1978 European Brass Band Championships held in London. Other selections include "Theme and Four Variations" by Thomas Merriman; John Addison's Divertimento, opus 9; "Designs for Brass" by Václav Nelhybel and the Symphony for Brass Percussion by Alfred Reed.

The Penn State Brass Choral is composed of University students and is conducted by James Benshoof, assistant professor of music.

Un-Common Dinner Theatre to feature British humor

"Piccadilly Silly," an evening of British humor, is this term's Un-Common Dinner Theatre offering.

After a student preview on Thursday, Nov. 1, the show will open Friday, Nov. 2. Dinner and theatre will be offered on Saturday and Sunday, Nov. 3 and 4. Show time is 8 p.m., and the location is Room 112 Kern Graduate Building.

A full-length review with some 32 separate sketches, "Piccadilly Silly" is conceived and directed by David A. Stern, assistant professor of theatre arts. Prof. Stern wrote some of the pieces and is also using materials from such comic writers as Peter Cook and Dudley Moore.

Dinner will include English-style fish and chips, a salad bar and London Bridge cherry tarts. Service begins at 6:30 p.m.

Sponsoring the dinner-theatre are the Graduate Commons, the Department of Theatre and Film, and the Hotel and Restaurant Society.

For further information or reservations, call the Kern Information Desk at 865-1878.

Organ recital Oct. 26

An organ recital will be presented by University graduate Barbara Thomson '69 at 8:30 p.m. Friday, Oct. 26, in the Music Building Recital Hall. A faculty member of the Peabody Conservatory of Music and Goucher College, Ms. Thomson will also conduct a master class for organists at 9:30 a.m. Saturday in the recital hall.

Her program will open with the first movement of Mendelssohn's Sonata No. 3 for Organ, the "Con Moltto Maestoso." Following the Mendelssohn piece will be two settings of "Dies sind die heiligen zehn Gebot," BWV 678 and BWV 679, by Johann Sebastian Bach. Ms. Thomson will also perform Bach's "Duet and Fugue in E Flat ('St. Anne'), BWV 552.

For the second part of the program, Ms. Thomson will perform "Carillon de Westminster" by the 19th century French composer Louis Vierne, "Antipodes I" by Gary C. White, and the Allegro from the "Symphonie VI pour Orgue" by Charles-Marie Widor.

News in brief

(Continued from page 1)

Mann to deliver Engineering lecture

Dr. Robert W. Mann, Whitaker Professor of Biomedical Engineering at the Massachusetts Institute of Technology, will give this year's Distinguished Mechanical Engineering Lecture. He will speak on "Cybernetic Prosthesis - Motor and Sensory" Tuesday, Oct. 30, at 4 p.m. in Room 105 Mechanical Engineering.

Professor Mann received his undergraduate, master's and doctoral degrees from MIT.

For the last two decades, Professor Mann has conducted research in bioengineering and, in particular, in the development and application of rehabilitation technology. Internationally known for work in sensory aids for the blind, including computer-based rapid Braille production, and for work on cybernetic limb prostheses and other orthopedic research, Professor Mann is co-developer of the so-called Boston Arm. It is a prosthesis that uses faint bioelectrical signals from residual muscle tissue to operate an artificial elbow.

Professor Mann is a member of the National Academy of Engineering and the Institute of Medicine of the National Academy of Sciences. He is a Fellow of both the American Academy of Arts and Sciences and the Institute of Electrical and Electronic Engineers. The American Society of Mechanical Engineers awarded him its inaugural Lissner Award for Biomedical Engineering as well as the Society's Gold Medal in 1977.

Recycle envelopes

Because recycling of interoffice envelopes at the University Park Campus can save many dollars, departments and individual users are urged to send any excess supplies of used envelopes to Mailing Service, Room 108 Business Services.

Every type of envelope which might conceivably be reused should be sent - including letter size and No. 10 lined or unlined, manilla or white. Envelopes up to 11 by 15-inches are welcome.

Mailing Service will route the envelopes it receives to departments which have expressed a need for them. Presently, the expressed need is far greater than the supply.

Halloween dinner at HUB

A Halloween candlelight dinner will be held at the HUB Terrace Dining Room from 4:45-6:45 p.m., Oct. 30-31.

Entrees on the menu will include calves liver with bacon, roast rib of beef, coq au vin, grilled ham steak with fruit sauce, shrimp and scallop scampi on a bed of rice, and leg of lamb bouquet.

Penn State on NOVA

Dr. Peter Cavanagh, associate professor of biomechanics, is one of several sport scientists whose work will be described in a two-part special on the television series, NOVA, on Tuesday, Oct. 30, and Tuesday, Nov. 6. The programs will be aired at 8 p.m. on WPSX, Channel 3 and rebroadcast the following Sunday mornings at 11 a.m.

The first, entitled "Race for Gold," will explore the relatively new field of sport science and its applications to athletic performance. The second, "All Part of the Game," will concentrate on sports injuries and medicine.

Dr. Cavanagh's research was filmed at Penn State, and one part of the series will describe a study, done at Penn State and at Ball State University in Indiana, of what makes a gifted athlete, using as subject three-time Boston Marathon winner Bill Rodgers.

Wind energy

(Continued from page 1)

subject. He also has conducted research on wind energy for West Texas State University.

Workshop locations and dates: The Capitol Campus, Tuesday, Oct. 29; the Hazleton Campus, Thursday, Nov. 8; the Behrend College, Tuesday, Nov. 13; the McKeesport Campus, Thursday, Nov. 15; the Altoona Campus, Tuesday, Nov. 20; and the Delaware County Campus, Thursday, Nov. 29.

All workshops will start at 9 a.m. and end at 3:45 p.m. Fees are \$35 for all locations except Delaware County, where the cost is \$45. Additional information may be obtained from the Continuing Education office at the appropriate location.

CLINTON PATTEE LIBRARY
CANTHIA J. AHMANN

Penn State Intercom

Editor's note: Following is an edited text of the brief version of "A Perspective on the '80s: A Plan for The Pennsylvania State University." Since the complete Plan fills some 128 manuscript-size pages, this special issue of INTERCOM obviously contains only highlights.

Those who do not like abridgements may wish to consult the actual text. To stimulate the widest possible consideration of the document, copies have been placed in Pattee Library and in the libraries at each Penn State Campus. They are also available in the offices of the University's deans, Commonwealth Campus directors, and department and division program heads.

Any individual or group within the University is encouraged to submit written comments to the Steering Committee, c/o the Provost's Office, 205 Old Main.

Preface

... the concepts and supporting data and arguments which appear in the following pages represent the best thought and efforts of hundreds of members of the academic community. Faculty members, administrators, students, and staff members have all helped the University gain a perspective on the '80s. Ultimately, however, the responsibility to govern the University rests with its Board of Trustees. Adoption of this plan in principle by the Board of Trustees represents their advice to the University community.

CHAPTER I PENN STATE IN THE 1980s

The year 1980 marks the 125th anniversary of the founding of The Pennsylvania State University. Instead of seizing this occasion to look back on the many accomplishments of the past, the University chooses, instead, to look to the future. What issues should it pursue in the '80s to ensure that its vision will not be undiminished when it reaches its 150th year?

Objectives in the '80s

For maximum effectiveness, long-range planning efforts in higher education must focus on a limited number of crucial issues. Therefore, readers of this document will find three pervasive themes throughout the Plan — quality, selectivity, and flexibility. These are Penn State's objectives for the decade of the '80s.

Quality

In teaching, research, and public service, Penn State should seek to maintain its position as the capstone of Pennsylvania's system of postsecondary education. Among the almost 300 institutions of postsecondary education in the Commonwealth:

- Penn State is the only Land-Grant institution.
- Penn State is the only college or university which provides students with access to postsecondary education on a statewide basis.
- Penn State offers nearly 80 unique degree programs. Most of these programs are at the graduate level in the sciences, technologies, agriculture, and the professions.
- Penn State is the greatest single provider of higher education opportunities in the Commonwealth, enrolling one of every ten college students in Pennsylvania.

As the capstone, The Pennsylvania State University believes that the quality of its teaching, research, and public service programs is more important than their number. Quality depends on both the caliber of the University's faculty and staff members and on available resources. Concern for quality must permeate all aspects of the University's value choices, operations, and academic programs.

In the decade ahead the University should focus greater attention on attracting the brightest and most talented students. ... As the nature and substance of decisions continue to change in the decade of the '80s, vigorous academic leadership and forthright decision making at all levels will become even

more essential. The dangers of paralyzing the University through indecision and inaction, through timidity and inappropriate compromise, will increase. New expectations for academic leadership at the department, campus, college, and university levels should be set forth. Faculty and student participation in decision making should be retained and refined.

Penn State's quality is linked directly to adequate financial resources. The pursuit of excellence will require greater financial support from all sources. ...

Selectivity

The key phrase in achieving quality for Penn State in the 1980s should be "selective excellence." Achieving selective excellence will require departments, colleges, and campuses to develop priorities among their programs and to sort out competing demands on time and resources. The setting of University-wide priorities will be a major emphasis of the on-going five-year planning and budgeting process.

At the graduate level, selective excellence may require that certain departments be required to maintain and strengthen their efforts whereas other departments may be asked to reorient, consolidate, or terminate programs. At the undergraduate level, some departments and programs may have to be eliminated in order to concentrate on majors toward serving the needs of students majoring in other areas.

In exercising selectivity in teaching, research, and public service programs, Penn State should seek a balance among three equally important criteria: 1) the quality of a program, its students, and its faculty; 2) the demonstrated need for the program; and 3) program costs. Program selectivity also should take into account the availability of the program in other Pennsylvania institutions of higher education. Conscious selectivity is essential if the alternatives open to Penn State are to be used wisely.

Flexibility

To enhance its capacity to be selectively excellent and to respond to new opportunities, Penn State should make major efforts to extend administrative, programmatic, and resource flexibility, each of which is related closely to the others. The University should have the ability to make reasoned adjustments to reflect changing student preferences, to accommodate new fields of inquiry, to provide more effective educational experiences, and to manage its efforts more efficiently. ...

Toward a New Decade

The University's commitment to quality, selectivity, and flexibility reflects confidence in its ability to serve the people of Pennsylvania. Commitment to quality assures that the service will be good; commitment to selectivity assures that the service will be appropriate; and commitment to flexibility assures that the service will be provided. These objectives will allow the University to develop its special attributes, to preserve the unique nature of its statewide and Land-Grant missions, and to be more responsive to the needs of its many publics. ...

CHAPTER II MISSIONS

Penn State's Land-Grant Heritage

... Consistent with its Land-Grant heritage, Penn State reaffirms its mission in the decade ahead:

- to serve as a force for cultural and intellectual development of the Commonwealth and the nation;
- to provide instruction, research, and service to the people of the Commonwealth through its statewide network of campuses, cooperative extension programs, and continuing education centers;
- to provide selected educational programs in the professions essential to the continued well-being of the Commonwealth and the nation;
- To incorporate essential new areas of knowledge into its curriculum to give the

citizens of the Commonwealth access to the latest professional and technical information;

- to emphasize those areas in research and public service that assist in solving the social, economic, and technological problems facing the Commonwealth and the nation; and
- to provide access to educational opportunities to all qualified citizens.

University Missions

At the heart of Penn State's distinctive contribution as a Land-Grant university is the blending of its instructional, research, and public service missions. While the emphasis on a particular mission may vary from campus to campus, for the University as a whole, all three must be in balance for Penn State to fulfill its unique and historic role as the capstone of the Commonwealth's higher education system.

Penn State's commitment to its Land-Grant tradition does not mean that it can do everything. If depth in program quality were to be sacrificed to fulfill the notion of breadth of offerings, the only result would be mediocrity. However, sweeping the University's mandate within the Commonwealth, it should be selective in directing its efforts to enhance those programs that are already of the highest quality, those programs having the potential to excel, and those programs that are unique to the Commonwealth and of special significance to the nation.

Program Priorities

Priorities among programs in undergraduate and graduate instruction, research, and public service must be guided by three criteria: demonstrated program quality or the ability to achieve quality; evidence of need by the citizens of the Commonwealth and the nation; and factors of cost. ...

The faculty, under the leadership of deans, department heads, and campus directors must be the first to exercise selectivity by establishing priorities among their programs. The faculty and the academic leadership are best equipped to strengthen present programs and identify the promising opportunities in the future. ...

The University's future should be built on its unique contributions and on its historic strength in education for the professions as well as its developing role in liberal education. Programs in agriculture, engineering, education, and earth and mineral sciences historically have provided a solid foundation for Penn State's programs and have a continued role in its future well-being. Programs in the business and health-related professions recently have grown substantially in both demand and quality. The basic disciplines within the arts, humanities, and social, mathematical, and natural sciences will remain important at Penn State because they are essential. To the extent they are strong, the quality and integrity of the entire University are strengthened. Interdisciplinary programs are also essential in providing greater balance and perspective, and should be included in University-wide and department program priorities.

Responding to the pluralistic heritage of Pennsylvania requires that the University assumes a position of leadership in affirmative action. This aim includes all University programs. ...

Instruction

Undergraduate education. As the Commonwealth's Land-Grant university, Penn State is committed to providing superior undergraduate education at a reasonable cost. Successful recruiting efforts in the decade ahead may well depend on how prospective students value a Penn State degree in comparison to that of other institutions.

The basic approach to general education at Penn State should be reassessed to emphasize the interrelationships within the students' baccalaureate education. ... No common thread of concepts and experiences in the University's baccalaureate degree program is readily apparent. ... The basic approach to general education at Penn State should be reassessed continuously and, for the 1980s, more emphasis in the BDR should be placed on the integration of each student's baccalaureate experience. ...

... The University continuously should guard against proliferation of courses which satisfy BDR and, where possible, consolidate the BDR into a smaller number of courses which are more uniformly applicable to all programs.

The renewed emphasis on quality ... should extend to all aspects of the teaching and learning process. The evaluation and improvement of teaching should continue to be a high priority at the department and campus levels. ... Academic advising also is critical to the undergraduate experience. ...

Intercollege programs, such as interdisciplinary degree programs fashioned by the student, academic options within majors, and intercollege degree programs, draw on the faculty and resources of several colleges. These programs offer perspectives and opportunities not available in a single college or department.

Penn State also has an obligation to provide undergraduate opportunities for the adult location-bound student. Quality programs unique to Penn State in the Commonwealth may be developed when an explicit need emerges. Extended degree programs effectively serve such needs, but must be initiated only to meet demand and not as the sole route to campus enrollment problems or to expand a campus' mission to four-year status.

Graduate education. A great university is measured by the strength of its graduate programs, by the scholarly distinction of the faculty members who offer them, and by the quality of the students who pursue them. Since no university can achieve national eminence in every field, selectivity is imperative in graduate education. In light of the limited market ahead, many programs that now lead primarily to academic careers should be redirected in part toward nonacademic pursuits.

A major effort in the next decade should be devoted to strengthening graduate education. The exercise of selectivity, the improvement of the quality of graduate programs, and the recruitment of well-qualified graduate students depend in large part on the academic leadership provided by department heads, deans, and the Graduate Council.

The University, while striving to keep graduate assistantship and fellowship stipends competitive, also should enlarge its program of graduate fellowships to recruit academically distinguished students. In those graduate programs preparing students for employment in business and industry, the University should attempt to obtain supporting funds directly from the relevant enterprises.

Research

The conduct of creative and scholarly work is a pivotal function of Penn State. By supporting the pursuit of knowledge in all of its many forms, the University ensures that its teaching and public service missions are vital and up-to-date. The interaction of ongoing creative scholarship and research programs with instructional and public service programs provides the distinctive character of Penn State. ...

Penn State's success as a research university depends in large measure on the recruitment and retention of faculty members committed to producing high quality research and creative efforts. At University Park and The Milton S. Eisenhower Medical Center, the research mission is a distinguishing characteristic. Therefore, departments and colleges at these campuses must be satisfied that each appointment to the faculty has the potential for high quality to the research enterprise as well as to teaching.

Renewed emphasis and new incentives are needed to increase external support for Penn State's research programs. ... Steps that should be taken to bolster external funding for research include:

- Increased encouragement and aid to faculty members in developing research proposals;
- An expansion of grants for the initiation and development of research proposals and ideas;
- More aggressive solicitation of private support from foundations and corporations for research;
- Improved contacts with federal and state agencies;
- Greater cooperation among colleges and

between colleges and intercollege research centers and institutes in order to respond to state and national needs; and

- Allocation of institutional resources to renovate facilities and to help replace deteriorating and outdated research equipment. . . .

Public Service

In the broadest sense, Penn State's public service mission encompasses both teaching and research. The long standing commitment to statewide public service distinguishes Penn State from most other colleges and universities in the Commonwealth and makes it one of Pennsylvania's greatest public resources. . . .

Continuing Education. Continuing education activities should concentrate increasingly on noncredit, informal educational programs. A special opportunity for Penn State is likely to come in continuing education for practicing professionals. . . .

Cooperative Extension. . . . Throughout the '80s, Cooperative Extension should continue to provide service to increased numbers of Pennsylvanians. Contingency measures should be developed in the event of drastically reduced federal support for extension. Efforts should go forward to increase interaction between faculty members in Cooperative Extension and those concerned with resident instruction and continuing education. . . .

Regionalization of extension operations should be explored, and, wherever practical, offices for regional and area extension staff should be located at a Commonwealth Campus. . . .

Campus Missions

The entire Commonwealth is Penn State's campus. The University's academic policies are designed to produce a uniform standard of excellence, no matter which campus a student attends. Students may move from one campus to another with the assurance of continued progress toward their degrees. . . .

University Park

Through the 1980s, the University Park campus will continue to offer undergraduate and graduate programs on an increasingly selective basis. It will serve as the University's administrative headquarters and, along with The Milton S. Eshersky Medical Center, as Penn State's principal research center. . . .

Special challenges are likely to develop at University Park in the mid-'80s as a result of anticipated changes in enrollment mix. . . . Although recruitment efforts should emphasize the advantages of each University campus, qualified applicants should not be rejected or offered alternate admission when space is available at the campus of their choice. As a result of accommodating student choices, University Park enrollment is expected to consist of increased numbers of freshman and sophomore students and somewhat fewer juniors and seniors. . . .

An increase in the number of lower-division students will affect the service responsibilities and lower-division course offerings especially in the Colleges of Arts and Architecture, The Liberal Arts, Science, and Health, Physical Education and Recreation. This increased service responsibility will mean changes in faculty teaching assignments, with, in some cases, a greater proportion of senior faculty members taking introductory and service courses. These developments should afford special opportunities to improve the overall quality of undergraduate instruction at University Park. At the same time, in light of changing instructional demands, steps should be taken to preserve faculty time for research and advanced study. . . .

The relationships among administrative units and among academic programs within and between colleges should be reassessed to provide opportunities for increased cooperation and leading, in some instances, to administrative reorganization. For example, special opportunities exist for reassignment of programs in education and health, nutrition, and health education and the allied health sciences. . . .

The distinctive statewide role of the University Park campus in research and graduate education should shape to a greater degree its attitudes, policies, and practices in the recruitment, promotion, and retention of faculty members. At the graduate level, the University Park focus for the '80s should be upon the aggressive recruitment of quality graduate students in programs related to significant student and societal demand and program strengths. Recognition of Penn State as a graduate center of national reputation will require a greater research commitment by faculty members. . . .

Penn State's reputation, both nationally and internationally, rests on its commitment to the support of quality programs of research. Interdisciplinary research centers and institutes

have played an important role in solving national and state problems and in providing research opportunities for graduate students. A number of colleges historically have had substantial success also in the procurement of federal and private grants. These efforts should continue and others should be undertaken to raise the level of external funding of research. Faculty members in these colleges should increase efforts to strengthen the relationship between research and instruction at both the undergraduate and graduate levels. Public recognition of Penn State as a major research university requires a higher level of commitment to research, scholarship, and creative endeavor by faculty members and administrators. Greater efforts should be made by students and by external constituencies of the research mission of the University. . . .

Commonwealth Campuses

The Commonwealth Campuses, an integral part of Penn State, are crucial to the University's ability to fulfill its statewide missions. . . .

The Commonwealth Campuses continue to be in a unique position to respond to local educational and cultural needs, but a reassessment of both opportunities and commitments are needed. In the '80s, each campus must determine how it can serve best the secondary and tertiary needs of its area. While the University expects neither to open additional campuses nor to force the closing of existing ones, the individual campus' range of functions will depend, in large part, on the ability of the campus to respond to local needs and on the extent of support developed within the local community. If local needs which can be met by Penn State at a given campus fall precipitously, offerings would have to be reduced accordingly. Eventually, it would become necessary to permit that location to cease operations as a full-scale campus. . . .

Penn State should integrate fully the Commonwealth Campus system and the Office of the Vice President for Continuing Education into a single administrative unit. The current administrative separation of the Commonwealth Campus system and Continuing Education was an appropriate way of meeting educational needs in the state during the past 20 years. New demands of the '80s, however, suggest that, greater coordination and integration of the two units are desirable. Within the next year, the Commonwealth Campus system and the Office of the Vice President for Continuing Education should be integrated administratively. The President and the Provost of the University should work out details of this administrative integration with appropriate University consultative groups. . . .

This administrative integration would consolidate several existing dual systems including those for personnel appointments and evaluations, salary recommendations, registration, scheduling, record-keeping, fiscal transactions, and management information. It would assist in eliminating both real and perceived differences between the resident instruction and continuing education delivery system. The integration also would make available the central support services of Continuing Education to each campus to support its total program. Such services include planning studies, the development and preparation of proposals and contracts, marketing research, and comprehensive management and fiscal information systems. . . .

This administrative integration would not provide any new degree of authority for Commonwealth College faculty organizations in the area of initiation, development, or approval of either credit or noncredit programs in response to local needs. It also will not resolve continuing problems related to the implementation of the University's promotion and tenure policies across diverse locations. Although these academic and personnel issues have not been resolved, the administrative integration will provide a viable environment for pursuing their solutions. . . .

In addition to the integration, the faculty and administration of campuses in close proximity to one another may decide that the changing mix of students and programs is such that consideration should be given to consolidating programs, administration, and faculty of the campuses on a regional basis. Regional consolidation supports the goal of maintaining Penn State offerings in the area without additional resources. Under such an arrangement, campuses may be able to reinforce present strengths and identify new opportunities. Greater differentiation of function, e.g., baccalaureate versus noncredit programs, among campuses in a single region would allow each to keep at a minimum any competition with the other. This may have special importance in regions where the decline of high school graduates is projected to double

significantly. Cooperation would also promote program balance, greater flexibility in staffing and improved recruitment and public relations. Now under consideration is the establishment on an experimental basis of a consortium of the Hazleton, Wilkes-Barre, and Worthington Scranton Campuses in the northeastern region of the Commonwealth. Other regional campus consortia also should be considered. . . .

The Milton S. Eshersky Medical Center

The Milton S. Eshersky Medical Center will continue to educate physicians and other health-care professionals and to serve as the University's principal center for developing and offering these programs. . . .

The instructional emphasis in the College of Medicine will continue to be on graduate education in the life sciences and on the education of physicians interested in primary care and in practicing in underserved areas of the Commonwealth and the nation. . . .

Since the Medical Center, along with University Park, is a principal research center of the University, the College of Medicine will have significant continuing responsibilities for research in medical and life sciences. Significant contributions in the area of biomedical research have been made through the cooperative efforts of the College of Medicine and the Colleges of Science and Engineering at University Park. Similar efforts should be expanded in the future. . . .

The College of Medicine will continue to offer graduate medical programs in health-care areas and post-doctoral programs in conjunction with the Graduate School at University Park. The College of Medicine also should continue to take the initiative in cooperative arrangements with other colleges and individual departments at University Park, with selected Commonwealth Campuses, and especially with the Capital Campus in establishing programs to meet a projected public demand for allied health professionals. . . .

Behrend College

Behrend College will continue to be an important link in the University's mission to provide statewide educational services. In the 1980s, the College should continue to offer a high quality education in a small college atmosphere in a limited area of study. At the associate degree level, programs in engineering technology fields will be offered as demand warrants. In addition, the development of specialized two-year offerings in business, currently in process, is expected to meet local program demands. . . .

Lower-division enrollments at the College indicate that Behrend continues to attract students from the Erie area who plan to complete their baccalaureate degrees at University Park, a reflection of its original status as a Commonwealth Campus. The College should maintain those programs necessary to serve these students as one means of promoting overall campus viability. . . .

Since most of Behrend College's enrollment is drawn from the immediate geographic area, the future of upper-division and graduate-level course offerings is directly dependent upon local student demand. Because of changes in student preferences, the College's baccalaureate degree programs should be redirected increasingly toward business and other career-oriented programs. Graduate programs should be limited to the specialized areas related to the undergraduate emphasis and to the demand for upper-division courses and baccalaureate degree enrollment trends should be monitored closely. If substantial increases in upper-division enrollments do not materialize at Behrend College over the next three years, the four-year mission of Behrend should be reexamined by January 1983. . . .

Capital Campus

Capital Campus, a unique academic unit in the Penn State system, is charged with providing baccalaureate education at the junior and senior levels and selected graduate degrees at the master's level. . . .

Because of its geographic location near Harrisburg, the state's capital and one of the more prosperous areas of the state, the potential of the Capital Campus in the 1980s is considerable. The Harrisburg Area Community College is expected to remain the principal feeder institution to the Capital Campus. Special opportunities are anticipated in the Harrisburg area for graduate programs geared to an adult population and for rapidly developing programs of continuing education. Opportunities also should be explored for developing new curricular and public service programs to serve the needs of minority groups in the Harrisburg area. . . .

Entering the 1980s, Capital Campus may experience modest growth because its undergraduate curricular strengths in business and engineering technology coincide with society's current demands for such professional

education. At the same time, the campus must continue to be strong in the basic arts, humanities, and social sciences. . . .

Prospects for Capital Campus are enhanced further by several recent developments. The appointment of a community advisory board is expected to assist significantly in campus development and in community awareness and action. A more aggressive recruiting policy has been initiated, along with additional curricular offerings tailored to meet the special needs of the population which surrounds the center of Pennsylvania's state government. No graduate courses and programs in business-public administration, American studies, and mass media are being augmented. . . .

One important factor in the immediate future is the serious need for additional multipurpose laboratory facilities. As recommended in Chapter VI, private gifts in addition to state financing should be sought for this needed facility. In particular, such a facility would benefit greatly a proposed applied sciences program which would help in the development of joint programs with The Milton S. Eshersky Medical Center. . . .

Radnor Center for Graduate Studies and Continuing Education

... The organizational arrangement and the specific programs delivered at the Radnor Center should be considered closely and reassessed no later than January 1982. The types of programs, organizational relationship and leadership at the Center should be modified, as required. . . .

Need for New Focus

In order to achieve the desired level of quality and coordination in programs that transcend traditional disciplinary, college, and campus lines, as well as the three missions of the University, new administrative foci will be needed in the decade ahead. Health-related programs and programs within the international arena are two examples of the emerging areas deserving of increased coordination and emphasis. . . .

A Focus on Health-Related Programs

An increasing knowledge of the impact of environmental factors on health, a larger number of older people in Pennsylvania, an expansion of the current system of health care, and a higher value on the quality of life in the decade ahead will present demands for health-related educational programs that Penn State as a Land Grant institution should pursue rigorously. The University has a number of quality health-related programs scattered throughout the University—e.g., medicine, nursing, gerontology, nutrition, pharmacology, genetics, physiology, environmental health, pollution control, bioengineering, and medical equipment technology. It currently lacks, however, a sufficiently coherent policy on health education programs. . . .

Health manpower needs, student demand, and institutional capability should be examined in establishing priorities and selecting those programs in the area of health education which the University wishes to pursue. Although a separate college or school is not required, the University should create a new organizational focus to signal clearly its commitment and intentions to meet the health needs of the citizens of Pennsylvania. . . .

A Focus on International Programs

In an increasingly interdependent world, Penn State must provide a wide variety of international experiences for as many students and faculty and staff members as possible. A strengthened University-wide international division is essential to help education's graduates cope with the complex international events which have direct effects on their lives and to help them assume a role of community leadership in responding to these events. . . .

At present, responsibility for the development and coordination of these programs is fragmented in several offices across the University, limiting Penn State's ability to respond to emerging opportunities. To coordinate and manage University-wide efforts in meeting the above goals, the University should consider the establishment of an appropriately organized office. Such an approach would provide the visibility requisite to the creation of a new focus on international programs and the authority to carry out the task required. . . .

CHAPTER III ENROLLMENT PROSPECTS Factors Affecting Higher Education Enrollments

... The three primary external factors which influence the magnitude of higher education enrollments are: (1) the size of the population group typically associated with each level of

enrollment, (2) the proportion of this group eligible for attendance, and (3) the proportion of the eligible population electing to "participate" or enroll. . . .

Population

For the balance of this century, the effects of demographic forces upon higher education enrollment in Pennsylvania can be predicted with reasonable certainty. (See Figure 2.) . . .

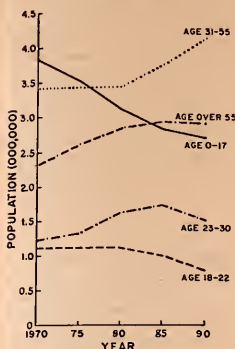

Figure 2. Pennsylvania Population by Age Sector (Actual 1970-78, Projected 1980-90)

Of paramount importance to the magnitude of future higher education enrollments in Pennsylvania is the population between 18 and 30. The age 18-22 group, from which over 70 percent of undergraduate enrollments are drawn, is expected to fall by 27 percent between 1978 and 1990, paralleling a 31 percent decline in high school graduates. The age 23-30 group, which constitutes about 70 percent of the enrollments at the graduate level and in a variety of adult education activities, will experience a modest increase in the '80s, but will return to its 1978 level by the end of the decade.

. . . the reduction in the number of high school graduates between 1978 and 1990 will not be distributed evenly throughout Pennsylvania. The greatest losses will be experienced in the western counties and in the region adjoining Philadelphia. . . . Since the Commonwealth Campuses and Behrend College draw most of their students from their immediate areas, wide variation in enrollment trends among campuses is likely to occur.

Participation

The future course of college participation rates among those eligible to attend is not as clear. In 1960, only 29 percent of Pennsylvania's high school graduates enrolled in college in the year after graduation. During most of the '60s, the rate continued about 70 percent of the decade, however, the rate stabilized at 45 percent and remained there for several years. . . .

. . . some analysts suggest that the economy of the '80s, with its prospects of slower growth and a composition less favorable to education-intensive sectors, will not offer economic incentives for college attendance comparable to those of the '60s. As a consequence, college participation rates could drop, perhaps by one-third or more, by 1990. . . .

Alternatives for the Future

Coupling the effects of changes in the college age population with those of college participation rates produces two different patterns for possible higher education enrollments in Pennsylvania between 1978 and 1990. If college participation rates stabilize at the level of the early '70s . . . enrollment would drop roughly 25 percent across the state. On the other hand, if college participation rates were to drop as well, then an enrollment decline as high as 50 percent could occur. . . .

Impact upon Penn State

At the present time, Penn State's enrollment position is relatively strong. Enrollments at the graduate level, and in nondegree credit and correspondence study have declined somewhat, whereas those at the undergraduate level and in the noncredit formal and informal program area show no signs of incipient erosion. The strength of the University's current position, however, does not imply that the more pervasive trends in population and college participation rates will

not influence Penn State's enrollments in the next decade.

For this reason, the projections of the University's enrollments in the '80s presented in the subsequent sections of this chapter provide an enrollment range for each enrollment category. The upper level assumes the college participation rates in effect in the early '70s, while the lower assumes a declining rate of participation. Penn State must take into account both of these possibilities in order to be in a position to respond appropriately. . . .

Resident Credit Enrollment

Resident credit enrollment is shown in three categories: undergraduate degree, graduate and medical degree, and nondegree.

The undergraduate degree enrollment category is comprised largely of 18-to-22-year-olds in full-time study for an associate or baccalaureate degree. Graduate students are older than undergraduates, and about one-half pursue their studies on a part-time basis. The nondegree category consists primarily of individuals from 18-30 years of age who have diverse interests and who usually attend on a part-time basis without an expressed degree commitment. For some, the objective may be preparation for matriculation as a degree candidate, but for others, attendance may be related to professional or specialized intellectual interests. Because each of these groups is unique, the forces governing their future enrollment prospects in each category differ. . . .

University-Wide Impact

Assuming that college participation rates remain the levels achieved in the early '70s, the University's total resident credit enrollment . . . is likely to drop by only 8 percent from 56,900 in 1978 to 52,500 in 1990. A severe erosion in college participation rates, on the other hand, could cause a decline as high as 40 percent to 34,300 in 1990. In both cases, most of the decline in enrollment by 1990, as depicted in Figure 4, will be in the undergraduate degree category, the largest element of the University's resident credit enrollment and the one affected most adversely by the population changes of the '80s.

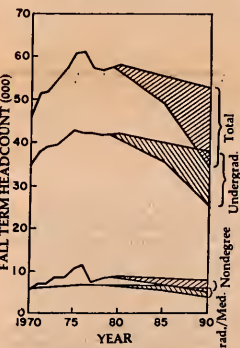

Figure 4. Penn State Resident Credit Enrollment by Category* (Actual 1970-78, Projected 1980-90)

*The upper limit in each enrollment category assumes college participation rates of the early '70s. The lower assumes the rates will drop by about one-third by 1990.

The drop in total resident credit enrollment, under conditions of stable participation, is expected to be concentrated largely at the Commonwealth Campuses . . . for three reasons. First, many of the campuses, designed to serve local area constituencies, are located in regions of significant college-age population decline. Second, if campus enrollments decline and, thus, the numbers of juniors and seniors moving to the University Park Campus decreases, the University Park Campus would be able to admit, within its 32,500 enrollment limit, a larger number of qualified freshman applicants who had named University Park as their first choice. This, in turn, would reduce the number of applicants available for referral to a Commonwealth Campus. Third, since the acceptance rate on offers of admission to campuses other than the student's first choice (referral admissions) declined to about one-half of the acceptance rate of first-choice applicants during the '70s, prospective students would be lost through referral. Therefore, the University should accommodate student choice when space is available. In the long term, it is likely that each Penn State campus will serve principally

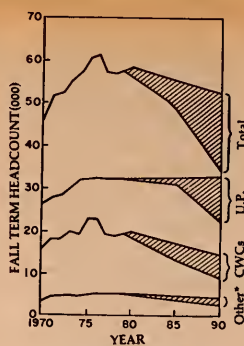

Figure 5. Penn State Resident Credit Enrollment by Location** (Actual 1970-78, Projected 1980-90)

**Behrend, Capitol, Hershey, and Radnor

**The upper limit in each enrollment category assumes college participation rates of the early '70s. The lower assumes the rates will drop by about one-third by 1990.

those students electing that campus as a first choice.

On the other hand, if an erosion in college participation rates were to occur, the numerical drop in resident credit enrollment between 1978 and 1990 likely would be almost equal at the Commonwealth Campuses and at University Park, as shown in Figure 5. Under these circumstances, none of the campuses of the University would have a sufficient number of qualified applicants to maintain current enrollments under the existing standards of admission. . . .

Resident Credit Enrollment Strategies

Penn State's enrollment also will be shaped by the manner in which the University responds to the forces governing changes in population and

effort. Penn State as a Land-Grant university has the responsibility to provide the educational, financial, and cultural environment which will assure that minority group students have the opportunity to succeed. To serve the Commonwealth of Pennsylvania fully, the University needs the many contributions provided by a diverse student body.

Qualified transfer students from other institutions also should be encouraged to complete their education at Penn State. . . .

Retention

. . . Each year nearly 15 percent of the University's undergraduate degree students withdraw.

. . . Penn State should continue to explore ways to improve student retention. Intervention strategies aimed at retaining students can be effective counter measures to potential enrollment declines.

Enrollment Through Continuing Education and Cooperative Extension

Although Penn State's size and impact often are judged on the basis of its resident credit undergraduate and graduate programs, the University serves far greater numbers of Pennsylvanians through its Continuing Education and Cooperative Extension Service programs.

Collectively, the students enrolled in these programs are usually beyond the typical college age and have diverse interests. Their educational experience is a part-time activity and their attendance is often intermittent. The activities which they pursue may be categorized as nondegree, noncredit programs, and correspondence study. . . .

Before considering these enrollments in Continuing Education and Cooperative Extension, however, another view of these activities must be provided. Many of these programs, particularly the informal, are delivered for periods which do not conform to the University's term calendar. New programs begin and end at various times during each term. Accordingly, in order to comprehend the full magnitude of these activities, annual program enrollments should be considered.

In 1978 total enrollments in credit, formal, informal, and correspondence courses through

Table 9
Penn State Other Credit and Noncredit Enrollment
(Actual 1970-78, Projected 1980-90)

	Fall Term Headcount (000)			
	Nondegree	Noncredit	Correspondence	Total
1970	7.0	14.4	2.8	24.2
1975	7.5	25.1	2.9	35.5
1978	2.6	26.6	2.4	31.6
1980	2.5-2.8	26.5-28.6	3.0-3.5	30.1-35.9
1985	2.2-2.6	25.0-29.8	2.9-3.5	30.1-35.9
1990	1.4-2.4	18.0-31.3	2.2-3.3	21.6-37.0

the rate of college participation. The central goal of Penn State's enrollment policy in the '80s should be the maintenance of the academic quality of the student body. . . .

Recruitment and Admissions

The determination of who is able to benefit from a higher education should continue to be made on academic grounds. Although recruitment strategies should be directed toward improving participation rates, Penn State should continue to admit to degree programs only those students who are qualified academically.

. . . The University will devote special attention to increasing the proportion of highly qualified Pennsylvania high school graduates applying to Penn State. A new emphasis on recruiting out-of-state students also should be established and further incentives for these students to attend Penn State developed. Alumni should be a valuable resource in this effort. Special recruitment efforts should be targeted at the upper admissions categories both within and outside Pennsylvania to encourage academically gifted students to consider Penn State. High school students with special talents should be made aware of the opportunities in their fields which Penn State can offer. . . .

Special recruitment programs for minority students at the graduate and undergraduate levels will be continued and improved. The community centers in Philadelphia and Pittsburgh and the special office for minority student recruitment in the Graduate School should be maintained as a way to reach out to members of minority groups. The service of minority group alumni and community leaders should be sought in an increased recruitment

Continuing Education were approximately 140,000. For the same period, educational service provided by Cooperative Extension in farm technology, family living, nutrition, community development, and 4-H youth reached enrollments in excess of 2.5 million. Educational meetings sponsored by Cooperative Extension and conducted by Extension staff and volunteers were attended by 1.2 million people. . . .

University-Wide Impact

Assuming stable participation rates, enrollment in Penn State credit and noncredit education activities under the auspices of Continuing Education and Cooperative Extension, as summarized in Table 9, will rise from 31,600 in 1978 to 37,000 in 1990, a gain of 17 percent. An erosion in participation, particularly in noncredit programs, could cause a decline of 32 percent, from 31,600 to 21,600 by 1990.

Conclusion

. . . The University must enter the '80s with an aggressive recruitment program and the flexibility to add and contract at various levels and locations as needs arise. Such a posture will allow Penn State to retain control of its destiny, emphasizing selective excellence in its admissions standards and academic programs.

CHAPTER IV THE DEVELOPMENT OF STRENGTH: FACULTY AND PROFESSIONAL STAFF*

By the end of the '80s, if the University is to emerge as a stronger, more flexible and vital institution, it must attract and retain a faculty and professional staff of the highest quality and commitment. A climate of intellectual freedom, diversity, and challenge must be preserved and enhanced.

Professional Development and Vitality

A series of conditions facing the University intensifies the need to give attention to the professional development and vitality of faculty and staff members. In contrast to the past decade in which academic personnel were highly mobile and the number of young professionals entering the University exceeded the number of those retiring or moving on, faculty and staff members in the 1990s are likely to be older and less mobile.

In order to maintain and extend the intellectual quality, vitality, and flexibility of its faculty and staff members, the University should encourage faculty and staff members to take advantage of existing opportunities for professional growth and development. For example, many eligible faculty members have not applied for sabbatical leaves because of instructional and other demands. The value of the infusion of new ideas is so important that department heads, directors, and deans should see that fiscal resources and encouragement are provided to take advantage of such opportunities. Additional opportunities such as time to engage in intramural and inter-institutional exchange programs, professional meetings across disciplines, and experiences in business and industry should be developed. Deans, department heads, and directors of campuses, divisions, and research units, working together with senior faculty members, bear the responsibility for taking the lead in assuring continued academic growth and high productivity on the part of all members of the faculty and staff.

Academic freedom is the lodestone of faculty education nationally and at Penn State. In particular, may pose threats to that freedom. If faculty and staff members become increasingly security conscious, they may tend to become more conforming and feel less free to pursue riskier, albeit potentially productive, avenues of inquiry. It is not easy to determine what is truly innovative. The tendency to innovate, however, may decrease both in instruction and in research unless innovation is encouraged and supported actively. The University should promote intellectual risk-taking and the vigorous exchange of ideas.

Although research and scholarship are required of all faculty members, junior faculty members need an extra dimension of encouragement and assistance. Special efforts to assist junior faculty members as researchers and teachers should be implemented, including, whenever possible, increased seed money for research projects, time for concentrated study and writing, and the opportunity for collaboration with senior faculty members or in intercollege research programs. Early, clear evaluations of academic performance must be provided to junior and non-tenured faculty members.

The senior faculty members from whom high productivity already is presumed should receive encouragement and rewards to redouble their efforts to obtain external funding for research and to continue to build the reputation of the University in the areas of teaching and public service. . . .

Affirmative Action

A vital academic climate draws strength from a pluralistic faculty and staff which includes a mix of ranks, ethnic groups, sexes, ages, and social backgrounds. At present the University faculty and the professional staff do not reflect adequately the diversity present in the society at large. The relatively small number of women and minority group members on the faculty and in the administration after six years of affirmative action indicates that the University must devote even more energy to this effort. Women and minority group members should be encouraged to enter fields in which they are underrepresented. The University should increase its efforts to enhance the diversity of its academic personnel by fulfilling its goals in its Affirmative Action Plan and by providing added incentives to retain these individuals following appointment. . . .

Academic Personnel Policies

The quality of the University's faculty and professional staff members is related to the quality of its personnel policies, i.e., its appointment, evaluation, tenure and promotion, and compensation criteria and procedures. The University's increased selectivity in missions and programs should be reflected in the academic reward system. The President and Provost, in consultation with the University Faculty Senate, should continue to be responsible for the ongoing evaluation of criteria and procedures used in the appointment and evaluation of faculty and staff members.

Appointments

In the decade ahead each faculty and staff appointment is likely to receive even greater scrutiny to insure that the University's interests are served fully. Departments and programs in which appointments are made should be expected to provide more evidence that a new faculty or staff member is the best person available and that the appointment represents a high priority for the mission of the unit. . . .

Increasingly, short-term research and instructional demands are being met by appointing faculty and staff members on non-tenured appointments. The University should continue to provide fair treatment in assignment and compensation to non-tenured appointments. The University Faculty Senate should encourage an appropriate voice in governance for these individuals.

If morale is to remain high, faculty and professional staff members must retain a strong sense of both freedom and responsibility in their work. To promote this sense and to insure flexibility and initiative, the University should encourage more flexible appointments and contracts, including increased opportunities for possible joint appointments, faculty exchanges with other institutions, and short-term leaves of absence for intensive research, teaching, or public service assignments outside Penn State.

In 1982, the mandatory retirement age for tenured faculty members will increase from 65 to 70 years of age. The number of persons choosing to retire at the mandatory age will continue unless additional incentives are provided to encourage earlier retirement. . . .

Evaluation

Faculty and staff members at Penn State are expected to perform their assigned responsibilities at the highest levels of professional excellence. In return, Penn State faculty and staff members expect that each person will be recognized and rewarded on the basis of the merit with which assignments are carried out. Means should be devised for evaluating and rewarding excellence of performance. An individual faculty member's assignment differs greatly, however, in the proportion of effort allotted to instruction, advising, research, and public service. Many faculty members are experiencing conflict in setting priorities among these areas. Faculty members are expected to meet high standards for performance in all areas, for instance, and to contribute equally to both unit and University missions.

The problem is exacerbated for the one-quarter of Penn State's faculty at the Commonwealth Campuses. The Commonwealth Campus system is administered academically by colleges and departments at University Park, with local assignments made by the campus director. These faculty members must be responsive to demands by both department heads and campus directors. In addition, they feel some professional isolation because of their geographic separation from their departments. In some cases, there is no critical mass of faculty members at a campus with similar research interests. Morale suffers as a result. The University should be sensitive to the special demands placed on Commonwealth Campus faculty members who often exert extraordinary effort to participate fully in University-wide affairs. As the details of the administrative integration of the Commonwealth Campus system and the Office of the Vice President for Continuing Education are worked out, the academic and personnel issues which remain unresolved should be studied.

Performance assessments of faculty and staff members should occur regularly during all stages of their careers and should reflect the variety of assignments performed. Supervision of the review process is the responsibility of the department or campus director who includes opportunities for peer review from both inside and outside the University.

Individual faculty members who have achieved tenure or the rank of associate professor or above should expect to undergo a thorough review of their performance and workload on a regular basis. Individuals who are ineffective in high pressure assignments become an increasingly costly drain on scarce

University resources. The University Faculty Senate in conjunction with the President, the Provost, and deans should devise incentives to assist department heads and campus directors in evaluating and encouraging the academic effectiveness of all faculty members regardless of rank or tenure status. Faculty and staff members should expect to know as explicitly as possible where they stand and what the future is likely to provide.

Promotion and Tenure

The purpose of academic tenure is to preserve academic freedom, the *sine qua non* of university life. It undergirds the professional dignity of faculty members whose performance has met the expectations of the excellence. Without the freedom to teach, to search, and to disseminate ideas openly and without fear, the University and the individuals within it cannot achieve true excellence nor aspire to greatness.

All faculty members must be scholars and must demonstrate continually their capacity for superior scholarship. Decisions to grant promotion or tenure must first address qualitative considerations. Promotion and tenure decisions also involve, however, a long-term commitment of fiscal and academic resources on the part of the University to the work of the individual faculty member. The impact of personnel decisions on program and probable financial resources increasingly must be taken into consideration in the tenure process. . . .

The University must provide consistent and fair promotion and tenure review processes which stress excellence and due process. The recognition in evaluation processes of the diversity of assignments of faculty members within and among all divisions, campuses, and departments causes deep concern to some faculty members. The evaluation process leading to both promotion and tenure must be sensitive and fair to the persons being evaluated.

Probationary faculty members in general and Commonwealth Campus faculty members in particular may need greater assistance from their department heads and campus directors to understand the criteria on which their efforts are evaluated and the weighting of individual criterion. The kinds of work required to meet the criteria and how a particular assignment fits into the overall mission of the University should be made clear. Every effort should be made to assist probationary faculty members to assess early and realistically the likelihood of gaining tenure.

Promotion must be based on clear criteria of excellence. Mere longevity and seniority in rank are not grounds for promotion. Individuals should provide evidence of continuously superior performance and peer esteem.

Compensation

The University faces a challenge in attempting to keep its salaries and fringe benefits for faculty and staff members fully competitive with similar institutions and other professional opportunities, as well as truly reflective of individual accomplishments. Faculty compensation University-wide will be eroded greatly under present rates of inflation unless means are found for immediate and long-lasting support.

A compensation strategy for faculty and staff members that is responsive to the diversity of competitive pressures of assignments and responsibilities is essential. Such a strategy should reaffirm Penn State's commitment to award compensation on the basis of merit rather than on an across-the-board basis.

Academic Leadership

An era of increased selectivity requires different patterns of academic decision making which will make new demands on academic leaders at all levels. While there will continue to be a need for committees composed of faculty and staff members to advise administrators and to review decisions, it is impossible and undesirable to free administrators from the necessity of making difficult choices. Courageous leadership is essential and must be exercised by those in positions of academic authority — the President, the Provost, deans, campus directors, and department heads.

The leader must have the responsibility and the authority consistent with high expectations. Department heads, deans, and campus directors must be held responsible for both programs and budgets within their academic purview. Accountability requires that the criteria on which decisions are made be disclosed to those affected by the decisions; that those affected by the decisions have the right to be consulted prior to the decision; that the process by which decisions are reached is well understood; and that adequate opportunity be provided for reactions after decisions have been reached.

Individual academic leaders need better preparation for their roles. Department heads play a pivotal role in the appointment,

evaluation, and reward of faculty and staff members, for example, and they also must manage an ever-increasing amount of information department heads and campus directors in managing their responsibilities, a leadership development program should be instituted to include on-campus sessions, expanded opportunities to attend various regional and national programs, and other training opportunities. The University reward system should reflect the importance of involvement in leadership responsibilities and should promote effective performance.

A special need exists to identify and develop women and members of minority groups for leadership positions. The University should step up its efforts in this regard, using the Provost's Fellows Program and similar programs at the college and campus levels. Because of the small number of women and minority group members available to move in leadership and advisory positions, however, such responsibilities may multiply disproportionately beyond regular roles. In performance assessments, the University should be sensitive to the additional roles such individuals may be performing.

Governance

Shared responsibility for governance between faculty members and administrators is essential for the effective functioning of a major university. Although primary responsibility for certain specific decisions must lie with either the faculty or the administration, both faculty members and administrators must participate actively and constructively in the making of decisions establishing the policies and operations of the University. . . . Both faculty members and administrators should exercise initiative and leadership in the academic enterprise. Together they should establish general priorities and work to insure the flexibility of the University while maintaining its essential nature and high quality.

Faculty participation in governance is visible most often through the interaction of the Senate and the central administration. Consultation between faculty members and senior administrative officers through the Senate's committees should be enhanced. The Senate committee structure should continue to be organized generally parallel to the central administrative structure of the University. The Board of Trustees should continue to maintain communication channels with the faculty by inviting the Senate officers to attend regular meetings of the Board of Trustees and its committees.

Continued attention should be given to the provision of appropriate faculty consultation at the department, college, and campus levels. Joint faculty-administrative planning of departmental, college-campus academic programs and identification of resource priorities should be emphasized. Commonwealth Campus faculty members . . . should have appropriate opportunities to participate in decision making at the department and college levels.

Although a distinction may be drawn between consultation and decision making, clearly the channels of communication between faculty members and administrators should be available and used during the '80s when the University is required to exercise great flexibility. Effective shared governance depends upon a sense of community, trust, and mutual accountability. Regular consultation between faculty members and administrators should be maintained for smooth departmental and college operations, and persons or groups who provided consultation and advice should be informed of final decisions and the reasons they were made.

Meaningful joint governance helps to insure high morale and continued faculty vitality, but the primary functions of faculty members are to teach and conduct research and public service. . . . Without reducing the effectiveness and extent of faculty participation, the University should seek continuously to strengthen and sharpen joint governance mechanisms while making more efficient and productive use of faculty members' time.

Responsiveness to Shifts in Demands

Changing student preferences and societal demands in the next decade will result in the need to shift resources among areas of study and among instruction, research, and public service. To accommodate these changes, efforts should be made to increase faculty flexibility.

Instructional and Public Service Response

The responsibility to carry it's research, services, and teaching to the people of the commonwealth is a unique mandate of Penn State as the Land-Grant University. The diversity of citizen concerns and issues should be addressed with renewed vigor by faculty and staff members from across the University, and creative initiatives in continuing education and

*The issues addressed in this chapter are limited to the special concerns of faculty and professional staff members. Discussion within the Task Force and the Steering Committee related to the many concerns of other University constituencies. These will require further study and clarification.

Cooperative Extension and other agencies of public service should be encouraged and rewarded.

To meet student interests in specific new programs and courses which are consistent with its central thrusts, the University should encourage the development of instructional consortia among faculty members in the areas of high student demand. The University also should experiment with ways to enable faculty members to participate in cooperative arrangements, involving both geographic and cross-disciplinary ties, in order to offer more effectively its academic programs.

Research Response

The effort to develop new knowledge is highly competitive and fast-moving. In order to maintain its reputation as a leading research university, Penn State, through its faculty and research staff, should develop new research initiatives.

The University Park campus and The Milton S. Eshesby Medical Center have been designated to carry the major research mission. . . . More faculty members need to devote more time and energy to research, whether internally or externally funded. The additional resources generated by internally funded research as well as the new contributions to knowledge by research are vital to the University and the Commonwealth. Greater efforts should be made to assist faculty members in developing research programs and in seeking external funding sources.

. . . Research institutes are an excellent response for responding to national research priorities. Research personnel should be integrated more thoroughly into the mainstream of faculty life.

The leading edge of research is frequently at the boundaries of two or more disciplines. Individual faculty and staff members who demonstrate particular interest and ability to work in new interdisciplinary and interdepartmental teams should be given strong support at all levels as well as increased recognition. Funds should be allocated for special efforts to initiate and stimulate interdisciplinary initiatives. Deans and department heads should encourage inter- and multi-disciplinary research so that their faculty may be engaged fully in productive and professional research.

Program Consolidation

Earlier in this Plan the consolidation and realignment of some academic units and programs were recommended. To govern this consolidation, realignment, the University should adopt the criteria of quality, demand, cost, and flexibility. Although consolidation efforts should not be motivated solely by cost, any strategy of consolidation and realignment should be linked to the on-going program and budget evaluation cycles. Every effort should be extended to provide sufficient lead time to involve adequate consultation and adjustment. Final decisions, however, should not be delayed unnecessarily. Effective and open disclosure and administrative accountability are essential foundations for successful consolidation efforts. Well-analyzed, selective consolidation and realignment that are geared to long-term academic effectiveness and excellence are more likely to accomplish the goal of a strong and secure University.

The Provost should continue to allocate resources which will permit colleges to make temporary appointments to meet unexpected program demands and new opportunities. The University should provide tenured faculty members whose programs and positions have been reduced or phased out with assistance in relocation or retraining. Funds should be made available for this purpose. Faculty and staff members should be informed of their rights of job security, fringe benefits, and other matters, and feel free to exercise them. . . .

CHAPTER V THE DEVELOPMENT OF STRENGTH: STUDENTS

Each generation of students makes its own significant contribution to what a college or university purports to be. Although the needs and expectations of students change, the students' contributions can become far more pervasive of the total collegiate experience. A goal for Penn State in the 80s should be the enhancement of the relationship between the University's academic programs and the life of its students.

Academic Concerns and Expectations

. . . One of the goals of the Land-Grant philosophy is to combine quality with access, i.e., reasonable cost. Neither should be sacrificed at Penn State. The University must safeguard its financial base, but it also must strive to ease the

students' financial burden. The students' proportionate share of the cost of education should be increased only when all other measures have been exhausted. . . .

Student input should be a crucial part of any discussion regarding baccalaureate degree requirements. . . .

In addition, where students express a career concern, expansion of practical experience programs may be appropriate. . . .

Instruction and Advising

In any large university, the quality of instruction and advising varies widely from department to department and from instructor to instructor. But must be strong. Departments should take the responsibility for determining that adequate standards of instruction exist for all their courses, and improvement should be required of instructors who are not meeting these standards.

At University Park, large classes, dictated by financial realities, tend to induce a feeling of anonymity and automation on the part of students. Faculty members and teaching assistants should be alert to the difficulties that they and their students may encounter in large classes. Departments should screen all faculty members and graduate assistants involved in classroom instruction to confirm that they possess sufficient command of the English language. Orientation and training programs for all teaching assistants should be instituted to assure that they are not only knowledgeable in their fields but also have a command of basic teaching techniques and procedures.

At the Commonwealth campuses, efforts must be made to provide instructors with some variety in teaching assignments whenever possible. It is the rare individual who can make the ninth section of the same course taught in the same year as vital and exciting as the first section taught that year. When televised and programmed courses are offered, they should be augmented by opportunities for individual sessions between students and instructors.

Participation in Decision Making

. . . The most important and far-reaching results of student participation in decision making can be achieved at the department and campus level. It is there that students can participate in course and program development and in the evaluation of teaching, courses, and prospective faculty members.

The extent to which students and faculty members take advantage of the mechanisms available for participation in decision making varies widely. Students should have the opportunity to participate in making decisions that affect them at all levels of the University in the decade ahead. The obligation to participate, once assumed, brings with it responsibility to perform actively.

Concern for the Extracurricular Environment

The philosophical approach taken by any institution of higher learning toward its student body is an essential factor in determining the overall climate in the university community. The institution's goals for, as well as expectations and treatment of, its students can create a positive experience for each individual. A Penn State education should be much more than a series of disconnected exposures to various academic disciplines with periodic examinations interspersed. The extracurricular, as well as the classroom environment at Penn State, should encourage creativity, intellectual growth and expression, and self-reliance. One of the University's main tasks is to help its students develop as responsible, mature individuals.

The level and quality of interaction between students and faculty members, administrative officers, and professional staff members is an important element in student development. Involvement of University personnel in those aspects of student life which take place outside the classroom, including service as advisors to student organizations, participation in residence hall programming, and other activities involving student-staff dialogue, should be encouraged and recognized. . . .

Commuting and Off-Campus Residents

. . . students hold part-time jobs which take up much of their out-of-class time. Efforts should be made to schedule more cultural and social programs for these students at convenient times, e.g., programs should be offered during the day between classes and on weekends.

Residence Hall Students

. . . The need to replace the obsolete Nittany Halls and to house a greater number of freshmen as the mix of students at University Park changes in the decade ahead suggests that the availability of on-campus housing be reassessed at University Park. If need be, demonstrated, planning for construction should begin soon.

The construction or renovation of residence halls, plus imaginative use of existing space, would provide an opportunity to experiment with different approaches to the size and type of living facilities, their structural configuration, and method of supervision. Living environments more in tune with the academic purposes of both the student and the University might be developed. . . .

A Diverse Student Population

In planning for the decade ahead, the Land-Grant university of the Commonwealth should continue to recruit a student body that reflects Pennsylvania's rich, pluralistic cultural heritage. While the University is more than just a sum of its parts, several distinct segments of the student population have special needs and interests.

Ethnic and Racial Minority Students

The educational and cultural climate of the University and communities which surround its campuses is oriented heavily toward the majority student population — a situation which presents particular problems for students from minority ethnic and racial groups. . . .

. . . Efforts should be stepped up to provide encouragement and assistance to minority students through special programs for minority faculty members and alumni. The University should explore the possibility of student exchange programs with Pennsylvania's two predominantly Black colleges and consider developing an industrial council to provide financial support and summer employment opportunities for minority students. . . .

Women Students

. . . The University is committed to insuring that all academic programs are open to women and that resources are allocated to meet women's needs for extracurricular activities, counseling, and leadership opportunities. Penn State is a leading educational institution in precisely those career areas in which women have been underrepresented in society. In the decade ahead the University should increase its efforts to encourage women to enter its many scientific and professional programs. . . .

. . . Through such efforts as women's studies and other special programs, the University should strive to promote contact between women students and women leaders on campus and in society.

Because women comprise the majority of participants in continuing education programs, those responsible at Penn State for planning these programs must remain sensitive to women's educational interests and alert to facilitating their participation.

International Students

. . . In the decade of the 80s, Penn State continually should assess and adapt academic and out-of-class programs to meet the changing needs of students from other countries. . . .

Nontraditional Students

In the years to come, nontraditional students — those who are older than the traditional 18- to 22-year-old college group — may form an increasingly important segment of the student population. . . . Efforts should be made to facilitate their integration into the University community. . . . The University should avoid thinking of students as a homogeneous group and should respect the maturity and integrity of all students. . . .

Graduate Students

. . . Penn State should be more sensitive to the special needs of its graduate students and make available to them the same information on housing, grant-writing, insurance, and taxes.

Approach to Student Services

As with other University programs, the provision of student services should be evaluated according to the criteria of quality, need, and cost. . . .

Because of the escalating costs of higher education, some authorities have advocated separating the cost of various support services from those directly concerned with the educational mission of an institution. . . . This fee-for-service-rendered approach already in limited use for example at the Ritner Health Center, where students are charged for prescriptions and rooms but not for the physician's examination. Extension of this principle to other services should be studied.

Conclusion

The student will continue to be the focal point of the University's concern at all levels. The concern for quality extends beyond the classroom into all aspects of the student's life. Understanding and interaction among thousands of students of diverse racial, ethnic, regional, and national heritages, apart from intellectual and personal growth. Changes in the University will be evaluated, therefore, in terms of minimizing the costs of students and enhancing

the quality of their education and personal development.

CHAPTER VI THE CHALLENGE OF THE 1980s: RESOURCE REQUIREMENTS

Policy Variable Trade-Offs

. . . Four major policy variables affect the real value of University resources: state appropriations, tuition, personal services compensation, and the number of personnel. It is not realistic to expect that any single variable, such as increases in state appropriations, will resolve the University's continuing cost-income squeeze. Consequently, the University will be required to make trade-offs among all four variables. . . .

. . . There are relatively few combinations of these variables which result in a balanced general funds budget, thus indicating the nature of the "cost-income squeeze" facing the University. . . .

Expenditure Policies

A number of qualitative issues need to be investigated in analyzing policy alternatives that might be considered. . . . Such an investigation will yield expenditure policies to guide the University's annual budget decisions through the 1980s.

Academic and Staff Salaries

The core element in the University's academic program is the quality of its faculty and staff. Academic and staff salaries also constitute over 70 percent of the University's general funds budget. . . . Each one percent change in academic and staff salaries would cost/save the University \$1.6 million. If no salary increases remain the same. Further, because salary increases in one year form the base for succeeding year salary increases, changes in this policy variable have a cumulative effect over time. This effect is pronounced if the personnel turnover rate is low.

Despite these substantial fiscal implications, the University should maintain salaries that are competitive with comparable universities and general labor market conditions in order to attract and retain the best faculty and staff members. Salaries should be adjusted to achieve equity and to reward meritorious performance in teaching, research, and public service.

Nonstanding Academic Positions

Closely related to the issue of academic and staff salaries is the question of the number of nonstanding academic positions, i.e., commitments to persons for a fixed period, such as one year. In 1977, nonstanding academic salaries accounted for 18 percent of total academic salaries. . . .

The University should review continually the proportion of the total faculty holding nonstanding academic positions. Such reviews must balance the factor of increased flexibility against the impact of losses in the cohesiveness of departmental programs, the continuity of departmental standards, and the quality of student advising.

Student-Faculty Ratio

In 1978-79, the University's overall student-to-faculty member ratio was 19 to 1. The University at least should maintain and, where possible, reduce this ratio. . . .

The student-faculty ratio may be influenced by other aspects of the academic system. The University should reexamine academic support structures, including the term system — especially the summer term, to identify resources that might be reallocated to effect a reduction in the student-faculty ratio.

Academic Support Services

. . . All support programs should be reviewed periodically, just as are academic programs, using quality, need and cost criteria.

University Libraries. Access to information is a necessary condition of teaching and research. In the decades ahead, the University's Libraries will be confronted with major problems arising from continuing, rapid increases in the amount of information to be stored, a higher rate of inflation for library materials, technological advances in the storage, processing, and retrieval of information, and increasingly tight budgetary constraints. The University should seek to reverse the decline in the purchasing power of the materials budget of the University Libraries.

The University Libraries should continue to give attention in the allocation of their acquisition monies to those program areas of highest priority to the University. . . . Information needs of the University which transcend the boundaries of individual academic programs also should be identified by the Libraries.

Departmental support services. . . . In addition to reductions from the internal reallocation of

funds, rising costs have eroded seriously the value of departmental resources. The University should improve the purchasing power of departmental budgets. . . .

Information systems. . . . In particular, the University should seek an objective evaluation of its current information processing capabilities, survey the state of similar institutions, and plan for a comprehensive modern system of data processing. Development of any new information systems should insure that adequate security procedures are incorporated so that privacy is protected fully.

The University also should work toward development of an interactive computing capability for instructional, research, and administrative purposes. . . .

. . . the current state-of-the-art in computing technology is rapidly developing in such fields as microprocessing, personal computing, and interactive communication, computing and processing. Penn State should develop a comprehensive and coordinated computing environment. . . .

Other support services. . . . The University should ensure . . . that all academic support services are reviewed periodically as to (1) their continuing need, (2) duplication, and (3) efficiency.

Internal Reallocations

The University is increasing selectiveness in the 1980s will require reallocation of resources according to priorities. Qualitative growth should be achieved partly by reducing and eliminating low priority programs and the resources associated with them. Consequently, the University should develop more explicit policies for program discontinuance. An integral element of these policies should be a statement of University obligations toward faculty and staff members affected by program closure, specifically its obligations concerning their retaining, transfer, and/or notice of termination.

Income Policies

To finance and maintain quality programs, the University must receive substantially increased support from state appropriations, external contracts and grants, and private gifts. . . . During the 1980s, trade-offs between income and expenditure policies and a vigorous search for new sources of income will constitute the University's principal fiscal challenge.

State Appropriations

. . . since 1972 inflation has increased 65.7 percent, while Penn State's appropriation from the Commonwealth has risen only 45.3 percent. In the same period, the University has found it necessary to increase tuition 73.7 percent. As a result, the fraction of the University's total budget supported from state funds also has declined. In 1972-73, the appropriation represented 50.5 percent of the real resources per student expended by the University, while in 1978-79 this percentage had fallen to 47.8 percent.

It is the University's intent to preserve the vast resources of its major public and Land Grant university, the Commonwealth should increase substantially its commitment to the University by a return to providing at least a 50 percent share of real expenditures per student. The University should make every effort to emphasize to Pennsylvania officials and to the public at large the contributions the University makes to the Commonwealth and the consequences of not providing this support. . . .

External Contracts and Grants

An important financial component in quality graduate and research programs is the support derived from external contracts and grants. Between 1972-73 and 1977-78, the real value of sponsored research funds obtained by faculty members had slipped modestly from \$22.4 million to \$21.9 million. . . .

Because contracts and grants result primarily from active solicitation by faculty members, the University should establish increased incentives to faculty members as suggested in Chapter II. Specifically, policies concerning the allocation of income from all sources, including the recovery of indirect costs, should be reviewed.

Private Gifts

. . . In its private fund raising, the University should give highest priority to raising funds for programs that can be funded only with private monies, e.g., endowed chairs, merit scholarships, and an enriched campus environment. Private giving can be combined effectively with general funds of the University; the Provost's Matching Fund is an example of this successful melding of forces. The Fund encourages departments and individual faculty

members, working with the Office of Gifts and Endowments, to solicit support for the replacement of worn-out or technologically obsolete instructional and research equipment. Although most private gifts will continue to be designated gifts, the University should increase the level of undesignated gifts whenever possible.

Student Tuition

. . . Increases in tuition need to be considered within the context of University efforts to economize, to be more efficient, and to generate additional income from all sources. The students' proportionate share of the cost of education should be increased only when all other options open to the University have been exhausted. Increases in student tuition should be coupled in the future, as they have been in the past, with a thorough review of the University's financial policies and practices. This review should ensure that all students apply for and receive that financial assistance for which they are eligible.

Policies to Increase Efficiency

As part of its strategy for adapting to the 1980s, the University should review policies that influence each of its various budget centers. In such a review, the central issue is: How can the operation of each budget center be enhanced to respond to the unique opportunities within its area and to strengthen the University as a whole? Three questions are critical to the resolution of this issue: (1) What is the nature of the problems confronting the budget center? (2) What type of leadership is expected? and (3) How is academic planning within the budget center linked to fiscal realities?

The University should examine the income-expenditure relationships for each academic unit. Such an examination would provide a comparison of the resources allocated to and the income generated by each unit. Because operating expenditures generally exceed directly attributable income, their difference constitutes a measure of the degree to which each unit is supported by general University funds. Such a measure indicates the "actual" level of general University support provided to each unit.

As an analytic and planning tool, this measure of "actual" resource allocation will be critical to decisions regarding the development of new programs, the continuation of existing programs and colleges, and the discontinuance of low priority programs. In each case, a measure of the extent to which a program or unit is or will be supported from general University funds is essential to the determination of University priorities. The use of such a tool does not preclude the University from attaching a high priority to a new or existing program which would require substantial allocations of general University resources. . . .

Capital Budget Planning

. . . Four principles are suggested for the review of capital budget proposals. First, space recovery and reallocation should be studied carefully. In most situations, the modification of existing facilities will be less expensive than constructing new ones. . . .

Second, to offset the effects of deterioration due to age, the University should continue to keep its present facilities in good operating condition. . . .

Third, the financing of capital projects should not create an unnecessary additional burden on the University's general funds operating budget. The University should seek aggressively state and federal funds for needed renovations and alterations. . . .

Fourth, capital projects should help to keep the University's maintenance and operating costs at a minimum. . . .

. . . the replacement, maintenance, and updating of research and instructional equipment should be considered in all capital budget planning. Maintaining high quality in instruction and research requires that the University's equipment be fully operational and contemporary. . . .

CHAPTER VII

AGENDA FOR ACTION

The objective for this Perspective on the '80s is twofold: First, to provide a statement on the status of Penn State as the decade of the '70s closes, and second, with this understanding, to provide initial directions in the '80s for the University by setting its priorities for the accomplishment of its objectives. Both the Plan and the process by which it was prepared serve to demonstrate the necessity of responsible stewardship of this Institution's resources and concern for the needs of the Commonwealth and the nation.

For the future, Penn State has declared its intention to achieve excellence in all it chooses

to pursue. The realization of the highest standards of quality will not be easy, and only by making difficult decisions of selectivity will excellence be attained. In striving for excellence in a period of uncertainty and rapid change, the University also must improve its flexibility. Alternative courses of action must be devised, and decision-making mechanisms must be refined so that changes may be made expeditiously and effectively to meet each new situation. If selectivity is exercised and flexibility is embraced in planning, then the University will emerge from the decade of the '80s a learner, though healthier, institution.

Implementation

Within several months following adoption of the Plan by the Board of Trustees, the President and Provost in consultation with the Faculty Advisory Committee and the Student Advisory Board will develop a program of implementation. Where appropriate, responsibility will be assigned to administrative officers, academic units, and committees for implementing specific recommendations, for conducting studies as needed, and for initiating discussions of tentative proposals presented in the Plan. As recommendations requiring Board of Trustee action are identified, they will be taken to the Board for consideration.

Ultimately, the implementation of any single recommendation cannot achieve the broader objectives. The attainment of these objectives is the responsibility of all members of the University community.

Monitoring Progress

The social and demographic perspectives which will affect Penn State during the 1980s are still evolving. Some of the stronger forces may not have their full impact until the middle of the decade. This Plan must be viewed as an agenda for action. Consistent with its objective, the Plan as well as the University must remain flexible. The success or failure of the Plan should be judged not by measuring whether any one or two recommendations have been implemented, but by the University's adaptability to changing conditions.

Redefinitions, reevaluation, and revision of the Plan, therefore, will be an ongoing process.

Accordingly, the University Council is charged with monitoring the implementation of the recommendations. Under the chairmanship of the Provost, the Council will explore the timeframe for implementing each recommendation and periodically will reexamine both the explicit and implicit assumptions and projections made in the Plan with the responsible individuals or offices. In March of each year the Council will provide a progress report to the President of the University, who will report, in turn, to the Board of Trustees.

Summary of Recommendations

The objectives of quality, selectivity, and flexibility have provided the framework for analyzing the University's missions, projected enrollments, faculty and professional staff issues, and student concerns. The recommendations which are summarized from the preceding chapters and are presented according to the objective each is meant to fulfill, rather than in the order in which each appeared in the text. Within each section, related recommendations are grouped together. . . .

The order in which recommendations are presented is by design. Effective leadership and decision making are required for Penn State to enhance quality. Thus, although the recommendations regarding leadership and decision making are drawn from the middle of the text, they are presented first in this summary. Following in order are recommendations regarding the quality of faculty and staff members and students, the quality of programs, both instructional and research, and the quality of student life.

Similarly, selectivity is influenced by the process for setting priorities, by the criteria used to set them, by specific strengths to be enhanced, and by new directions to be explored. Finally, to extend the University's flexibility, organizational changes are needed as well as more flexible policies regarding programs, personnel, and resources.

Recommendations

To maintain its position as Pennsylvania's capstone university, QUALITY must be the goal of all aspects of Penn State — leadership, faculty and staff members, students, and programs.

To Enhance QUALITY of Leadership and Decision Making, Penn State must:

1. Exercise creative academic leadership at all levels.
2. Prepare academic leaders better for their roles:

- a. Institute an academic leadership development program;
- b. Expand the Provost's Fellows and similar programs;
- c. Expand opportunities to attend regional and national leadership development programs;
- d. Identify and develop women and minority group members for leadership positions
3. Provide academic leaders with authority consistent with responsibility and high expectations and hold leaders responsible for programs and budgets within their purview.
4. Establish clearer channels of communication between faculty members and administrators
5. Address issues, whenever practical, through existing rather than ad hoc committees and commissions.
6. Consult those affected by decisions, disclose criteria for decision making, describe the decision-making process, and provide opportunities for reactions after decisions are made.
- a. Consider obligations to faculty members, students, and administrators affected by program closure;
- b. Provide appropriate consultation opportunities for Commonwealth Campus faculty members at department and college levels;
- c. Enhance consultation between faculty members and senior administrators through Senate Committees that parallel the administrative structure;
- d. Include student participation in the reassessment of the Baccalaureate Degree Requirements.
7. Strengthen joint governance mechanisms, while making more efficient and productive use of faculty time.
8. Encourage student participation in course and program development, including the evaluation of teaching, courses, and prospective faculty members at the department and campus levels.

To Enhance QUALITY of Faculty and Professional Staff, Penn State must:

9. Provide evidence that a new faculty or staff member is the best person available and that the appointment represents a high priority for the mission of the unit.
10. Increase efforts to enhance the diversity of academic personnel by fulfilling the goals in the Affirmative Action Plan and by providing incentives to retain individuals following appointment.
11. Encourage women and minority group members to enter fields in which they are underrepresented.
12. Report each year the results of the Affirmative action effort.
13. Expand the Affirmative Action Office relationship with all units undergoing searches for new personnel.
14. Assess continually the criteria and procedures for appointment and evaluation of faculty and staff members:
 - a. Provide consistent and fair promotion and tenure review processes which stress excellence and due process and which are sensitive to the persons being evaluated;
 - b. Include peer review from both inside and outside the University.
15. Conduct regular performance assessments, reflective of the variety of assignments, of faculty and staff members during all stages of their careers:
 - a. Devise incentives to assist department heads and campus directors in evaluating and encouraging academic effectiveness of all faculty members regardless of rank or tenure status;
 - b. Review regularly the performance and workloads of all faculty members, including those with tenure or at the rank of associate professor or above;
 - c. Inform faculty and staff members as explicitly as possible where they stand and what the future is likely to provide;
 - d. Expect all faculty members to be productive scholars; assess quality first in promotion and tenure decisions, but also consider the commitment of program and financial resources;
 - e. Reflect the importance of involvement in leadership responsibilities in the reward system and encourage effective leadership performance.
 - f. Encourage inter- and multi-disciplinary and interdepartmental research teams;
 - g. Encourage and reward faculty members who obtain external research funding and build the reputation of the department, college, and University;
 - h. Be sensitive in performance assessments to the additional roles that

*These amounts do not include contracts and grants awarded primarily to The Milton S. Eisenhower Medical Center through the Public Health Service and the National Institutes of Health. This was a specially developed period for research at the Medical Center and not characteristic of the rest of the University.

- women and members of minority groups may be performing.
16. Devise means of evaluating and rewarding excellence in teaching, advising, research, and public service.
 17. Assist Commonwealth Campus faculty members to understand the weighting of evaluation criteria; clarify the kinds of work required and how a particular assignment fits into the overall mission of the unit.
 18. Provide early, clear performance evaluations to junior and nontenured faculty members:
 - a. Implement special efforts to assist junior faculty members as researchers and teachers by providing, whenever possible, seed money for research projects, time for concentrated study and writing, and the opportunity to collaborate with senior faculty or in intercollege research programs;
 - b. Assist probationary faculty members to assess realistically the likelihood of gaining tenure.
 19. Make promotion decisions on clear criteria of excellence, including evidence of continuous superior performance and peer esteem, and not on seniority.
 20. Study academic and personnel issues related to Commonwealth Campus faculty members after administrative integration of Continuing Education and Commonwealth Campus system has been worked out.
 21. Integrate research personnel into mainstream of faculty life.
 22. Give compensation on the basis of merit.
 23. Develop strategies for keeping compensation competitive.
 24. Encourage professional development and vitality of faculty and staff members:
 - a. Promote intellectual risk-taking and vigorous exchange of ideas;
 - b. Provide fiscal resources and encouragement to take advantage of professional development opportunities, such as sabbatical leaves;
 - c. Develop such professional development programs as exchange programs, attendance at professional meetings, and experience in business and industry.
- To Enhance QUALITY of Students, Penn State must:**
25. Continue to admit only those students who are qualified academically.
 26. Recruit a student body reflective of Pennsylvania's rich, pluralistic cultural heritage.
 27. Direct recruitment efforts to improving the college participation rate of qualified students:
 - a. Increase Penn State's proportion of highly qualified high school graduate applicants from Pennsylvania;
 - b. Develop recruitment emphasis and incentives to increase the number of qualified out-of-state students;
 - c. Encourage attendance by academically-gifted students;
 - d. Make high school students with special talents aware of the opportunities at Penn State in their fields;
 - e. Use alumni in student recruitment, especially out-of-state students;
 - f. Improve recruitment and admissions of students from minority groups; maintain Philadelphia and Pittsburgh Community Centers;
 - g. Encourage qualified transfer students to complete their education at Penn State and facilitate their successful transfer;
 - h. Explore ways to improve the retention of students already enrolled.
 28. Recruit aggressively quality graduate students:
 - a. Strengthen the role of the Graduate School in assisting departments to recruit well-qualified graduate students, in coordinating data collection, and in preparing and disseminating information to prospective students;
 - b. Keep graduate assistantship and fellowship stipends competitive with comparable universities;
 - c. Enlarge graduate fellowship program to recruit distinguished graduate students;
 - d. Obtain business and industry support for graduate education in those fields leading to business or industrial employment.
- To Enhance QUALITY of Instructional Programs, Penn State must:**
30. Reassess the Bachelor's Degree Requirements (BDR):
 - a. Emphasize integrating the student's baccalaureate education;
 - b. Consider student flow; permit uncommitted students to explore new areas of interest;
 - c. Guard against course proliferation in the BDR.
 31. Devote a major effort to strengthening graduate education.
 32. Strengthen relationship between research and instruction at both graduate and undergraduate levels.
 33. Emphasize quality in all aspects of the teaching-learning process:
 - a. Give high priority at the department and campus levels to the evaluation and improvement of teaching;
 - b. Make available to faculty members and graduate assistants methods for identifying weaknesses and improving instructional techniques;
 - c. Improve overall quality of undergraduate instruction, identify programs where instruction may have fallen below standard and improve the level of teaching;
 - d. Augment televised and programmed courses with opportunities for individual sessions between instructors and students;
 - e. Improve the student-faculty ratio;
 - f. Encourage senior faculty members to teach lower-division courses;
 - g. Provide mix of large and small classes for students at every level; be alert to difficulties students encounter in large classes;
 - h. Screen all faculty members and graduate assistants to assure a sufficient command of English for effective classroom instruction;
 - i. Institute orientation and training programs for teaching assistants to assure they are knowledgeable in their fields and have a command of basic teaching techniques and procedures;
 - j. Whenever possible, provide instructors at Commonwealth Campuses with some variety in teaching assignments.
 34. Improve the quality of information provided to academic advisors to sustain advising as a key role of faculty members.
- To Enhance QUALITY of Research Programs, Penn State must:**
35. Take steps to preserve faculty time for research and advance study in light of changing instructional demands.
 36. Devise incentives to increase external support for research as a means of maintaining the University's research reputation:
 - a. Encourage and aid faculty members in developing research proposals;
 - b. Expand research initiation grants for ideas and proposal development;
 - c. Solicit aggressively research support from foundations and corporations;
 - d. Improve contact with federal and state agencies;
 - e. Improve cooperation between and among colleges and intercollege research centers and institutes;
 - f. Allocate institutional resources to renovate research facilities and replace deteriorating and outmoded research equipment.
 37. Obtain increased external funding for biomedical research.
 38. Review research fund allocation policies.
 39. Seek private funds for endowed chairs.
 40. Allocate funds for special efforts to initiate and stimulate interdisciplinary inquiry.
- To Enhance QUALITY of Student Life, Penn State must:**
41. Enhance the relationship between the University's academic programs and student life.
 42. Encourage creativity, intellectual growth and expression, and self-reliance in all students:
 - a. Encourage involvement by faculty and staff members in student life beyond the classroom, such as listening as advisors to student organizations and participating in residence hall programming;
 - b. Expand educational and cultural programs for minority group students to assure success; explore possibility of exchange programs with two predominantly Black institutions in Pennsylvania;
 - c. Insure that all academic programs are open to women and minority group members and facilitate their participation through counseling and contact among women and minority students, faculty members, and alumni;
 - d. Integrate nontraditional students (older students and veterans) into the University community;
 - e. Assess and adapt academic and nonacademic programs to meet the needs of international students, upgrade the quality of information provided, expand the Intensive English Communication Program, and increase interaction with "native" students and faculty members;
 - f. Be sensitive to special needs of graduate students and provide adequate information on housing, insurance, taxes, and thesis requirements.
 43. Assure quality in residential life:
 - a. Continue and extend educational programming in residence halls;
 - b. Identify and assist students with potentially debilitating problems;
 - c. Reassess availability of on-campus housing at University Park and consider replacing Nittany Halls.
 44. Enhance the total educational experience of off-campus residents:
 - a. Incorporate positive residential life elements into lives of off-campus students;
 - b. Provide more flexible scheduling of cultural and social programs for Commonwealth Campus commuting students.
 45. Evaluate existing and new student services.
- To achieve quality in a period of declining resources, Penn State must SELECT among programs by setting priorities and by allocating resources accordingly.**
- To Effect SELECTIVITY by Setting Priorities, Penn State must:**
46. Establish priorities among programs first at the department, campus, and college level.
 47. Use the five-year planning and budget process to establish University-wide priorities and to relate needs to resource allocation:
 - a. Use results of existing program and administrative reviews in establishing priorities;
 - b. Use Provost's Advisory Committee to recommend selected reviews as they are needed and to assist in establishing University-wide priorities;
 - c. Consider interdisciplinary programs in developing University-wide and departmental priorities.
 48. Base priorities for all programs and services on criteria of quality, need, and cost:
 - a. For academic programs, also consider the program's availability at other Pennsylvania institutions;
 - b. For consolidation and realignment of programs and units, also consider flexibility;
 - c. For support services, also consider duplication and efficiency and the need to guarantee a minimal level of support to provide the service.
- To Effect SELECTIVITY by Building on Strength, Penn State must:**
49. Enhance those programs already of highest quality, those programs having the potential to excel, and those programs unique to the Commonwealth.
 50. Augment historic strengths in education for the professions.
 51. Develop role of the basic disciplines.
 52. Identify research areas to strengthen.
 53. Enhance and promote the informal and formal continuing education programs.
 54. Emphasize advantages of each Penn State campus in the recruitment of students.
- To Effect SELECTIVITY by Examining Directions, Penn State must:**
55. Redirect graduate programs leading to academic careers in part toward nonacademic careers.
 56. Continue to evaluate the quality of all existing public services and allocate resources as necessary to accommodate new demands for services.
 57. Enhance the distinctive character of each Commonwealth Campus to meet local needs by working with the campus advisory board.
 58. Maintain Behrend College lower-division offerings and programs, redirect baccalaureate degree programs toward business and other career-oriented programs, and limit baccalaureate programs to those related to undergraduate emphasis.
 59. Reexamine Behrend College four-year mission in 1983.
 60. Reevaluate Penn State's affiliation with the University Center in Harrisburg.
 61. Improve Capitol Campus' linkage to the Commonwealth Campuses and the community colleges in the Harrisburg area.
 62. Develop joint programs between The
- Millon S. Hershey Medical Center and the Capitol Campus.
63. Develop new programs at Capitol Campus to serve the needs of the citizens of the state's capital and the needs of minority groups.
 64. Reassess the Radnor Center's organization, programs and leadership in 1982 and modify them as required.
 65. Examine health manpower needs, student demand, and institutional capability to develop opportunities for health-related educational programs.
- To Effect SELECTIVITY by Allocating Resources, Penn State must:**
66. Assure that resources are allocated according to program priorities based on criteria of quality, need, and cost.
 67. Reflect mission and program priorities in the academic reward system.
 68. Plan library acquisitions to meet priority program needs; identify needs that transcend individual programs.
- To enhance its capacity to be selectively excellent and to respond to new opportunities, Penn State must extend its ORGANIZATIONAL, PROGRAMMATIC, and resource FLEXIBILITY.**
- To Enhance FLEXIBILITY of Organization, Penn State must:**
69. Reassess relationships among administrative units and among academic programs within and between colleges; realign units and programs as appropriate.
 70. Integrate the Commonwealth Campus system and Continuing Education into single administrative unit.
 71. Provide sufficient lead time to allow adequate consultation on consolidation and realignment questions without delaying decisions unnecessarily; develop more explicit policies regarding program discontinuance.
 72. Create new organizational focus to signal the University's commitment to provide health-related programs.
 73. Consider establishing a central office for international programs.
 74. Provide each Commonwealth Campus the flexibility necessary to carry out its assigned mission and to serve local needs.
 75. Consider forming regional consortia of Commonwealth Campuses.
 76. Reassess Capitol Campus' variation in course credits.
 77. Reexamine academic support structures, including the term system — especially the summer term.
 78. Evaluate current information processing capabilities and plan a comprehensive system of data processing:
 - a. Insure adequate security to protect privacy;
 - b. Develop interactive computing capability;
 - c. Coordinate computing capabilities;
 - d. Apply advanced information processing technology in all academic and administrative areas.
- To Enhance FLEXIBILITY of Programs, Penn State must:**
79. Monitor enrollment trends closely in the '80s.
 80. Admit students to the campus of their first choice when space is available.
 81. Increase avenues of cooperation:
 - a. Explore possibility of providing programs through consortium arrangements with other Pennsylvania institutions;
 - b. Establish instructional consortia in areas of high student demand;
 - c. Experiment with ways to enable faculty members to participate in cooperative arrangements across geographic and disciplinary boundaries;
 - d. Increase cooperation between the faculties of the College of Medicine and at University Park, the Commonwealth Campuses, and Capitol Campus for medical research and to prepare health professionals;
 - e. Increase cooperation with professional associations and industry to provide continuing professional education;
 - f. Increase interaction among faculty involved in Cooperative Extension, resident instruction, and continuing education in the same geographic location and inform each of programs in the others.
 82. Encourage and reward creative initiatives in continuing education, cooperative extension, and other public services.
 83. Provide balance and perspective through current and additional interdisciplinary programs.
 84. Prevent artificial enrollment ceilings by

- shifting resources to areas of high student demand.
- 85. Provide for student election of courses in each degree program.
- 86. Expand practical experience programs where appropriate but integrate them with theory components of the program.

To Enhance FLEXIBILITY of Faculty and Staff, Penn State must:

- 87. Recruit high quality faculty and staff members and reward excellence:
 - a. Make faculty appointments with the potential of adding vitality to the graduate and research enterprise as well as undergraduate teaching.
 - b. Improve ability to appoint, nurture, and reward the highest quality performance of faculty and staff.
- 88. Encourage flexible appointments and contracts:
 - a. Increase opportunities for joint appointments; faculty exchange with other institutions; and short-term leaves of absence;
 - b. Provide fair treatment in assignment and compensation of nonstanding appointments;
 - c. Allocate resources to permit colleges to make temporary appointments to meet unexpected demands and new opportunities;
 - d. Review the proportion of nonstanding faculty positions; balance resource flexibility with program cohesiveness.
- 89. Identify areas for retaining tenured faculty members:
 - a. Make funds available for assisting in the relocation and retraining of tenured faculty whose programs have been reduced or phased out.
 - b. Investigate development of new interests, teaching in new fields, and undertaking nonfaculty roles in academe; evaluate in light of long-term University and individual interests.
- 90. Increase the percentage of faculty at University Park who are supported by externally-funded research.
- 91. Continue the regionalization of Cooperative Extension and locate regional and area extension offices at Commonwealth Campuses where practical.
- 92. Experiment with various options and incentives for early retirement.

To Enhance FLEXIBILITY of Resources, Penn State must:

- 93. Restore the real resources per full-time equivalent student and for research.
- 94. Maintain competitive salaries with other universities and with general market conditions.
- 95. Improve purchasing power of libraries' materials and departmental budgets.
- 96. Obtain additional resources:
 - a. Increase the Commonwealth's commitment to Penn State to 50 percent of the cost per student.
 - b. Reassess the University's overall funding program, including a reexamination of staffing, organization, and priorities;
 - c. Double private giving by 1985;
 - d. Use private monies for items which only private funding can provide, e.g., endowed chairs, merit scholarships, and enriching the campus environment;
 - e. Increase the level of undesignated gifts, whenever possible;
 - f. Seek local support at the Commonwealth Campuses to provide additional social, cultural, and educational programs;
 - g. Increase the students' proportionate share of the cost of education only when all other resources have been exhausted;
 - h. Maintain access at a reasonable cost to students while safeguarding quality;
 - i. Review financial aid policies and assure that eligible students apply for aid.
- 97. Develop contingency measures to support Cooperative Extension.
- 98. Study the feasibility of extending the fee-for-service approach to student services.
- 99. Provide efficiency incentives:
 - a. Review policies influencing budget centers;
 - b. Examine income-expenditure relationships for each academic unit as an analytic and planning tool.
- 100. Design capital projects to:
 - a. Emphasize modification and alterations of existing facilities;
 - b. Keep facilities and equipment in good operating condition;
 - c. Minimize maintenance and operating costs;

- d. Seek external (private, federal, and state) funding to modernize or alter facilities and to meet code modifications;
- e. Obtain private funds to build needed laboratory facilities at Capitol Campus.
- f. Minimize the use of loans for construction.

EPILOGUE

In this commentary on Penn State in the 1980s, we have talked about delivery systems, policy variable trade-offs, participatory governance, and programmatic flexibility, to mention a bit of the jargon that can obscure our reason to exist as an institution. It is important, in closing, to reiterate the true bases of our concern.

Our basic concern is with knowledge, its preservation, expansion, and transmission, not with the protection of a particular institution. Our accompanying concern is with the dignity and value of the individual human being. Society is a collection of individuals who deserve the opportunity to acquire knowledge and then to serve that society according to their abilities.

An educational "delivery system" means nothing if it is not distinguished by its devotion to logical thought. No Penn State faculty member, staff member, student, or graduate should have the privilege of participation in the life of the University unless he or she is committed to the process of logical reasoning in every aspect of teaching, learning, and research. That's what a delivery system is all about.

"Policy variable trade-offs" are meaningless concepts unless their true foundations are not in finance but in devotion to scholarship. Only the best is good enough for the true scholar. If he or she is served better by a "policy variable trade-off," so be it. But his or her understanding of what it means to cherish and seek knowledge is far more important than the processes of finance.

"Participatory governance" is a phrase which rolls off the tongue but lacks credence if it is not accompanied by a willingness to listen to and, indeed, to protect other points of view, other kinds of people, other convictions and persuasions. The Penn State student has the opportunity to live among people of many convictions. His and her enjoyment of ambiguity is a sign of his/her learning at its creative best.

At the least the Penn State student is expected to be competent in a field of knowledge of value to his/her fellow men and women. A high sense of educational quality lies beneath such vague terminology as "programmatic flexibility." Competency comes in many forms but there must be no compromise with professional and personal integrity. We do not seek to educate "engineers" per se, for example, but men and women of high competence and integrity in the professional field of engineering. We do not intend to prepare artists or teachers or people of business to enter their professions ill-equipped or ill-advised.

Finally, the true Penn State graduate should be marked, if we have our will, by a sense of the fitness of ideas, of customs, of practices; by an empathy with the aesthetic need and sense of men and women; by an understanding of the imperfections of people and of society and a drive to help overcome these imperfections. And, we hope, by an uplifting sense of humor which puts all of this in perspective and allows neither the individual nor the institution to take itself so seriously that either is crippled by the task before the work begins.

Beneath the rhetoric, then, is a concern for priorities and values. The University expects itself and its people continually to review and, if necessary, to reorder systems of values. This, in essence, is what we mean by selectivity, quality, and flexibility in the decade ahead. We must know where we stand, be prepared to defend vigorously that stand, and be proud that we want the best and are willing to change to guarantee it.

Penn State's tomorrow shall be better than today because we are determined that it shall be so. For the people of Pennsylvania, no other direction is worth the human and material investment.

APPENDIX

The Steering Committee

Edward D. Eddy, Co-chairperson — Provost of the University
 Stanley O. Benberry, Co-chairperson — Senior Vice President for Administration
 Randolph C. Albright — Chairman, Academic Assembly, USG, Student Representative
 Robert D. Arbuckle — Representative, Council of Commonwealth Campus Directors
 Director, New Kensington Campus
 James M. Beutler — Chairman, Council of Academic Deans: Dean, College of Agriculture
 Mark A. Bell — Chairman, Associated Student Activities Budget Committee, Student Representative
 John J. Cahir — Chairperson, Task Force on

Purposes, Programs, and Priorities;
 Associate Professor, Meteorology
 Carol A. Cartwright — Chairperson, Task Force on Faculty and Staff; Professor, Education
 Loren M. Furtado — Director, Office of Planning and Budget
 George J. McMurry — Chairman, University Faculty Senate; Professor, Electrical Engineering
 John W. Malone, Jr. — Chairperson, Task Force on Resources and Supporting Services; Professor and Head, Agricultural Economics and Rural Sociology
 Murray S. Martin — Past-chairman, Senate Committee on Planning and Development; Associate Dean, University Libraries
 Robert J. Scannell — Chairperson, Task Force on Students and Society; Dean, College of Health, Physical Education, and Recreation

The Final Reports of the Task Forces for the Plan for the '80s (April 1979) comprised important resources for the deliberations of the Steering Committee. In the preparation of the Plan by the Steering Committee, much of the thought presented by the Task Forces was incorporated, some of it was modified, and some rejected, and new directions were developed. The Steering Committee, on behalf of the University community, expresses its appreciation to members of the Task Forces as follows:

Task Force I

John J. Cahir, Chairperson (F)
 Robert A. Bernoff (A)
 Parris H. Chang (F)
 M. L. Christensen (F)
 Floyd B. Fischer (A)
 Helen Guthrie (F)
 James D. Hammond (F)
 Rose M. Kouri (S)
 *Thomas D. Larson (F)
 Satoshi Matsushima (F)
 Jane E. McCormick (A)
 Richard L. Morrill (A)
 Victor Oyler (S)
 Stuart Patton (F)
 Stanley P. Paulson (A)
 Roland J. Pellegrin (P)
 Fred Rapp (F)
 Gladys I. Ritchie (A)
 Peter B. Shaw (F)
 Kathryn Streletsky (S)
 Robert T. Tauber (F)
 Nancy M. Fischer (F)

Task Force III

Carol A. Cartwright, Chairperson (F)
 William W. Ashbury (A)
 Emory J. Brown (A)
 Roy C. Buck (F)
 Michael M. Coleman (F)
 Roland R. Daniele (F)
 Thomas E. Daubert (F)
 Robert L. Frankforter (F)
 A. Daniel Kidder (F)
 John A. Lieb (F)
 Jeanne M. Maher (S)
 Kathryn M. Moore (P)
 Margaret A. Neely (S)
 Diane Pepe (F)
 Charles J. Petredia (F)
 Michael A. Santulli (F)
 Lynda C. Schneider (S)
 Rosemary S. Schraer (A)
 Leon J. Stout (F)
 Dianne Taylor (S)
 Theodore R. Vallance (A)
 Vickie L. Ziegler (F)

(F)—Faculty Member
 (A)—Administrative Officer
 (S)—Student

Task Force II

Robert J. Scannell, Chairperson (A)
 John E. Ayers (F)
 John F. Struel (A)
 Rupert F. Chisholm, Jr. (F)
 Richard C. Cunningham (A)
 Darlene M. Dunay (S)
 Edward V. Ellis (A)
 Arthur Goldschmidt, Jr. (P)
 Warren R. Haffner (A)
 Lisa B. Hartman (S)
 Linda W. Itzoe (F)
 Beverly J. Lindsay (F)
 Karen P. Manz (S)
 Molly New (S)
 Torrence D. Persons (F)
 C. Shannon Stokes (F)
 John D. Vairo (A)
 Dawn A. Voytilla (S)
 Douglas E. Wayner (S)

Task Force IV

John W. Malone, Jr., Chairperson (F)
 Elizabeth P. Anderson (P)
 Janet Atwood (F)
 James B. Bartoo (A)
 Mark A. Bell (S)
 Steve A. Garban (A)
 Richard E. Grubb (A)
 Teh-Wei Hu (F)
 Stephen F. Jablonsky (P)
 Marjorie M. Knoll (P)
 Robert D. Lee, Jr. (P)
 Harry L. Lelider (S)
 George R. Lovette (A)
 Arthur C. Miller (F)
 Lawrence J. Piliore (F)
 Rodrick A. Prior (S)
 Lee W. Saperstein (P)
 Vernon L. Shockey (A)
 Barbara J. Smith (A)
 William A. Weidner (P)

*Served as chairperson of Task Force I until January 1979, at which time he was appointed Pennsylvania's Secretary of Transportation.

Penn State Intercom

News in Brief

Calendar data due Nov. 9

Material for inclusion in the Winter Term INTERCOM Calendar should be sent by Friday, Nov. 9, to Lee Morrill, Room 312 Old Main, 865-2501.

Brazilian writer to visit

The Department of Spanish, Italian and Portuguese, in cooperation with Latin American Studies and The Institute for the Arts and Humanistic Studies, will host a day-long visit with Brazilian writer Julio Cesar Monteiro Martins on Tuesday, Nov. 6.

Senhor Martins, who is currently involved with the International Writing Program at the University of Iowa, will present two public lectures. His first, which will be delivered at the Comparative Literature luncheon at the State College Hotel at 1 p.m., is "Literature and Power in Brazil." His evening lecture, to be held at 8 p.m. in Room 102 Chambers, is entitled, "The Literature of Resistance in Brazil."

Occupational Privilege Tax to be withheld

The University will this year again withhold the Occupational Privilege Tax of \$10 from all University Park employees who are liable for the tax.

Accordingly, for faculty and staff members who are paid on a monthly basis, the tax of \$10 will be withheld from paychecks dated Nov. 30, 1979. For all other employees (technical service, graduate assistants and wage), the deduction will be made from paychecks dated Nov. 16, 1979.

Any employee who wishes to appeal his/her liability for this tax, should apply

The height of nonchalance is demonstrated by three Physical Plant employees sizing up a repair job atop Old Main.

directly to Michael S. Groff, Tax Administrator, 118 South Fraser Street, State College, PA 16801.

Department Heads are asked to make certain that part-time wage employees are aware of this tax.

Applications sought for Truman Scholarships

Applications are now being accepted for the 1980 National Harry S. Truman Scholarship Competition.

To be eligible, a University student must be enrolled in a baccalaureate program as a junior in the fall of 1980. Candidates must also be U.S. citizens and have a 3.0 grade-point average or better and rank in the top one-fourth of their class.

Only students who have selected an undergraduate major that will permit

admission to a graduate program leading to a career in government service will be considered for the competition.

To apply, a student must submit a letter of application, an up-to-date transcript, three letters of recommendation from University instructors and a paragraph outlining career plans. They should be submitted to Dr. John D. Martz, chairman of the scholarship committee, Room 107 Burrows Building before 5 p.m., Friday, Nov. 23.

Gulack to reappear in URTC's "You Can't Take It With You"

If Equity Actor Max Gulack gets the funny feeling that he's "been here before" when he steps onstage as Paul in University Resident Theatre Company's upcoming production of *You Can't Take It With You*, he should not be surprised. He has been here before, and in the same role.

Mr. Gulack's first appearance as Paul was in 1969 for the Festival Theatre. In fact, he has appeared at Penn State no less than six times. Some of his major roles here include parts in *Rhinoceros*, *Tobacco Road*, *Waiting for Godot*, and most recently as Oscar Wolfe in the 1977 Festival Theatre production of *The Royal Family*.

His credits away from Penn State include Joseph Papp's *Three Penny Opera*, appearances at numerous regional theatres, stage work in Paris, and *The Fantasticks* at the Playhouse in the Park.

To make reservations for URTC's production of *You Can't Take It With You* call the Playhouse Box Office at 865-1884 10 a.m. to 6 p.m. Mondays through Saturdays. The play will run Nov. 29-Dec. 15.

Black genealogy is topic

Charles L. Blockson, human relations adviser to the Norristown School District, will give a public talk on the rising interest in black genealogy and describe the methods used to trace the roots of American blacks tonight (Nov. 1) at 7:30 p.m. in Pattee's Rare Books Room.

Mr. Blockson is a 1956 graduate of Penn

Max Gulack

A Statement

Totally erroneous reporting by the Centre Daily Times of a meeting President Oswald attended with Secretary of Education Scanlon on Oct. 19 has caused serious misunderstandings with members of the State General Assembly.

The discussion centered on the University's relations with the Department of Education, and for the need of that Department to serve as an advocate for higher education. Contrary to what was reported, Dr. Oswald was not critical of members of the General Assembly. In fact, the opposite was true. The limited discussion about them was most complimentary.

Some legislators have voiced their concern about the false reporting. Therefore, Dr. Oswald wrote a letter to Fred Ciletti, Penn State's legislative affairs person in Harrisburg, explaining what was really said during the meeting with Secretary Scanlon. He was asked to use the letter in response to legislators who might inquire about the erroneous story. Because of the misunderstanding the reporting has created, INTERCOM is running the text of President Oswald's explanation to Mr. Ciletti.

"It is unfortunate that some of the comments I made at last Friday's meeting with Secretary Scanlon were erroneously reported in the local press. Further, it is unfortunate that the press report distorted the entire atmosphere of the meeting with the headline 'Scanlon, University Officials Spar' and statements like 'the state legislature took its lumps, for the most part in the last hour or so of the informal get together.' The Secretary wanted to discuss informally our views of the role of the Department of Education and the entire discussion was candid and constructive. The limited discussion involving joint relations with the legislature was positive and complimentary to members of the legislature.

"The Centre Daily Times ran a partial clarification of my remarks in its issue of Tuesday, October 23, but I do want you to know personally what I actually did say during the discussion. I did not say, as the press reported, that Penn State has never had an advocate in the legislature. In response to a question from Secretary Scanlon, I noted that no representative from the Pennsylvania Department of Education has ever appeared at our appropriations hearings as an advocate of Penn State or higher education. PDE, I said, has a responsibility to serve as an advocate of higher education, as it does for elementary and secondary education.

"Neither did I say, as the Centre Daily Times reported, that 'I have never heard one good thing about Penn State from a single legislator, except one who lost two county agriculture seats'. This, indeed, isn't true. We have a great many extremely good friends in both the House and Senate who are faithful beyond measure in their support of the University, not only for appropriations but for other important legislation as well. Among our strongest advocates, of course, are Representative Gregg Cunningham and Senator Doyle Corman from our own district. These legislators, among many others, have an excellent record for supporting Penn State and other institutions of higher learning.

"I regret that my views were distorted in the press, Fred. Please convey to any

The Challenge of the '80s

Editor's Note: This article is the sixth in a series in which the academic deans reflect on what lies ahead for their colleges in the '80s.

Liberal arts colleges — at Penn State and across the country — are in a period of transition, according to Dean Stanley F. Paulson.

"We are taking part in a great national debate over the value of the liberal arts for the millions of students involved in higher education," Dean Paulson says, adding:

"I welcome the debate. It's a good thing for any university area of study to be subject to scrutiny to see whether it is accomplishing what it should."

The debate is critical in a decade which holds the prospect of declining enrollments in the liberal arts and a shift by students to more specialized curricula; although, as Dean Paulson points out, Penn State is attracting a larger share of liberal arts undergraduates than many comparable institutions. Nationwide, for example, between 1971 and 1976, the number of foreign language majors declined by 22 percent. Penn State saw only an 8 percent decline and has had similar success in counteracting a national drop in the number of social science majors.

Last fall, the College had 4,665 majors, almost the same number as it registered in 1973.

"Our strength resides in our faculty," Dean Paulson says. "They have been extremely progressive in relating scholarly

work in their disciplines to student interests and contemporary social needs."

Dean Paulson points to the work of faculty who study not only the psychological and sociological bases of behavior, but also work with the problems of insomnia or the changing mores of the Pennsylvania Dutch, to professors who study the civilization that was in ancient

Penn Staters

President Oswald has been appointed to DePauw University's newly-created Board of Visitors. The Board, according to DePauw President Richard F. Rosser, "is composed of individuals of exceptional attainments in business, the humanities, and the professions." It will be advisory to him and the DePauw Board of Trustees. Dr. Oswald graduated from DePauw in 1939 with Phi Beta Kappa honors.

Carl W. Sherman, associate professor of petroleum and natural gas engineering, was recently named by Gov. Richard Thornburgh to serve as Pennsylvania's representative on the regulatory committee of the Interstate Oil Compact Commission.

Dr. C. W. Burnham, head of the Department of Geosciences and professor of geochemistry, was chairman and organizer of a recent Gordon Research Conference on "Equilibrium and Kinetic Properties of Silicate Melts."

Adam J. Sorkin assistant professor of English at the Delaware County Campus, has been named a Lilly Fellow for 1979-80. He has been invited to participate in a colloquium on literature and the visual arts, "The American Landscape," at the University of Pennsylvania later this month. The colloquium is sponsored by the Lilly-Pennsylvania Program of the Lilly Endowment of Indiana.

An exhibition of photographs by Gerald Lang, associate professor of art, and Kenneth Graves, instructor in photography, is currently on display at The Focus Gallery in San Francisco.

Dr. Elliot Vesell, professor and chairman of pharmacology at Hershey, has received one of ten William N. Cressy Visiting Professorships of Clinical Pharmacology awarded for the 1979-80 academic year. He will spend a week teaching medical students, faculty, house staff and others at the University of Connecticut School of Medicine and will deliver a William N. Cressy Memorial Lecture on a subject pertinent to clinical pharmacology. The lectureships are sponsored by the Burroughs Wellcome Fund.

Dr. Charles O. Crawford, professor of rural sociology, has been elected by the membership of the Pennsylvania Public Health Association as that Association's delegate to the American Public Health Association. In this capacity, he will serve on the Governing Council of the APHA, an association with a membership of over 30,000 persons.

Dr. Ben W. Twight, associate professor of forest resources, delivered a keynote address at the National Convention of the Society of American Foresters held last month in Boston. His topic was "Public Participation and Involvement."

Dr. James E. Van Horn, Extension family sociologist and associate professor of rural sociology, has been named chairman of the Statewide planning group for the White House Conferences on Families. The group is charged with organizing Statewide hearings and community forums in preparation for the national conferences which will be held in June and July of 1980.

Dr. Gary P. Johnson, associate professor of education and faculty associate in the Center of the Study of Higher Education, has been named to a two-year term on the editorial advisory board of the Journal of Education Finance.

Dr. Jerry C. Olson, associate professor of marketing, recently returned from Switzerland where he presented an invited paper at an international conference on "The Role of Food Components in Food Acceptance." He spoke on "The Importance of Cognitive Processes and Existing Knowledge Structures for Understanding Food Acceptance."

Dr. William Eck, associate professor of health education, spoke at a plenary session of the annual convention of the American School Health Association, held recently in San Diego. Dr. Eck reviewed the status of alcohol education programs in American schools and universities.

Retirements

Adaline M. Stine, a janitorial worker in Old Main, retired from the University on Oct. 1 with 16 years of service.

Ms. Stine had worked as a janitress during her entire tenure at Penn State. She was first assigned to Chambers Building, then to the Agricultural Education Cottage, and finally to Old Main, where she remained for 10 years.

She and her husband, Elwood, will continue to reside on their dairy farm near Warriors Mark, though they plan to spend winters in Florida.

Charles F. Gross, for 24 years a soil scientist at the U.S. Pasture Research Laboratory on campus, has retired. He also served as adjunct instructor of soil science in the University's Department of Agronomy.

LeRoy H. Griffin, a janitorial worker in the Office of Physical Plant since Nov. 11, 1968, will retire Nov. 1.

Gladys M. Foltz, a residence hall worker in Housing and Food Services since Sept. 30, 1969, will retire Nov. 17.

Max DeWitt, a general maintenance worker at the Allentown Campus since Sept. 14, 1970, will retire Dec. 1.

25-year chair

Sandra Blatt, a Centralized Copy Center operator for Printing Services, has received her 25-year chair from the University.

She has been in her present position since 1975, working in Steidle Building. She began employment with the University on April 1, 1954, as a binding machine operator with Printing Services. After a short tenure as a press operator, she became a plate maker for Printing Service's darkroom, a position she held for nearly 20 years.

A native of Tyronne, she currently resides in Boalsburg.

Thanks to you it works . .

Editor's note: The following United Way dialogue has been prepared by the Office of Campus Relations.

Q. How are United Way agencies chosen?

A. By your neighbors who work as volunteers, reviewing budgets, service costs and other factors of agencies applying. Agencies must show they provide a needed community service. "Citizen review" ensures accountability and sees that many programs and charities receive community support.

Q. What are the advantages of a united campaign?

A. One joint campaign, in place of several competing drives, lowers administrative costs of charities and agencies. A united campaign ensures fair distribution of money donated, instead of the biggest getting the most. Some agencies are too small to conduct fund raising drives but can be helped by a united effort.

Q. How efficient is United Way fund raising?

A. Very. Through payroll deductions and many volunteer workers, the United Way spends, on the average, less than 10 percent of every dollar received on fund raising and administration. Your local United Way can supply you with actual cost figures.

Q. If the United Way represents many charities, why are other charitable campaigns still conducted in the community?

A. The United Way is a voluntary citizen movement. It can't force any agency to participate, although all that qualify are welcome. Although United Way seeks to cut the number of competing fund drives, it doesn't try to eliminate appeals by non-member charities. Only the force of public opinion can influence an agency's participation in the annual United Way campaign.

Q. Can I contribute to a United Way in another locality?

A. Yes. To contribute to United Way agencies in the state through payroll deduction, refer to the code sheet listing agencies alphabetically by city. Place code number in appropriate box. To make a direct contribution to another United Way, complete the direct contribution card noting the destination. Make check payable to the designated United Way. Send payment and card to your LOCAL United Way, which will record your name as a contributor from your campus and forward your donation.

Q. Can I designate my gift to one or more specific agencies while excluding others?

A. Yes. Please note your choice on the appropriate card.

Q. Who pays for United Way functions and materials?

A. Most functions are "dutch treat" but occasionally public-spirited firms or individuals will sponsor an event, over and above their regular donations. The United Way NFL football schedule, distributed to some Penn State employees, is an example. Materials produced are part of the administration cost or considered partial donations by companies.

Q. My spouse contributes to United Way at his/her place of work. Since we consider this a joint contribution, why can't my name be removed from Penn State's list?

A. Each Penn State employee receives United Way contribution information annually. Computer records do not indicate, however, if another family member is employed by the University. So it's up to an individual to indicate that they wish his/her name removed from the United Way contract list. To remove your name from this list, complete the payroll deduction card and indicate by writing a note on the card or by placing a large "X" on it that you wish your name removed.

Obituary

Philip A. Mark, a member of Penn State's staff from 1932 to 1968, died Oct. 24 at the age of 73. Mr. Mark received his teaching certificate from Penn State in 1923 and taught elementary school before joining the staff of Campus Patrol. He served as captain of that unit from 1943 to 1959 and then as a traffic violation officer until his retirement.

Promotions

Faculty

Deborah F. Hunter to assistant professor of speech communication at the Delaware County Campus.

Staff Exempt

Robert P. Murphy to business manager at Ongatz.

Steven F. Williams to visuals/photographic editor in Agriculture.

Staff Non-Exempt

Karen L. Gottschalk to administrative aide, Acoustics in ARL.

Clerical

Vickie L. Dowhower to environmental health worker/group leader at Hershey.

Christine A. Griebel to secretary B in Liberal Arts.

HiKyung Hahn Soo Hoo to catalog clerk in University Libraries.

Mary Lou Houck to secretary B in Human Development.

Donna E. Thompson to secretary B in Intercollegiate Research Programs.

Georgiann Wasson to coding clerk in Controller's Office.

Peggy Ann Wert to receptionist-typist in Business Services.

Technical Service

Joseph E. Gilbert to water tunnel model mechanic in ARL.

John T. Shirk to storeroom assistant in Housing & Food Services.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Nov. 1-11

Special Events

Thursday, Nov. 1

College of Science, Chemeda Lecture, 4 p.m., Room 333 Whitmore. Mark Kac, Rockefeller Univ., on "Chance and Randomness in Mathematics and Science: Probabilistic Aspects of Some Problems in Math and Mathematical Physics (II)." French Dept., Antoine de Saint Exupery, *Le Petit Prince*, performed by Compagnie Bernard Uzan, 7:30 p.m., Schwab.

CSA, Skiers' Conditioning Workshop, 7:30 p.m., Room 102 Kern.

Religious Affairs, 10 part film, "How Should We Then Live?" 7:30 p.m., Memorial Lounge, Eisenhower Chapel.

Friday, Nov. 2

Sports: JV football, vs. Nassau Community College, 2 p.m.; soccer, vs. Temple, 7:15 p.m.

Geography Dept. coffee and lecture, 4:45 p.m., Room 319 Walker. Rodney Erickson, geography, on "The Changing Location of Jobs and the Death and Life of Great American Cities."

UnCommon Theatre, preview, *Piccadilly Silly*, 8 p.m., Room 112 Kern.

Artists Series, Music from Marlboro, 8:30 p.m., Schwab.

Saturday, Nov. 3

Sports: football, vs. Miami (Fla.), 1:30 p.m. UnCommon Dinner/Theatre, 6:30 p.m., Room 102 Kern; *Piccadilly Silly*, 8 p.m., Room 112 Kern.

France Cinema, Wim Wenders, *The American Friend*, 7 and 9 p.m., Room 122 Music Bldg. Shakespeare film, WPSX-TV, BBC's *Julius Caesar*, 9 p.m., Room 123 Chambers.

Sunday, Nov. 4

University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. George Lucas, Ashland, Va., speaker.

Shaver's Creek Nature Center, Energy Saving Workshop, 1-4 p.m., Stone Valley.

Dance Concert, Orchestra Dance Co., 1:30 and 4 p.m., White Building Dance Theatre.

UnCommon Dinner/Theatre, 6:30 p.m., Room 102 Kern; *Piccadilly Silly*, 8 p.m., Room 112 Kern.

Monday, Nov. 5

France-Cinema, *The American Friend*, 7 and 9 p.m., Room 112 Kern.

Interdisciplinary Symposium on Value Lecture, 7:30 p.m., Room 101 Kern. Carl Hausman, philosophy, on "Creativity: The Evolution of Value."

Mieja Ahn, piano, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, Nov. 6

Women's Forum, noon, Walnut Bldg. Elizabeth Meier Tilton, GNAS, on "Barriers to Women Working in Europe."

Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Julio Cesar Monteiro Martins, Brazilian writer and participant in the International Writing Program, Univ. of Iowa, on "Literature and Power in Brazil."

Comp. Lit. Film Series, *Ray, World of Apu*, 7 and 9 p.m., Room 112 Kern.

IAHS/Latin American Studies/Spanish, Italian and Portuguese Lecture, 8 p.m., Room 102 Chambers. Julio Cesar Monteiro Martins on "The Literature of Resistance in Brazil."

Artists Series Film, *Women in Love*, 8 p.m., Schwab.

Wednesday, Nov. 7

Shakespeare Film, *Scotfield/Brook, King Lear*, 6:30 p.m., Room 112 Chambers. Free.

Robeson Cultural Center Lecture, Dr. LHM Reese, Capital U. Without Walls, Dayton, Ohio, "Black Literature - Black Destiny: The Relationship Between Negritude and Neo-African Literatures," 7:30 p.m., Robeson Assembly Room.

Robert Trehy, baritone, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, Nov. 8

Commons Videotape, "TV Quarterbacks," noon, Scholby.

STS/Two Cultures Dialogue on "Technology Assessment and Risk Analysis," luncheon; presentation and discussion, 12:20 p.m., Room 101 Kern. Mortimer Schultz, nuclear engineering, on "Coping with the 'Zero Risk' Attitude."

Properties of Rod-Like Polymers," 11:10 a.m., Room 333 Whitmore.

Organic/Inorganic Chemistry, Cheryl Ham, grad student, on "The Organic Chemistry of Pyrethrin Insecticides," 12:45 p.m., Room 333 Whitmore.

Air Pollution Control, Kenneth T. Knapp, particulate emission unit, EPA, Research Triangle Park, N.C., on "Methods for Measuring Inhalable Particulate Matter," 2:20 p.m., Room 140 Fenske.

Geosciences, Scott Bair, geosciences, on "Hydrogeologic Ramifications of Open-Pit Anthracite Mining," 3:45 p.m., Room 112 Walker.

Biology, Carl B. Wolfe, Mont Alto Campus, on "Systematics in the Higher Basidiomycetes (Boletaceae)," 4 p.m., Room 8 Mueller.

Engineering Science and Mechanics, Gerson Rosenberg, Hershey Medical Center, on "Progress in Left Heart Assist Devices and the Total Artificial Heart," 4 p.m., Room 232 Hammond.

American Society for Metals, Carol Girrell, Proceedyne Corp., on "Nitrogen Atmospheres for Heat Treating in Fluid Bed Furnaces," 7:30 p.m., Room 301 Steidle.

Organic/Inorganic Chemistry, Arthur G. Schultz, RPI, on "Progress in Alkaloid Total Synthesis," 8 p.m., Room 333 Whitmore.

Wednesday, Nov. 7

Mineral Processing, R.D. Kulkarni, Union Carbide Corp., on "Control of Foams," 11:10 a.m., Room 301 Steidle.

Philosophy of Sport, John Lucas, physical education, on "Cooperative Competition - The Athletic Golden Mean (a discussion and sports quiz)," noon, Room 104 White.

Critical Review (I)," 2 p.m., Room 62 Willard (now listing).

Friday, Nov. 2

Analytical Chemistry, Albert Robbat, grad student, on "Electroanalytical Determination of Selected Sulfur Heterocycles Found in Coal Liquefaction Processes," 11:10 a.m., Room 333 Whitmore.

Mathematics, Gunter Harder, Bonn and Yale Univs., on "Arithmetic Properties of Eisenstein Cohomology," 4 p.m., Room 104 McAllister.

Statistics, D. Basu, Florida State Univ., on "Randomization Analyses of Data: A Critical Review (II)," 4 p.m., Room 62 Willard.

Monday, Nov. 5

Genetics, Richard Mettus, grad student, on "Behavioral Genetics in *Drosophila*," 3:55 p.m., Room 111 Tyson.

Plant Pathology, Matthew Royer, grad student, on "Can Freezing Tolerance Be Accurately Assessed by Current Methods?" 3:55 p.m., Room 213 Buckhout.

Philosophy, Robert Hahn, Brandeis Univ., on "Why Aristotle Was Not an 'Aristotelian' and Plato Was Not a 'Platonist,'" 4 p.m., Room 101 Kern.

Tuesday, Nov. 6

Chemistry and Properties of Macromolecules, G.C. Berry, Carnegie-Mellon Institute on "Thermodynamic and Rheological

Statistics, D. Basu, Florida State Univ., on "Randomization Analyses of Data: A

University Chapel Service, 11 a.m., Eisenhower Chapel. The Reverend James M. O.S.B., PSU Catholic Center, speaker.

Music from Marlboro Ensemble members (left to right) are Laurie Smukler, Ira Weller, Cecile Licad, Janet Horvath and Joseph Genualdi.

Music from Marlboro comes to PSU Nov. 2

A "Music from Marlboro" concert, featuring the Marlboro Festival Ensemble, will be presented at 8:30 p.m. Friday, Nov. 2, in Schwab Auditorium.

The program will consist of Copland's Quartet for Piano and Strings, Haydn's Quartet A Major op. 9, no. 6, and Dvorak's Quintet in A Major op. 81.

Music from Marlboro concerts are the winter-time extensions of the Marlboro Music Festival, when leading musicians assemble for two months each summer under the artistic direction of Rudolf Serkin.

Members of the ensemble are Cecile Licad, pianist, who made her debut with

the New York Philharmonic in May; Joseph Genualdi, violinist, concertmaster of the touring company of the New York City Opera; Laurie Smukler, violinist, a student at Juilliard; Ira Weller, violinist, a Juilliard M.F.A. graduate and concertmaster of both the Village Light Opera Group and the New York Pro Arte Chamber Orchestra; and Janet Horvath, cellist, winner of four Canada Council Government awards.

Tickets are on sale at Eisenhower Auditorium box office until 4 p.m. tomorrow and at Schwab Auditorium beginning at 7 p.m. Friday.

Friday, Nov. 2

Earth and Mineral Sciences, Carl Sherman, petroleum and natural gas engineering, on "Oil and Gas - Ripoff or Bargain?" 7:30 p.m., Room 112 Walker.

Friday, Nov. 9

Analytical Chemistry, Steven Holland on "Angle-Resolved Secondary Ion Emission from Clean and Adsorbate-Covered Metal Surfaces," 11:10 a.m., Room 333 Whitmore.

Philosophy, Mitchell Miller, Vassar, on "Plato's *Parmenides*: A Socratic Reading," 4 p.m., Room 101 Kern.

Exhibits

Chambers Gallery: Graduate and Undergraduate Students' Drawings.

HUB Galleries: Dick Brown, photographs. The Gallery. Craft Exhibit from the HUB Craft Center, Art Alley.

Kern Commons Galleries: Roy Fender, "The Great American Burger," ceramics, and School of Visual Arts students, "Glass Works from Penn State," both through Nov. 3; BFA/MFA candidates, prints and papermaking; United Nations Assoc. "Year of the Child" exhibit; Mitchell Weiss, ceramics, opens Nov. 3.

Museum of Art: European works and American paintings, drawings and prints from the permanent collection, through Nov. 11. French drawings from European collections (the former Armand Gobiet Collection), opens Nov. 11.

Pattee Library: traveling exhibit celebrating the 100th anniversary of the U.S. Geological Survey Department, East Corridor Gallery.

Visual Arts Bldg. Zoller Gallery: Siskind Photographic Show, through Nov. 4. Betty Parsons, Clinton Hill exhibit

News in brief

(Continued from page 1)

State and former Nittany Lion football player. His appearance will be at a meeting of the Central Pennsylvania Genealogical Society and is co-sponsored by the Libraries.

Nobel laureate to give Althouse Memorial Lecture

Nobel laureate Dr. Daniel Nathans will deliver the sixth annual Paul M. Althouse Memorial Lecture at The Milton S. Hershby Medical Center today (Nov. 1). His topic will be "A Small Tumour Virus and the New Genetics."

In 1978, Dr. Nathans shared the Nobel Prize in Physiology or Medicine with a Swiss and another American microbiologist for research that isolated and studied the roles of some genes. He is director of the department of microbiology at Johns Hopkins University School of Medicine.

The lectureship in which he will participate was established at Hershey in February 1974 in honor of Dr. Paul M. Althouse, provost of Penn State at its death in 1972 and previously a professor of biochemistry, director of general education and vice president for academic affairs.

Blue Bendorama slated

The Marching Blue Band will be featured in the second annual Blue Bendorama at 8 p.m. Friday, Nov. 2, in Eisenhower Auditorium. Also performing will be the Concert Blue Band and the Jazz Band.

The majorettes, flag-bearers and feature twirlers — Touch of Blue, Blue Band Silks, Blue Sapphire Lori Bowers and twirler

Kathy Harris — will be part of the Blue Band's presentation. Music by Richard Rodgers, Chuck Mangione and John Philip Sousa will be performed, and the Blue Band will also include "You Don't Bring Me Flowers," "March Grandioso" and "Mame" in its program.

The Concert Band will play arrangements of two Penn State songs, "American Overture" and "West Side Story Prologue." Larry Fisher will direct the Jazz Band in "Tenor," "Leap Frog," "Julian" and "Give It One."

Black literature talk rescheduled for Nov. 7

A lecture to be given by Dr. LaMar Reese, assistant coordinator and core faculty adviser at Capital University Without Walls in Dayton, Ohio, has been rescheduled for 7:30 p.m. Wednesday, Nov. 7, in the University's Paul Robeson Cultural Center Assembly Room.

His lecture, "Black Literature — Black Destiny: The Relationship Between Negritude and Neo-African Literature," was postponed from Oct. 24 due to Dr. Reese's illness.

Dr. Reese received his bachelor of arts in French and business education at Central State University, his master of arts in French and Francophone African literature at Union Graduate School in Cincinnati. In addition to his duties at Capital, he currently is a French professor at Central State University-West, also in Dayton.

Early registration: Nov. 12-16

Early registration for the University's Winter Term 1980 will be held from 8:30 a.m. to 4:30 p.m., Nov. 12 through 16, in Room 1215 Shields Building.

Any degree student who wishes to accept the schedule assigned as a result of

historians, geologists, physicists and engineers.

"Alertness to these kinds of opportunities," Dean Paulson says, "is what makes a true university — a community of scholars brought together by common cultural concerns. It also illustrates the extent to which our College is woven into the fabric of the University. Our relationships extend from the cooperative programs we have developed with Engineering, Earth and Mineral Sciences and Business Administration to those in which students combine breadth and concentration in liberal arts studies with an introduction to a specialized professional area. A good illustration of the latter is our baccalaureate degree program in French and Business."

"These working relationships with the rest of the University will help sustain us as we adapt to what higher education requires in the '80s."

Liberal Arts has had — and Dean Paulson expects it to continue to have — a heavy responsibility for courses which serve students from all colleges. Last year, over 94,000 Penn State students took humanities and social science courses. The College's role was recognized and will be reinforced during the next decade by the University Faculty Senate's decision to require six additional arts and/or humanities credits as part of the revised baccalaureate degree requirements (BDR 11).

"We cannot serve these students well, however," Dean Paulson says, "unless our scholarly work is of high quality and we continue to be alert to new areas of knowledge relating to our own majors and graduate programs. We must stress research and development on the frontiers of our disciplines if we are to satisfy the needs of students from other colleges."

"Many colleges and universities have drifted away somewhat from the concern for ethics and human values which has traditionally characterized the liberal arts. Recognizing both public and professional needs for education in these areas, faculty members in our College, together with others, have developed new courses, seminars, and a plan for a Center for

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Nov. 8, 1979. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

DEVELOPMENTAL YEAR COUNSELOR-STUDENT AFFAIRS, University Park — Responsible to provide various services to individual students to enable them to effectively adjust to the University environment socially, personally, and academically. Master's degree in sociology or counselor education is required. Over one year up to and including two years of effective experience in a directly related unit is necessary. **FIXED TERM 1 APPOINTMENT UNTIL JUNE 30, 1980.**

RESEARCH TECHNICIAN-COLLEGE OF AGRICULTURE, University Park — Coordinate and supervise the summarization of research data and maintain accurate research data records. Coordinate laboratory work under general guidance of academic

preregistration for Winter Term may register early and avoid re-turning to regular registration.

Wind Ensemble to perform

The Symphonic Wind Ensemble will present a concert at 8:30 p.m. Friday, Nov. 9, in the Music Building's Recital Hall.

Directed by Smith Toulson, associate professor of music, the ensemble will open the program with "Celebration Overture" by Paul Creston.

Assistant professors of music Monte Bedford on oboe and Christopher Callahan

Applied Ethics and Values.

Turning to the subject of graduate enrollments in the liberal arts, Dean Paulson notes that some 970 students are currently enrolled in the College. While this represents a decline of about 16 percent since 1972, certain areas such as public administration and economics have actually grown.

"Because a rigorous self-selection process on the part of the students is taking place, the quality of our programs has not been seriously affected and our graduates are doing well," Dean Paulson reports. "Last year, 86 percent of our Ph.D.s found teaching positions in the areas in which they had trained."

"Looking ahead, however, it's clear that the declining national birthrate will require some of our graduate students to seek careers in fields other than teaching. This is already occurring in such areas as psychology, where graduates are securing positions in hospitals, industry and other institutions, and in economics and political science, where doctoral degree holders find positions in government and business."

For the '80s, Dean Paulson believes that the liberal arts will continue to be a vital part of Penn State, in large measure because the "faculty, conscious of the past and sensitive to the present, is prepared to deal with the future with reason, good will and confidence."

He also draws encouragement from the fact that in the past few years a great many persons in business and government have begun speaking out about the need for liberal arts in an era of increasing specialization. One of the ablest is John C. Sawhill, who brought his experience as a Wall Street lawyer and Federal Energy Administrator to his current post as president of New York University. Sawhill said:

"At this point of liberal arts slapped on the managerial man and woman is not enough. Culture is not a condiment with which to pep up lawyers and bureaucrats at cocktail parties. It is not an embellishment but an absolute necessity if we as a society are to get our priorities right."

staff members. Perform various semen evaluation tests involving the use of the light microscope, differential interference colorimeter, hemacytometer, electronic cell counter, osmometer and pH meter. Assist with the dilution, processing and freezing of semen and coordinate the shipment of frozen bull semen. Supervise and train subordinate laboratory personnel. Check and maintain laboratory equipment in good operating condition. Be responsible for security of the main laboratory and the office building. Ensure the general cleanliness and orderliness of the laboratories. An associate degree in medical technology or its equivalent with one to two years effective laboratory experience.

POLICE SERVICE OFFICER-UNIVERSITY SAFETY, University Park — Responsible to the Police Supervisor for carrying out the functions of protection of life and property, preservation of peace and good order of the community, enforcement of laws, public safety, investigation of work and other related duties. Have a baccalaureate degree in law enforcement or the social sciences, or have 60 academic credits at a 2.0 or higher average and have 1-2 years experience as a law enforcement officer.

VETERANS RECRUITER-STUDENT AFFAIRS, University Park — Report to the Coordinator of Veterans Affairs with assigned responsibility to actively recruit recently discharged veterans of Pennsylvania and contiguous northeastern states. Considerable travel involved. Bachelor's degree with one to two years experience with service recruiting or procurement desired. **Veteran preferred. FIXED TERM 1 APPOINTMENT UNTIL JUNE 30, 1980, BUT MAY BE REFUNDABLE AGAIN NEXT YEAR.**

on horn will join the group in Mozart's *Serenade* in C minor. The work features two oboes, clarinets, bassoons and horns.

Rimsky-Korsakov's "Procession of the Nobles" will open the second part of the program followed by Aaron Copland's "Emblems." Symphonia No. 4 by Walter Hartley will close the concert.

A Statement

(Continued from page 1)

legislator who may have read the erroneous reports that I have nothing but deep respect and appreciation for the support that they have given Penn State over the years."

Employees complete enrichment course

Twenty-eight clerical employees of the University have completed a six-week Clerical Enrichment Program. The course is designed to familiarize clerical employees with University policy and organization, to identify work situation problem areas in the office, and to begin the initial stages of professional office training and preparation for career development.

Carol Barner, clerk-typist B, Continuing Education; Doris Carter, secretary C, Continuing Education; Susan Decker, clerk-typist A, Chemical Engineering; Sara Dymond, receiving clerk B, Libraries; Catherine Hess, clerk-typist B, Agriculture; Nancy Johnson, clerk A, Libraries; Sharon Leitch, clerk recorder, Continuing Education; Linda McCool, clerk-typist B, Libraries; Beth Ream, clerk-typist, Engineering; Jean Sowash, clerk A, Libraries; Gloria Walker, secretary C, Science; Vera Williams, clerk-typist B, Agriculture; Vicki Zimmerman, clerk-typist B, Material Research Laboratory; Robin Carson, clerk-typist B, Business Administration.

Christine Bosak, clerk A, Personnel Administration; Janice Brown, technical secretary C, Applied Research Laboratory; Susan Croyle, clerk-typist A, Civil Engineering; Connie Gearhart, accounting clerk A, Continuing Education; Vickie Gerontonis, technical secretary C, Applied Research Laboratory; Barbara Htinger, clerk-typist A, Science; Audrey Korman, technical secretary C, Land and Water Research; Rose Letterman, secretary C, Science; Susan Runk, secretary C, Liberal Arts; Carol Wilhite, clerk-typist B, Libraries; Robin Yeany, secretary C, Housing and Food Services; Lillian Garbrick, binding clerk, Libraries; Bonnie Cain, clerk-typist B, Libraries; Susan Finney, maintenance clerk A, Housing and Food Services.

The '80s

(Continued from page 1)

Pompeii and others who do field work with students on Pennsylvania Indian mounds.

Faculty members at the Commonwealth Campuses are no less innovative in finding ways to combine teaching and research, Dean Paulson notes. At Fayette Campus, for example, three English faculty members are compiling oral histories among the retired miners in the region.

"Clearly this is the direction which liberal arts education everywhere will take in the 1980s," Dean Paulson comments. "We must make the humanities come alive in our teaching if we are to attract a broader range of high school graduates."

Liberal arts professors are also beginning to explore ways of working beyond traditional department affiliations.

"Some of the most interesting work in the humanities today bridges discipline boundaries," Dean Paulson says. "For many years we have had faculty members in French and Spanish who also taught courses in comparative literature or historians who lectured in American studies."

"The Planning Advisory Committee of the College is encouraging this kind of flexibility on the part of our faculty members and recently conducted a survey to see how many instructors might be interested in teaching in areas outside their disciplines. The results were quite surprising, showing that many Liberal Arts faculty members are qualified and willing to teach in other programs."

Faculty members from Liberal Arts are reaching out not only beyond the confines of their specialties but also beyond their college. Dean Paulson cites a recent lecture by Stephen Toulmin, a widely known philosopher of science from the University of Chicago. As the first speaker in a seminar series on Wittgenstein's Vienna, sponsored by the Interdisciplinary Graduate Program in the Humanities, Dr. Toulmin attracted a substantial audience which included philosophers, art

Penn State Intercom

News in Brief

Ordinances regulate canvassers, solicitors

Three ordinances have been put into effect regulating activities of solicitors, canvassers, peddlers, door to door sales persons and temporary retail businesses in the borough of State College.

Persons or groups soliciting or canvassing are required to register, obtain a license, and display badges with personal photographs.

The ordinance defines canvassing as engaging in the activity of questioning persons for the purpose of obtaining information, data or opinions for political, educational or religious reasons. A new law also governs selling by "vehicle peddlers," such as street vendors.

The ordinance pertaining to transient retail dealers and businesses requires that they also register to obtain licenses with the town. Yard or garage sales are not included in this category if no more than two sales a year are conducted on the same piece of private property.

Anyone wishing to register a complaint, or interested in verifying the licenses of solicitors, canvassers or foot and vehicle peddlers, should call the State College Bureau of Police Services.

Renaissance Fund will honor Ulerich

University Trustee William K. Ulerich will be honored by the Penn State Renaissance Fund as one of Central Pennsylvania's outstanding citizens on Wednesday, Nov. 14.

Mr. Ulerich, chief executive officer of The (Clearfield) Progress and the Danville News and eight radio stations, will be guest of honor at a fund-raising dinner in Gatsby's restaurant, State College.

"As a perpetual tribute to Bill, we wish to raise \$25,000 to create three Renaissance Scholarships in his honor," said Trustee

Mimi Unger Coppersmith, Renaissance Fund Raising and Promotion Chairwoman. "It would be great for at least three Penn State undergraduates each year to be selected as the 'William K. Ulerich Renaissance Scholars'."

The Renaissance Fund was established at Penn State in 1970 to raise scholarship money for promising but needy students. The tradition of an annual dinner honoring a distinguished citizen was begun in 1977, and more than \$20,000 has been raised since then.

Mr. Ulerich served as president of Penn State's Board of Trustees from 1975-78. He has been president of the National Penn State Alumni Association and in 1969 was honored as a Distinguished Alumnus. In 1978, he received the Lion's Paw Medal.

Book renewals due Nov. 23

All library books out on a term loan should be renewed on or before Nov. 23. For renewal, telephone 863-2174 between the hours of 8 a.m. to noon, 1 to 7 p.m., and 8 p.m. to midnight Mondays through Fridays.

Museum excursion is planned

The Central Pennsylvania Society of the Archaeological Institute of America is sponsoring an excursion to the "Aspects of Ancient Greece Exhibition" at the Allentown Art Museum on Thursday, Dec. 6.

The bus will depart from the HUB at 8:30 a.m. and leave Allentown at 4 p.m. The cost is \$15. Reservations with payments are due by Friday, Nov. 16, and should be sent to Dr. Archibald Allen, head, Department of Classics, 110 Carnegie Building.

Athletes in Action to play

The Penn State men's basketball team will meet Athletes in Action at 8-10 p.m. Saturday, Nov. 17, in Rec Hall. Faculty/staff tickets (\$3) will go on sale at

(Continued on page 2)

Dr. Muller

Hershey chief named Secretary of Health

Gov. Richard Thornburgh has nominated Dr. H. Arnold Muller, associate professor of medicine and chief of the emergency medicine division at the Hershey Medical Center, to become Pennsylvania's Secretary of Health. Pending Senate confirmation, Dr. Muller will replace Dr. Gordon K. MacLeod in the post.

"Dr. Muller has a distinguished record as a teacher, physician, administrator and authority on vital medical issues," Gov. Thornburgh said. "His experience with medical concerns in state government will also enhance his ability to manage the Health Department and protect the health interests of Pennsylvania."

For the past five years, Dr. Muller served as medical adviser to the State Health Department's division of emergency health service. During the Three Mile Island crisis, he was chairman of the Medical Center's Radiation Hazards Committee.

Dr. Muller joined Hershey Medical Center in 1973, after having a private practice of internal medicine in Carlisle for eight years.

An Albany, N.Y., native, he earned his A.B. from Dartmouth in 1952 and his M.D. degree from Harvard in 1955. His internship was at the University of Pennsylvania Hospital. His residency, from 1956-59, was served at the University of Washington in Seattle.

PSU commissions an official history

Historian Michael Bezilla of State College has been commissioned to write the official history of the University.

"There has not been an official history for over 30 years," said Dr. Richard Grubb, senior vice president for administration. "Dr. Bezilla has established himself as a writer and historian in both the scholarly and the popular press. I feel he is an excellent choice for the job."

Dr. Bezilla, who will work out of an office in Pattee Library, says he expects the history to take at least three years to write and publish.

A 1972 graduate of Indiana University of Pennsylvania, Dr. Bezilla holds the M.A. and Ph.D. degrees in history from Penn State. Since September 1978, he has been working on a history of Penn State's College of Engineering.

He has been a lecturer in the

Senate to hold forensic session on Plan for '80s

The University Faculty Senate will hold a forensic discussion of Penn State's Plan for the '80s during its Nov. 13 meeting. The forensic session will follow action on one legislative proposal and discussion of two others.

At the start of the forensic session, Senate Chairman George McMurtry will outline procedures recommended by the Senate Council. Introductory presentations by Provost Eddy, chairman of the Steering Committee, and M. Frank Mallette, chairman of the Committee on Planning and Development, will follow.

The Plan then will be discussed chapter by chapter, with members of the Steering Committee and the various Task Forces available to answer questions. When all six chapters have been discussed, the remaining time will be used for general discussion and further questions and answers.

Any member of the University faculty or administration who is not a member of the Senate may request the privilege of the floor on any item of legislative or forensic business already before the Senate. Such a request must be made to the chairman, through the secretary of the Senate, at least four days before the meeting.

Although the Senate Committee on Planning and Development is the only committee that has been asked specifically to review the Plan and prepare a written report, any Senate committee may prepare such a report and submit it to the Steering Committee.

The legislative proposal to be voted upon is the recommendation of the Committee on Intra-University Relations that responsibility for the approval of medical curriculum courses and content be vested in the faculty members of the College of Medicine. The text of the

(Continued on page 2)

Energy savings to mount over recess

The University's holiday recess — lasting from the close of the workday Friday, Dec. 21, through Tuesday, Jan. 1 — will reduce energy costs by approximately \$176,000 at University Park.

That's what members of the University's Executive Energy Conservation Committee were told at a recent meeting.

"University Park buildings may be used by faculty and staff during the recess," said Ralph E. Zilly, vice president for business and chairman of the committee, "but temperatures can be expected to be in the 55 to 60 degree range and ventilation will be off."

Provisions will be made to protect animal quarters and other critical areas where ventilation and temperature control are important, Mr. Zilly noted.

The Executive Energy Conservation Committee will review all requests for exceptions to the reduced temperature and ventilation requirements. The requests must be endorsed by the appropriate dean or administrative officer in each area and received before Dec. 7 at 208 Old Main.

(Continued on page 2)

The Challenge of the '80s

Editor's Note: This article is the seventh in a series in which the academic deans reflect on what lies ahead for their colleges in the '80s.

During the 1980s, the College of Science will try to do its part to help Penn State enhance its position as a major research university, according to Dean Thomas Wartik.

"This is a survival tactic," Dean Wartik says. "Among our public institutions, the

major research universities, such as Berkeley, Wisconsin, and Michigan are the ones that have proven most attractive to undergraduate students. In a decade when the college age pool is declining, the ability to attract undergraduate students will be critical."

Basic science, because it underpins our modern technological society, is less subject to the waxing and waning of enrollment demands characteristic of more applied disciplines.

"You can't teach engineering without a knowledge of mathematics, chemistry and physics," Dean Wartik points out. "Business majors must know something about mathematics and, from now on, about computer science."

"Most of the College of Science undergraduate teaching load is in service courses taught to students outside of the College. We have no close competitor in the number of large enrollment courses our faculty members teach. Correspondingly, the percentage of our total student credit hours taught to students in other colleges is the highest on this campus. Because many of the disciplines which are

Penn Staters

Dr. Linda McArz Shoop, associate professor of educational psychology at the New Kensington Campus, recently received the 1979 "Outstanding Teaching Award" from Penn State's College of Education. The awards committee selected her "for performance as a teacher, adviser, developer of quality instructional processes and for performance as an evoker of professional aspiration." Dr. Shoop has been a full-time faculty member at New Kensington since 1972.

Dr. Richard Rose, associate professor of physiology and surgery at Hershey, has been awarded a Senior International Fogarty Fellowship. He will spend nine months performing studies on the electrophysiology of epithelia at the University of Otago School of Medicine, Denend, New Zealand.

Dr. Thomas F. Magner, associate dean for research and graduate studies in the College of the Liberal Arts, will visit the Republic of China Nov. 15-25 at the invitation of Taiwan's Ministry of Education. While in Taiwan, Dr. Magner, a specialist in Slavic sociolinguistics, will visit educational institutions and lecture on language and nationalism. After Taiwan, Dr. Magner will spend a week in the Philippines, visiting universities in and near Manila.

Dr. Roger M. Herman, professor of physics, recently gave a series of talks in England, France, and Germany. Dr. Herman spoke on "Vector and Scalar Intercorrelation Interference Effects in the Spectra of H₂ and HD" at Oxford University, the Institute for Advanced Study, L'Ecole Normale Supérieure, in Paris, and the University of Heidelberg. At Heidelberg, Dr. Herman also gave a talk on "Collisional Transfer of Coherence in Multiplets."

Burt L. Fenner, professor of music, has been selected as a 1979-80 ASCAP (American Society of Composers, Authors and Publishers) Award recipient. The awards are given to assist and encourage writers of serious music, and are based on the value of the composer's previous works. This is Prof. Fenner's third ASCAP Award in many years.

Dr. Robert W. Naismith, associate professor of biology at the Worthington Scranton Campus, presented a paper at the international conference on "In Vitro Toxicity: Current and Future Possibilities," held recently at the NATO Advanced Research Institute, Brussels, Belgium. Dr. Naismith was awarded a NATO Fellowship to attend the conclave. His paper was entitled "Optimum Levels of Liver Homogenate from Aroclor 1254 Induced Rats in Promutagen Metabolism."

Dr. Frederick M. Brown, assistant professor of psychology at the Worthington Scranton Campus, recently chaired and participated in the International Conference for Chronobiology, held in Hannover, West Germany. He was the co-organizer of the conference and was awarded a grant from the National Science Foundation to attend. Dr. Brown presented a paper entitled, "Rhythmicity as an Emerging Variable for Psychology," at a symposium commemorating Professor Wilhelm Wundt's founding of the first psychology laboratory in Leipzig 100 years ago.

Dr. Joseph Jordan, professor of chemistry, presented invited lectures recently at Brooklyn College and at the New Jersey Institute of Technology, Newark, entitled "Enthalpic Analysis and Immunological Thermochemistry" and "Resource Development in the Analytical Chemistry of Sulfur Compounds for the New Coal Conversion Technologies," respectively.

Dr. Charles D. Ameringer, professor of Latin American history, conducted a number of seminars and delivered a public lecture on United States-Caribbean relations at Western Kentucky University in Bowling Green Oct. 22-23. Dr. Ameringer's visit was sponsored by the Latin American Studies Center and the Departments of Government and History of Western Kentucky University, with funding provided by a grant from the U.S. Office of Education.

Retirements

Theola F. Thevaos, research assistant in rural sociology, College of Agriculture, retired Nov. 1 after 26 years of service with the University.

After a brief stay at Penn State during the 1952-3 school year, Ms. Thevaos became a full-time member of the University faculty in 1954 as an instructor in research.

She was appointed a research assistant in rural sociology in 1961. Ms. Thevaos has worked with researchers in obtaining primary data through personal interviews for research analysis, as well as collecting and tabulating secondary data for statistical analysis.

A native of Mississippi, Ms. Thevaos received her B.S. in home economics at the Mississippi State College for Women. She has also pursued graduate work at Mississippi State University and Columbia University.

John J. Swords, coordinator of veterans affairs, retired from the University Oct. 30.

Mr. Swords came to Penn State in 1965 as executive officer of the Naval Reserve Officers Training Corps unit. Following his retirement from the U.S. Marine Corps in 1969 with the rank of lieutenant colonel, he was named assistant to the vice president for student affairs at the University.

In 1971 he was named veterans counselor with responsibilities for assisting veterans with personal, financial, academic and other questions and problems. He became coordinator of veterans affairs last year.

Mr. Swords earned a bachelor's degree in mathematics from Hobart College and a master's degree in higher education counseling from Penn State. He is a native of New York City.

Promotions

Staff Non-Exempt

Marie O. Graham to senior staff nurse at Hershey.

Heather R. Hertzler to senior staff nurse at Hershey.

Helen A. Koslosky to senior staff nurse at Hershey.

Cathy J. Pettengill to senior staff nurse at Hershey.

Margaret J. Shimko to senior staff nurse at Hershey.

Judy A. Smith to senior staff nurse at Hershey.

Darlene A. Wilkins to senior staff nurse at Hershey.

Technical Service

Douglas G. Bangs to mail clerk-courier at Hershey.

Stanley L. Clouser Jr. to machine operator in Housing and Food Services.

Jerald M. Duck to barn worker-milker in Agriculture.

Susan C. Hummel to patrol officer at Berthend College.

Martin L. Ishler to poultry work, general in Agriculture.

Victor L. Janosky to food preparer A in Housing and Food Services.

Ruth M. Keener to patient service aide at Hershey.

Marian L. Lockhart to poultry processor, helper in Agriculture.

Steve D. McCorkle to receiving clerk at Hershey.

Jeffrey L. Monsell to truck operator, waste sludge in Physical Plant.

Leroy H. Sampsel Jr. to group leader-carpenter at Hershey.

Paul K. Shellenberger to poultry worker-general in Agriculture.

Lorna K. Stover to food preparer B in Housing and Food Services.

Clarence E. Thompson to group leader, intramurals equipment in Health, Phys. Ed. and Recreation.

Leonard Witt to cook leader at Nittany Lion Inn.

Elizabeth Jane Wyda to general maintenance C at Wilkes-Barre.

Joseph J. Wyda to general maintenance A at Wilkes-Barre.

Staff Vacancies

The following vacancies for positions classified as staff except or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Nov. 15, 1979. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

COORDINATOR-CAMPUS RESIDENTIAL LIFE, Altoona—Responsible to the Dean of Student Affairs for carrying out specific responsibilities for the Residence Hall Program including administration of the Gooden Standards System, selection and supervision of student assistants; developing cultural, social, and educational programs; and counseling of students. Bachelor's degree or equivalent plus at least one or two years of effective experience are required or a master's degree or equivalent in student personnel or related field with three to six months residence hall experience. It is a continuous, 10-month appointment.

ENGINEERING AIDE-APPLIEE RESEARCH LABORATORY, University Park—Responsible to the Project Engineer or designated Senior Engineering Aide for design, modification, testing, installation, operation and maintenance of electronic equipment and components. Assist in collection, compilation, and analysis of data. Associate's degree or equivalent in electrical or electronics engineering technology program, plus over two to four years of effective experience. Position may require travel on field assignments including assignments aboard ships at sea.

LABORATORY TECHNICIAN-DAIRY BREEDING RESEARCH CENTER-COLLEGE OF AGRICULTURE, University Park—Select semen samples; perform semen evaluation tests including estimations, preparations of stained semen smears, and determination of sperm concentration with colorimeter, hemacytometer and electronic cell counter. Maintain records and summarize data. Prepare chemical and biological media and perform procedures used in processing and freezing semen. Operate and maintain a variety of equipment including automatic ampule labeling machine, pumps, automatic filler and sealer, electronic temperature recorder, autoclave, drying oven, water still, analytical balance, electronic cell counter, spectrophotometers, low temperature baths, automatic syringes, osmometer, pH meter and differential interference microscope. Prepare reagents for laboratory tests. High school graduation or its equivalent with up to one year of effective laboratory experience required.

AREA REPRESENTATIVE FOR CONTINUING EDUCATION, Olathe County—Responsible for the functions of development, organization, operation and administration of Continuing Education programs and services within an assigned geographic district. Bachelor's degree or equivalent, plus two to three years of directly related experience or a master's degree or equivalent, plus one to two years of directly related experience.

Energy savings

(Continued from page 1)

"It is expected that adequate planning by individuals will significantly reduce the number of requests for exemptions compared to last year," Mr. Zilly said.

At locations other than University Park, requests for exemptions will be reviewed by the provost, director or appropriate administrative officer.

Senate

(Continued from page 1)
proposal was published on page 6 of the Sept. 27 INTERCOM.

The two legislative proposals to be discussed have been formulated by the Committee on Academic and Athletic Standards and the Committee on Undergraduate Instruction.

Acting at the request of the director of the Office of Foreign Studies, the Committee on Academic and Athletic Standards is attempting to resolve some problems caused by students in foreign studies programs taking courses on a pass-fail basis.

Thus, the committee is proposing the following addition to Academic Policy 49.60 (Pass-Fail, Baccalaureate Degree Candidates): "Courses abroad may not be taken under the pass-fail grading system except in highly unusual circumstances and then only with the advance (that is, during the preceding term) authorization of the Office of Foreign Studies."

The proposal of the Committee on Undergraduate Instruction concerns the conferring of academic credit for two courses—English 1D and Math 1—taken by developmental Year students.

The proposal is similar in content to one passed by the Senate on Oct. 4, 1977, which allowed credits earned in Basic Skills courses English 4 and Math 0 to be included in the student's cumulative grade point average. The purpose of that proposal, as with the new one, was to permit students to use these courses to satisfy PHEAA requirements that full-time students schedule a minimum of either eight credits per term or 24 credits per academic year.

The Undergraduate Instruction Committee is recommending that English 1D and Math 1 be included in the cumulative grade point average but not satisfy or substitute for the categories of "BDR," "Requirements for the Major," "Requirements for the College," and "Electives." The recommendation would give students in the Developmental Year Program the same consideration given to students required to schedule Basic Skills courses.

News in brief

(Continued from page 1)
the Rec Hall Ticket Office at 8:30 a.m. Monday, Nov. 12, and will be available for purchase throughout the week.

Athletes in Action—an arm of the Campus Crusade for Christ—is a team composed of former All-Americans and outstanding college players. "This will be the best basketball team to come to Rec Hall this year," Penn State Coach Dick Harter says. The game is part of an athletic doubleheader on Nov. 17, as the football team will play Temple at Beaver Stadium that afternoon.

Marital consultation

The Individual and Family Consultation Center of the University is offering a free program to help husbands and wives enhance their relationships. The program centers on the teaching of such skills as listening, expressing, problem solving, negotiations, and mutual helping skills.

According to Anne Yenchko, program coordinator, couples meet weekly either privately or in small groups to learn and practice the relationship enhancement skills. The average length of the sessions is 10 to 12 weeks.

The program is appropriate for couples who may be having serious problems with their marriage or those who are satisfied but want to learn how to enrich their relationship further.

Couples interested in more information may call Ms. Yenchko at 865-1751 weekdays from 8 a.m. to 5 p.m.

Friday, Nov. 9
Geography Dept. coffee and lecture, 3:45 p.m., Room 319 Walker. Howard Palmer, associate dean, Graduate School, on "Entropy: Is the World Really Running Down?"
Sports: soccer, vs. Connecticut, 7:15 p.m., Lamb Fellowship, Larry Tomczak and C.J. Mahaney, evangelists, on "Preparing for the '80s," 7:30 p.m., Schwab.

PSU Symphonic Wind Ensemble Concert, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, Nov. 10
Last date to submit petition to Records Officer to graduate in absentia in November.
Sports: men's fencing, Men's and Women's Open, 8 a.m., through Nov. 11.
Penn State Symphony Orchestra Young People's Concert, 10:30 a.m., Eisenhower Auditorium.
Lamb Fellowship, Larry Tomczak and C.J. Mahaney, evangelists, on "Preparing for the '80s," 7:30 p.m., Schwab.

Sunday, Nov. 11
Lamb Fellowship, Larry Tomczak and C.J. Mahaney, evangelists, on "Preparing for the '80s," 10:30 a.m., HUB Ballroom.
University Chapel Service, 11 a.m., Eisenhower Chapel. The Reverend James May, O.S.B., PSU Catholic Center, speaker.

Shaver's Creek Nature Center, Winter Search for Insects and their Relatives, with Charles Rutschky, professor of entomology, 2-4 p.m., Stone Valley.
Opening Reception for Betty Parsons and Clinton Hill exhibit, 3-5 p.m., Zoller Gallery, Visual Arts Bldg.

Monday, Nov. 12
Last day to sign Fall Term Emergency Loans, Room 108 Shields.
Early registration for Winter Term, through

Nov. 16, 8:30 a.m.-4:30 p.m., Room 112 Shields.
Fall Term classes end, 9:55 p.m.
Tuesday, Nov. 13
Final Examinations.
Museum of Art Gallery Talk, 10:30 a.m., Museum of Art, Christopher Comer, Princeton Univ., discusses the exhibit of French drawings from European collections (the former Armand Goblet Collection).
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Wednesday, Nov. 14
Final examinations.
Thursday, Nov. 15
Final examinations.
Commons Videotape, "TV Quarterbacks," noon, Kern Lobby.
Board of Trustees meeting, Keller Bldg.

Friday, Nov. 16
Final examinations.
Board of Trustees meeting, Keller Bldg.
Saturday, Nov. 17
Sports: football, vs. Temple, 1:30 p.m.; exhibition basketball, "Athletes in Action," Residence Halls close for Fall Term, 3 p.m.
Artists Series, Johnny Cash Concert, 7:15 and 9:30 p.m., Eisenhower Auditorium.

Seminars

Friday, Nov. 9
Analytical Chemistry, Albert Robbat, grad student, on "Electroanalytical Determination of Selected Sulfur Heterocycles Found in Coal Liquefaction Processes," 11:10 a.m., Room 333 Whitmore (rescheduled).

Microbiology, Cell Biology, Biochemistry and Biophysics, Joyce Hawkes, Northwest Fisheries Center, Seattle, Wa., on "Effects of Marine Contaminants on Fish Tissue," 2:20 p.m., Room 101 Althouse.
Statistics, James Frane, UCLA, on "Issues in Handling Incomplete Data in Multivariate Analysis," 2:30 p.m., Room 117 Borland.
Philosophy, Mitchell Miller, Vassar, on "Plato's Parmenides: A Socratic Reading," 4 p.m., Room 101 Kern.

Physical Chemistry, J. Franklin, Rice Univ., on "Energy Distribution in Ionic Dissociation Reactions," 4 p.m., Room 333 Whitmore.

Monday, Nov. 12
Genetics, Gori Lee, grad student, on "Cytogenetics of Brook Trout," 3:55 p.m., Room 111 Tyson.
Plant Pathology, D.C. McCune, Cornell Univ., on "Saline Drift from Cooling Towers: Prediction of Its Impact on Vegetation," 3:55 p.m., Room 213 Buckhout.

Drawing by Charles-Dominique Joseph Eisen in Museum of Art show, "French Drawings from European Collections, The Former Armand Goblet Collection," opening Nov. 11.

Microbiology, Cell Biology, Biochemistry and Biophysics, Vincent Hascall, NIH, on "Structure and Biosynthesis of Proteoglycans (I)," 4 p.m., Room 101 Althouse.

Tuesday, Nov. 13
Microbiology, Cell Biology, Biochemistry and Biophysics, Vincent Hascall, NIH, on "Structure and Biosynthesis of Proteoglycans (II)," 11 a.m., Room 101 Althouse.
Food Science/Sigma Xi, J.E. Kinsella, Cornell Univ., on "Protein Functionality," 11:10 a.m., Room 201 Borland.

Population Issues Research Center, Dr. Wendy Baldwin, National Institute of Child Health & Human Development, on "Adolescent Fertility: Trends and Consequences," 2:30 p.m., Room 308 Willard Building.

Exhibits

Chambers Gallery: Graduate and Undergraduate Students' Drawings, throughout end of Fall Term.

HUB Galleries: Dick Brown, photographs, through Nov. 17, The Gallery. Craft Exhibit from the HUB Craft Building, through Nov. 17, Art Alley.

Kern Commons Galleries: Penn State

Students, "Handmade Paper as Art," through Nov. 17. United Nations photographic display, "Focus: Children U.N., 1979," through Nov. 17. Mitchell Weiss, ceramics, School of Visual Arts students, "Glass Works from Penn State," through Nov. 17.

Museum of Art: European works and American paintings, drawings and prints from the permanent collection, through Nov. 11. French drawings from European collections (the former Armand Goblet Collection), opens Nov. 11. Oriental works from the permanent collection, opens Nov. 18.

Patte Library: Central Pa. Chapter of Pa. Guild of Craftsmen, "Paper Expressions," through Nov. 16, Main Lobby. David Harmon, William Welch and Russell Vanecek, paintings, through Nov. 16, East Corridor Gallery. Timothy G. Phillips, drawings, through Nov. 16, Lending Services Lobby.

Robeson Cultural Center: "Art from Pittsburgh," mixed media, through Nov. 18, Walnut Building.

Visual Arts Bldg. Zoller Gallery: Betty Parsons and Clinton Hill exhibit, opens Nov. 11.

The '80s

(Continued from page 1)
predicted to flourish during the '80s rely on the basic sciences, I don't foresee any drop in the demand for our services. It may even increase."

The enrollment of majors in the College has held up well, according to Dean Wartik. "Last summer and fall," he says, "for the first time in our history, we admitted more new students at University Park than any other college. The decline in the number of mathematics and physics majors seems to have stabilized, and it has been more than offset by the increase in the number of computer science majors. Currently we have over 500 of them, making us about the largest in the country in the number of undergraduate majors in this discipline."

The College, a prime mover in the creation of the Penn State Scholars Program, is moving vigorously to attract top quality academic students. With the assistance of a grant from its alumni society, an audio-visual presentation was developed for faculty members and alumni to take into Pennsylvania high schools.

"We talk with juniors who have expressed an interest in careers in science," Dean Wartik says, "and try to point out to them the advantages of getting a scientific education at a large research university."

The quality of undergraduate teaching in the College of Science is of major

concern now and in the '80s, Dean Wartik says.

"In recent years, we have made an effort to move senior faculty members into large-enrollment undergraduate lecture sections instead of turning them over to graduate teaching assistants or temporary faculty members. Bringing this additional experience into our service courses has resulted in a sharp drop in the number of instructional problems we encounter. During the '80s our efforts to provide high quality instruction for every student we teach will continue."

Is it possible to improve a college's scholarly reputation in an era of declining resources? Dean Wartik believes it can be done.

"The quality of a college or university is determined by the quality of its faculty members," he explains. "If a university has high expectations of its faculty members, it can excel."

"To achieve quality," Dean Wartik continues, "you must constantly compare your performance with that of the very best institutions. The national and international stature of faculty members can be measured by a number of objective criteria."

He cites such measures as national and international awards presented for achievements in research, level of external funding, Fulbright and Guggenheim fellowships, memberships on journal editorial boards and granting agency panels, and invitations to deliver seminars

and colloquia at other first-rate institutions.

"By these measures, faculty members in the College of Science get high grades and are steadily improving," Dean Wartik says. "For example, the number of grants per faculty member in the College has now risen to 0.74. The rate of our external funding has gone up far faster than the rate of inflation. It totals almost \$6 million as compared to \$2 million less than eight years ago."

"During the '80s, really excellent departments are not going to have any difficulty in obtaining outside research funds. Some institutions of higher education have adopted the attitude that if they can only hold their own during the next decade, they will be doing well. Our posture is that we do not need to stand still if we have very high expectations for all of our faculty members — both tenured and non-tenured. In the next decade, we see an opportunity for us to pass by other departments by trying hard than they do."

Increased federal funding for research means larger graduate student enrollments. Dean Wartik thinks the graduate student population in the College of Science could increase by as much as 100 percent in the 1980s.

"After a period of stabilization, the number of chemistry graduate students is beginning to rise," he says, "and the health-related areas in the College are also growing, in part because there are so many

challenging problems to be solved."

Computer science would like many more graduate students; however, last year there were only 121 doctoral degrees awarded in this area nationally. Candidates are taking high-paying jobs instead of going to graduate schools.

"Enrollment perturbations will probably occur among our departments in the 1980s," Dean Wartik comments. "But it is inconceivable to me that a time will ever come in this country when we would say that no more research needed to be done in the physical, mathematical or biological sciences. Without discoveries in the basic sciences, there would be no technological progress or advances in medicine."

"Scientists like Faraday, Rutherford, Einstein and Planck never considered the applications that might come from their work. But without discoveries such as theirs, we wouldn't have telephones, electric motors, lasers, or television. "Astronomy is perhaps our one department whose courses are not a prerequisite to any other major in the University. Nevertheless, it is essential that research in astronomy be continued in this country to answer challenging and important scientific questions about the nature of the universe."

"The College of Science is a basic science college. Our principal mission is not to provide training for specific types of employment but to promote the advancement and dissemination of scientific knowledge."

Artists create a new medium making paper by hand

Think "paper."

Chances are you're conjuring up an image of a clean, white sheet measuring 8½" x 11". Something to write on, type on, draw on, paint on, print on, photocopy on.

Artists, too, traditionally have considered paper in much the same light, using it as a tool, a means to an end, an element on which to *impress* their creations.

But no longer. In growing numbers, artists are discovering the creative potential paper holds as an end in itself. With their own hands, they are making paper "from scratch." And in the process they're texturing it, coloring it, shaping it and combining it with other materials to fashion works of art.

In short, hand papermaking has become a serious artistic medium with an integrity and a message all its own.

"There's been a significant trend toward papermaking in the art community during the last five years," says Diane Pepe, assistant professor of art at the University. Ms. Pepe teaches Art 498F, "Experimental Papermaking," to classes of 10 to 18 students a term.

"It's become a medium of the times," she observes, adding that papermaking is to the '70s what printmaking was to the '60s.

The reasons for this ascendance are several.

"Artists, when confronted with something new, can be particularly intuitive and experimental," she notes. "For years, we've been using paper as a medium to work on, not with. In papermaking as an art form, however, there are no precedents to follow, no norms, no standards of comparison. There are also no limits; we're free to do what we want."

Papermaking cuts across all artistic disciplines, Prof. Pepe points out. Artists can infuse their papermaking with ideas and techniques extrapolated from their own specialties, while gaining new insights to take back to those same specialties.

Prof. Pepe's classes attract students from the various majors within the College of Arts and Architecture, creating an interdisciplinary atmosphere in her

Pulp fibers mat instantly into paper as Prof. Pepe (right) lifts the "mold and deckle" from the vat.

basement workshop in the Visual Arts Building.

"Architecture majors are interested in learning about the structural uses of paper for building models," she explains. "The ceramics people are attracted by the possibilities for molding the paper and combining it with clay. Printmakers find that the lamination bases make a very receptive, fine quality paper to print on."

"Design students use it to make fine prints," she continues, "and sculpture students use it in large-scale sculpture pieces. When these people meet in class, there's a constant cross-fertilization of ideas."

Quality control is another factor affecting papermaking's popularity. "You're not limited to the textures and surface qualities of paper that's available commercially," Prof. Pepe points out. "You're able to vary the opacity, the thickness, the color, shape and size."

In addition, papermaking is relatively inexpensive, and the process employs

common materials. True paper — as opposed to papyrus, parchment, or vellum — consists of any fibrous, cellulose material that can be combined with water to form a wet pulp. Thus wood fiber, linen and cotton rags, straw and onion skin, among other things, work nicely.

Another frequently used material is paper itself — recycled, Prof. Pepe says. Her students use pads, old drawing and print paper, egg cartons, even computer cards for base pulp.

The basics of papermaking can be learned in a day, she claims, though the techniques of refinement can take a lifetime to master.

Essentially, the process involves breaking down the fibrous material in water until the fibers separate. In order to "re-bond," each fiber must have water beaten into it; the beating also serves to fray the surface of each fiber into smaller fibrils.

The fibers are removed from the water via a sieve-like screen; the surface tension of the draining water draws neighboring fibers into tight embrace, and the fibrils lock together. The thin layer of matted fiber remaining on the screen is paper, which can be dried in place or removed and dried separately.

"The process can be a revelation to artists," Prof. Pepe says. "It allows them to 'see' paper as a liquid form capable of being molded into many shapes."

Prof. Pepe and her students start the process by cutting their material into 2" x 2" squares and feeding them into a Hollander beater, a machine in which the fibers are broken down and hydrated, or super-saturated.

The resulting pulp is poured into a vat and further mixed with water for the sheet-forming process, the thickness of the sheet depending upon the proportion of pulp to water.

The "mold and deckle" (the sieve-like screen) is dipped into the pulp mixture and lifted out. The newly-formed sheet is then "couched," or transferred from the mold to dampened felt. After the process is repeated several times, the resulting stack of wet sheets — interspersed between felt — is placed in a 20-ton hydraulic press, which squeezes the moisture out. The paper can be dried further in a variety of ways.

"The creativity in papermaking enters each part of the process," Prof. Pepe avers. "It lies in texturing the paper, coloring it, altering the mold, mixing in whatever materials the artist chooses, and, of course, determining the aesthetic form the paper takes afterwards. Many of the works are three-dimensional."

"My students also like to experiment with watermarks — the translucent lettering or designs visible on

commercially bonded paper."

Watermarks, made by affixing a wire pattern to the mold, were invented by Italian papermakers about 1250. The use of these designs — unique to each papermaker — spread throughout Europe. Watermarks may have had some religious significance, but most scholars on the subject say they were used chiefly to identify the papermaker, making paper selection that much easier in an age when illiteracy was rampant.

"Watermarks are just one of the infinite creative options available to papermakers," Prof. Pepe says. "The medium keeps growing incredibly because the artist is limited only by her or his imagination."

The products of Prof. Pepe's students' imaginations — in a show entitled "Homemade Paper as Art" — are on display in Kern Commons Gallery through Nov. 17.

In addition, another papermaking show — "Paper Expressions" — is on view in the main lobby of Pattee Library through Nov. 16. The show features pieces by members of the Central Pennsylvania Guild of Craftsmen that resulted from a workshop Prof. Pepe held for Guild members in September. — Roger Williams

Campus Update

The Beaver Campus will host dancers, singers and musicians from various ethnic groups during its Ethnic Awareness Day on Sunday, Nov. 11. Sponsored by the Student Government Association, the free celebration will be held in the gymnasium from noon to 8 p.m. It will feature ethnic displays and food booths as well as performing artists.

The York Campus is the recipient of an \$18,043 grant from the Office of Higher Education, Pennsylvania Department of Education. The grant is to be used for enhancing associate degree programs in computer science.

President Oswald has appointed eight persons to the Delaware County Campus Advisory Board. The appointments constitute the first step in the expansion of the board from its current membership to 25 members, the limit imposed by the board's by-laws.

History

(Continued from page 1)

University's Department of History and a graduate fellow of the Pennsylvania Transportation Institute. Dr. Bezilla's book, *Electric Traction on the Pennsylvania Railroad, 1895-1968*, will be published next year by the Penn State Press.

Although he expects ample material to be available through conventional sources, Dr. Bezilla said he will welcome contributions to the bibliography. These can be made through the library's Penn State Room.

The last history of Penn State was written by W. F. Dunaway and published in 1946.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

LEAVE TAKING — Time to bring in the outdoor furniture at the Nittany Lion Inn.

News in Brief

PSU freshman SAT scores above national average

Fall Term freshmen at the University averaged 99 points above the national average for college-bound students in the Scholastic Aptitude Tests.

Freshmen who entered Penn State this fall had an average total score of 993 on the widely used college entrance tests. The figure was up a point over last year and nine points since 1975. The national average of 894 was down three points from last year and down 12 points since 1975.

University Park-bound freshmen had an average score of 1,064.

"It is extremely encouraging that Penn State continues to attract students who are defying the national trend of falling SAT scores," said Dr. Robert Dunham, vice president for undergraduate studies.

Penn State freshmen averaged \$26 in the math SAT and 467 in the verbal. Nationally, the averages were 467 in math, 427 in verbal.

A total of 9,273 Penn State-bound students took the 1979 exams.

Affirmative Action reference data available

The Employment Division has a library of Affirmative Action/Equal Employment Opportunity reference material to assist University personnel seeking recruitment and affirmative action information. Such information may prove helpful, for example, in ascertaining availability of minorities and women for specific job categories or in locating recruiting sources in fulfillment of affirmative action, good faith efforts.

Some examples of the kinds of data available in this library are:

- (1) A directory for reaching minority groups,
- (2) A directory of resources for affirmative recruitment,

- (3) A handbook for recruiting at the traditionally black colleges,
- (4) A directory of organizations interested in the handicapped.

While the reference material is not available for overnight loan, it may be used in the Employment Division, Room 117 Willard Building, between 8 a.m. and 12 noon and from 1 to 5 p.m., Mondays through Fridays.

Parking regulations are in effect over term breaks

University Park parking rules and regulations are in effect year-round, including term breaks, parking coordinator Allen Derzak reminds faculty and staff members.

The regulations specify that vehicles with current faculty-staff parking permits must be parked in the assigned parking area or in one of the designated "open" parking areas between 7 a.m. and 5 p.m., Mondays through Fridays.

After 5 p.m., vehicles with current permits may be parked in any bonafide parking space, including individual reserved spaces, visitor spaces, 15-minute spaces or any other reserved space, with the exception of 24-hour spaces as indicated on the individual reserved sign.

Continuing Ed office moved

The State College-University Park area office for Continuing Education, directed by Harry V. Weaverling, has moved from 309 Shields Building to 102 Bouck Building, effective Nov. 8. All services normally conducted by the office will continue as usual. The phone number (865-3443) remains the same.

Bookstore closed for holiday; temporary openings available

The Penn State Bookstore will be closed from Thursday, Nov. 22, until Monday, Nov. 26.

The Bookstore, located in McAllister Building, has temporary positions

available for anyone interested in working for approximately two weeks at the beginning of Winter Term. Interested persons should contact William McVicker at 863-0205.

Swimming, Diving Relay Championships Nov. 30-Dec. 1

The 11th Annual Penn State Swimming and Diving Relay Championships will be held at the Natatorium on Friday, Nov. 30, and Saturday, Dec. 1.

Participating will be teams from Allegheny College and these universities: Bucknell, Colgate, East Carolina, Glassboro State, George Washington, Johns Hopkins, Maine, Maryland, North Carolina, North Carolina State, Penn State, Pitt, Syracuse, Villanova and West Virginia.

Low board diving trials will begin at 8 p.m. Nov. 30. Swimming trials will be held at 9 a.m. Dec 1, with the high board diving trials to follow at 11 a.m. Swimming and Diving Finals will start at 3:30 in the afternoon. Tickets cost \$1 for the trials and \$1 for the finals.

PSU Olympic role traced

Dr. John Lucas, professor of physical education, is the author of a new publication, *Penn State at the Olympic Games: 1904-1976*.

The publication traces the roles of 59 athletes, coaches, trainers, judges and administrators with Penn State affiliations in the Olympic Games, beginning with the 1904 competition at St. Louis and continuing through the 1976 Olympiad at Montreal.

Dr. Lucas has attended the last four Olympic games and has served as a contributing author for "Olympic Review," published by the International Olympic Committee.

His booklet is available for \$4.25 at the Penn State Bookstore and at novelty stands in Beaver Stadium during Penn State home football games.

Graduate School seeks funds for Schilling lecture

The Graduate School is undertaking a \$50,000 fund raising drive to provide an endowment for a Harold K. Schilling Lectureship.

Dean Schilling, a physicist, died last May. He joined the faculty in 1961 and served as director of the Acoustics-Ultrasonic Research Laboratory and head of the Physics Department before becoming dean of the Graduate School in 1950. After 14 years in that post, he became the first University Professor at Penn State.

"Dean Schilling was deeply interested in the relationships between scientific conclusions and religious beliefs," Graduate School Dean James B. Bartoo points out. "The proposed lectureship will provide a means of bringing to students' attention important issues where religious beliefs relate to the discoveries of science."

Dean Schilling was the author of three books dealing with this subject and organized two summer seminars which brought together physicists and theologians.

Several thousand dollars have already been raised for the fund, according to Dean Bartoo. Faculty and staff members wishing to contribute may send checks made out to the University and designated for the Schilling Memorial Fund either to the Graduate School in Room 320 Kern Building or to the Office of Gifts and Endowments, Room 116 Old Main.

Theatre party Dec. 1

The Faculty Women's Club is sponsoring a theatre party for the University Resident Theatre Company production, *You Can't Take It With You*, at 8 p.m., Saturday, Dec. 1, in the Pavilion. The \$6.50 cost includes admission to the performance and to a wine and cheese party to be held afterwards in the Pavilion.

Reservations are due by Saturday, Nov. 17; checks payable to the Faculty Women's Club should be mailed to Mildred Reinschmidt, 102 Long Meadow Lane, State College. For further information, call Ms. Reinschmidt at 237-9771.

Sigma Xi invites transfers

The Penn State Chapter of Sigma Xi, the scientific research society, is inviting all Sigma Xi members affiliated with other chapters to join. To transfer membership, contact Roberta Beebe (865-1831) at 222-A Hammond Building. Those whose memberships have lapsed may call her for reinstatement, with no cost or penalty involved.

Maples to be removed

The Office of Physical Plant will remove seven maple trees along Pollock Road between Atherton Street and the McAllister Building.

The University's Tree Commission indicates that these trees have been deteriorating for a number of years. They will be replaced with scarlet oaks.

Penn Staters

Dr. Barbara J. Garrison, assistant professor of chemistry, has won a special grant from newly appointed young faculty members in chemistry from the Camille and Henry Dreyfus Foundation. She is one of ten winners selected from across the United States.

The new program of grants, worth \$25,000 each, is designed to enable selected young chemists to start research promptly after becoming full-time faculty members. Dr. Garrison plans to use her grant to continue work on new approaches needed to understand chemical bonding and the structure of atoms and molecules as they interact with metal surfaces. She earned her B.S. at Arizona State University and her Ph.D. at UC-Berkeley.

Dr. Paul T. Baker, professor of anthropology, has recently been elected for a five-year term as president of the International Association of Human Biologists. This organization, which is an affiliate of the International Union of Biological Sciences, represents the membership of six national organizations and a world-wide group of individual scholars from countries lacking appropriate national societies. The association facilitates international scientific cooperative research and meetings for professionals from biological anthropology, genetics, physiology and medicine who are concerned with human biological problems at the level of populations.

Sara Lou Whildin, head librarian at Delaware County, is one of 20 librarians from throughout the United States (and the only one from Pennsylvania) to be selected to participate in a new training program of the Office of Management Studies (OMS). Following a two-week workshop, the librarians selected will work as consultants with OMS analyzing and developing library projects and procedures.

Dr. Anton Schoolwerth, associate professor of medicine and physiology and chief of renal medicine at Hershey, recently was an invited speaker at the fifth International Symposium on Biochemical Aspects of Kidney Function, held at Merton College, Oxford, England. He presented a paper entitled "Further Studies on the Effect of Aminoacylase on Glutamate Deamination by Rat Kidney Mitochondria," co-authored by Dr. Kathryn Harry, associate professor of physiology.

Dr. E-tzu Zen Sun, professor of Asian studies, has been elected president of the Mid-Atlantic Region of the Association of Asian Studies for 1980. The organization has some 3,000 members.

Dr. Kenneth K. Kuo, associate professor of mechanical engineering, recently conducted a five-day course on "Creative Burning in Gas Permeable Solid Propellants" at the Centre du Recherches du Bouché de la Société Nationale des Poudres et Explosifs (SNPE) near Paris. SNPE is a government facility which does research on and development of propellants and explosives. Each year it invites an international specialist to conduct an intensive summer course for its employees.

Alice M. Hoffman, professor of labor studies, presented the keynote address at the Oral History Association meetings in E. Lansing, MI, on "Contributions of Oral History to the Study of Labor History." She also served as chairman of a task force at The Wingspread Conference of the Association to develop standards of professionalism for oral historians.

Dr. Michael C. Danahy, associate professor of French, participated in the sixth Colloquium on Nineteenth Century French Studies, sponsored this year by the University of Pennsylvania Oct. 18-20. Dr. Danahy presented a paper entitled "Semiotic Versions of Suicide," in which

he presented a new interpretation of Flaubert's novel *Madame Bovary*. Some of his research is based on the interdisciplinary perspectives of contemporary women's studies.

Two members of the University's Cooperative Extension Service have received Distinguished Service Awards from the National Association of Extension 4-H Agents. They are Robert J. Kessler, Franklin County 4-H agent, and Gordon D. Walker, Mifflin County Extension agent.

Robert W. Baisley, professor of music, was recently elected to a two-year term as president of the 2500-member Alumni Association of the Yale University School of Music. He was also elected to a three-year term on the Association of Yale Alumni.

The following employees of the University have completed an eight-week Writing Skills for Secretaries/Clericals program:

Georgia Benzie, secretary A, Business Services; Sharon Brode, clerk typist A, Education; Margaret Felice, accounting clerk A, Continuing Education; Pamela Hillard, secretary C, Business Administration; Charlotte Hitchcock, senior records clerk, Registrar; Linda Houtz, secretary C, Agriculture; Virginia Johnston, secretary C, Continuing Education; Inez Lauck, senior transcription clerk, Registrar;

Rita Lux, clerk typist A, Housing and Food Services; Brenda Pletcher, secretary C, Undergraduate Admissions; Dorothy Polcyn, secretary B, Continuing Education; Norma Ruedy, secretary A, University Park Airport; Kristine Seifchick, clerk, steno A, Education; Lutricia Smeal, terminal clerk, Housing and Food Services; Bonnie Struble, secretary C, Special Services Building; Lois Stuart, secretary C, Continuing Education; Mary Jo Thal, secretary B, Personnel Administration; Janice Wingate, secretary B, Controllers Office; Nancy Yoder, secretary B, Continuing Education; Margaret Zinn, accounting clerk, Continuing Education.

University employees who completed the EXCEL training and development program during the past term include:

Cecelia Baekert, secretary B, Registrar; Lillian Brillhart, clerk A, Undergraduate Studies; Kim Evancho, secretary B, Administrative Services; Connie Fisher, secretary B, Printing and Communication Services; Linda Greif, steno A, Publications; Ruth Kilhofer, communication secretary B, Commonwealth Campuses; Kathleen Matson, secretary B, Nutrition; Jo Anne Mengle, secretary B, Agriculture; Wanda Nymen, secretary B, Agriculture; Shirley Rhoades, secretary B, Continuing Education; Elizabeth Richenderfer, head telephone operator, Telephone Services; Linda Schillings, secretary B, Physical Plant; Geraldine Slear, secretary B, Sponsored Programs; Sharon Tate, secretary B, Agriculture; Sandi Wallace, secretary B, Science; and Holly Wheelock, secretary B, President's Office.

Twenty-one University employees recently completed a course in Basic Supervisory Management. They were:

Patricia Alters, secretary B, Dairy and Animal Science; Kathy Barr, secretary B, Agriculture; Sharyn Bowerson, secretary B, Business Administration; Jean Boyd, promotion specialist, Continuing Education; Jane Cartwright, secretary B, Continuing Education; Leah Curling, secretary A, Agriculture; Debbie Deao, secretary B, Engineering; Diane Garner, library assistant, Libraries; Brenda Grenoble, secretary C, Electrical Engineering; Margo Groff, clerk typist A, Political Science; Michael Kalbaugh, industrial service officer, Instructional Services; Ann McMullin, administrative assistant, Liberal Arts; Gillian Roland, library assistant, Libraries; Jean Selvaige, secretary B, Planning and Budget; Janet Snyder, secretary A,

Intercollege Research Programs; Sharon Symanovich, clerk steno A, Aerospace Engineering; Ardell Tyson, associate records officer, Registrar; Brenda Wagner, secretary C, Engineering; Deborah Weidhass, budget clerk, Education; Jean Witmer, acquisition searcher, Libraries.

Graduates of the Basic Supervisory Management Course who recently completed the Supervisory Management II Course were:

Charles Auker, operations supervisor, Computer Center; Douglas Bierly, senior analyst, Planning and Budget; Rose Ann Bobak, secretary, Planning and Budget; Carolyn Fishburn, administrative assistant, Liberal Arts; E.B. Filtzgerald, manager, Housing and Food Services; Marie Frey, senior clerk, Continuing Education;

Myrtle Getz, associate supervisor, Housing and Food Services; Melvin Grishlager, senior designer, Applied Research Lab; John Harbach, assistant supervisor, Continuing Education; Dorothy Hersherberg, cataloging supervisor, Patten Library; Robert Hess, manager, Housing and Food Services; Oscar Jones, assistant supervisor, Housing and Food Services;

Russell Kline, supervisor, Management Services; Clyde LeFever Jr., supervisor, Management Services; John Meredith, supervisor, Continuing Education; Gary Miller, coordinator, Continuing Education; Paul Parsons, manager, Agriculture; Kenneth Ruhl, expeditor, Applied Research Lab; Thomas Seiler, supervisor, Continuing Education; Susan Steinmeyer, coordinator, Continuing Education.

Promotions

Brian C. Clark to coordinator for veteran affairs in Student Affairs. Gary W. Potter to administrative aide in Human Development.

Clerical

Linda W. Duncan to secretary B at Hershey. Linda Gnuhn to secretary B in Earth & Mineral Sciences. Lois M. Hennigh to clerk, statistical A in Agriculture. Pamela M. Marcon to secretary B in Human Development. Jeannie E. Peters to customer service clerk A in Penn State Bookstore.

Technical Service

Emma T. Frank to residence hall preventive maintenance worker in Housing & Food Services. Michael P. Monahan to TV studio operator in Physical Plant. Paula G. Strine to animal caretaker A at Hershey. John Timko to maintenance mechanic B at Hazleton.

Retirements

Nevin Bailey, a janitor foreman in the Physical Plant, retired in October after 17 years of service with the University. Mr. Bailey joined the University staff in 1962 as a night janitor. In less than a month he became group leader-janitor. A 1969 promotion brought him to the position of janitor foreman, responsible for supervising 30 to 37 janitorial workers at 10 buildings. Mr. Bailey and his wife, Dorothy, live in Madisonburg. They have two sons and three grandchildren.

Ida Gates, a poultry processor and helper in the College of Agriculture, retired Oct. 17. She had been a member of the staff since May 26, 1961.

Campus Update

The DuBois Campus' new symphonic carillon has been dedicated in honor of Donald S. Hiller, Campus director emeritus, for his 37 years of service to the University.

The Hiller Carillon, situated in the Campus auditorium, was made possible by financial support from the Office of Gifts and Endowments, the DuBois Educational Foundation, and the DuBois Campus Alumni Society.

The Schuylkill Campus library has received a private collection of books and publications on the Pennsylvania Germans. Donated by Edward G. Fox, president of the Campus Advisory Board and a Distinguished Alumnus of the University, the books will be catalogued as a special collection. The books will be of particular value to students enrolled in Prof. Earl C. Haag's course on Pennsylvania German language and culture.

Construction of the "gateway" to the Delaware County Campus is expected to get underway shortly. The gateway, a masonry wall with large aluminum letters, is being financed by contributions from the Office of Gifts and Endowments, money raised from a Campus phonathon, funds contributed by the Undergraduate Student Association, and other gifts from alumni and friends.

The Schuylkill Campus has received a \$29,637 vocational education grant from the Pennsylvania Department of Education. The grant will be used for a proposal developed by Dr. Arthur Marsicano, associate professor of engineering, entitled "Minicomputer, Microprocessor and Advanced Digital Electronics Skill Development Program." The grant, to be matched by the Campus, will permit the addition of new equipment and several new courses which will apply to both electrical engineering technology and the computer science programs.

Obituaries

Raymond J. Anderson, an engineering aide in the Applied Research Laboratory from 1946 until his retirement in 1969, died Oct. 20. A native of Des Moines, IA, he was 71 years old.

James S. Willhide, a shift supervisor for Environmental Health Services at Hershey, died Nov. 7 at the age of 58. He had been employed at the Medical Center since 1971.

Ag awards 25-year chairs to 23 faculty, staff members

Robert F. Hutton, assistant dean for research, assistant director of the Agricultural Experiment Station, and professor of farm management.

Above, from left: Guy W. McKee, professor of agronomy; Robert F. Gentry, professor of veterinary science; John H. Ziegler, professor of meat science; Mark D. Shaw, associate professor of agricultural engineering; George Bubash, instructor in veterinary science; and Emery Keck, Jr., instructor in animal science.

Cooperative extension staff in photo at right are, from left, Russell C. Seward, senior extension agent, Centre County; Helen E. Bell, professor of home management extension; Frederick A. Hughes, professor of farm management extension; William R. King, senior extension agent, Armstrong County; Bernard L. Wingert, extension agent, Warren County; William M. Carroll, professor of agricultural economics extension; Betty M. Heinbach, extension agent, Lehigh County; Mary K. Lockhoff, senior extension agent, Montour County; and Garner P. Mitchell, extension agent, Potter County.

Four members of the faculty and staff in the Department of Agricultural Economics and Rural Sociology received 25-year awards. They are pictured above in photo at left. From left, Frederick A. Hughes, professor of farm management extension; Theola F. Thevaos, research assistant; Loretta S. Dolan, secretary B; and William M. Carroll, professor of agricultural economics extension.

Above, from left, Albert R. Lutz, Egg Room operator, poultry processor; Mary N. Long, assistant supervisor, Soil and Forage Testing Laboratory; Harry F. Riling, farm machinery operator A; and John A. Lucas, Administrative Services assistant.

Agriculture Dean James M. Beattie, shown at right in photo at left, presided over the 25-year service award ceremonies held Nov. 2. He is presenting award to Gordon D. Walker, associate extension agent in Mifflin County.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 668-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Nov. 21, 1979. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

LIBRARY ASSISTANT — Altoona Campus — Supervise part-time and student personnel; oversee all aspects of the circulation process; perform limited reference and readers' advisory work; coordinate book reserves; instruct students in use of the library; organize and maintain periodical collection; prepare statistical reports; control operations of the library in the absence of the campus librarian. Two years of college desirable and one year of effective experience, preferably in library work.

ASSISTANT DIRECTOR, OFFICE OF GIFTS AND ENDOWMENTS — SENIOR VICE PRESIDENT FDR ADMINISTRATION — Hershey — Responsible to the Director, Office of Gifts and Endowments at The Milton S. Hesthey Medical Center. Position involves assisting in all phases of the fund raising program at the Medical Center. More specifically, the position involves the development, design and writing of fund raising materials; serving as a liaison to outside organizations; conducting special event benefits for the Medical Center; attending and speaking at community events; assisting in the supervision of the gift processing/acknowledging/recording/reporting system for private gifts and performing other such duties as assigned by the director. Bachelor's degree or equivalent in business administration, liberal arts or related field, and from one to two years of effective experience. Skills in communication and public speaking are essential.

JUNIOR COMPUTER OPERATOR, COLLEGE OF MEDICINE — Responsible to the Hospital Director in processing jobs in the computer system and operate the computer under the direction of the Operator and/or Operations Supervisor. High school graduation and one year of experience in use of unit record or similar equipment or equivalency.

ASSISTANT HOSPITAL DIRECTOR/DIRECTOR OF NURSING SERVICES, COLLEGE OF MEDICINE — Hershey — Responsible to the Hospital Director for defining the philosophy, goals, and objectives of the Department of Nursing Services, and the overall management of nursing services to meet the established objectives of optimum and individualized nursing care to all patients. Provide immediate direction and guidance to assistant directors, patient unit coordinators, and nursing care coordinators in the department. Graduate of an accredited school of nursing, master's degree in nursing administration or a clinical specialty or equivalent, and 8-6 years of effective administrative experience.

ASSISTANT TO THE DIRECTOR OF KERN GRADUATE COMMONS, GRADUATE SCHOOL, UNIVERSITY PARK — Responsible for the Graduate Commons Art Gallery. Assist in maintaining active musical, dramatic and theatrical programs. Develop publicity coverage for scheduled events and maintain building security during events. Supervise and schedule evening and weekend personnel. Maintain liaison with segments of the University community who may offer social, cultural and other co-curricular programs. Bachelor's degree or equivalent, preferably in art education or fine arts. Experience in arts and/or gallery management and college union activities highly desirable.

There are positions in certain work units that, because of the large number of such positions, frequently are still available after employees in the work unit have been considered. They are listed below and will not be listed on an individual vacancy basis. Application for such positions may be made at any time, and you are welcome to make your interest known now to the Employment Division for future consideration when such vacancies occur. These positions are:

POSITION TITLE	LOCATION
Applications Programmer/Analyst	Management Services
Assistant Coordinators	Student Affairs
Assistant Food Supervisors	Housing and Food
Computer Operators	Intercollege Research Programs
Nutrition Assistants	Agriculture Extension (various counties)
Programmers	Management Services
Residence Hall Area Coordinators	Student Affairs
Cardiology Technicians	Hershey
Clinical Laboratory Assistants	Hershey
Clinical Laboratory Technologists (HEW)	Hershey
Critical Care Monitoring Technicians (Jr. & Sr. Levels)	Hershey
Cryo-Technologists	Hershey
Licensed Practical Nurses	Hershey
Medical Technicians (CLIA, MLT, CLT-HEW)	Hershey
Nuclear Medical Technicians	Hershey
Perfusionists	Hershey
Pharmacists	Hershey
Physical Therapists	Hershey
Physician's Assistants	Hershey
Psychiatric Assistants	Hershey
Radiology Technicians	Hershey
Research Technicians	Hershey
Respiratory Therapy Technicians	Hershey
Staff Nurses	Hershey

Jane and Joe Wyda get set to tackle fall cleanup.

Wilkes-Barre Campus couple share maintenance job

A husband and wife have teamed up to help keep the grounds and buildings of Penn State/Wilkes-Barre at their best and brightest.

Jane and Joe Wyda, of Sweet Valley, are both members of the maintenance crew at the Campus. When Stan Sowa retired as a maintenance worker earlier this year, Jane Wyda took over his duties, and Joe moved into her husband's position. Prior to that, Jane had worked at the Campus evenings cleaning the Hayfield House, a former private mansion which is now

Wilkes-Barre's largest building.

The Campus occupies a 50-acre estate; and ever since moving to the Lehman site a decade ago, the staff at Wilkes-Barre has tried to keep the house and grounds as attractive and just as much of a scenic asset to the Back Mountain as they were under private ownership.

Much of the credit for doing this belongs to the maintenance staff under the supervision of Jeff MacMillan, business manager, and Al Miller, maintenance foreman.

Joe Wyda has been a member of the maintenance crew for six years. He previously worked as a mechanic at a garage in Plymouth, but that garage, and his job, were flooded out by Tropical Storm Agnes.

Jane joined the Campus staff four years ago. Her principal assignments now involve tasks previously performed by men. She drives various Campus vehicles, including a snow plow and a leaf sweeper. She also drives a grass cutter over those 50 acres of lawn.

Calendar Nov. 15-29 Special Events

Thursday, Nov. 15
Final examinations.
Early registration for Winter Term, through Nov. 16, 8:30 a.m.-4:30 p.m., Room 112 Shields.

Commons Videotape, "TV Quarterbacks," noon, Kern Lobby.
Board of Trustees meeting, Keller Bldg.

Friday, Nov. 16
Final examinations.
Board of Trustees meeting, Keller Bldg.

Saturday, Nov. 17
Sports: football, vs. Temple, 1:30 p.m.; exhibition basketball, "Athletes in Action," 8:10 p.m.
Residence Halls close for Fall Term, 3 p.m.

Artists Series, Johnny Cash Concert, 7:15 and 9:30 p.m., Eisenhower Auditorium.

Monday, Nov. 19
Fixed date for meetings involving Commonswealth Campus faculty.
Color Slide Club meeting, 7:30 p.m., Room 189 MRL.

Tuesday, Nov. 20
Fixed date for meetings involving Commonswealth Campus faculty.

Sunday, Nov. 25
Residence Halls open for Winter Term, 10 a.m. Fall Term Commencement, 1:30 p.m., Rec Hall.

Monday, Nov. 26
Study Space assignments in Pattee, from 7:15 a.m., Room 106 Central Pattee. First come, first served for 33 spaces.

Tuesday, Nov. 27
Registration for Winter Term, 8 a.m.-5 p.m., IM Bldg.

Wednesday, Nov. 28
Registration for Winter Term, 8 a.m.-5 p.m., IM Bldg.

Thursday, Nov. 29
Winter Term classes begin, 8 a.m.
University Resident Theatre Company (URTC), Hart/Kaufman, You Can't Take It With You, 8 p.m., The Pavilion Theatre.

Seminars

Monday, Nov. 19
Computation Center, Beginning FORTRAN Workshop, 9 a.m., all day. Also Nov. 20, 21, 26 and 27, Room 112 Walker.

Microbiology, Cell Biology, Biochemistry and Biophysics, Walter R. Guild, Duke University, on "Transfer of Drug Resistance in Pneumococcus: Transformation and Conjugation," 4 p.m., Room 101 Althouse.

Tuesday, Nov. 20
Microbiology, Cell Biology, Biochemistry and Biophysics, Walter R. Guild, Duke University, on "DNA Processing in Pneumococcal Transformation," 11 a.m., Room 101 Althouse.

Agricultural Engineering, Gene C. Shove, Univ. of Illinois, on "Using Solar Energy in Agriculture," 4 p.m., Room 248 Eng. Bldg.

Thursday, Nov. 29
Chemistry, Paul A. Grieco, Univ. of Pittsburgh, on "Recent Advances in Natural Product Total Synthesis," 12:45 p.m., Room 333 White.

Economics/Institute for Policy Research and Evaluation, Michael Wasylenko, economics, on "The Empirical Models and Demand for Local Public Goods," 2 p.m., Room 101 Kern.

Physics, A. Rahman, Argonne National Lab., on "Homogeneous Nucleation in Monatomic Systems," 3:50 p.m., Room 445 Davey.

Changes in Bond Program to be made in 1980

The U.S. Treasury recently announced changes in the Bond Program to become effective in January 1980.

These changes will be incorporated into the University's Payroll Savings Plan on Jan. 2, 1980. The campaign in 1980 will be based upon these changes.

Highlights of the 1980 changes are: — "EE" Bonds will replace "E" Bonds — Smallest denomination of "EE" Bonds

will be \$50 and will be purchased for \$25 — (\$100 Bond will cost \$50, etc.) — "EE" Bonds will be kept for least six months before redemption.

The interest rate of 6 1/2% for five or more years will not change.

"EE" Bonds will mature in 11 years. "EE" Bonds pay 6 1/2% interest when held for five years or more, up to 11 years. At that time the bond doubles in value.

Payroll Deduction Chart	Payroll Deduction	Number of Deductions	Total Cost of Bonds	Bond Value	Bond Denominations		
					First Bond	Second Bond	Third Bond
	\$ 2.50	10	\$ 25	\$ 50	\$ 50		
	5.00	5	25	50	50		
	6.25	4	25	50	50		
	12.50	2	25	50	50		
	25.00	1	25	50	50		
	37.50	1	37.50	75	75		
	50.00	1	50	100	100		
	75.00	1	75	150	50	\$100	
	100.00	1	100	200	200		
	125.00	1	125	250	50	200	
	150.00	1	150	300	100	200	
	175.00	1	150	350	50	100	\$200
	200.00	1	200	400	200	200	
	225.00	1	225	450	50	200	200
	250.00	1	250	500	100	200	200
	300.00	1	300	600	200	200	200

A separate information packet will be distributed to each employee presently participating in the bond program.

Penn State Intercom

Faculty, staff asked to conserve heat by shutting windows

Faculty and staff members and students have been asked by Ralph E. Zilly, vice president for business and chairman of the Executive Energy Conservation Committee, not to leave the windows of campus buildings open.

"This is a particularly costly oversight by building occupants," Mr. Zilly said.

"On a reasonably calm winter night, when the outside air temperature is 35 degrees, one window left open six inches will lose heat costing approximately \$15.

"That example is based on a building with a very simple ventilation system; most of our systems are more complex and, depending on the building, the \$15 loss per window could easily become \$30."

Often more than one window is left open in a building, causing heat losses to rise proportionately. Assuming, for example, that five windows are left open in each of 100 buildings, the loss would amount to at least \$7,500 per night.

"That's a very conservative example," Mr. Zilly said. "There are approximately 200 principal buildings at University Park and roughly the same number at all other locations."

Windows are often opened because of overheating, which, in turn, is caused by a factor or misadjusted control.

"The proper remedy is to report the problem to the Physical Plant Service Desk at University Park or to the appropriate office at other locations," Mr. Zilly said.

Senate passes three pieces of legislation

Actions taken by the University Faculty Senate at its Nov. 13 meeting included:

— Passing legislation to allow the Director of the Office of Foreign Studies to authorize the taking of courses abroad on a Pass-Fail basis. According to the legislation, "Courses abroad may not be taken under the Pass-Fail grading system except in highly unusual circumstances and then only with the advance (that is, during the preceding term) authorization of the Office of Foreign Studies.

— Passing legislation to give students in the Developmental Year Program the same consideration as those scheduling Basic Skills courses. Students could use credits earned in English 1D, English 4, Math 0 and Math 1 in their cumulative grade point average and as part of the total credits earned toward a baccalaureate degree. The legislation also states that these credits "shall not substitute for the minimum program requirements designated under the categories of 'Baccalaureate Degree Requirements,' 'Requirements for the Major,' 'Requirements for the College,' and 'Electives.'"

In the case of an associate degree, these English and mathematics credits would count among the total credits earned toward graduation but would not substitute for minimum program requirements unless approved by the program faculty.

— Agreed to a request from the College of Medicine and the Hershey Medical Center that "authority for course approval for those courses taken by medical students in the Medical Curriculum (700-level courses) shall be vested within the

The Challenge of the '80s

Editor's Note: This article is the eighth in a series in which the academic deans reflect on what lies ahead for their colleges in the '80s.

Three themes recur when Dean Eugene J. Kelley talks about the College of Business Administration in the '80s.

"Our basic responsibility in the future as in the past," he says, "is to provide a quality educational experience for Penn State students — specifically, in our case, for careers in management. Recognizing that the environment is changing rapidly, how should we prepare students to anticipate, adjust and cope creatively with an accelerating rate of change?"

Because the task of meeting this goal is beyond the reach of any one college, a second theme emerges — the need to increase interaction between CBA faculty members and programs and other elements of the University system.

Finally, because business is part of society, business colleges must also reach out for broader insights and new partnerships in the public and private sector. "We cannot expect to repeat what we did in 1979 in 1984," Dean Kelley says. "Traditional approaches to the curriculum will not be effective."

These three themes are providing a general philosophical framework to guide

Dean Kelley

CBA planning. Their implications are being discussed and implemented in such areas as undergraduate and graduate education, faculty development, external relations and executive education.

(Continued on page 7)

\$100,000 Auditing Professorship given by Price Waterhouse

The College of Business Administration has been awarded \$100,000 for the establishment of a Price Waterhouse Auditing Professorship.

Dr. Mark W. Dirsmith, assistant professor of accounting, is the newly appointed faculty associate of the professorship. He was named by CBA Dean Eugene J. Kelley.

At a recent ceremony, the award was accepted by Robert A. Patterson, senior vice president for finance and operations at Penn State. David W. Christopher, partner-in-charge of the Pittsburgh office of the public accounting firm of Price Waterhouse & Co., made the presentation.

"This is the most significant project ever undertaken by the Price Waterhouse Foundation," Mr. Christopher said. "The professorship has been established in response to the firm's continuing interest in the education of accounting students."

"The program is designed to strengthen the auditing portion of the accounting curriculum. Our support will consist of salary supplement plus other projected expenses amounting to \$100,000 over the next five years."

Mr. Christopher said the professorship will provide an opportunity to innovate and experiment with auditing course content and to develop new approaches to its teaching. The program is expected to

(Continued on page 8)

From the Trustee Docket

Record number enrolled in Fall

A record-high 53,967 students were enrolled in resident instruction programs during Fall Term, an increase of 1,166 over 1978.

Of the total Penn State figure, 31,961 were enrolled at University Park. Commonwealth Campus enrollment of 16,814 — up by 825 — were also a record high. Enrollment records also were set at Behrend College, the College of Medicine in Hershey and five individual Commonwealth Campuses — Allentown, Altoona, Hazleton, Ogontz and York.

Three new programs set up

Three new academic programs are being instituted at the University, but they will require no additional funding since they will use existing courses and facilities.

In the College of the Liberal Arts, a women's studies option will be offered to students who want to combine existing courses in women's studies with an appropriate major. Three credits of prescribed courses and 18 credits from an approved course list will be required for the option.

Students also will be expected to design and complete individual projects in the field of women's studies. The program will not be intended to isolate women's studies, but to combine them with appropriate other academic disciplines.

In the College of Science, an electrical engineering option will be instituted in the physics major. In addition to general degree requirements and electives, that option will include 52 credits of prescribed

(Continued on page 8)

Dr. Fred Feldman, research associate, makes an adjustment to Penn State's new 62-inch telescope — the largest east of the Rockies. It will be used by members of the Department of Astronomy to study the centers of galaxies to try to understand mysterious sources of energy that have been seen there; to learn more about the sun by studying stars similar to it; and to study stars that vary rapidly in light output. Looking on is graduate student Vicki Balzan.

Penn Staters

James M. Elliott, director of personnel relations, recently received his 25-year chair from the University.

A 1954 graduate in psychology from Penn State, Mr. Elliott began working as a personnel assistant in the University's employment division soon after graduation.

In 1955, he was promoted to supervisor of the employment division and was in charge of the complete staffing of the newly built HUB. In 1967, he became manager of employee relations; in 1971, he assumed his present position.

Mr. Elliott's responsibilities include overseeing and providing services on personnel matters for all of Penn State's campuses. He also represents the University in collective bargaining with units of organized labor.

He has recently been appointed vice president for professional development of the College and University Personnel Association (CUPA), an organization of personnel professionals in more than 800 institutions of higher education in the United States and Canada.

Appointments

Capitol

J. Blaine Stong as assistant professor of engineering. B.S.C.E., U. of Penn.; M.S.E.H.E., U. of Kansas. Formerly associate professor, Harrisburg Area Community College.

DuBois

Nancy J. Hoffman as associate professor of history. B.A., M.A., San Diego State U.; Ph.D., U. of California-Santa Barbara. Formerly teacher, Sacred Heart Academy-San Diego; instructor, Kauai Community College-Lihue, Hawaii.

Hershey

Siegfried Streufert as professor of behavioral science. A.B., M.A., Southern Methodist U.; Ph.D., Princeton U. Formerly resident scholar, NIH; chair professor, U. Bielefeld.

Mckeesport

Stephen P. Tubb as assistant professor of engineering. B.S., U. of Wisconsin; M.Sc., Heriot-Watt U., Scotland. Formerly engineer, Tippin Machinery Co., L.K. Comstock Co.; visiting professor, Purdue U.

Mont Alto

Timothy P. Donovan as assistant professor of mathematics. B.S., Regis College; M.A., U. of Oklahoma; Ph.D., U. of Colorado. Formerly assistant professor, Metropolitan State College, Denver, and Regis College. Carol F. Kesler as assistant professor of English. B.A., Swarthmore College; A.M., Harvard; Ph.D., U. of Penn. Formerly lecturer, U. of Penn. Beaver College, assistant professor, Drexel U.

New Kensington

Glenn L. Keldsen as assistant professor of chemistry. B.S., Antioch College; M.S., Ph.D., U. of Mass.-Amherst. Formerly temporary assistant professor, Kansas State U.; assistant professor, Clarion State College. Mary Strauss-Noll as assistant professor of English. A.B., Carle College, Pittsburgh; M.A., Ph.D., U. of Pittsburgh. Formerly assistant professor, PSU-Beaver.

David M. Wells as assistant professor of mathematics. B.A., U. of Penn.; Ph.D., U. of Pitt. Formerly assistant professor, Ohio Dominican College. Paul F. Clark as instructor of labor studies. B.A., Bucknell U.; M.S., Cornell U. Formerly extension associate, Cornell U.; research associate, Labor Relations, Ithaca, NY.

Ogontz

Patricia L. Clayton as instructor of health, physical education and recreation. B.S., Penn State; M.Ed., Trenton State College. Formerly department head, St. Basil Academy, Philadelphia.

Martha M. Dooley as instructor of health, physical education and recreation. B.S.N., U. of Maryland. Formerly registered nurse, Staff Builders, Inc., Philadelphia.

Schuylkill

Stephen R. Couch as assistant professor of sociology. B.Mus., M.A., Oberlin College; Ph.D., S.U.N.Y.-Binghamton. Formerly research coordinator/social science analyst, Smithsonian Institution Research Institute on Immigration & Ethnic Studies; lecturer, George Mason U.

Shenango Valley

Mary L. DeJong as assistant professor of English. B.A., Central College, IA; M.A., Winthrop College, SC; Ph.D., U. of South Carolina. Formerly teacher, Fort Mill High School, Fort Mill, SC.

Albert L. Ingram III as assistant professor of psychology. B.A., Columbia U.; M.A., U. of Pitt. Formerly instructor, U. of Pitt.

Thomas M. Pamparoy as assistant professor of physics. B.Sc., M.Sc., S.B. College, Changanchang-Kerala, India; B.D., Lateran U.; Rome; M.S., U. of Louisville; Ph.D., Fordham U. Formerly assistant professor, Sam Houston State U.

Martin Joseph Schultz as assistant professor of sociology. B.A., M.A., Eastern Illinois U. Formerly lecturer, Southern Illinois U. (New M. School) as assistant professor of engineering. B.E.E., Ohio State U.; M.Ed., Penn State. Formerly instructor, Penn State.

Douglas R. Wilmes as assistant professor of English. B.A., U. of Connecticut; A.M., Ph.D., U. of Penn. Formerly assistant professor, Alliance College.

University Park

Agriculture

Peter Labovsky Jr. as associate professor of wood science and technology. B.S., Rutgers U.; M.S., Ph.D., Virginia Polytechnic Inst. & S.U.

Formerly associate professor, Clemson U. Nancy S. Pearson as research assistant in plant pathology. B.A., Earlham College; M.S., Louisiana State U. Formerly research assistant, PSU.

Arts and Architecture

Hamid Shirvani as assistant professor of architecture and urban design. B. Arch., Polytechnic of Central London; M. Arch., Pratt Institute; M.S., Rensselaer Poly. Inst., M.A., Harvard U.; Ph.D. candidate, Princeton U. Formerly design planner, Copeland, Novak & L.M., N.Y.C.

Jerome F. Holway as instructor of film. B.A., Cornell U.; M.A., Northwestern U.

Business Administration

Daniel J. Brass as assistant professor of organizational behavior. B.A., M.A., Ph.D., U. of Illinois.

Barbara G. Grisar as assistant professor of organizational behavior. B.S., U. of Dayton; Ph.D., Case Western Reserve U. Formerly adjunct assistant professor, Ursuline College. Arnold J. Rehans as assistant professor of marketing. B.A., U. of Oregon; M.B.A., U. of Portland; Ph.D., U. of Oregon. Formerly associate, Northwest Management Development Group; lecturer, Portland State U. Joseph Randall Woolridge as assistant professor of finance. B.A., U. of North Carolina; M.B.A., Penn State; Ph.D., U. of Iowa. Formerly visiting lecturer, Cornell College, IA.

Earth and Mineral Sciences

Thomas W. Gardner as assistant professor of geology. B.A., Franklin and Marshall College; M.S., Colorado State U.; Ph.D., U. of Cincinnati. Formerly geologist, Exxon Minerals Co.

Carlo G. Pantano Jr. as assistant professor of materials science. B.S.E.S., Newark College of Eng.; M.E., Ph.D., U. of Florida. Formerly research associate, U. of Florida; adjunct professor, U. of Dayton Research Inst.

Education

David L. Passmore as associate professor of vocational education. B.Sc., State U. College at

Buffalo; M.Ed., Bowling Green U.; Ph.D., U. of Minnesota. Formerly associate professor, U. of Northern Iowa; research associate/assistant professor, National Technical Institute for the Deaf; assistant professor, U. of Massachusetts-Amherst.

Robert J. Hale as assistant professor of education. B.S., M.Ed., Ph.D., U. of Nebraska. Formerly school psychologist, Auburn, NE. Michael E. Scofield as assistant professor of education. B.A., Montclair State College; M.A., Seton Hall U.; Ph.D., U. of Wisconsin. Formerly adjunct instructor, Seton Hall.

Engineering

Claude Dennis Pedgen as associate professor of industrial and management systems engineering. B.S.A.A.E.S., M.S.A.A.E.S., Ph.D., Purdue U. Formerly assistant professor, U. of Alabama-Huntsville.

Robert R. Huber, Jr. as assistant professor of mechanical engineering. B.S., M.S., Ph.D., PSU. Formerly aerospace engineer, WPAFB, Ohio; research assistant, PSU.

Charles L. Merkle as assistant professor of mechanical engineering. B.S., Case Inst. of Technology; M.S., Rensselaer Poly. Inst.; Ph.D., Princeton U. Formerly staff scientist, TRW Systems, Redondo Beach, CA.

Joseph R. Monkowski as assistant professor of electrical engineering. B.S., M.S., Ph.D., Penn State. Formerly research associate, U. of Nijmegen, Netherlands.

Koping Kirk Shung as assistant professor of bioengineering. B.S.E.E., National Cheng-Kung U., Taiwan; M.S.E.E., U. of Missouri; Ph.D., U. of Washington. Formerly research scientist, Institute of Applied Physiology & Medicine, Seattle; research bioengineer, Providence Med. Ctr., Seattle.

Kenneth J. Carroll as instructor of electrical engineering. B.S.E.E., M.S.E.E., U. of Illinois. Formerly instructor, Capitol Institute of Technology, Kensington, MD; electronics engineer, Naval Air Test Center, MD.

Ray J. Lunnell Jr. as instructor of electrical engineering. B.S., U.S. Naval Academy. Annapolis; M.S.E.E., Air Force Inst. of Tech. Formerly colonel, U.S. Air Force.

Health, Physical Education and Recreation

Russell D. Rose as instructor of health, physical education and recreation. B.S., George William College, M.P.E., U. of Nebraska. Formerly instructor, U. of Nebraska.

Robert A. Walker as instructor of health, physical education and recreation. B.S., U. of Maryland; M.S., Ed.D. candidate, West Virginia U. Formerly instructor, W. Virginia U.

Human Development

John R. Hephurn as associate professor of administration of justice. B.A., Butler U.; M.S., U. of Kentucky; Ph.D., U. of Iowa. Formerly associate professor, U. of Missouri.

Carolyn U. Lambert as assistant professor of food systems administration. B.S., U. of Missouri; M.S., U. of Wisconsin; Ph.D., U. of Tennessee. Formerly assistant professor, U. of Delaware, Penn State.

Andrew Muller as assistant professor of health planning and administration. B.A., Maximilian Universität, Munich; M.A., Ph.D., S.U.N.Y.-Binghamton. Formerly post-doctoral fellow, Johns Hopkins U.; director of planning, NY-Penn Health Systems Agency.

Liberal Arts

James Hartigan as assistant professor of economics. B.A., U. of Connecticut; Ph.D., Duke U. Formerly visiting instructor, North Carolina State U.

Rick R. Jacobs as assistant professor of psychology. B.A., U.C.L.A.; M.A., San Diego State U.; Ph.D., U.-C.-Berkeley. Formerly assistant professor, U.C.-Riverside.

Melvin M. Mark as assistant professor of psychology. B.A., U. of Nebraska; M.A., Ph.D., Northwestern U. Formerly instructor, Northwestern U.

Barbara E. O'Keefe as assistant professor of speech communication. A.B., A.M., Ph.D., U. of Illinois. Formerly assistant professor, Wayne State U.

Stephen A. Woodbury as assistant professor of economics. A.B., Middlebury College; M.S., Ph.D., U. of Wisconsin. Formerly research assistant/fellow, U. of Wisconsin.

Richard A. Phillips as instructor of economics. B.A., Old Dominion U.; Ph.D. candidate, U. of N. Carolina. Formerly visiting instructor, U. of North Carolina-Greensboro.

Science

Leonid Vaserstein as professor of mathematics. B.S., Ph.D., Moscow State U.

Nicholas Winnograd as professor of chemistry. B.S., Rensselaer Poly. Inst.; Ph.D., Case Western Reserve U. Formerly associate prof., Purdue U. Wen-Ching W. Li as associate professor of mathematics. B.S., National Taiwan U.; Ph.D.,

U.C.-Berkeley. Formerly assistant professor, U. of Illinois-Chicago.

William J. Mitchell as associate professor of mathematics. B.A., U. of Wisconsin; Ph.D., U.-C.-Berkeley. Formerly guest investigator, Rockefeller U.; assistant professor, Queens College.

Willem A. Baan as assistant professor of astronomy. M.Sc., Ph.D., M.I.T. Formerly member, Inst. for Advanced Study, Princeton. Moses H.W. Chan as assistant professor of physics. B.A., Bridgewater College; M.S., Ph.D., Cornell U. Formerly assistant professor, U. of Toledo; research associate/instructor, Duke U.

Philip R. DeShong as assistant professor of chemistry. B.S., U. of Texas-Austin; Sc.D., M.I.T. Formerly postdoctoral associate, M.I.T.; postdoctoral fellow, Eidgenössische Hochschule, Zurich.

Barbara J. Garrison as assistant professor of chemistry. B.S., Arizona State U.; Ph.D., U.-C.-Berkeley. Formerly visiting assistant professor, Purdue U.; lecturer, U.-C.-Berkeley. Sharon J. Laskowski as assistant professor of computer science. B.S., Trinity College; M.S., M.Phil., Ph.D., Yale U. Formerly research assistant, U. of Arizona.

Don N. Page as assistant professor of physics. A.B., William Jewell College; M.S., Ph.D., Cal. Inst. of Technology; M.A. (postdoctoral), U. of Cambridge, England. Formerly research assistant, U. of Cambridge, Cal. Inst. of Technology.

Ayusman Sen as assistant professor of chemistry. B.Sc., U. of Calcutta; M.Sc., Indian Inst. of Tech., Kanpur, India; Ph.D., U. of Chicago. Formerly research fellow, Cal. Inst. of Technology.

Ross E. Staffeldt as assistant professor of mathematics. B.A., Columbia U.; M.A., Ph.D., U.-C.-Berkeley. Formerly member, Inst. for Advanced Study, Princeton.

University Libraries

Louise M. Garraux as assistant librarian in bibliographic resources and services division. B.S., Allegheny College; M.S., U. of Illinois. Formerly visiting research associate, U. of Ill. Lib. Studies.

Ann L. Highsmith as assistant librarian in bibliographic resources and services division. B.A., Ohio Wesleyan U.; M.A., U. of Virginia; M.L.S., U. of Arizona. Formerly library assistant, U. of Arizona Libraries.

Intercollege Programs

Steven Deutsch as research associate, Applied Research Lab. B.S., Polytechnic Inst. of Brooklyn; M.S., Ph.D., PSU. Formerly aerospace engineer, U.S. Dept. of Commerce; Lockheed Georgia Co.

Michael C. Brophy as research assistant, Applied Research Lab. B.S., Drexel U.; M.S., PSU. Formerly mechanical engineer, DTNRC.

William J. Burkhard as research assistant, Applied Research Lab. B.S., M.S., Penn State. Formerly senior engineer, Locus Inc., State College.

Kent E. Eschenberg as research assistant, Applied Research Lab. B.S., Miami U.-Oxford, OH.

Robert J. Moser as research assistant, Applied Research Lab. B.S., Gannon College; M.S., PSU. Formerly staff engineer, Locus Inc., State College.

Charles M. Palmer as research assistant, Applied Research Lab. B.S., U. of Colorado. Formerly senior engineer, Locus Inc., State College.

Shirley D. Sharer as research assistant, Applied Research Lab. B.S., Juniata College. Formerly associate system representative, assoc. eng. technician, RCA Corp.

York

Glenn C. Begly as instructor of physical education. B.A., U. of Maryland; B.S., Towson State U.; M.S., Penn State.

Obituaries

Walter Couto, professor emeritus of sociology, died Nov. 2 at the age of 85. Dr. Couto, a pioneer in the use of television in the classroom, was a faculty member from 1944 to 1964.

James H. Kustenbender, a member of the University's staff from 1954 until his retirement last May, died Nov. 14. He was 48 years old. Mr. Kustenbender, an estimator-inspector at his retirement, had previously worked as an electrical and mechanical foreman, electrical foreman, electrical, electrical maintenance man, and maintenance man, all with the Office of Physical Plant.

Christmas shopping made easy

Gifts you can purchase without leaving University Park

Christmas shopping can be the worst part of the holiday — crowded stores and no ideas for what to buy all the people on your list.

It's possible, however, to do some painless and productive shopping without even leaving University Park. So to make life a little easier, here is a list of places on campus with gift suggestions.

The Museum of Art

For someone who has everything or likes the unusual, the Museum of Art's gift store, located in the Visual Arts Building, is the place to visit. Hours are noon to 5 p.m., Tuesday through Sunday. Closed Monday.

- hand-carved cookie molds (\$3.50-\$6.50)
 - sandalwood fans from Hong Kong (\$3)
 - carved wooden letter openers from Kenya (\$1.50)
 - hand-woven shoulder bags from Afghanistan (\$17)
 - Japanese paper wallets (\$3)
 - sheepskin purses from India (\$2)
 - carved wooden sculptures from Indonesia (\$10 and up)
 - designer pot holders (\$2.50)
- The Museum also offers many inexpensive gifts for children:
- kaleidoscopes (\$2.20 and \$4.50)

- hand-embroidered cloth in India (\$20)
- For music lovers, the Museum suggests:
- an Appalachian dulcimer (\$85)
 - soapstone whistles from China (\$1.10)
 - flutes from China (\$1)
 - bells (all sizes, 70¢ and up)
- Art lovers, of course, will be the easiest to please here. For them, the Museum has:
- books on art, crafts, photography, stenciling, quilting, pottery, woodcarving, macrame, costumes, design, etc.
 - original prints from the Associated American Artists of New York. Examples: original Daumier lithograph (\$30), original Renoir etching (\$60). Some are restrikes.
 - fine art reproductions (\$2 and up)
 - porcelain vases (\$6.50 and up)
 - reproductions of Pennsylvania Dutch Redware plates (\$6 and up)
 - framed quilt patches (\$25)
 - wall hangings from Bolivia, Peru, Colombia and Hungary (\$16 and up)
 - art print notecards (\$1.75 and up)
 - Royal Copenhagen porcelain (\$6.50 and up)
 - Russian designs of straw inlaid in wood (\$17)

Alumni Association

Gifts for a graduating senior, a Penn State alum or just a Penn State fan are available through the Alumni Association.

- a Nittany Lion replica (Alvaston statuette, from a mold made and signed by Lion Shrine sculptor, Heinz Warneke) can be had for \$16. It also comes on a walnut base for \$32.
- Two Penn State chairs are also on sale: a Boston rocker for \$81 and an armchair for \$94. Both are satin-finish black with gold trim and the University seal.
- Alumni Association memberships are also available for \$10/yr. entitling members to receive The Penn State Magazine, the Football Letter and College/Campus newsletters. Associate memberships are also accepted for non-alums, entitling the member to the same privileges except that they are excluded from voting for alumni trustees and running for office. These memberships are also \$10.

Penn State Bookstore

The Penn State Bookstore will be holding its annual pre-Christmas sale from Dec. 17-Dec. 21 at each of its three stores on

Nutcracker from Museum shop.

Cut flowers are also available:

- roses (\$8/dozen or 70¢/stem)
 - carnations (\$8/dozen or 70¢/stem)
- The Greenhouse Sales Room will be open until Dec. 21, Monday through Friday from 10 a.m. to 4 p.m.

The Penn State Press

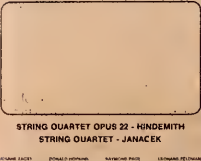

The Penn State Press has a number of gift suggestions. All of their books will be 20 percent off to any faculty or staff member. In addition, the following books have special Christmas discounts:

- *A Pennsylvania Album: Picture Postcards, 1900-1930* by George Miller. This is a fascinating compilation of 270 photographs of everyday life in cities and towns throughout the Commonwealth between 1900 and 1930. Each photo is accompanied by a short, explanatory caption. (Regularly: \$10.95/paper, \$18.75/cloth. Sale price: 25 percent discount)
- *Pennsylvania 1776* is a vivid portrayal of life as it really was in Pennsylvania at the time of the Declaration of Independence. (Regularly: \$15. Sale price: \$10)
- An inexpensive, authoritative book of interest to both amateur and professional bird watchers is *A Guide to North American Hawk Watching* by Donald S. Heintzelman. It includes detailed information on identification, where to find lookouts and suggestions for further reading. (Regularly: \$12.95/cloth, \$6.95/paper. Sale price: 25 percent discount)
- Three publications focusing on rural and small town handicraft industries that flourished in Pennsylvania during the 18th and 19th centuries are: *Central Pennsylvania Redware Pottery, 1780-1904*; *Made of Mud: Stoneware Potteries in Central Pennsylvania, 1831-1929*; and *Willow, Oak and Rye: Basket Traditions in Pennsylvania*. Jeanette Lasansky is the author and researcher. (Regularly: \$7.95 each. Sale price: 25 percent discount)

(Continued on page 8)

The Alard Quartet

in residence at the Pennsylvania State University

Above: Alard Quartet's new record.

At right: Pre-Colombian replicas of a hunter and marriage couple at Museum shop.

- piggy banks from Mexico (\$1.25)
- mindbending puzzles (\$1.25-\$2)
- wooden carousel (miniature) made in Germany (\$5.50)
- mini-animals and birds from India (25-50¢)
- mini-paint box (with real paints) (\$6)
- Mexican jumping jack toys (\$1)
- finger puppets (\$1.25)
- paper kites from People's Republic of China (\$2)
- teddy bears (\$3)
- soft sculpture doll kits (\$5.75)
- coloring books with unusual themes (\$1.50)
- Chalk stuffed elephants made from

Russian design plaques of straw inlaid in wood at Museum shop.

- handmade ceramic artifacts designed by Benedictine Monks (\$6.60 and up)
- woven baskets (all sizes, 40¢ and up)

Holiday items on sale at the Museum include:

- Christmas cards (\$2/box and up)
- wrapping paper (85¢ and up)
- ornaments (75¢ and up)
- a wooden soldier nutcracker (\$13.75)
- art calendars from the Metropolitan Museum of Art, the National Gallery and the Smithsonian Institute (\$4.75 and up)

When you go to the Museum of Art store, plan on spending some time there. Though small, the shop has an amazing variety of items from all over the world — and the reasonable prices will pleasantly surprise you.

If musical instruments are not quite right for that music-loving friend, why not consider a record album made right here at Penn State?

Alard Quartet

- "The Alard Quartet Playing Quartets by Hindemith and Janacek," a brand new record, is on sale in Room 105 Music Building or the Museum of Art for \$7.

Blue Band

- The Blue Band offers "The Penn State Blue Band" album for \$7. It is on sale in Room 217 Chambers Building or at the Penn State Bookstore.

Glee Club

- The Penn State Glee Club invites you to enjoy "The Penn State Glee Club in a Program of Pennsylvania Music: 90th Anniversary Concert." That album is available in Room 232 Music Building for \$6.

campus. All items will be 20 percent off (except for textbooks, calculators, magazines and candy), and Christmas items, including Christmas cards and wrapping paper, will be reduced 40 percent.

The Creamery

A cheese connoisseur would be delighted to receive a gift from Penn State's own creamery. Gift boxes of delicious cheeses will be on sale (in a range of prices) after Dec. 1. Penn State University cheese cleavers and cutting boards will also be available (\$3 and \$9, respectively). Creamery hours are 7:30 a.m.-5:30 p.m., Monday through Saturday and 10 a.m.-5:30 p.m., Sunday.

Greenhouses

The Horticulture Department will present a Christmas Show on Sunday, Dec. 9, from noon to 4 p.m. in the Greenhouses behind Tyson Building. Special Christmas plants on sale include:

- poinsettias, ranging from plants with mixed red and white blooms to white plants with marbled pink centers, as well as the usual red variety (\$6.50 and up)
- centerpiece arrangements (\$10.00 and up)

Other plants on sale include:

- flowering plants such as African violets and begonias (\$1.50 and up)
- succulents (cacti without thorns) including the ever-popular jade plants (\$1.50 and up)
- cacti (\$1.50 and up)
- ferns (\$1.50 and up)
- peperomias (\$1.50 and up)
- bromeliads (\$5 and up)

A sea of poinsettias await buyers in Greenhouse.

University Chapel Service, 11 a.m., Eisenhower Chapel. Martin Luther King, Jr. Celebration, Dr. Daniel Walden, American studies, speaker.

Sports: bowling (men) vs. Penn State/Capitol, 1 p.m.
Commonsplace Theatre, *Agatha*, 7 and 9 p.m., Room 112 Kern.

Artists Series, Krasnarsky Dance Company, 8:30 p.m., Eisenhower Auditorium.

Week of Jan. 14

Monday, Jan. 14
Last date for March graduates to submit camera-ready thesis manuscripts to Thesis Office.

Sports: basketball (men) vs. Delaware, 8:10 p.m.
Connections Film Series, "Wheel of Fortune," 12:15 p.m., Room 112 Kern.

France-Cinema, *Bread and Chocolate*, 7 and 9 p.m., Room 112 Kern.

Tuesday, Jan. 15
Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Daniel Walden, American studies, on "Neil Simon: From The Bronx to Broadway to California and Back."

Comp. Lit. Film Series, John Schlesinger, *Far From the Madding Crowd*, 6:30 and 8:45 p.m., Room 112 Kern.

Artists Series Film, *Jane Eyre*, 8 p.m., Schwab.

Wednesday, Jan. 16
Comp. Lit. Film Series, Anselmo Duarte, *The Given Word (O Pagador de Promessas)*, 7 and 9 p.m., Room 112 Kern.
Percussion Ensemble Concert, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, Jan. 17
Winter Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.

Friday, Jan. 18
Board of Trustees meeting, Keller Bldg.
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Harold Dickson, art history, emeritus, on "Ten Pennsylvania Buildings."

Winter Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.

Commonsplace Theatre, *Halloween*, 7 and 9 p.m., Room 112 Kern.

Artists Series, Claude Kipnis Mime Theatre, 8:30 p.m., Eisenhower Auditorium.

Saturday, Jan. 19
Board of Trustees meeting, Keller Bldg.
Sports: fencing (men) vs. William Patterson, 1 p.m.; swimming and diving vs. Pittsburgh (women), 1 p.m., (men), 4 p.m.; basketball vs. Rutgers (men) 2:10 p.m., (women), 4 p.m.; volleyball (men) vs. Alumni, 7 p.m.; gymnastics (men) vs. Ohio State, 8 p.m.

Faculty Women's Club Mid-Winter Coffee, 9:30-11:30 a.m., Memorial Lounge.

Eisenhower Chapel.
France-Cinema, *Going Places*, 7 and 9 p.m., Room 112 Kern.

Artists Series, Claude Kipnis Mime Theatre, 8:30 p.m., Eisenhower Auditorium.

Sunday, Jan. 20
University Chapel Service, 11 a.m., Eisenhower Chapel. Celebration of Christian Unity.
Commonsplace Theatre, *Going Places*, 7 and 9 p.m., Room 112 Kern.

Choral Concert, Anthony Leach, conductor, 3:30 p.m., Music Bldg. Recital Hall.

Artists Series, Claude Kipnis Mime Theatre, 2:30 p.m., Eisenhower Auditorium.

Week of Jan. 21

Monday, Jan. 21
Connections Film Series, "Thunder in the Skies," 12:15 p.m., Room 112 Kern.
Deadline for IAHS research grant applications for Summer and Fall Terms 1980, 5 p.m., Hisseng Cottage.

Sports: basketball (men) vs. Johns Hopkins, 8:10 p.m.
Color Slide Club meeting, 7:30 p.m., Room 189 MRL.

Commonsplace Theatre, *Halloween*, 7 and 9 p.m., Room 112 Kern.

Shakespeare Videotape, BBC, *Macbeth*, 6:30 p.m., Room 101 Chambers.

Tuesday, Jan. 22
Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Edwin Thumboo, IAHS Fellow and Univ. of Singapore, on "A Question of Tradition: Imported and Local."

College of Agriculture Faculty meeting, 4 p.m., Room 301 Ag. Admin. Bldg.

Comp. Lit. Film Series, Andrej Wajda, *ashes and Diamonds*, 7 and 9 p.m., Room 112 Kern.

Sports: swimming (women) vs. West Chester, 3:30 p.m.

Wednesday, Jan. 23
Sports: gymnastics (women) vs. LSU, 8 p.m.
Penn State Symphonic Wind Ensemble Concert, 8:30 p.m., Music Bldg. Recital Hall.

Friday, Jan. 25
Sports: gymnastics (men), vs. York of Canada and (women), vs. Michigan State, both 8 p.m.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Ronald Able, geography, on "Geographical Effects of Changes in Federal Communications Policies."

Commonsplace Theatre, *Seven Beauties*, 7 and 9 p.m., Room 112 Kern.

Artists Series, Glinka Chorus of Leningrad, 8:30 p.m., Eisenhower Auditorium.

Saturday, Jan. 26
Sports: basketball (women), vs. St. Joseph's, 4 p.m., (men), vs. Fairleigh Dickinson/Teaneck, 8:10 p.m.

France-Cinema, *Seven Beauties*, 7 and 9 p.m., Room 101 Kern.

Artists Series, New York Chamber Soloists, *Acis and Galatea*, 8:30 p.m., Schwab.

Saturday, Feb. 2

Sports: fencing (men) vs. Cornell, 1 p.m.; swimming and diving (men) vs. Temple and Texas A&M, 2 p.m.; wrestling vs. Navy, 2 p.m.; volleyball (men) vs. Army, 7:30 p.m.; gymnastics (women) vs. Cal State/Fullerton, 8 p.m.
UnComm Dinner Theatre, 6 p.m., Room 102 Kern.
Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Feb. 3

University Chapel Service, 11 a.m., Eisenhower Chapel. The Reverend Aaron Buzzelli, O.S.B., Penn State Catholic Center.
UnComm Dinner Theatre, 6 p.m., Room 102 Kern.

Week of Feb. 4**Monday, Feb. 4**

Connections Film Series, "Eat, Drink and Be Merry," 12:15 p.m., Room 112 Kern.
Shakespeare Film, *Oliver, Hamlet*, 6:30 p.m., Room 101 Chambers.
France-Cinema, *Barbarella*, 7 and 9 p.m., Room 112 Kern.
Archaeological Institute of America Lecture, 8 p.m., HUB Assembly Hall. Eva C. Keuls, Univ. of Minnesota, on "The Hetaera and the Housewife: The Splitting of the Female Psyche in Greek Art."
Barry Hannigan, piano, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, Feb. 5

Red Cross Bloodmobile, 10 a.m.-4 p.m., HUB Ballroom.
Comp. Lit. Luncheon, 12:15 p.m., Hotel State College. Caroline Eckhardt, English and comp. lit. speaker.
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.
Comp. Lit. Film Series, Rafael Gil, *Don Quixote*, 6:30 and 8:45 p.m., Room 112 Kern.

Wednesday, Feb. 6

Late drop deadline.
Last day to sign Winter Term NDSL and University Long Term Loans, Room 108 Shields.
Red Cross Bloodmobile, 10 a.m.-4 p.m., HUB Ballroom.
Musica da Camera, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, Feb. 7

Sports: basketball (women) vs. East Stroudsburg, 7 p.m.
URTC, Henrik Ibsen, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Friday, Feb. 8

Sports: basketball (women), Coca Cola Lady Lion Classic, 7 p.m.
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Roger Downs, geography, on "Maps as Metaphors."
Commonplace Theatre, *Death in Venice*, 7 and 9 p.m., Room 112 Kern.
Contemporary Dance Company, 8:30 p.m., Eisenhower Auditorium.
Penn State Brass Choral, 8:30 p.m., Music Bldg. Recital Hall.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Saturday, Feb. 9

Sports: fencing (women) vs. Caldwell, James Madison and California (Pa.), 9 a.m.; rifle (coed) vs. Navy and Youngstown State, 9 a.m.; basketball (women), Coca Cola Lady Lion Classic, 1 p.m.; swimming and diving vs. Rutgers, (women) 1 p.m., (men) 4 p.m.; wrestling vs. Cleveland State, 8 p.m.
Contemporary Dance Company, 2:30 p.m., Eisenhower Auditorium.
France-Cinema, *Providence*, 7 and 9 p.m., Room 112 Kern.

URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Artists Series, Fiannulla Flanagan in James Joyce's *Women*, 8:30 p.m., Schwab.

Sunday, Feb. 10

University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. George Docherty, Edinboro University, Scotland, speaker.
Tom Kennedy, flute, 3:30 p.m., Music Bldg. Recital Hall.
Commonplace Theatre, *Death in Venice*, 7 and 9 p.m., Room 112 Kern.

Week of Feb. 11**Monday, Feb. 11**

Connections Film Series, "Countdown," 12:15 p.m., Room 112 Kern.
France-Cinema, *Providence*, 7 and 9 p.m., Room 112 Kern.
Steven Smith, piano, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, Feb. 12

Comp. Lit. Luncheon, 12:15 p.m., Hotel State College. Elizabeth A. Bowden, English, on "Ambiguity on the Page, Flexibility in Performance: A New Look at Chaucer."
Artists Series Film, Kenji Mizoguchi, *A Geisha*, 8 p.m., Schwab.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.
Shakespeare Film, Richardson Williamson, *Hamlet*, 6:30 p.m., Room 101 Chambers.

Wednesday, Feb. 13

Sports: swimming and diving (men) vs. Bucknell, 7:30 p.m.; basketball vs. Pittsburgh, (women), 5:45 p.m., (men), 8:10 p.m.
Valentine Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.
Composer's Concert, 8:30 p.m., Music Bldg. Recital Hall.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Thursday, Feb. 14

Valentine Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Friday, Feb. 15

Last date to submit petition to Records Officer to graduate in absentia in March.
Commonplace Theatre, *Empire of the Senses*, and 9 p.m., Room 112 Kern.
Folk and Square Dance Round Up, 7:30 p.m., Room 133 White Bldg. Free.
Artists Series, Royal Winnipeg Ballet with orchestra, 8:30 p.m., Eisenhower Auditorium.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Saturday, Feb. 16

Sports: rifle (coed) vs. West Virginia, Ohio State and Army, 8 a.m.; bowling (men and women) vs. Maryland, 1 p.m.; swimming and diving vs. West Virginia, (women), 1 p.m., (men), 4 p.m.; wrestling vs. Pittsburgh, 2 p.m.; gymnastics, (men) vs. Northern Illinois, (women) vs. Louisville, both 8 p.m.
France-Cinema, *TBA*, 7 and 9 p.m., Room 112 Kern.
GSA Valentine's Day Social, 8 p.m., Room 102 Kern.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Sunday, Feb. 17

University Chapel Service, 11 a.m., Eisenhower Chapel. Mr. Bryan Polk, intern pastor, Lutheran Student Parish, speaker.
Commonplace Theatre, *Empire of the Senses*, 7 and 9 p.m., Room 112 Kern.

Week of Feb. 18**Monday, Feb. 18**

Connections Film Series, "Yesterday," 12:15 p.m., Room 112 Kern.
France-Cinema, *TBA*, 7 and 9 p.m., Room 112 Kern.
Color Slide Club meeting, 7:30 p.m., Room 189 MRL.
Shakespeare Film, Brook/Scofield, *King Lear*, 6:30 p.m., Room 101 Chambers.

Tuesday, Feb. 19

Gallery Talk, 10:30 a.m., Museum of Art.
Richard Porter, registrar of Museum of Art, on "Searching for William Williams, Teacher of Benjamin West: A Problem in Connoisseurship."
Sports: wrestling vs. Bloomsburg, 8 p.m.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Wednesday, Feb. 20

Last day to sign Winter Term Emergency Loans, Room 108 Shields.
Early registration for Spring Term, weekdays, 8:30 a.m.-4:30 p.m., Room 112 Shields, through Feb. 26.
Sports: swimming and diving (men) vs. Bloomsburg, 4 p.m.; basketball (men) vs. Massachusetts, 8:10 p.m.

URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.
Winter Term classes end, 9:55 p.m.

Thursday, Feb. 21

Final examinations.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Friday, Feb. 22

Final examinations.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Saturday, Feb. 23

Final examinations.
Sports: fencing (women) vs. Indiana (Pa.), Johns Hopkins, St. Johns and Cornell, 9 a.m.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Sunday, Feb. 24

Sports: fencing (women) vs. Ohio State, Johns Hopkins and St. John's, 9 a.m.

Seminars Dec. 3-6**Monday, Dec. 3**

Physics, G. Ahlers, UC-SB, on "The Lamb Transition of Superfluid Helium," 3:55 p.m., Room 445 Davey.
Computation Center, Daniel L. Bernitt, seminar research associate, on "JCL (1 of 6)," 7:30 p.m., Room 112 Walker.

Tuesday, Dec. 4

Surface Science, William Steele, chemistry, on "Theory of Thick Films Physisorbed on Uniform Solids," 11 a.m., Room 339 DA.
Astronomy, Brian P. Flannery, Harvard Univ., on "Acoustic Instability in Diffuse Interstellar Clouds," 4 p.m., Room 445 Davey.

Biology, Harlan P. Banks, Cornell Univ., on "The Lure of Early Land Plants," 4 p.m., Room 108 Ferguson.

Mathematics, William Veez, Univ. of Arizona, on "Recent Work in Number Theory," 4 p.m., Room 102 McAllister.

Organic/Inorganic, Jim Atwood, SUNY-Buffalo, on "The Role of Oxygen Coordination in Carbon Monoxide II."

Catalytic Olefin Hydrogenation by $\text{Co}(\text{P}(\text{OMe})_2)_4\text{-COCH}_3$, 8 p.m., Room 101 Whitmore.

Wednesday, Dec. 5

Computation Center, Daniel L. Bernitt, "JCL (6 of 6)," 7:30 p.m., Room 112 Walker.

Thursday, Dec. 6

Chemistry, Donald H. Levy, Univ. of Chicago, on "Spectroscopy in Supersonic Molecular Beams," 12:45 p.m., Room 333 Whitman.
Physics, William Williams, Univ. of Michigan, on "Neutral Current Interactions in Atom Hydrogen," 3:55 p.m., Room 445 Davey.
Computer Science, Daniel J. Paulish, Burroughs Corp., Paoli, Pa., on "A Fail-Soft Distributed Processing System," 4 p.m., Room 325 Whitmore.

Exhibits**HUB Galleries**

The Gallery
Zelko Kujundzic, recent paintings, sculpture and ceramics, through Dec. 19.
Traveling Print Exhibit, Jan. 3-Feb. 1.
Browsing Gallery
Waskewich Galleries Print Sale and Exhibition, Dec. 3-7.
Dianne Cissel oil paintings, Dec. 8-19.
Nancy Straley, prints and drawings, Jan. 31.

Art Alley

Holiday Festival VI Exhibit, Arts and Crafts from Around The World, Dec. 8-19.
John Caroline, stained glass, Jan. 3-31.
Ukrainian Cultural Artifacts, Jan. 3-12.
Central Pa. Scholastic Art Awards Exhibit, Jan. 13-26.
PSU Camera Club Exhibit, Jan. 27-Feb. 1.
Jinx Webster, recent ceramic works, Feb. 20.

Kern Galleries

Janet L. Dougherty, prints and drawings, through Dec. 16.
Christmas Crafts from Around the World, through Dec. 17.
Mary Keithman, paintings, Jan. 3-19.
Marty Tyllman, ceramic constructions, Jan. 15-19.

Penn State Film Follies Posters, Jan. 20-31.
Group Photography Exhibit, Feb. 2-29.

Museum of Art

French drawings from European collections (former Armand Goblet Collection) and Oriental works from the permanent collection, through Dec. 21.

Wirth McCoy, recent paintings, Jan. 6-Feb. 19.
Pennsylvania prints from the collection of Ralph M. Yeager and John C. O'Connor, Jan. 13-March 30.

Chinese export porcelains from the collection of Dr. and Mrs. Harold L. Tonkin, opens Feb. 24.

Diane Pepe, recent prints and drawings, opens Feb. 24.

Pattee Library

East Corridor Exhibit
"Intentions," exhibit by four State College photographers, through Dec. 20.
Lending Services Lobby
"Morning," Rose Shumskas, drawings, through Dec. 20.

Visual Arts Bldg. Zoller Gallery

Betty Parsons, constructions and Clinton H. paintings, through Dec. 2.
Student architectural drawings and models, Dec. 9-19.

Graduate Student Show, Jan. 6-20.
McCoy Retrospective, Jan. 27-Feb. 17.

Undergraduate Student Exhibit, opens Feb. 17.

Arts Roundup

Black Watch to perform

The marches of John Philip Sousa will occupy a prominent place in the repertoire of Her Majesty's world famous marching band, The Black Watch, which will appear in Rec Hall at 8:30 p.m. on Thursday, Dec. 6, under the auspices of the Artists Series.

The Black Watch is Scotland's senior Highland Regiment. It originated from the independent companies raised in 1725 to police the Highlands. From its inception, members have worn a dark tartan, a composite derived from the tartans of the families who commanded the independent companies (the Campbells, Munros and Grants). The regiment became known as The Black Watch in contrast to the English soldiers, who wore red coats. Its pipers, however, wear the Royal Stewart tartan.

Legend associates the Red Hackle, the vulture feathers worn in the bonnets of The Black Watch for over 160 years, with the Battle of Geldermalsen on Jan. 5, 1795, when Highlanders rescued two guns of the 11th Light Dragoons from the French. For their gallantry on this occasion, The Black Watch was awarded its distinctive Red Hackle badge.

The Black Watch was last seen in this country in 1976, as part of the Bicentennial celebration. The opening fanfare of each performance is followed by precision marching and counter-marching to the sounds of bagpipes and drums. The performances also include the traditional sword dances, in which the men cross sabres while they do a Highland fling.

Tickets will go on sale at Eisenhower Auditorium Box Office and at the Artists Series HUB Booth beginning Monday, Dec. 3, at 9 a.m.

Mime program in Schwab

Rajmund Klekot, of the Warsaw Mime Theatre of the Warsaw Chamber Opera, will present a program of mime and music at 8:30 p.m. Saturday, Dec. 8, in Schwab Auditorium.

A native of Poland, Mr. Klekot is currently working at the University on a mime piece and is also giving workshops and performances of other works in public schools in the area.

Mr. Klekot is one of the founders of the Warsaw Mime Theatre. The group has appeared in 34 European countries and has made several tours in the United States, performing at The New Theatre Festival in Baltimore, La Mama in New York and the National Press Club in Washington.

Two separate mime pieces will be presented at University Park, where the program will also include a performance by pianist Ana Maria Trenchi de Botazzi.

Tickets will be sold at the Eisenhower Auditorium Box Office the week preceding the performance.

Cello concert Dec. 5

A program of music for cello and other instruments will be presented at 8:30 p.m. Wednesday, Dec. 5, in the Music Building Recital Hall.

Leonard Feldman, cellist, will be assisted by Joanne Zagst Feldman, violist, and pianist Jill Olson for the concert, which will include four pieces.

They are "Duet with Two Eyeglasses Obligato" by Beethoven, Sonata No. 1 in C Major for Viola Da Gamba and Cembalo by J.S. Bach, Sonata for Violoncello and Piano, Op. 71 (1962) by D. Kabalevsky, and "Suite Populaire Espagnole" by Manuel De Falla.

All three performers are members of the faculty of the University's School of Music.

Cleveland cellist joins Alard for special concert

Jorge Sice, a cellist with the Cleveland Orchestra and one of the original members of the Alard String Quartet, will rejoin that group for a special concert at 8:30 p.m. Sunday, Dec. 2, in the Music Building Recital Hall.

A Black Watch piper.

Sunday's concert will commemorate the 25th anniversary of the founding of the Alard Quartet. Mr. Sice was a member of the group when it was formed at the Juilliard School of Music. Of the original foursome, only violinist Donald Hopkins remains with the group. The three other members, who have made up the Quartet since 1959, are violinist Joanne Zagst Feldman, violist Raymond Page and cellist Leonard Feldman.

The Alard has been in residence at Penn State since 1962.

For the special concert, the Quartet will perform Quartet Opus 74 by Alban Berg and Beethoven's Quartet Opus 74, the "Harp" quartet. They will be joined by Mr. Sice for Schubert's Quintet in C Major, a work calling for string quartet and an additional cello.

Fink to give piano recital

Pianist Seymour Fink, senior piano professor at SUNY-Binghamton, will present a recital at 8:30 p.m. Monday, Dec. 3, in the Music Building Recital Hall.

Prof. Fink will perform compositions by Beethoven, Ravel and Chopin. In addition, he will teach a master class Tuesday morning for students in the School of Music.

The recipient of Fulbright and Yale University Morse Fellowships, Prof. Fink holds B.A. and M.M. degrees from Yale. He has performed in Germany, England, France and Switzerland.

The '80s

(Continued from page 1)

Undergraduate Education

CBA faces "the happy problem" of an insistent demand for its services at all levels. Approximately 3,980

undergraduate majors crowded into its classrooms this Fall.

"I am impressed with our students," Dean Kelley says. "They are among the most able, motivated and capable in the University. Nor do I foresee any decline in the number of qualified applicants."

"Whether we like it or not, change is being forced on higher education. Changes in society are reflected in student value systems, and they are reshaping the American university. Students are looking for career-oriented fields of study. Penn State, however, is fortunate because it has in its portfolio one of the natural remaining centers of growth in higher education — management education."

With help from a Revolving Fund established by the Provost, CBA is taking advantage of this growth by developing cooperative education efforts with other units in the University. A joint major in French and Business is already in existence. The Philosophy of Business

Ethics and the History of Business Enterprise are taught by liberal arts professors. A course on the Business Man in American Literature is being developed by the English Department, and additional sections of a Speech Communications course, specific to the needs of business majors, will be offered.

"Many of the changes of the '80s can be forecast today," Dean Kelley says. "Among them are changes in public value systems, accelerated technological developments and structural differences in the work force. America is shifting away from heavy industry and manufacturing to a services-oriented society with new concerns for dealing with social and environmental problems. Services now account for 46 percent of the GNP, as opposed to 31 percent in 1950."

"The problems of increasing productivity in the services sector — in education, hospitals, government — are difficult and challenging. Relatively few business schools have looked systematically at the opportunities that this shift to a service economy and a not-for-profit organizational system mean for curricula and research."

"As work force and employee value systems continue to change during the years ahead, traditional measures of managerial development and training, as well as views on motivation, will have to be adjusted. Making curricular adjustments in this climate will be one of the most important challenges faculty members face."

Yet another long-term trend which will have a major impact on business education is the increasing internationalization of business. Doctoral, master's and undergraduate programs in management will have to become more international in outlook.

"A basic concept guiding our consideration in establishing relationships with foreign institutions is the development of a comprehensive program," Dean Kelley emphasizes. "Such a program involves research, student exchanges at the undergraduate and graduate levels, faculty exchanges and executive management education. At the heart of this concept is our basic concern to develop faculty talents in international management education."

The College already has such an all-encompassing effort in place with ESAN, the Graduate School of Business in Lima, Peru, and is seeking to broaden its undergraduate exchange program with the University of Cologne.

Under investigation is a joint French-Business program at the University of Nice, a program involving a consortium of universities in Puerto Rico, and a program in England.

Graduate Programs

By 1980, the College expects to be able to choose its MBA entering class from some 1,000 applicants. The class now numbers between 100-110 students, and the College hopes to see it increase to 140-150 in 1980. At the same time, Dean Kelley notes, the mix will be changed to include more women and minority students and the background of the applicant pool broadened by enrolling even more degree holders from leading undergraduate institutions and from outside the Middle Atlantic region.

"In developing our MBA program," Dean Kelley says, "we are more than just adapting to change. We are anticipating it. For example, we intend to upgrade the computer aspects of management decision making courses so our MBA graduates will be intelligent and creative users of computer decision support systems. We also intend to double — from 25-50 — the number of internship opportunities which afford meaningful summer jobs for MBA students."

Along these lines, CBA plans to develop practical problem solving experiences for its MBA students with some 100 Centre Region manufacturing firms. Last year,

Dean Kelley points out, a Small Business Institute consulting report prepared by students in Penn State's MBA program took second place in a national competition.

In addition to the MBA, the College offers M.S. and Ph.D. degrees.

Because there are good jobs awaiting graduates, not only in the business world but also in academe, applications for these programs continue to increase.

Faculty Development

CBA faculty members have been called on in recent years not only to handle large undergraduate enrollments but also to participate in an increasing number of executive education/continuing education programs.

"One of our goals during the period ahead," Dean Kelley comments, "will be to continue our efforts to strengthen our position in externally funded and managerial oriented research programs."

To encourage and support an atmosphere in which scholarly research can flourish, the College held a Research Retreat in September. A special research workshop for non-tenured faculty, focusing on their professional development, was also designed.

Concrete recognition of the importance of research has been provided with the assignment to CBA of the Special Education Building, which will now serve as the Center for Research and Executive Programs Building.

External Relations

"Changing societal needs and resource restrictions within the University require that CBA look to external sources for help in funding," Dean Kelley says.

The College has developed and hopes to expand a broad range of programs that will increase its ties with industry and government. Fourteen firms participate in CBA's Corporate Associates Program, each of them contributing \$5,000 a year to the College. Alumni contributions totaled \$96,000 last year, providing what Dean Kelley calls "a margin for excellence." CBA also hopes to expand the role of its alumni in career counseling.

Executive Education

CBA faculty members are deeply involved in developing and teaching executive and continuing education programs. Enrollments in these programs have grown from 11,800 in 1968-69 to some 30,000 in 1978-79. More than 1,100 programs, workshops, seminars and conferences were conducted in 1978-79.

"We expect these programs to continue to grow in the '80s," Dean Kelley reports. "As a consequence, faculty members at University Park and at the Commonwealth Campuses will find increased opportunities for program development and teaching."

Unlike many educators who predict that universities will return in the '80s to the three "Rs" — reduction, reallocation and retrenchment — Dean Kelley is more optimistic.

"I think we will be leaner, more focused — and more accountable and purposeful," he says.

"Will we achieve a brighter future? Uncertainty is what makes it interesting. We, as a faculty, are not presiding over status quo. We are trying to manage change, and no one ever said that was easy."

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for use by faculty and staff of The Pennsylvania State University.

Trustee Docket

(Continued from page 1)

courses in physics, electrical engineering, mathematics and computer science; 13 additional credits in electrical engineering and physics; and 9-12 credits in an approved foreign language.

The option was developed in consultation with the Department of Electrical Engineering.

A new major leading to a B.S. in social and behavioral sciences has been approved for Behrend College. In that major, students will fulfill basic degree requirements and then choose three curricular modules to complete their academic programs.

The modules, ranging from 15 to 18 credits each, will be selected from 12 different groupings of courses and will include such varied areas of concentration as accounting survey, human behavior disorders, business cycle and forecasting and sports management.

In addition to the new programs, three existing ones are being revised.

The major in philosophy in Liberal Arts has been revised through the creation of four options — logic and philosophy of science, liberal studies, value studies and preparation for graduate studies in philosophy.

The change is being made to give students greater flexibility to combine other fields of interest with philosophy. The new options have been designed so that students who do not plan to do graduate work in philosophy, or who plan to go on to professional training in other fields, can pursue a philosophy B.A.

Two former options in the management major — management and operations management — have been made separate majors. The change reflects increasing recognition of the field of operations management in industry and on other university campuses. Major corporations actively recruit operations management students for positions in operations planning and control, inventory management and production supervision.

Four areas of specialization within the major in agricultural economics and rural sociology have been designated formal options within the major. They are agricultural marketing, farm management, resource economics and rural development.

The new designations will serve to increase student awareness of areas of specialization within the major and to reflect their importance more accurately.

Rural program funding request given approval

A proposal to request funding to expand Milton S. Hershey Medical Center programs serving rural areas and small communities won Trustee approval.

Some \$1,260,246 in supplemental funds will be requested as part of the University's 1980-81 appropriation from the State.

"There continues to be a pressing need for better medical care in Pennsylvania, and Penn State, through the Milton S. Hershey Medical Center is trying to respond to that need," President Oswald said.

"The Hershey Center is the only medical school and university hospital located in a non-metropolitan area of the State. Accordingly, it has accepted special responsibilities to improve the quality and availability of health services for the over eight million Pennsylvanians who reside outside the Commonwealth's two principal metropolitan areas."

Eight rural medicine programs, developed at the Hershey Center in consultation with physicians and hospital staff members from small communities, have been tested and successfully established in some rural areas. Permanent, continuing funding is essential, Dr. Oswald said, if they are to reach their full potential.

Hopkins named acting head of Continuing Education

Daniel T. Hopkins, director of administration and field services in Continuing Education, has been named acting vice president for Continuing Education, effective Jan. 1.

He will succeed Floyd B. Fischer, who will retire Dec. 31 after more than 38 years of service to Penn State.

"Running Continuing Education's vast number of programs requires a special blend of administrative and academic experience," President Oswald said in announcing the appointment. "As a long-time valuable member of the Penn State team, Dan Hopkins is well qualified to assist the administration in helping to bring about the possible merger of Continuing Education and the Commonwealth Campus System."

Mr. Hopkins began his Penn State service in 1948 as a district representative in Pittsburgh. Later, he became assistant administrative head of what was then the Behrend Campus. In 1954, he was named administrative head of the McKeesport Center, later the McKeesport Campus.

In 1959 when Penn State's General Extension was reorganized into Continuing Education, Mr. Hopkins was named director of the Western Region. Three years later, he became assistant director of administration, and in 1964 he

was promoted to associate director. He was named director of administration and field services in 1971.

A native of Pittsburgh, Mr. Hopkins attended Penn State as a member of the U.S. Navy's V-12 program. He received a bachelor's degree in business administration in 1947.

Election rules changed

Holders of associate degrees from the University are now eligible for election by alumni to the University's Board of Trustees as the result of a vote by the Trustees to change the regulations which have governed alumni trustee elections at Penn State since 1905.

Under the old rules, only persons who had earned bachelor's or advanced degrees were eligible for election by alumni. At that time, there were no two-year associate degree programs at Penn State.

Trustees also voted to change a requirement that graduates wait three years to become eligible for election by alumni. The new regulations make graduates eligible immediately.

The primary restriction on election is that after July 1, 1980, no member of the faculty or board of trustees of any other college or university in Pennsylvania is eligible for service as a Penn State alumni trustee.

"Drop-adds" free first five days each term

A change in the University's "drop-add" policy will eliminate the fee for dropping or adding a course for students who take action during the first five working days of an academic term.

Beginning with the sixth working day, the charge will be \$6, and no waivers will be allowed, according to Provost Eddy. It will go into effect with the Winter Term.

"The five-day free period will allow students to make necessary schedule changes," Dr. Eddy said. "Most drops and adds take place on the third day of a new term and again on the last day of the period that allows the smallest penalty."

"Elimination of the waiver will do away with a troublesome administrative headache."

Dr. Eddy said working days are defined

as weekdays when University offices are open.

Faculty Senate-passed provisions for drops and adds with or without academic penalties will not be affected by the new policy, Dr. Eddy noted. Courses may be added without condition during the first 10 calendar days of a term. Drops may be made without notation on the student's record during the first 21 days.

Dr. Eddy pointed out that each baccalaureate student is limited to course drops totaling 12 credits from the fourth through the eighth weeks of classes during his/her undergraduate career. The limit is six credits for associate degree candidates.

The University's drop-add fee had stood at \$2 for 29 years until the 1979 Fall Term, when it was increased to \$6.

Inter-Group Relations Committee established

President Oswald has established a Committee on Inter-Group Relations to serve as a forum for the exchange of views on relations among students, staff and faculty members at the University.

"The Committee," he said, "will concentrate its efforts on ways to foster productive interpersonal relations among groups."

"Our common objective should be the existence of a human relations environment that accepts and fosters diversity."

The Committee will not address specific cases of individual discrimination. The University has policies and mechanisms to handle such cases, Dr. Oswald added.

He further noted that the Committee "should stand ready to meet at any time with the community-task force on race relations when areas of concern extend beyond the campus."

Dr. Roy C. Buck, professor of sociology and social science, was named chairman of the Committee.

Other persons invited to serve on the Committee are: Jung Ahn, past president, Korean Student Organization; Milton J. Bergstein, assistant professor of marketing; Arthur V. Cervo, director, Office of Public Information and Relations; Donald R. Davis, director, United Ministry; Takesha P. Dockery, president, Black Caucus; Jeffrey Eisenstat, director, Hillside Foundation; Ke Chung Kim, professor of entomology; Melvyn S. Klein, director, Student Activities; Dale K. Krach, president, Graduate Student Association; Beverly Lindsay, assistant

professor of education; Thelma Price, assistant vice president for student affairs; Rustum Roy, director, Materials Research Laboratory; Quentin L. Schaut, rector, Catholic Center; Hal J. Shaffer, president, Undergraduate Student Government; Harry Young, chairman, Undergraduate Student Government Race Relations Board.

Christmas shopping

(Continued from page 3)

— For those interested in medieval life and literature, the Press suggests *Fast and Feast: Food in Medieval Society* by Bridget Ann Henisch. The topic is explored from the points of view of all concerned — host, guest, cook and servant. (Regularly: \$14.95. Sale price: 25 percent discount)

The Penn State Press office at 215 Wagner Building (865-1327) will be open Monday through Friday from 9 a.m. to 5 p.m. Browsers are welcome to look through the wide variety of books that are on display. The Press will also mail books (\$1 mailing charge extra).

Poultry sales

Poultry Sales will once again have its annual Christmas turkey sales at the poultry farms (next to the outdoor swimming pool). Turkeys range in weight from 10 to 18 lbs. and are sold every Thursday from 10 a.m. to noon and from 1 p.m. to 4 p.m. Also on sale are chickens and eggs.

Compiled by Nancy Dietrich

Professorship

(Continued from page 1)

encourage new Ph.D. and doctoral candidates to teach auditing and to do research in auditing education.

"It is our hope that we will attract a new generation of auditing educators," Mr. Christopher commented.

"We are very proud to have the College of Business Administration and the University selected as recipients of this prestigious professorship," Dean Kelley said. "I wish to thank Price Waterhouse for its support in the vital area of auditing education."

Dr. Dirsmith holds doctoral and master's degrees in accounting and information systems from Northwestern University. He earned his bachelor's degree in accounting from the University of Illinois. Before coming to Penn State, he served as an instructor at Kendall College.

"Dr. Dirsmith's achievement, both in research and teaching, his accomplishments in the professional community, as well as his high potential for attaining the goals of our program, were some of the reasons why he and Penn State were selected for this grant," Mr. Christopher noted.

The Price Waterhouse Foundation, founded in 1956, is dedicated to the advancement of accounting education. In addition to the auditing professorship program, the Foundation supports grants for accounting research and financial assistance and fellowships to graduate students preparing for teaching careers. It also provides support for undergraduate scholarships, minority schools and programs, faculty symposiums and lecture series, and professional programs and schools of accounting.

Senate

(Continued from page 1)

College of Medicine."

The Senate then held a forensic discussion on the "Perspective on the '80s," as part of the wide-ranging examination of the plan which has been encouraged by the Steering Committee responsible for its final shaping.

Staff Vacancies

The following vacancies for positions classified as staff employee or staff nonemployee have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Dec. 6, 1979. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam war veteran. ASSOCIATE DIRECTOR OF UNDERGRADUATE ADMISSIONS-OFFICE OF UNDERGRADUATE ADMISSIONS, University Park — Responsible to the Director of Undergraduate Admissions for the coordination, planning and management of a major admissions region, including counseling, planning, and organizing operational aspects of admission procedures and activities which relate to the particular region. Formulate and implement policies and procedures necessary to make decisions concerning admission of undergraduate students to the University Park Campus and to a group of assigned campuses. Master's degree (or equivalent), plus two to three years of effective experience, or bachelor's degree (or equivalent), plus four to five years of effective experience, in the administration of higher education required.

PROJECT ASSISTANT-COLLEGE OF ENGINEERING, University Park — Responsible for control of literature and library searches; collecting, tabulating, and organizing data; preparation of written reports; supervision. Bachelor's degree in chemical engineering or physical chemistry and at least one year of graduate work or related experience. THIS IS A FIXED TERM 1 APPOINTMENT-Jan. 2, 1980, through Dec. 31, 1980 (with possibility of renewal)

Penn State Intercom

News in Brief

Arrangements for mail delivery over break should be made now

During the time that University Park offices are closed for the Christmas period — 5 p.m. Friday, Dec. 21, to 8 a.m. Wednesday, Jan. 2 — interdepartmental mail service, U.S. Mail Service and United Parcel Service will be suspended.

If, however, a department has a special need for delivery of incoming U.S. mail on Dec. 24, 26, 27, 28 and/or 31, arrangements can be made with the U.S. Postal Service for delivery by calling the University Mail Service at 865-5602 before 5 p.m. on Friday, Dec. 14.

A department requesting this service is responsible (1) for assigning an employee to be at work in the building at a specified time to receive the mail and (2) for receiving all incoming mail for the building in which the department is housed. The second provision is necessary because the U.S. Postal Service sorts incoming mail by building and not by department.

Holiday Festival VI to begin

Beginning Saturday, Dec. 8, Penn State's University-Wide Program Committee and International Council will sponsor Holiday Festival VI, "An Inter-Cultural Celebration."

Holiday Festival VI includes nine days of programs integrating various cultures from around the world with the traditional American Christmas holiday season.

Through the efforts of Penn State student organizations, administrative units and community groups, the Festival, now in its sixth year, has become a Penn State tradition.

The Festival will open with the tree-lighting ceremony at the foot of the Allen Street Mall Saturday, Dec. 8, and conclude with a Madrigal Dinner Sunday, Dec. 16.

In between there will be concerts, a children's party, dinners and arts and crafts exhibits. Specific events, times and dates are listed in the INTERCOM calendar.

Further information is also available through the HUB Information Desk (865-2000) or the Kern Information Center (865-5436).

Grade mailing change announced

Beginning with the current Winter Term, the University will mail student grade reports to the address designated by each

student, rather than to parents or guardians.

The new policy is necessary for the University to comply with the 1974 "freedom of information" law — also known as the Buckley Amendment — Provost Eddy said in announcing the change.

"The Buckley Amendment prohibits release of educational records — even to parents — without a student's written consent," Dr. Eddy said. "Although those who are financially dependent on their parents are excepted, it would be extremely difficult to determine every student's status and to obtain his or her written consent."

"In order to insure compliance with the law, the University will mail grades to the address designated by the student."

Most overnight parking banned

To assist in snow clearance, regulations prohibiting overnight parking in most parking areas at University Park have gone into effect and will continue through March 15.

The regulations are in effect whether or not there is snow on the ground. Signs are posted at the entrance of those lots which are affected stating, "No Parking 2:30 a.m. to 6 a.m." The following lots are posted:

- Red A, B, E, F, G, H, K and M
- Green B, C, D, E, F, G and L
- Yellow A, B, C, E, F, H, K and L
- Brown A, D, F, G and J
- Blue A, D, F, G and K
- Orange A, B, D, E, F, H, L and M

Visitor parking areas, Conference Center parking area, Nursing Education patient unloading area

Overnight parking will be permitted in parking areas not posted for snow removal but vehicles must be moved by 7 a.m. if the area is not an "open" lot.

W-5, RIT-214 information

The Controller's Office wishes to remind those employees who filed an Earned Income Credit Advance Payment Certificate (W-5) or State Income Tax Non-Withholding Application (RIT-214) for 1979 that these forms expire Dec. 31, 1979.

If you qualify and wish to continue your exemption, or if you are applying for the first time, you must file a W-5 and/or RIT-214 prior to Jan. 4, 1980. Forms are available from the Payroll Department, Room 301 Shields Building.

Cornell Chorus joins Penn State groups in concert

The Cornell Chorus will join two University music groups, the Penn State Glee Club and Musica da Camera, for a Christmas concert at 7:30 p.m. Sunday, Dec. 9, in the Music Building Recital Hall.

The Cornell Chorus, composed of 60 women, will open the program with Zoltan Kodaly's "Hegyi eszszak" ("Mountain Nights"). The group will also sing Johannes Brahms' "Marienlieder."

Several traditional Christmas numbers will open the Penn State Glee Club's portion of the program. Two numbers arranged by the Glee Club director Bruce Trinkley — "The Praise of Christmas" and "O Holy Night" — feature soprano Suzanne Roy, an assistant professor of music. Organist June Miller, an associate professor of music, will accompany the Glee Club on "O Holy Night."

Selections by the Hi-Los will make up the third part of the program. The three groups will then join forces to conclude the program with Benjamin Britten's "Saint Nicolas, opus 42."

Receipts from the concert will benefit scholarships for the University's School of Music. Tickets will be on sale in Room 201 of the Music Building from Dec. 3-7.

Forestry Society conducting annual Christmas tree sale

Penn State's Forestry Society is conducting its annual Christmas tree sale. Individuals or departments can order blue spruces, ranging from 5 to 7 feet in height, for \$12.50, or Scotch pines, from 5½ to 7 feet and up, for \$10.

Trees will be delivered free between Dec. 9 and 15. Orders may be placed in Room 106 Ferguson Building or by calling Karen Knisely at 865-4237.

East German writer, director to offer programs Dec. 10-11

Wolfgang Kohlhaase, East German writer and film director, will present a program of his material at 8 p.m. Monday and Tuesday, Dec. 10 and 11.

Mr. Kohlhaase will read from his works in German on Monday in Room 124 Sparks Building and will present his film *I was 19* Tuesday in Room 111 Boucke. The film will be shown in German with English subtitles. Discussions will follow both presentations.

Mr. Kohlhaase's work focuses on the

problems of young people. *I was 19* deals with the psychological problems of a young German fighting in the Soviet Army during World War II.

In addition to directing regular feature and television films, Mr. Kohlhaase writes prose, radio plays and short stories. He is a member of the Academy of Arts of the German Democratic Republic.

The program is sponsored by the Institute for the Arts and Humanistic Studies and the Department of German.

New foreign study program

A new general studies program with Tel Aviv University in Israel will be launched in the Fall of 1980, the first of Penn State's foreign studies programs to be based in the Middle East.

"The program is an attempt to promote an understanding of, and appreciation for, the history and cultural heritage of the Middle East," Provost Eddy said.

The program is intended to complement Penn State courses on the ancient and modern Middle East and the Arab and Jewish cultures. No more than 10 students will participate during the first year, with 25 participants annually in subsequent years.

FACTS cards available

Individuals or groups needing the 1979 Penn State FACTS card may obtain them in quantity from the Campus Relations Office, Room 301 Old Main (865-2501).

The pocket-size fold-out publication contains information on Penn State's history, officers, Campuses, enrollments and term schedule. It is designed to be handed out at meetings or to be used in reception areas.

BBC series is being screened in Kern

"Projections-Connections," a 10-part BBC produced film series showing the historical events that led to the discovery of such inventions as electricity, atomic energy and the printing press will be screened in Room 112 Kern Graduate Building on Mondays during Winter Term.

The hour-long films will be shown beginning at 12:15 p.m. More detailed information about the series, which centers on our present day dependence on technology and our misunderstanding of how change occurs, will appear in the weekly INTERCOM calendars.

Retired employees of the Office of Physical Plant gathered on campus Nov. 20 to renew old acquaintances and visit with present Physical Plant Employees.

Penn Staters

Dr. David H. Egger, associate professor of petrology, will receive the 1979 L.R. Wager Prize in Volcanology, given by the International Association of Volcanology and Chemistry of the Earth's Interior. The award will be made in December at the quadrennial meeting of the International Union of Geodesy and Geophysics, in Canberra, Australia.

The prize, which is awarded to scientists under 40, honors outstanding contributors to the study of volcanic rocks, particularly studies made in the eight-year period preceding the meeting. The recipient is selected by a subcommittee on volcanology of the Royal Society of Great Britain.

Dr. Egger's research has consisted primarily of experimental studies of the eruption of lavas on the surface of the earth, and of the origin of the magmas from which these lavas are derived. He began his volcanology studies while a research assistant at Penn State from 1967 to 1970. He then became an assistant professor at Texas A&M University and, two years later, joined the staff of the Geophysical Laboratory of the Carnegie Institution of Washington, D.C. He returned to Penn State in 1977. A graduate of Oberlin College, he received his Ph.D. at the University of Colorado in 1967.

President John W. Oswald was one of 20 presidents of institutions of higher learning invited to participate in a business and higher education forum sponsored by the American Council on Education and the Business Roundtable recently in Phoenix, AZ. The educators met with a similar number of chief executive officers from major businesses and industries to assess ways in which higher education and business could collectively advance their common interests. Dr. Oswald chaired a session on how federal regulations affect business and higher education.

Dr. G. Phillip Cartwright, professor of special education, recently appeared as a witness before the U.S. Senate Subcommittee on the Handicapped. His testimony concerned Public Law 94-142, the Education for All Handicapped Children Act of 1975. The law requires that all handicapped children receive a free, appropriate public education in the least restrictive environment. Dr. Cartwright testified about the need to train teachers to work more effectively with handicapped children in the regular classroom.

Dr. David L. Pearson, assistant professor of biology, recently presented invited seminars in South America. He discussed "The Effect of Pleistocene Forest Refugia on Bird Species Richness in Amazonia" at the Science Institute of Catholic University in Quito, Ecuador, and San Marcos University, Lima, Peru.

Dr. Frank Dachsle, professor of geochemistry, recently presented an invited lecture before the Geological Society of South Africa at Rand Afrikaans University. He spoke on "Geological Aspects of Large-scale Meteoritic Impacts." He also presented a paper, "The Electrodynamical Aspect of Impact Cratering," at the 42nd annual meeting of the Meteorological Society, in Heidelberg, Germany.

Dr. Barnes W. McCormick, professor and head of aerospace engineering, was an invited lecturer at the United States Military Academy at West Point recently. He spoke to the faculty concerning, "The Spinning of Light Aircraft."

Samuel H. Levine, professor of nuclear engineering and director of the Brazeale Nuclear Reactor, presented a series of invited lectures at the "Interregional Training Course on the Use of Research Reactors" in Budapest, Hungary, last month.

Maureen A. Carr, professor and head of the School of Music at the University, has been elected to the College of Music. Society Council for the term 1980-82.

Dr. John H. Joseph, assistant to the provost at the Capitol Campus, is the first recipient of the Young Researcher Award established by the Penn State chapter of Phi Delta Kappa, an honorary fraternity for educators. Dr. Joseph was selected for his doctoral dissertation entitled "Instructional Effectiveness of Integrating Abstract and Realistic Visualization." His bachelor's, master's and doctoral degrees were conferred by Penn State. The award consists of a \$250 check, and the recipient's name is inscribed on a permanent award plaque.

Bookshelf

Dr. Robert K. Murray, professor of American history, and expert spelunker Roger W. Brucker are the co-authors of *Trapped*, a new account detailing the 1925 ordeal of Floyd Collins and the unsuccessful attempt to rescue him from the tight passageway he had hoped would lead to the discovery of a new Kentucky cave. The book was published Nov. 26 by G.P. Putnam's Sons of New York.

Dr. Murray contends that, next to the Lindbergh flight and kidnapping, the attempt to rescue Floyd Collins was the biggest news story between the world wars, one of America's first media events.

"More than any other news story of the time, the Floyd Collins drama played out the hidden fears of thousands of Americans," Dr. Murray says. "To be buried alive in such a horrible fashion was the very worst thing many people could imagine."

Research for the book took Dr. Murray and Mr. Brucker, a past president of the Cave Research Foundation, all over the cave country of central Kentucky, where they interviewed surviving members of the rescue team and Collins's family. With special permission from the National Park Service, which now owns Sand Cave where Collins was trapped, they became the first people to enter it since Collins's dead body was carried out nearly 55 years ago.

During those 16 days, the rescue site took on a carnival-like atmosphere at times, with thousands of people flocking to the site. Souvenirs were sold, families brought picnic lunches and handmade maps hurriedly were produced to direct tourists to the site.

The quality of news reporting was mixed, much of it degenerating into fabrication because of a lack of information. "Reporters rewrote each other's stories and conjured up fake interviews," Dr. Murray says. "The pressure on them was intense, and the actions of some were unbelievable."

Two employees awarded their 25-year chairs

Paul L. Guelich Jr., a sign painter for Maintenance & Operations, has received his 25-year chair from the University.

He has been a painter, furniture finisher and letterer since he began his employment with Penn State on March 1, 1954. For the past 11 years, however, he has done only signs and lettering. Together with his

Nearly 250 manuscripts of the philosopher, Ernst Cassirer, had been kept since his death in 1945 in two cardboard boxes and a suitcase, first at the home of his friend, Charles Hendel, and later at the Beinecke Rare Book and Manuscript Library at Yale University. Although Cassirer is one of the most widely read philosophers of this century, the papers had never been fully examined because they were thought to be manuscripts of published work.

However, since 1972 Dr. Donald P. Verene, associate professor of philosophy, has been studying, verifying, cataloguing and translating the lectures and essays, and he has found among them a number of previously unpublished works. Dr. Verene has edited 12 of those works for a collection published by the Yale University Press under the title, *Symbol, Myth, and Culture: Essays and Lectures of Ernst Cassirer, 1935-45*.

Of special interest are manuscripts that present Cassirer's analysis of Nazi Germany; being Jewish, he had to leave his native Germany in 1933. Other topics covered in the papers include Cassirer's philosophy of culture, language, art and politics, and his insights on other thinkers, including Hegel and the Italian philosopher, Giambattista Vico. Part of one of the essays included in Dr. Verene's book was written on the morning of Cassirer's death.

Because so much of the material is new, the book is being presented by Yale University Press, which now owns the papers, as a new introduction to Cassirer through his own words.

A new book, *Life Span Development: A Reader*, co-edited by Dr. Judith N. Hornblum, assistant professor of human development; Dr. Esther Kamisar, assistant professor of educational psychology; and Dr. Lita Schwartz, professor of educational psychology (all at Ogontz Campus), has just been published by Gunn Cinnott Publishing Co., Lexington, Mass.

Retirements

Sharp M. McElwain, associate professor of engineering at the Beaver Campus, retired Dec. 1 after 13 years on the faculty.

Before joining Penn State, he was a mechanical engineer with Joseph F. Bontempo and Associates and with Green Engineering Company, and a special engineer with American Bridge Division, U.S. Steel.

Mr. McElwain earned his B.S. from Penn State in 1940. He is a registered professional engineer and a qualified instructor (O.C.D.) of Environmental Engineering.

superior, Mr. Guelich makes the Penn State seal — from two to six feet in diameter.

This past term, he completed an art education course at the University in jewelry making and repair.

A Phillipsburg resident, he and his wife, Jean, have four sons and seven grandchildren.

Edwin T. Irwin, a lead carpenter for Maintenance & Operations, has received his 25-year chair from the University.

Mr. Irwin worked as a carpenter "A" for 20 years after beginning employment with Penn State on Nov. 1, 1954. Five years ago, he was promoted to his present post, in which he oversees the work of other carpenters.

A Houtzdale resident, Mr. Irwin spends his off-duty hours working with wood. He fashions small furniture pieces and accessories, and transforms pine roots into plaques and other articles.

He and his wife, Ruth, have four married daughters and four grandchildren.

Promotions

Faculty

Dennis J. Murphy to assistant professor of agricultural engineering extension.

Staff Exempt

Mildred R. Dell to supervisor, printing services at Capitol Campus.

Mary Kay Falk to assistant director for Continuing Education at Delaware County Campus.

Joseph C. Kissell to assistant to the dean of Student Affairs at Altoona Campus.

James E. Matinchek to maintenance supervisor at Capitol Campus.

Staff Non-Exempt

Rick J. Beckley to critical care monitoring technician at Hershey.

Clerical

Carol Ann Barner to clerk, data processing A in Physical Plant.

Stephanie J. Ebeling to secretary B in Human Development.

Nancy L. Heaton to clerk, billing A in Student Affairs.

Harriet F. Hillard to senior clerk-CWSP in Student Administrative Services.

Amy M. Leitch to clerk, typist A in Agriculture.

Sandra Lee Lowery to clerk A in Agriculture.

Sharon Ridgway to clerk, typist A in Business Administration.

Kathy M. Rockett to secretary A in Science.

Susan Runk to secretary B in President's Office.

Eleanor Sagnuller to senior clerk-GSL in Student Administrative Services.

Peggy L. Stewart to clerk, analysis A in Student Administrative Services.

Technical Service

William E. Atkins to heating and ventilating technician apprentice in Physical Plant.

Neil P. Cusack to maintenance worker gen. A at Hazleton Campus.

Sheryl A. Dorman to senior milk testing machine operator in Agriculture.

Steven A. Pagano to utility and relief worker in Business Services.

Donald R. Peterson to food preparer B in Housing & Food Services.

Frances Porter to maintenance worker, utility at Capitol Campus.

John P. Reish to heating & ventilating technician apprentice in Physical Plant.

Gloria D. Sigel to senior milk testing machine operator in Agriculture.

Obituaries

C. Melvin Barto, a storekeeper in the College of Earth and Mineral Sciences from 1945 until his retirement in 1964, died Nov. 16. A Marengo, PA, native, he was 73 years of age.

Miles S. Wingard, a residence hall worker in Housing and Food Services from 1951 until 1971, died Nov. 26. Mr. Wingard, who retired on disability, was born in Spring Mills, PA, April 28, 1911.

Special Events

Thursday, Dec. 6

Sports: swimming (women) vs. Clarion, 7 p.m.
GSA Workshop, Holiday Wrapping and
Ornaments, 7:30 p.m., Room 101 Kern.
Anthropology Dept. Film and Lecture, 8 p.m.,
Room 112 Kern. John Marshall,
documentary filmmaker, premieres his film
of a Bushman woman, "Nai of the Ikung
San."
URTC, *You Can't Take It With You*, 8 p.m.,
The Pavilion Theatre.
Artists Series, Scotland's Highland regiment,
The Black Watch, 8:30 p.m., Rec. Hall.

Each dough sculpture will be one of the international crafts demonstrated as part of Holiday Festival VI at noon on Dec. 11 in Kern Graduate Building.

Friday, Dec. 7

USG Flea Market, 10 a.m.-5 p.m., HUB
Ballroom.
HUB Craft Center class registration, noon-5
p.m., Room 312 HUB, through Dec. 18.
Geography Dept. Coffee Hour, 3:45 p.m., Room
319 Walker. James McClure, College of
Agriculture and sometime member, State
College Borough Council, on "Eight Years
on Borough Council: The Reflections of an
Aspiring Idiots."
Commonplace Theatre, *The Magic Flute*, 6:30
and 8:45 p.m., Room 112 Kern.
URTC, *You Can't Take It With You*, 8 p.m.,
The Pavilion Theatre.
Mieja Ahn, piano, 8:30 p.m., Music Bldg.
Recital Hall.

Saturday, Dec. 8

Sports: fencing (women), Alumnae Open, 9
a.m., (men) vs. Pace, 2 p.m.; bowling (men
and women) vs. Bloomsburg, 1 p.m.;
wrestling vs. West Virginia, 2 p.m.;
swimming and diving (men) vs. St.
Bonaventure, 2 p.m.; basketball (men) vs.
West Virginia, 8:10 p.m.
USG Flea Market, 10 a.m.-5 p.m., HUB
Ballroom.

Holiday Festival VI, Tree Lighting Ceremony,
4:30 p.m., foot of Mall.

France-Cinema, *Allegro non troppo*, 7 and 9
p.m., Room 112 Kern.

Lutheran Parish, "For the Time Being," 8 p.m.,
Eisenhower Chapel.

URTC, *You Can't Take It With You*, 8 p.m.,
The Pavilion Theatre.

IAHS, Rajmund Klekot, Polish mime artist, in
"The Wanderer," premiere performance,
8:30 p.m., Schwab.

Sunday, Dec. 9

Sports: fencing (women), Alumnae Open, 9 a.m.
University Chapel Service, 11 a.m., Eisenhower
Chapel. Christmas Carol Sing-In.
Holiday Festival VI, International Fair —
International food, crafts, art exhibits, live
music and films, noon-6 p.m., HUB
Ballroom.

State College Quarterback Club Banquet, 1 p.m.,
Rec. Hall. Pa. Governor Richard
Thornburgh, Pittsburgh Pirates' Willie
Stargell and PSU football coach Joe Paterno,
speakers.

France-Cinema matinee, *Allegro non troppo*, 2
and 4 p.m., Room 112 Kern.

5th Annual Messiah "Sing-In," 3 p.m.,
Eisenhower Auditorium.

Commonplace Theatre, *The Magic Flute*, 6:30
and 8:45 p.m., Room 112 Kern.

PSU Glee Club and Cornell University Women's

Glee Club, Christmas Concert, 7:30 p.m.,
Music Bldg. Recital Hall.

Monday, Dec. 10

Late registration deadline.
Add deadline.

Last date for March graduates to activate
diploma cards in Registrar's Office and pay
theses fees at Burrar's Office.

HUB Craft Center, Crash Crafts, 10 a.m.-
1 p.m., 7:30 p.m., daily through Dec. 14,
Room 312 HUB.

IAHS/German Dept., Wolfgang Kohlhase, East
German writer and film director, reads from
his own works, 8 p.m., Room 124 Sparks.

Holiday Festival VI Concert, international
music, noon, Kern Lobby.

Projections/Connections Film, "Death in the
Morning," 12:15 p.m., Room 112 Kern.

Wednesday, Dec. 12

Holiday Festival VI, Christmas Crafts and Trim
the Tree Demonstrations, noon, HUB Main
Lounge.

Holiday Festival VI Concert, international
music, noon, Kern Lobby.

URTC, *You Can't Take It With You*, 8 p.m.,
The Pavilion Theatre.

Thursday, Dec. 13

Holiday Festival VI Concert, Phi Mu Alpha
Marimba Band, noon, Kern Lobby.

Brown Bag Performing Arts Hour, 12:30 p.m.,
HUB Assembly Hall. "Play in Progress."

International Candlelight Dinner, 4:45-6:45
p.m., HUB Terrace Room.

Penn State Dames meeting, 7:30 p.m., Room
101 Kern.

URTC, *You Can't Take It With You*, 8 p.m.,
The Pavilion Theatre.

Friday, Dec. 14

Holiday Festival VI Concert, Phi Mu Alpha
Brass Chorale, noon, Kern Lobby.

Geography Dept. Coffee Hour, 3:45 p.m., Room
319 Walker. Robert Scholten, geology, on
"Centre County and Global Tectonics."

International Candlelight Dinner, 4:45-6:45
p.m., HUB Terrace Room.

Commonplace Theatre, *Camelot*, 6:30 and 9:15
p.m., Room 112 Kern.

Holiday Festival VI, International Night,
performances by international students, 7
p.m., HUB Ballroom.

Folk and Square Dance Round Up, 7:30 p.m.,
Room 133 White Bldg.

URTC, *You Can't Take It With You*, 8 p.m.,
The Pavilion Theatre.

Kappa Alpha Theta Benefit Concert, 8:30 p.m.,
Music Bldg. Recital Hall.

Penn State Singers, *Amahl and the Night
Visitors*, 8:30 p.m., Eisenhower Auditorium.

Saturday, Dec. 15

Robeson Cultural Center, Children's Christmas
Party, 12:30-3 p.m., Walnut Bldg.

Penn State Singers, *Amahl and the Night
Visitors*, 2 p.m., Eisenhower Auditorium.

Sports: basketball vs. Syracuse, (women), 5:45
p.m., (men), 8:10 p.m.

Madrigal Dinner, 6:30 p.m., Room 102 Kern.

France-Cinema, *Donkey Skin*, 7 and 9 p.m.,
Room 112 Kern.

URTC, *You Can't Take It With You*, 8 p.m.,
The Pavilion Theatre.

Sunday, Dec. 16

University Chapel Choir Christmas Service, 11
a.m., Music Bldg. Recital Hall.

France-Cinema matinee, *Donkey Skin*, 2 and 4
p.m., Room 112 Kern.

Commonplace Theatre, *Camelot*, 6:30 and 9:15
p.m., Room 112 Kern.

Madrigal Dinner, 6:30 p.m., Room 102 Kern.

UCC, Southside Johnny and the Asbury Jukes,
8 p.m., Rec. Hall.

Seminars

Thursday, Dec. 6

Chemistry, Donald H. Levy, Univ. of Chicago,
on "Spectroscopy in Supersonic Molecular
Beams," 12:45 p.m., Room 333 Whitmore.

Physics, William Williams, Univ. of Michigan, on
"Neutral Current Interactions in Atomic
Hydrogen," 3:55 p.m., Room 445 Davey.

Mathematics, Howard Garland, Yale Univ., on
"Arithmetic Theory of Loop Groups," 4
p.m., Room 102 McAllister.

Computer Science, Daniel J. Paulish, Burroughs
Corp., on "A Fall-Soft Distributed
Processing System," 4 p.m., Room 333
Whitmore.

Monday, Dec. 10

Physics, Humphrey Maris, Brown Univ., on
"Theories and Anti-Theories of Thermal
Boundary Resistance," 11 a.m., Room 339
Davey.

Microbiology, Cell Biology, Biochemistry and
Biophysics, Jack Manloff, Univ. of
Rochester, "Replication of Mycoplasma
Virus: Phages Which Can Infect Peccaryotes
Without Cell Walls," 4 p.m., Room 101
Althouse.

Computation Center, Daniel L. Bernitt, senior
research associate, on "JCL (3 of 6)," 7:30
p.m., Room 112 Walker.

Tuesday, Dec. 11

Aesthetics, Criticism, and Interpretation Theory
Group, John M. Anderson, philosophy, on
"Art and Language," 4 p.m., Hotel State
College.

American Society for Metals, William A.
Nystrom, Stackpole Carbon Co., on
"Modern Industrial Applications of
Graphite Materials," 7:30 p.m., Room 301
Stieble.

A daily calendar of events is available around
the clock at 863-1100. For the latest information
on College of Arts and Architecture events,
telephone 563-1200.

Wednesday, Dec. 12

Philosophy of Sport, Ron Smith, physical
education, on "Winning in American and
England and a Theory of Competition in
Athletics," noon, Room 104 White.

Computation Center, Daniel L. Bernitt, on "JCL
(4 of 6)," 7:30 p.m., Room 112 Walker.

Thursday, Dec. 13

Chemistry, Ahmed H. Zewail, Cal. Institute of
Technology, on "Laser Induced Chemistry —
Is It Possible?" 12:45 p.m., Room 333
Whitmore.

Computer Science, Joseph Ja' Ja', computer
science, on "Time-Space Tradeoffs for Some
Algebraic Problems," 4 p.m., Room 325
Whitmore.

Friday, Dec. 14

Economics/Institute for Policy Research, Michel
Wasylencuk, economics, on "Empirical
Models and the Demand for Social Public
Goods," 2 p.m., Room 101 Kern.

Horticulture, J.E. Brewer, horticulture, on
"Horticulture in British Colleges and
Gardens," 3:55 p.m., Room 10 Tyson.

Exhibits

HUB Galleries: Zelko Kujundzic, recent

paintings, sculpture and ceramics, The
Gallery, Waskewich Galleries, prints,
through Dec. 7; Dianne Cissel, oil paintings,
opens Dec. 8; Browning Gallery, Holiday
Festival VI exhibit, Arts and Crafts from
Around the World, opens Dec. 8, Art Alley.

Kern Galleries: Janet I. Dougherty, prints and
drawings, through Dec. 16; Christmas Crafts
from around the World.

Museum of Art: French drawings from
European collections (the former Armand
Goblet Collection) and Oriental works from
the permanent collection.

Pattée Library: "Intentions," photographs by
four State College residents, East Corridor
Gallery; Rose Shumskas, drawings, Lending
Services Lobby.

Visual Arts Bldg. Zoller Gallery: Student
architectural drawings and models, opens
Dec. 9.

Daughter Essie gives her all to ballet lessons in URTC production.

"You Can't Take It With You"
continues at Pavilion

You Can't Take It With You, Penn State
University Resident Theatre Company's
second presentation, will continue at the
Pavilion through Dec. 15. The production
features a cast of student and professional
performers and is directed by David
Dannenberg, m of the Department of
Theatre and Film. Curtain is at 8 p.m.

George Kaufman and Moss Hart's
award winning comedy (Pulitzer Prize as a
play, Oscar as a movie) centers around the
idiosyncrasies of the Sycamore family.

They live by the philosophy that people
should experience as full and free a life as
possible because you can't take it with you.

To make reservations for a night with
the Sycamores, call the URTC box office at
865-1884 from 10 a.m.-6 p.m. Mondays
and 10 a.m.-9 p.m. Tuesdays through
Saturdays.

Mime Raymond Klekot appears Dec. 8.

Campus Update

A new endowment fund "to support and enhance" the academic program at Behrend College has been established by the Behrend College Advisory Board, according to Director Irvin H. Kochel. The fund was set up with a \$5,000 contribution by the Board and has recently been more than tripled by a bequest from a former Advisory Board member.

Norman W. Wilson, former president and board chairman of Hammill Paper Company, bequeathed the funds to the Advisory Board, which in turn designated them for the new endowment fund at the annual fall meeting. Mr. Wilson, who had served on the Behrend College Advisory Board from 1959 until his death this past July, previously contributed the Pavilion in the Wilson Picnic Grove on the Behrend College campus.

The Wilson bequest was allocated to the new endowment fund by the Advisory Board with the express purpose of establishing a cultural or academic lecture or performance series to be named in honor of the donor.

For the third consecutive year, The New Kensington Campus has increased its level of funding from The Pennsylvania Department of Vocational Education, Campus Director Robert Arbuckle has announced. The money will support retraining in technology areas for unemployed workers and for college students.

Two associate degree programs have already been established through these grants. The first, in Biomedical Equipment Technology, has now graduated 12 students. A Mining Technology program will graduate its first class next May. Since 1977-78 the Vocational Education grants have risen from \$47,437 to this year's \$123,085 award.

The Schuylkill Campus recently won the runner-up award in the Pocono Northeast Community Awards Program. The Campus submitted a scrapbook detailing the physical renovations of the past year.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1372 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Dec. 13, 1979. DD NDT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT SUPERVISOR, COMPUTER AND DISBURSEMENT AREA-Management Services, University Park - Responsible to the Supervisor, Computer and Disbursement Operations, for the completion of scheduled work, assigning work, training and assisting operators, operating computer and for assisting in the determination of errors in job runs. Supervise and assure the training of application control specialists, console operators and computer operators. Schedule and distribute work assignments.

Direct the shift personnel and be responsible for the computer throughput. Technical training in data processing equivalent to two years of college, plus two to four years of effective experience. Data processing supervisory experience is desirable. Must be willing to work any of three shifts.

SYSTEMS AND APPLICATIONS PROGRAMMER-College of Medicine, Hershey - Responsible to the Manager of Programming and Systems for translating systems analysts' designs and instructions into computer programs which control the processing of data within the computer. Bachelor's degree with 2-4 years of effective programming experience or associate degree with 4-6 years of effective programming experience is required.

COLLEGE HEALTH NURSE-Delaware County Campus - Responsible administratively to the Dean of Student Affairs and professionally to the Administration of the University Health Services through the Director of Nursing Services for providing nursing care to the student body, including treatment of minor and temporary illnesses and accidents, plus making appointments and referring students and employees to a physician or hospital when necessary and appropriate. Graduate of an accredited nursing program or its equivalent and current licensure in Pennsylvania as a registered nurse, plus 6 to 9 months of effective experience in public health nursing or other related institutional nursing experience.

Manfred Kroger
Professor of Food Science

ANSWER: When the dental plan was installed at the University in January, 1979, several thousand dental claim forms were distributed to dentists in the University Park area through the Centre County Dental Society. Forms were also made available to Campuses throughout the State. Many of the local dentists have had their supplies replenished. Ask your dentist to contact the Employee Benefits office, Room 133 Willard Building, to secure a supply of claim forms.

William F. Batchelor
Manager, Employee Benefits Division

Eligibility to receive Unemployment Compensation payments is based on the law and not on an individual's need, and payments are made only to persons who qualify. Determination of eligibility is made by the Unemployment Division of the State Office of Employment Security. The University does not determine eligibility. Mr. Kidder emphasizes.

It is the responsibility of the employee to make application for benefits to the State agency. Questions about eligibility and payment amount should be directed to the local Office of Employment Security.

Unemployment Compensation explanation presented

The University has been a covered employer under the Pennsylvania Unemployment Compensation Law since Jan. 1, 1972. Robert L. Kidder, manager of the Employment Division, points out.

Unemployment Compensation is a form of job insurance, he explains. It protects individuals against complete loss of income if they become unemployed through no fault of their own and are realistically attached to the labor market.

Unemployment Compensation Insurance is completely separate from the insurance commonly termed "Social Security," which protects individuals and their eligible dependents against loss of earnings upon retirement or death.

While employees and employers each help pay for Social Security, this is not the case with Unemployment Compensation, Mr. Kidder notes. Under the law, employers pay the total cost of providing Unemployment Compensation Insurance for their employees. Individual employees do not pay any of the cost.

Funding Sources

For further information, call 865-1372 (Network 8-475-1372)

(327-1) Doctoral dissertation research grant proposals in the organization, delivery, and financing of health care services are funded by the HEW National Center for Health Services Research. Applicants must have completed all but the dissertation requirement and be enrolled in a doctoral program in the social, medical, management, or health sciences. Support is limited to \$20,000 for one year. The next two deadlines are Feb. 15 and Oct. 15, 1980, with awards following each date by four months. Call (202) 426-8970 for information.

(327-2) Postdoctoral research and short-term travel grants are available from the US-Spanish Joint Committee for Scientific and Technological Cooperation. Areas of research funded include: agriculture, natural resources, oceanography, environment, urban and regional planning, industrial technology, energy, biomedical sciences, and basic sciences. (Ref. 44 FR 6743, 11/27/79)

(327-3) Sigma Xi, the scientific research society, has funds available to graduate students (or research). The amount of these grants will vary. It is not necessary to be a member of Sigma Xi to receive a grant-in-aid. Application forms are available upon request. Contact Roberts Beebe, 222-A Hammond Building, 865-1317 or 466-7163 for more information. The completed forms are sent directly to Sigma Xi headquarters, 345 Whitney Avenue, New Haven, Connecticut 06511.

Note: This schedule is subject to change as special events must be accommodated. You can check by calling the IM Building (5-5401), White Building (5-7591), Natorium (5-1532), Ice Rink (5-4102) and Rec Hall (5-2162).

Penn State Intercom

News in Brief

New plan would change Terrace Room to bookstore

The University has announced plans to transform the entire Terrace Room — the triangular building at the HUB's southeast corner — into the University bookstore. The Terrace Room's food service operations would be transplanted to the ground floor of the HUB.

The plan, contingent upon approval by the Board of Trustees in January, is to combine the three Campus bookstores under one roof without building a new facility, according to Ralph E. Zilly, vice president for business.

At present, one bookstore is located in McAllister Building, another on the ground floor of the HUB and the third on the first floor of the HUB. The arrangement creates congestion and hampers operational efficiency and customer convenience, Mr. Zilly said.

The entire ground floor of the HUB would be altered to accommodate a variety of food service areas, including space for games and game tables. The various offices located on the HUB's ground floor would be moved upstairs.

Administrators envision the proposed ground floor food service areas as holding 300 more seats than the combined number currently available at the Lion's Den and Terrace Room.

HUB to offer crafts classes

The winter session at the HUB Craft Centre will run from Jan. 6 to Feb. 14. Classes will be offered in batik tie-dye, wheel and hand-built pottery, weaving and stained glass. Registration for this session will be held through Dec. 18 from noon to 5 p.m. daily in Room 312 HUB.

Libraries to close for recess

The University Libraries will be closed Saturday, Dec. 22 through Tuesday, Jan. 1, for the holiday recess.

Pollock Library will close at 5 p.m. Dec. 19, and will re-open Jan. 2. Other libraries will be open from 7:45 a.m. until 10 p.m.

Fraser Kershaw, a part-time student at Penn State, relies on the wind and a parafoil to get his abstract Christmas tree kite aloft, while Linda Patille, a production assistant in Publications, trims the office tree in traditional fashion.

Dec. 19, and 5 p.m. Dec. 20 and 21.

Individuals can take out materials for the recess until Friday, Dec. 21, but are urged to avoid a last-minute rush by doing so earlier. Certain materials which do not ordinarily circulate can be checked out for the holiday period after 3 p.m. on Dec. 21. These special permission loans must be returned by 10 a.m. on Jan. 2.

The Libraries will resume regular Winter Term hours Wednesday, Jan. 2.

Energy Fast Day endorsed

The University's Executive Energy Conservation Committee has endorsed the "Energy Fast Day" planned by Eco-Action for Sunday, Dec. 16.

The purpose is to show the public that

conservation is not difficult to practice, according to J. Carroll Dean, manager of energy conservation programs at the University. A checklist of potential areas for energy conservation will be distributed prior to Energy Fast Day, he said.

Madrigal dinner is slated

The Sixth Annual Madrigal Dinner sponsored by the Kern Graduate Commons will be held at 6:30 p.m. on Saturday and Sunday, Dec. 15 and 16.

Room 102 Kern will be transformed into a 16th Century castle with decorations, banners, coats-of-arms and suits of armor. The king and his court of ladies, jesters and musicians will preside over the festive feast observing court "rules of curtesy

and etiquette."

A full beef dinner with plum pudding and other royal treats will follow the fanfares and traditional Wassail toast. Entertainment will be provided by singers, jugglers, minstrels, jesters, brass choral and herald trumpeters.

Tickets are available now at Kern Information Desk. For further details, call 865-1878.

'Amahl and the Night Visitors' to be presented Dec. 14-15

Amahl and the Night Visitors, the Christmas opera by Gian Carlo Menotti, will be presented by the Penn State Singers at 8:30 p.m. Friday, Dec. 14, and again at 2 p.m. Saturday, Dec. 15, in Eisenhower Auditorium.

The opera tells the story of a crippled shepherd boy who encounters the Magi as they seek the Christ child. When the boy offers his crutch as a gift for the new baby, he is healed and the story ends on a happy note.

Raymond Brown, professor of music and director of the Singers and the University Choirs, will conduct the performances. The production has been staged by Kimberly Wolfe, a graduate student in the School of Music.

Accompaniment will be provided by an orchestra of students and faculty. Tickets for *Amahl and the Night Visitors* are on sale at the Eisenhower Auditorium box office daily from 10 a.m. until 4 p.m. They will also be available at the door before performances.

Holidays International Dinner Thursday and Friday at HUB

A "Holidays International" candlelight dinner will be held from 4:45 to 6:45 p.m. Dec. 13 and 14 at the HUB Terrace Dining Room.

In keeping with the International Week theme on campus, the menu will feature

(Continued on page 4)

Senate will discuss legislative proposal on advising

At its Dec. 18 meeting, the University Faculty Senate will discuss a legislative proposal from the Subcommittee on the Role of the Adviser. The proposal, which contains three recommendations, is scheduled for action at the Senate's Feb. 5 meeting, the January meeting having been cancelled.

The Subcommittee's report emanates from a decision made at the Sept. 7, 1978, Senate meeting, at which the Committee on Academic and Athletic Standards was charged with reviewing reports from previous committees concerning the role of the adviser and to prepare a legislative report based upon that review.

In the proposal's introduction, the Subcommittee states: "After almost twenty years, the recommendations of many Senate Committees about advisement remain tenuous and their enforcement whiney."

The draft of the Subcommittee's proposal, unanimously endorsed by the Committee on Academic and Athletic Standards, is supplemented by data from the Everett Report, "An Analysis of

Student Attrition at Penn State," and from pertinent sections of the draft form of "A Perspective for the '80s." The Everett Report notes, for instance, that reducing attrition "... could augment tuition income by as much as \$10 million annually. Effective advisement is one of the ways of reducing attrition."

Thus, the Subcommittee's first recommendation is that "University policy on promotion and tenure (PS-23) be modified to include academic advising as a systematic and important area of faculty responsibility and one which will be evaluated in relationship to promotion and the granting of tenure."

The second recommendation concerns changes and additions to Section 32 of *Academic Policies and Procedures for Undergraduate Students*. Section 32-10, "Function of Advising," is redefined slightly to accommodate a new section, 32-20, which describes the general goals and components of academic advising. Section 32-30 remains the same. A new section, 32-40, has been added to delineate the responsibilities of advisers and students:

32-40 NATURE OF THE ACADEMIC ADVISING PROCEDURE

THE ROLE OF THE ACADEMIC ADVISER THROUGHOUT THESE ACADEMIC POLICIES AND PROCEDURES FOR UNDERGRADUATE STUDENTS IS CONSULTATIVE IN NATURE. CONSULTATION IS DESIGNED TO ENGAGE ADVISER AND ADVISEE IN ALL APPLICABLE COMPONENTS OF ACADEMIC ADVISING. IN ANY ACADEMIC ADVISING PROGRAM, SOME STUDENTS PROPOSE ACTIONS WITH WHICH THE ACADEMIC ADVISER CANNOT AGREE. IN SUCH CASES, ADVISERS ARE RESPONSIBLE FOR INFORMING STUDENTS OF THE APPROPRIATE COURSE OF ACTION. NEVERTHELESS, FINAL DECISIONS RELATIVE TO COURSE SCHEDULING AND PROGRAM PLANNING ARE THE STUDENTS'; THEY MUST ASSUME PRIMARY RESPONSIBILITY FOR DECISIONS, PARTICULARLY WHEN THESE ARE INCONSISTENT WITH THE REQUIREMENTS OF THE CHOSEN MAJOR AND COLLEGE.

1. RESPONSIBILITIES OF THE ADVISER
 - a. TO BE KNOWLEDGEABLE ABOUT PROGRAM (S) IN WHICH HE/SHE ADVISES.
 - b. TO INFORM THE ADVISEE OF DEGREE REQUIREMENTS.
 - c. TO COMMUNICATE AND EMPHASIZE THE ADVISEE'S RESPONSIBILITY FOR SATISFYING DEGREE REQUIREMENTS.

Penn Staters

The National Weather Association has presented Dr. John C. Cahill, associate professor of meteorology, its 1979 Award for Contributions to the Advancement of Applied Meteorology. The award, which was made at the Association's annual meeting in Denver on Nov. 29, recognizes Dr. Cahill's research in the use of the minicomputer in weather forecasting.

Dr. Rustum Roy, chairman of the Science, Technology and Society program, was one of 18 scientists and philosophers invited by the Vatican to the first Colloquium Romanum, an effort to relate the perspectives of science and technology to religious insight. During the Colloquium, held Nov. 10-12, Pope John Paul II called a special meeting with the group to discuss its task and findings. In addition, Dr. Roy delivered the Centenary Hibbert Lectures in London Nov. 13-15. His topics were, "Reality Technology, A New Meeting Ground for Science and Religion," "The Dice-Playing God: Was Einstein Wrong?" and "Situation Theology: Religious Hegemony for Technological Power." He also presented the second lecture at Cambridge University under the auspices of the dean's once-a-term colloquium in Trinity College.

Dr. Margaret Mandrillo, associate professor of nursing, recently presented three invited lectures in Japan: "Curriculum Designs in Nursing Education," to the Aino Hospital Foundation's International Conference for Nurses, held in Osaka; "International Aspects of Nursing," to the Kobe Municipal School of Nursing; and "Nursing Theories and Nursing Curriculums," to the nursing education faculty at Keio University in Tokyo.

Dr. Henry J. Hermanowicz, dean of the College of Education, has been named to a three-year term on the Board of Trustees of the Joint Council on Economic Education. The Joint Council, headquartered in New York City, is dedicated to bringing an understanding of economics and the United States' economic system to educators throughout the nation. Board members include leaders from business, labor and education.

Pianist Steven H. Smith, associate professor of music, recently returned from a concert tour to Spain, France and equatorial Africa. The tour represented Prof. Smith's first appearance in France, where he performed in Conflans-St. Honorine and St. Germain en Laye, and in Africa, where he performed in Port-Gentil, Gabon. In Spain, he recorded two programs for the Spanish National Radio in Madrid.

Dr. Sumer C. Aggarwal, professor of management science and operations management, was recently the primary speaker for the Finnish Materials Management Association annual conference. His topic was "Materials Management Trends During the '80s."

Dr. Richard E. Tressler, associate professor of ceramic science and engineering, has been named to the board of editors of "Ceramurgia International," a scholarly journal that reports on work done in the areas of ceramic and glass engineering and science.

James Kelly, academic information program coordinator in the Division of Undergraduate Studies, has been elected president of the Northeast Region of Academic Affairs Administrators (AcAAd). Mr. Kelly was named program chairman for AcAAd's 15th annual conference ("The Freshman Year: Key to Academic Success") and was appointed to a two-year directorship within the national Association of Academic Affairs Administrators.

Dr. Leslie C. Hale, professor of electrical engineering, has been named the A. Robert Noll Distinguished Professor of Electrical Engineering. The second Penn State faculty member to hold the chair since its establishment in 1969, Dr. Hale will hold the Noll Professorship for five years.

Dr. Hale received his B.S., M.S., and Ph.D. degrees in electrical engineering from the Carnegie Institute of Technology. He joined the Penn State faculty in 1962 as an assistant professor, was promoted to associate professor in 1966 and to professor in 1969.

Before coming to Penn State, Professor Hale worked for the British Space Research Program and also had participated in early U.S. rocket and satellite programs. His research has involved sounding rocket exploration of the electrical properties of the "middle" atmosphere. His present research concerns the coupling of electric fields and currents and the movement of small "aerosol" particles through the atmosphere. He presented the results of a current project to the Quadrennial International Association of Geodesy and Geophysics assembly in Canberra, Australia, on Dec. 10.

Dr. Hale will begin his tenure as the Noll professor with an expedition to Kenya to study atmospheric processes during the solar eclipse in early 1980. Later next year, he will participate in a joint NASA-Norway effort to measure electrical phenomena in northern Norway.

Dr. Ossian MacKenzie, dean emeritus of the College of Business Administration, was one of five University of Montana alumni chosen to receive the 1979 Distinguished Alumnus Award. The award was presented during Montana's Homecoming weekend, Oct. 12-14.

Dr. Robert L. Shrigley, professor of education, has been named to a four-year term on the editorial advisory board of the Journal of Research in Science Teaching, the official journal for the National Association for Research in Science Teaching.

Two associate professors of community development have been elected to positions with the Association for Voluntary Action Scholars. Dr. Drew Hyman will serve as vice-president of the group and Dr. Larry Gamm on its board of directors. The Association is a professional organization concerned with research and development in the area of citizen participation and voluntary action.

Dr. Richard L. Gordon, professor of mineral economics, recently spoke at a Department of Energy symposium on coal resources/reserves information and was a panelist for a Library of Congress briefing on coal problems. He has also joined the editorial boards of Resources and Energy and the journals of the International Association of Energy Economists.

Dr. Thomas A. Hale, professor of French and comparative literature, has been elected to a two-year term on the Executive Committee of the Modern Language Association's Division on French Literature Outside Europe.

Dr. Vladimir S. Stubican, professor of materials science and engineering, was an invited lecturer of the NATO Advanced Study Institute on the Physics and Chemistry of Refractory Oxides, which took place in Aleria, Corsica, France. He discussed "The Application of Oxide Solid State Electrolytes." In October, Dr. Stubican was one of eight U.S. scientists selected by the National Science Foundation to participate in the U.S.-Japan joint seminar on Transport in Nonstoichiometric Compounds at Honolulu, Hawaii. His topic was "Phase Equilibria and Ordering of Defects in Oxygen Conducting Systems."

Lewis T. Poorman, senior research technologist with the Penn State Energy Extension Service, has been selected by the National League of Cities to work on the new energy hotline of the President's Clearinghouse for Community Energy Efficiency this month. The Clearinghouse is a resource center which local governments can call or write for information on community energy efficiency.

An exhibition of works by William D. Davis, assistant director of the University's Museum of Art, was recently held at the Sloan Gallery at Lock Haven State College. Twenty-one graphic drawings and prints, as well as several etchings and lithographs, comprised the exhibition. In conjunction with the show, Mr. Davis presented a gallery talk and a retrospective slide show of his works from the late 1950s to the present.

Bookshelf

Dr. Hubert L. Barnes, professor of geochemistry and director of EMS's ore deposits research section, is the editor of a new book, *Geochemistry of Hydrothermal Ore Deposits*, a comprehensive, state-of-the-art review of the processes by which ore deposits are formed by the action of hot aqueous fluids.

This is the second edition of the book. Published by Wiley-Interscience, it has been entirely rewritten and incorporates the major advances in the understanding of the ore-forming processes that have been developed in the decade since the first edition was published. The first edition was also edited by Dr. Barnes.

Penn State faculty members who authored or co-authored chapters in the book include Dr. C. Wayne Burnham, professor of geochemistry and head of the Department of Geosciences; Dr. A.W. Rose, professor of geochemistry; Dr. Hiroshi Ohmoto, professor of geochemistry; Dr. L.M. Cathles, associate professor of geosciences; and Dr. Barnes.

William H. Parsonage, associate professor of administration of justice, is editor of *Perspectives on Victimology*, a new volume published as part of the Sage Research Progress Series in Criminology.

The 160-page work provides an overview of victimology as a developing field of interest and an awareness of the kinds of issues on which victimologists focus.

Ten original essays are presented, covering three themes: the development of reliable crime and victimization data and the methodology to obtain such data; the characteristics of special types of offenders and victims; the assessment and development of strategies for dealing with some of the social and personal effects of crime and victimization.

Dr. John R. Hepburn, associate professor of administration of justice, is co-author of one of the essays: "Victimization, Fear of Crime, and Adaptive Responses Among High School Students."

Marx C. Levey, a counselor with the Educational Opportunity Program, is the principal author of two new books published by the American Photographic Book Publishing Co., Inc., New York.

Photography: Buying, Choosing, Using is a practical manual for the beginner, stressing the selection of correct equipment and discussing the results that can be expected.

Photography: Composition, Color, Display is both practical and aesthetically oriented, combining knowledge of composition, equipment, color theory, and photographic display.

Mr. Levey's co-authors are Margaret Hall, who received her B.A. in English from Penn State, and Samuel Kazdan, who received his Ph.D. in comparative literature from the University.

Obituaries

Dr. George P. Barron Jr., professor emeritus of nutrition and food safety, former assistant to the Vice President for Research and Graduate Studies and former director of the Pesticide Research Laboratory and Graduate Study Center, died of apparent smoke inhalation in a fire at his home, 2210 W. Whitehall Road, on Dec. 5.

Dr. Barron, 60, had retired April 1, 1979, from the College of Agriculture, for which he had taught and done research since 1948. He originally joined the faculty as an instructor of animal nutrition.

In 1963, he was named as head of the Department of Foods and Nutrition. In 1969, he was appointed as assistant to the Vice President for Research and Graduate Studies and as director of the Pesticide Research Center.

He had earned the B.S. in biology and an M.S. in biochemistry and nutrition from Texas A&M University. In 1953, he received the Ph.D. in animal nutrition from Penn State.

He was born Nov. 20, 1919, in Iola, Texas. University officials said he was planning to return to Texas, where members of his family reside.

Charles M. Beard, a painter with the Office of Physical Plant since 1969, died Dec. 3. He was born in Warm Springs, VA, on June 3, 1927.

Special Events

Thursday, Dec. 13
International Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.
GSA, Otagami Ornaments Workshop, 7:30 p.m., Room 102 Kern.
URTC, You Can't Take It With You, 8 p.m., The Pavilion Theatre.

Friday, Dec. 14
Holiday Festival VI Concert, Phi Mu Alpha Brass Chorale, noon, Kern Lobby.
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Robert Scholten, geology, on "Centre County and Global Tectonics."
International Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.
Commonplace Theatre, Camelot, 6:30 and 9:15 p.m., Room 112 Kern.
Holiday Festival VI, International Night — performances by international students, 7 p.m., HUB Ballroom.
Folk and Square Dance Round Up, 7:30 p.m., Room 133 White.
URTC, You Can't Take It With You, 8 p.m., The Pavilion Theatre.
Kappa Alpha Theta Benefit Concert, 8:30 p.m., Music Bldg, Recital Hall.
Penn State Singers, *Amahl and the Night Visitors*, 8:30 p.m., Eisenhower Auditorium.

Saturday, Dec. 15
Robeson Cultural Center, Children's Christmas Party, 12:30-3 p.m., Walnut Bldg.
Penn State Singers, *Amahl and the Night Visitors*, 2 p.m., Eisenhower Auditorium.
Sports: basketball w/ Syracuse, (women) 5:45 p.m., (men) 8:10 p.m.
Commons Madrigal Dinner, 6:30 p.m., Room 102 Kern.
France-Cinema, *Donkey Skin*, 7 and 9 p.m., Room 112 Kern.

URTC, *You Can't Take It With You*, 8 p.m., The Pavilion Theatre.

Sunday, Dec. 16
University Chapel Choir Christmas Service, 11 a.m., Music Bldg, Recital Hall.
France-Cinema matinee, *Donkey Skin*, 2 and 4 p.m., Room 112 Kern.
Commons Madrigal Dinner, 6:30 p.m., Room 102 Kern.
Commonplace Theatre, Camelot, 6:30 and 9:15 p.m., Room 112 Kern.
UCC, Southside Johnny and the Asbury Jukes, 8 p.m., Rec Hall.

Monday, Dec. 17
Pass/Fail.
Projections/Connections series, "Distant Voices," 12:15 p.m., Room 112 Kern.
Shakespeare videotape, BBC, *Richard II*, 6:30 p.m., Room 101 Chambers.
France-Cinema, *Donkey Skin*, 7 and 9 p.m., Room 112 Kern.
Sports: basketball (women) vs. Northwestern, 7 p.m.
Color Slide Club meeting, 7:30 p.m., Room 189 Materials Research Lab.

Tuesday, Dec. 18
Pass/Fail.
WPSX-TV documentary series, *Religion in Rural America*, "Go and I'll Be With You," noon, Kern Lobby.
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.
Sports: wrestling w/ Auburn, 8 p.m.

Wednesday, Dec. 19
Drop deadline.
Pass/Fail.
Course repeat deadline.
Prerequisite deadline for Spring Term, 5:45 p.m., (men) 8:10 p.m.
Winter Term recess begins, 9:55 p.m.

Thursday, Dec. 20
Residence Halls close for Winter Term recess, 3 p.m.

Friday, Dec. 21
University offices close for holiday break, 5 p.m.
Offices reopen 8 a.m., Jan. 2.

Saturday, Dec. 22
Sports: football, vs. Tulane, Liberty Bowl Stadium, Memphis, Tenn. 1:30 p.m., ABC-TV.

Seminars

Thursday, Dec. 13
Population Issues Research Center, Jerome H. Wood, Jr., Swarthmore College, on "The Black Latins: Demography and Cultural Tradition," 3:30 p.m., Room 318 Willard (new listing).

Friday, Dec. 14
Analytical Chemistry, A.S. Kertes, Hebrew Univ., on "Microemulsions and Micellar Solubilization, 11:10 a.m., Room 333 Whitmore.

Economics/Institute for Policy Research, Michael Wasylewsky, economics, on "Empirical Models and the Demand for Social Public Goods," 2 p.m., Room 101 Kern.

Monday, Dec. 17
Microbiology, Cell Biology, Biochemistry and Biophysics, Graham Walker, MIT, on "Cellular Responses to DNA Damage," 4 p.m., Room 101 Allhouse.

Computation Center, Daniel I. Bernitt, senior research associate, on "JCL (5 of 6)," 7:30 p.m., Room 112 Walker.

Tuesday, Dec. 18
Surface Science, Al Vannice, chemical engineering, on "Simultaneous Infrared-Kinetic Studies of CO/H₂ Reactions Over

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1320.

Metal Catalysts," 11 a.m., Room 339 Davey.

Organic/Inorganic Chemistry, M. Levin, graduate student, on "Recent Advances in the Mechanism of Ziegler-Natta Catalysts," 12:45 p.m., Room 333 Whitmore.

Math Logic, Andreas Blass, Univ. of Michigan, speaker, 2:20 p.m., Room 106 McAllister.

Biology, Paul K. Strother, Harvard Univ., on "Microbial Diversity in the Precambrian," 4 p.m., Room 105 Ferguson.

Computation Center, Daniel I. Bernitt on "JCL (6 of 6)," 7:30 p.m., Room 112 Walker.

Exhibits

Chambers Gallery: Kenneth R. Beittel, ceramics, through Dec. 19.

HUB Galleries: Zelko Kujundzic, recent paintings; sculpture and ceramics. The Gallery, Dianne Cisel, oil paintings.

Browsing Gallery, Holiday Festival VI exhibit, Arts and Crafts from Around the World, Art Alley, All exhibits through Dec. 19.

Kern Galleries: Janet I. Dougherty, prints and drawings, through Dec. 16; Christmas Crafts from Around the World, through Dec. 17.

Museum of Art: French drawings from European collections (the former Armand Gobie Collection) and Oriental works from the permanent collection, through Dec. 21.

Pattee Library: "Intentions," photographs by four State College photographers, East Corridor Gallery; "Morning," drawings by Rose Shumkas, Lending Services Lobby; Susan McGillvrey, ceramics, University Program, Main Lobby. All exhibits through Dec. 20.

Visual Arts Bldg. Zoller Gallery: Student architectural drawings and models through Dec. 19.

Service Desk: the workplace is sometimes less than frantic

The skies darken ominously as thunder crashes to the west of campus, prompting people outdoors to scurry for cover.

But indoors, at Physical Plant's Service Desk, the employees ready themselves for a deluge of an altogether different nature. "When we hear thunder, we push our paperwork aside and just wait for the phone calls," says Connie Putnam, the Service Desk's lead worker for clerical staff.

In her six years on the job, Ms. Putnam has learned that approaching electrical storms do not bode well for the University's air conditioning systems, computer banks, and scientific research equipment. They can be easily disrupted or damaged by lightning-induced power surges that result in the automatic transfer of power from one electrical transformer to another — a capability designed to avert outages.

When blackouts or brownouts do occur, however, the Service Desk is quick to pinpoint the location and dispatch a repair crew to the scene.

"In our 'bibles' (procedural manuals), we have flow charts showing which buildings are tied in to the various substations on campus," Ms. Putnam explains. "When the calls pour in, we can tell pretty quickly which sub-station is out."

Though electrical storms often spark a flash of activity, the Service Desk's normal workload is anything but slow.

In addition to Ms. Putnam, daytime clerks Thelma Lehr, Barbara Homan and Debbie Hamilton and nighttime clerks Shari Kaiser and Karen McMeen type more than 45,000 "work assignment" forms a year — about \$65 per week on average. These requests for repair, maintenance or assistance for malfunctioning property are generated by 200 to 400 incoming calls per day from all segments of the University community.

"Due to the volume of calls, we started

wearing headsets last winter so we could type work assignments while talking to the caller," Ms. Putnam notes. "We've also computerized parts of our operation, and we now use 'multi-code' work assignment forms, which allow us to use one piece of paper for assigning two or more repair crews to one job. These changes have been necessary to keep up with the load."

Mondays are the busiest day of the week, she says, because returning faculty and staff members and students are most likely to notice problems that may have cropped up over the weekend. Other peak periods follow a holiday or term break, but the most hectic time comes with the return of students for Fall Term.

The majority of calls emanate from the central contact persons in the various colleges and departments, although individuals call the Service Desk, too.

"I don't think I'll ever get to the point where I've heard everything," Ms. Putnam says. "Each day is a new experience — but nothing surprises me any more."

A faculty member reports a temperamental classroom projection screen or a broken lock on an office door. A student calls in about a leaking water faucet or a smashed window in the dormitory. A secretary reports a suspected dead animal lodged in a heating duct or an elevator that appears to be going on the blink.

"Almost everyone on campus is great to deal with," Ms. Putnam observes. "Once in a great while we get someone who's a little hard on us, but we don't have any chronic complainers."

Some of the problems are, of course, more serious than others, and it's the task of the clerks to discern which ones require immediate attention.

"We try to sort out, in our conversation with the caller, just how serious the problem really is," Ms. Putnam says. "While a sink overflowing all over the place may sound serious, it may turn out to be nothing more than a trickling faucet

Mike Doto, supervisor, and Connie Putnam, lead clerical worker, share a typical moment at the service desk.

with the water going down the drain." To respond to emerging problems and to put work assignments in priority for the various trades crews in Maintenance and Operations, the Service Desk sends appropriate members from its dispatch crew to the scene.

Electricians, heating and ventilation technicians, air conditioning and refrigeration technicians, plumbers and locksmiths in the dispatch crew will correct the problem — if it's not too involved. If it is, the crew will inform the

(Continued on page 4)

News in brief

(Continued from page 1)

arroz con pollo from Spain; lamb kebabs from the Near East; rib of beef and Yorkshire pudding from England; *fritto misto de pesce* from Italy; and currant glazed pork bird from Norway.

Side dishes will include potato pancakes with sauer from Israel; rice pilaf from the Near East; broccolini hollandaise and carrots vichy from France; and Pennsylvania mushrooms.

Live entertainment will also be provided.

Bookstore sale is announced

The Penn State Bookstore in McAllister Building will offer its traditional Appreciation Days Sale to faculty, staff and students Dec. 17-21. Sale items at 20 percent off retail will include arts and materials, calendars, clothing, general books, gifts, jewelry, desk lamps and much more.

The sale schedule is as follows: Monday, Dec. 17, 8:30 a.m. to 8 p.m.; Tuesday, Dec. 18, and Wednesday, Dec. 19, 8:30 a.m. to 5:30 p.m.; Thursday, Dec. 20, and Friday, Dec. 21, 8:30 a.m. to 5 p.m.

Blood pressure screenings to be offered weekly

Persons interested in having their blood pressure checked may come to the Penn State Nursing Consultation Center on Thursdays between 2 and 6 p.m. The free service will be available weekly, exclusive of University holidays and term breaks.

The Nursing Consultation Center is located on the first floor of the new Human Development East Nursing Building on College Avenue. For further information, call 863-2200. Consultation between 9 a.m. and noon or 1-4 p.m.

WPSX offers Program Guide

Penn Staters looking for holiday gifts for neighbors and friends can find one that "keeps on giving" at Broadcasting Services in 205 Wagner Building. It's a gift subscription for the *WPSX-TV Program Guide*, which provides complete listings of the Channel 3 schedule along with background articles and viewer's letters. The cost is \$5 for a 12-month subscription. For additional information, call Jean Boyd at 863-0479.

Beittel exhibit continues

An exhibition of the ceramic work of Dr. Kenneth R. Beittel, professor of art education, will continue through Dec. 19 at the Chambers Gallery. Gallery hours are 8 a.m. to 5 p.m. Monday through Friday.

Affirmative Action for the handicapped

Editors note: The following notice has been provided by the University's Affirmative Action Office.

The Pennsylvania State University is a government contractor subject to Section 503 of the Rehabilitation Act of 1973, which requires government contractors to take affirmative action to employ and advance in employment qualified handicapped individuals.

We need your help in assuring compliance with the affirmative action guidelines established in Section 503 of the Rehabilitation Act of 1973. If you have a physical or mental impairment, a record of having had such an impairment, or are regarded as having an impairment that substantially limits your ability to secure, retain or advance in employment, we would like to include you under the Affirmative Action Program.

It will assist us in proper placement and appropriate accommodations if you tell us about (1) any special methods, skills, or procedures which qualify you for jobs that you might not otherwise be able to do because of your handicap, so that you may

Senate

(Continued from page 1)

- d. TO ASSIST THE STUDENT IN CAREER PLANNING.
- e. TO ASSIST THE FRESHMAN ADVISEE IN DEVELOPING A WELL-PLANNED EXPLORATORY PROGRAM TO FACILITATE CHOICE OF MAJOR AND CAREER.
- f. TO BE FAMILIAR WITH PUBLISHED ACADEMIC STANDARDS AND REGULATIONS OF THE UNIVERSITY AND TO MAINTAIN AN UP-TO-DATE ACADEMIC ADVISING REFERENCE FILE.
- g. CONTAINING CURRENT PROGRAM AREA, COLLEGE, AND UNIVERSITY MATERIALS PERTINENT TO ADVISING.
- h. TO ASSIST THE ADVISEE IN PLANNING A SUITABLE SCHEDULE OF CLASSES, AT LEAST ONE TERM IN ADVANCE.
- i. TO ESTABLISH POST, AND MAINTAIN ADEQUATE OFFICE HOURS THROUGHOUT THE TERM WITH PARTICULAR EMPHASIS GIVEN TO ORIENTATION, PREREQUISITE, REGISTRATION AND THE DROP-ADD PERIODS.
- j. TO INFORM THE ADVISEE OF ADVISER'S AND ADVISEE'S RESPONSIBILITIES IN THE ACADEMIC ADVISING PROCESS.
- k. TO KEEP RECORDS OF THE ADVISEE'S PROGRESS, INCLUDING THE PROFILE OF ACADEMIC ABILITIES, ACADEMIC TRANSCRIPT OR GRADE REPORTS, CURRENT STUDENT SCHEDULE, AND PROGRAM CHECK SHEET.
- l. TO DISCUSS WITH THE ADVISEE HIS/HER ACADEMIC PERFORMANCE AND ITS IMPLICATIONS.
- m. TO REFER THE ADVISEE TO APPROPRIATE SOURCES OF INFORMATION AND SERVICES.
- n. RESPONSIBILITIES OF THE ADVISEE
- o. TO OBTAIN A LIST OF THE REQUIREMENTS FOR THE CHOSEN MAJOR FROM THE ADVISOR AND USE IT TO MONITOR PROGRESS TOWARD FULFILLING DEGREE REQUIREMENTS.
- p. TO BE AWARE THAT PRIMARY RESPONSIBILITY FOR SELECTING COURSES AND MEETING DEGREE REQUIREMENTS IS THE ADVISEE'S. THE ADVISOR CAN SUGGEST, RECOMMEND, AND REMIND THE STUDENT OF RULES AND REQUIREMENTS, BUT THE ADVISEE HAS PRIMARY RESPONSIBILITY FOR MEETING PROGRAM AND DEGREE REQUIREMENTS.

- t. TO BE FAMILIAR WITH THE PUBLISHED RULES AND REGULATIONS OF THE UNIVERSITY.
- u. TO DISCUSS WITH THE ADVISOR, HIS/HER ACADEMIC PERFORMANCE AND ITS IMPLICATIONS.
- v. TO FOLLOW UP ON REFERRALS MADE BY THE ADVISOR.

The third recommendation is that "Each College, Academic Department,

Commonwealth Campus, and the Division of Undergraduate Studies be required to develop and provide a formal training program for new advisers; provide appropriate ongoing training for all advisers; and monitor the quality of advising within their respective units. Evaluation reports should be developed within each unit and regularly reported to the Senate and appropriate administrative officials of the University."

In addition, the Senate will hear several informational reports. The report of the Subcommittee on Gifts and Endowments notes that, in the face of scarcer resources for higher education, the Office of Gifts and Endowments can assist faculty members in seeking aid from private sources for their research projects and educational activities. The Office requests only that faculty members cooperate and coordinate their activities through it.

Other informational reports include those of the Committee on Faculty Affairs on "Whether a Faculty Person on a Sabbatical or Leave of Absence Without Pay May Participate in Promotion and Tenure Decisions," the Committee on Planning and Development on grade distribution within the University over the past academic year, and the Committee on Admissions, Records, and Scheduling on special admissions programs.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Practices (PE) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT DIRECTOR FOR UNIVERSITY RELATIONS, Behrend. Responsible to the Director of Behrend College for organizing and conducting a comprehensive University relations program for the entire college including Continuing Education, Public Information and Relations, Gifts and Endowments.

Also: chief communications officer. Bachelor's degree or equivalent, plus two to four years effective experience, preferably involving newspaper and/or journalistic writing or public relations. Relevant higher education experience desirable.

LIBRARY ASSISTANT, Behrend. Responsible to the college librarian for assistance in all phases of library operations, including supervising part-time personnel, overseeing all aspects of the circulation process, instructing students in the use of library facilities, maintaining periodical collection and controlling the operation of the library in the absence of the librarian. Two years of college education and one year of effective experience preferably in library work.

JUNIOR COPY EDITOR — UNIVERSITY PRESS, University Park. Responsible for editing and proofreading a variety of manuscripts in accordance with standard usage, press style, and special requirements of the individual. Clear permissions for use of copyrighted material. Maintain cooperative relations with authors, journal editors, advertising personnel, production department and acquiring editors. Convey information to authors. Clerk for minutes of Congress. Bachelor's degree in arts, sciences, or journalism, or equivalent, with evidence of facility in written expression and from one to two years of effective experience in editorial practices.

MANAGER OF ADMISSIONS OFFICE — COLLEGE OF MEDICINE, Hershey. Responsible to the Associate Hospital Director of Financial Affairs for carrying out the admissions and financial counseling policies of the hospital and for supervision of the Admitting Office. Bachelor's degree in business or equivalency with 2-3 years of effective experience.

PATIENT UNIT COORDINATOR — COLLEGE OF MEDICINE, Hershey. Responsible to the Assistant Hospital Director of Nursing Services or the Assistant Director of Nursing Services as designated for the operation of the patient care unit, including nursing care activities, coordination of patient care services and maintaining acceptable standards of good patient care on a twenty-four hour basis. B.S. in nursing or equivalency, plus three to four years of effective experience and licensed to practice as a registered nurse by the Pennsylvania State Board of Nurse Examiners.

SENIOR INSTRUMENTATION AIDE — COLLEGE OF SCIENCE, University Park. Responsible to the Supervisor, Research Instrument Group, to assist in the design, construction, packing, documentation, and maintenance of instrumentation in the Microbiology Cell Biology, Biochemistry and Biophysics Department

and Chemistry Department. Develop manuals concerning the use of these instruments and general support activities associated with research instrumentation. Associate's degree or its equivalent in electronics plus three to four years of effective experience with scientific instrumentation or electronic components of instrumentation are required. Experience with analytical instruments and a basic knowledge of chemistry, physics and mechanics are highly desirable.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS, Wilkes-Barre Campus. Responsible to the Dean of Student Affairs for the administration and coordination of various functions within the Student Affairs operations at the Wilkes-Barre Campus. Participate in the planning and conduct of Student Affairs programs and services including secondary school relations, student activities, career development, and placement, cultural programs and orientation programs. Master's degree in Counseling, Student Personnel or related field, or equivalent organized study or training, plus over 3 months related experience or bachelor's degree or equivalent study or training with over one year of related experience in areas such as Student Union Programs, Counseling, Recreation, etc.

LIBRARY ASSISTANT, REFERENCE — COLLEGE OF MEDICINE, Hershey. Responsible to the Head Reference Librarian for assistance in the operation and supervision of the Medical Reference Service provided by the Medical Library. Associate's degree or equivalency, plus 1 to 2 years of effective medical library experience.

RESEARCH AIDE — COLLEGE OF AGRICULTURE, University Park. Oversees field work, plan and prepare experiments, gather and record experimental data, and select samples for raw product evaluations. Responsible for evaluation of laboratory tests, and rating of physical factors of samples. Responsible for preparing research samples for analysis, and setting of spectrometric equipment for analysis of research samples for analysis, and setting of spectrometric equipment and for operation of computer terminal in converting instrument readings to analytical data. Check and correct final results of analyses. Combine data from raw product evaluations with analytical results of plant and soil analyses, run statistical analyses, prepare data in proper form for computer analysis. Oversees preparation of tables showing experimental results. High school graduation or its equivalent and over two years of effective experience in laboratory experiments required. Knowledge of chemistry and agriculture helpful.

COORDINATOR, CAMPUS RESIDENTIAL LIFE — Hazleton Campus. Responsible to the Dean of Student Affairs for carrying out specific responsibilities for the Hazleton Hall Program including administration of the Conduct Standards System; selection and supervision of student assistants; developing cultural, social, and educational programs; and counseling of students. Bachelor's degree or equivalent plus at least one to two years of effective experience are required or a master's degree or equivalent in student personnel or related field with three to six months residence hall experience. IT IS CONTINUOUS, 10-MONTH ASSIGNMENT

Service Desk

(Continued from page 3)

Service Desk so the problem can be assigned to the appropriate M&O crew by Service Desk Supervisor Michael Doto or by Scheduler-Planner Thomas Rodkey.

Mr. Doto and Mr. Rodkey make their priority and routine work assignments only after consulting with Estimator-Inspectors Robert Bloom and Lee Wingard, whose role is to determine the time and work involved in correcting a problem. Mr. Bloom and Mr. Wingard also make random checks of problems afterwards to ensure the assignments have been properly handled and to standards.

Much of the Service Desk's work requires a grasp of technical language. Supervisor Doto points out, "Most of the clerks have had to learn a whole new vocabulary to do their jobs. Since they talk to trades supervisors, maintenance and preventive maintenance crews, they have to know what things like 'capping off a gas line' and 'absorption equipment' really mean."

"It's a fast-paced office and the paperwork is unbelievable," Ms. Putnam interjects. "But if I didn't like it, I wouldn't be here."

"It has its rewards," she adds. "The Service Desk is one of the focal points of the University because it's tied to everything. And it's very satisfying to help someone with a problem; nine times out of ten, that person will call back to thank me."

With all those problem-plagued people calling 865-4731 for the check, does Ms. Putnam have the impression that the University's physical plant is continually falling apart?

"No," she says. "It seems like we're holding it together."

Penn State Intercom

News in Brief

Research proposals asked

Faculty from all University campuses are invited to submit proposals to the Penn State 1980-81 Research Initiation Grants Program, established to support research and other creative work in the sciences, technology, social sciences, and arts and humanities. The RIG Program is limited to new faculty on standing appointments and with a service accumulation of two calendar years or less by September 1980.

The 12-month awards will range from \$2,000 to \$5,000 and will be announced following a preliminary screening by the colleges and final recommendations from a subcommittee of the Administrative Committee on Research (ACOR).

Faculty desiring further information should call their ACOR representatives or Commonwealth Campus directors. The proposal deadline is Monday, Jan. 21, 1980; awards will be announced by Feb. 15, 1980.

Holiday recreation schedule

The College of Health, Physical Education and Recreation has announced a holiday recess schedule for five facilities at University Park.

Rec Hall will be closed on Dec. 25 and Jan. 1, but will follow regular hours from Dec. 21-23 and Dec. 26-30. It will be open from 8 a.m. to 5 p.m. on Dec. 24 and Dec. 31.

The Natatorium will be open from noon to 2 p.m. and from 4 to 6 p.m. through Dec. 21 and Dec. 26-28, resuming its normal schedule on Jan. 2.

Although the pool at White Building will be closed from Dec. 20 to Jan. 2, the gym facilities will be open from 8 a.m. to 5 p.m. on Dec. 20 and 21. White will resume its normal schedule at 5 p.m. on Jan. 2.

The Intramural Building will close from Dec. 21 to Jan. 1. The normal schedule resumes at 8 a.m. on Jan. 2.

The Pavilion (Ice Skating) will be closed Dec. 25 and Jan. 1 but will follow regular hours Dec. 20-23. It also will be open from 1:30 to 4 p.m. on Dec. 24 and Dec. 31. In addition, it will be open from 1:30 to 4 p.m. and from 7:30 to 10 p.m. Dec. 26-30 and Jan. 2.

Fred Waring workshop to be given at Penn State

The Fred Waring Music Workshop, which has enrolled more than 30,000 students in its 33-year history, will move to University Park for the summer of 1980.

Announcement of the new association was made this week by Mr. Waring and Dean Walter H. Walters, of the College of Arts and Architecture. The workshop will be conducted by Mr. Waring and his staff and will offer credit through the University's School of Music.

Three two-week sessions in choral singing and a fourth session in choreography and movement for show choirs and choruses are scheduled. Highlighting each of the singing sessions will be two public performances by the participants, under the direction of Mr. Waring, a Penn State alumnus.

His musical career spans more than six decades and achieved for him an international reputation as a showman. With the "Pennsylvanians," a group of professional singers and instrumentalists, he has toured extensively, performed

regularly on both radio and television, made many recordings and mounted several successful Broadway shows.

In this decade the "Pennsylvanians" have become the "Young Pennsylvanians." These approximately three dozen youthful musicians will be in residence with Mr. Waring and his teaching team for the Penn State workshop.

We'll see you next year

INTERCOM's staff wishes its readers a happy holiday. Our next issue will appear on Thursday, Jan. 10.

Winter art classes offered

Registrations will once again be accepted for the Saturday Morning Art School of the School of Visual Arts.

Thirteen courses will be offered, and interested persons should call Ruth Barner, art education secretary, at 865-6570 on either Thursday or Friday, Jan. 3-4.

Theatre festival will be held Jan. 23-27

The Region II Conference of the Twelfth Annual American College Theatre Festival will be held at the University Jan. 23-27, in cooperation with the Department of Theatre and Film.

The conference features competitions for complete university theatre

productions and individual actors' monologues. Also scheduled are workshops on various theatrical subjects.

Winners of the competitions will compete in the national finals in Washington, D.C., for prizes and scholarships.

Registration for all events is open to the public. For more information, phone John Bayless, coordinator of the Festival, at 863-0381.

New honor society formed

Golden Key National Honor Society, an academic honorary for junior and senior undergraduates, has been approved as a student organization at Penn State.

Juniors and seniors who have maintained a minimum of a 3.4 cumulative grade-point average will be invited to join the society and attend a reception in their honor on Tuesday, Feb. 5, in the HUB Ballroom.

Two scholarships will be awarded to the outstanding junior and senior members. Certificates of recognition will be presented to all members.

In addition, an award to an outstanding faculty member, based on class instruction, student interest and research will be presented.

Golden Key was founded by a group of students who felt a void existed in the recognition of many academically superior students whose commitments to study and/or jobs restricts their eligibility for membership in other honor societies.

Energy Committee approves some holiday exemptions

At its December meeting, the University's Executive Energy Conservation Committee acted on approximately two-dozen requests for exemptions to the policy of holding building temperatures to 55 degrees during the holiday break.

"Some requests were approved," said Ralph E. Zilly, vice president for business and chairman of the committee, "and a few were denied, either because of lack of supporting information or what the committee perceived as lack of merit."

Some requests will be accommodated by allocating space heaters for the areas in use rather than by turning on building heat for a lone occupant, he added.

"We apologize for the inconveniences, but we must emphasize that Penn State is faced with skyrocketing energy costs and we will take every step available to conserve," he said.

On another matter, members discussed steps which could be taken to work with the University Libraries to ease overcrowding in the libraries.

In an effort to save energy, custodians have been closing classrooms when not in use, explained J. Carroll Dean, manager of energy conservation programs at the University. One result has been that students who were using vacant classrooms for study have turned to the library for study space.

A possible solution to library overcrowding might be to open one designated study room in classroom buildings, he noted.

In other matters, Mr. Dean announced that 73 percent of buildings at University Park now have posted certificates of compliance with the regulations of President Carter's Emergency Energy Conservation Plan.

Mr. Dean also commented on a problem that has been noted with idling University vehicles. Apparently, some persons are starting University vehicles on cold mornings and letting them warm up for 10 to 15 minutes before using them.

"This is an obvious waste of gasoline," he noted, "and is not something we would do with our own cars." He urged cooperation in minimizing consumption of gasoline provided by the University.

90,896 enrolled in Cont. Ed.

A record 90,896 students were enrolled in non-credit courses conducted through Continuing Education during 1978-79.

This represents the ninth consecutive year that enrollment for the non-credit courses has set a record. The programs, including conferences, workshops and seminars, were held at more than 200 locations in the Commonwealth.

Last year, 80,960 students were enrolled in the non-credit programs.

Total individual enrollment in all continuing education courses was 132,081 at 232 locations, the highest in five years. Enrollment in credit courses was 25,451, and active student enrollment in independent study by correspondence was 15,834.

"One of the other important aspects of this year's result is the increase in the number of full-time University faculty members teaching Continuing Education courses," Vice President Floyd B. Fischer said. "More than 1,600 faculty members taught Continuing Education courses during the year."

Drawing by Publications designer Larry Kresco

Penn Staters

Dr. John A. Waldhausen, professor and chairman of surgery at Hershey, has been elected as a Governor of the American College of Surgeons for a three-year term expiring in 1982.

David L. Young, professor and head of landscape architecture, has been elected a Fellow of the American Society of Landscape Architects (ASLA). One of 10 Fellows elected annually, Prof. Young has been cited by the organization for excellence in works of landscape architecture, outstanding public and academic work, professional publication and service to the Society. He is one of 163 Fellows representing 43 chapters of the national organization.

Dr. Howard E. Morgan, Evan Pugh Professor and chairman of physiology at Hershey, has been invited to serve on the National Heart, Lung and Blood Advisory Council of the National Institutes of Health for a term expiring in 1983.

Dr. J. William Holl, professor of aerospace engineering, has been named as a distinguished graduate of the Mechanical and Industrial Engineering Department at the University of Illinois at Urbana-Champaign. He will receive his award from the Department's alumni association in April.

Paul West, professor of English and comparative literature and IAHHS Fellow, has received an award in creative writing (fiction) from the National Endowment for the Arts. West's forthcoming novel, from Harper and Row in August 1980, is entitled *The Very Rich Hours of Count von Stauffenberg*, and deals with the July 20, 1944, bomb-plot on Hitler. The book will also be published in Spanish by Editorial Bruguera, Barcelona, also in 1980.

Dr. Roger Ware, associate professor of mathematics, presented a talk Dec. 6 at the University of Oklahoma entitled "Quadratic Forms, Galois Theory, and Rigid Fields".

Dr. Leon R. Kneebone, professor emeritus of botany and plant pathology, has become the first American elected to honorary membership in the International Society of Mushroom Science. The Society, based in Horst, Holland, has only four honorary memberships.

Dr. J. Cordell Hatch, professor of agricultural communications and coordinator of Extension Radio-Television-Audiovisual Services, has been elected national president of Epsilon Sigma Phi, honorary fraternity for Cooperative Extension Service workers in the United States and abroad. Elected at the fraternity's annual meeting recently in Washington, DC, Dr. Hatch will serve a two-year term which extends through November 1981.

Dr. James J. Reuther, assistant professor of fuel science, recently delivered invited lectures at colloquia sponsored by Sigma Xi and the Departments of Chemistry at SU-Cheon and SUNY-Binghamton. At the former, he discussed "Fuel Science Research Related to National Energy Needs" and at the latter, "Combustion Physico-Chemistry of Gaseous and Liquid Coal-Derived Synfuels."

Bookshelf

Dr. Theodore L. Gross, provost/dean, the Capitol Campus, is the author of *Academic Turmoil: The Reality and Promise of Open Education*, published recently by The Anchor Press/Doubleday and Co.

As dean of humanities and vice president for institutional advancement at The City College of New York, Dr. Gross was a pivotal figure in the open admissions program. His book presents the "reality" of the program and then recommends solutions to the thorny problems involved

in bridging open admissions and academic excellence.

Dr. A. W. Rose, professor of geochemistry, is a co-author of *Geochemistry in Mineral Exploration*, second edition, just published by Academic Press, London.

Since many advances have occurred in the geochemistry of mineral exploration since the first edition of the book was published in 1962, the original text has been extensively revised and updated.

Promotions

Faculty

Barbara L. Bleau to assistant professor of mathematics at the Capitol Campus.

Staff Exempt

Susan M. Jones to senior staff nurse at Hershey.

Joseph A. Kemp to manager, maintenance & utility operations at Capitol.

Jeune G. Kilian to budget & personnel officer in Business Services.

Kathleen Lavery to cooperative education specialist at Capitol.

Karen E. McKinley to patient unit coordinator at Hershey.

Clerical

Sharon L. Imboden to secretary B at Hershey.

Margaret C. Krumrine to correspondence typist A in Health, Physical Education and Recreation.

Marisa McMillan to secretary C in Human Development.

Suzanne D. Sinclair to secretary B in Science.

Jean Smith to secretary B in Intercollege Research Programs.

Lu Ann Weatherholtz to secretary C in Agriculture.

Technical Service

M. William Fink to group leader, janitorial in Applied Research Laboratory.

Charles E. Gearhart to tunnel operator/assistant model mechanic in Applied Research Laboratory.

Earl J. Pennington to television production assistant in Continuing Education.

Mike D. Tepsic to electrician A in Physical Plant.

Retirements

Nelson F. Wood, assistant professor of engineering research at the Applied Research Laboratory, will retire on Jan. 1 after 32 years of service with the University.

He came to Penn State in 1948 as an assistant in engineering research at the Ordnance Research Laboratory. In 1951, he was promoted to research associate in product engineering and was appointed as assistant professor.

He has been involved in various research projects related to the design and testing of underwater devices during most of his career. He holds a bachelor's degree in industrial arts from Massachusetts State College.

He and his wife, Jane, plan to remain in the State College area. Their two children, Peter and Carol, are Penn State graduates.

Theresa A. Fike, a secretary in the College of Earth and Mineral Sciences, will retire Jan. 1 after 36 years of service with the University.

Ms. Fike began work at the University in October 1943, as a secretary in the College of Agriculture. From there, she transferred to the College of Science, and then joined the staff in the College of Earth and Mineral Sciences in 1948 as a secretary in the Department of Continuing Education. Another transfer in 1977 took her to the Department of Mineral Engineering, where she has worked for the past two years.

Ms. Fike lives in Bellefonte with her mother.

Miriam Lewis, the first full-time staff member at WPXS-TV, is also its first employee to retire.

Ms. Lewis, secretary to the director of Broadcasting Services, will step down on Jan. 2, 1980, after 22 years of service at the University. She joined the Penn State staff in 1957 as a keypunch operator in data processing. In 1964, she became a secretary in Broadcasting, where she has worked for the past 15 years.

Ms. Lewis has lived in State College for 15 years. She is the mother of two children and five grandchildren.

Dorcas J. Wilkinson, a secretary in Continuing Education at the McKeesport Campus, will retire on Jan. 1. She joined the McKeesport staff Oct. 1, 1966.

Obituaries

W. Timothy Foley, an assistant professor in the Department of Anesthesia at the Hershey Medical Center, died Dec. 5 at the age of 38. Dr. Foley joined the faculty in 1975. He had earned his B.S. at Xavier University in Cincinnati, and his M.D. at Cincinnati College of Medicine.

Floyd Gahman, an associate professor of art at the Osgontz Campus when he retired in 1960, died Nov. 1 at the age of 85. Mr. Gahman, who joined the Osgontz faculty in 1948, held a B.S. degree from Columbia University and an M.A. from Teacher's College, Columbia.

Dr. Francis E. Hyslop, professor emeritus of art history, died Dec. 13. He was 69.

A member of the faculty from 1934 to 1974, Dr. Hyslop initiated the arrangements which resulted in Heinz Warneke carving the Nittany Lion. He also played a prominent role in arranging for the painting of the Land Grant frescoes in Old Main and in expanding the University's collection of art.

Dr. Hyslop received his undergraduate and graduate training at Princeton University. The author of numerous articles, he co-authored several books on Baudelaire with his wife, Lois Bee Hyslop, professor emerita of Romance languages. His most recent book, published in 1975 by Penn State's Press, was *Henri Evenspoel*.

Rebecca M. Kelly, a residence hall worker with Housing and Food Services since 1969, died Dec. 11. A Phillipsburg, PA, native, she was 58 years of age.

Fred P. Spannuth, a former food supervisor with Housing and Food Services, died Dec. 12. He was 76. Mr. Spannuth, who was born in Frysytown, PA, joined the University's staff in 1953 and retired in 1967.

OGE can help faculty locate funding sources

Editor's note: The following report, prepared by the Subcommittee on Gifts and Endowments of the Committee on Planning and Development, was presented at the Dec. 18 Senate meeting.

While inflation and relatively decreased state support reduce University resources, there are funds that the faculty can seek in the form of gifts from private, non-governmental sources. Moreover, these funds are substantial. For example, over \$10,000,000 was given the University during the past fiscal year. This sum came in the form of 42,000 gifts from alumni, friends, corporations, foundations, businesses, and societies. Ninety-five percent of all gifts received were donor-designated in response to specific proposals or solicitation. Ninety percent of the 42,000 gifts were processed through the Office of Gifts and Endowments.

The Office of Gifts and Endowments exists to encourage private aid to support and expand various University efforts, such as scholarships, equipment funds, faculty research grants, and other worthwhile projects. This Office can help faculty locate likely sources of support by identifying societies, foundations or philanthropic organizations with interests similar to theirs. Furthermore, the Office of Gifts and Endowments can assist in the preparation of proposals for potential donors. To this end, the Office has prepared a document entitled *Guide to Seeking Private Gifts* which spells out the steps in approaching donors. The Office can inform applicants of a prospective donor's past contributions so that potential embarrassment or resentment does not occur. Finally, the Office attempts to coordinate efforts for funding in order to avoid duplicative requests and situations where a faculty member could inadvertently make a call on the heels of another Penn State party.

Cooperatively, the faculty and the Office of Gifts and Endowments can help each other. The faculty generate research projects and recognize educational needs that may be unaware of potential resources. If these projects or needs were developed as proposals and the advice of the Office of Gifts and Endowments sought, many might be funded. While this emphasizes how the Office of Gifts and Endowments can assist the faculty, the faculty can assist the Office. Faculty members may have personal contact with potential donors through former students. For example, many of our graduates work for corporations which match employee educational donations. A list of such organizations is available from the Office of Gifts and Endowments. Departments maintaining job placement and current address records on their alumni can provide this information to the Office of Gifts and Endowments. In turn, the Office can inform the alumni of their company's policy, thereby doubling their contribution.

In doing the faculty is well aware of the need for increased monies for research and other educational activities. In our quest for quality in the face of decreasing governmental support, the Office of Gifts and Endowments can assist faculty in seeking resources for their projects. The Office only requests that faculty members cooperate and coordinate their activities with that Office. It is only through a strong, cooperative effort that private gifts to Penn State will be maximized and the University realize the support necessary to maintain quality programs in a future of scarce resources.

University Park Calendar

Dec. 20-Jan. 10 Special Events

Thursday, Dec. 20
Residence Halls close for Winter Term recess, 3 p.m.

Friday, Dec. 21
University offices close for holiday break, 5 p.m. Offices reopen, 8 a.m., Jan. 2.

Saturday, Dec. 22
Sports: football, vs. Tulane, Liberty Bowl Stadium, Memphis, Tenn. Preview show, 1:30 p.m.; kickoff, 2:30 p.m. (Eastern time), ABC-TV.

Wednesday, Jan. 2
Residence Halls open after Winter Term recess, 10 a.m.

Thursday, Jan. 3
Winter Term classes resume, 8 a.m.
France-Cinema, *Love on the Run*, 7 and 9 p.m., Room 112 Kern.
Sports: basketball (men) vs. Ursinus, 8:10 p.m.

Friday, Jan. 4
Last date for written foreign language examinations (other than French and Spanish) for advanced degree candidates.
Deadline for applying for Graduate School Tuition Grant-in-Aid for Spring Term.
Commonplace Theatre, *Rock and Roll Highschool*, 7 and 9 p.m., Room 112 Kern.
Sports: basketball (women), Penn State Invitational, 7 p.m.

Saturday, Jan. 5
Last date for March graduates to deliver doctoral theses to committees.
Sports: basketball (women), Penn State Invitational, 1 p.m.; gymnastics (men) vs. Illinois/Chicago Circle, 8 p.m.
France-Cinema, *Love on the Run*, 7 and 9 p.m., Room 112 Kern.

Artist Series: William Windom in *Thurber II*, 8:30 p.m., Schwab.

Sunday, Jan. 6
University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Theodore E. Kiffer, humanities and director, General Education Program, speaker.

HUB Craft Center winter session craft classes begin.

Sports: wrestling vs. Oklahoma, 2 p.m.; basketball (women) vs. Southern Cal, 7 p.m.

Opening Reception for Wirth McCoy exhibit, 3 p.m., Museum of Art.

Commonplace Theatre, *Rock and Roll Highschool*, 7 and 9 p.m., Room 112 Kern.

Monday, Jan. 7
Audio-Visual Services, Connections film series, "Faith in Numbers," 12:45 p.m., Room 112 Kern.

Shakespeare videotape, BBC, *Romeo and Juliet*, 6:30 p.m., Room 101 Chambers.

France-Cinema, *Love on the Run*, 7 and 9 p.m., Room 112 Kern.
Interdisciplinary Symposium on Value, 7:30

Giovanni Battista Van der Meer's "Holy Family with St. John" is currently on exhibit at The Museum of Art.

p.m., Room 101 Kern. Joseph Flay, philosophy, on "Values and the Family: Autonomy, Socialization and Development of the Self."

Tuesday, Jan. 8
WPSS-TV documentary series, *Religion in Rural America*, "Separate Realities," noon, Kern Lobby.

Comp. Lit. Luncheon, 12:15; talk, 1 p.m. Hotel State College. Christine P. Makward, French, on "Sex and Text: A Very French Variation."

School of Music Common Hour, student performances, 4 p.m., Music Bldg. Recital Hall.

Comp. Lit. Film Series, Victor Erice, *The Spirit of the Beehive*, 7 and 9 p.m., Room 112 Kern.

Thursday, Jan. 10
STS/Two Cultures Dialogue on "Technology Assessment and Risk Analysis," lunch, noon; presentation, 12:20 p.m., Room 101 Kern.

Robert Friedman, political science, on "Aggregation of Risk Perception: From Individual to Social Dimensions."

Brown Bag Performing Arts Hour, 12:30 p.m., HUB Assembly Hall. Jack McManis, English, reads poetry.

Penn State Dames meeting, 7:30 p.m., Room 101 Kern.

Colloquy Lecture, 8 p.m., Eisenhower Auditorium. William Sullivan, former U.S. Ambassador to Iran, Laos and the Philippines, speaker.

Seminars

Thursday, Jan. 3
Chemistry, Brice Bosnich, Univ. of Toronto, on "Asymmetric Synthesis - Asymmetric Catalytic Hydrogenation in the Production of Amino Acids," 12:45 p.m., Room 333 Whitmore.

Physics, Walter Johnson, Notre Dame, on "Relativistic Effects in Atoms," 3:55 p.m., Room 445 Davey.

Friday, Jan. 4
Analytical Chemistry, John Stuhl, grad student, on "Macrocyclic Compounds in Chemical

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Analysis," 11:10 a.m., Room 333 Whitmore.
Physical Chemistry, Dan Konawalow, SUNY/Binghamton, on "Laser Prospects, Structure and Spectra of Alkali Diatomic Molecules," 2:30 p.m., Room 333 Whitmore.

Tuesday, Jan. 8
Organic/Inorganic Chemistry, P. Suszko, grad student, on "The Development of New Polymer Supported Catalysis," 12:45 p.m., Room 333 Whitmore.

Geosciences, George Brindley, geosciences, on "Problems and Progress in the Study of Layer Silicates," 3:45 p.m., Room 26 Mineral Sciences.

Organic/Inorganic Chemistry, Steve Ittel, DuPont, on "Metal Vapor Synthesis as a Route to New Organotin Compounds: Ironing Out Organic Chemistry," 8 p.m., Room 333 Whitmore.

Wednesday, Jan. 9
Chemistry, Kendall N. Houk, Louisiana State Univ., on "Experimental and Theoretical Insights into Cycloaddition Mechanisms," 4 p.m., Room 333 Whitmore.

Thursday, Jan. 10
Chemistry, Philip M. Johnson, SUNY/Stony Brook, on "Molecular Multiphoton Ionization Spectroscopy," 12:45 p.m., Room 333 Whitmore.

Physics, E. Fagen, Univ. of Delaware, on "Applications of Solid State Physics to Energy Problems," 3:55 p.m., Room 333 Whitmore.

Philosophy, Walter Schmid, Univ. of North Carolina, on "Eros and Sophrosyne in Plato's *Charmides*," 4 p.m., Room 167 Willard.

Habitats

HUB Galleries: Traveling print exhibit, opens Jan. 3. The Gallery, Nancy Straley, prints and drawings, opens Jan. 5. Browning Gallery, John Caroline, stained glass, and Ukrainian cultural exhibit, opens Jan. 3; Central Pa. Scholastic Art Award exhibit, opens Jan. 13, Art Alley.

Kern Galleries: Mary Keithman, paintings, and Marty Tyllman, ceramic constructions, opens Jan. 3. Penn State Film Follies posters, opens Jan. 20.

Museum of Art: French drawings from European collections (the former Armand Gobiet Collection) and Oriental works from the permanent collection, both through Dec. 21. Wirth McCoy, recent paintings, opens Jan. 6. Sculpture from the permanent collection and Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager, opens Jan. 13.

Pattee Library: C.U.P. (Ceramics, University Program) by Susan McGilvrey, through Dec. 21, Main Lobby.

Visual Arts Bldg. Zoller Gallery: Graduate Student Show, opens Jan. 6.

Staff Vacancies

The following vacancies for positions classified as staff (employee or staff nonemployee) have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 863-1287 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Jan. 4, 1986. **DON'T CONTACT THE AREA THAT HAS THE VACANCY.**

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or veteran.

CLINICAL PSYCHOLOGIST, STUDENT ADMINISTRATIVE SERVICES - University Park Responsible to the Director of the Mental Health Center for providing mental health services for students of the University. Ph.D. in clinical or counseling psychology or equivalent training, including a one year APA approved internship, or master's degree in clinical or counseling psychology or equivalent training, plus a minimum of three to four years of applicable clinical experience. Nine-month position.

CLINICAL PSYCHOLOGIST, STUDENT ADMINISTRATIVE SERVICES - University Park Responsible to the Director of the Mental Health Center for providing mental health services for students of the University. Ph.D. in clinical counseling

psychology or equivalent training, including a one year APA approved internship, or master's degree in clinical or counseling psychology or equivalent training, plus a minimum of three to four years of applicable clinical experience.

NURSE PRACTITIONER-GYNECOLOGY, STUDENT ADMINISTRATIVE SERVICES - University Park Responsible to the Director of Nursing Services for providing gynecological problems to a staff physician. Graduate of an accredited school of nursing or its equivalent, and a current Pennsylvania license, plus one to two years of effective experience and a graduate of a family planning nurse practitioner program.

UNIVERSITY PSYCHIATRIST-STUDENT ADMINISTRATIVE SERVICES - University Park Responsible to the Director, Mental Health Center, for providing psychiatric and neuropsychological, limited therapy, and provide consultation services to various departments and agencies of the University. Medical doctor's degree required, with postgraduate training in psychiatry and neurology. Five to seven years effective experience required in psychiatry.

ASSISTANT HERDSMAN - BEEF - COLLEGE OF AGRICULTURE, University Park Oversees the feeding, watering and general care and maintenance of animals and livestock area by supervising the mixing of feed, bedding of pen areas and cleaning. Determine modification in feeding rates and management practices in accordance with individual animal performance. Responsible for maintaining daily records, maintenance of health programs: attend animals at parturition and new-born animals, treat and

refer sick animals to veterinarian and administer proper preventative health programs. Assist in judging training sessions, contests, demonstrations and lectures. Answer owners' and breeders' questions pertaining to livestock management. Explain research projects and teaching programs in progress. Supervise and train student-trainee helpers. An associate's degree in animal science, plus one to two years of effective experience.

ASSISTANT HOUSEKEEPING SUPERVISOR - HUSBING & FOOD SERVICES, University Park Responsible for administering and coordinating housekeeping operational functions in a specified residence hall. Coordinate the activities of employees. inspect work being performed, inspect area and recommend changes in routine. High school graduate plus one to two years of related experience.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Funding Sources

For further information, call 865-1372 (Network 8-475-1372)

(329-1) Development in Science Education (DISE) projects are funded by NSF to originate, develop and experiment with new ideas to improve science education aimed at a level or group of people. Current areas being emphasized include: Early adolescent: women, minorities and physically handicapped; science literacy, education for productivity; and technology for science education. Preliminary proposals are required. There are no deadlines but proposals to award date required 7 to 9 months. (Ref. SE-60-6)

(329-2) Research Equipment for Two- and Four-Year Colleges is funded by NSF for undergraduate programs in natural and social sciences, mathematics, and engineering that do not award doctorates in those fields (or fewer than 40 in the past 2 years). About 200 awards will be made in FY 1986 from a \$3,250,000 budget.

Proposals require 6 to 9 months for processing. Contact Dr. Howard Hines at (202)-632-5896. (Ref. NSF Bulletin, Dec. 1979)

Penn State Intercom

Marian Hammond, left, uses food models as a dietary assessment tool. At right, Center Director Christine Lewis.

Free, individualized nutrition aid is available to Penn State employees

If you want a reliable answer to a nutrition-related question or need counseling for a nutrition-related problem, the University provides two services that can help.

The Nutrition Information and Resource Center, located in Benedict House, specializes in sorting fact from fancy. Its staff members and volunteers answer nutrition-related questions over the phone or by letter; if necessary, they'll refer the question to another nutrition professional, agency, or resource for the answer.

The Nutrition Clinic and Consultation Service, with its main office in Ritenour Health Center and a branch office in Benedict House, offers counseling for persons who want to evaluate their diets or readjust their eating patterns to help control a medical problem. In many instances, clients are referred to the Clinic by their physicians.

Both the Center and the Clinic are operated by the Nutrition Program in the

College of Human Development, and their services are free to students, faculty and staff members and the community.

"About half our time is spent answering telephone requests and letters — some of which have come from as far away as Australia," says Christine Lewis, instructor in nutrition and director of the Nutrition Information and Resource Center.

"Our typical client needs a place to turn to for general but accurate nutrition information, and we try to function as that reliable source," Ms. Lewis continues. "Nutrition is a field full of controversy and — as it seems to many — contradictions. At the Center, we have no axes to grind; we try to give a balanced answer, and we base it on up-to-date, scientifically solid research."

"For instance, a person calling to ask if vitamin C supplements can increase the lifespan would be informed that the

literature in the field shows no proof for that claim."

The calls and letters arrive with ever-increasing frequency. For the year ending June 30, 1979, the Center received 1,056 requests for information, a two-fold increase since its inception in 1974 as part of the Nutrition Education Project, under the direction of Dr. Helen A. Guthrie, professor and head of the nutrition program.

Questioners have many concerns: Is it safe to feed honey to infants? What foods are high in fiber? What's the calcium content of State College's water? How long can leftover spaghetti be kept in the refrigerator? Is nutrient fortification of snack foods a good idea? Can caffeine cause acne? How many calories does ice cream contain? Is there evidence that people of Scandinavian descent have adverse reactions to pineapple? (In case

(Continued on page 4)

Kilowatt buying down in 1978-79

Despite heavier use of facilities and more building space to heat, the University Park campus purchased fewer kilowatt hours of electricity in 1978-79 than it did during 1972-73.

That's one finding from a six-year review of energy consumption at Penn State conducted by the University's Executive Energy Conservation Committee.

"Nearly 105.8 million kilowatt hours of energy were purchased during 1978-79," according to J. Carroll Dean, manager of energy conservation programs. "That compares to 106.1 million hours purchased in 1972-73."

"On the surface, that may not seem to be a significant reduction, but it is when you consider that the square footage of building space here has increased 7.1 percent since 1972 and that full-time student enrollment is up 11.3 percent over that same time span."

The reduction in energy purchased was also noted despite the fact that the winter of 1978-79 was judged to be 13.7 percent more severe than the winter of 1972-73 as measured by the number of heating degree days.

"I believe the reduction is due to improvements in the ability of building systems to operate more efficiently," Mr. Dean comments, "and also to an increase in public awareness of the energy problem, although we have far to go in that department."

"The committee members feel that the majority of University employees and students have not made a personal commitment to conserve energy for the benefit of the University," he adds.

"Should such a change in attitude occur, the amount of energy saved could conceivably double."

Although conservation efforts appear to be making headway, the survey notes that energy costs have climbed from approximately \$2.13 million at University Park in 1972-73 to \$5.88 million in 1978-79.

"And the '78-79 figure is about \$542,000 above the amount we spent the year before," Mr. Dean adds.

News in Brief

W-2 Forms will arrive in interdepartmental mail

During the week of Jan. 14, W-2 Forms will be mailed, for the first time, through the interdepartmental mail system to employees who have a campus mailing address and who were on the payroll as of Dec. 31, 1979.

The Department of Accounting Operations requests all members of the staff involved in this routing to cooperate in getting this important information to the recipients. Any undeliverable W-2 Forms should be returned to Accounting Operations, Room 302 Shields Building as soon as possible.

Games classes begin Jan. 15

A children's games and educational gymnastics class will be conducted Winter Term. Undergraduate elementary and physical education majors will be teaching the children basic movement skills through

games and use of gymnastic equipment. The classes are open to children from kindergarten through fourth grade.

Classes begin Tuesday, Jan. 15, and continue weekly through Feb. 19 from 4 to 5 p.m. in the North Gym of White Building.

Registration will take place at the beginning of the first class.

Faculty Women's Club to hold mid-winter coffee

The Faculty Women's Club will hold a "mid-winter coffee" from 9:30 to 11 a.m. Saturday, Jan. 19, in the Eisenhower Chapel lounge. The event will honor the spouses of University Trustees, who will be meeting at University Park that day. Reservations, due by Jan. 12, may be made by phoning chairwoman Jane Ziegler at 237-7931 or co-chairwoman Rosemary Hagen at 238-5287.

Drama classes have openings

Parents may still enroll their children in two drama courses being offered by the Department of Theatre and Film on Mondays and Wednesdays during the Winter Term. Classes conclude on Feb. 20.

The first class, for children in morning kindergarten, will be held from 2:30 to 3:15 p.m. The second class for children in the fifth and sixth grades will be held from 3:45 to 4:45 p.m. Both classes meet in the Pavilion Theatre.

Conducted by University students training to be creative drama leaders, the courses help children learn to develop characters in dramatic situations and to create improvisations and dramatic adventures.

To register, parents should phone the Department of Theatre and Film, 865-7586. There is no charge for the courses, which are supervised by Dr. Helen Manfull, coordinator of children's theatre and creative drama for the Department of Theatre and Film.

Advising proposal draws criticism

Near unanimous opposition was voiced at the Dec. 18 University Faculty Senate meeting to a proposal from the Subcommittee on the Role of the Adviser that "University policy on promotion and tenure (PS-23) be modified to include academic advising as a systematic and important area of faculty responsibility and one which will be evaluated in relationship to promotion and the granting of tenure."

Senator Irwin Feller summed up a number of the objections to the proposal, noting that a "checklist mentality" is developing at the University in regard to PS-23. Dr. Feller warned that the Senate is putting itself in the position of incorporating every desirable action on the part of faculty members into PS-23. He added that if incentives are necessary to improve advising, it might be better to offer such inducements as reduced

Penn Staters

Dr. Robert M. Barnoff, professor of civil engineering, has been appointed head of the Department of Civil Engineering. He will replace Dr. Raymond E. Untrauer, who resigned his administrative duties to return to full-time teaching and research.

Prof. Barnoff joined the Penn State faculty in 1955 as an instructor. He was promoted to assistant professor in 1957, to associate professor in 1964, and to professor in 1970.

He received his B.S. and M.S. from the University in 1951 and 1956, respectively, and was awarded a Ph.D. in 1966 by the Carnegie Institute of Technology.

Prof. Barnoff has taught both undergraduate and graduate courses. He supervises an average of one master's thesis a term. The author and co-author of several technical articles, Dr. Barnoff is a Fellow of the American Society of Civil Engineering. He is chairman of a Transportation Research Board Committee and is past chairman of an American Concrete Institute Committee.

Dr. Thomas G. Fox, dean of faculty at the Behrend College, has resigned his administrative post to return to teaching and research, effective Sept. 1, 1980.

In making this announcement, President Oswald said that Dr. Fox will do his teaching and research in the Department of Economics at University Park.

Dr. Oswald expressed his gratitude to Dean Fox, a member of the Penn State faculty since 1966, for his "dedication to his dual responsibilities at Behrend College," adding:

"During his five years of service at Behrend, Dean Fox has added to and strengthened the College's academic offerings in its four-year program."

As dean of faculty, Dr. Fox is responsible for the planning, implementation and evaluation of programs of resident instruction, continuing education and research.

Dr. Oswald said a committee will be appointed in the near future to search for a replacement.

Dr. Don N. Page, assistant professor of physics, presented invited seminars at the University of Chicago and Princeton University. At the former institution, he discussed "Gravitational Instantons, Green's Functions, and Spacetime Foam" and "Is Black Hole Evaporation Predictable?" He spoke at Princeton on "Particle Propagation in Spacetime Foam."

Dr. Emily Tolt, assistant professor of English, has been elected to a five-year term on the Executive Committee of the Modern Language Association's Division on Popular Culture.

Dr. Charles Croskey, research associate, and Joel Balogh, staff systems designer, both of the Department of Electrical Engineering, presented a three-day short course, "Solid State Electronics for Non-Electrical Engineers," in Amsterdam last Nov. 20-22. Earlier in the Fall Term, they presented the same course in Santa Clara, CA.

Pianist Steven Smith, associate professor of music, recently returned from a concert tour in Spain, France and Equatorial Africa. In France, Mr. Smith performed in Conflans-St. Honore and St. Germain en Laye; and in Africa, he performed in Port-Gentil, Gabon. He also recorded two programs for the Spanish National Radio in Madrid.

Mary K. Eggers, dean of Student Affairs at the Beaver Campus, has been named as one of the Outstanding Young Women of America for 1979. She was selected by the Board of Advisors for Outstanding Young Women of America from among women in 50 states and the District of Columbia.

Dr. Lee C. Eagleton, professor and head of Chemical Engineering, has been elected a director of the American Institute of Chemical Engineers, the 47,000-member chemical engineering technical society.

Dr. Richard A. Anthes, professor of meteorology, was an invited speaker recently at an international conference on tropical cyclones in Perth, Australia. He discussed computer modeling of tropical cyclones during the past 15 years.

Dr. Roland H. Good Jr., professor and head of the Department of Physics, recently returned from a term as visiting professor of physics at Seoul University, Korea. His visit was sponsored by the U.S. Agency for International Development.

Dr. Dorothy V. Harris, professor of physical education, will serve as co-editor of a new annual publication, *International Review of Sport Psychology*, to be sponsored by the International Society of Sport Psychology. The first edition is scheduled for publication in the late spring of 1981.

Dr. Murry R. Nelson, assistant professor of education, has recently been appointed three-year terms on two editorial boards. He will serve on the editorial board of *Theory and Research in Social Education* and on the elementary education advisory board of *Social Education*, the official journal of the National Council for the Social Studies.

Dr. Rodrigue Mortel, professor of obstetrics and gynecology at Hershey, was guest speaker at a symposium held Dec. 1-9 in Gabon, Africa, as part of the official opening at the International Medical Research Center of Francophonie. The new facility will conduct studies related to reproductive physiology and sponsor research on human fertility and sterility.

Gordon W. Rawlins has been appointed as assistant dean of The University Libraries and head of the Division of Bibliographic Resources and Services.

He will be responsible for implementing a new computer system for Penn State's libraries.

Mr. Rawlins joined the University staff as assistant librarian in 1969. Later, he became head of the Systems Development Department and director of library computer services.

He received his B.A. in Spanish at Brigham Young University in 1966 and his master's degree in library and information science there in 1968.

Charles E. Galgoc has been appointed as director of Graduate Admissions at the University, effective Jan. 1. He succeeds Dr. Bernard J. Busnovic, who retired.

After receiving his Ph.D. in educational administration from Penn State in 1970, he joined the Graduate School as an administrative assistant, subsequently being appointed as assistant to the dean. He was promoted to acting director of Graduate Admissions in 1977.

Dr. Galgoc earned his B.A. in Slavic languages from Indiana University at Bloomington and his M.Ed. in English from Kutztown State College.

The College of Business Administration recently announced the appointments of three Visiting Research Associates. Dr.

Soon-Tae Jung, professor of marketing at Busan National University in Korea, has joined the Department of Marketing and will remain through next summer. Mohan Lal, senior lecturer in accounting and finance at the University of Otago, Dunedin, New Zealand, is sponsored by CBA's Center for Research. Dr. Lal arrives this month for a year's stay. Dr. Shozo Uemura, professor of business administration and former dean of the School of Business Administration at St. Andrews University, Osaka, Japan, is sponsored by the Division of Organizational Behavior. He arrived in October and will remain at the University until September.

25-year Chair

Dr. Harvey W. Wall, director of the Division of Undergraduate Studies, recently received his 25-year chair from the University.

After serving for a year as a clinical psychology trainee with the U.S. Veterans Administration in Roanoke, VA, Dr. Wall joined the Penn State staff as assistant to the director of the Division of Intermediate Registration in 1954.

He was appointed to the post of psychologist with the Division of Counseling in 1957 and in 1965 was named assistant director for Commonwealth Campuses, Division of Counseling. In this position he was responsible for coordinating the counseling programs at all the University's branches, including transfer of students among the Campuses, and in-service training for Division staff members at the Campuses.

Dr. Wall was named associate director of the Counseling Division in 1967, served as acting director of most of 1972, and was named director of DUS in the spring of 1974.

Dr. Wall, who holds the academic rank of assistant professor of human development, received his B.S., M.S. and Ph.D. degrees, all in psychology, from Penn State.

He has taught courses in mental hygiene and psychology and has authored and co-authored several publications on various aspects of psychology and counseling.

Retirements

Edward F. Blehl, associate professor of management development, retired Jan. 1 after 22 years as a faculty member.

As a member of the management development staff, Prof. Blehl trained professional managers in organizational and personnel management techniques. He also conducted company surveys for individual managers to help them determine their own developmental needs.

Prof. Blehl joined the faculty in 1957 as an instructor of management development (psychology) in Continuing Education, following a 12-year career in recruiting, selecting and placing professional applicants for various organizations.

He served in the U.S. Air Force from 1941 until 1945. Following World War II, he enrolled at Penn State, receiving a B.A. in industrial psychology in 1947. In 1950 he was awarded the M.S. in the same field.

Garner P. Mitchell, Potter County Extension director, retired Dec. 31 with 25 years of service.

Mr. Mitchell received a B.S. from Penn State in 1951, majoring in dairy production. Following service in the U.S. Army, he was appointed to the Extension staff in 1954 as assistant Clinton County agent. He was promoted to associate agent in 1958 and was named Potter County agent in 1960.

A former president of the Pennsylvania Association of County Agricultural Agents, Mr. Mitchell, in 1976, received a Distinguished Service Award from the National Association of County Agricultural Agents for his service to agriculture.

Jay W. Beck, a counselor in student administrative services, retired Jan. 1. He had served on the staff since Jan. 1, 1966.

Otto H. Ferrari, a bio-medical fabrication technician at Hershey since Nov. 19, 1973, retired Jan. 1.

Evelyn P. Fye, a residence hall worker in Housing and Food Services since Sept. 26, 1967, retired Dec. 5.

James F. Hafer, a maintenance worker, utility, in the Office of Physical Plant, since June 17, 1974, will retire Jan. 26.

Genevieve I. Howe, a residence hall worker in Housing and Food Services, retired Jan. 1. Her service to Penn State began Sept. 3, 1968.

Freda J. Hyde, a laboratory technician in the College of Agriculture, retired Jan. 1. She had been on the staff since July 1, 1962.

Charles V. Liddick, a janitorial worker with the Office of Physical Plant, will retire Jan. 12. He has been with the University since April 29, 1974.

Edna M. Rhodes, a food production worker at the Nittany Lion Inn since Jan. 24, 1972, retired Jan. 1.

Donald L. Wolf, a driver, courier at Hershey since Jan. 1, 1968, retired Jan. 1.

Obituaries

Walter O. Gordon, professor emeritus of mathematics, died Dec. 20 at the age of 75. Mr. Gordon earned a bachelor's degree from Bowdoin College in 1928 and a master's degree from Penn State in 1931. He served on the faculty from 1928 until 1965, and at the time of his retirement was assistant to the head of the Mathematics Department.

G. William Henninger, professor emeritus of music, died Dec. 18. Born April 27, 1905, in Rothenburg, West Germany, Prof. Henninger came to America as an infant. After receiving bachelor's and master's degrees from New York University, he joined the University's faculty in 1934, retiring in 1968. He was a specialist in music theory and authored both musical compositions and two books.

Geraldine E. Rosenzater, a residence hall worker with Housing and Food Services from 1972 until she retired on disability in 1978, died Dec. 28. She was born April 20, 1923, in Millbrook, PA.

Elizabeth Jane Trostle, a member of the staff from 1954 to 1972, died Dec. 12. Born March 4, 1909, in Tyrone, PA, she worked as a records clerk in Admissions, Records and Scheduling.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Jan. 10-20

Special Events

Thursday, Jan. 10
Penn State Dames meeting, 7:30 p.m., Room 101 Kern.
Colloquy Lecture, 8 p.m., Eisenhower Auditorium. William Sullivan, former U.S. Ambassador to Iran, speaker.

Friday, Jan. 11
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Rodney Erickson, geography, on "The Changing Location of Jobs, and the Death and Life of Great American Cities."
Commonsplace Theatre, *Agatha*, 7 and 9 p.m., Room 112 Kern.
Artists Series, Fernando Valenti, harpsichord, 8:30 p.m., Schwab.

Saturday, Jan. 12
Last date for final oral doctoral examinations for March graduates.
Last date for March graduates to deliver masters' theses or papers to adviser.

Sports: fencing (women) vs. North Carolina State, Montclair State and Fairleigh Dickinson, 9 a.m. (men) vs. North Carolina State and Ohio State, 11 a.m.; bowling (men and women) vs. Drexel, 1 p.m.; basketball (women) vs. Colorado, 5:45 p.m. (men) vs. Duquesne, 8:10 p.m.
France-Cinema, *Bread and Chocolate*, 7 and 9 p.m., Room 112 Kern.

Sunday, Jan. 13
University Chapel Service, noon, Frizzell Room, Eisenhower Chapel. Martin Luther King, Jr. Celebrated by Dr. Daniel Walden, King, Jr. artists Series, speaker.
Sports: bowling (men) vs. Penn State/Capitol, 1 p.m.
Commonsplace Theatre, *Agatha*, 7 and 9 p.m., Room 112 Kern.
Artists Series, American Dance Machine, 8:30 p.m., Eisenhower Auditorium.

Monday, Jan. 14
Last date for March graduates to submit camera-ready theses manuscripts to Thesis Office.
Audio Visual Services, Connections film, "Wheel of Fortune," 12:15 p.m., Room 112 Kern.
France-Cinema, *Bread and Chocolate*, 7 and 9 p.m., Room 112 Kern.
Sports: basketball (men) vs. Delaware, 8:10 p.m.

Tuesday, Jan. 15
WPX-TV documentary series, *Religion in Rural America*, "Three Who Care," noon, Kern Lobby.
Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Daniel Walden, American

Harpsichordist Fernando Valenti appears Jan. 11.

studies, on "Neil Simon: From the Bronx to Broadway to California and Back."
Videotape showing of performance by University Choirs and Pittsburgh Symphony Orchestra of their February 1979 performance of *Carmina Burana*, 4 p.m., Room 111 Forum.
School of Music Common Hour, student performances, 4 p.m., Music Bldg. Recital Hall.
Comp. Lit. Film Series, John Schlesinger, *Far from the Madding Crowd*, 6:30 and 8:45 p.m., Room 112 Kern.
Artists Series film, *Jane Eyre*, 8 p.m., Schwab.
Towson State College Choir, Vince Lawrence, director, 8:30 p.m., Music Bldg. Recital Hall.

Wednesday, Jan. 16
Comp. Lit. Film Series, Anselmo Duarte, *The Given Word (O Pagador de Promessas)*, 7 and 9 p.m., Room 112 Kern.
Percussion Ensemble Concert, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, Jan. 17
Brown Bag Performing Arts Hour, 12:30 p.m., HUB Ballroom. Orchestra Dance Group performance.
Winter Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.

Friday, Jan. 18
Board of Trustees meeting, Keller Bldg.
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Harold Dickson, art history, emeritus, on "Ten Pennsylvania Buildings."
Winter Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.
Commonsplace Theatre, *Halloween*, 6:30 and 9:30 p.m., Room 112 Kern.
Artists Series, Claude Kipnis Mime Theatre, 8:30 p.m., Eisenhower Auditorium.

Saturday, Jan. 19
Board of Trustees meeting, Keller Bldg.
Sports: fencing (men) vs. William Patterson, 1 p.m.; swimming and diving vs. Pittsburgh, (women), 1 p.m. (men), 4 p.m.; basketball vs. Rutgers, (men), 2:10 p.m. (women), 4 p.m.; volleyball (men) vs. Alcorn, 7 p.m.; gymnastics (men) vs. Ohio State, 8 p.m.
Faculty Women's Club Mid-Winter Coffee, 9:30-11:30 a.m., Memorial Lounge, Eisenhower Chapel.
France-Cinema, *Going Places*, 7 and 9 p.m., Room 112 Kern.
Artists Series, Claude Kipnis Mime Theatre, 8:30 p.m., Eisenhower Auditorium.

Sunday, Jan. 20
University Chapel Service, 11 a.m., Eisenhower Chapel. Celebration of Christian Unity.
Artists Series, Claude Kipnis Mime Theatre, 2:30 p.m., Eisenhower Auditorium.
Choral Concert, Anthony Leach, conductor, 3:30 p.m., Music Bldg. Recital Hall.
Commonsplace Theatre, *Going Places*, 7 and 9 p.m., Room 112 Kern.

Seminars

Physics, James J. Reuther, fuel science, on "Spectroscopic and Mechanistic Studies of Chemiluminescent Processes," 3:55 p.m., Room 445 Davey (new listing).
Computer Science, Charles Van Loan, Cornell Univ., on "Matrix Computations Affect the Way We Think," 4 p.m., Room 325 Whitmore (new listing).
Mathematics, Victor Kac, MIT, on "Hunting the Monster," 4 p.m., Room 102 McAllister (new listing).
Philosophy, Walter Schmid, Univ. of North Carolina, on "Eros and Sophrosyne in Plato's *Charmides*," 4 p.m., Room 167 Willard.
Statistics, James Hutton, Bucknell Univ., on "The Recurrence and Transience of Two-Dimensional Linear Birth and Death Processes," 4 p.m., Room 60 Willard (new listing).

Friday, Jan. 11
Analytical Chemistry, Susan Rose, grad student, on "Automated Clinical Determination of Arsenic by Atomic Spectroscopy," 11:10 a.m., Room 333 Whitmore.
Physical Chemistry, Bob Abernathy, grad student, on "Collision Complexes in Ion Molecule Reactions," 2:30 p.m., Room 333 Whitmore.
Philosophy, Aryeh Motzkin, Harvard Univ., on "Plato and Aristotle on the Vocation of the Philosopher," 4 p.m., Room 101 Kern.

Monday, Jan. 14
Microbiology, Elizabeth Biochemistry and Biophysics, L.E. Casida, microbiology, on "New Bacterial Pathogens of Bacteria," 4 p.m., Room 101 Althouse.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Tuesday, Jan. 15
Organic/Inorganic Chemistry, R. Gobbo, grad student, on "Ring Closure Reactions and Baldwin's Rules," 12:45 p.m., Room 333 Whitmore.

Geosciences, Bruce Nesbitt, geosciences, on "Regional Metamorphism of the Ducktown, Tennessee Massive Sulfide Ore Deposits," 3:45 p.m., Room 26 Mineral Sciences.

Wednesday, Jan. 16
Philosophy of Sport, Dorothy Harris, physical education, on "Behavioral Manipulation in the Quest for Victory," noon, Room 104 White.

Thursday, Jan. 17
Chemistry, Nicholas Winograd, chemistry, on "Determination of Surface Structure with Ion Beams," 12:45 p.m., Room 333 Whitmore.

Economics/Institute for Policy Research, Carol H. Weiss, Harvard Univ., on "When Does Government Use the Results of Research Analysis," 2 p.m., Room 112 Chambers.
Physics, Peter Banks, Utah State Univ., on "Electrodynamics of Large Conductors in Magnetoplasmas," 3:55 p.m., Room 333 Whitmore.

Philosophy, Henry Teloh, Vanderbilt Univ., on "Type Reality in Plato," 4 p.m., Room 167 Willard.
Analytical Chemistry, Gary Small, grad student, on "Computer Assisted Interpretation of Infrared/IR GC/FTIR Data," 11:10 a.m., Room 333 Whitmore.

Physical Chemistry, Mike Roland on "CARS Studies of Molecular Motion," 2:30 p.m., Room 333 Whitmore.

Friday, Jan. 18
Horticulture, Nathan Hartwig, agronomy, on "Weed Control as a Science," 3:55 p.m., Room 10 Tyson.

Exhibits

Ferguson Lobby: Forestry exhibit, "Douglas Fir Research at Penn State," prepared by Edgar H. Palpat.

HUB Galleries: Traveling print exhibit, The Gallery, Nancy Straily, prints and drawings, Browning Gallery, John Caroline, stained glass, and Ukrainian cultural exhibit, Central Pa. Scholastic Art Award exhibit, opens Jan. 13, Art Gallery.

Kern Commons: Mary Keithan, paintings, and Marty Tyleen, ceramic constructions, through Jan. 19. Penn State Film Follies posters, opens Jan. 20.

Museum of Art: Wirth McCoy, recent paintings. Sculpture from the permanent collection and Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager, both open Jan. 13.

Visual Arts Bldg. Zoller Gallery: Graduate Student Show, through Jan. 20.

Arts Roundup

Valenti concert tickets on sale

Celebrated harpsichordist Fernando Valenti will be presented in concert Friday, Jan. 11, at 8:30 p.m. in Schwab Auditorium as part of the Artists Series Fine Arts Series.

From the age of four until he entered college, Mr. Valenti studied the piano — for some years under Jose Iturbi at Yale University he worked with Ralph Kirkpatrick, who urged him to change to the harpsichord. By the time he made his New York debut in 1950, he had already recorded the Brandenburg Concerti with Fritz Reiner, played with the Boston Symphony and the New York Philharmonic, and begun a series of solo recordings. He was invited to join Pablo Casals in the first historic concert of the Bach Festival at Prades. He has toured extensively throughout the United States, Europe and South America.

Mr. Valenti's program will include Handel's Suite in F, Bach's Toccata in E minor, and eight sonatas by Domenico Scarlatti.

Tickets for the concert will be on sale through Friday, Jan. 11, from 9 a.m. to 4 p.m. at the Eisenhower Auditorium box

office, and at the door beginning at 7 p.m. the evening of the performance. Phone orders on Master Charge and VISA cards may be placed by calling 865-0255 on the box office sales days.

American Dance Machine replaces Krasnayarsk troupe

The Krasnayarsk Dance Company will not appear at University Park on Sunday, Jan. 13, as scheduled because its tour has been cancelled by the Soviet Union.

In its place, the Artists Series will present the American Dance Machine, an ensemble specializing in dances from Broadway shows of the last 40 years.

Founded in 1975 by Lee Theodore, who is still director of the company, the American Dance Machine enjoyed a successful season on Broadway last year and also performed at the White House.

Tickets for the Krasnayarsk Dance Company performance will be honored for the American Dance Machine. The performance is part of the Theatre/Dance Series and is completely sold out by subscription. Curtain time is at 8:30 p.m. in Eisenhower Auditorium on Jan. 13.

Wirth McCoy

McCoy paintings at Museum

An exhibition of 20 recent paintings by Wirth McCoy, professor emeritus of art, is on display at the Museum of Art through Feb. 17.

Mr. McCoy's work reflects the continuing influence of nature and the elements on his concept of art. Representations of the oceans and the topographies of the eastern and western

United States are evident in his paintings and bear witness to his experiences in the Midwest, Far West and East.

Mr. McCoy, who received a B.A. from the University of Minnesota, an M.F.A. from the University of Iowa and a diploma in painting and design from the Academie de la Grand Chaumiere in Paris, served on the faculty from 1964 to 1979.

Kipnis mimes to appear

The Claude Kipnis Mime Theatre, sponsored by the Artists Series, will appear Saturday, Jan. 19, at 8:30 p.m. in Eisenhower Auditorium.

Claude Kipnis was born in Paris and educated at the Sorbonne. One of his chief mentors in mime was the famous Marcel Marceau, with whom he studied.

After spending several years working in Israel, Mr. Kipnis came to the United States in 1966. After appearing at New York's Theatre de Lys, he became director-in-residence of the Boston Opera Company, where he staged the historic performance of Schoenberg's very difficult and rarely heard opera *Moses and Aaron* and staged and performed in Bartok's *Microcosmos Mandarins*.

In 1968 Mr. Kipnis formed a carefully selected company of young mimes which

(Continued on page 4)

Nutrition aid

(Continued from page 1)

you're wondering, the answer is no.)

"Generally, we try to answer the question on the phone," Ms. Lewis points out. "If that's not possible, we research it and try to get back to the caller within a day or two."

"Many of our clients seem to have some degree of nutritional awareness, interest or knowledge to begin with," she observes.

Much of the Center's effort is directed toward reaching people who know little, if anything, about nutrition. "Studies have shown," Ms. Lewis says, "that 51 percent of the American public have a very poor understanding of nutrition."

The Center provides tours for interested groups and, as Ms. Lewis says, "The public is always welcome to come in and browse or use our information files for their own research." Open from 8 a.m. to 5 p.m. weekdays, the Center can be reached at 865-6233.

Complementing the services of the Center is the Nutrition Clinic and Consultation Service, which offers individual counseling for evaluating or adjusting food intake patterns to meet health needs.

"Since nutritional adjustment is often an integral part of the management of a medical problem, the majority of people coming to the Clinic do so on the advice of a physician," says Marian Hammond, assistant professor of nutrition and coordinator of the Clinic.

Problems most common to the Clinic's clients involve weight control, certain gastrointestinal disorders, diabetes, elevated blood cholesterol or triglyceride levels, and high blood pressure.

The Clinic's caseload has grown prodigiously since its inception in 1972, and it now assists 300 to 350 clients per year.

Counseling is provided by Prof. Hammond and the Clinic's two graduate assistants, each of whom is a registered dietitian. Additional counseling is available from undergraduate nutrition majors who, while earning academic credit in Nutrition 400, gain applied experience in the rapidly expanding specialty of nutrition counseling as part of medical management.

"Obviously, we do not diagnose a medical problem," Prof. Hammond explains. "But if the client's physician believes the problem can be controlled by a nutritional adjustment, that's where we step in."

"We can do a nutritional assessment," she adds, "which includes a dietary history, a dietary evaluation and anthropometric measurements. When this information is added to the physician's data base, nutritional prescriptions can be formulated more realistically and strategies for behavior change can be tailored to the individual."

For their clients, the nutrition counselors emphasize an individualized goal-setting approach, based on a model developed by Dr. Steven J. Danish, professor of human development, and Dr. Anthony R. D'Augelli, associate professor of human development.

"By working with these researchers," Prof. Hammond notes, "we have come to understand that even though people may know intellectually what food choices they should make, many of them have never learned preferred eating skills."

Preferred eating skills, she explains, refer to the choices you make based on who you are, what your goals are, and what you happen to be doing at the moment.

"We try to help clients develop realistic goals and a nutritional framework for making choices, so that they have an idea of what kinds of foods produce what kinds of effects," she says. "If our clients can approach a so called 'diet' this way, they can learn to make their own choices in a variety of situations."

Thus, a client trying to lose weight at, say, a buffet might learn to ask such questions as: Do I really need the pie? Could I eat a smaller piece, or eat the filling and leave the crust?

Though most clients are referred to the Clinic by physicians, some come on their own accord for an evaluation of their food intake patterns. Dietary evaluations or consultations on normal nutrition problems do not require a physician's recommendation, Prof. Hammond notes.

"These are persons who want to know if they're eating appropriately for reasons of preventive health. Or they may want to learn if their nutritional practices are adequate for certain stages of the life cycle such as pregnancy, lactation, infancy or the geriatric years."

Nutrition education has many tools. For a dietary assessment, one of the most effective is plastic food models. Both the counselor and client can use a variety of models — from apple to zucchini — in a session. "The models make it easier for the client to learn about the nutritional values of various foods and portions and to visualize the implications of changes in food choices," Prof. Hammond says.

"And this emphasizes one of the values of the Nutrition Clinic," she continues. "Individualizing counseling and guiding the client to develop his or her own strategies for behavioral change get better results than simply handing out diet lists — which was the procedure most frequently used in the past."

Nutrition counseling is by appointment only. The Clinic's switchboard — 863-0613 — is open 8 a.m. to 5 p.m. weekdays.

Mime Theatre

(Continued from page 3)

premiered newly commissioned works at New York's Lincoln Center. That year also marked the first national tour of the Claude Kipnis Mime Theatre.

Included on Saturday evening's program will be a major new work entitled "The Body." Through the use of the color and excitement of jazz music, the Kipnis players explore the inner workings of the human body from a most unusual point of view. Also included on Saturday's program will be "The Box," "The Apple," "The Pianist," and "Eine Kleine Nachtmusik."

Tickets will go on sale at the HUB Booth and at Eisenhower Auditorium Box Office beginning Tuesday, Jan. 15, from 9 a.m. to 4 p.m. Phone orders may be placed on Master Charge and VISA cards by phoning 863-0255, days of sale. The Friday evening performance, which is part of the Theatre/Dance Series, is sold out by subscription.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (exterior line 472, 1387). Applications for these staff vacancies will be accepted until 5 p.m., Jan. 17, 1980. DO NOT CONTACT THE AREA THAT HAS THIS VACANCY.

CHILD ACTIVITY SPECIALIST — COLLEGE OF MEDICINE, Hershey. Responsible for setting up, supervising a Child Activities Program to include training and directing of volunteers, college trainees and student nurses. Develop various child activity programs depending upon the needs of the patient. A bachelor's degree in elementary education, plus one or two years of effective experience in similar or related work.

ASSISTANT FINANCIAL OFFICER — CONTROLLER'S OFFICE, University Park. Responsible to the Financial Officer and the Director of Financial Officers for the control and accountability of budgets. Interpret and enforce financial and budget policies and procedures. Bachelor's degree or its equivalent in accounting, plus two to three years of effective experience.

FINANCIAL OFFICER, McKeesport. Responsible to the Controller for budget and expenditure control of Campus operating funds. Prepare primary assistance to the Campus Director in financial and related administrative matters. Manage and control the Campus operating funds, including petty cash and change funds. Insure compliance with cash and other administrative policies. Prepare periodic financial reports, deposit all cash receipts, issue and settle advances for travel. Maintain and control student accounts receivable, process refunds, collect tuition and unpaid balances. Responsible for receipt and distribution of payroll checks. Responsible for property inventory, tagging of equipment, inventory records and periodic property inventory reports. Bachelor's degree in accounting, with two to four years of directly related experience in accounting operations.

Senate

(Continued from page 1)

teaching and committee assignments or salary increments.

Senator Peter Bennett pointed out that currently there is no good measure for evaluating how good a job a person does as an advisor, and that the greater the number of advisees a professor has, the more complaints he or she is likely to receive. Engineering Dean Nunzio J. Palladino said that in some colleges students handle advising chores, thus making it extremely difficult to administer any University-wide system of rewards for advising.

The Subcommittee's recommendations will be voted on at the Feb. 5 Senate meeting.

The Senate also heard comments by President Oswald on the University's fund raising efforts after listening to a report on the activities of the Office of Gifts and Endowments (OGE).

Dr. Oswald noted that OGE was established as an arm of fund raising after he arrived at Penn State. Four years ago, a Penn State Fund Council was created, consisting of 25 leading alumni and friends of the University. Trustee Charles W. Shaeffer, retired chairman of T. Rowe Price Associates, Inc., of Baltimore, heads the Fund Council.

The annual amount raised at the time the Council was formed was about \$4¼ million.

"The Council," Dr. Oswald continued, "with Trustee support, set a goal to double this level of annual giving within a five-year period. We were able to increase the total to \$10.3 million in four years rather than the anticipated five."

"In the perspective on the '80s, there is a recommendation to attempt to double this \$10 million level in the next five years. If we are successful in this recommendation, annual giving by 1985 would be at the \$20 million per year level — and if this were sustained each year, it would total \$100,000,000 over a five-year period."

Dr. Oswald said that in his opinion the University would be making a mistake to seek basic operating support from private funds but should rather seek such funds for enrichment and quality enhancement.

"I pledge to this Senate that this matter will be a continuing high priority," he said.

Calendar of Major Planning and Budget Events 1979-80

Events	Date
Board of Trustees approves 1980-81 State Appropriation Request for submission to Department of Education.	September
President approves calendar of major planning and budgeting events.	October
Hearing with the Pennsylvania Department of Education on 1980-81 State Appropriation Request.	October
Draft Planning and Budget questions for Colleges and Administrative Divisions reporting to the Provost are reviewed by the Provost's Advisory Committee on Planning and Budget.	Mid-October, Mid-November
Senior University Officers distribute Planning and Budget questions and guidelines for 1979-80 five-year planning and budget process.	Late October, November
Office of Planning and Budget distributes planning and budget data packages.	Late October, Mid-December
Deans and Administrative Officers prepare five-year planning and budget proposals.	To be completed two weeks before hearing
Office of Planning and Budget and Financial Officers prepare PBF Analytical Data	Mid-November through Mid-January
Planning and Budget Hearings chaired by Senior University Officers. (Note: The Provost's Advisory Committee on Planning and Budget constitutes the hearing panel for Colleges and Administrative Divisions reporting to the Provost.)	Late January through Mid-March
Governor issues 1980-81 Executive Budget recommendations.	Early February
Legislative hearings on 1980-81 State Appropriation Request with Senate and House Appropriations Committees.	March or April
The Advisory Committee on Planning and Budget makes its recommendations to the Provost concerning budget and planning considerations for 1980-81 through 1984-85, including recommendations on issues for further study in the Colleges and Administrative Divisions reporting to the Provost.	March
Senior University Officers consolidate recommendations for 1980-81 budget and planning considerations for 1980-81 through 1984-85, including identification of issues for further study.	March through May
Budget Task Force, chaired by the President, reviews consolidated recommendations from Senior University Officers and approves budget and planning parameters for 1980-81 through 1984-85.	April through May
Senior University Officers review decisions and recommendations with officers reporting to them.	Late April, May
Legislature acts on 1980-81 State Appropriation Request.	May, June, or later
Board of Trustees approves 1980-81 Operating Budget (or Interim Operating Budget if State Appropriation amount is not known).	May
If an interim budget was approved in May, and if the Legislature subsequently has passed the University's appropriation, the Board of Trustees approves the 1980-81 Operating Budget.	July
Processing of any proposed salary adjustments.	June or July
Preparation of 1980-81 Detailed Operating Budget.	July or August

Penn State Intercom

News in Brief

Liability protection for special University service

The University from time to time requests various members of the faculty and staff to serve on committees as well as review and appeals boards. Questions occasionally arise relative to liability insurance protection should a member or members of the committee or board be legally challenged on a decision made by their particular body.

The University maintains a broad program of insurance protection which it feels will meet any contingencies arising from the work of these committees or boards. All faculty and staff members are included as additional insureds on this insurance.

The University's Risk Management Office continually reviews developments and decisions in this field, and it is felt Penn State has the best coverage available in the market. The policy is in effect while the faculty and staff member is acting within the scope of his or her University duties.

Any questions concerning this coverage should be directed to the Risk Management Office, 865-6307.

Alien address forms must be filed this month

The Office of Personnel Administration would like to remind all aliens living in the University community that this is the month in which they are required by law to complete a special address card to be sent to the Immigration and Naturalization Service.

This address form must be prepared annually and is different from the regular change of address form aliens are required to prepare. It must be submitted even if the alien has recently submitted a regular change of address notice.

The special forms are available at the

Mr. Czekaj

Mr. Paterno

Reorganization announced effective March 1 in the Department of Intercollegiate Athletics

President Oswald has announced a reorganization, effective March 1, 1980, in the Department of Intercollegiate Athletics.

Athletic Director Edward M. Czekaj will be reassigned as special assistant to Robert A. Patterson, senior vice president for finance and operations.

He will be succeeded as athletic director by Joe Paterno, who will retain his duties as head football coach and professor of physical education.

"The primary purpose of the reorganization," said Dr. Oswald, "is to focus the strength of the central administration, specifically the senior vice president for finance and operations, on the budgetary and fiscal matters of the Department of Intercollegiate Athletics."

"At the same time, this must be done without interfering with the department's academic role and mission as a part of the College of Health, Physical Education and Recreation."

Mr. Paterno will report directly to Mr. Patterson on budgetary, contractual, fiscal and non-academic personnel matters, as well as on organization and policy matters

needed to assure "a continuing strong and viable program."

On matters related to the academic integrity of programs, such as admissions and eligibility, Mr. Paterno will report to Dr. Robert J. Scannell, dean of the College of Health, Physical Education and Recreation.

"To assure maximum coordination," said Dr. Oswald, "the director will keep the dean informed and will consult with him before proposing any significant changes in the direction of the athletic program."

In announcing the realignment, Dr. Oswald expressed his appreciation to Mr. Czekaj for his "outstanding loyalty and devotion in making Penn State's athletic program one of the strongest in the nation."

Mr. Czekaj's reassignment as special assistant, he added, "will enable the University to draw on his vast experience and contacts to assure continuity during the transition period."

Commenting on Mr. Paterno's promotion, Dr. Oswald said:

"No one in the United States is more respected than is Mr. Paterno for his sound views on the role of intercollegiate athletics as an integral part of the educational mission of a university."

"There is no question in my mind that he will bring great strengths to the entire athletic program while continuing on as a first-rate head football coach."

Dr. Oswald spelled out details of the reorganization in a statement that defines the mission of the Department of Intercollegiate Athletics and of the specific reporting lines and responsibilities of the director of athletics.

Emphasized in this statement is the critical and continuing role of the dean of the College of Health, Physical Education and Recreation in assuring academic integrity of the athletic programs and of the academic environment in which Mr. Paterno and his staff will function.

"It is recognized, with sincere appreciation," said Dr. Oswald, "that Dean Scannell has provided strong and effective leadership in helping to build excellent academic and athletic programs at Penn State, while bringing national leadership to many issues involved."

Reorganization, he added, will permit Dr. Scannell to "devote even more time and leadership to the needs of the college, and, indeed, the total University."

Dr. Scannell has been very active in campus leadership positions. In recent

Preretirement counseling program set up

President Oswald has announced the establishment of a program of preretirement counseling for full-time University faculty and staff members.

The program, to be conducted by the Employee Benefits Division of the Office of Personnel Administration, will be directed toward faculty and staff members who are now age 60 or older, or who will attain the age of 60 by June 30, 1980.

The program will deal with the financial aspects of retirement, specifically as related to the retirement benefits provided by the University.

Since more than 750 faculty and staff members fall into the age categories described above and meetings will be limited to approximately 35 persons, it will be necessary to schedule a number of sessions to accommodate everybody.

Whenever possible, persons invited to a particular meeting will be in the same retirement system. Each person invited will receive an advance packet of information to review in preparation for the meeting.

Because the information to be presented will be helpful in stimulating and directing thinking about important decisions regarding retirement, President Oswald urges faculty and staff members who are invited to attend the sessions to do so if at all possible.

Funds still available to pay Faculty Aides

Graduate students may still apply for financial assistance under the new Faculty Aid Program, according to Joan Schumacher, an assistant director in the Office of Student Aid.

Faculty aides receive \$6 an hour for assisting faculty or administrators in their official University duties. The aide's responsibilities are similar to those of a graduate teaching assistant or research assistant.

Since the program was implemented, \$450,000 has been awarded to more than 230 students. Applications are being accepted now for aides during the Spring Term. Summer Term application forms will be available in February.

Even though we're still accepting applications for spring, now is the time to apply for next year's program," Ms. Schumacher says.

Funds for the program, which come from student aid college work-study funds, are restricted to those students who demonstrate financial need, are U.S. citizens, and have been enrolled as degree students in a graduate program for four or more credits each term.

Interested students must first complete a Financial Aid Form, which will be evaluated by the College Scholarship Service, a process that requires several weeks and costs \$5. After that, students should file an application with the Office of Student Aid in Room 335 Boucke.

"If the student is granted an award, he or she must match up with an approved faculty aide position," Ms. Schumacher says. "A listing of available positions can be found in the Office of Student Aid."

The amount awarded will be determined

Mr. Dyer-Bennet on a recent trip to Greece.

Dyer-Bennet to present 'Odyssey' reading

Folk singer and music scholar Richard Dyer-Bennet will present three excerpts from Robert Fitzgerald's translation of Homer's *Odyssey* at 7:30 p.m. Wednesday, Jan. 23, in Room 112 Kern Graduate Building.

His appearance is one of the highlights of his Jan. 20-28 stay as a Visiting Fellow of the Institute for the Arts and Humanistic Studies. He will also offer

sessions dealing with folklore, poetry and voice training.

The program on *The Odyssey* is divided into three parts: "A Goddess Intervenes" from Book 1, "A Hero's Son Awakens" from Book 2, and "The Test of the Bow/Death in the Great Hall" from Books 21 and 22.

"Homer's great epic poem was given

Penn Staters

Dr. George C. Shoffstall, assistant to the dean in Continuing Education and Commonwealth Campuses, College of Science, was elected president-elect of the National Association of Academies of Science (NAAS), an affiliate of the American Association for the Advancement of Science (AAAS), at the Association's 146th National Meeting in San Francisco. He also was honored by the NAAS as one of its distinguished service awarders. Dr. Shoffstall is immediate past-president of the Pennsylvania Academy of Science.

Dr. Milton Cole, associate professor of physics, presented invited colloquia recently at Wesleyan University, the University of Massachusetts, and the University of California at San Diego. His talk was entitled "Beauty Is Skin Deep: Helium Atoms on a Graphite Surface."

Dr. Alfred Traverse, professor of paleontology, recently gave two lectures at Southern Illinois University. His topics were "Pleistocene Paleoclimatology of the Black Sea Basin, per Glomar Challenger Paleontology" and "For Biostratigraphy, the Smallest Fossils Are Best."

Dr. Norman Freed, associate professor of physics and associate dean for resident instruction, College of Science, has been named to a newly formed committee at the Bates Linear Accelerator, a national laboratory for high energy nuclear research at the Massachusetts Institute of Technology. The committee will provide theoretical physics guidance for the experiments conducted there and suggest programs of research for the 1980s.

Dr. John Hardin Best, professor of education and head of the Division of Education Policy Studies, has been reappointed to a three-year term on the editorial advisory board of Educational Studies.

Sarah Annette Thompson, assistant professor of health, physical education and recreation, has recently been elected to a two-year term as president of the Northeast Section of the Ladies' Professional Golf Association — Teaching Division.

Bookshelf

Dr. Leonard R. Rifornio, assistant professor of history at the Shenango Valley Campus, has written a book entitled *Missionary of Moderation: Henry Melchior Muhlenberg and the Lutheran Church in English America*. The book was published by Bucknell University Press in conjunction with Associated University Presses.

Dr. Rifornio's book examines the life of Henry Melchior Muhlenberg, founder of the Lutheran Church in America. The history of American Lutheranism before, during and after Muhlenberg is discussed, along with Lutheran involvement in the life of Pennsylvania. Dr. Rifornio also traces the development by Lutherans of various religious ideas that have had a significant impact on American religious and political history.

Dr. Rifornio holds bachelor's and master's degrees from Fordham College, a Licentiate in Philosophy from Woodstock College, and a Ph.D. from Penn State. A member of the Shenango Valley faculty for seven years, he is also the author of scholarly articles and a textbook.

During the 1850s, the doctrine of Manifest Destiny — that it was the will of God for the United States to occupy the entire Western Hemisphere — sparked a number of forays into Latin American countries by adventurers, disappointed California gold seekers and others who sought to expand U.S. boundaries.

That period and the expansionist movement are the subject of *Agents of Manifest Destiny: The Lives and Times of the Filibusters*, a new book by Charles H. Brown, professor emeritus of journalism. The book was published by the University of North Carolina Press.

Internally, the nation's political attention was drawn to problems of slavery and its extension into new territories during the decade preceding the Civil War. But the spirit of expansionism was also a strong political force at that time, and Mr. Brown provides new information on the movement itself and some of its leaders.

Prof. Brown, a faculty member from 1947 to 1972, is the author or co-author of six previous books. He is now living in Oklahoma.

Dr. Joseph W. Michels, professor of anthropology, is the editor of a new book, *Settlement Pattern Excavations at Kaminaljuyu, Guatemala*. Publication of the 740-page book was subsidized by a grant from the National Science Foundation. The book is the fifth volume in the Pennsylvania State University Press Monograph Series on Kaminaljuyu. The book, like the other volumes in the series, reports on the results of the Anthropology Department's large-scale archaeological excavation of the prehistoric Mayan ceremonial and political center on the outskirts of Guatemala City that took place between 1968 and 1971 under the direction of Dr. Michels and Dr. William T. Sanders, professor of anthropology.

The volume deals with the history of residential settlement based on the analysis of evidence uncovered through the excavation of over 500 separate trenches scattered over the 7½ square kilometer area of the site.

Clerical

Joan A. Kastner to senior coder in Undergraduate Admissions.
Kathy Leitelt to clerk-typist A in Liberal Arts.

Technical Service

Charles D. Wert to driver courier at Hershey.

25-year chairs

Wade H. Harpster Jr. was recently honored for 25 years of service to the University. He began his University employment in 1952 as a greens cutter on the golf courses. He then worked as a laborer, blacktopping parking lots.

For 16 years he worked as a floor mechanic, laying tiles, linoleum and brick before assuming the position of electrician. Since 1970 he's been an electronics technician B in UDHS. His responsibilities include repairing tape decks, recorders, dial access equipment and audio-visual machines.

Mr. Harpster and his wife, Helen, live in Stormstown. They have two daughters and one son.

Frances Mae Parsons

Three Nittany Lion Inn employees recently celebrated a combined total of 75 years of service to the University. Each of the three started at Penn State in 1954.

Dorothy Martin Bloom and her sister Sara Martin began working at the Inn on the same day — April 1. Ms. Bloom advanced from second cook to first cook. She has one son, Fred, and three grandchildren.

Sara Martin began her employment as a waitress and presently has the title of table attendant. She makes her home in Bellefonte.

Frances Mae Parsons has held a number of positions during her 25 years at the Inn. She worked as waitress, hostess, switchboard operator, upstairs housekeeper, and, for the last 12 years, as front desk clerk. Ms. Parsons and her husband, Robert, are State College residents. They have two children.

Retirements

Theodore S. Polesky, research assistant in agricultural economics, retired from the University on Jan. 1 after 25 years of service.

He joined the Department of Agricultural Economics on Jan. 1, 1955, holding positions of increasing responsibility. His last position involved working with statistics and computer program data.

He and his wife, Anna, will continue to reside in State College.

Virginia C. Baum, an admissions counselor in the Division of Admissions, Records and Scheduling, will retire Jan. 19. She has been a member of the University staff since July 19, 1964.

Marian M. Spancake retired Jan. 1 as a library assistant at the Altoona Campus, a position that she had held since July 15, 1964. She is a graduate of Juniata College.

The Spancakes are a Penn State family. Husband Fred is a Penn State alumnus who graduated in chemical engineering. Son, Larry, a business administration graduate, also worked for Penn State from 1968-71 in the Office of Budget and Planning.

After 26 years of service, M. Grace Limer retired Jan. 1 as a group leader for food production in Findley Hall. Ms. Limer was in charge of all salads and salad dressings there. Starting out as a counter woman in Waring Hall in 1953, she also worked in Johnston Hall before moving to Findley in 1965.

Ms. Limer's husband, Andrew, worked at Penn State as a painter for 16 years. The couple lives on a farm near Port Matilda with their son and daughter.

Ethel V. Stamm, a janitorial worker in the Office of Physical Plant, will retire Jan. 19. Ms. Stamm first came to Penn State in 1960 as a part-time worker in the creamery salesroom. She assumed full-time responsibilities in Borland Lab in 1962. She was a group leader in the Milk Test Laboratory before moving to the janitorial service staff in 1976.

She and her husband, Kenneth, have one daughter and three grand-children — one of the latter, Sandra Lowery, works as a clerk-typist in the College of Agriculture.

Guy J. Camp, a maintenance worker, utility, at the Wilkes-Barre Campus, retired Jan. 5. He had joined the staff July 16, 1973.

Victor A. Schiavoni, a patient service aide at Hershey, retired Jan. 5. He had been an employee since Oct. 12, 1970.

C. Earl Whitmoyer, a supervisor at Capitol Campus and an employee since Jan. 6, 1969, retired Jan. 1.

Doris Humphrey, a janitorial worker in the Office of Physical Plant, retired Jan. 1. She had been employed since Nov. 10, 1969.

James R. Rorabough, a manager, maintenance and utilities operations at Capitol Campus, retired Jan. 1. He had joined the staff Nov. 1, 1966.

Obituaries

Andrew K.A. Kafka, an associate professor of speech communication at Hazleton from 1955 to 1975, died Jan. 4. He was 70 years old. Prof. Kafka held three degrees, a B.S. from New York University, an M.S. in English from Brooklyn College, and an M.A. in educational guidance from Columbia University. He was the author of numerous articles.

Gilma M. Olson, a member of the faculty from 1939 to 1966, died Jan. 3 at the age of 75. An associate professor of foods and nutrition at her retirement, she had earned her B.S. at Iowa State College and her M.S. at the University of Minnesota.

Paul Jarmotz, a research assistant in the College of Science since 1950, died Jan. 9. He was 62.

Sue E. Zerby, a clerk typist in the College of Agriculture since 1976, died Dec. 31. A Bellefonte native, she was born June 28, 1958.

Harry C. Eisenhauer, a painter with the Office of Physical Plant from 1957 to 1965, died Jan. 4 at the age of 80.

Simeon W. Hartshorne, a residence hall worker in Housing and Food Services from 1957 to 1974, died Jan. 9. A Phillipsburg, PA, native, he was 66.

Funding Sources

For further information, call 865-1372

(330-1) The Resource Information Service (RIS) provides information to faculty and staff to support their mission of obtaining project funding for instruction, research, continuing education and for fellowships. RIS is the liaison between Penn State and the Office of Federal Programs (OFF/ASCU), Washington, D.C. OFF provides Penn State with continuous monitoring of public and private agencies. RIS reviews subscribed information from numerous sources, including the Federal Register and the Commerce Business Daily and receives direct mailings from agencies concerning their programs. RIS makes direct (unsolicited) information distributions to faculty and staff to promote awareness of public and private programs; responds to faculty/staff inquiries about programs and contacts; and through a Preliminary Proposal Outline (PPO) mechanism, locates support funds. For detailed information about RIS assistance, contact M.R. Kohler, Room 8 Old Main, 865-1372 (Network 8-475-1372).

Corrine Gulas will go for PSU against Rutgers.

Arts Roundup

Playhouse to host five top regional plays

Five of the best plays in a six-state area will be presented at University Park during the American College Theatre Festival Region II finals Jan. 23-27.

The Festival, now in its 12th year, is designed to honor and recognize dramatic talent among American colleges and universities. Students from Pennsylvania, New York, New Jersey, Delaware, Maryland and Washington, DC, will compete for honors on an individual basis in such diverse areas as acting, criticism, comedy writing and design. A national judging team could also send the best college production of a play on to the national finals in the John F. Kennedy Center for the Performing Arts.

The five plays to be presented in this year's finals will be David Rabe's *Streamers*, marlowed by SUNY-Buffalo; Christopher Marlowe's *Dr. Faustus*; Villanova University's *Wole Soyinka's The Lion and the Jewel*; Morgan State College; *The Drummer I Must March To*, University of Maryland; and an original work, Vincent Smith's *Nobody, An Evening With Bert Williams*, also by the University of Maryland.

The INTERCOM calendar contains information on the times, dates and location of these plays, which are open to the public. Persons wishing to attend may reserve tickets by calling (814) 863-0381 or stop by Room 137 Arts Building. Tickets,

which are priced at \$2.50 apiece, will also be available at the door.

Wagner Choral will replace Glinka Chorus

The tour of the Glinka Chorus of Leningrad has been cancelled by the Soviet Union. This Artists Series event, which was scheduled for Friday, Jan. 25, at 8:30 p.m. in Eisenhower Auditorium, will be replaced by a concert by the Roger Wagner Choral. The Wagner Choral concert will be held the same evening at 8:30 p.m. in Eisenhower Auditorium, and patrons may use the Glinka Chorus tickets for this performance.

A limited number of additional tickets to the Roger Wagner Choral will go on sale at the Artists Series HUB Booth and Eisenhower Auditorium Box Office beginning Tuesday, Jan. 22, from 9 a.m. to 4 p.m.

The Roger Wagner Choral has appeared in each of the 50 states and has toured throughout the Middle East, Europe, South America, Mexico, Canada and Japan. Leopold Stokowski called it "second to none in the world," and Eugene Ormandy has described it as "the finest chorus I have ever conducted."

Director Roger Wagner has served as guest conductor for the Los Angeles Philharmonic and has made many recordings with the Choral. The group's repertoire ranges from 16th century church music to American folk songs and spirituals and works by contemporary composers.

American College Theatre Festival XII, Region II finals. Morgan State College, *Wole Soyinka, The Lion and the Jewel*, 8 p.m., The Playhouse.

Friday, Jan. 25
American College Theatre Festival XII, Region II finals. SUNY-Buffalo, David Rabe, *Streamers*, 1 p.m.; Univ. of Maryland, Vincent Smith, *Nobody, An Evening with Bert Williams*, 8:30 p.m., both in The Playhouse.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Ronald Abler, geography, on "Geographical Effects of Changes in Federal Communications Policies."

France-Cinema, *Seven Beauties*, 7 and 9 p.m., Room 112 Kern.

Sports: gymnastics (men) vs. York of Canada, and (women) vs. Michigan State, both at 8 p.m.

Artists Series, Robert Wagner Choral, 8:30 p.m., Eisenhower Auditorium.

Saturday, Jan. 26
American College Theatre Festival XII, Region II finals. Univ. of Maryland, *The Drummer I Must March To*, 1 p.m.; Villanova Univ., Christopher Marlowe, *Dr. Faustus*, 8:30 p.m., both in The Playhouse.

Sports: basketball (women) vs. St. Joseph's, 4 p.m., (men) vs. Fairleigh Dickinson/Teaneck, 8:10 p.m.

France-Cinema, *Seven Beauties*, 7 and 9 p.m., Room 101 Kern.

Sunday, Jan. 27
Sports: volleyball (men), Nittany Lion Invitational, 9 a.m.

University Chapel Service, 11 a.m., Eisenhower Chapel. The Reverend Patricia Thomas, PSU Episcopal Student Assn., speaker.

Commonplace Theatre, *Barbarella*, 7 and 9 p.m., Room 101 Kern.

Seminars

Thursday, Jan. 17
Computer Science, Helmut Alt, computer science, on "Functions Equivalent to Integer Multiplication," 4 p.m., Room 325
Whitmore (new listing).

Acoustics, Robert Burkovitz, research director, Tedyne-Acoustics Research, on "Digital Signal-Processing Techniques in Loudspeaker System Design," 4 p.m., Room 75 Willard (new listing).

Friday, Jan. 18
Analytical Chemistry, Gary Small, graduate student, on "Computer Assisted Interpretation of Interferometric GC/FTIR Data," 11:10 a.m., Room 333 Whitmore.
Physical Chemistry, Michael Roland on "CARs Studies of Molecular Motion," 2:30 p.m., Room 333 Whitmore.

Horticulture, Nathan Hartwig, agronomy, on "Weed Control as a Science," 3:55 p.m., Room 10 Tysen.

Tuesday, Jan. 22
Organic/Inorganic Chemistry, John B. Brenner, Univ. of Tasmania, on "Studies on the Synthesis of Fused Medium-Ring Heterocycles," 12:45 p.m., Room 333 Whitmore.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Psychology, Gordon Shulman, Northwestern University, on "Asymmetry in the Control of Eye Movements and Attention," 1:15 p.m., Room 351 Moore.
Geosciences, Robert Eckhardt, anthropology, on "Human Origins: The Afar Evidence," 3:45 p.m., Room 26 Mineral Sciences.
Biology, Randall S. Alberte, Univ. of Chicago, on "The Organization of Chlorophyll in vivo — Implications for Photosynthetic Adaptive Strategies," 4 p.m., Room 105 Ferguson.

Thursday, Jan. 24
Chemistry, Andrew Kildor, Exxon Research and Engineering Co., on "Infrared Laser Chemistry of Complex Molecules," 12:45 p.m., Room 333 Whitmore.
Statistics, Ronald D. Snee, duPont, on "Statisticians in Industry: Training and Consulting," 1:30 p.m., Room 60 Willard.
Physics, E. Fagen, Univ. of Delaware, on "Applications of Solid State Physics to Energy Problems," 3:50 p.m., Room 333 Whitmore.

Mathematics, Harry Furstenberg, Hebrew Univ., on "Dynamic Systems in Number Theory," 4 p.m., Room 102 McAllister.
Statistics, Ronald D. Snee, duPont, on "Identification and Interpretation of Large Tables of Data," 4 p.m., Room 60 Willard.
Acoustics, James B. Moreland, Westinghouse R & D Center, Pittsburgh, on "Acoustics and Noise-Control Research at Westinghouse," 4 p.m., Room 75 Willard.

Friday, Jan. 25
Analytical Chemistry, Eugene Karwacki, graduate student, on "Molecular Beam Epitaxy," 11:30 a.m., Room 333 Whitmore.
Physical Chemistry, John Lowe, chemistry, on "MO Theory and Organic Conductors," 2:30 p.m., Room 333 Whitmore.

Exhibits

Ferguson Library: Forestry exhibit, "Douglas Fir Research at Penn State," prepared by Edgar H. Palpani.

HUB Galleries: Traveling print exhibit, The Gallery. Nancy Strain, prints and drawings, Browning Gallery. John Caroline, stained glass; Central Pa. Scholastic Art Award exhibit, through Jan. 26; PSU Camera Club exhibit, opens Jan. 27.

Kern Commons: Mary Keibhan, paintings, and Marty Tyllien, ceramic constructions, through Jan. 19. Penn State Film Follies posters, opens Jan. 20.

Museum of Art: With McCoy, recent paintings; sculpture from the permanent collection; Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager.

Pattee Library: The 1980 Olympics, books, brochures, paraphernalia. Main Lobby. Martin Pasco, paintings and drawings, through Jan. 25. Lending Services Lobby. "The Marvelous Travels of Baron Muchausen," from the Allison-Shelley Collection, Rare Books Room.

Visual Arts Bldg. Zoller Gallery: Graduate Student Show, through Jan. 20. McCoy Retrospective, opens Jan. 27.

Tom Wilkinson to play in Jan. 19 doubleheader.

News in brief

(Continued from page 1)

Post Office, as well as from the Immigration and Naturalization Service — but only until Jan. 31. Aliens should complete the cards and return them to the Post Office.

All aliens, even those holding permanent resident status, must comply with this regulation or face severe penalties.

Social Security base up

The Department of Accounting Operations reminds faculty and staff members that if their earnings are greater than \$22,900, their social security (FICA) deduction will be higher in 1980, as mandated by Federal law.

The social security base increases from \$22,900 to \$25,900, effective Jan. 1, 1980. The rate of 6.13 percent remains the same. The maximum annual deduction will be \$1,587.67. This is an increase of \$183.90 above the 1979 maximum.

Those affected by this increase will ultimately receive higher benefits from Social Security. Since benefits are based on amounts paid into the system, each time the maximum base increases, it means that those affected will draw more benefits.

Winter Carnival dinners

at HUB Thursday and Friday

The Terrace Dining Room at the Hetzel Union Building will hold Winter Carnival candlelight dinners from 4:45 to 6:45 p.m. Jan. 17 and 18.

Entrees will include boneless breast of chicken with cranberry dressing, roast rib

of beef au jus, seafood newburg on bed of rice, braised lamb with mushrooms and wine sauce, and grilled ham steak with spiced fruit.

*** 1/4

"Be Penn State Proud," a 9½-minute presentation about Penn State — its missions, accomplishments and public service programs — has just been released by the Office of Public Information and Relations.

Illustrated with scenic shots from Penn State's Campuses, "Be Penn State Proud" is available either as a slide/audio cassette program or as a 3/4-inch videocassette.

Faculty and staff members who would like to borrow the program to use in either on- or off-campus presentations should contact Art Stober, Room 312 Old Main, University Park, PA 16802, or telephone (814) 865-7517.

Old Main Christmas party helps Meals on Wheels

Spirited bidding in a "Silent Auction" held Dec. 19 in Old Main has resulted in a check for \$184.85 being sent to Meals on Wheels in State College.

Employees in Old Main brought in a dazzling array of hand-made Christmas centerpieces and ornaments — enough to fill a large table in the second floor conference room — on the day of the Old Main Christmas Party.

A sheet of paper was placed beside each ornament so that those who worked in the building and all visitors could write down a bid for the trinket they liked best. Competition was encouraged — each bid

had to be higher than the ones already recorded.

The quality of the ornaments and the spirit of the bidders were so high that this year's auction returned \$100 more than last year's.

Catering service available

A catering service, available for use by faculty and staff members, is now operating under the supervision of the Food Service and Housing Administration program in the College of Human Development.

The Catering Division of the Penn State Hotel and Restaurant Society will cater parties of up to 100 persons on weekends at the Maple Room in the Henderson Human Development Building. During the week it will furnish catering services for parties of any size at locations around the State College area.

The students in the Society will also offer Sunday brunch each week from 11 a.m. to 2 p.m. at the Maple Room, beginning with a Super Bowl Sunday Brunch Jan. 20.

The Penn State Hotel and Restaurant Society has catered dinner-theater and madrigal dinners at the Kern Graduate Center, and has serviced other banquets.

Interested persons may call 865-1736 during the day or 238-5721 in the evening.

Address change for Small Industries Research

Effective immediately, the office address for Small Industries Research will be Room 225 Pond Laboratory. The telephone number remains the same — 865-9519.

toured for the U.S.O. in the Philippines. In 1944, he made his concert debut at Town Hall in New York and continued annual concert tours until 1970, when he joined the faculty of the Department of Theatre Arts at SUNY-Brock.

His first program at the University will be a discussion of "Voice Training for the Actor" from 9:30 to 10:50 a.m. Monday, Jan. 21, in Room 119 Arts Building. That afternoon, he will present a lecture on "The Oral Tradition of Myth, Folklore and Legend" at 2:20 p.m. in Room 112 Kern.

On Tuesday, Jan. 22, he will discuss "A Reflection on Folk Song" for the Comparative Literature Luncheon from 12:15 p.m. to 2 p.m. at the Hotel State College. At 4 p.m., Tuesday, Mr. Dyer-Bennet will join pianist Phil Dettra to present "Poetry in Translation: Schubert's Die Schöne Müllerin in the Music Building Recital Hall."

Mr. Dyer-Bennet's visit is supported by the College of the Liberal Arts, the School of Music, the Departments of English, Speech Communication, Classics, and Theatre and Film, along with IAHS. All five sessions are open to the public.

Symphonic Wind Ensemble to offer Jan. 23 program

A program of English classics for wind instruments will be presented by the Penn State Symphonic Wind Ensemble at 8:30 p.m. Wednesday, Jan. 23, in the Music Building Recital Hall.

Works by five composers have been selected for the program, among them Gustav Holst's "Second Suite" and "Mars, From the Planets," and Percy Grainger's "Lincolnshire Posy."

The group will also perform Gordon Jacob's "Music for a Festival"; Gilbert and Sullivan's "Pineapple Poll," a four-movement composition based on melodies from the works of Sir Arthur Sullivan and arranged by Charles MacKarens; and "March — Sea Songs" by Ralph Vaughan-Williams.

The Penn State Symphonic Wind Ensemble is composed of some 40 University students. Smith Toulson, associate professor of music, conducts the group.

Reorganization

(Continued from page 1)

years, he has served effectively as chairman of the Council of Academic Deans, chairman of the Faculty Senate, vice-chairman of the University Council, and chairman of major subcommittees or task forces in developing both the 1972 and 1980 University master plans.

Commenting on the reorganization, Dr. Scannell said:

"Joe Paterno is an acknowledged national leader in intercollegiate athletics. His promotion will assure that the entire Penn State athletic program will directly benefit from his insights and abilities as we continue to strive for excellence.

"At the same time, I am pleased that Mr. Czejak's new role with Vice President Patterson will assure that his valued experience and views will not be lost to the University."

Dr. Oswald's statement also emphasizes the vital importance in the years ahead of the director of athletics reporting to the senior vice president for finance and operations as well, so as to have a strong backup within the central administration to assure a fiscally sound department and a viable set of programs and policies.

"The department activities are unique in that they command very broad interest in, and impact upon, the University and its many external constituencies as well as the general public," Dr. Oswald explained. "Moreover, they represent a large, multifaceted, complex financial operation in need of constant and careful attention as to their fiscal condition."

"On the other hand, one of the unique strengths of the department has been and will continue to be its membership and participation in the mission of the College of Health, Physical Education and Recreation."

To deal effectively with these special characteristics, said Dr. Oswald, it was necessary to adjust the reporting relationship of the athletic director.

As for the use, maintenance and financing of facilities used by the department and the college, responsibility will be shared by the dean and athletic director under policies and procedures to be spelled out in a later document.

Dr. Oswald said sufficient staff would be provided the new athletic director to permit him to carry out effectively all of his responsibilities and to assure that his positive philosophy on sports will be integrated into all athletic programs at the University."

Commenting on his promotion, Mr. Paterno said that he appreciates the confidence that the University administration has shown in him. "I accept the challenges the position offers," he said, "and look forward to the 1980s, which promises to be a most exciting decade for intercollegiate athletics at Penn State."

Mr. Czejak, a native of Mt. Pleasant, PA, has been an employee of Penn State for 27 years. He received his bachelor's and master's degrees from Penn State in 1948 and 1954. While an undergraduate, he played on the basketball and football teams.

From 1948 to 1951, Mr. Czejak was on the athletic staff of Johns Hopkins University. He also served as a captain with the Marine Corps in the Korean War.

He joined the Penn State staff in 1953 and served in various positions in the Athletic Department before being named athletic director on July 1, 1967.

Mr. Paterno, a native of Brookville, NY, was graduated from Brown University with a bachelor's degree in English literature in 1950. He played quarterback on Brown's football team, and, after graduating, became an assistant football coach under Rip Engle at Penn State.

Named head coach in 1966, Mr. Paterno has become the most successful veteran coach in college football today. Pleased with his won-lost record, he is even more pleased with the fact that, of the 270 scholarship athletes who have played football for him, 94 percent have graduated.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made to that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Jan. 24, 1980. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), or status as a disabled or Vietnam era veteran.

SENIOR BIOMEDICAL ENGINEER — COLLEGE OF MEDICINE, Hershey Responsible to a Research Associate for the design and testing of biomedical electrical equipment and systems. Bachelor of science degree or bachelor of technology degree in engineering, plus two to three years of effective experience.

SENIOR COPY EDITOR — UNIVERSITY PRESS, University Park Responsible for editing a variety of book manuscripts, including clearing permissions, proofreading, and indexing. Coordinate copy editing with other Press functions, supervising other editors and maintaining cooperative relations with authors and production staff. Bachelor's degree in arts, sciences, journalism or equivalent, with evidence of facility in written expression and critical analysis. Two to three years of effective experience, including supervisory. Facility with a foreign language desirable.

RESEARCH ENGINEER — COLLEGE OF HEALTH, PHYSICAL EDUCATION AND RECREATION, University Park Design and develop technical data analysis system planning experimental set-ups, supervise lower level employees, conduct post-design investigations of systems so as to verify validity and effective utilization of the systems. Program and maintain the laboratory computer and provide informal instructions to graduate students. Bachelor's degree, preferably in electrical engineering with advanced degree work highly desirable. Two or three years of effective experience, including work in computer science.

Faculty Aide funds

(Continued from page 1)

by the student's financial needs.

Ms. Schumacher points out that funds are still available and that many positions are unfilled.

"We need more students to complete the application process," she urges.

'Odyssey' reading

(Continued from page 1)

form by the voice and not by the pen," Mr. Dyer-Bennet has said. "Homer spoke it, he did not write it. The Odyssey was meant for the ear, not for the eye."

Mr. Dyer-Bennet has devoted five years to mastering his performance of the Fitzgerald translation, which he is recording with the assistance of a grant from the National Endowment for the Humanities.

Mr. Fitzgerald, a professor of English at Harvard University, has achieved recognition both as a poet and a translator from the classics. His contributions in the latter area include versions of Sophocles' *Antigone*, *Oedipus Rex* and *Oedipus at Colonus*, and *The Iliad*.

Born in England, Mr. Dyer-Bennet was raised in British Columbia and California and received his education in Germany and at the University of California. His interest in traditional singing was encouraged by Sven Scholander of Sweden, a well-known self-accompanied singer, and he continued his vocal studies with G.W. Beckman.

During World War II, Mr. Dyer-Bennet

Arts roundup

Ibsen tickets on sale

Tickets are on sale now for Henrik Ibsen's *An Enemy of the People*, Penn State University Resident Theatre Company's (URTC) third production of its inaugural season. The drama will run Feb. 7-9, 12-16, and 19-23 at the Pavilion Theatre, with an 8 p.m. curtain time. As with all URTC productions, the cast features professional and student performers.

Brian Morgan, assistant professor of theatre, is directing the production. He also directed last season's *Our Town* and portrayed Mr. Kirby in URTC's *You Can't Take It With You*.

Tickets for *An Enemy of the People* may be reserved by calling 814-865-1884, or purchased at the URTC Box Office in Arts II Building. Box office hours are 10 a.m. to 6 p.m. Mondays through Saturdays. Mail orders can be sent to: URTC, Room 137 Arts Building, University Park, PA 16802.

Penn State Intercom

The Challenge of the '80s

Editor's note: This article is part of a series in which the academic deans reflect on what lies ahead for their colleges in the '80s.

If the latter years of the '70s inaugurated a period of retrenchment for the College of Education, its response has embodied the goals set forth for Penn State in the '80s — "quality, selectivity, and flexibility."

"Indeed, we have been very selective in our retrenchment decisions and in making plans for the future of the College in order to preserve a critical mass of personnel and programs so that we can continue our national leadership as a first rate university

Dean Hermanowicz

college of education," says Dean Henry J. Hermanowicz.

"In fact," he adds, "many of the general propositions in the *Perspective on the '80s* have become harsh but constructive reality in the College of Education."

Dean Hermanowicz indicates that from his office on down, the College has been reorganized from essentially 11 academic units to its present five divisions as a means of reducing administrative overhead and to facilitate flexible use of faculty. In addition, last year an intercollegiate organizational realignment was completed by shifting Art and Music Education to the College of Arts and Architecture.

Confronted with declining undergraduate enrollments, the College of Education has reduced the number of its faculty and staff members, has eliminated or reduced some service units, and is phasing out its Industrial Arts Education program. Internal shifts of resources and some faculty reassignments have also taken place, and the College has relinquished over 4,000 sq. ft. of space for reassignment in the University.

"All of this has been done as a result of extensive consultation with the faculty," says Dean Hermanowicz, and as one decision head put it, "The College is now lean and mean." Dean Hermanowicz adds, "Despite our leanness, we have tried to retain enough collective scholarship, talent, and muscle to help fashion an even more distinguished College of Education for the future."

Dean Hermanowicz notes that there are currently more than 1,300 schools,

(Continued on page 6)

Trustees adopt revised '80s "Perspective"

One administrative unit authorized for CWC, Continuing Ed

The administration of the University's Commonwealth Campus system, including each of the 17 campuses and the central office of the dean of academic instruction, and the University-wide Continuing Education system, including the central office of the vice president for Continuing Education, will be integrated into a single University-wide administrative unit.

The Trustees have authorized President Oswald and Provost Eddy to initiate a search for a qualified individual to be appointed vice president and dean to carry out the integration and head the new administrative unit.

They asked that the search be completed, if possible, prior to the Board's July meeting. Initially, the newly integrated unit will be known as the University-wide System of Continuing Education and Commonwealth Campuses.

"This integration will provide for more effective administration of both systems at lower cost," Dr. Oswald told the Trustees.

"The effects will be purely administrative and will not alter academic organization, authority, or personnel policies. Departmental responsibilities, promotion and tenure, for example, will not be affected."

Dr. Oswald said the goals of the integration include:

- Improved coordination of educational activities at the Commonwealth Campuses.

- Maintenance of the integrity of resident instruction at the Commonwealth Campuses, and making all credit instruction at the Commonwealth Campuses the responsibility of a unified administration.

- Reduction of administrative overhead.

- Strengthening Penn State's ability to provide educational opportunities statewide.

- Retention of the central identification and management of the University's Continuing Education programs.

- Maintenance of the integrity and transportability of the baccalaureate program among all Penn State campuses.

- Enhancement of the distinctive identity of all campuses.

In creating the new position of vice president and dean, the Trustees agreed that the new administrator's first six months in the new post would be devoted to developing the details of the integration with appropriate faculty and administration consultation. When these have been approved by the President and the Provost, the integration of the two units into a single unit will occur. The vice president and dean will report to the provost and shall serve as a member of the President's Staff and the Council of Academic Deans.

Under the current organization, the system of 17 Commonwealth Campuses with a resident student enrollment of about 13,000 students is administered under the office of the dean of academic instruction for Commonwealth Campuses.

The vice president for Continuing

(Continued on page 3)

Capping a two-year period of discussion and review, the Board of Trustees has adopted a revised *Perspective on the '80s* as the University's policy guideline for the next decade.

In adopting the document, the Trustees noted that they agreed in principle with the assumptions and directions set forth in the *Perspective*, including the agenda of actions needed to implement them.

The Board noted that specific changes which require Board action will be returned for Trustee approval. It required that an annual review of the assumptions and implementation be conducted and its outcome reported to the Trustees.

Subtitled, "An Agenda for Action for The Pennsylvania State University," the *Perspective* was developed by a Steering Committee of Penn State faculty members, administrators, and students appointed by President Oswald. Co-chairmen of the Steering Committee were Provost Eddy and Dr. Stanley O. Ikenberry, former senior vice president for administration and now president of the University of Illinois.

After two years of preparation, a draft version was released in October and members of the Penn State community, including Trustees, were asked to review it and recommend changes.

According to Dr. George J. McMurtry, chairman of the University Faculty Senate and a member of the Steering Committee, the evaluation process was greatly enhanced by the "free and open atmosphere" in which discussion was conducted.

"I particularly appreciated the freedom within the Steering Committee not only to make suggestions but also to express disagreements and discuss unresolved issues with candor and completeness," Dr. McMurtry said.

According to Dr. Eddy, 672 specific recommendations for revisions were considered in preparing the final version. Over half of the recommendations were incorporated in the final document, he reported.

"Members of the Steering Committee and members of the University community have a right to be proud of their work in preparing the *Perspective*," Dr. Oswald said. "Their long hours of intense work — much of it on their own time — and their diligent follow-up procedures in making revisions have resulted in a document that

will be an important part of Penn State's growth for the 1980s and beyond.

"On behalf of the University, I want to express my appreciation to all members of

At its meeting last week, the Board of Trustees adopted the following resolution:

WHEREAS, The Board of Trustees has adopted the document, "A *Perspective on the '80s*, An Agenda for Action for the Pennsylvania State University," and,

WHEREAS, This document will provide the University community with a sense of direction in developing recommendations for adoption of policy and actions by the Board of Trustees and other appropriate bodies within the University; and,

WHEREAS, The document was developed with a high degree of openness and full community participation, as well as an approach that was both multi-disciplinary and multi-functional;

NOW THEREFORE BE IT RESOLVED, that the Board of Trustees expresses its sincere appreciation to and commendation of the administration, the Steering Committee, its staff, and all others who assisted the Steering Committee in the development and production of this major statement.

the University community for their excellent efforts in preparing this most important document. All of us at Penn State are, indeed, indebted to all of them."

During the period between July 1978 and December 1979, Steering Committee members held 33 meetings lasting from two to four hours and seven all-day sessions. They also met twice with the Educational Policy Committee of the Board of Trustees and held numerous meetings with student and faculty representatives at University Park and the branch campuses. Members spent many additional hours preparing and reviewing discussion materials and drafts of the report as it progressed.

(Continued on page 4)

Preliminary sketch plans for HUB approved

A centralized bookstore and a new food service concept are two features of preliminary sketch plans for renovation of the Hetzel Union Building (HUB).

Trustee approval of the preliminary sketches now permits further planning and consultation with concerned groups, according to Ralph E. Zilly, vice president for business.

"The plan's intent is for retrenchment in building area, a far better use of space and improved service to everyone using the HUB," Mr. Zilly said. "The HUB is the most heavily used building on campus."

"Although these are just preliminary sketches, it's been apparent for some time that a number of major renovations to the HUB are needed," he noted. "The building is 25 years old now, and in many places it shows. The plans are an attempt to innovate as well as renovate."

None of the proposed renovations would involve the use of tuition money or State funds.

"Housing and Food Service operations pay their own way," Mr. Zilly said, and the Bookstore does too. The project would be self-amortizing.

The Bookstore's operations have been fragmented since they began in 1973. It is located in two different rooms in the HUB and on the ground floor of McAllister Building.

"Putting all product lines under one roof permits more efficient operations and would give the Bookstore ideal retail floor arrangements for the first time in its history. No changes are planned in its product line," Mr. Zilly explained.

Main features of the preliminary drawings include:

(Continued on page 3)

Penn Staters

Dr. Frederick C. Wedler, associate professor of biochemistry, has received a \$155,000 Faculty Research Award from the American Cancer Society. He is one of only six researchers in the country to receive Faculty Awards during the last funding period. Dr. Wedler will use his grant to try to tailor make chemical inhibitors for use in cancer therapy. These inhibitors are designed to shut down key chemical changes in living cells to stop cell growth.

Dr. Wedler, who joined the Penn State faculty in 1978, served previously as an associate professor of chemistry at Rensselaer Polytechnic Institute. He also served as a postdoctoral fellow at the University of California at Los Angeles and a National Institutes of Health Predoctoral Fellow at Northwestern University where he earned his doctoral degree in 1968. His B.S. was granted by the University of North Carolina.

Dr. Gene M. Love, head of the Department of Agricultural Education, has received the Distinguished Service Award of the American Association of Teacher Educators in Agriculture. The award, the highest recognition given in the U.S. for leadership in teacher education in agriculture, was conferred at the annual meeting of the Association in Anaheim, CA.

Dr. Thomas Benson, professor of speech communication, has been named to a three-year term on the editorial board of the Quarterly Journal of Speech, published by the Speech Communication Association.

Richard L. Crowley, assistant vice president for business services, presented a seminar, "Advance Purchasing Management Institute" at the meeting of the National Association of Educational Buyers this month in Orlando, FL.

Bookshelf

Dr. Marshall E. Wilcher, assistant professor of political science at New Kensington, is the author of a book, *Environmental Cooperation in the North Atlantic Area*, published by University Press of America.

The book examines the environmental activities in the early '70s of the European Communities, the Organization for Economic Cooperation and Development, the United Nations Economic Commission for Europe, and the North Atlantic Treaty Organization.

Dr. Wilcher illustrates how differences in organizational form, institutional powers, treaty instruments, and the level of integration have hampered the ability of the organizations studied to influence directly national environmental policies of member states.

Dr. Wilcher is a former military officer with NATO in Europe. He holds a doctorate from the School of Public and International Affairs, University of Pittsburgh.

Dr. Gary W. Peterson, professor of soil genesis and morphology and co-director of the Office for Remote Sensing of Earth Resources is a co-editor of a book entitled *Planning the Uses and Management of Land*.

Published by the American Society of Agronomy, The Crop Science Society of America, and The Soil Science Society of America, it includes information on several data bases for land resources and an overview of major land use planning principles and problems.

Dr. Thomas J. Knight, associate professor of American studies and history and associate dean for Commonwealth Campuses, College of the Liberal Arts, is the author of a new book entitled *Latin America Comes of Age*, published by Scarecrow Press.

The book is a study of Latin-American social and intellectual history. It also describes intellectual life in the Caribbean and among black and Hispanic minorities in the United States. The influence of the "boom" in Latin American literary and political life on the hemisphere and the world is covered as well.

Dr. E. Willard Miller, professor of geography and associate dean for resident instruction in the College of Earth and Mineral Sciences, and Ruby M. Miller, former map librarian at Pattee Library, are the authors of a bibliography entitled *Economic, Political and Regional Aspects of the World's Energy Problems*, published recently by Vance Bibliographies. With 100 pages and over 1,000 references, the book provides a broad perspective of the economic and political study of energy.

25-year chair

Dr. Vernon V. Aspaturian, Evan Pugh professor of political science, was honored recently for 25 years of service to the University. A specialist on international relations and Soviet affairs, Dr. Aspaturian is director of the Slavic and Soviet Language Area Center at Penn State.

Before joining the faculty in 1952, he earned a B.A. and a Ph.D. in political science from the University of California at Los Angeles. He served in World War II and the Korean conflict.

More recently, Dr. Aspaturian has been a visiting professor at Columbia University, The Johns Hopkins University and the Graduate School of International Studies in Geneva, Switzerland. He also is a research associate in the Washington Center of Foreign Policy Research, and serves as consultant to the RAND Corporation and to the Army War College.

His most recent book, which is being published by Indiana University Press, is *Euro-Communism between East and West*. Dr. Aspaturian served as a co-editor and co-author.

In 1971, his book, *Process and Power in Soviet Foreign Policy*, was published by Little, Brown and Company, Inc. It is a study of how ideology is converted into policy by institutions and individuals in the Soviet Union, and deals extensively with the linkages between domestic social demands and pressures, internal factional politics and Soviet foreign policy.

Dr. Aspaturian's earlier books include *The Union Republics in Soviet Diplomacy*, and *The Soviet Union in the World Communist System*. A co-author of *Modern Political Systems: Europe and Foreign Policy in World Politics*, Dr. Aspaturian has also written dozens of articles and a number of book chapters in his area of specialization.

Appointments

University Park

Michael L. O'Connor as assistant professor of dairy and animal sciences. B.S., U. of Rhode Island. M.S., Ph.D., Va. Polytechnic Institute & State U.

Robert N. Pangborn as assistant professor of engineering science and mechanics. B.S., B.A., M.S., Ph.D., Rutgers U. Formerly research associate, Rutgers College of Engineering.

Mary E. Bell as senior assistant librarian, general reference section. B.A., M.L.S., SUNY-Albany. Formerly assistant librarian, U. of Virginia. Eileen K. Bell as assistant librarian, serials cataloging section. B.A., Wittenberg U.; M.A., U. of Cincinnati. M.L.S., U. of Kentucky. Karen Nadecki as assistant librarian, serials cataloging section. B.A., River College, M.S.L.S., U. of North Carolina. Ingrid B. Caribom as research associate, Computer Center. B.S., U. of Stockholm. M.S., Cornell U. Ph.D. in progress, Brown U. Formerly research assistant, Brown U. William J. Sabol as research assistant, Applied Research Lab. B.S.M.E., Penn State. Formerly mechanical engineer, Philadelphia Naval Shipyard.

Roy A. Shaw as research assistant, Applied Research Lab. B.S.M.E., Penn State. Formerly engineer, Mack Trucks, Inc. Alfred J. Nann Jr. as lecturer in accounting and management information systems. B.A., Syracuse U. M.S.B.A., Ph.D., U. of Massachusetts. Formerly lecturer, instructor, U. of Massachusetts.

Hershey

Robert R. Kulkowski as assistant professor of anatomy and physiology. A.B., U. of Rochester; Ph.D., SUNY-Albany. Formerly assistant professor, U. of Chicago.

Viewpoint

Editor's note: the following letter was written by Dr. Grant W. Sheritt, associate professor of animal science, in response to INTERCOM's Jan. 10 article on the reaction of the University Faculty Senate regarding the proposal from the Subcommittee on the Role of the Adviser.

These comments are given from the perspective of serving for two years on two different Senate sub-committees on academic advising.

It is my understanding that both committees were appointed to attempt to formulate steps to improve advising. One may find in a report from the Council of Academic Deans (1963) that advising must be regarded as a vital service to students and that it was one of six items considered in promotions and salary increases. In the "Academic Plan" of 1972 it is stated, "the University will work to strengthen mechanisms for student advising." In "A Perspective on the '80s" we find a concern for advising and the statement in the recommendations that the University must "devise means of evaluating and rewarding excellence in advising."

In the two sub-committees mentioned earlier students and faculty attested to a lack of faculty concern, a lack of faculty interest, and a lack of reward for advising. Indeed ample evidence was presented by students that faculty advising is non-existent for many students.

There was also direct faculty evidence that some faculty believed they should not spend their time advising students although they were assigned these duties. In both committees it was believed that it was this lack of interest in advising, due to a lack of reward for advising, that led to the poor quality, and, in many cases, the complete lack of faculty advising.

It was the opinion of the sub-committee that a specific statement in promotion and tenure procedures would be the one single factor that would lead to improved advising. This does not imply all faculty would be advisers or that all faculty would be evaluated as advisers; only those specifically assigned advising as a portion of their faculty duties.

There has been much comment on the problems of evaluating advising. Certainly it is more difficult than evaluating teaching, research or public service. Indeed it is apparent we have no agreement on how to evaluate any of these and it is widely believed we do an inadequate job on all of them. It should be as appropriate to use student input and peer evaluation for advising as well as for teaching. This undue concern over evaluation appears to be the excuse for excluding advising from consideration in promotion and tenure.

We have given lip service to improving advising and to its importance as a faculty function for years but our actions belie our

statements. It seems to me it is time something concrete was done to improve advising and show the University is committed to advising as a faculty responsibility. If the faculty does not accept that responsibility, some other means of advising students — non-faculty — should be established.

Promotions

Faculty

William E. Sharpe to assistant professor of forest resources extension, College of Agriculture.

Staff Exempt

Nancy P. Durkin to assistant dining hall supervisor in Housing and Food Service.

Diane Freytag to assistant director of undergraduate admissions in Undergraduate Admissions.

A. Fraser Grigor to manager, housing services in Housing and Food Services.

Michael L. Kulig to budget planning analyst in Budget and Planning.

Marjorie J. Plouse to senior staff nurse at Hershey.

Cecilia R. Sanker to dining hall supervisor in Housing and Food Services.

Louise Tregre to administrative assistant in Management Services.

Clifford G. Way to manager, housing services in Housing and Food Services.

Clerical

Betsy L. Brooks to customer service clerk A in Bookstore.

Debra F. Brown to production clerk A in Housing and Food Services.

Wanda J. Decker to secretary A in Agriculture.

Gwendolyn C. Keene to coder A in Undergraduate Admissions.

Pamela J. Madden to Clerk A-CWSP in Student Administrative Services.

Jeanne E. Peters to cashier-check cashier in Bookstore.

Beverly A. Sampsell to secretary B in Agriculture.

Sherry K. Speese to secretary B in Continuing Education.

Margaret B. Taylor to clerk typist A at Oponit.

Carole A. Witherite to clerk A-CWSP in Student Affairs.

Technical Service

Marty H. Early to anesthesia technical aid at Hershey.

N. Eileen Keller to operating room assistant at Hershey.

Alexander A. Quinn to maintenance worker, utility at Wilkes-Barre.

Douglas A. Readler to utility worker at Hershey.

Robert M. Rodgers to second cook-main kitchen in Nittany Lion Inn.

Merrill L. Walker to maintenance worker, utility in ARL.

Robert C. Wolfe to maintenance worker at Hershey.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

University Park Calendar

Jan. 24-Feb. 3

Special Events

Thursday, Jan. 24

Cinematheque, *Vallée, My Name Is Nobody*, 6:30 and 8:30 p.m., HUB Assembly Hall.
American College Theatre Festival XII, Region II finals, Morgan State College, Wale Soyinka, *The Lion and The Jewel*, 8 p.m., The Playhouse.

Friday, Jan. 25

American College Theatre Festival XII, Region II finals, SUNY/Bufalo, David Rabe, *Streamers*, 1 p.m.; Univ. of Maryland, Vincent Smith, *Nobody*, An Evening with Bert Williams, 8:30 p.m., both in The Playhouse.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Ronald Abler, geography, on "Geographical Effects of Changes in Federal Communications Policies."

France-Cinema, *Seven Beauties*, 7 and 9 p.m., Room 112 Kern.

Sports: gymnastics (men) vs. York of Canada, and (women) vs. Michigan State, both at 8 p.m.

Artists Series, Roger Wagner Chorale, 8:30 p.m., Eisenhower Auditorium.

Saturday, Jan. 26

American College Theatre Festival XII, Region II finals, Univ. of Maryland, *The Drummer! Must March To*, 1 p.m.; Villanova Univ., Christopher Marlowe, *Dr. Faustus*, 8:30 p.m., both in The Playhouse.

Sports: basketball (women) vs. St. Joseph's, 4 p.m. and (men) vs. Fairleigh Dickinson/Teaneck, 8:10 p.m.

France-Cinema, *Seven Beauties*, 7 and 9 p.m., Room 101 Kern.

Sunday, Jan. 27

Sports: volleyball (men), Nittany Lion Invitational, 9 a.m.

University Chapel Service, 11 a.m., Eisenhower Chapel. The Reverend Patricia Thomas, PSU Episcopal Student Assn., speaker.

Commonplace Theatre, *Barbarella*, 7 and 9 p.m., Room 101 Kern.

Monday, Jan. 28

First day to sign Spring Term NDLS and University Long Term Loans, Room 108 Shields.

Last date for March graduates to deliver final copy of theses to Graduate School.

Last date for Departments to certify to Graduate School completion of required papers for March graduates.

Last date for March graduates to order cap, gown and hood locally.

Audio Visual Services, Connections film, "The Long Chain," 12:15 p.m., Room 112 Kern.

Shakespeare videotape, BBC, *Julius Caesar*, 6:30 p.m., Room 101 Chambers.

Sports: basketball (men) vs. Richmond, 8:10 p.m.

MENC Student Recital, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, Jan. 29

Galleries, 10:30 a.m., Museum of Art. E. McSherry Fowble, graphic curator of graphics and paintings, Winterthur Museum, on "Pennsylvania Prints from the Collection of Ralph M. Yeager and John C. O'Connor."

WPSX-TV doc. series, *Religion in Rural America*, "Last Words," noon, Kern Lobby.

Comp. Lit. Lecture, 12:15, talk, 1 p.m., Hotel State College. Landon C. Burns, English, on "Epitaphy Structure in Historical Novels."

School of Music Common Hour, student performances, 4 p.m., Music Bldg. Recital Hall.

Dance Workshop, student choreography presented, 5:45 p.m., White Bldg. Dance Theatre.

Comp. Lit. Film Series, Rene Clement, *Forbidden Games*, 7 and 9 p.m., Room 101 Chambers.

Sports: basketball (women) vs. Cortland State, 7 p.m.

English Colloquium, 8 p.m., Room 101 Kern.

John Balaban, English, reads his own poetry.

Wednesday, Jan. 30

Alard String Quartet concert, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, Jan. 31

Brown Bag Performance Arts Hour, 12:30 p.m., HUB Ballroom. Interludia Folk Dance Club performance.

Gymnast Jan Anthony defies the laws of gravity. Women's team meets Cal State Feb. 2.

Campus Colleagues meeting, 4:30-6:30 p.m., Assembly Room, Nittany Lion Inn. Audrey Rodgers, English, and others discuss "The Women's Studies Option."

Cinematheque, Teshigahara, *Woman In The Dunes*, 6:30 and 8:30 p.m., HUB Assembly Hall.

UnCommon Theatre, student review, *Vanities*, 8 p.m., Room 112 Kern.

Friday, Feb. 1

Deadline for applying for Fellowships through Graduate School programs.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Robert Frank, English, emeritus, on "The Pleasures of Sisyphus: Reflections on Literary Study."

IFC Dance Marathon, 7 p.m.-7 p.m. Sunday, Feb. 3, White Bldg.

UnCommon Theatre, *Vanities*, a character study of three high school cheerleaders, 8 p.m., Room 112 Kern.

Artists Series, New York Chamber Soloists, *Acis and Galatea*, 8:30 p.m., Schwab.

Saturday, Feb. 2

Sports: fencing (men) vs. Cornell, 1 p.m.; swimming and diving (men) vs. Temple and Texas A&M, 2 p.m.; wrestling vs. Navy, 2 p.m.; volleyball (men) vs. Army, 7:30 p.m.; gymnastics (women) vs. Cal State/Fullerton, 8 p.m.

UnCommon Dinner Theatre, dinner, 6:30 p.m., Room 102 Kern; *Vanities*, 8 p.m., Room 112 Kern.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Feb. 3

University Chapel Service, 11 a.m., Eisenhower Chapel. The Reverend Aaron Buzzelli, O.S.B., Penn State Catholic Center, speaker.

UnCommon Dinner Theatre, dinner, 6:30 p.m., Room 102 Kern; *Vanities*, 8 p.m., Room 112 Kern.

Richard Laird, double bass recital, 8:30 p.m., Music Building Recital Hall.

Seminars

Thursday, Jan. 24

Meteorology, John A. Dutton, meteorology, on "The Fundamental Theorems of Climate Theory—Some Proved, Some Conjectured," 3:55 p.m., Room 112 Walker (new listing).

Computer Science, Percy Tatic, computer science, on "On Pacing Rates and Working Sets for the Markov Chain Model of Program Behavior," 4 p.m., Room 325 Whitmore (new listing).

Friday, Jan. 25

Analytical Chemistry, Eugene Karwacki, grad. student, on "Molecular Beam Epitaxy,"

11:10 a.m., Room 333 Whitmore.

Physical Chemistry, John Lowe, chemistry, on "MO Theory and Organic Conductors," 2:30 p.m., Room 333 Whitmore.

Monday, Jan. 28

Microbiology, Cell Biology, Biochemistry and Biophysics, Roland M. Nardone, Catholic Univ., on "The Nexus of in vitro and in vivo Toxicology," 4 p.m., Room 101 Althouse.

Tuesday, Jan. 29

Organic/Inorganic Chemistry, J. Gainer, grad. student, on "Epoxidations with Peroxides: Mechanisms and Stereochemistry," 12:45 p.m., Room 333 Whitmore.

Geosciences, Keiliti Aki, MIT, on "Volcanic Tremors and Magma Transport Mechanisms," 3:45 p.m., Room 26 Mineral Sciences.

Astronomy, Alan P. Manser, Univ. of California/San Diego, on "Relativistic Motion in Quasars: Where Have All the X-rays Gone?," 4 p.m., Room 445 Davey.

Chemistry, John P. Fackler, Case-Western Reserve, on "Studies of Compounds Containing Metal-Sulfur and Metal-Selenium Bonds—Structures, Chemistry and Dynamics," 8 p.m., Room 333 Whitmore.

Thursday, Jan. 31

Chemistry, Robert K. Boeckman, Jr., Wayne State Univ., on "Studies of Methodology for Synthesis of Complex Natural Products," 12:45 p.m., Room 333 Whitmore.

Physics, Stuart Solin, Michigan State Univ., speaker, 3:30 p.m., Room 445 Davey.

Meteorology, Hampton Nish Shirer, meteorology, on "The Unfolding Story of Singularities in Truncated Spectral Models," 3:55 p.m., Room 112 Walker.

Friday, Feb. 1

Analytical Chemistry, Joseph Yakupkovic,

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

grad. student, on "Analysis of Vitamins in Foodstuffs by HPLC," 11:10 a.m., Room 333 Whitmore.

Physical Chemistry, Mark Crisanti on "Kinetics of the Folding of the α -subunit of Tryptophan Synthase Base," 2:30 p.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: Bob Andriuffi, paintings; Ron Galas, glass objects, both open Jan. 28.

HUB Gallery: Hicks Echinprint National Invitational, traveling print exhibit, through Feb. 1. The Gallery, Nancy Straly, prints and drawings, through Jan. 31. Browning Gallery, Central Pa. Scholastic Art Awards exhibit, through Jan. 26; John Caroline, stained glass, through Jan. 31; PSU Camera Club exhibit, opens Jan. 27; Jinx Webster, recent ceramic works, opens Feb. 2, all in Art Alley.

Kern Commons: Fabricrafts, patchwork and quilted objects, through Jan. 30. Penn State Film Posters, through Jan. 31; group photography exhibit, opens Feb. 2.

Museum of Art: Wirth McCoy, recent paintings; sculpture from the permanent collection; Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager.

Pattee Library: The 1980 Olympics, books, brochures, paraphernalia, Main Lobby. Martin Pasco, paintings and drawings, through Jan. 25. Lending Services Lobby. "The Marvelous Travel of Baron Munchausen," from the Allison-Shelly Collection, Rare Books Room.

Visual Arts Zoller Gallery: McCoy Retrospective, opens Jan. 27.

Arts Roundup

Tickets on sale for New York Chamber Soloists

The Artists Series will present the New York Chamber Soloists in Handel's *Acis and Galatea* at 8:30 p.m. Friday, Feb. 1, in Schwab Auditorium.

Acis and Galatea, first performed under Handel's direction in 1718 at Cannons, portrays the idyllic world of shepherds and shepherdesses. *Acis*, the shepherd who loves the shepherdess Galatea, battles the jealous Polyphemus for trying to win her love.

As in the original performance, the company for this presentation includes five voices—soprano, alto, two tenors, bass—and flute, two oboes, two violins, cello, bass and harpsichord. In keeping with Handel's custom, the New York Chamber Soloists perform a harpsichord concerto at intermission.

The New York Chamber Soloists, an ensemble of voices, winds, strings and keyboards, have performed in all major concert series in the United States, in many European festivals, and throughout the Middle East, the South Pacific and the Far East.

Tickets will go on sale beginning Tuesday, Jan. 29 at the HUB Booth and at Eisenhower Auditorium, from 9 a.m. to 4 p.m. daily. Phone orders on Master Charge or VISA cards may be placed by calling 863-0255, days of sale.

Friends of Museum purchase three pieces of art

Three new works of art have been donated to the Museum of Art by the Friends of the Museum. The group holds an annual purchase party to choose artworks from a selection made by the Museum staff.

Proceeds from the Friends' membership drive are used to pay for the gifts.

Chosen this year were "Bachi Form," a contemporary bronze casting by Japanese sculptor Masayuki Nagare; a miniature

stone stepa in three parts, made between the second and fourth century in North Pakistan; and "Reverie," a mixed media drawing done in 1911 by artist Max Weber.

Alard to play works by Mozart, Overton, Bloch

Works by Mozart, Overton and Bloch will be performed by the Alard String Quartet in a concert at 8:30 p.m. on Wednesday, Jan. 30, in the Music Building Recital Hall.

The program will open with Mozart's Quartet in D Minor, K. 424. Written between 1782 and 1785, it is the second of six quartets Mozart dedicated to Joseph Haydn following the composers' first meeting in 1781.

Also selected for the program is Hall Overton's Second String Quartet, written in 1954. Overton, a jazz pianist who performed with Thelonious Monk and Stan Getz, was chairman of the composition faculty at Juilliard at the time of his death in 1972. The Alard Quartet has participated in several concerts devoted to Overton's music and performed the Second String Quartet for its first concert at the University in 1962.

Ernest Bloch's Piano Quintet, the final number on the program, will feature pianist Phyllis Triolo. Ms. Triolo, whose musical association with the Alard Quartet spans 17 years, has performed at Town Hall and the Guggenheim Museum in New York and at Barker Hall and the Phillips Gallery in Washington, D.C.

The Bloch Quintet, written between 1921 and 1923 while the composer was director of the Cleveland Institute of Music, is monothematic in its expression and represents extensive use of quarter tones.

The Alard String Quartet is composed of Joanne Zagst and Donald Hopkins, violinists, Raymond Page, violist, and Leonard Feldman, cellist. All four musicians are associate professors at the University.

(Continued from preceding page)

the University and the New Kensington Campus.

Among other uses, the fund will provide money for financial aid to Campus students, library acquisitions, faculty research, and special projects which enhance the academic program.

The fund will also provide for awards recognizing outstanding contributions to the Campus, purchases of specialized educational equipment, and support of the arts through programs of art exhibits, professional entertainment, and other cultural media.

The Joseph Bradford Wharton Jr. Scholarship Fund will help outstanding students majoring in business administration.

The initial principal of the fund, \$15,000, was contributed by the Wharton Foundation in honor of Joseph B. Wharton Jr., a 1935 graduate of the University who was chairman of the board and director of the Fairchild Camera and Instrument Corp. of Mountainview, Calif., and several other corporations.

Scholarship applicants must be juniors or less, and must show superior ability in the College of Business Administration.

The Carol Jursik Memorial Scholarship recognizes student-athletes who are not Pennsylvanians and who show a commitment to scholarship, athletic dedication, and personal strength and individuality.

The initial principal of the scholarship, \$5,556, came as gifts from the women's fencing team, U.S. Steel Corp., friends and family of the late Carol Jursik, a 1978 grolgy graduate who was also an outstanding varsity fencer. She was killed last year in Pittsburgh.

Non-Pennsylvania students with superior scholastic records who participate in fencing, distance running or equitation, and who display strength of character are eligible for the scholarship.

A Technical Employees of Alcoa Metallurgical Award Fund recognizes outstanding physical science students at New Kensington.

The initial principal of the fund, \$3,000, was a joint gift to the Campus from the Alcoa Foundation and Dr. Allen S. Russell, vice president, science and technology, Aluminum Company of America.

Sophomore students at the New Kensington Campus who are enrolled in one of the physical science curricula and show outstanding academic achievement or potential will be considered for the award.

The Kenneth C. Simowitz Memorial Fund will encourage graduate students in acoustics to publish their research results.

The initial principal of the fund, \$2,757, has been given by alumni, colleagues and friends of the late Kenneth C. Simowitz, a former graduate student in acoustics from Massapequa, NY.

Current students or recent graduates in the acoustics program will be assisted in the publication of articles in accepted journals, as well as in film, patent, editorial or creative work, or such professional activity as may be approved by the Awards Committee. That committee will include the head of the acoustics program, along with three appointed faculty members and one currently-enrolled graduate student.

The W. Paul Campbell/Phi Mu Alpha Memorial Award will assist outstanding students majoring in music education.

Alumni of the School of Music's Music Education Department and the Alpha Zeta Chapter of the Phi Mu Alpha Sinfonia Fraternity of musicians have jointly contributed the award's initial principal of \$1,500 to commemorate the late Prof. Campbell, an instructor in the department.

Consideration for the award will be given to all undergraduates who are at least sophomores in music education, and manifest evidence of careers as music educators.

The Delta Gamma Golden Anchor Award has been created to aid students with severe visual impairment.

The Penn State Chapter of Delta Gamma Sorority has contributed \$1,500, the initial principal of the fund. Students of sophomore standing or higher with severe visual impairments who have attained at least a 2.5 grade point average and have demonstrated perseverance and strength of character in overcoming their handicap are eligible.

The Harry Soffer Memorial Award has been established to recognize outstanding students in business administration.

Steven I. Soffer, a 1965 Penn State graduate, has contributed the initial principal of \$1,500 in memory of his father, the late Harry Soffer, a businessman in Easton, Pa.

Business administration students who have completed their freshman year and have at least a 3.0 grade-point average are eligible for the award.

"Perspective" approved

(Continued from page 1)

The *Perspective* reaffirms some basic University policies and recommends changes in others.

In the face of a projected population decline among traditional college age groups, the document places strong emphasis on quality, selectivity and flexibility of programs. Admissions standards are to remain at current levels.

"A potentially easy answer to a possible enrollment decline would be to lower standards, but it would not be the right answer," Dr. Oswald said. "The quality of our student body must remain high if Penn State is to maintain its leadership in higher education."

"In my view, Penn State is entering the 1980s in a reasonably favorable position. Continued emphasis on quality will maintain that position."

The first major recommendation of the *Perspective* to be implemented will be an administrative integration of Penn State's Commonwealth Campuses and the University's state-wide Continuing Education program. (See page 1.)

Other broad recommendations of the *Perspective* on the '80s include:

- That the levels of both State funding and private support be raised. A corresponding goal is that student's proportionate share of the costs of education not be raised beyond the current level.

- That the University more actively recruit outstanding students, including out-of-state and transfer students to strengthen the quality and diversity of the student body.

- That levels of personnel compensation remain competitively high to maintain the quality of faculty and staff.

- That the Commonwealth Campuses work closely with their community advisory boards to meet the needs of their local areas and to enhance the individuality of the campuses.

- "Obviously, there will be changes and new developments over the course of the decade," Dr. Oswald said.

- "Responsiveness to such changes is an important part of implementing a long-term policy."

Cable TV for Mont Alto dorms

Two residence halls at the Mont Alto Campus will soon have cable television service. The Board approved the rights of way for trenches to be dug and cable laid down Conklin Hall and Mont Alto Hall on the campus. Nearly 300 students live in the two residence halls. The new cable will increase reception from two to 13 channels.

Mr. Wood

Mr. Conti

Wood, Conti reelected

Quentin E. Wood, president and chief executive officer of the Quaker State Oil Refining Corp. of Oil City, was re-elected president of the Board of Trustees for a second one-year term. Walter J. Conti, a businessman from Doylestown, was re-elected to a second term as vice-president.

Mr. Wood, a native of Mechanicsburg, has served on the Board since 1976. He is a 1948 Penn State graduate.

Mr. Conti, owner of Conti's Cross Keys Inn in Doylestown, has been a member of the Board since 1974 and has served on its Executive Committee since 1976. He is a 1952 graduate of the University.

Seven members of the Board were elected to serve on the Executive Committee. They were: Howard O. Beaver Jr., Edward R. Book, Mr. Conti, Stanley K. Schaffer, J. Luther Snyder, William K. Ulerich, and Helen D. Wise.

The Trustees also elected Patricia L. Rosdill of Petersburg associate secretary of the Board. Since 1976, Ms. Rosdill, assistant to the senior vice president for administration, has served as assistant secretary of the Board.

She joined the University staff in 1967 as a secretary in the Division of Instructional Services. In 1968, she was named secretary in the treasurer's office and in 1973, administrative assistant. She had previously held secretarial positions with three Chicago firms.

President Oswald continues as ex officio secretary of the Board, and Robert A. Patterson, senior vice-president for finance and operations, as treasurer. Other University staff members named again to one-year terms last Saturday were Mary Lou McCormick, assistant secretary of the Board, and Richard H. Baker, assistant treasurer.

Sketch plans approved for Hershey addition

An addition to The Milton S. Hershey Medical Center, approved last September, moved a step closer to initial construction after the Trustees approved sketch plans last week.

The project, which will add two bays to the east end of the crescent-shaped front of the Medical Center, will contain office and research space for faculty in the College of Medicine's clinical departments. These departments have become overcrowded in recent years due to the medical school's rapid enrollment growth.

The College of Medicine's space was built to handle 256 medical students, and enrollment is now 388.

The estimated \$10 million cost of the project will be paid for by a combination of a federal grant and funds generated by the Medical Center. No State funds or tuition are involved.

Before construction starts, final plans would have to be approved by the Trustees at a future meeting. With the appropriate approval, the addition is scheduled to be completed in the fall of 1982.

The new facilities, according to President Oswald, will permit rounding out of the academic program in both undergraduate and graduate medical education in sub-specialties in which the medical school has had limited or no faculty to date.

Five graduate degree programs discontinued

Because of limited demand, five of the University's graduate degree programs are being discontinued.

The degree programs are those leading to the M.Ed. in economics; M.Ed. and D.Ed. in philosophy; D.Ed. in Spanish, Italian, and Portuguese; and D.Ed. in speech communication. Other graduate degree programs offered by those departments will not be affected by the change.

Dr. James B. Bartoo, dean of the Graduate School, said the decision was made because of low student interest. In a time of limited resources, he added, student enrollment in the programs did not justify their continuance.

Students currently enrolled will be able to complete their degrees, but no new students will be admitted to the programs, Dr. Bartoo said.

Capitol to institute energy technology program

The Trustees were informed of the creation of a new academic program in energy technology to be offered at the Capitol Campus through the Engineering Technology Division.

According to Dr. George Grenier, head of engineering technology at Capitol, the new program is unique in the nation. "It will give associate degree holders with specialized training in mining, solar energy and other energy-related backgrounds an academic program for completion of their professional training," Dr. Grenier explained.

The chairman of the new program, David Kravitz, holds degrees from Millersville State College and is currently program chairman of the Mechanical Design Engineering Technology Program at Capitol. According to Prof. Kravitz, the new program "builds on the background of students with fossil, nuclear, and solar backgrounds." Students will learn "efficient management of energy systems."

"The need to conserve energy and reduce atmospheric pollution demands experts with broad knowledge of energy conversion methods," Prof. Kravitz added. "The graduate of the energy technology program will have the essential background subject matter and laboratory training to make him or her a valuable member of the energy producing team."

Co-op agreement finalized with Bloomsburg, St. Francis

The University has finalized agreements with Bloomsburg State College and St. Francis College of Loretto for cooperative education programs in the liberal arts and engineering.

Under the agreements — effective immediately — students may spend three years at Bloomsburg or St. Francis studying liberal arts subjects and pre-engineering courses in the basic sciences. If they satisfactorily complete the work and have recommendations from their colleges, they may enroll as juniors in Penn State engineering programs.

"Successful completion of these programs will lead to two degrees — a baccalaureate from either Bloomsburg or St. Francis and a B.S. in engineering from Penn State," said Dr. Robert E. Dunham, vice president for undergraduate studies.

"With these agreements," he noted, "a student may complete through five years of study what otherwise could require six or more years."

Another goal is to allow students who haven't yet made a decision between engineering and other disciplines an opportunity to explore more closely their own aptitudes and various areas of study.

From the Trustee Docket

CWC, Continuing Ed

(Continued from page 1)
Education currently administers a statewide system which serves over 130,000 Pennsylvanians in all 67 counties. Many of Continuing Education's credit and non-credit programs are offered through the facilities of the Commonwealth Campus system.

The integration approved will create a single University-wide unit under one administrator.

HUB planning to continue

(Continued from page 1)
— Relocation of the Penn State Bookstore into the area now occupied by the Terrace Dining Room.
— Renovations to the HUB's ground floor including construction of different food service "sections" for customers interested in hot entrees, soup and salad lunches, continental breakfasts, fast food service, and sit-down dining.
— Refurbishing of the long hallway on the HUB's ground floor to provide an improved recreation and lounge area.
— Relocation of student organization offices from the ground floor to the enlarged area on the HUB second floor now occupied by the Bookstore's gift shop.

Only after extensive interviews with faculty, administrative and student groups were the above features included in the preliminary drawings, Mr. Zilly added.

"The new food service operations," he said, "are designed to be far more attractive, convenient and economical for our customers."

Six separate food service sections are proposed, each specializing in different types of food and each with a distinctive decor.

"We're thinking, for example, of an 1890s theme at the continental breakfast section," Mr. Zilly said. "There students and others could get service before morning classes."

"There would be a different atmosphere at the hot entree station and another decor at the soup and salad area. People who want sit-down dining with table service would be able to have that, too, and the sketches call for a fast food service area as well."

The drawings also include a "deli" to be located on the HUB's ground floor where the bookstore now has its stationery and student supplies outlet. The other food service sections would be located in the approximate area of the present Lion's Den.

"Current food service research shows that attractive, specialized service is what people want," Mr. Zilly commented.

"The plan also is designed for more efficient use of facilities since, unlike the Terrace Room operation, the entire food service operation would not have to be open at one time. It would not, for example, be wise to open the hot entree section at a time when people are thinking only of breakfast."

The sketches show a renovated HUB ground floor hallway featuring a more attractive lounge area, electronic games and table tennis activities in specially designed rooms.

No official cost estimate has yet been developed, Mr. Zilly noted. If the project eventually gains final approval, the renovations would be done in stages over several years.

Eight Distinguished Alumni to be honored in June ceremony

Builders of successful careers in education, the law, business, architecture, medicine and labor relations were among eight Penn State graduates honored as Distinguished Alumni of the University.

Established by the Board of Trustees in 1951, the Distinguished Alumni Award recognizes the achievements of outstanding alumni whose personal lives, professional achievements and community service exemplify the objectives of their Alma Mater. The Award is the highest recognition bestowed upon an individual by the University and is equivalent to the honorary doctorate granted by many institutions.

Penn State's Board of Trustees selected the eight from 69 nominations for the 1980 award:

The alumni to be honored are:
Marilyn Williams Black '52, Hanover, N.H., art teacher-recreation director,
Bernice A. Ray School.

R. Paul Campbell '30, State College, Pa., retired president judge, Centre County Court of Common Pleas.

Peter Danos '43, Paris, France, president and director general, AM France.

Charles T. Douds '22, Camp Hill, Pa., retired arbitrator and a Trustee from 1956-63 and 1967-76.

William H. Moses '33, Hampton, Va., chairman emeritus, Architecture-Building Construction Engineering, Hampton Institute.

Ralph E. Peters '48, Harrisburg, Pa., president, Berger Associates Inc.

Charles D. Prutzman '18, Forest Hill, N.Y., retired attorney-executive.

Kenneth R. Weston '27, Allentown, Pa., orthopedic surgeon.

"This highly select group of alumni is 'distinguished' in every way," President Oswald told the Trustees. "In honoring them, the University honors itself, because productive and creative alumni are its greatest contribution to the world."

The Distinguished Alumni will be invited to return to Penn State June 5 through 7 for the annual Alumni Institute and Class Reunions programs. At that time, they will be honored by fellow alumni and presented brass medallions by the President of the Board of Trustees and the President of the University.

Since the Distinguished Alumni awards were established, 233 Penn State graduates, including those named this year, have been honored.

Additional safety features to be put in at Airport

The University will use \$90,000 in federal funds remaining from a previous airport project to make additional safety improvements at the University Park Airport.

Penn State Trustees authorized an amendment to a grant agreement with the Federal Aviation Administration.

"The University, by action of its Board of Trustees on Sept. 23, 1977, accepted a \$438,570 grant to cover 90 percent of the cost of safety improvements," Robert A. Patterson, senior vice president for finance and operations, told the Trustees.

"The work has been completed, and \$90,000 is left over. The FAA has authorized the use of the money for additional safety improvements."

The new improvements will include a segmented-circle wind indicator, 4,400 feet of perimeter fencing and relocation of certain high-intensity runway lights to a more useful location, according to Mr. Patterson.

Beaver's Brodhead Center to be named for Giusti

The amphitheatre of the Brodhead Cultural Center at Beaver Campus has been named the Joseph P. Giusti Amphitheatre in honor of the Campus's founding director.

The Board of Trustees approved the action upon the recommendation of President Oswald and the Beaver Campus Advisory Board.

Dr. Giusti, a Harrisburg native who became director of the Beaver Campus when it was established in 1965, resigned last June to become chancellor at the Indiana University-Purdue University Campus at Fort Wayne, Ind.

"Naming the amphitheatre in Dr. Giusti's honor is a most appropriate way of recognizing the great service that he provided the Beaver Campus," President Oswald said. "As first director of the Campus, he worked diligently at bringing it to its current high level of education and service."

Dr. Giusti commented, "It is an honor which I receive in the name of those whom the honor represents: the members of the advisory board, the faculty, the administrators, the students, and all those whose support, work and dedication have made the cultural center possible for the people of Beaver County."

"Every accomplishment in which I have been involved has been a shared one," Dr. Giusti added. "This joint accomplishment shall stand as a hallmark of the educational accomplishments which can be achieved by and for the people when working together."

Dr. Giusti provided the leadership for making the Beaver Campus an integral part of Beaver County's educational, cultural and economic life. In his 14-year tenure, the former Beaver County Hospital Annex was transformed into a 94-acre campus with 10 major buildings — the fourth largest of 17 Penn State

Commonwealth Campuses

Working with a Campus Advisory Board, Dr. Giusti in 1975 initiated a plan to construct a cultural center for use by both the campus and the community-at-large. The Brodhead Cultural Center, dedicated in 1977, features a promenade area for arts festivals and exhibits, a museum and a large reflecting pool.

Seating 800, the Center's amphitheatre is used by various Beaver County performing arts groups during the summer and is also the setting for the Campus's celebrity performance series.

Engineers chosen

The Trustees have authorized selection of United Engineers and Construction, Inc., of Philadelphia, to design a fabric filter collection system for the West Campus Power Plant.

The construction of the system will meet the requirements of a consent decree enacted between the University and the Pennsylvania Department of Environmental Resources.

"The consent decree requires that certain procedures be in place," Robert A. Patterson, senior vice president for finance and operations at the University, said. "Although the deadline has been extended until March 21, 1980, this action demonstrates our intention to stay on schedule."

Mr. Patterson told the Board of Trustees' Committee on Physical Plant, which authorized the engineer selection, that the deadline was extended to allow the state legislature time to act on a Capital projects bill which would fund the power plant project.

Scholarships announced

The establishment of a number of funds, scholarships and awards was announced to the Trustees.

The Allison-Shelley Collection Fund will enhance, preserve and make available to scholars resources on the reception of German culture into American and British societies.

The estate of the late Dr. Phillip A. Shelley, professor emeritus of German and comparative literature at the University, has provided the initial principal of over \$247,900 for the fund.

A collection of books and documents on the interaction of German, British and American cultures, the Allison-Shelley Collection of Anglica Americana Germanica will be placed in the Rare Books section of Pattee Library.

A three-member board will authorize the purchase of additional books, pamphlets, photographs and recordings to expand the collection, and oversee the care and maintenance of the existing portion.

The initial \$30,000 principal of the New Kensington Campus Endowment Fund was donated by interested persons and organizations in the campus community to fund projects and programs supportive of the educational and cultural purposes of

(Continued on next page)

The HUB, now in its 25th year and the most heavily used building at University Park, will get a new look in its bookstore and dining areas as well as other refurbishing if Trustees approve final designs.

Campus Update

The Schuylkill Campus has been offering free day-long workshops to high school students interested in electronics, computers, electrical technology, or electrical engineering.

The seven workshops held in November attracted 100 students. Five more workshops have been planned for February and March. Each workshop is limited to 14 students, with preference given to seniors. Students do not need any previous experience to qualify.

The workshops were planned and are directed by Dr. Arthur Marsicano, associate professor of engineering.

The Milton S. Hershey Medical Center has received a Pennsylvania Power & Light Co. energy conservation award for improving the insulation levels in its student housing complex, University Manor Apartments.

The apartment complex consists of 248 total-electric apartment units. Foam insulation was installed to masonry walls of the complex in 1976, at a cost of \$16,400. The following year, corrections and additions to fiberglass insulation in the attic were completed, at a cost of \$7,800.

By improving the insulation levels, about 649,000 kilowatt-hours have been saved annually, resulting in a reduction in energy costs of \$25,000 each year.

The Schuylkill Campus, through its Office of Continuing Education, is offering three unusual, new courses this term.

Earl C. Haag, assistant professor of German, has developed a course for people who can read Pennsylvania German. The course will cover poetry and prose from the 19th century to the present.

John R. Hornbrook, assistant professor of biology, is teaching "Introduction to Psychic Phenomena," designed to familiarize laypersons with variant forms of ESP, the area of survival after death, and visual and auditory apparitions. The course stresses scientific explanations, analysis, and the body of research relating to psychic phenomena.

Dr. Linda Cleveland, assistant professor of chemistry, is teaching "Chemistry of Drug Action," which surveys the physiological effects of nonprescription drugs, stimulants, depressants and antimicrobial drugs. The course offers a number of experiments in drug analysis.

general science, physics, or engineering, or an associate degree or equivalent in electrical, electronics, or mechanical engineering technology. Experience preferred.

RESEARCH AIDE-COLLEGE OF AGRICULTURE, University Park—Become familiar with the objectives and specialized techniques essential to each project. Plan the day-to-day work on research projects. Carry out specialized routine procedures including the preparation of culture media and chemical solutions and conduct biochemical tests. Collect data on research projects. Observe laboratory animals daily, record observations and obtain tissues for examination. Responsible for adequate supplies of glassware, chemicals and other materials needed in day-to-day operations. Laboratory for food chemistry and physics. B.S. in biochemistry, medical technology or biological science or equivalent, and up to one year of effective laboratory experience.

AREA REPRESENTATIVE-CONTINUING EDUCATION, Osgood—Responsible for the functions of development, organization, operation, and administration of Continuing Education programs and services within an assigned geographic district. Bachelor's degree or equivalent, plus two or three years of directly related experience or a master's degree or equivalent, plus one to two years of directly related experience.

Rewarding writing from English 10

They may not be able to stand it on their mantels, but "winning" students in English 10 composition classes have just received a special kind of trophy.

It takes the form of a 48-page paperback volume, and its deep blue cover bears the title: *Penn Statements, A Magazine of Student Writing from English 10*.

"Thousands of undergraduates pass through English 10 each year," Jeanne R. Fahnestock, director of composition, notes. "They tackle similar writing tasks, and many of our students, learning to be better writers, produce memorable and entertaining essays."

The English Department wants to recognize the students who have produced good writing and give that writing the larger audience it deserves. At the same time, we want to encourage all students in English 10 by showing them what student writers can accomplish."

The 24 essays in *Penn Statements* were culled from a much larger number of papers submitted by the instructors who taught in English 10, the University's entry level composition course. All of the submissions in a rhetorical category were read by three instructors, who chose "the most interesting and useful" for the magazine. The selections were written by students both at University Park and on the Commonwealth Campuses.

Penn Statements has nine sections, eight of them corresponding to the assignments in English 10 (Description, Narration, Process, Division Analysis, Causal Analysis, Comparison/Contrast, Classification and Definition). Students write about what they know — their hometowns and, of course, their experiences at Penn State.

"The magazine will be published once a year," Dr. Fahnestock reports, "and will be used in all sections of English 10 at University Park and on those campuses which voluntarily adopt it."

As for the ninth section, it is titled "The Best of the Worst," and one sample will give the flavor: "We lined up solemnly for this auspicious event, and as we marched into the high school auditorium, the band played popping serenade."

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Jan. 31, 1980. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

LABORATORY TECHNICIAN-INTERCOLLEGE RESEARCH PROGRAMS, University Park—Provide technical assistance on assigned research projects, directing and coordinating the work of lower-level laboratory personnel, collecting and analyzing air samples, operating and maintaining specialized electronic and laboratory instruments, writing computer programs for data analysis and related laboratory studies. Bachelor's degree or equivalent in

News in Brief

Medical claims due March 31

March 31, 1980, is the last date on which the Employee Benefits Division will accept charges for a 1979 major medical claim for University employees or their dependents. A major medical claim is established if an employee reports \$100 of eligible, out-of-pocket medical expenses incurred during the calendar year 1979.

Charges that are acceptable for a major medical claim include doctors' office calls, prescribed drugs, private duty nursing (if medically necessary), local ambulance service, oxygen, physiotherapy, insulin, and special equipment and appliances. Among charges not covered are routine physical exams, dental work, eye exams and lenses.

Limited receipts should be obtained for

eligible charges and submitted to the Employee Benefits Division with a claim form. In order to avoid delay of payment by the insurance company, all questions in the employee's section of the claim form should be fully completed. Cancelled checks and cash register receipts are not acceptable evidence of charges incurred.

Claim forms and additional information on how to report a major medical claim are available at the Employee Benefits Division, Room 113 Willard Building, the Business Offices at locations other than University Park, and the Personnel Office at the Hershey Medical Center.

Women's Studies discussion

Dr. Audrey Rodgers, associate professor of English, will lead a discussion of the Women's Studies Option at a meeting of Campus Colleagues from 4:30 to 6:30 p.m. Jan. 31 in the Inn's Assembly Room.

The '80s

(Continued from page 1)

colleges, and departments of education across the country; they are not a homogeneous lot but display considerable variability. They vary with respect to their size, quality of programs, extent of graduate offerings, and in terms of research activities.

Despite such heterogeneity, Dean Hermanowicz points out, the vast majority of these schools or colleges of education have the common element of preparing teachers. Often this fact is used as a common way of perceiving such colleges or as a common barometer for determining their present and future needs.

"While teacher preparation is a significant function of most schools or colleges of education, including our own, we should not stereotype all such units simply as being 'teachers colleges,'" he says. "For example, only about 160 out of the more than 1,300 schools and colleges of education have doctoral programs, and of that number fewer than 60 have distinguished themselves in terms of research productivity. Penn State ranks among the top 20 in this select group of 60. Furthermore, in addition to our strong teacher preparation programs, we prepare individuals for a wide variety of fields such as rehabilitation education, speech pathology-audiology, counseling, health education and a number of other diverse leadership roles in education."

Dean Hermanowicz stresses, "We are a strong, nationally reputable, research-oriented university college of education.

National surveys of the quality of colleges of education, regardless of the criteria employed, always have Penn State's College coming out among the top 10 or 20." He points to the Ladd-Lipset survey reported last year in the *Chronicle of Higher Education*, where national peer ratings placed the faculty members in education at Penn State among the top 13 in the United States. This ranking, Dean Hermanowicz notes, "is confirmed by other national surveys of program, personnel, or research qualities such as the 1977 Carter Report and the 1978 Guback-Clark analysis of R&D productivity in schools of education."

Because of the strength of its programs, along with the diversity of talents and scholarship which exist in the College of Education, Dean Hermanowicz sees an exciting future for the College and its faculty. "However, it certainly will be a future requiring creative change, tough decisions, and some risk-taking to maintain leadership during an era of declining resources," he comments.

Some of the creative changes and risks that the Dean sees in the future include:

(1) The College will be examining the feasibility of moving its undergraduate teacher education curricula into redesigned five-year certification programs with four-year baccalaureate program options in education available without certification entitlement. Dean Hermanowicz sees this as an opportunity for Penn State "to exercise even more significant state and national leadership by fashioning rather experimental, exemplary programs in teacher preparation as a unique thrust for a comprehensive, research-oriented

university such as ours. The College also will consider offering additional four-year education-related non-certification programs such as preparing personnel in instructional systems and technology to work in business and industry."

(2) The College is considering the development of a carefully planned set of extended master's degree programs to accommodate significant continuing professional education needs and/or to serve new clientele. "This certainly will be a challenge to the flexibility we can exercise in facing emerging needs," says the Dean. Two examples of such programs are a Basic Skills program emphasizing diagnostic, prescriptive strategies for the improved teaching of basic skills, and a program in Special Education to provide the new proficiencies mandated by Public Law 94-142. "Such programs are critically needed in the Commonwealth," Dean Hermanowicz says, "and we could use some of our Commonwealth Campus faculty to help us in their delivery."

(3) Master's and doctoral programs in adult education are being developed to prepare new leadership personnel in a field that will be growing dramatically in the decade ahead. In addition, a new doctoral program in educational theory and policy has been developed to prepare individuals for diversified roles related to educational issues and policies within various agencies.

(4) The College of Education will strengthen its research activities and doctoral programs as fundamental mission priorities in the decade ahead.

Research, development, and experimentation in the training of education personnel and in impacting on problems of education will play an even more prominent role for the College and its future. Pennsylvania currently faces a number of major educational needs related to the State's School Improvement Project. Inservice education is another critical need in the Commonwealth. "Penn State's College of Education is in a position to supply considerable expertise in research and evaluation and in inservice education to deal with such needs," claims Dean Hermanowicz. "I'd like to see our College make a greater impact on the problems of schooling in the Commonwealth by increased attention to both inservice education and vital research so that the knowledge which is gained is applied to the improvement of the educational enterprise. This would help the Commonwealth, and indeed the nation, find the answers to some of the tough questions we are facing in attempting to improve the quality of education."

The future for the College of Education as well as for the University will be lively, exciting and at times controversial, Dean Hermanowicz believes. He is also convinced that the College and the University are on the right track in attempting to shape their future with commitments and plans stressing selectivity and quality in the programs, service, and scholarship to be exemplified by Penn State in the years ahead.

Steve Kistler

Penn State Intercom

Amplification

In response to inquiries about the effects of the administrative integration of the Commonwealth Campus system and Continuing Education, which was authorized by the Trustees at their Jan. 19 meeting, INTERCOM is publishing the relevant portion of the text of the recommendation to the Board:

"This action is an administrative integration of two systems and does not alter:

- Present academic organization, e.g., Commonwealth Campus faculty membership in respective academic departments and colleges.
- Present academic personnel policies and procedures, e.g., policy on promotion and tenure — PS-23.
- Current academic authority, e.g., need for department and college approval of instructors for Continuing Education programs and, similarly, the need to have appropriate departmental and college approval of any new offerings, regardless of location or mode."

Senate to vote on advising proposal Feb. 5

Five legislative items are on the Feb. 5 Senate docket, among them the advising report which the Senate debated at its Dec. 18 meeting.

Responding to criticism of its initial proposals, the Subcommittee on the Role of the Adviser has modified and reordered some of its recommendations. The most controversial — that PS-23 "be modified to include academic advising as a systematic and important area of faculty responsibility and one which will be evaluated in relationship to promotion and the granting of tenure" has been changed from Recommendation 1 to Recommendation 3. The new wording states:

"University policy on Promotion and Tenure should clearly indicate that academic advising is an important part of the instructional role of most faculty members. Specific provision should be made for inclusion of appropriate indication of a faculty member's advising activities in the candidate's dossier."

Another modification occurs in the Subcommittee's first recommendation (Recommendation 2 in the earlier version). Section 32-10 of *Academic Policies and Procedures for Undergraduate Students* is to be modified by the addition of the following paragraph:

"THE ROLE OF THE ACADEMIC ADVISER THROUGHOUT THESE ACADEMIC POLICIES AND PROCEDURES FOR UNDERGRADUATE STUDENTS IS CONSULTATIVE IN NATURE. CONSULTATION IS DESIGNED TO ENGAGE ADVISER AND ADVISEE IN ALL APPLICABLE COMPONENTS OF ACADEMIC ADVISING. ADVISING IS A SERVICE TO THE STUDENT AND IS NOT AUTHORITATIVE NOR BINDING UPON THE STUDENT. IT IS AN ATTEMPT TO INTERPRET FOR THE STUDENT THOSE REGULATIONS AND REQUIREMENTS WHICH ARE INCUMBENT UPON THE STUDENT. IN ANY ACADEMIC ADVISING PROGRAM, SOME STUDENTS PROPOSE ACTIONS WITH WHICH THE ADVISER CANNOT AGREE. IN SUCH CASES, ADVISERS SHOULD INFORM STUDENTS OF THE APPROPRIATE COURSE OF ACTION. NEVERTHELESS, FINAL DECISIONS RELATIVE TO COURSE SCHEDULING AND PROGRAM PLANNING ARE THE STUDENTS'. THEY MUST ASSUME PRIMARY RESPONSIBILITY FOR DECISIONS, PARTICULARLY WHEN THESE ARE INCONSISTENT WITH

THE REQUIREMENTS OF THE CHOSEN MAJOR AND COLLEGE."

Recommendation 3 (formerly Recommendation 2) no longer suggests that units be "required" to develop advising programs. The present phraseology is:

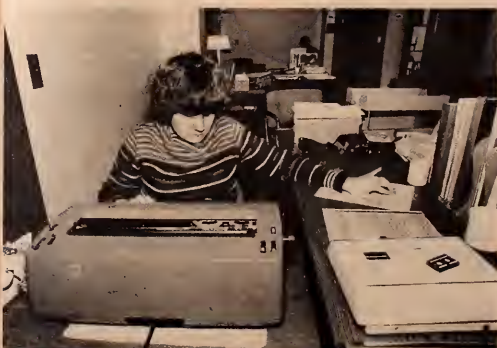

"The faculty of each academic unit should develop a definite advising program which shall include provision for training of advisers and monitoring the quality of advising within the respective units. The description of each program should be provided to the Senate and appropriate administrative officials of the University. Provision should be made for regular review and updating of the program by each unit."

The Senate will also consider a legislative proposal from its Committee on Admissions, Records and Scheduling to modify the Course Drop Policy 34-89. The new legislation is designed to clarify policy in cases where students wish to drop courses which do not occupy a standard 10-week time module. Drop limits established for 10-week courses would be modified to equivalent percentages of time for courses occupying shorter time frames.

The Senate Committee on Extended Degrees is recommending that when the

(Continued on page 4)

Blindness didn't stop her from mastering job details

Using her fingertips, Ms. Hoover reads information from a braille sheet.

The visitor, momentarily lost inside the new Human Development East Building, pokes his head in the door of Room 210 and asks the secretary for directions.

She opens her braille notebook and the reading by fingertips, quickly locates the answer. The visitor, slightly astonished, mumbles a "Thank you, Miss," and leaves, back on course.

"I think I get a better chuckle from people asking me directions than anything else," says Peggy Hoover, blind for all of her 23 years. "I wonder what they're thinking when I'm looking it up in braille."

Good humor is just one of the qualities Ms. Hoover has brought to her job as secretary in the office of the Associate Dean for Continuing Education and Commonwealth Campuses in the College of Human Development.

"She's very competent, and she brings a sensitivity to others and a commitment to her work beyond that which I normally

would expect," says William H. Parsonage, faculty associate in the Office and the person, along with colleague Margaret Basuscheck, to whom Ms. Hoover is mainly responsible.

Ms. Hoover, a resident of Pine Glen, a small town 35 miles northwest of University Park, has been working for Penn State since May 1, 1979 — five months after receiving her associate degree in secretarial studies from Thiel College in Greenville, PA.

Entering the Centre County job market, she found herself "looking all over the place." In her initial interview at Penn State, she was told that "they would keep me in mind for things I could do. I thought 'Snow-job time — you might as well look elsewhere.'"

Eventually she found a temporary job at the Centre County Library in Bellefonte, but was called by Penn State 20 days later to come in for an interview.

"A position had opened up," Mr.

Parsonage recalls. "She applied for it, was found to be competent, and on that basis was employed."

Her first day was not easy. "I'd never want to relieve it," Ms. Hoover says. "I was getting all this information about the office, and by lunchtime I felt so overwhelmed I didn't think I could ever learn all of it."

Office telephones posed another problem, for it was impossible to distinguish which of four lines was ringing from the uniform sound of the bell.

The phone company, however, adjusted the system so that each line rings in its own pitch.

Besides answering phones — a large part of any secretary's job — Ms. Hoover types correspondence, transcribing the text from cassettes, and maintains and files records, particularly those concerning part-time faculty members at Commonwealth Campuses.

The only "special" equipment she uses is an Optacon — a small machine that electronically "raises" typeface so that it can be read through sensations to the fingertips.

"The machine is invaluable," Ms. Hoover says. "I can use it for looking at personnel cards in the files or for something as simple as telling me if I have letterhead stationery going in the right direction before I put it in the typewriter."

She also uses it to read typewritten letters from her pen-pals, many of them classmates from her 12 years of schooling at the Western Pennsylvania School for the Blind in Pittsburgh.

"It personalizes the letters and gives you some privacy because no one has to read them to you," she says.

Ms. Hoover, who says she's "pretty well adjusted by now to the basics of my job," also enjoys church activities, rock music and sports, particularly baseball and Steeler football.

News in Brief

INTERACT seminars Feb. 4, 6

Introductory seminars on the Computation Center's newly acquired interactive editor will be held on Monday and Wednesday evenings, Feb. 4 and 6, in Room 108 Forum Building. The sessions will begin at 7:30 p.m.

Both seminars will cover the same material to accommodate faculty and staff members who have a conflict on one of the scheduled dates.

The seminars will not assume any previous computer experience on the part of those attending.

INTERACT is an additional service to that provided by the Center's Remote Job Entry (RJE), and the introduction will be suitable for current users of RJE.

According to Dr. Daniel L. Bernitt, senior research associate and head of the applications group, the Computation Center expects most RJE users to prefer INTERACT.

Ulrich dinner raises funds for Renaissance Scholars

A total of \$22,579.17 has been raised thus far for the Renaissance Fund through contributions of individuals and organizations at the Fund's "Bill Ulrich Day" recognition dinner held last November.

Additional pledges have been received that would raise the total to approximately \$25,000, according to Mimi Ungar Coppemish, member of the University Board of Trustees and chairman of the "Bill Ulrich Day" committee. The money was raised to create the William K. Ulrich Renaissance Scholars.

Mr. Ulrich, a long-time member of the Board of Trustees, served as board president from 1975 through 1978. He is a 1931 graduate of the University.

Penn Staters

Graham B. Spanier, associate professor of human development and sociology, is one of 15 national experts requested to join the new Task Force on Families of Catastrophe, organized by Purdue University's Family Research Institute. At the request of the U.S. State Department, the Task Force will meet for the first time on Feb. 4-5 in an emergency session to devise policy options related to the families of the 50 American hostages in Iran.

After the meeting, the Task Force will remain intact to deal with the problems the hostages' families may face as the situation develops and to work, as occasions demand, with other kinds of catastrophic events related to the welfare of families.

Dr. Spanier, who also is associate dean for resident instruction in the College of Human Development, was chosen for his expertise in family sociology, life-span development, and marriage and family counseling, according to Dr. Charles R. Figley, director of Purdue's Family Research Institute.

Dr. John C. Johnson, professor of engineering research and director of the Applied Research Laboratory, has been elected to a one-year term as the president of the Institute of Noise Control Engineering (INCE).

Dr. Stanley F. Paulson, dean of the College of the Liberal Arts, has been elected to a three-year term on the board of directors of the Association of American Colleges.

Dr. Parris H. Chang, professor of political science, recently returned from a three-week trip to the People's Republic of China, where he gave three lectures on American foreign policy and the American political system. He spoke at the Peking Institute of International Relations and at Chengchow University in Chengchow, Honan Province.

Dr. George E. Andrews, professor of mathematics, has been appointed 1980 Hedrick Lecturer of the Mathematical Association of America (MAA). As Hedrick Lecturer, Dr. Andrews will present three major addresses at the Association's August meeting in Ann Arbor, MI. He will discuss the theory of partitions. The Hedrick Lecture Series is named in honor of Earle Hedrick, a founder of the MAA, and is a major feature of the Association's summer meeting.

Dr. Caroline D. Eckhardt and Dr. Daniel Walden have been elected to the Delegate Assembly of the Modern Language Association of America, which is the main professional organization for scholars in the fields of modern language and literature. Dr. Eckhardt is associate professor of English and comparative literature; Dr. Walden is professor of American studies and also teaches in English and in comparative literature.

Dr. William Demuth, professor of surgery at Hershey, presented two lectures as a visiting professor at Wayne State University School of Medicine. He discussed "Non-Penetrating Injuries of the Heart" and "The TMI Experience from the Standpoint of a Medical School."

Basketball trainer and instructor Sayers "Bud" Miller has been selected to serve on the training staff for the Winter Olympics in Lake Placid, NY. He is one of 28 trainers from the United States selected to staff a clinic that will serve all Olympic athletes.

Dr. Joseph Jordan, professor of chemistry, presented an invited paper at the Gordon Conference on Electrochemistry in Santa Barbara, CA, on Jan. 30. He reviewed the "State of the Art" of Voltammetry at Glassy Carbon Indicator Electrodes" based on work at Penn State and on a cooperative research effort at Louis Pasteur University in Strasbourg, France.

Dr. John R. Nesselroade, professor of human development, has been appointed acting associate dean for research and graduate study in the College of Human Development, effective immediately. He also will chair the search process for a permanent appointee to the position.

Dr. Nesselroade joined the University in 1972 as an associate professor, being promoted to professor in 1975. Since 1977, he has been professor-in-charge of the graduate program in Human Development and Family Studies.

His research focuses on methodological and substantive aspects of behavioral development over the lifespan. He is author or co-author of some 40 scientific papers, books and monographs.

A 1961 mathematics graduate of Marietta College, he earned his M.A. and Ph.D. degrees in psychology at the University of Illinois. From 1967-72, he was an assistant and later associate professor of psychology at West Virginia University, where he also served as a research associate in the Human Resources Research Institute.

Bookshelf

Two researchers in the College of Human Development are the co-authors of *Adolescent Development: A Life Span Perspective*, a new book published by McGraw Hill.

Dr. Graham B. Spanier, associate professor of human development and sociology, and Dr. Richard M. Lerner, associate professor of child development, developed the 557-page text for use in college courses dealing with adolescence.

The authors treat adolescence as one important part of a continuous life cycle, and thus include background information on infancy, childhood and adulthood, with attention to their relationship with adolescence. The book employs a multidisciplinary approach, intertwining the contributions of such disciplines as biology, medicine, history, law and education to the period under focus.

The book pays considerable attention to topics of special interest to college students: the social context of adolescence, physical and psychological changes, sexuality, developmental problems, the family, social problems and social change. Also included are a number of "Insights into Adolescence" — excerpts from literature which highlight the experiences of adolescents and complement the more academic material the instructor expects the student to master.

Dr. Leon F. Lyday, professor of Spanish, has just collaborated in the publication of a three-volume anthology of Spanish American drama. Edited in collaboration with Frank Dauster of Rutgers University and George Woodyard of The University of Kansas, the anthology contains nine of the most important Spanish American plays of the past 50 years, including works from Argentina, Chile, Mexico and Puerto Rico.

The volumes contain an introduction to the theatre of Hispanic America, critical commentaries on each play and playwright, and selected bibliographies. Published by Givrol Books, Inc., of Ottawa, Canada, the text is designed to give both the general public and university classes ready access to these major dramatic works.

Dr. Harold M. Frost, research associate and project scientist for nondestructive testing at the Applied Research Laboratory, has written a monograph entitled *Electromagnetic-Ultrasound Transducers: Principles, Practice, and Applications*, which recently appeared in the books series, *Physical Acoustics*. The series is published by Academic Press.

Dr. Frost has written a comprehensive and analytical review of world-wide R&D results in an emerging but effective area of technology for using ultrasound as a means to characterize and test materials nondestructively, to measure material dimensions such as thickness, and to sense motion such as rotation.

Comments on classroom conditions invited

In response to complaints from faculty members about inadequate teaching facilities in certain University Park classrooms, Room 10 Sparks Building has been completely remodeled and a final review of plans for redoing Room 121 Sparks has also been completed.

Planning for these projects is in the hands of a University Classroom Committee, which has now turned its attention to Boucke and Chambers.

The Committee was appointed by Dr. Robert E. Dunham, vice president for undergraduate studies, and Ralph E. Zilly, vice president for business. Dr. D.W. Johnson, director of the University Division of Instructional Services, serves as chairman. Members include Robert L. Allen, director of audio-visual services; Richard T. Soderberg, director of registration and scheduling; William R. Stacey, management specialist; and Philip E. Witmer, manager of physical plant support services.

The renovations to 10 Sparks involved putting in new flooring, painting the walls and replacing the old wooden seats. The seats were so ancient, Dr. Johnson notes, that repair parts were no longer available.

The display surface in the front of the room was also completely remodeled, with new chalkboards and projection screens, and a soundproof projection booth was added to the back of the room.

The new display space provides a 30-foot expanse of chalkboards and/or screens. Moveable chalkboards can double the space, making this setup one of the largest available display surfaces at University Park.

Committee members have identified other classrooms which need renovation, and they welcome input from faculty members with specific concerns about instructional conditions. Efforts will be made to do over the larger general purpose classrooms first, according to Dr. Johnson.

Janet Rockey

Two members of the staff of the Applied Research Laboratory have been honored for 25 years of service to the University. They are Isabelle P. Sechrist, a research assistant, and Janet V. Rockey, a technical secretary.

Ms. Sechrist's responsibilities include data reduction research and some computer programming and plotting. A 1941 Penn State graduate with a B.A. in mathematics, she started out in the Department of Rural Sociology, but moved to the then-named Ordnance Research Laboratory as a research technician a month later.

Ms. Rockey serves as secretary to ARL Director John Johnson, a position she has held for the past five years. Prior to that, she worked as a travel clerk and as secretary to ARL's Business Manager and to the Acoustics and Signal Department. Her husband, Melvin, is assistant to the Director of Short Courses in the College of Agriculture and holds both bachelor's and master's degrees from Penn State.

Retirements

Jan. 1 marked the retirement of Henry E. Schmidt, associate director of undergraduate admissions. Mr. Schmidt began his University career in 1967 as director of admissions for secondary school relations. In 1970 he assumed the position of director of admissions for freshmen and three years later was promoted to his last post.

As associate director, Mr. Schmidt evaluated applications for admissions at all locations and was responsible for establishing admissions policies and procedures.

Before coming to Penn State, Mr. Schmidt served in the Navy for 27 years and from 1963-67 was a professor of naval science at Penn State.

Mr. Schmidt and his wife, June Lorraine, have four children. Two of their children are also associated with Penn State — Rob is a journalism major and Bill is working for the Division of Undergraduate Studies.

Isabelle Sechrist

Although he retired officially on Jan. 1, LeRoy P. Horner hopes to "keep his hand in" and do a little plastering — that is, he finishes all the odd jobs at home he put off while working.

Mr. Horner was a laboratory technician in petroleum refining during the forties, leaving the University in 1947 to go into business for himself as a plasterer and mason. He returned to Penn State in 1962 as a plasterer with Physical Plant, and in the intervening 17 years figures he has worked on most of the buildings at University Park.

Obituaries

Dr. Stuart W. Frost, professor emeritus of entomology, died Jan. 21. He was 89 years old.

Dr. Frost retired from the University in 1957 after 40 years of service. The author of three books and more than 200 papers, he was the founder of the Frost Entomological Museum, named in his honor, and after his retirement he continued working to build the museum's collection.

Dr. Frost held B.S. and Ph.D. degrees from Cornell University.

Harry K. Smith, a group leader, receiving at the Hershey Medical Center at his retirement on Feb. 4, 1978, died Jan. 12. He was 64. Mr. Smith joined Hershey's staff May 8, 1967, and worked initially as a custodian and storeroom clerk.

Jan. 31-Feb. 10
Special Events

Thursday, Jan. 31

Campus Colleagues meeting, 4:30-6:30 p.m., Assembly Room, Nittany Lion Inn. Audrey Rodgers, English, leads a discussion on "The Women's Studies Option."

Cinemathèque, Teshigahara, *Woman in the Dunes*, 6:30 and 8:30 p.m., HUB Assembly Hall.

UnCommon Theatre, student preview, *Vanities*, 8 p.m., Room 112 Kern.

Friday, Feb. 1

Deadline for applying for Fellowships through Graduate School programs.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Robert Frank, English, emeritus, on "The Pleasures of Sisyphus: Reflections on Literary Studies."

IFC Dance Marathon, 7 p.m.-7 p.m. Sunday, Feb. 3, White Bldg.

Sports: gymnastics (men) vs. Southern Connecticut, 8 p.m.

UnCommon Theatre, *Vanities*, 8 p.m., Room 112 Kern.

Artists Series, New York Chamber Soloists, Handel, *Airs and Galathea*, 8:30 p.m., Schwab.

Saturday, Feb. 2

Sports: fencing (men) vs. Cornell, 1 p.m.; swimming and diving (men) vs. Temple and Texas A&M, 2 p.m.; wrestling vs. Navy, 2 p.m.; volleyball (men) vs. Army, 7:30 p.m.; gymnastics (women) vs. Cal State/Fullerton, 8 p.m.

UnCommon Dinner Theatre, dinner, 6:30 p.m., Room 102 Kern; *Vanities*, 8 p.m., Room 112 Kern.

Penn State Symphonic Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, Feb. 3

University Chapel Service, 11 a.m., Eisenhower Chapel. The Reverend Aaron Buzzeo, "O.S.B. Felix Sulpit Catholic Center, speaker."

UnCommon Dinner Theatre, dinner, 6:30 p.m., Room 102 Kern; *Vanities*, 8 p.m., Room 112 Kern.

Richard Laird, double bass recital, 8:30 p.m., Music Bldg. Recital Hall.

Monday, Feb. 4

Audio Visual Services, *Connections* film, "Eat, Drink and Be Merry," 12:15 p.m., Room 112 Kern.

Shakespeare film, *Oliver, Hamlet*, 6:30 p.m., Room 101 Chambers.

France-Cinema, *Barbarella*, 7 and 9 p.m., Room 112 Kern.

Archaeological Institute of America lecture, 8 p.m., HUB Assembly Hall. Eva C. Keuls, Univ. of Minnesota, on "The Hetera and the Housewife: The Splitting of the Female Psyche in Greek Art."

Interdisciplinary Symposium on Value, 8 p.m., Room 124 Sparks. Franklin Cook, business law, on "Corporate Morality and Justice."

Barry Hannigan, piano, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, Feb. 5

Red Cross Bloodmobile, 10 a.m.-4 p.m., HUB Ballroom.

Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Oliver Franklin, films curator, Afro-American Historical and Cultural Museum, Philadelphia, on "Tatars, Literature and the Rise of African Cinema."

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

School of Music Common Hour, "Wittgenstein's Vienna," with the Alard String Quartet discussing and playing excerpts from the works of Schoenberg and Berg, 4 p.m., Music Bldg. Recital Hall.

Comp. Lit. Film Series, Rafael Gil, *Don Quixote*, 6:30 and 8:45 p.m., Room 112 Kern.

Black Studies Program film, Ousmane Sembene, *Yala*, with introduction by Oliver Franklin, 7:30 p.m., Robeson Cultural Center.

Wednesday, Feb. 6

Lat drop deadline.

Last day to sign Winter Term NDSL and University Long Term Loans, Room 108 Shields.

Red Cross Bloodmobile, 10 a.m.-4 p.m., HUB Ballroom.

African Studies Forum lecture, Oliver Franklin, filmmaker, on "The Future of African and Afro-American Cinema," and screening of

URTC's third production, "An Enemy of the People," opens Thursday, Feb. 7, in the Pavilion Theatre, and will continue through Feb. 23. Curtain time is 8 p.m.

One of Ibsen's most compelling plays, "An Enemy of the People" pits one man inspired by the truth against a town that wants to silence him. In the above scene, Dr. Thomas Stockman (left) defends his right to speak, while his brother, Mayor Peter Stockman, tries to quiet him with threats. Dr. Stockman's wife, Katherine, seeks to intercede. The Stockman brothers are played by Equity artists Douglas R. Nielsen and Frank Geraci. Mrs. Stockman is portrayed by Naïma Bloomquist, a second term MFA candidate.

Tickets for "An Enemy of the People" are on sale now and may be reserved at the URTC Box Office in the Playhouse, or by calling 865-1884.

Sembene's *Touss*, 7:30 p.m., Robeson Cultural Center.

Mortar Board, "Last Lecture Series," 8 p.m., HUB Assembly Hall.

Musica da Camera, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, Feb. 7

Brown Bag Performing Arts Hour, 12:30 p.m., HUB Assembly Hall.

Phi Alpha Theta/History, Dan P. Silverman, Arthur F. Goldschmidt, Jr., Cyril Griffith and Robert J. Maddox, history, on "Diplomacy in Recent History," 1:30 p.m., Eisenhower Chapel Memorial Lounge.

Cinemathèque, Rosen, *The Hustler*, 6:30 and 8:30 p.m., HUB Assembly Hall.

Sports: basketball (women) vs. East Stroudsburg, 7 p.m.

URTC, Henrik Ibsen, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Friday, Feb. 8

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Roger Duvon, geography, on "Maps as Metaphors."

Commonplace Theatre, *Death in Venice*, 7 and 9 p.m., Room 112 Kern.

Sports: basketball (women), Coca Cola Lady Lion Classic, 7 p.m.

URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Contemporary Dance Company, 8:30 p.m., Eisenhower Auditorium.

Saturday, Feb. 9

Sports: fencing (women) vs. Caldwell, James Madison and California (Pa.), 9 a.m.; rifle (coed) vs. Navy and Youngstown State, 9 a.m.; basketball (women), Coca Cola Lady Lion Classic, 1 p.m.; swimming and diving vs. Rutgers, (women) 1 p.m., (men) 4 p.m.; wrestling vs. Cleveland State, 8 p.m.

Contemporary Dance Company, 2:30 p.m., Eisenhower Auditorium.

France Cinema, *Providence*, 7 and 9 p.m., Room 112 Kern.

URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Artists Series, Fionnula Flanagan in James Joyce's *Women*, 8:30 p.m., Schwab.

Student Foundation for the Performing Arts, "Evening with the Arts," Dan Kamin, mime, 8:30 p.m., HUB Ballroom. Free.

Sunday, Feb. 10

University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. George Docherty, Edinburgh University, Scotland, speaker.

Tom Kennedy, flute, 3:30 p.m., Music Bldg. Recital Hall.

Commonplace Theatre, *Death in Venice*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, Jan. 31

Population Issues Research Center, P. Neal Ritchey, Univ. of Cincinnati, on "Unique Incentives and Constraints to Minority Migration," 3:30 p.m., Room 173 Willard (new listing).

Physics, Stuart Solin, Michigan State Univ., on "Exploring Dimensionality and Disorder with Graphite Intercalates," 3:50 p.m., Room 445 Davey.

Meteorology, Hampton Nels Shirer, meteorology, on "The Unfolding Story of Singularities in Truncated Spectral Models," 3:55 p.m., Room 112 Walker.

Friday, Feb. 1

Analytical Chemistry, Joseph Yakupovic, grad. student, on "Analysis of Vitamins in Foodstuffs by HPLC," 11:10 a.m., Room 333 Whitmore.

Physical Chemistry, Mark Crisanti, on "Kinetics of the Folding of the Subunit of Tryptophan Synthase Base," 2:30 p.m., Room 333 Whitmore.

Horticulture, A.G. Stevenson, biology, on "Flowering and Fruiting Strategy of *Catalpa speciosa*," 3:55 p.m., Room 10 Tyson.

Monday, Feb. 4

Computer Center, "Introduction to the Interactive Editor," 7 p.m., Room 108 Forum.

Tuesday, Feb. 5

Organic/Inorganic Chemistry, T. Bailey, grad. student, on "Synthetic Aspects of Vinyl Silanes," 12:45 p.m., Room 333 Whitmore.

Water Pollution Control, Charles Fraust, Western Electric Co., Allentown, on "Chemical Waste Treatment in the Electronic Industry," 2:20 p.m., Room 165 Willard.

Geosciences, John Fenn, Univ. of Kentucky, on "The Shape of Coal Beds," 3:45 p.m., Room 26 Mineral Sciences.

Horticulture, Michael Ditt, Univ. of Georgia, on "Plant Odyssey," 7 p.m., Room 108 Tyson.

Wednesday, Feb. 6

Horticulture, Harry Houtnik, Ohio Agricultural Research and Development Center, on "Mechanisms of Suppression of Phytophthora Root Rot in Media Amended with Tree Bark," 4 p.m., Room 213 Buckhout.

Computer Center, "Introduction to the Interactive Editor," 7:30 p.m., Room 108 Forum (repeat of Feb. 4 seminar).

Thursday, Feb. 7

Chemistry, Hans Boch, Univ. of Frankfurt, on "Novel Radical Ions," 12:45 p.m., Room 333 Whitmore.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Economics/Institute for Policy Research, Richard Musgrave, Harvard Univ., on "The Leviathan Syndrome," 2 p.m., Room 101 Kern.

Anthropology, William T. Sanders, on "A Tale of Three Cities: Urban Ecology in Pre-Hispanic Mexico," 3:30 p.m., Room 107 Carpenter.

Philosophy, Alfonso Gomez-Lobo, Georgetown Univ., on "Ontology and Teleology in Aristotle," 8 p.m., Room 151 Willard.

Friday, Feb. 8

Analytical Chemistry, Robert Bleiler, grad. student, on "NMR Studies of the Paramagnetic Susceptibilities of Co, Cu and Ni Complexes," 11:10 a.m., Room 333 Whitmore.

Horticulture, Donald Kenney, Abbot Labs., on "New Microbial Products for Agriculture and Forestry," 1 p.m., Room 301 Ag. Admin. Bldg.

Physical Chemistry, Dennis Diestler, Purdue Univ., on "Optical Spectroscopic Studies of Molecular Processes," 2:30 p.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: Robert Andriulli, paintings; Ron Gallas, glass exhibit.

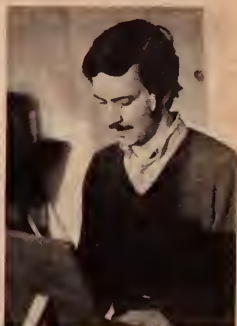

HUB Galleries: Hicks Echtpint National Invitational, traveling print exhibit, through Feb. 1, The Gallery. PSU Camera Club exhibit; Jinx Webster, recent ceramic works, opens Feb. 2, both in Art Alley.

Kern Commons: Group photography exhibit, opens Feb. 2.

Museum of Art: Wirth McCoy, recent paintings; sculpture from the permanent collection; Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager.

Robeson Cultural Center: Malkia Roberts, paintings, "Colorpoems/Connections."

Visual Arts Zoller Gallery: Wirth McCoy Retrospective.

Bucknell pianist to play four contemporary works

Four 20th century compositions are included on the program for a recital by pianist Barry Hannigan at 8:30 p.m. Monday, Feb. 4, in the Music Building Recital Hall. Mr. Hannigan is an assistant professor of music at Bucknell University.

Karlheinz Stockhausen's "Klavierstück VIII," composed in 1955, will open Mr. Hannigan's program. "The Willows Are New," written in 1957 by composer Chou Wen-Chung and "Twelve Bagatelles" by George Rochberg are also on the program. Mr. Hannigan will close the first part of his recital with an early 20th century piece by Alexander Scriabin, the Sonata No. 4, opus 30.

Following the intermission, Mr. Hannigan will perform the sole 19th century selection on the program - Schumann's Fantasy in C major, opus 17.

Mr. Hannigan, a Phi Beta Kappa graduate of Colorado College, received his master's degree from the University of Colorado and is currently working on his doctorate at the Eastman School of Music.

News in brief

(Continued from page 1)

History honorary sponsors colloquium on diplomacy

Phi Alpha Theta, the international honorary society in history, will sponsor a colloquium, "Diplomacy in Recent History," from 1:30 to 4 p.m. on Thursday, Feb. 7, in the Memorial Lounge of Eisenhower Chapel.

Four members of the Department of History will present brief addresses, including Dan P. Silversmith, Arthur F. Goldschmidt Jr., Cyril Griffith, and Robert J. Maddox.

Question periods will follow the addresses, and all members of the University community are invited to attend.

Flutist to perform with orchestra

Flutist Tom A. Kennedy, Jr., winner of the 1979-80 Young Artists' Competition, will be the featured performer for the Penn State Symphony Orchestra's concert at 8:30 p.m. Saturday, Feb. 2, in Eisenhower Auditorium.

Mr. Kennedy will appear as soloist in "Poem for Flute and Orchestra" by Charles T. Griffes, an early 20th century American composer. Other numbers on the orchestra's program include Carl Maria von Weber's "Overture to Euryanthe" and the Symphony No. 4 in D Minor, opus 120 by Robert Schumann.

The orchestra will conclude the concert with Igor Stravinsky's "Firebird Suite."

Mr. Kennedy, a graduate student in music at the University, is the assistant conductor and president of the Penn State Symphony Orchestra. He received his undergraduate degree in music education from the University of Indiana at Bloomington.

The Penn State Symphony Orchestra, composed of University undergraduate and graduate students, is conducted by D. Douglas Miller.

Chamber orchestra plays Feb. 5

Chamber orchestra music from three centuries will be performed by Musica da Camera when the group appears at 8:30 p.m. Wednesday, Feb. 5, in the Music Building Recital Hall.

The program includes Handel's "Fireworks Music"; Joseph Haydn's Symphony, "Franz Joseph Haydn's Symphony No. 92; Bach's Brandenburg Concerto No. 6; "Quiet City," written by American composer Aaron Copland; and Igor Stravinsky's Suite No. 2 for Small Orchestra.

For this program, Musica da Camera will be assisted by 25 additional musicians performing on various wind, percussion, keyboard and string instruments.

D. Douglas Miller, associate professor of music, directs the group.

Robeson shows Howard artist

"Colorpoems/Connexions," a collection of paintings by Washington, DC, artist Malkia Roberts, is on display at the Paul Robeson Cultural Center through Feb. 23.

Ms. Roberts, a professor of painting and design at Howard University, has traveled to Africa, Europe, Mexico and the Far East, and her art has been exhibited on three continents.

Her paintings at the Cultural Center have been influenced by what she calls the "Black 70s."

"The Black 70s extended the boundaries of Pan-African awareness in the East and West, on every level and in every area of expression," Ms. Roberts says.

"I call these works 'Colorpoems/Connexions' because they translate this awareness, this 'beat,' this energy into visual connections and communications," she continues. "Vibrant colors and vigorous rhythms are the channels through which the images and energies flow, and we connect."

Hetaerae and Customers, Attic red figured Kylix by Makron, 480 B.C.

Professor to discuss splitting of female psyche in Greek art

Eva Keuls, professor of classics at the University of Minnesota, will present an illustrated lecture, "The Hetaera and the Housewife: The Splitting of the Female Psyche in Greek Art," at 8 p.m. on Monday, Feb. 4, in the HUB Assembly Room.

Her talk is sponsored by the Central Pennsylvania Society of the Archaeological Institute of America.

Dr. Keuls, who is preparing a book on her lecture topic, explains that in the Greeks' consciousness of the female, the role of women as sex partners was represented by two manifestations of Aphrodite. Aphrodite Ourania stood for chaste and conjugal love; venal love was symbolized by Aphrodite Pandemos,

whose temple in Athens was financed from the proceeds of the public brothels set up by Solon.

Of the two male-defined facets of the female, the Greeks preferred the hetaera, according to Dr. Keuls. "Whoever established a cult of the Housewife?" Athenians asked rhetorically.

Professor Keuls holds an M.A. from Hunter College and a Ph.D. from Columbia University. She has taught at Emory and Howard universities. The author of numerous papers, she has written three books, *Greece, The Water Carriers in Hades: A Study of Catharsis through Toil in Classical Antiquity*, and *Plato and Greek Painting*.

Oliver Franklin to lecture on African, Afro-American cinema

Oliver Franklin, films curator at the Afro-American Historical and Cultural Museum of Philadelphia, will visit the University Feb. 5-7 for a series of lectures on African and Afro-American cinema sponsored by the Black Studies Program.

Tuesday, Feb. 5, he will speak on "Tarzan, Literature, and the Rise of African Cinema" at the Comparative Literature Luncheon in the Hotel State College at 1 p.m. That evening, he will introduce the film *Xala* at 7:30 p.m. in the Paul Robeson Cultural Center. *Xala* was written and directed by the Senegalese film maker and novelist Ousmane Sembene.

Wednesday, Feb. 6, Mr. Franklin will talk on "The Future of African and Afro-

American Cinema" at the African Studies Forum in the Paul Robeson Cultural Center at 7:30 p.m. He also will show another Sembene film, *Toussaint*, a short film portraying unemployment in Dakar, the capital of Senegal.

During his stay at the University, Mr. Franklin will lecture on filmmaking and censorship in Africa, African film and literature, and film and social change for courses on African politics, African literature, and race relations.

A graduate of Lincoln University, Mr. Franklin did advanced work in African studies and economics at Edinburgh and Oxford universities from 1966 to 1969.

University job openings attract many bidders

More than 8,600 employees bid for announced University job vacancies last year, Robert L. Kidder, manager of the Employment Division, reports.

"Typically, we have seen as many as 40 to 50 bidders for the more popular or higher level jobs," Mr. Kidder says, "and that's a great deal of activity."

Bidding has risen because turnover among University employees has been quite low recently, according to Mr. Kidder. Employees have been staying at the University and seeking opportunity for career advancement within the Penn State system.

"Unfortunately, with so much bidding activity, larger numbers of employees are bound to be disappointed," Mr. Kidder comments. "If 50 persons bid on a job, only one can be selected, and the 49 others, who may be good candidates, are disappointed."

"We feel, however, that our promotion programs are working very effectively for large numbers of University employees. The fact that someone is not selected when there is so much competition should not be viewed as any discredit to that individual's abilities."

Mr. Kidder urges employees to make certain that they maintain up-to-date background data on file in the University Employment Division Office. The Employment Division uses this

information to determine eligibility for consideration for promotion, so employees should see that they are represented in the best possible light.

"We believe many fine promotion opportunities still exist at Penn State," Mr. Kidder says, "and we hope employees will not become discouraged because of the competition."

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 666-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Feb. 7, 1980. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (FES-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

COMPUTER OPERATOR - COLLEGE OF MEDICINE, HENSHY Responsible to the Manager of Electronic Data Processing, College of Medicine, for monitoring and controlling electronic computers on established routines and for assisting department staff members as required. Two years of college or equivalent, with one to two years of experience in data processing.

Senate

(Continued from page 1)

Senate Committee on Curricular Affairs gives academic approval for an associate degree program, that approval will include the offering of the program in either a regular or extended mode.

Two legislative proposals will be brought forth by the Committee on Undergraduate Instruction.

The first deals with the question of what term students must enter a major. At present, some colleges require that students be admitted prior to the fourth term; others do not require admission until the seventh. Policy 37-30.2 has been interpreted in some cases to mean that a college may not disenroll a student prior to the seventh term. The Committee's revision would allow a college to disenroll a student earlier if the enrollment requirements of the college specifically say so. The text of the proposal reads:

"2. THE DEAN OF THE COLLEGE, IN ACCORDANCE WITH THE POLICIES AND PROCEDURES OF THE COLLEGE OR MAJOR, MAY REQUIRE THAT A STUDENT ENROLLED IN THE COLLEGE GAIN ENTRANCE TO A MAJOR AT THE BEGINNING OF EITHER THE STUDENT'S FOURTH, FIFTH OR SIXTH TERM AND NO LATER THAN PRIOR TO THE BEGINNING OF THE SEVENTH-TERM CLASSIFICATION. A STUDENT WHO FAILS TO GAIN ENTRANCE TO A MAJOR PRIOR TO THE TERM CLASSIFICATION SPECIFIED BY THE COLLEGE MAY BE DISENROLLED FROM THE COLLEGE AT THE DISCRETION OF THE DEAN (SEE SECTION 14-56, Item 1)."

The Committee's second proposal deals with the cumulative grade-point average required for graduation. The Senate had earlier approved changes in Policy 82-40 permitting specific academic units to insist on higher graduation standards than those approved by the Senate. This legislation was passed at the request of the College of the Liberal Arts, which will not accept grades below C toward fulfillment of the major requirements. The new legislation would allow any college to follow suit.

The legislation states: "COLLEGES MAY DESIGNATE A MORE RESTRICTIVE REQUIREMENT FOR GRADUATION BY SPECIFYING THAT NO COURSE OR COURSES, IN THE 'PRESCRIBED COURSES' AND 'ADDITIONAL COURSES' CATEGORIES OF A MAJOR, IN WHICH A STUDENT RECEIVES A GRADE BELOW 'C' MAY BE COUNTED TOWARDS THE FULFILLMENT OF THE MAJOR COURSE REQUIREMENTS. THIS REQUIREMENT MUST BE APPROVED BY THE FACULTY OF A COLLEGE AND WILL BE BINDING ON ALL UNDERGRADUATE MAJORS IN THAT COLLEGE. STUDENTS SHOULD CONSULT THE BACCALAUREATE DEGREE PROGRAMS CATALOG FOR THOSE COLLEGES WHICH HAVE THIS REQUIREMENT."

Informational reports from Curricular Affairs, as well as Planning and Development (a status report on construction projects) will be presented.

Senators will be informed that a newly completed census has found 21 fewer faculty members at Penn State eligible for the Senate electorate this year than last, but that representation in Senate voting units will not be affected.

Blindness

(Continued from page 1)

Life for her is full, she says, both at work and at home with her parents and two brothers.

"Being blind does not bother me a bit," she affirms. "It's a fact of life, it's never going to change, so why sit around and feel sorry for yourself?"

— Roger Williams

Penn State Intercom

A 'cheerful facilitator' for Faculty Senate

He provides continuity and stability to the Senate, in the form of historical perspective as well as staff support that's invaluable to officers and committee chairmen. — Dr. George J. McMurtry, Senate chairman.

He is a friend to me and to all Senate chairmen, and he was very helpful to me in my year as Senate chairman. — Dr. Lee W. Saperstein, immediate past-chairman Senate.

His major strength is to make the Senate operation more efficient and to allow Senate officers and committees to spend their time in policy areas rather than in implementation and administration. — Dr. Thomas E. Daubert, 1977-78 Senate chairman.

He's a cheerful facilitator, a nd an excellent listener, always accommodating and willing to help. — Sally S. Small, 1975-76 Senate chairman.

He is Dr. Oscar C. Barkman, executive secretary of the University Faculty Senate, the organization that since 1921 has held legislative authority in matters of academic interest to Penn State. As Chairman McMurtry notes, Dr. Barkman often goes the extra mile in a position whose responsibilities, as described by the 1979-80 edition of the Senate's *Constitution, Bylaws and Standing Rules*, are simply "to aid the Senate in the performance of its duties."

The ambiguity is intentional, Dr. Barkman suggests. "My job is made up of a number of jobs, but it's basically to coordinate and make information and materials available to Senate officers, the 14 standing committees and the 30 or more subcommittees so they can do their work more effectively."

This process involves a considerable measure of expertise. The Senate schedule must be coordinated with the total University calendar. Proposed legislation has to be coordinated with the various units of the University while it is under deliberation and then implemented after passage.

Supervising, writing, editing and assisting with Senate reports, the Senate *Agenda and Record*, the *Constitution* booklet and the academic policies for the student handbook are other responsibilities. Another crucial role is that of attending Senate meetings, Senate Council and other committee meetings as a resource person and facilitator.

"Though I'm mainly responsible to faculty members, I sometimes get the feeling that everybody's my boss," Dr. Barkman says. "Students, administrators, and staff members also have the right to ask questions about the Senate's work and get an answer. In a sense, the job is often like running an information service."

In any given month, Dr. Barkman invariably talks to faculty members and administrators in all of the Colleges, in most of the 130-plus academic departments, and at all Commonwealth Campuses. "You learn all the intricacies of how the University functions," he says. "Your

Dr. Barkman's phone in Birch Cottage rarely stops ringing.

specialty is being a generalist." And what he learns is not without cumulative effect. "He's widely recognized as an authoritative source regarding University policies and procedures, particularly those dealing with students and academic matters," Chairman McMurtry comments. "If he doesn't know the answer, he'll make every effort to find it."

Dr. Barkman and his staff perform another valued service for faculty and administrators — as a clearinghouse for information about the 7,000 academic courses offered at Penn State. "Often a department will call to say it is thinking about instituting a new option or a new major and will ask what related courses might be in existence in other departments or campuses," he explains. "Many of these inquiries result in meetings to explain procedures."

Increasingly, Dr. Barkman devotes his efforts to the ever-growing number of petitions submitted by students seeking Senate committee exception to the more than 130 rules and regulations in *Academic Policies and Procedures*.

When he started as executive secretary in May 1972, there were no petitions whatsoever, aside from those requesting academic reinstatement. This year, however, he expects to handle, for Senate Committee action, some 500 student petitions, not counting reinstatements, for such items as retroactive withdrawals from school, drop/adds, extensions for deferred grades or for the limitation of time allowed to pursue a degree.

"This increase may be due to the legalistic flavor of society now," he says. "Students seem to be very well informed about the University, their purpose here, and why they've come to me. They've really done their homework, and they have the problem pretty well tagged." Says Chairman McMurtry: "Dr. Barkman often acts as a 'super-adviser' and counselor to students, and is very

careful and fair in revising and processing their petitions. He's extremely understanding and patient with students who have problems and often goes beyond the call of duty to explain not only the procedures and actions taken but also the reasons and justifications for them."

His empathy for students is genuine, a result of his background in public education. Before his years as a graduate student at Penn State (his Ph.D. in educational administration was conferred in 1971), he was supervising principal at the Juniata Valley School District, near Petersburg, Huntingdon County, where he currently resides. As a graduate student, he worked first with the School Research Unit in the College of Education, subsequently as an adviser and assistant for teacher certification within the same College, and finally as an assistant to the Dean of the Graduate School. He also served as a Graduate Student Association representative to the Senate.

Upon receiving his doctorate, he declined offers for administrative positions at two Pennsylvania school districts to stay at Penn State, and shortly afterwards was appointed the Senate's executive secretary.

Dr. Barkman views the Senate as a force for responsible change in the academic life of the University, and a body that often reflects the concerns of society at large. He says:

"People at Penn State should feel good about the Senate. Here is a body of scholars — many of them internationally eminent in their fields — willing to volunteer their time and talents for the good of the University. A term in the Senate requires a good deal of effort, without compensation in terms of pay or release time."

Dr. Barkman's regard for the Senate is returned in kind. As Dr. Arthur O. Lewis Jr., 1969-70 Senate chairman, says: "He's one of the major reasons the Senate works as well as it does."

News in Brief

Happy Birthday from the HUB

The HUB Terrace Room will celebrate the University's 125th anniversary with a series of menu specials, dinners and entertainment Monday, Feb. 11, through Friday, Feb. 15.

A salad plate, sandwich platter and sandwich-soup special — usually sold at up to \$2.05 each — will be priced at \$1.25 during the anniversary week.

Penn State was chartered as the Farmers High School on Feb. 22, 1855.

According to Louis A. Berrena, HUB food services manager, the Terrace Room will commemorate the 125th in advance of the Feb. 22 anniversary day to allow students to take advantage of the specials before the Spring Term break.

The week also coincides with Valentine Day, which will be marked by candlelight dinners Wednesday and Thursday, Feb. 13-14.

In addition, the Terrace Room will feature musical entertainment nightly throughout the week.

Calendar data due

Persons with information for the Spring Term Calendar should have it in the hands of calendar editor Lee Morrill by Friday, Feb. 15. Send materials to Room 312 Old Main or phone 865-2501. The calendar will appear in the March 6 INTERCOM.

Winter enrollment up

Winter Term enrollment at the University totals 50,504 resident instruction students, an increase of 1,249 over last year.

A total of 30,425 students, 210 more than last Winter Term, are enrolled at University Park. Enrollment at the Commonwealth Campuses is 15,378 — up 816. The Behrend College, The Milton S. Hershey Medical Center and the Radnor Graduate Center also showed increases.

"The one-year enrollment increase for Winter Term is even higher than the excellent Fall Term increase Penn State experienced," said Dr. Robert E. Dunham, vice president for undergraduate studies. "This indicates that retention of students is better."

"We are encouraged that students continue to be attracted to quality programs."

Winter Term enrollment totals show 2,208 students at the Capital Campus, 1,658 at Behrend College, 566 at The Milton S. Hershey Medical Center, and 269 at the Radnor Graduate Center.

Human Development student receives national recognition

Dr. Catherine Surra Stump, who received her Ph.D. in human development and family studies at Penn State last year, has won the 1979 Student Award of the National Council on Family Relations, recognizing her as the most outstanding of the NCFR's 1,500 student members.

Dr. Stump, profiled in the January edition of the scholarly journal, *Family Relations*, is now an assistant professor in the Department of Family and Human Development at Utah State University.

She received her B.S. from Penn State in 1972 and her M.S. from the University of Maryland in 1974.

Penn Staters

Dr. Theodore L. Gross, provost and dean of Capitol Campus, is one of a group of national leaders from the fields of education, business and government, who have been invited to participate in the 1980-81 Presidential Lectures, sponsored by the University of South Dakota. The focus of the lectures, to be presented next October, will be "America in the 1980s."

Dr. Kenneth R. Beittel, professor of art education, is one of 12 art educators in Pennsylvania nominated for the Pennsylvania Outstanding Art Educator Award. He was cited for service to art education, outstanding contributions to the art teaching profession and quality teaching in art curricula. The award is sponsored by the Pennsylvania Art Education Association and the National Art Education Association.

A collection of black and white lithographs by Bill Hanson, associate professor of art, has been published by Impressions Workshop in Boston. The seven prints — "Flying Seaside," "Avian Landscape," "Rising Self-Stones," "Buried Self-Stone," "Exploding Sea-Pods," "Organic Image" and "Bouquet" — are from Mr. Hanson's "Organic Imagery" series and have been published in limited editions of 25 each.

David Young, professor and head of the Department of Landscape Architecture, served on the program assessment committee for the landscape architecture program at Ryerson Polytechnic Institute in Toronto. He was one of eight landscape architects chosen to assist the school in expanding its three-year baccalaureate program in landscape architecture to a four-year degree program.

Dr. Francis M. Dwyer recently received the Eero Davidson Memorial Award from the Pennsylvania Learning Resources Association for significant research contributions to the educational media profession. Dr. Dwyer, a senior research associate and affiliate professor of education, serves as head of the Office of Instructional Improvement. He is the author of more than 100 research articles.

Appointments

University Park

Irvin H. Kochel, director of Behrend College, has been appointed assistant vice president for administration, effective Sept. 1. President Oswald announced.

In his new position, Mr. Kochel will have University-wide responsibilities as principal staff officer to Dr. Richard E. Grubb, senior vice president for administration. He will be responsible primarily for assisting the divisions under Dr. Grubb's jurisdiction in maintaining external University relations, in planning and conducting programs and for liaison relationships with other University offices. Mr. Kochel has been director of Penn State's Behrend College since June 1984.

In announcing the appointment, Dr. Oswald recognized Mr. Kochel "for providing Behrend College with more than 25 years of administrative leadership which brought Behrend from a narrowly focused two-year campus to its present stature as a quality college of the University" and for his active involvement in the civic activities of the Erie community.

Mr. Kochel, who earned his bachelor's and master's degrees at Penn State, taught and coached in the Pennsylvania public schools for several years before assuming administrative positions at the Schuylkill and Capitol Campuses.

Since, as announced earlier, Dr. Thomas Fox, dean of faculty at Behrend, has requested reassignment to University Park as professor of economics, effective Sept. 1, President Oswald has announced the creation of the position of Dean of the Behrend College.

The Dean will have both administrative and academic responsibility for the College and will report directly to the Provost.

The search for an individual to fill the position of Dean of the Behrend College will be initiated in the near future.

Dr. W. Wayne Hinish, professor of agronomy extension, has been named assistant dean and assistant director for administration, management and training in the Cooperative Extension service, effective March 1. He succeeds Dr. Craig S. Oliver, who resigned to become director of the University of Arizona's Cooperative Extension Service.

In his new post, Dr. Hinish will be responsible for administration in the areas of personnel, management information systems, affirmative action and other equal opportunity procedures, staff development and training, and short course and correspondence course programs of the College.

Dr. Hinish, who earned three degrees at Penn State, has developed many of the Ag Service Schools which are held annually in Pennsylvania and also helped arrange and direct the agronomic activities of Pennsylvania's Unit Demonstration Farm Program, a cooperative project with the Tennessee Valley Authority. He has been in charge of the Penn State soil testing program since 1956 and has served as a consultant to a number of State and country government agencies. He is the author or co-author of more than 60 publications.

Chunil Hah as research associate of aerospace engineering, B.S., Seoul National University; M.S., U. of Tokyo; Ph.D. candidate, Penn State. John R. Sacha as research assistant, Applied Research Lab. B.A., Princeton U. Formerly systems rep., RCA.

Hershey

Barton L. Hodges as professor of surgery and head, Division of Ophthalmology. B.A., U. of Penn.; M.D., Jefferson Medical College. Formerly associate professor, Northwestern U. Medical School. David McMorris as assistant professor of family and community medicine and medical director, Evelyn G. Frederick Health Center. A.B., Gettysburg College; M.D., Jefferson Medical College. Formerly primary care internist, Sun City, AZ.

Bookshelf

Pamela A. Miller, assistant professor of English, examined the 3,500 journals now held in public collections of 19th century whalemens to find selections for her new book, *And the Whale Is Ours: Creative Writing of American Whalemens*. It is the first of a series of volumes to be published by David R. Godine of Boston in association with the Kendall Whaling Museum in Sharon, Mass.

Of the 13, 927 known American whaling voyagers, Dr. Miller says about one-third are documented in journals held in museums or in private ownership. Most were written by young officers or officers-to-be, since lesser crew members had neither the time nor the privacy to write.

Most selections in the book appear in print for the first time. Dr. Miller purposely chose poems and prose that had not been written for publication but to relieve the author's loneliness or, in some cases, for his family. The result is a book of interest to the casual reader as well as to scholars, with such fresh and lively writing as Samuel Biales' brief elegy to his pet pig, who died on board ship:

*My darling Piggy's back was broke;
For fear that she mite suffer;
I kindly cut her little throat
And had her fried for supper.*

The book concentrates on the 1840s and '50s, during the golden age of whaling in North America. The industry declined during the Civil War, and eventually died in 1925, when the schooner John R. Manta tied up at New Bedford for the last time.

Ms. Homan

Ms. Keene

Retirements

Amber R. Keene retired from her position as research technician in the College of Agriculture on Jan. 1.

Ms. Keene joined the Dairy Breeding Research Center staff in 1952. As research technician, she analyzed feed and blood from bulls on nutritional experiments, evaluated semen, and assisted in projects aimed at improving methods for using frozen semen.

Ms. Keene supervised three staff members and helped train students in methods of semen analyses. She also served as contact person for building maintenance and helped with tours and open houses.

A licensed toy and doll maker, she looks forward to pursuing her hobby of designing and manufacturing soft dolls and toys during her retirement. She's also involved in a long-term project of tracing her family tree back eight generations to the early settlers in George's Valley.

Helen I. Homan recently retired from her position as laboratory technician in the College of Agriculture. Ms. Homan began her University employment in 1956 and worked for the Dairy Breeding Research Department during her 23 years at Penn State.

As a laboratory technician, she helped with research relating to artificial insemination. Her husband, Lee, retired from his position in Penn State's Horticulture Department two years ago. Mr. and Mrs. Homan have two children and seven grandchildren. They presently reside in Boalsburg.

Catherine E. Drapcho, a residence hall worker in Housing and Food Services, retired Jan. 5. She started working at Penn State July 1, 1965.

Talks on William James to be given Feb. 12-14

A series of lectures on the life and teachings of William James will be presented Feb. 12 through 14 by Eugene Taylor, a writer and lecturer who specializes in the life of the American psychologist and philosopher.

Mr. Taylor's visit is sponsored by the Department of Philosophy, the Penn State Episcopalian Ministry, the Office of Religious Affairs, the Paul Robeson Cultural Center and the Institute for the Arts and Humanistic Studies.

"William James in the Stream of Consciousness" will be the subject of Mr. Taylor's lecture at the Comparative Literature Luncheon at noon on Tuesday, Feb. 12, at the Hotel State College.

He will speak on "Transcending the Veil: William James and W.E.B. Dubois" at the Paul Robeson Cultural Center, Walnut Building, on Tuesday evening at 8 p.m.

"William James' Religious Perspective: The Passionate Vision" will be the topic at The Ecumenical Faculty Brown Bag Luncheon Thursday at noon in the Informal Lounge of the Eisenhower Chapel.

Mr. Taylor is the author of several articles on William James and was a guest lecturer at the William James Symposium of the 86th Annual Convention of the American Psychological Association.

Obituaries

Edward M. Roderick, an assistant professor of engineering at Berks from 1961 to 1969, died Jan. 5 at the age of 77.

Edwin C. Rank, a maintenance foreman at Hershey when he retired in 1976, died Jan. 23. He was 66. He came to the Medical Center in 1968 as a patrol officer and also held the positions of maintenance mechanic and scheduler.

John S. Tutok, a residence hall worker with Housing and Food Services when he retired in 1968, died Jan. 28. He was 70 years old. Mr. Tutok joined the staff in 1965 as a janitor at the Nittany Lion Inn.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by filling the Employment Division, 565-1387 (network line 65-1387). Applications for these staff vacancies will be accepted until 5 p.m., Feb. 14, 1990. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

RESEARCH AIDE-COLLEGE OF AGRICULTURE, University Park. Receive specimens and perform analyses on various body fluids and tissues using standard clinical pathology methods. Perform routine hematological analysis using automated cell counting equipment and visual differential white blood cell counts.

Perform routine clinical chemistry analysis for inorganic and organic constituents of body fluids and tissues using colorimetric spectrophotometers, atomic absorption spectrophotometer and other appropriate techniques. Perform diagnostic tests and make reports to the staff member involved. Prepare and maintain inventory of supplies and reagents necessary for the operation of the laboratory functions. Certification by the American Society of Clinical Pathologists as a medical technologist and up to one year of effective laboratory experience required. Bachelor of science degree in bacteriology, medical technology or biological science desirable. Experience or interest in and potential to learn techniques of auto analysis and clinical medicine necessary.

PROJECT ASSISTANT-COLLEGE OF ENGINEERING, University Park. Assist in establishing and operating an environmental monitoring program. Responsible for conducting neutron activation analysis on a variety of samples and prepare reports after data analyses and interpretation results. This position is funded for a one year period with a possibility for renewal. Bachelor's degree or equivalent in physical science with a strong emphasis in chemistry required and a minimum of one year of extensive related experience.

COMPUTER OPERATOR-MANAGEMENT SERVICES, University Park. Set up and operate computers. Prepare peripheral equipment with forms, cards, tapes, disks. Load cards, set up printer, mount tape reels, etc. Expected to proceed alone following standard practice and any of several procedures. High school graduate with computer operator training equivalent to two years of college, plus one to two years of effective experience with data processing equipment. Must be willing to work either day or night shift.

ASSISTANT DIRECTOR OF GRADUATE ADMISSIONS-GRADUATE SCHOOL, University Park. Responsible to the Director of the Graduate School and the Director of Graduate Admissions for assistance in the development and administration of the Graduate School admissions system. A bachelor's degree or equivalent, plus over one year up to and including two years of administrative experience in a graduate school and/or admissions setting. A knowledge of information science would be desirable.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Feb. 7-17 Special Events

Thursday, Feb. 7
Cinematheque, *Rosien, The Hustler*, 6:30 and 8:30 p.m., HUB Assembly Hall.
Sports: basketball (women), vs. East Stroudsburg, 7 p.m.
URTC, Henrik Ibsen, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Friday, Feb. 8
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Roger Downs, geography, on "Maps as Metaphors."
Commonsplace Theatre, *Death in Venice*, 7 and 9 p.m., Room 112 Kern.
Sports: basketball (women), Coca Cola Lady Lion Classic, 7 p.m.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.
Contemporary Dance Company, 8:30 p.m., Eisenhower Auditorium.

Saturday, Feb. 9
Sports: fencing (women) vs. Caldwell, James Madison and California (Pa.), 9 a.m.; rifle (coed) vs. Navy and Youngstown State, 9 a.m.; basketball (women), Coca Cola Lady Lion Classic, 1 p.m.; swimming and diving vs. Rutgers, (women) 1 p.m., (men) 4 p.m.; wrestling vs. Cleveland State, 8 p.m.
Contemporary Dance Company, 2:30 p.m., Eisenhower Auditorium.
France-Cinema, *Providence*, 7 and 9 p.m., Room 112 Kern.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.
Artist Series, Siobhan McKenna in "Here Are Ladies," 8:30 p.m., Schwab.

Sunday, Feb. 10
Student Foundation for the Performing Arts, "Evening with the Arts," Dan Kamin, mime, 8:30 p.m., HUB Ballroom. Free.

Sunday, Feb. 10
University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. George Docherty, Edinburgh Univ., Scotland, speaker.
Shaver's Creek Nature Center, "Nature In and Out," 2-4 p.m., Stone Valley.
Tom Kennedy, flute, 3:30 p.m., Music Bldg. Recital Hall.

Monday, Feb. 11
Commonsplace Theatre, *Death in Venice*, 7 and 9 p.m., Room 112 Kern.
UCC, The Marshall Trucker Band, 8 p.m., Rec. Hall.

Monday, Feb. 11
Audio Visual Services, *Connections* film, "Countdown," 12:15 p.m., Room 112 Kern.
France-Cinema, *Providence*, 7 and 9 p.m., Room 112 Kern.
Steven Smith, piano, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, Feb. 12
STS/Two Cultures Dialogue on "Science-Technology for War and Peace," lunch, noon, presentation, 12:20 p.m., Room 101 Kern. Rustum Roy, director, MRL, on "No Class of 2000: A Scientific Look at the Coming Nuclear Holocaust."
Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Eugene Taylor, writer and lecturer, on "William James in the Stream of Consciousness."
School of Music Common Hour, student performances, 4 p.m., Music Bldg. Recital Hall.

Wednesday, Feb. 13
Shakespeare film, Richardson/Williamson, *Hamlet*, 6:30 p.m., Room 101 Chambers.
Artist Series film, Kenji Mizoguchi, *A Geisha*, 8 p.m., Schwab.

Thursday, Feb. 14
IAHS/Robeson Cultural Center public lecture, 8 p.m., Walnut Bldg. Eugene Taylor, specialist on the life of William James, on "Transcending the Veil: William James and W.E.B. Dubois."
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Friday, Feb. 15
Valentine Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.
Sports: basketball vs. Pittsburgh, (women) 5:45 p.m., (men) 8:10 p.m.; swimming and diving (men) vs. Bucknell, 7:30 p.m.
Philosophy/Religious Affairs public lecture, 8 p.m., Eisenhower Chapel Memorial Lounge. Eugene Taylor on "William James on Personal Destiny and the Science of Religions."
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.
Composers' Concert, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, Feb. 14
Ecumenical Faculty Brown Bag Luncheon, noon.
Eisenhower Chapel Lounge. Eugene Taylor on "William James' Religious Perspective: The Passionate Vision."
Brown Bag Performing Arts Hour, 12:30 p.m., HUB Charlotte Ray Lounge. PSU Glee Club.
Valentine Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.
Basketball, Hitchcock, *The 39 Steps*, 6:30 and 8:30 p.m., HUB Assembly Hall.
Colloquy lecture, 8 p.m., Eisenhower Auditorium. Dr. Wilson Bryan Key, on "Subliminal Seduction."
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Friday, Feb. 15
Last date to submit petition to Records Office to graduate in absentia in March.
Commonsplace Theatre, *Empire of the Senses*, 7 and 9 p.m., Room 112 Kern.
Folk and Square Dance Round-Up, 7:30 p.m., Room 133 White Bldg. Free.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.
Artist Series, Royal Winnipeg Ballet, 8:30 p.m., Eisenhower Auditorium.

Saturday, Feb. 16
Sports: rifle (coed) vs. West Virginia, Ohio State and Army, 8 a.m.; bowling (men and women) vs. Maryland, 1 p.m.; swimming and diving vs. West Virginia, (women) 1 p.m., (men) 4 p.m.; wrestling vs. Pittsburgh, 2 p.m.; gymnastics (men) vs. Northern Illinois, (women) vs. Louisville, both 8 p.m.
France-Cinema, *TBA*, 7 and 9 p.m., Room 112 Kern.
GSA Valentine Day Social, 8 p.m., Room 102 Kern.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Sunday, Feb. 17
University Chapel Service, 11 a.m., Eisenhower Chapel. Bryan Polk, intern pastor, Lutheran Student Parish, speaker.
Edmund Battersby, Montclair State College, piano, and Maureen Carr, director, School of Music, perform and discuss Beethoven's "Thirty-three Variations on a Waltz by Diabelli, Op. 120," 3:30 p.m., Schwab.
Commonsplace Theatre, *Empire of the Senses*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, Feb. 7
Computer Science, Gerhard Barth, computer science, on "A New Application of the Consensus Principle," 4 p.m., Room 325 Whitmore (new listing).

Friday, Feb. 8
Philosophy, Alfonso Gomez-Lobo, Georgetown Univ., on "Ontology and Theology in Aristotle," 8 p.m., Room 151 Willard.

Friday, Feb. 8
Analytical Chemistry, Roger Bleiler, grad student, on "NMR Studies of the Paramagnetic Susceptibilities of Co, Cu and Ni Complexes," 11:10 a.m., Room 333 Whitmore.

Saturday, Feb. 9
Horticulture, Donald Kenney, Abbott Laboratories, on "New Microbial Products for Agriculture and Forestry," 1 p.m., Room 301 Ag. Admin. Bldg.

Physical Chemistry, Dennis Diestler, Purdue Univ., on "Optical Spectroscopic Studies of Molecular Processes," 2:30 p.m., Room 333 Whitmore.

Monday, Feb. 11
Microbiology, Cell Biology, Biochemistry and Biophysics, Robert Subadinski, Temple Univ., on "Interferon: Effect on 2, 5-(A) Polymerase, Poly ADP Ribose Polymerase, and DNA Synthesis in HeLa Cells," 4 p.m., Room 101 Althouse.

Tuesday, Feb. 12
Microbiology, Cell Biology, Biochemistry and Biophysics, Robert Subadinski, Temple Univ., on "Use of ¹³C-NMR and Mass Spectroscopy to Study the Biosynthesis of Naturally Occurring Nucleotide Antibiotics and their Effect on Eucaryotes, Procarotes, Viruses and Plants," 11 a.m., Room 101 Althouse.

Organic/Inorganic Chemistry, M. Aba Zarga on "Synthesis of Morphine," 12:45 a.m., Room 333 Whitmore.

Water Pollution Control, Tom Kulesza, Industrial Waste Unit, Philadelphia Water Dept., on "Philadelphia's Pretreatment Program," 2:20 p.m., Room 165 Willard.

Siobhan McKenna

History, Robert J. Maddox, American history, on "Origins of the Cold War," 2:30 p.m., Room 101 Kern.

Geosciences, Peter Given, fuel science, on "The Importance of Geochemical Considerations in Determining Coal Behavior in Utilization," 3:45 p.m., Room 26 Mineral Sciences.

ASM, William A. Nystrom, Stackpole Carbon Co., on "Modern Industrial Applications of Graphite Materials," 7:30 p.m., Room 301 Steidle.

English, Peter Nicolaisen, German scholar, on "Artists in Faulkner's Fiction," 8 p.m., Room 305 HUB.

Wednesday, Feb. 13
Philosophy of Sport, Steven Danish, human development, on "Enhancing Athletic/Personal Development," noon, Room 104 White Bldg.

Microbiology, Cell Biology, Biochemistry and Biophysics, Thomas H. Maren, Univ. of Florida, on "Role of Carbon Dioxide in Secretory Processes: A Comparative Approach," 4 p.m., Room 101 Althouse.

Thursday, Feb. 14
Ceramic Science, Richard J. Fields, National Bureau of Standards, Washington, D.C., on "Deformation and Fracture Mechanism Maps," 11 a.m., Room 301 Steidle.

Chemistry, Richard R. Schrock, MIT, on "Early Transition Metal Organometallic Chemistry," 12:45 p.m., Room 333 Whitmore.

Physics, R. Richardson, Cornell Univ., on "He- the Uncharged Superconductor," 3:55 p.m., Room 445 Davey.

Friday, Feb. 15
Analytical Chemistry, Kevin Corby, grad student, on "Development of an Electrochemical Photovoltaic Cell," 11:10 a.m., Room 333 Whitmore.

Physical Chemistry, Roger Herman, physics, on "Vector and Scalar Interference in H₂ and HD," 2:30 p.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: Robert Andriulli, paintings; Ron Gallas, glass exhibit

HUB Galleries: PSU Cinema exhibit, through Feb. 12; Jinx Webster, recent ceramic works, both in Art Alley.

Kern Commons: Shirley Sargent, ceramics; Jerry Sawyer, Marc Levy, Carol Lindsay and Rich Hoover, photographs.

Museum of Art: Wirth McCoy, recent paintings, through Feb. 17; sculpture from the permanent collection; Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager.

Pattée Library: The 1980 Olympics — books, brochures, paraphernalia, Main Lobby, exhibit celebrating the 100th anniversary of the U.S. Geological Survey, East Corridor Gallery; Diane McManus, paintings and drawings; Lending Services Lobby, all through Feb. 15.

The Marvelous Travels of Baron Munchausen, from the Allison-Shelly Collection, Rare Books Room.

Robeson Cultural Center: Malkia Roberts, paintings, "Colorpoems/Connections."

Visual Arts Zoller Gallery: Wirth McCoy Retrospective, through Feb. 17.

Arts Roundup

McKenna to replace Flanagan in Artists Series Feb. 9 show

Irish actress Siobhan McKenna will appear in a one-woman show, "Here Are Ladies," at 8:30 p.m. Saturday, Feb. 9, in Schwab Auditorium.

Her performance is sponsored by the Artist Series and has been scheduled as a replacement for Fionnula Flanagan, whose program, "James Joyce's Women," was cancelled.

In her show, Ms. McKenna will portray women from the works of such Irish writers as Shaw, O'Casey, Yeats, Synge, Beckett and Joyce. She will present Joyce's two great monologues, "Anna Livia Plurabelle" from *Finnegans Wake* and Molly Bloom's closing reverie in *Ulysses*.

Ms. McKenna has extensive credits on stage, television and in films.

Tickets for "James Joyce's Women" will be honored for "Here Are Ladies." The performance is part of the Drama Series and is sold out by subscription. Any returned tickets will go on sale at the door beginning at 7 p.m. the evening of the performance.

Smith recital to include Haydn, Schubert, Debussy, Prokofiev

Pianist Steven Smith, an associate professor of music, will perform works by Haydn, Schubert, Debussy and Prokofiev in a recital at 8:30 Monday, Feb. 11, in the Music Building, Recital Hall.

Mr. Smith, who performed recently at Philadelphia's Museum of Art and on a concert tour of Spain, France and Gabon (Africa), will open his program with Haydn's Sonata in D Major, followed by the Sonata in A Major, opus posthumous by Franz Schubert. He will also play two preludes by Claude Debussy, "Canope" and "Feux d'Artifice," and will conclude his performance with Prokofiev's Sonata VII.

Mr. Smith was a Fulbright Scholar at the Mozarteum Academy in Salzburg, Austria. He earned his doctorate at the Eastman School of Music. A student of Cecile Gehring, Kurt Neumuller and Brooks Smith, he has been a member of the University music faculty since 1972.

Dance concerts Feb. 8-9

The Contemporary Dance Company, sponsored by the College of Health, Physical Education and Recreation, will present its annual concert at 8:30 p.m. Friday, Feb. 8, and a Young People's Dance Concert at 2:30 p.m. Saturday, Feb. 9, both in Eisenhower Auditorium.

Co-directors for the concert are Paula Donahoe and Patricia Heigel-Tanner, assistant professors of physical education. Seven works will be presented Friday evening. They are:

"Shadows of Intrusion" a piece for five women based on a poem by Edna St. Vincent Millay to music by Edward Varese, "Sentimentals," choreographed by Kathy S. Stuart; three works choreographed by Prof. Donahoe — "Jigsaw," "Wallflowers," and "Scrabble"; and two pieces by Pat Heigel-Tanner — "Duet for Flute and Dance" and "Coming Together."

Saturday afternoon's Young People's Dance Concert will focus on the dancer's craft, the art of improvisation and the creative process through the art of choreography. The Company will also perform four works from its repertoire.

Tickets for the concerts are on sale at the Eisenhower Box Office from 9 a.m. to 4 p.m. weekdays and at the door.

1980-81 Leaves of Absence

College of Agriculture

Carl W. Haseler, professor of pomology and pomology extension, to work at the Institute für Rebenzüchtung und Rebenveredlung in West Germany investigating the wine grape varieties that show promise of adaptability in Pennsylvania.

Daniel P. Knievel, associate professor of crop physiology, to study at the USDA/SEA Grassland, Soil and Water Research Laboratory at Temple, TX, to develop agronomic systems models to be used in wide area yield evaluation and production.

Morris G. Mast, associate professor of food science extension, to serve as senior scientist at Gelderholt Institute for Poultry Research, Breda, The Netherlands, researching poultry processing techniques in the European economic community.

Richard R. Nelson, Evan Pugh Professor of plant pathology, to conduct research on the genetics of host-pathogen interactions in mass germplasm reservoirs—conservation of genetic variability and reduction of genetic vulnerability at UC-Davis.

C. Shannon Stokes, professor of rural sociology, to conduct research on the relationship between agricultural and demographic change at Alexandria Univ., Alexandria, Egypt.

College of Arts and Architecture

Richard Alden, assistant professor of architecture, to study drawing and design teaching methods in the British system with the Architectural Association in London.

Robert W. Bailey, professor of music, to pursue research interests in American music, study new publications and renew effectiveness in piano performance and instruction.

Yar G. Chomicki, professor of art education, to renew interest and skill in painting in oils and to organize information and techniques of teaching and developing literature in the art of oil painting.

Raniero Corbellotti, professor and head of architecture, to make a comparative study of the professional education systems in the United States and the United Kingdom.

Burt L. Fenner, professor of music, to research new techniques in electronic music to assist in developing a computer sound synthesis program at Penn State, to write compositions for computer, and to prepare a graduate course in computer generated music.

William P. Hanson, associate professor of art, to concentrate on painting, visit museums and consult with museum experts and professional artists.

Lanny B. Sommes, associate professor of art, to gain a better understanding of the responsibilities of a practicing design professional by working at established design studios.

Roy S. Vollmer Jr., associate professor of architecture, to do research for publication concerning architectural concepts related to the origins and evolution of architecture.

Behrend College

Thomas G. Fox, professor of economics, to revise a computer simulation model for introductory macroeconomics courses and to develop a new program of economic policy evaluation.

A. Daniel Frankforter, associate professor of history, to undertake an historical study of the contributions of queens to the history of the English monarchy, focusing on the historical evolution of male and female sex roles within the English monarchy.

College of Business Administration

Anthony J. Curley, professor of finance, to study capital budgeting procedures at a number of U.S. corporations.

James D. Hammond, professor of business administration, to study the shifts in capital management and regulation now being initiated through international marketing, focusing on the New York Insurance Exchange and its potential impact on domestic and foreign insurance markets.

George B. Kleindorfer, associate professor of management science, to study selected advances in the simulation field, to complete a geontological research study, and to develop a Chautauque-type short course on simulation analysis applied to social service systems.

Alan J. Stenger, associate professor of business logistics, to evaluate the management of logistical and materials flow activities among leading U.S. manufacturers.

Capitol Campus

Theodore R. Graham, associate professor of humanities and English, to complete a book and prepare several articles on William Carlos Williams.

George M. Graham, associate professor of mathematics and engineering, to complete a reference text on the design of complex wind tunnels.

John S. Patterson, associate professor of American studies and history, to complete research on the role of the Gettysburg Battlefield in American culture since 1863.

Frank J. Swetz, professor of mathematics and education, to study attitudes toward mathematics among rural and urban Malaysian students and to study the mathematical concepts of the orang asli aborigines of Malaysia.

Commonwealth Campuses

Peter R. Adams, associate professor of chemistry, York, to do research in the area of enzyme models and phase-transfer catalysis at the U. of Sheffield, England.

Kathryn M. Grossman, assistant professor of French, Beaver, to complete first draft of a book on the novels of Victor Hugo, investigating the author's concept of romanticism and the romantic novel.

Carl L. Meyerhuber, assistant professor of history, New Kensington, to study the coal strikes of 1922 and 1927 in Pennsylvania's Allegheny Valley.

Peep Peter Rebane, associate professor of history, Ogontz, to investigate the medieval criminal court records in the archives of the city of Tallinn, now on deposit in Koblenz, West Germany.

College of Earth and Mineral Sciences

Leonard G. Austin, professor of fuels and mineral engineering, to collect materials to finish the first volume of a text on the process engineering of size reduction.

Richard L. Gordon, professor of mineral economics, as a visiting scholar at MIT's Energy Laboratory, to survey the problems that the electric utility and coal industries face.

Lee W. Saperstein, professor and section chairman of mining engineering, to work at the Royal School of Mines in London studying the mine design and planning process and its integration into the overall land-use planning process.

Alfred Traverser, professor of paleontology, to do research in Zurich at the Geological Institute of the Swiss Federal Technical Institute on the "Gloria Challenger" in the Black Sea in 1975. Wilbur Zelensky, professor of geography, to do a cross-national study of symbols which have been used to create unity among various populations.

College of Education

Paul E. Bell, associate professor of education, to pursue retaining in instructional supervision at several different universities.

John A. Salvia, professor of special education, to work in the area of non-discriminatory, individual assessment of handicapped clientele at the University of Minnesota and UCLA.

William E. Toombs, professor of education and research associate, Center for the Study of Higher Education, to examine ideas and policies that shape the nature of postsecondary or tertiary level education in the U.S. and England while at the University of London.

College of Engineering

Sabih I. Hayek, professor of engineering mechanics, to do research in acoustic scattering from elastic structures and in bio-acoustics and community noise at the Naval Oceanographic Systems Center and the Scripps Institution of Oceanography in San Diego, CA.

Robert L. Kabel, professor of chemical engineering, to prepare a monograph on the kinetics and engineering of catalytic reactions for the Elsevier Monograph Series in Chemical Engineering.

Frank W. Schmidt, professor of mechanical engineering, to do research at Imperial College, London, and Harwell, on laminar, transitional

and turbulent natural convective flows in enclosures to develop the numerical techniques needed to predict flow characteristics and to provide an insight into the physics of flow.

College of Health, Physical Education and Recreation

Geoffrey C. Godbey, professor of recreation and parks, to research outdoor recreation patterns in England and the U.S.

College of Human Development

Anthony R. D'Augelli, associate professor of human development, to review current activities in mental health consultation and education services at the U. of Michigan, with emphasis on constructing a systematic conceptual model for the development and evaluation of preventive services.

Walter E. Freeman, professor of human development, to investigate major organizational structures of the Puerto Rican community in relation to its participation and assimilation into North American community life.

College of the Liberal Arts

Judd B. Arnold, associate professor of English, to write a book on the "Problem Plays" of Shakespeare, studying how the admirable virtues of the protagonists disintegrate as events overtake them.

Roy L. Austin, assistant professor of sociology, to do research on the relationship between crime and social disadvantage, using historical and cross-cultural data from American and Caribbean sources.

Ronald E. Buckalew, associate professor of English, to complete work on a critical edition of Aelfric's Old English Latin Grammar and Glossary.

Frank Clemente, associate professor of sociology, to complete a research monograph on "The Sociology of Energy," dealing with electric system planning, its socioeconomic impact, the role of the public, and energy conservation.

Wilma R. Ebbitt, professor of English, to work on a book containing articles written by Margaret Fuller.

Richard L. Frautschi, professor and head of French, to complete a bibliographic study of French novels and short stories of the late 18th century in libraries of central and eastern Europe for publication of the second edition of the *Bibliographie du genre romanesque francais, 1751-1800*.

Richard E. Gregg, professor of speech communication, to write a monograph on communication as rhetorical inducement in symbolic form, based upon perception, language and comprehension.

Thomas A. Hale, associate professor of French and comparative literature, to collect, translate and publish oral epic literature of the Songhay-speaking people of Niger and Mali to make this West African literature available in English.

Paul B. Harvey Jr., associate professor of history, to complete two major studies on the influence of Hellenistic Greek tax regulations on the Roman administration of provincial properties, and an edition of an epigraphic French text of the first century A.D.

Edward Keynes, professor of political science, to do a comparative study of the German Federal Constitution Court and the United States Court as judiciary law making institutions.

Robert D. Lee Jr., professor of public administration, to analyze the impact of major legislative reforms for evaluation and merit pay in the Federal Personnel System in five states of the Mid-Atlantic region.

Robert E. Lougy, associate professor of English, to study the impact of the Arabian Nights on the work of Wordsworth, Tennyson, Dickens and other 19th century English writers.

Robert J. Liddon, professor of American history, to complete a book providing an historical account of the origins of the Cold War.

Terry J. Peavler, professor of Spanish and comparative literature, to write a book, "The Dissident Voice: Reflections on the Novel," examining the roles of the novelist and the novel in countries with differing political systems.

Louis C. Perez, professor of Spanish, to study Feliciano Enriques de Guzman, a Spanish playwright of the early 17th century, and to prepare a critical edition of her work, *Tragicomedia*.

Jan S. Prybyla, professor of economics, to study the market components of administratively commanded economic systems and their effect upon the official systems in the Soviet Union, China, Hungary, Poland and Cuba.

Richard Ravizza, associate professor of psychology, to study "holistic health" practice at the Himalayan International Institute as a means of preventative mental and physical disease strategies for applied psychology settings.

Richard Rosenberg, associate professor of economics, to examine the impact of the Australian Prices Justification Tribunal on the aluminum industry and its usefulness for U.S. consideration as a means to control inflation.

Peter Scheemans, assistant professor of English, to complete a novel extending metaphorical and analogical aspects of time and place in a modern American setting.

Robert M. Stern, professor and head of psychology, to do psycho-physiological research at the University of Meiss, Germany. John M. Warren, professor of psychology, to do research on the relationships between animal learning ability and age at the National Research Council, Rome.

Eugene E. White, professor of speech communication, to complete a book on configurational approach to rhetorical criticism, a new means of examining the effectiveness of influential communication.

Vickie L. Ziegler, associate professor of German, to prepare a book manuscript on the romantic "frame stories" of early 19th century German writers Clemens Brentano, E.T.A. Hoffman, Achim von Arnim, and Wilhelm Hauff, at Cambridge and Berlin.

College of Medicine

James M. Hammond, associate professor of medicine, to study the effect of the hormone prolactin on the function of the sheep ovaries and learning techniques devised in Australia.

Louis Hass, associate professor of biological chemistry, to become familiar with new techniques involved in studying protein structure.

Alexander Kalenak, associate professor of surgery, to gain knowledge in reconstructive surgery of the knee, to learn techniques of operative arthroscopy, and to do research on the biomechanics of running and the biomechanics of artificial ligament material.

Arthur F. Krieg, professor of pathology, to write a textbook on laboratory management in cooperation with the Department of Management Sciences at Penn State.

College of Science

Julian P. Heicklen, professor of chemistry, to serve as visiting professor in the Dept. of Environmental Health Sciences at the Hebrew University in Jerusalem, Israel, pursuing an interest in toxicology and epidemiology as well as ideas on age adjustment and the mortality data concerning Israel.

Roger M. Herman, professor of physics, to do research in theoretical atomic physics at the University of Heidelberg in Germany, concentrating on precision measurements of energy intervals in atomic hydrogen and on collisional effects of muonic atoms.

Donald G. James, professor of mathematics, to study in the area of number theory and the applications of classical algebra to number theory in Göttingen, Germany.

Thomas Jech, professor of mathematics, to investigate topics related to the axioms of the real numbers at UC-Berkeley and also study the theory of infinite games.

Friedrich W. Lampe, professor of chemistry, to do research in the Hahn-Meitner Institute for Nuclear Research in West Berlin to study the dynamics of chemical reactions that occur during collisions of energetic atoms and ions with simple molecules and the roles that these reactions play in determining the behavior of chemical systems subjected to ionizing radiation.

Roger Ware, associate professor of mathematics, to work on problems in the algebraic theory of quadratic forms at UC-Berkeley.

Penn State Intercom

Time to celebrate our 125th

A People-to-People program and the preparation of an oral history of Penn State will highlight the University's celebration this year of the 125th anniversary of its founding.

Feb. 22 — the date on which the Farmers High School was chartered in 1855 — will mark the opening of the celebration, which will include a program of special anniversary events in each college and at each campus and tie-ins ranging from Penn State postmarks to T-shirts.

The People-to-People campaign will take members of the faculty, staff and student body out into the State to tell the citizenry about the University's educational, research, service and economic contributions to the Commonwealth.

Volunteers at each Penn State campus will fan out in a 25-mile radius to contact media, local leaders, legislators and government officials in their areas. Speakers will be provided to local groups, and residents will be invited onto the campuses to share special anniversary

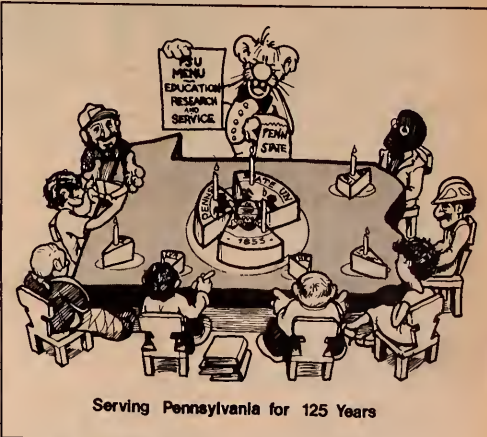

events.

A press kit has been prepared for the print and broadcast media in Pennsylvania with articles describing plans for the anniversary celebration, a brief history of Penn State, a list of its contributions, photographs and other relevant materials.

The goal is for a Penn State representative to visit every newspaper, radio and television station in the State.

The oral history effort will be directed by Leon J. Stout, senior assistant librarian in the Penn State Room. Former president Milton S. Eisenhower already has been interviewed. Dr. Stout and his staff hope to compile some two dozen oral histories during the course of the year.

To emphasize the breadth, diversity and richness of the total University experience, each college and campus has been asked to submit a list of from one to six events which it will be sponsoring this year and which might be tied-in to the official anniversary observance. These activities could run the gamut from lectures and plays to art exhibits and sporting events.

Serving Pennsylvania for 125 Years

Cartoon will be included in press kits.

Senate vote indicates approval of advising as a consultative process

Changes in the function of advising at the University were not resolved by the Senate, which sent back to committee two recommendations and voted down two others made by its Subcommittee on the Role of the Adviser.

During the debate at the Feb. 5 meeting, many senators expressed concern that Recommendation 1, which defined the role of the academic adviser as consultative in nature, conflicted with previous Senate legislation.

Senator Thomas E. Daubert (Engineering), in making the motion to return the legislation to committee, pointed out that University forms use the word "permission" rather than "consultation."

Subcommittee chairman Jefferson D. Ashby asked that a straw vote be taken to determine if senators indeed wanted the advising function to be consultative before

the Subcommittee embarked on further lengthy deliberations. The vote was taken, and the Senate clearly indicated its preference for the consultative concept. The Subcommittee will now consider the ramifications of such a change on existing rules.

The Senate then debated and voted down Recommendation 2, which proposed the development of advising programs with training and monitoring components.

Senator Joseph Michels (Liberal Arts) noted that, while supporting the spirit of the proposal, he felt the actual recommendation would have the effect of constraining advising and limiting the access of students to advisers.

Several senators expressed the opinion that sufficient information was available to conscientious advisors from such sources as the Student Handbook and that the

legislation was unnecessary.

The Senate also rejected the third recommendation, which proposed that PS-23 clearly indicate that academic advising is an important part of the instructional role of most faculty members. There was a general reluctance to add new stipulations to the promotion and tenure regulations. Senator Irwin Feller (Liberal Arts) pointing out that advising was already mentioned four times in the promotion and tenure guidelines.

The fourth recommendation was originally included in the Senate docket as an "attachment" to the committee report. The Committee on Academic and Athletic Standards suggested that it be made Recommendation 4 and that it be included in the Faculty and Student Handbook. The statement listed five components of academic advising and specified a number

to be included in the role of the adviser and responsibilities of the advisee.

The Senate voted to return this recommendation to committee so that it could be reviewed in the light of changes to be made to Recommendation 1.

The Senate then passed several pieces of legislation, including:

— Clarifying Course-Drop Policy 34-89 for students wishing to drop courses which do not occupy a standard 10-week time module.

— Allowing the offering of an associate degree program in either a regular or extended mode once the Committee on Curricular Affairs has given it academic approval.

— Allowing a college to require that students be enrolled in a major at the beginning of either the fourth, fifth, sixth

(Continued on page 2)

University pleased by State's acceptance of concept of equity in budget

Pennsylvania's situation is not as gloomy overall as that of such neighbors as New York State. Provost Eddy told the Feb. 5 Senate meeting in commenting on Governor Thornburgh's annual budget message, which was delivered earlier that day to the joint houses of the legislature.

"Nevertheless, the emphasis given by Governor Thornburgh for Pennsylvania was on austerity," Dr. Eddy said.

"Revenue is down; fixed expenses are up, and there is fierce competition for the little that is discretionary."

The Governor recommended a total allocation of \$127 million for Penn State,

an increase of \$6.9 million over last year's appropriation of \$120 million. The University has requested \$140 million.

Dr. Eddy noted, however, that the Governor had singled out higher education this year as one of the few areas for some increase in appropriations in recognition of its need for assistance in encountering the problems to be faced in the '80s.

The recommendation for basic education was virtually zero in increased appropriation, except for about 3 percent which is mandated, the Provost said, continuing:

"On the other hand, the Governor

recommended approximately 6 percent for both the state-related and state-owned colleges and universities. Our arguments in behalf of equity seem to have been heard."

The actual figure in the Penn State in educational and general funds, research, agricultural research and agricultural extension. No increase was requested for student aid, the soil survey, and medical education.

"Without the latter three items, the total increase of approximately \$7 million came to 5.8 percent," the Provost said.

The picture is somewhat different, Dr. Eddy pointed out, when the recommendation for Penn State is compared to that for the University of Pittsburgh and Temple University.

"Both institutions have a much higher percentage of their total budget in medical and dental education," Dr. Eddy explained. "With no increase also for them in these categories, their total appropriation would be increased by 5.2 percent for Pitt and 5.1 percent for Temple. All of us received 6 percent in the educational and general funds, and, in

(Continued on page 2)

Search Committee invites nominations, applications for new Vice-President-Dean position

Fourteen persons have been invited by President Oswald and Provost Eddy to serve on a search committee for the position of Vice-President and Dean of the University-wide System of Continuing Education and Commonwealth Campuses.

The Committee, which will be chaired by Dr. John J. Coyle, professor of business administration, invites nominations and

applications for the position.

The Vice-President and Dean, with appropriate faculty and administration consultation, will be expected to develop the details of the administrative integration of the two units, an action authorized by the Board of Trustees at its January meeting. He or she will be responsible for academic and administrative affairs on

Commonwealth Campuses and for the overall direction and fiscal control of Continuing Education programs. The occupant of the position will report to the University Provost, and, along with other principal academic officers, will be a member of the President's Staff and the Council of Academic Deans.

The reorganization does not alter

present policies which place Commonwealth Campus faculty membership in an academic department and college, and which require new continuing education programs to have departmental and college approval.

Candidates should have at least ten years of combined experience as faculty

(Continued on page 2)

Penn Staters

Dr. Richard A. Anthes, professor of meteorology, has received the Clarence Leroy Meisinger Award of the American Meteorological Society. The award is given annually in recognition of a research achievement that is, at least in part, aerological in character. Dr. Anthes was honored for research and modeling in tropical cyclones and mesoscale meteorology.

Dr. Maurice Shamma, professor of chemistry, recently returned from Southeast Asia where he delivered several invited lectures and collected plants which he will analyze for medicinals. In India, he presented talks at the University of Calcutta on the biogenesis of aporphine alkaloids and recent developments in berberine alkaloids. In Thailand, Dr. Shamma spoke on aporphine biogenesis at Mahidol University in Bangkok.

Raniero Corbelli, professor and head of the Department of Architecture, has been named president of the State Board of Examiners of Architects. The five members of the Board, appointed by the Governor, supervise the examination and registration of architects in Pennsylvania and regulate professional conduct in regard to architectural practice in the State.

Dr. Robert E. Newham, professor and head of the solid state science program, recently served as the keynote speaker at the 17th Annual Solid State Physics Conference sponsored by the Institute of Physics of Great Britain and held at the University of Warwick in Coventry, England. His topic was "Ferroic Crystals." Before returning home, he also gave a seminar at the Atomic Energy Research Establishment at Harwell, England, discussing "Composite Piezoelectric Transducers."

Dr. John A. Dutton, professor of meteorology, was recently elected vice chairman of the University Corporation for Atmospheric Research (UCAR). UCAR is a consortium of 48 North American universities and research institutions with active research programs in atmospheric science.

Bookshelf

A faculty member at Capitol Campus is the author of one of the first books in McGraw-Hill's new "Quantitative Methods for Management" series. Dr. Christopher K. McKenna, associate professor of management science and acting head of the Business Administration Program at Capitol, wrote the 425-page *Quantitative Methods for Public Decision Making* for use in graduate programs in Public Administration, undergraduate courses in Public Policy and Policy Analysis, and for professional development short courses.

This is the first text specifically aimed at presenting management science techniques entirely through public sector applications.

The author treats quantitative analysis as one of many sources of information available to the public decision-maker. Students will see applications to health, criminal justice, regional planning, municipal operations, education, and other public sector fields of service.

The book brings the relevant literature to the attention of the reader not only through chapter by chapter bibliography listings but also by presenting in each chapter a shortened version of an application taken from the literature. The text presents the applications in such a way that the reader can understand and appreciate the role of quantitative analysis in decision making without having to go through all of the mathematical details that the quantitative specialist would execute.

Louis A. Berrena, manager of the HUB food services, has received his 25-year chair from the University.

Mr. Berrena joined the Penn State staff in December 1954 as head supervisor in Waring Hall. In June of 1956 he became supervisor of the HUB cafeteria, and two months later he was promoted to his present position.

As manager of HUB food services for 23 years, Mr. Berrena has brought several new programs to the cafeterias. He instituted the popular candlelight dinners to mark such holidays and special events as Christmas, Thanksgiving, International Week and the Winter Carnival Celebration.

He also introduced live entertainment in the Terrace Room and brought a deli bar, salad bar and hot sandwiches to the cafeteria menu.

In addition to directing HUB food services, Mr. Berrena has been active in the community. In 1976 he received the Italian-American Press "Oscar," recognizing his efforts as a community leader and contributor to good causes.

He and his wife, Patricia, have eight children and six grandchildren.

Promotions

Staff Exempt

Carinda Leppert to neonatal nurse instructor at Hershey.

Staff Non-Exempt

Linda R. Cranston to clinic supervisor at Hershey.

Jonathan E. Gardner to cardiovascular technician at Hershey.

Barbara J. Phillips to nutrition aide supervisor in Agriculture.

Joyce M. Rogers to grants and contracts accountant in Controller's Office.

Clerical

Beth A. Gedon to secretary C in Intercollege Research Programs.

Doris J. Gentzel to clerk, records A in Registrar's Office.

Barbara R. McCamish to research data processor A in Engineering.

Jennifer B. Morris to senior clerk in Human Development.

Sharon A. Noley to input operator in Libraries.

Patricia A. Sundy to clerk, receptionist in Undergraduate Admissions.

Kelly S. Wingst to senior manuscript typist at Hershey.

Technical Service

Helen M. Fisher to storeroom clerk A at Hershey.

Harry E. Huey to photo technician in UDIS.

Carolyn J. Lewis to patient service aide at Hershey.

Sallie J. Phillips to physical therapy aide at Hershey.

Cecilia E. Patnam to lab technician A in Agriculture.

Peter Strecker to maintenance worker-campus housing in Housing and Food Services.

James F. Usher to utility worker at Hershey.

Theodore J. Young to instrument maker A in Science.

Retirements

Lemuel R. Reese, a laboratory maintenance technician in the College of Science, retired Feb. 1 after 22 years of service at Penn State.

Mr. Reese started out as a night janitor at the HUB. After three years he switched to the Division of University Safety and worked as a campus patrolman for nine years before moving to the College of Science.

His job required him to keep equipment in the University's many chemistry labs in good operating condition, and he has applied his skills to plumbing, carpentry and electrical work in pursuit of that goal.

Dinner hour will be somewhat less hectic for Darlene N. Wright when she retires Feb. 16. Ms. Wright, a dining hall supervisor, has spent more than 15 years overseeing food service operations in a succession of University Park residence halls.

Ms. Wright is a 1941 Penn State graduate with a degree in institutional management. Three of her six children are also alumni, and a fourth will graduate in May. Her husband, Morgan, worked for Penn State as a fee assessor until his death eight years ago.

Paul Scosah, a preventive maintenance worker in Housing and Food Services, will retire Feb. 26 after 16 years of service. He joined the University's staff as a janitor Oct. 30, 1964, and moved to the maintenance crew last year.

Sarah A. Hornbeck, a clerk, verifier in the University Libraries, retired Feb. 1. She had been a member of the staff since Jan. 29, 1970.

Martha J. Bahner, a tray assembler at Hershey, retired Feb. 3. She had been employed by the University since Feb. 1, 1971.

Search Committee

(Continued from page 1)

members and executive-level administrators at a multi-campus research university or a comparably complex organization with a continuing education program.

They should possess a terminal degree in a discipline or professional field and have demonstrated commitment to undergraduate education and lifelong learning. They should have proven ability to organize tasks, supervise personnel, manage funds and cultivate innovation. The ability to think, write and speak clearly — as manifested by scholarly research and professional activity — should be demonstrated.

Candidates should be available by July 1, 1980, for assignment at University Park. Nominations and letters of application should be sent to the Search Committee by March 25, 1980, c/o Office of the Provost, Room 205 Old Main, University Park, PA 16802.

Persons invited to serve on the Search Committee include:

Dr. Robert D. Arbuckle, director, New Kensington; Dr. Michael A. Barendse, assistant professor of sociology and American studies, Worthington Scranton; Dr. Roy C. Buck, professor of sociology and social science; Dr. Edward V. Ellis, associate dean for Continuing Education and Commonwealth Campuses, Human Development; Marlowe Froke, director of media and learning resources; Dr. Richard E. Grubb, senior vice-president for administration; Dr. Evelyn A. Hovance, associate professor of English, Fayette; Dr. Arthur J. Marsicano, associate professor of engineering, Schuylkill; Patricia M. Overdeer, professor of mathematics, Ogontz; Dean Nunzio J. Palladino, Engineering; Dr. Rosemary Schaefer, assistant provost; Dr. Nancy M. Tischler, professor of English and humanities, Capitol; and Victor M. Verbeke, coordinator, Council of Branch Campus Student Governments.

Attention: Carpoolers

To help commuting faculty and staff members save gasoline, INTERCOM will begin publishing lists of persons seeking drivers and/or passengers for car pooling to work at the University. The lists will be published as occasion demands and space permits.

Interested persons should submit their requests to INTERCOM, Room 312 Old Main. The information needed: name, residence, work location, arrival and departure times, phone numbers for residence and work, and whether drivers, riders or both are sought.

Equity

(Continued from page 1)

Penn State's case, in research. It is confusing to have these two sets of figures for comparison, but it is important to realize the difference the medical and dental amounts make."

Dr. Eddy also said the Senate the following comment from President Oswald:

"In view of the overall financial picture of the state, Penn State is gratified to note that higher education is recognized by the Governor as one of the truly pressing needs of the Commonwealth. The first item on our agenda is to study this recommendation and its impact on the budget and on tuition levels. Until the legislature begins its consideration of the budget, it is too early to speculate on what will be required."

Dr. Eddy added that until the legislature concludes its consideration of the budget, no tuition rate will be fixed.

"The early consensus in Harrisburg is that higher education has fared very well indeed in comparison with other services of the state government," Dr. Eddy said, "and that at least the tendency to favor state-owned in preference to state-related did not surface in this year's recommendation."

Dr. Eddy pointed out that the Governor also recommended \$13,789,000 in his capital budget for Penn State's most pressing needs. These include \$8,034,000 for required boiler plant improvements; \$4,600,000 for sewage plant improvements; \$788,000 for improvements to the electrical distribution systems; and \$367,000 for extension of water lines.

"Our next big step in terms of the budget," the Provost concluded, "is to examine the recommendations and look at various alternatives prior to the House and Senate hearings by the Education and Appropriation Committees. These hearings are expected to be scheduled fairly soon."

Advising

(Continued from page 1)

or seventh terms and allowing the college to disenroll students if they fail to gain entrance to a major prior to the term specified by the college.

— Allowing any grade to require that students earn at least a "C" in the "prescribed courses" and "additional courses" of their major to fulfill graduation requirements.

During debate on this last proposal, Senator Robert Schmalz (E&MS) protested that the proposal, in a time of declining enrollments, would increase the pressure on faculty members to give "C" rather than "D" grades and thus "mandate" grade inflation.

Liberal Arts senators said that during the years the requirement had been in effect in their college, they had experienced less grade inflation than many other units in the University.

University Park Calendar

Feb. 14-24

Special Events

Thursday, Feb. 14

College of HPER lecture, 3:35 p.m., Room 104 White Bldg. Matthew G. Martoza, dean, Lock Haven State College and international specialist in sport and physical education, on "Sport - The Russian Way."

Mechanical Engineering Distinguished Lecture, S. William Couse, the Mire Corp., on "Energy - The Nature of the Problem," 4 p.m., Room 105 Mechanical Engineering Building.

Valentine Candlelight Dinner, with Ken and Ernie and songs from "way back when," 4:45-6:45 p.m., HUB Terrace Room.

Cinematheque, Hitchcock, *The 39 Steps*, 6:30 and 8:30 p.m., HUB Assembly Hall.

Colloquy lecture, 8 p.m., Eisenhower Auditorium. Dr. Wilson Bryan Key on "Subliminal Seduction."

URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Friday, Feb. 15

Last date to submit petition to Records Officer to graduate in absentia in March.

Human Development/Liberal Arts lecture, 2 p.m., Room 112 Kern. Sir Leon Radziewicz, international authority on criminology, on "Administering Justice and Rethinking Sentencing Policy."

Celebration Dinner of Penn State's 125th Anniversary, with music by the Freeland Jazz Quartet, 4:45-6:45 p.m., HUB Terrace Room.

Commonplace Theatre, *Empire of the Senses*, 7 and 9 p.m., Room 112 Kern.

Folk and Square Dance Round-Up, 7:30 p.m., Room 113 White Bldg.

URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Artists Series, Royal Winnipeg Ballet, 8:30 p.m., Eisenhower Auditorium.

Saturday, Feb. 16

Sports: rifle (coed) vs. West Virginia, Ohio State and Army, 8 a.m.; bowling (men and women) vs. Maryland, 1 p.m.; swimming and diving vs. West Virginia, (women) 1 p.m., (men) 4 p.m.; wrestling vs. Pittsburgh, 2 p.m.; gymnastics, (men) 1 Northern Illinois, (women) vs. Louisville, both at 8 p.m.

France-Cinema, *TBA*, 7 and 9 p.m., Room 112 Kern.

URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Sunday, Feb. 17

PSOC Hiking Division, hike on Tussey Ridge, 9 a.m. HUB parking lot.

University Chapel Service, 11 a.m., Eisenhower Chapel. Bryan Polk, interim pastor.

Lutheran Student Parish, speaker, Edmund Battersby, piano, and Maureen Carr, director, School of Music, perform and discuss Beethoven's *Thirty-three Variations on a Waltz* by Diabelli, Op. 120, 3:30 p.m., Schwab Auditorium.

Commonplace Theatre, *Empire of the Senses*, 7 and 9 p.m., Room 112 Kern.

Turn-of-the-century valentine from the Rare Books Room in Pattee.

Monday, Feb. 18

Audio Visual Services, *Connections* film, 6:30 p.m., Room 101 Chambers.

Shakespeare film, *Brook/Scotfield, King Lear*, 6:30 p.m., Room 101 Chambers.

East Asia Studies Committee lecture, 7 p.m., Room 101 Kern. Parris H. Chang, political science, on "China Revisited."

France-Cinema, *TBA*, 7 and 9 p.m., Room 112 Kern.

Color Slide Club meeting, 7:30 p.m., Room 189 MRL.

Tuesday, Feb. 19

Gallery talk, 10:30 a.m., Museum of Art. Richard Porter, registrar of the Museum, on "Searching for William Williams, Teacher of Benjamin West: A Problem of Connoisseurship."

School of Music Common Hour, opera workshop with student performances, 4 p.m., Music Bldg. Recital Hall.

Sports: wrestling vs. Bloomsburg, 8 p.m.

URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Wednesday, Feb. 20

Last day to sign Winter Term Emergency Loans, Room 108 Shields.

Early registration for Spring Term, weekdays, 8:30 a.m.-4:30 p.m., Room 112 Shields, through Feb. 26.

Sports: swimming and diving (men) vs. Bloomsburg, 4 p.m.; basketball (men) vs. Massachusetts, 8:10 p.m.

URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Winter Term classes end, 9:55 p.m.

Thursday, Feb. 21

Final examinations. URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Friday, Feb. 22

Final examinations. URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Saturday, Feb. 23

Final examinations. Sports: fencing (women) vs. Indiana (Pa.), Johns Hopkins, St. John's and Cornell, 9 a.m.

URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Sunday, Feb. 24

Sports: fencing (women) vs. Ohio State, Johns Hopkins and St. John's, 9 a.m. Montclair Trio, 3:30 p.m., Music Bldg. Recital Hall.

Seminars

Thursday, Feb. 14

Computer Science, Jeffrey Spinn, computer science, on "Generating-Function Inner Product," 4 p.m., Room 325 Whitmore (new listing).

Mathematics, Richard Schoen, Institute for Advanced Study, on "Recent Advances in Differential Geometry by Analytic Methods," 4 p.m., Room 102 McAllister (new listing).

Statistics, George Weiss, NIH, Bethesda, on "A Combinatorial Problem in the Analysis of DNA Fractionation," 4 p.m., Room 60 Willard (new listing).

Friday, Feb. 15

ARL, David B. Reister, Institute for Energy Analysis, Oak Ridge Assoc. Univs., on "Is Zero Energy Growth Possible?" 10:45 a.m., Walker Conference Room, Applied Science Bldg.

A daily calendar of events is available around the clock at 863-3100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Analytical Chemistry, Kevin Corby, grad. student, on "Development of an Electrochemical Photovoltaic Cell," 11:10 a.m., Room 333 Whitmore.

Physical Chemistry, Roger Herman, physics, on "Vector and Scalar Intercollisional Interference in H⁺ and HD," 2:30 p.m., Room 333 Whitmore.

Tuesday, Feb. 19

Organic/inorganic Chemistry, C. Froebe, grad. student, on "Ligand-Inert Metal Ions as Probes of Enzyme Structure and Function," 12:45 p.m., Room 333 Whitmore.

Water Pollution Control, Ed Treat, Borough Manager, Myerstown, PA on "Joint Wastewater Treatment at Myerstown," 2:20 p.m., Room 165 Willard.

Biology, Robert Hattaway, biology, on "The Taxonomy and Distribution of the Genus *Glyptothecium* (Muscif.)", 4 p.m., Room 105 Ferguson.

Statistics, Lars Horn, Stanford Univ., on "On Committee and Capture-Recapture Problems," 4 p.m., Room 60 Willard.

Thursday, Feb. 21

Mathematics, Harvey Canuh, Univ. of Tennessee, on "The Green Relations," 4 p.m., Room 102 McAllister.

Friday, Feb. 22

Statistics, Robert Serfling, North Carolina Univ., on "The Poisson Approximation: Recent Developments and New Applications," 4 p.m., Room 160 Willard.

Exhibits

Chambers Gallery: Robert Andriulli, paintings; Burke/Hartwick Glass Invitational, student artists, both through Feb. 20.

HUB Galleries:

Jinx Webster, recent ceramic works, through Feb. 20, Art Alley.

Kern Commons: Shirley Sengenbaler, ceramics, through Feb. 22; Jerry Sawyer, Marc Levey, Carol Lindsay and Jack Hoover, photographs.

Museum of Art: Wirth McCoy, recent paintings, through Feb. 17; sculpture for the permanent collection, through Feb. 24; Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager; Chinese export porcelains from the collection of Dr. and Mrs. Harold L. Tonkin, opens Feb. 24.

Pattee Library: The 1980 Olympics - books, brochures, paraphernalia, Main Lobby; exhibit celebrating the 100th anniversary of the U.S. Geological Survey, East Corridor Gallery; Diane McManus, paintings and drawings; Lending Services Lobby, all through Feb. 15.

The Mark Twain Collection, *Travels of Baron Munchausen*, from the Allison-Shelly Collection, Rare Books Room.

Robeson Cultural Center: Malikia Roberts, paintings, "Colorpoems/Connections," through Feb. 23.

Visual Arts Zoller Gallery: Undergraduate students exhibit, opens Feb. 24.

Arts Roundup

Edmund Battersby

Beethoven program is Feb. 17

Dr. Maureen A. Carr, director of the School of Music, and pianist Edmund

Battersby of the Montclair State College music faculty will present a discussion and performance of Beethoven's 33 Variations on a Waltz by Diabelli, Opus 120, at 3:30 p.m. Sunday, Feb. 17, in Schwab Auditorium.

Dr. Carr and Mr. Battersby will open the program with a lecture and discussion, illustrated with slides of sketches and the autographed manuscript, on "The Motivic Process in Beethoven's Opus 120: The Origin of the Theme and Its Structure."

Following an intermission, Mr. Battersby will perform the Variations.

A music theorist, Dr. Carr participated last summer in a National Endowment for the Humanities Seminar on Performance Practice in the Music of Beethoven held at the University of North Carolina at Chapel Hill. The results of her research comprise the first section of the Feb. 17 program.

Mr. Battersby, an honors graduate of the Juilliard School of Music where he was a student of Sascha Gordanitzki, made his debut last season at New York's Alice Tully Hall.

He has toured throughout the United States, Great Britain, Europe and Africa, and was pianist-in-residence last August at the White Mountains Festival in Jefferson, N.H.

Chambers Gallery showing paintings, glass blowings

A group of paintings by art instructor Robert Andriulli and glass blowings by students are on display at the Chambers Gallery through Feb. 20.

Mr. Andriulli, director of the Zoller Gallery, received his M.F.A. in painting from Penn State in 1978 and his B.A. at the William Peterson College of New Jersey in 1975.

The Burke/Hartwick Glass Invitational features both sculptures and functional pieces in blown glass, stained glass and plexiglass. The show is a preliminary to the National Glass Conference, which will be held April 10-12 at Penn State. The conference will feature demonstrations

and displays by artists from across the country.

Penn State is one of the few universities in the country to offer glass blowing as part of its curriculum. The program was developed by the Art Department in the early 1970s, and in 1978 the students organized the annual Burke/Hartwick Invitational to display their work.

Some tickets remain for URTC Ibsen production

The Penn State University Resident Theatre Company is continuing its run of Henrik Ibsen's *An Enemy of the People*, a drama portraying the dilemma of a man who must tell the truth to a town of people unwilling to listen. Tickets are still available, but are in limited supply. To order, call 865-1854 for reservations.

News in Brief

UDIS offers seminar on instructional evaluation forms

The University Division of Instructional Services (UDIS) is sponsoring a two-hour seminar on the design and use of instructional evaluation forms. It will be conducted by Dr. Maurice W. Villano, coordinator of instructional evaluation, at 1:30 p.m. on Thursday, March 6, in Room 128 Mitchell Building.

The standard Instruction Evaluation Form (IEF) will be used as a model. Specific topics to be covered include background and development of the IEF, administration and processing, interpretation of norms and results, relationship to classroom variables, and techniques for diagnostic use in improving courses and evaluating teaching.

A discussion and question period will follow the presentation. Participants will receive a bibliography of literature relating to instructional evaluation and a catalog of sample statements that may be used as optional extra items on the IEF or in custom-made instruments.

The seminar is limited to 35 participants on a first-come basis. For reservations or additional information, please call the Office of the Director, UDIS, at 865-7675.

Criminology authority to speak

Sir Leon Radzinowicz, an international authority on criminology, will give a public talk on "Administering Justice and Rethinking Sentencing Policy" at 2 p.m. Friday, Feb. 15, in Room 112 Kern Graduate Building.

Currently visiting the University, Sir Leon is participating in faculty and graduate seminars and presenting several classroom lectures. His visit is being co-sponsored by the College of the Liberal Arts and the College of Human Development.

A native of Poland, Sir Leon was educated at the universities of Cracow, Geneva, Paris and Rome. He immigrated to England in 1937 and began a long association with Cambridge University. He became the first director of the Institute of Criminology and was chief editor of the Cambridge Studies in Criminology, which has produced 40 volumes.

His books include *Ideology and Crime*, *In Search of Criminology*,

The Growth of Crime (with Joan King) and the four-volume *History of the English Criminal Law and Administration*. Currently, Sir Leon is working on the fifth volume of that history.

Student Master Research Tape file now available for access

Academic units responsible for undergraduate resident instruction now have access to a file on computer tape containing undergraduate student admissions, biographic, current enrollment, and transcript information.

The file is called SMART (Student Master Research Tape) and was developed by the staff in the Office of Undergraduate Studies Research Support specifically for supporting research and statistical reporting. Development and access to the file is funded in part by the Office of the Vice President for Undergraduate Studies.

According to Edmond Marks, director of Undergraduate Studies Research Support, the file can be quite useful in resident instruction functions such as advising and degree audit. Some programming support is needed to access the file, although a number of computer procedures have already been written and are available.

Requests for a copy of the SMART should be directed through a college dean or campus director to Director, Undergraduate Studies Research Support, Room 307 Grange Building, University Park.

SAS short course offered

Members of the SAS Users Group at Penn State are teaching an introductory short course in the Statistical Analysis System (SAS) from 2:30 to 4:30 p.m. in Room 306 Bouke Building for three days beginning Tuesday, Feb. 26.

SAS is a commercial package of computer programs for statistical analysis and data base management. The course, which is open to faculty and staff members and graduate students, has no prerequisites, although knowing how to submit jobs to the Computation Center would be helpful.

Advance registration is required. Further information is available from Sharon Stover at 865-6583.

Chang to discuss China trip

Dr. Parris H. Chang, professor of political science, who recently returned from a trip to the People's Republic of China, will give a talk entitled "China Revisited" at 7 p.m. Monday, Feb. 18, in Room 101 Kern Building. Sponsored by the East Asia Studies Committee of the College of the Liberal Arts, the talk is free to the public.

Detour Ahead

Maintenance work on Fraser Road is scheduled for Feb. 25-29, making it necessary for motorists to detour around a ditch in the road between Pattee Library and Thompson Science Hall.

The short detour will route traffic through part of the "Green E" parking lot behind Thompson Hall and back onto Fraser Road again.

University leads nation in associate engineering degrees

Penn State's associate engineering technology program led the nation for the ninth straight year in the number of degrees conferred, according to a survey by the Engineering Joint Council. Penn State conferred 716 associate technology degrees in 1979.

The two-year associate degree programs in engineering technology prepare graduates for positions in product design and operations and for air pollution control, as well as for such fields as steel, chemical, electrical, highway, mechanical, nuclear and surveying technology. Three new programs were added this year — solar heating, railway, and telecommunications technology.

Students are trained to combine the knowledge and work of both the engineer and the craftsman. "In fact," says Ernest Weidhaas, assistant dean for Commonwealth Campuses, "the technician today is assuming many tasks formerly assigned to graduate engineers, and the demand for well-qualified engineering technicians far outstrips the supply."

Penn State's Capitol Campus confers the second highest number of baccalaureate engineering technology degrees in the nation. Capitol conferred 224 such degrees in 1979.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1357 (network line 473, 1357). Applications for these staff vacancies will be accepted until 5 p.m., Feb. 21, 1980. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-21) in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ACCOUNTING AND CONTRACTS SPECIALIST, APPLIED RESEARCH LABORATORY, University Park. Responsible to the Manager, Accounting and Contracts, for the negotiating and administering of operating and facilities prime contracts for the Applied Research Laboratory and for coordinating daily accounting functions of the Accounting and Contracts office. Master's degree or equivalent in business administration or related field, plus one to two years of directly related experience in accounting operations and contract negotiations and administration.

COORDINATOR, CHILD LIFE PROGRAM — COLLEGE OF MEDICINE, Hershey. Responsible to the Assistant Hospital Director/Dean of Nursing Services for providing therapeutic, educational and recreational activities for pediatric patients. Also interact with patients to provide information related to age, appropriate activities and therapy within the confines of the child's physical limitations. Bachelor's degree in child development, individual and family studies or equivalency plus 1-2 years of effective experience.

APPLICATIONS PROGRAMMER/ANALYST, MANAGEMENT SERVICES, University Park. A position has been established to demonstrate the feasibility of locating systems analysis in the College to extend automation opportunities into administrative information handling activities within the College. In the first phase of this program, an Applications Programmer/Analyst is sought to work within Management Services on the Auxiliary System and to be trained in ADF, EASYTRIEVE, etc. In the second phase, this individual would move into the College of Health, Physical Education, and Recreation to become familiar with information problems of this College. In the third phase, depending upon performance, the potential exists for promotion to Systems Analyst, Dean's Office. This position is a split between the Dean's Office and the Institute for Health and Program Development. A bachelor's degree or equivalent in basic computer systems and one to two years of effective experience in computer programming and analysis is required.

JUNIOR ENGINEERING AIDE — APPLIED RESEARCH LABORATORY, University Park. Responsible to the project engineer or designated senior engineering aide for lay-out, fabrication, assembly, installation, testing, calibration, and maintenance of non-standard electronic equipment and components. Assist in collection, compilation, and analysis of test data. Associate's degree or equivalent in electrical or electronics engineering technology program, plus over three months of effective experience is required. Position may require travel on field assignments, including assignments abroad ship at sea.

SYSTEMS ANALYST — COLLEGE OF MEDICINE, Hershey. Coordinate data information for departments. Determine computer systems specifications and record layouts and develop procedures to process information by electronic data processing equipment. B.A. in accounting with knowledge of third generation programming language plus four years of data processing experience.

WORK MANAGEMENT COORDINATOR, Capitol Campus. Plan, coordinate and schedule resources for the accomplishment of work by the Physical Plant Department. Prepare material and material estimates. Prepare budget forecasts. Supervise contract work. Bachelor's degree or equivalent in engineering/management or related area plus three to four years of effective experience in managing and coordinating physical plant activities in an industrial, military or institutional establishment.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the Faculty and staff of The Pennsylvania State University. **USPS 351-170**

A summary of Faculty Senate activities during 1979-80

Editor's note: The following article was prepared by Faculty Chairman George J. McMurry.

The University Faculty Senate is the sole legislative body representing the University faculty, and, as such, is authoritative on all matters pertaining to the educational interests of the University and on all educational matters that concern the faculties of more than one college, subject to the revision and orders of the President. In addition, it acts as an advisory and consultative body to the President on any matter that may affect the attainment of the educational objectives of the University. Composed of 172 elected faculty Senators, 6 ex officio members, 11 members appointed by the President, and 17 students, the Senate acts both as a collective body and through its various committees.

At the present time the Senate has 14 standing committees and various special, ad hoc, and joint faculty-administration committees. Space does not permit the detailed description of duties of these various committees and of the Senate, but they are described in the booklet, *Constitution, Bylaws, and Standing Rules of the University Faculty Senate*, and the

duties of the standing committees were briefly described in the January 25, 1979, issue of INTERCOM by last year's Senate Chairman, Lee W. Saperstein.

This report will describe the actions and activities of the Senate since the beginning of this academic year, the major issues pending for consideration by the Senate and its various committees, and the ongoing activities of the Senate. After reading this up-to-date status report, it is hoped that faculty members will inform their respective Senators or the Senate Officers about their thoughts on any of the issues indicated here and provide suggestions for other topics which should be considered by the Senate.

SENATE ACTIVITIES TO DATE THIS ACADEMIC YEAR

The Senate as a whole normally considers three types of items at its monthly meetings: legislative, informational, and forensic. The issues acted upon or discussed at monthly meetings thus far this academic year are listed below.

Legislative

The Senate has passed legislation relating to four major academic policies of the University. The first, Rule 82-40, has

had two major additions: (1) all baccalaureate degree candidates are now required to earn at least a 2.0 cumulative average in certain courses shown under the "Requirements for the Major" list for each major; (2) in addition, the faculty of a college may require that no course in that same list may be counted toward the fulfillment of the major course requirements if the student receives a grade below "C" in that course. Second, the faculty of the college may require that a student be disenrolled from that college if the student has not gained entrance to a major by the beginning of either the student's fourth, fifth, or sixth term. Third, courses taken abroad may not be taken under the Pass-Fail grading system unless the student obtains advanced authorization from the Office of Foreign Studies. Fourth, credits earned in English 1-D, English 4, Math 0 and Math 1, taken under the Basic Skills or Developmental Year Programs, shall be included in the cumulative grade-point average but shall not substitute for the minimum program requirements.

In other action the Senate has delegated the responsibility for courses taken by medical students in the medical curriculum (700-level courses) to the faculty of the

College of Medicine, subject to review by the Senate. In addition, the Senate has recommended that for associate degrees which are offered by an extended route, the academic approval should be obtained in the same manner as for regular associate degree programs except in those cases where a waiver of existing academic policy is required.

A major legislative report submitted by the Committee on Academic and Athletic Standards was considered by the Senate at its February meeting. This report concerned the function of advising and the role of advisers, and contained four specific recommendations. The recommendation that each academic unit should develop a definite advising program was rejected, largely because of a concern that it would add significantly to administrative procedures without corresponding improvement in the advising process. A second recommendation, that specific inclusion of a faculty member's advising activities should be included in his or her dossier for promotion and tenure considerations, was rejected on the basis that adequate provision already exists in current policies and procedures. Two other

Penn State Intercom

Penn State is taking lead in library computerization

Editor's note: The following article is part of a series describing challenges and opportunities for various Penn State units in the '80s.

University libraries — even the largest of them — will have to abandon any dreams of self sufficiency in the 1980s.

"In the '50s and '60s, research librarians still thought that they could get everything they needed in one place," Libraries Dean Stuart Forth comments. "The continued growth of information has made that impossible."

The "information explosion" which began in the fifties continues unabated, according to Dean Forth.

"It isn't just books and journals," he points out, "but information in all of its forms — computer data bases, microform and microfiche, and video discs.

"The problems arising from the growth of information are compounded by the unpredictable rate of inflation. During the last ten years, librarians have seen an annual inflation rate of 15 to 20 percent in the cost of books and journals. If this situation continues, all of our universities will have great difficulty in maintaining their collections."

Dean Forth

Penn State's collection includes more than 1½ million volumes at University Park (roughly 850,000 to 900,000 titles), and about half a million at the other campuses.

"The research collection is relatively small compared to most institutions to which we compare ourselves," Dean Forth says, "but it is pretty finely honed to meet

the programmatic demands which have been made on it. We haven't gone out and bought materials with the expectation that someday a program might develop around them. What we have is heavily used."

Penn State has taken the lead in an area which will become increasingly important to libraries in the '80s — computerization.

"The major thrust of our computerized efforts will be to help us get quicker access to bibliographic information and to make our acquisitions, cataloging, and financial operations more efficient," Dean Forth explains.

University libraries across the country are busy investigating or establishing sophisticated computer-linked networks that enable member institutions to determine quickly where needed materials are stored. "This could lead easily to working out cooperative purchasing of expensive resources and sharing of collections," Dean Forth points out.

Penn State is currently exploring the possibility of joining the Research Library Group (RLG), whose members already include such institutions as Penn, Yale, Columbia, Cornell, the New York Public

(Continued on page 3)

News in Brief

Final version of 'Perspective' will be mailed soon

The final version of *A Perspective on the '80s: Agenda for Action for The Pennsylvania State University*, as approved by the Board of Trustees at its January meeting, is being ready for the printer. If production schedules are maintained, copies will be ready early in March. The University plans to mail a copy of the document to each member of the faculty and to all staff-employment personnel.

1,500 to graduate March 1

More than 1,500 graduates will receive degrees at Winter Term commencement exercises on March 1.

President Oswald will be assisted in conferring degrees by Provost Eddy and Walter Conti, of Doylestown, a member of the Board of Trustees.

Among the candidates for degrees are 1,108 seniors qualifying for baccalaureate degrees; 175 students who have completed two-year programs for associate degrees; 144 candidates for master's degrees; and 72 persons who will be awarded doctorates.

Choirs sing Berlioz 'Requiem' with Pittsburgh Orchestra

The University Choirs and the Pittsburgh Symphony Orchestra marked their 29th collaboration Feb. 7, 8 and 10 in Heinz Hall with three performances of the Berlioz Requiem.

Andre Previn conducted the work; the Choirs are directed by Raymond Brown, professor of music.

Pittsburgh Post-Gazette music critic Robert Croan called the singers "impressive."

(Continued on page 4)

Multidisciplinary Women's Studies Option available in Spring Term

A Multidisciplinary Women's Studies Option, from which students may select 21 credits to combine with a major, is available to undergraduates for the first time this spring.

The Option, which received Board of Trustee approval last November, was created in response to student interest, according to Dr. Audrey Rodgers, associate professor of English and Option co-chair with Dr. Eloise C. Snyder, professor of sociology.

In addition to LA 200, the interdisciplinary Women's Studies course developed by Dr. Snyder, 11 other courses

are being offered across the University as part of the Option, which resides officially in the College of the Liberal Arts.

"These are established permanent courses, with substantial enrollments," Dr. Rodgers points out. "Journalism 250 (Women, Minorities and Media) had about 150 students Winter Term. English 194 (A Century of Women Writers), originally offered only once every two years, is now given each term."

Among the other offerings in the multidisciplinary program are Psychology 170 and 471 (Psychology and Women), Speech Communication 445 (Gender

Roles in Communication), Anthropology 58 (The Evolution of Sexuality), Biology 341 (Biology of Sex), Physical Education 420 (Psycho-Social Dimensions of Physical Activity), Sociology 30 (Sociology of the Family), Sociology 230 (Sociology of Marriage), and Sociology 430 (Family in Cross-Cultural Perspective).

With the approval of Women's Studies advisors, students may also schedule other appropriate courses in partial fulfillment of the requirements of the Option. These may include 198 and 498 experimental courses, 296 and 496 independent study

(Continued on page 4)

Penn Staters

The Young Coal Miner and His Wife and a Few of Their Friends, a new full-length play by Stephen Grecco, associate professor of English, opened Jan. 24 at the Brooklyn Arts & Culture Association for a 12-performance run. The production, presented by BACA and the Movable Feast Acting Company, was made possible with funds from the National Endowment for the Arts, New York State Council for the Arts, New York City Department of Cultural Affairs, and Brooklyn Borough President Howard Golden.

Dr. C. Gregory Knight, professor of geography, has been appointed the editor of the *Resource Papers of the Association of American Geographers*. He is the first person outside the office of the Association to serve as editor. The papers are a monograph series on topics having to do with the undergraduate and continuing education of professional geographers.

Dr. R. V. Ramani, professor of mining engineering, was recently appointed chairman of the Committee on Underground Mine Disaster Survival and Rescue of the Commission on Sociotechnical Systems of the National Research Council. The committee is to make a one-year study that will begin with a critical evaluation of the current U.S. Bureau of Mines post-disaster survival and rescue program in the light of current technology and the present needs of the mining industry. It is then to suggest future research and development efforts in this area and also ways to foster the integration of new technology and procedures into the safety programs of the industry.

Dr. J.C. Griffiths, professor emeritus of petrology, was notified recently that he has been selected to receive the Best Paper Award for 1978 of the International Association for Mathematical Geology. His selection was made on the basis of a paper, "Mineral Resource Assessment Using the Unit Regional Value Concept," which appeared in a 1978 issue of the *Journal of Mathematical Geology*.

William Bradley, associate professor of art education, has been invited to present two lectures this month at the University of London, Institute of Education, as a distinguished visiting professor. In addition, he will lecture at The Royal College of Art at Kensington and pursue his research on the function of memory in artistic imagery.

Dr. Marshall H. Kaplan, professor of aerospace engineering, recently attended the Construction and Materials Workshop on solar power satellites (SPS). The workshop, at the National Aeronautics and Space Administration's Johnson Space Center in Houston, TX, was part of an evaluation program to assess the SPS concept from a technical, environmental, social and economic viewpoint. The workshop assessments, made by university and industry experts, will be the basis of recommendations for a five-year program, to be presented at NASA and to the U.S. Department of Energy.

An inaccurate description of the purpose of Dr. Alfred Traverser's sabbatical leave appeared in the Feb. 7 issue of INTERCOM. Dr. Traverser will spend his leave as a visiting professor of palynology at the Geological Institute of the Swiss Federal Technical Institute. He will apply techniques he developed in 1975 while doing research in the Black Sea to a series of deep cores of Swiss lakes.

Dr. M. Frank Mallette, professor of biochemistry, was honored recently for 25 years of service to the University. He joined the faculty as an associate professor in 1955 and was promoted to professor in 1959. From 1973 to 1975, he was acting head of the then-Department of Biochemistry and Biophysics and is currently director of the graduate program in biochemistry.

A specialist in metabolism, he is perhaps most widely known as a co-author of the textbook, *Basic Bacteriology*, now in its fourth edition. The text is widely used in graduate courses throughout the United States and has been translated for use in Germany, India, Japan, and Yugoslavia. In recent years, his main research interest has been in the preparation of antibiotics for use against resistant strains of disease bearing organisms and in the immunochromic of naturally occurring antigens or the study of how living things develop natural resistance to disease.

At Johns Hopkins University, where he was an assistant and associate professor from 1948 to 1955, he made fundamental observations on the nature of inducible enzymes. That work was continued at Penn State and has led to insights into mechanisms of protein synthesis by cells.

He is an elected member of the American Society of Biological Chemists and serves as a member of the Society's Graduate Training Panel. A fellow of the American Association for the Advancement of Science, he also serves on the American Chemical Society's Achievement Examination Committee.

Dr. Mallette was graduated from the Iowa State University in 1940 and earned M.S. and Ph.D. degrees in 1943 and 1945, respectively, at Columbia University.

Currently he is serving as chairman of the Faculty Senate's Committee on Planning and Development.

Dr. Stanley Weintraub, research professor of English and director of the Institute for the Arts and Humanistic Studies, has received an award from the Freedoms Foundation at Valley Forge for his book, *The London Yankees*. The book was cited as "An outstanding accomplishment in helping to achieve a better understanding of the American Way of Life."

Dr. Jan S. Prybyla, professor of economics, presented a paper, "The Chinese Economy: Current Problems and Policy Solutions," at a workshop sponsored by the Subcommittee on Research on the Chinese Economy, Joint Committee on Contemporary China, Social Science Research Council and the East Asian Institute, Columbia University, at Columbia on Feb. 15.

Dr. Paul H. Cutler, professor of physics, recently presented an invited colloquium at the Department of Physics and Atmospheric Science of Drexel University. He discussed point contact junctions and measurements of fundamental physical constants.

Dr. Edwin L. Herr, professor and head, Division of Counseling and Educational Psychology, was keynote speaker for the National Consultation on Counseling in Ottawa, Canada, Jan. 31. His topic was "Guidance and Counseling in National Policy: The U.S. Experience."

Bookshelf

Dr. Barry Voight, professor of geology, is the editor of *Rockslides and Avalanches, Part 2, Engineering Sites*, published recently by Elsevier Scientific Publishing Company, New York. Dr. Voight also edited *Rockslides and Avalanches, Part 1, Natural Phenomena*, published by Elsevier two years ago.

The two volumes are described as bringing together for the first time the full scope of geological and geotechnical studies of the major mass earth movement events of the Western Hemisphere, described in detail and interpreted by recognized authorities. The books are expected to become the standard reference works on mass movements.

Dr. Voight is also co-author of four chapters in the new work. One of his co-authors is Dr. R.L. Slingerland, assistant professor of geology at the University.

Major topics areas in the new book include slides near canals, lakes, reservoirs, and fjords; slope excavations for transportation routes; and open pit mine slopes.

William S. Pierce, facilities planning officer in the University Libraries, is the author of *Furnishing the Library Interior*, Vol. 29 of Books in Library and Information Science Series.

This is the first book to deal comprehensively with all aspects of selection, evaluation and purchasing of library furniture and equipment in an era of diminishing budgets. The information compiled is applicable to academic, public or special libraries and will help planning professionals such as architects and interior designers to become more conversant with library operations.

At Penn State, Mr. Pierce has been involved in the planning, design, construction and furnishing of 13 separate library buildings, and he has served as a consultant to such institutions as the U.S. Naval Academy, Kent State and the University of Maryland.

Staff Development

Twenty clerical employees of the University have completed a six-week Clerical Enrichment Program. The course is designed to familiarize clerical employees with University policy and organization, to identify work situation problem areas in the office, and to begin the initial stages of professional office training and preparation for career development.

Participants were:

Carol Ashcroft, accounting clerk, Housing & Food Services; Rosella Day, clerk A, Pattee; Barbara Fye, accounting clerk, Housing & Food Services; Joan Furlong, stenographer A, Engineering; Eleanor Hark, vending accounting clerk, Housing & Food Services;

Sally Horner, clerk typist B, Pattee; Lynn Jaskawak, clerk A, health insurance claims, Employee Benefits; Jenny King, secretary C, UDIS; Jana Lucas, clerk B, UDIS; Janice Ludwig, data preparation operator C, Alumni Office;

Patricia Maier, clerk receptionist A, Undergraduate Studies; Selena Meyer, clerk typist B, Business Administration; Janet Neff, clerk typist A, Pattee; Jeannette Parson, senior clerk, Pattee; Jacqueline Pillot, data preparation operator, Alumni Office;

Jean Rose, secretary B, Business Administration; S. Jane Uhrin, clerk typist A, Science; Diane Walker, clerk typist B, Pattee; Cathy Weber, clerk typist B, Continuing Education; Linda Zelenick, clerk typist B, Continuing Education.

Obituaries

W. Robert Williams, assistant director for development and planning at the Fayette Campus, died Feb. 13. He was 50 years of age and had joined the staff Sept. 17, 1973.

Edith M. Johnson, a supervisor with Housing and Food Services from 1929 until her retirement in 1951, died Feb. 7 at the age of 90.

George O. Wills, a member of the University staff from 1958 to 1968, died Feb. 12 at the age of 72. He was a clerk typist with Security and Purchasing.

George L. Fink, a janitor in the Office of Physical Plant from 1949 until his retirement in 1960, died Feb. 12 at the age of 84.

Carpoolers

The Penn State employees listed below are interested in sharing rides. Persons desiring a listing in INTERCOM should send in their names to Room 312 Old Main and include information on their residence, work location, arrival and departure times, phone numbers at home and work, and whether drivers, riders or both are sought. Nancy Taylor, Pleasant Gap (359-2963), works 8 a.m. to 4:30 p.m. at Shields Building (865-1251). Seeks riders.

Mildred B. Knudsen, Phillipsburg (342-4380), works 8 a.m. to 5 p.m. in Old Main (865-2501). Will pay to ride, share driving in carpool, or accept riders.

Peter L. Hagen, Bellefonte (355-4013), works 8 a.m. to 5 p.m. in Sparks Building (865-2545). Seeks drivers and/or passengers.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff non exempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 671387). Applications for these staff vacancies will be accepted until 5 p.m., Feb. 28, 1980. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT DIRECTOR FOR STUDENT AFFAIRS, Dubois Campus. Serves as Chief Student Personnel Officer and is responsible to the Directors of the Campus for the organization, administration, and coordination of the Student Affairs programs, services, staff, and personnel. Master's degree in area related to student personnel administration, plus three to five years of effective professional experience are required. Doctoral or near doctoral status preferred, but not required.

BOOKSTORE MANAGER, SHENANGO VALLEY CAMPUS. Responsible for the general operation and management of the Campus Bookstore. Responsible for procurement and merchandising of texts and related instructional materials, inventory control, financial and general retailing operations. High school graduate, plus one to two years of effective experience or two years of business school training with up to one year's effective experience.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University. USPS 351-170

Calendar

Feb. 21-March 6

Special Events

Thursday, Feb. 21
Final examinations
GSA videotape, "Your Show of Shows," 1 p.m., Kern Lobby.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Friday, Feb. 22
Final examinations.
URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Saturday, Feb. 23
Final examinations.
Sports: fencing (women) vs. Indiana (Pa.), Johns Hopkins, St. John's and Cornell, 9 a.m.

URTC, *An Enemy of the People*, 8 p.m., The Pavilion Theatre.

Sunday, Feb. 24
Sports: fencing (women) vs. Ohio State, Johns Hopkins and St. John's, 9 a.m.
Montclair Trio, 3:30 p.m., Music Bldg. Recital Hall.

Monday, Feb. 25
Final examinations.

Tuesday, Feb. 26
SAS Users Group, introductory short course on the Statistical Analysis System, 2:30-4:30 p.m., Room 306 Boucke. By advance registration only - 865-6583. Also Feb. 27 and 29.
Residence Halls close for Winter Term, 3 p.m.

Thursday, Feb. 28
Sports: swimming (women), EIAAW Championships, through March 1.

Saturday, March 1
Winter Term Commencement, 10:30 a.m., Rec. Hall.

Sunday, March 2
Sports: fencing (men) vs. St. John's, 1 p.m.

Monday, March 3
Pattee Library faculty study space assignments for Spring Term, 7:15 a.m., Room 106
Central Pattee, 33 spaces assigned on first-come basis. 865-5420 for further information.

Tuesday, March 4
Neutron Activation Analysis workshop, 8:30 a.m.-5 p.m., Breazeale Nuclear Reactor.
Free registration, 865-6352. Also March 5.

Residence Halls open for Spring Term, 10 a.m.
GSA videotape, "Guerilla TV Looks at the Superbowl," noon, Kern Lobby.
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Thursday, March 6
Registration for Spring Term, 8 a.m.-5 p.m., IM Bldg.
HUB Craft Center, registration for first session

classes, noon-5 p.m., through March 15, Room 312 HUB.
GSA videotape, "Guerilla TV Looks at the Superbowl," 1 p.m., Kern Lobby.
UDIS workshop, Maurice W. Villano, coordinator of instructional evaluation, on "Design and Use of Instructional Evaluation Forms," 1:30 p.m., Room 128 Mitchell.
Reservations 865-7675.

Seminars

Thursday, Feb. 21
Computer Science, Neil Immerman, Cornell Univ., on "Length of Predicate Calculus Formulas as a New Complexity Measure," 4 p.m., Room 325 Whitmore (new listing).

Friday, Feb. 22
Statistics, Robert Serfling, North Carolina Univ., on "The Poisson Approximation: Recent Developments and New Applications," 4 p.m., Room 160 Willard.

Tuesday, Feb. 25
Applied Research Laboratory, G.H. Hoffman, aerospace engineering, on "The Methodology of Hydrodynamic Body Design," 10:45 a.m., Walker Conference Room, Applied Science Bldg.

Friday, Feb. 29
Microbiology, Cell Biology, Biochemistry and Biophysics, Dale Hoskins, Oregon Regional Primate Research Center, on "Initiation of Sperm Motility in the Mammalian Epididymus," 12:30 p.m., Room 617 Mueller.

Exhibits

Kern Commons: Shirley Siegenthaler, ceramics, through Feb. 22. Steven Ang, glass and clay sculpture; Jerry Sawyer, Marc Levey, Carol Lindsay and Rick Hoover, photographs, through Feb. 29.

Museum of Art: Sculpture from the permanent collection, through Feb. 24; Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager; Chinese export porcelains from the collection of Dr. and Mrs. Harold L. Tonkin, opens Feb. 24.

Pattee Library: Marie March, watercolors, Lending Services Library. Patrice Drew, Nancy Jenner and Stoyan Popovich, bachelor of fine arts candidates, "The Last Hanging: A Non-Invitational Print Show," East Corridor Gallery. "The Marvelous Travels of Baron Munchausen," from the Allison-Shelly Collection, Rare Books Room.

Robeson Cultural Center: Malkia Roberts, paintings, "Colorpoems/Connections," through Feb. 23.

Visual Arts Zoller Gallery: Undergraduate Students exhibit, opens Feb. 24.

autonomy will be something which we will be trying to work out in the next four or five years."

The Libraries are also working on their own research and development program to apply computer technology to their operations.

"Computers can generate important management data," Dean Forth notes. "When we talk about management data, it tends to turn faculty members off, but it can help us, for example, to improve the efficiency of our acquisitions program. At the present time, Pattee's annual circulation rate is some 700,000 to 800,000 transactions. We need to identify the areas of the collection that are heavily used and those that are hardly used at all. What do undergraduates demand as opposed to graduate students? We have no way of getting this information now because we simply can't go through all those transactions manually."

Dean Forth is aware that not all faculty members regard library computerization as an unenviable blessing. He says: "In the '80s, one of the problems librarians will have to deal with is the perception on the part of faculty members of what a library is and what it should do.

U.S. Ship of the Line Pennsylvania — Lithographed and published by Nathaniel Currier.

The pick of the Tavern Collection

When the Tavern Restaurant in State College changed hands early in January, it was reported that about half the purchase price went for the restaurant's collection of prints.

Eighty-one of them, dating from 1757 to 1902, are currently on display in the Museum of Art, and gallery-goers will have a chance to view them through March 30.

Selected from the private collection of Tavern founders Penn State alumni Ralph M. Yeager '42 and John C. O'Connor '38, the exhibit features an abundance of historic "town views" of such communities as Bethlehem, Bellefonte, California, Ephrata, Harrisburg, Huntingdon, New Brighton and Pittsburgh, among others. But there are scenes depicting historical events, prominent men, disasters, natural settings and assorted ephemera as well. Most of the items are lithographs, though there are several watercolors, engravings and aquatints.

The exhibit is a sampling of what is considered to be the best collection of Pennsylvania prints extant. Harold E. Dickinson, emeritus professor of art, and Walter J. Lord, associate professor of art, chose the 61 prints after examining the entire collection.

The impetus for the exhibit, however, came from William Hull, director of the Museum of Art. When he originally came to Penn State, Mr. Hull at his first meal at The Tavern, noticing immediately "that someone loved and cared for these colorful nineteenth-century vignettes from

Pennsylvania's history." The notion of exhibiting the prints at the Museum resulted on subsequent visits.

Since opening The Tavern in 1948, Messrs. Yeager and O'Connor have amassed more than 300 engravings, lithographs, watercolors and aquatints from 1757-1902, and have also garnered more than 200 other prints and old photographs, many Penn State-related.

Their avocation has brought them national recognition as experts on American printmaking and lithography. Curators from the Library of Congress often consult with them and have borrowed for reprinting purposes Tavern prints of Altoona, Watsonstown and 14 other Commonwealth communities missing from the national collection.

"Pennsylvania is well represented in the work of the great lithographers," the two collectors point out. "Its importance in industry, history, scenery and natural beauty made it an ideal subject. Many of the printmakers worked in Philadelphia, but Pennsylvania was not neglected by those who were based in New York, Boston, Pittsburgh, Baltimore, Cincinnati, and Chicago. There is hardly a community of moderate or even small size that was not a subject of a lithographic print in the nineteenth century. Some of the older towns (Reading, Lancaster, and Bethlehem) were the subject of a dozen different views during that period. Prints of the city of Philadelphia alone are so numerous and were produced by so many different firms that they merit a study of their own."

from around the country is that these things can be done."

While other members of the Council of Academic Deans are keeping a wary eye on admissions, Dean Forth has different concerns.

"However many students Penn State gets, we have a reasonably good idea of the type and quality of service expected from us, and that won't change," he says. "That's also true when we talk about graduate programs and faculty members. Graduate students are our heaviest users. It doesn't matter whether there are ten graduate students or 40 in a plant pathology program; they will need the same number of journals and monographs. Three faculty members doing research in a basic field need the same resources as ten. Declining enrollments will not affect that."

What the Libraries' faculty members are worried about in the next decade is space — for the collection and its users. Dean Forth explains:

"We have seen no real evidence of a sudden dramatic fall-off in book and journal production. Although the rate of acquisition of hard copy materials — books and journals — will slow somewhat in the '80s, it won't be enough to prevent us from

(Continued on page 4)

Libraries

(Continued from page 1)

Library, Brown, Rutgers, Johns Hopkins and others. RLG is developing a sophisticated research library information network directed toward computer-to-computer linking.

Joining an information network does pose certain problems since it may require a university to sacrifice some of its autonomy. The Research Libraries Information Network is owned jointly by its members, who, therefore, determine its policies. By contrast, the Ohio College Library Center is a bibliographic utility to which libraries subscribe and over whose price structure they have no control — rather like West Penn Power.

"Penn State's Libraries cannot operate in a vacuum," Dean Forth points out. "We are influenced by what is happening to research libraries all over the country, and unless we participate in the activities of the majority — and particularly those of the flagship institutions — we will be left so far behind that it will have a serious impact on our future teaching and research efforts.

"To what degree and in what way we can participate without losing too much

News in Brief

(Continued from page 1)

INTERACT workshop offered

The Computation Center will offer a three-day workshop on the INTERACT editor on Wednesday, Thursday and Friday, Feb. 27, 28 and 29, in Room 108 Forum Building.

There will be morning (9:30 a.m.) and afternoon (1:30 p.m.) sessions on all three days. The Wednesday morning period will be introductory, requiring no previous experience or knowledge. Topics will include advanced use of the editor, data set (file) management, remote job processing, and execute files.

In order to use the editor, participants must be "joined" to the system with a resource (U, P, B) or instruction preparation (C) account.

Participants must be registered for this workshop. Registration may be made immediately in Room 229 Computer Building. A \$5 workshop fee should be paid in advance for each registrant (payable by cash, check or interdepartmental transfer).

For further information, contact Lisa Jodon, 863-0422.

March 4-5 workshop on Neutron Activation Analysis

A two-day workshop on the use of Neutron Activation Analysis will be conducted Tuesday and Wednesday, March 4 and 5, at the Breazeale Nuclear Reactor Facility.

The workshop is open to members of the faculty, staff and student body wishing to learn more about this highly sensitive technique for trace element identification and quantification.

The workshop will consist of one day of lectures and one day of laboratory experiments.

There is no charge for the workshop, but those who are interested in attending should contact Dale C. Rauch at 865-6352.

Montclair group to perform

The Montclair Trio will perform three works at 3:30 p.m. on Sunday, Feb. 24, in the Music Building Recital Hall.

Founded in 1978, the trio is composed of three members of the Montclair State College Music Department — Curtis Macomber, violinist; Chaim Zemach, cellist; and Edmund Battersby, pianist.

The program includes Mozart's Trio in E Major, K. 542; Shostakovich's Trio in E minor, op. 67; and Mendelssohn's Trio in C minor, op. 66.

Libraries

(Continued from page 3)

Continuously filling up the available space at University Park, as well as at some of our other campuses. We may have to look at the creation of a storage building on the periphery of the campus, the establishment of another separate divisional library along the lines of physical sciences, or, ideally, an addition to Pattee.

Accommodating students is another problem as increasing numbers try to use the libraries as study halls.

"We have 1,900 seats in Pattee and a student body of 35,000," Dean Forth says. "At the branch libraries, space is also minimal, and as the collections grow, they take a space away from the students, making the library more difficult to use." At the campuses, Wilkes-Barre, Shenango Valley and Schuylkill desperately need new buildings, as do Behrend and Capitol.

Among other concerns for librarians in the '80s, Dean Forth foresees:

— Program changes based on the new copyright law limiting the reproduction of materials, a matter of particular concern to Penn State with its dispersed campuses. "Although Behrend, Radnor and Capitol have some research collections," Dean Forth notes, "we see no change in the stance that University Park and Hershey are the University's principal research centers, and we will not develop research

collections at the campuses. We are, however, constantly trying to develop more sensitive methods to share research resources with the campuses. One of the major problems is delivery — the mails are slow, and United Parcel is not uniformly reliable on all routes."

— Charging for the use of resources. At present, the University is what is called a gross net lender, which means that it loans about three times as many books and journals as it borrows. Most of these materials go to smaller colleges in Pennsylvania, with whom the University feels a responsibility to share its resources without charge. "Probably in the '80s," Dean Forth says, "we will move toward charging for the use of our resources by business and educational institutions outside Pennsylvania. Right now, if we want to borrow from either Rutgers or Princeton, they charge a set fee."

— Acquisitions policy. Dean Forth suggests that the Libraries may return to an earlier style of operation and lay more work on the collegiate faculty, buying only on demand. "At present," he explains, "between 70 and 75 percent of our book selection is done by faculty members working closely with teaching faculty members. It certainly behooves us to try to develop more sophisticated indicators of what is really needed as opposed to what would be nice to have."

And he concludes:

"Most people wouldn't use the word exciting to describe libraries, but I find this one of the most exciting phases of my career. Major changes are happening in libraries, and particularly here at Penn State."

"We are the only University library I know of developing a totally integrated computerized system. Most institutions have done this only in one or another of their departments. We find we are getting many excellent applicants for vacancies because people in the field are aware of what is going on here in terms of grappling with the future and are eager to be part of it."

Women's Studies

(Continued from page 1)

and 297 and 497 special and common topics. Courses currently offered in the "97" series are French Women Writers, Women and Minorities in the Labor Movement, Women and World Literature, and Religion and Current Social Issues.

Both Dr. Rodgers and Dr. Snyder stress the importance of the research component of the Women's Studies Option. "Our aim is to develop a body of knowledge about women and institutionalize that knowledge within the University community," they point out. "Women's Studies is not designed to segregate knowledge about women, nor to isolate them; rather Women's Studies is extended to add women's perspectives and accomplishments to scholarly study and thereby increase the accuracy and thoroughness of such study."

Noting that "women's perspectives" are often disregarded in scholarly research, Dr. Rodgers says that the new Option can help acquaint both men and women with the depth and breadth of female contributions to society — in the sciences, social sciences, humanities, professions, sports and labor.

"We hope to develop a sense of pride in both female and male students in the accomplishment of women, past and present," she adds.

"Penn State has come late to the development of a women's studies program," Dr. Snyder points out. "Such programs are already firmly established at many of our leading research universities."

As an academic discipline, Women's Studies can credit its origins, in part, to Penn State, according to Dr. Rodgers. It was at University Park that the distinguished sociologist Jessie Bernard, now professor emerita of sociology, researched and wrote her book, *Academic Women*. This work is now considered a milestone in the contemporary study of women and the various cultural and institutional pressures which they face.

Senate

(Continued from page 1)

recommendations were returned to committee. The first was a recommendation that the advising role be identified as consultative rather than authoritative in nature. Although the Senate generally indicated approval of this concept, it was felt that passage of this recommendation at this time would result in conflict with various other existing rules. The Senate then asked the committee to coordinate this recommendation with revision of the existing rules.

Informational

The Senate has received five major informational reports during this academic year. The Committee on Undergraduate Instruction presented a report on the distribution of grades throughout the University. The report included a comparison of grades for the past two years, a summary of Continuing Education and Resident Instruction grades, and the distribution by college and location. The Committee on Extended Degrees presented a report which described the policies and procedures governing Extended Degree Program Proposal and Review. The Committee on Faculty Affairs considered the question of whether a faculty member on a sabbatical or leave of absence without pay should be allowed to participate in promotion and tenure decisions. It was the conclusion of the Committee, as reported to the Senate, that this was a matter best decided by each individual academic unit. In other oral informational reports, the Senate heard presentations by the Director of the Foreign Studies Program and the Dean of Admissions.

Forensic

A major forensic session was conducted

during the November meeting. The Senate reviewed and offered suggestions regarding the first draft of the document, *Perspective on the '80s*. The extended discussion was generally constructive and offered many positive suggestions to the Steering Committee for consideration in the revision of the document.

ISSUES CURRENTLY UNDER SENATE CONSIDERATION

Major

The Senate will receive shortly a major report by the Committee on Basic Skills which will contain legislative recommendations regarding the continuation of the Basic Skills Program in the University.

The Joint Faculty Administrative Commission on Review of Promotion and Tenure Policies has recently submitted its report to the President and the Senate.

There are 11 specific recommendations; and the Committee on Faculty Affairs, with appropriate administrative liaison, will be considering these recommendations for possible Senate legislation.

In response to a report provided by the Joint Committee to Review Governance, the Senate eliminated one meeting this year and is currently examining its committee structure in order to improve effectiveness and responsiveness and also to optimize faculty time and loads. Also in response to this report on governance, the Senate is considering a recommendation for limiting terms of department heads and other administrative officers and examining possible policy and procedural changes for delegation of authority for non-credit and associate degree programs.

The Senate is providing faculty participants for an administrative review of the use of the Summer Term and expects to be involved in the consideration of possible changes in the academic calendar

after the current calendar is completed in 1983.

In other matters, the Senate will be providing advice regarding admission policies, need for and use of information systems, and the forthcoming integration of the Commonwealth Campuses and Continuing Education.

Summary of Issues by Committees

A brief listing of issues currently under study by the various standing committees of the Senate is provided below.

Academic and Athletic Standards — Modification of the deferred grade process; eligibility, redshirting, closed practices.

Admissions, Records, and Scheduling — Early admissions programs; credit by transfer and fractional credit transfer.

Continuing Education — Questionnaire survey results; merger of Continuing Education and the Commonwealth Campuses.

Committees and Rules — Senate committee structure.

Curricular Affairs — Use of 800-level courses at Penn State and other universities; use of common course numbers; program review results; curriculum development, course master file, zero credit courses; BDR III implementation.

Extended Degrees — Status and focus of extended degrees at Penn State.

External Affairs — Meeting with Pennsylvania legislators.

Faculty Affairs — Salary differentials between UP and Commonwealth Campus faculty; possible effects of retirement at 70 and early retirement policies; sabbatical leave policy.

Intra-University Relations Committee — Delegation of authority for non-credit and associate degree programs.

Libraries — Status report on space, inflation, and computers in the Libraries.

Planning and Development — Use of year-end monies; budget process; net cost Budget Center concept; possible time limit on administrative officers; criteria for program evaluation.

Research — Climate and indices of performance for research; interdisciplinary research; research and scholarly activities at the Commonwealth Campuses.

Student Affairs, Awards, and Scholarships — Scholarship awards report.

Undergraduate Instruction — Use of graduate student teaching assistants; proposed University Testing Center; procedures for establishment, reorganization, and/or discontinuation of units; review of dean's list and graduation with honors; University Scholars Program.

Continuing Activities of the Senate

In addition to developing legislation and informational reports on issues such as those described above, the Senate performs many continuous functions which are not generally reported in public forums. For example, the Chairman-Elect of the Senate serves as a member of the Administrative Council on Undergraduate Instruction; the Senate Committee on Undergraduate Instruction reviews and approves all special retention and transfer requirements for various academic programs; student petitions for exceptions to Senate and University policies require Senate review and approval; special admissions programs are reviewed, monitored, and approved; recipients of University scholarships and awards are selected by special subcommittees; all curricular offerings are monitored, reviewed, and approved by the Senate; and finally, the officers serve as members of the Faculty Advisory Committee to the President and as faculty representatives to the Board of Trustees.

Penn State Intercom

News in Brief

New office and telephone form

The Office Address and Telephone Information Form (Form G22.1), used to make changes on University Records, has been redesigned, and the routing of the form has been changed. Departments are asked to make certain that they are using the NEW form, dated 10/79, which directs BOTH copies to the Payroll Department.

Supplies of the new form are available from Systems and Procedures in Room 308 Shields Building, phone 865-9568.

The change was instituted to facilitate inter-office mailing of deposit slips and check stubs to employees who have their paychecks deposited directly in their banks. These employees receive deposit slips and check stubs at their place of work on the same day that they would normally have received their checks.

Persons wishing to take advantage of the direct deposit method of being paid should contact their Personnel Representatives or Supervisors.

INTERACT sessions offered

The Computation Center will conduct a series of weekly INTERACT demonstrations and question-and-answer sessions. These sessions will be held during fourth periods (12:45-2 p.m.) in Room 110 Computer Building, starting on the first Thursday of the Spring Term (March 13) and continuing for the duration of the term. Because of the limited room space, it will be necessary to limit each session to 20 persons. Registration for any session may be made through Lisa Jodon, 863-0422.

(Continued on page 7)

Carnegie recommendations old news to Penn State

The aptness of Penn State's response to the challenges of the 1980s, as put forward in *A Perspective on the '80s*, received striking confirmation with the publication in January of the final report of the Carnegie Council on Policy Studies in Higher Education.

The Council and its predecessor, the Carnegie Commission on Higher Education, chaired by Clark Kerr, former president of the University of California, sponsored a total of 137 reports on higher education between 1967 and 1980. Its latest — "Three Thousand Futures: The Next 20 Years for Higher Education" — offers a set of "imperatives" for colleges and universities to follow.

Readers of *A Perspective on the '80s* will be pardoned for a sense of déjà vu. They are already acquainted with the "imperatives" which follow:

- Analyze all factors likely to affect future enrollments.
- Insist on institution-wide or system-wide planning.
- Encourage strong leadership by chief executive officer.
- Intensify recruitment efforts and reduce attrition.
- Give high priority to maintenance of quality.
- Encourage innovation and flexibility.
- Strive for most effective use of resources.
- Seek support from private sources of funds.

State Senator J. Doyle Corman Jr. of Bellefonte (left) and Representative Gregg L. Cunningham of State College presented the Legislature's resolutions to President Oswald.

White House, Legislature hail PSU's 125th

President Jimmy Carter and both Houses of the Pennsylvania Legislature sent congratulations to Penn State as the University marked the 125th anniversary of its chartering on Feb. 22.

In a telegram to President Oswald, Mr. Carter said:

"From its beginnings as one of the first land-grant colleges to its present leadership role in the fields of agriculture, science, arts, education and research, your institution has enriched the lives of millions of Americans.

"Many of your alumni have made outstanding contributions to our nation. Some have become acclaimed leaders in industry, science, education and government; others have worked with less public recognition for the good of their communities and country. But all share fond memories of their years at Penn State."

Mr. Carter added that the recent establishment of a cabinet-level Department of Education in Washington "will enable the federal government to move more efficiently and effectively toward our mutual goal of providing quality education for all Americans."

"I know," he concluded, "that The Pennsylvania State University will continue to do its part in this regard and that the traditions which have marked your previous success will also characterize your new decades of service to our society."

Dr. Oswald said he was pleased that Mr. Carter's message touched upon several of

the many different fields in which Penn State's graduates have made contributions to their communities, to Pennsylvania and to the nation.

"As we look back on the achievements of the past, we at Penn State also are looking forward to the challenges of the future," Dr. Oswald added. "We will continue to provide the leaders in industry, science, education and government that our country so desperately needs."

The House and Senate passed resolutions commending the University for "the great honors and achievements it has brought to Pennsylvania and the outstanding services provided to the People of the Commonwealth."

"We at Penn State appreciate these fine expressions of support from our Legislators," Dr. Oswald said. "In the future, we will do all that we can to continue to provide the high quality of instruction, research and service that the people of Pennsylvania have come to expect from the University."

The resolutions, noting that Penn State's 22 campuses enroll more than 55,000 full-time students, call the University "one of Pennsylvania's most valuable resources."

"Each year," they point out, "more than 130,000 Pennsylvanians from every county are reached personally and professionally through the University's Continuing Education programs, and millions of others benefit through Cooperative Extension Programs

(Continued on page 7)

Nominations sought for three awards

President Oswald has appointed a general committee chaired by Richard E. Grubb to coordinate the solicitation of nominations for three all-University awards — the McKay Donkin Award, the John E. Wilkinson Award for Administrative Excellence, and the Barash Award for Human Service.

As in previous years, three subcommittees will screen nominations and develop recommendations for the respective awards. Members of the Wilkinson Award Subcommittee are Rosemary Schaefer, chairperson; Steve A. Garban; and Doris M. Seward. Members of the Donkin Award Subcommittee are Ray T. Fortunato, chairperson; Eugene J. Kelley; and Edward H. Klevans. Members of the Barash Award Subcommittee are Henry Yeagley, chairperson; Martha Adams; Jay Claster; James R. Palmer; Michael Richardson; and Carol J. Mattis.

Nominations for the 1980 awards are encouraged from either organizations or individuals in both the University and community and are to be sent to Dr. Grubb, Room 203C Old Main, no later than March 31. The supporting information which accompanies nominations should be as brief as possible and must emphasize those qualifications and activities relevant to the particular award for which the individual is being nominated.

A brief description of the qualifications for each award follows:

The McKay Donkin Award

The McKay Donkin Award was established in 1969 in honor of the late McKay Donkin who served as Vice President for Finance and Treasurer of the University from 1957 to 1968. The award, which consists of a \$500 stipend and a certificate, is presented to the full-time member of the faculty or staff or the retiree who has contributed most to the "economic, physical, mental, or social welfare of the faculty" of the University. The contribution of the nominee should be for duties or services which are above and beyond his or her regularly assigned duties. Previous recipients are William G. Mather, Ernest B. McCoy, Samuel C. Blazer, Eugene Wettstone, Kenneth L. Holderman, Patricia Farrell, Lawrence Perez, Michael R. Lynch, Margaret B. Matson, and Karl G. Stoeckel.

The John E. Wilkinson Award for Administrative Excellence

The John E. Wilkinson Award for Administrative Excellence was established in 1970 by friends of Mr. Wilkinson, a lifelong Centre County businessman. The award, which carries a stipend of \$500, is made annually to a member of the staff of the University whose performance methods and achievements exemplify administrative excellence. Previous recipients are Paul M. Althouse, John B. Pezzoni, Kenneth L. Holderman, Eleanor Ferguson, Harry D. Zook, Russell E. Larson, Wayne D. Lammie, David E. Stormer, and Billy R. Baumgard.

The Barash Award for Human Service

The Barash Award for Human Service was created in 1975 by the family of the late Sy

(Continued on page 7)

Penn Staters

Fourteen faculty members have been awarded research fellowships for Summer/Fall 1980 by the Institute for the Arts and Humanistic Studies. They are:

Dr. Eugene Borza, associate professor of history, to complete a history of the ancient Macedonians;

Dr. J. David Boyle, professor of music education, for travel to the 8th International Research Seminar in Eisenach, Germany, to present a paper describing his research on pitch discrimination;

Dr. Maureen Carr, professor and director, School of Music, for research to complete identification of the disputed Beethoven "Diabelli Variations" manuscript;

Dr. Roger Cornish, associate professor of theatre arts, for study of the impact of Comprehensive Employment and Training Act funding on theatre organizations, involving case studies of two theatres in the Philadelphia area;

Dr. Diana Hume George, assistant professor of English at Behrend College, to continue research on a study of Woman as structural metaphor in the poetry and art of William Blake;

Dr. Linda Itzoe, assistant professor of English at York, for study in England of the manuscripts of Arthur Wilson's plays and autobiography;

Dr. Henry Johnstone, professor of philosophy, to prepare a book-length study of Pankoin as a rhetorical figure in Greek tragedy;

Philip Klass, professor of English, to complete research on a book, "Innocents in Time: Mark Twain and Other Travelers"; Dr. Robert Lima, professor of Spanish and comparative literature, to do research in Spain for a biographical-critical study, "Ramon Del Valle-Inclan: the Theatre of His Life";

Dr. Joseph Marchesani, assistant professor of English at Hazleton, to study the career of Horace Gold, the founding editor of the pioneering science fiction magazine, *Galaxy*;

Dr. John McNavage, assistant professor of English at New Kensington, to continue research on a multi-media project, "The Seasons in the Allegheny National Forest";

E. Lynn Miller, associate professor of landscape architecture, to study the influence of Prince Puckler of Saxony during the last century on the urban park in America;

Dr. Melvin Seesholtz, assistant professor of English at DuBois, to do research in the British Library in London on the manuscripts of James Joyce's *Finnegans Wake*;

Dr. Judith Van Herik, assistant professor of religious studies, to continue work on a book on the relationships between psychology and religion in the United States since 1890.

Doruk Pamir, associate professor of architecture, has been selected to design the Islamic Center of Vocational Training and Research in Dacca, Bangladesh. The new center, to be located on 40 acres of land 19 miles north of Dacca, will include administrative buildings, an auditorium, classrooms, lecture halls and labs, a mosque, cafeteria, libraries, student housing and sports facilities.

Professor Pamir holds degrees from the Middle East Technical University, Massachusetts Institute of Technology and Harvard University and has taught at the Middle East Technical University.

The recipient of a UNESCO special fellowship in 1960-61 and a Harvard University Graduate School of Design scholarship in 1962, Mr. Pamir has been awarded prizes by Ankara College and the Middle East Technical University, as well as receiving professional awards for architectural design, graphic design and planning and urban design for projects in Turkey and throughout the Middle East.

Dr. Jeffrey S. Lannin, assistant professor of physics, presented invited seminars at the Massachusetts Institute of Technology and Harvard University. At the MIT physics department he discussed Raman scattering as a probe of disordered condensed matter and at Harvard's applied physics department he spoke on recent Raman studies in amorphous solids.

Dr. Anthony Cutler, professor of art history, has been appointed to the editorial board of *The Dumbarton Oaks Dictionary of Byzantium* published by the Harvard University Press.

Dr. Arthur H. Patterson, associate professor of environment and behavior, appeared as a guest on NBC-TV's Today show on Feb. 21 to discuss the results of a recently completed study on how crime and the fear of crime affect the leisure activities of the elderly. Project director for the study was Dr. Geoffrey C. Godbey, professor of recreation and parks. Dr. Patterson and Laura Brown, a research associate, were co-authors.

Wood sculpture by Stephen Porter, associate professor of art, is on display at the Alumni Art Gallery of Mansfield State College March 4-28. Mr. Porter has had numerous one-man exhibitions in New York galleries, and his works are included in the permanent collections of the Herbert F. Johnson Museum of Art at Cornell University and the Museum of Art at Penn State.

Dr. Paul L. Michael, professor of environmental acoustics, has been awarded "fellowship" by the American Speech-Language-Hearing Association, an honor accorded to fewer than 2 percent of the ASHA membership.

Promotions

Faculty

John R. Ousey Jr. to assistant professor of environmental sciences at Delaware County.

Staff Exempt

Lori Benacchi to operations supervisor in Intercollegiate Research Programs.

Phyllis F. Miller to assistant hospital director/director of nursing services at Hershey.

Guy J. Mussey to foreman, grounds maintenance (horticulture) in Physical Plant.

Staff Non-Exempt

Mary M. Nevengskoy to nutrition aide supervisor in Agriculture.

Clerical

Iris Caccarelli to control clerk B in Management Services.

Sharon E. Dailey to secretary B in Engineering.

John W. Dixon to secretary B in Management Services.

Kim A. Frankenberger to secretary C in Human Development.

Sally A. Horner to clerk stenographer A in Controller's Office.

Jayne B. Jasinski to patient unit secretary at Hershey.

Marie Joan Kahler to clerk typist A at Schuylkill.

Karen J. Packer to secretary C in Agriculture.

Marsha M. Sauer to secretary B in Continuing Education at Hershey.

Orma S. Shugarts to conference secretary in Continuing Education.

Technical Service

Joseph Doren to maintenance worker equipment repair in Physical Plant.

Erma B. Dove to laboratory attendant at Hershey.

Charles A. Robson Jr. to utilities equipment operator B at Hershey.

John E. Stevens to maintenance worker utility at Ogontz.

James C. Stine to stock clerk-truck driver in Housing and Food Services.

David L. Walker to plumbing and piping maintenance worker in Physical Plant.

From the Press

A Pennsylvania Album: Picture Postcards, 1900-1930. By George Miller. 160 pages. \$18.75, cloth; \$10.95, paperback.

All illustrations in this book are taken from postcards, providing a photographic record of everyday life in Pennsylvania during the first three decades of this century.

It was an era when anyone could "publish" a postcard, by supplying the printer with a photograph and agreeing to buy a minimum number of finished cards. Postcards proliferated for every occasion, featuring subjects more prosaic than their modern-day counterparts: houses, neighborhoods, buildings, trains, trolleys, major streets, and people caught by the photographer within these contexts.

"In a time when newspapers, especially small-town newspapers, carried few if any photographs," the author writes, "the penny postcard offered an incredibly inexpensive and convenient way to capture events. Whenever America paraded or celebrated anything, the postcard photographer was there. When buildings burned or rivers flooded, when prohibitionists or suffragettes demonstrated, the postcard recorded everything."

Moreover, the postcard, intended for a popular audience, provides insight to the values of that age. "The postcard can be used as an illustration of business and labor conditions; as evidence of popular attitudes toward America's ethnic, religious, and racial minorities; as a record of the various social struggles of the day; and as an index of popular taste in art and humor," Mr. Miller notes.

A Guide to Hawk Watching in North America. By Donald S. Heintzelman. \$12.95, cloth; \$6.95, paperback.

A successor to the author's *A Guide to Eastern Hawk Watching*, this compact field guide provides comprehensive information about the observation, identification, biology and ecology of diurnal raptors. The book is illustrated with numerous photographs. Hawk migration lookouts in the United States and Canada are listed, along with bald eagle and other raptor viewing areas.

Gymnastics Safety Manual Second Edition. Eugene Wettstone, Editor. \$11.95, cloth; \$7.95, paperback.

New material on the trampoline has been prepared for this edition.

Police Cooperation and Performance: The Greater St. Louis Interlocal Experience. By James C. McDavid. Number 46 in The Pennsylvania State University Studies. \$4.50 paper.

The findings reported in this monograph by Dr. McDavid, an assistant professor of public administration at Penn State, suggest that "levels and performance-related consequences of inter-local cooperation in existing fragmented political settings make the argument for centralization of police agencies much less persuasive."

Police decisions in this area, Dr. McDavid notes, have "heretofore been characterized by received wisdom and untested principles . . .

" . . . This description of cooperative arrangements is intended to show that reform-based expectations regarding frequencies and types of cooperation are not consistent with the evidence."

Maliban: A Biography of the Singer. By Howard Bushnell. 264 pages. \$17.95.

During her short and frenetic life, Maria Garcia Maliban was the object of adulation of audiences in six countries. The colorful career and new vocal style of this legendary 19th century singer epitomized the age of *bel canto*. The possessor of a flexible three-octave vocal range, she sang both contralto and soprano

roles in works by Rossini, Bellini and Donizetti.

Maliban came from a remarkable musical family; her father, Manuel Garcia, created the lead role in Rossini's *Barber of Seville*, and he led his family troupe in the first American performances of Italian operas.

Maliban died suddenly at age 28. The events of her wildly successful and unconventional career have been documented by Mr. Bushnell with reviews of her performances and extracts from her correspondence.

Black Africa, de Gaulle: From the French Empire to Independence. By Dorothy Shipley White. 301 pages. \$14.95.

A personal friend of the de Gaulle family, Dr. White is the author of *Seeds of Discord: Free France and the Allies*. In this book, focusing on President de Gaulle's role, she describes and analyzes the context of independence to the former French colonies of sub-Saharan Africa.

Dr. White vividly describes the General's shift, after an African tour in 1960, from Confederation — "I, de Gaulle, say 'Federation' and there we stop!" — to Cooperation.

Fourteen sub-Saharan colonies were granted independence by France in 1960, after referendums set up by de Gaulle. Six of the 14 new nations decided to remain outside the French Community, although retaining certain economic and cultural ties, and currently there are only five full members.

A prologue traces events of the colonial era, and an epilogue recounts developments since the completion of the French Community in 1961.

The Achievement of Margaret Fuller. By Margaret Vanderhaar Allen. 212 pages. \$13.50.

The dramatic aspects of Margaret Fuller's life have already been the subject of several recent books. Dr. Allen is the first to consider Fuller as an intellectual leader on a par with Emerson and Thoreau, her contemporaries. Dr. Allen explores Fuller's contributions as writer, literary critic, feminist, journalist and commentator on American society. She also examines the process through which Fuller's reputation was obscured following her death at sea in 1850.

A scholar in an era when scholarship on women was not encouraged, Fuller was a teacher, translator and author, as well as a full-time correspondent for Horace Greeley's New York Daily Tribune.

Dr. Allen devotes considerable attention to the complex friendship between Fuller and Emerson and to the damage Emerson wrought on her reputation as a writer and thinker.

Carpoolers

The Penn State employees listed below are interested in sharing rides. Persons

desiring a listing in INTERCOM should send in their names to Room 312 Old Main and include information on their residence, work location, arrival and departure times, phone numbers at home and work, and whether drivers, riders or both are sought.

Robert R. Rimmey, Millheim (349-8041) works 7 a.m. to 4:30 p.m. at Dairy Breeding Research Center (863-0832). Will pay to ride, share driving in carpool, or accept riders.

Phyllis Spicer, Rebersburg (349-5283), works in Mineral Sciences Building (863-6082). Seeks driver.

Janice E. Wingate, Warriors Mark (632-7870), works 7:30 a.m. to 4:30 p.m. in Old Main (865-1356). Will pay to ride.

The Challenge of the '80s

Editor's note: This article is the last of a series in which the academic deans reflect on what lies ahead for their colleges in the '80s.

Among the recommendations of the *Perspective on the '80s* are several which emphasize the need for multi-disciplinary, interdepartmental and intercollege approaches to the human condition and to the interventions needed to alter favorably the human situation.

"I feel that Penn State as an eminent university is moving in the right direction as we enter the '80s," says Dr. Evan G. Pattishall, interim dean of the College of Human Development. "In our College, this is especially true, because a multi-disciplinary approach to the human condition permeates our research, our teaching and our professional service programs."

While Dr. Pattishall takes note of Chapter Three of the *Perspective*, in which an expected decline in high school graduates is discussed, he believes that the decline will be more than offset by a new emphasis on students seeking to prepare themselves for careers in both the established and the emerging professions which are directed toward working with and on behalf of people.

"I also see students insisting on increased relevance or relatedness between what they learn in college and what they hope to work at when they're graduated," he says. "I expect them to remain

"I also see students insisting on increased relevance or relatedness between what they learn in college and what they hope to work at. . ."

interested in the liberal arts, humanities, the arts, and other aspects of a basic education, but to insist upon some help in translating and applying the ingredients of what they learn to the day-to-day world of affairs in which they are destined to live and work.

"Since the College of Human Development bases its professionally-oriented curriculum on strong bridges between research, scholarship and service and has been steadily developing its capabilities in each of these areas, I feel we're in an especially good position to be able to respond to these students.

"Moreover, both science and society have realized that we cannot hope to make effective headway toward solving the problems of humankind if we attempt to proceed with knowledge and skills which are drawn from a narrowly defined discipline base. Multi-disciplinary knowledge and multi-professional applications are required.

"Biochemistry," Dr. Pattishall continues, "began 35 years ago through the cross-disciplinary efforts of organic chemists and biologists working together. Biophysics resulted from the same kind of inter-disciplinary concerns.

"In medicine and behavior, the areas in which I've worked for the past 25 years, biomedical scientists have established that biochemistry, physiology and behavior are integrally related and that the most promising breakthroughs are occurring at the interface between disciplines traditionally defined. We see ourselves in Human Development as working at many such interfaces.

"We must, of course, continue to promote patterns of inquiry within our traditional disciplines; but we must also recognize that the resolution of most of today's complex problems will only occur through the combined utilization of varied knowledge and concepts drawn from all relevant disciplines. That's why it's important to the University to have a professional and multi-disciplinary college such as Human Development providing the means whereby a variety of disciplines and professional technologies can become readily combined in order to address the problems of the individual, the family and the community."

Dr. Pattishall points to one of the College's programs to illustrate what he means.

The College has an outstanding human nutrition program," he says, "built on a strong research base involving biochemical, human, medical, behavioral, community, and public health nutrition. Research studies have shown that, while it's important to identify biochemical substances and pathways, it's also necessary to combine this information with personal and cultural factors if we are to develop behavior change strategies to alter the intake of nutritious elements, and thereby beneficially affect the health and course of people's lives.

"The role of nutrition in human development is increasingly a personal, national and international concern, with influences not only upon health and disease, but also upon the economics, politics, and history of people. That's why most of the problems in human nutrition must be addressed through multi- rather than uni-disciplinary perspectives. We are establishing the base for that perspective and other programs are developing similar models."

As its name implies, the College also utilizes a developmental perspective throughout most of its programs and activities. This is another way in which its approach can be said to differ from more established ways of addressing the human situation and attempting to solve problems associated with it. Not only individuals but also families and communities, as well as agencies and organizations intended to serve them, are viewed as changing and developing entities, according to Dean Pattishall. Thus, solutions to human problems and the educational programs to prepare students to work in the human services must incorporate a working knowledge of the developmental and interdependent processes that are involved. This approach calls for novel ways of thinking, new models of application, innovative procedures and techniques, and often different ways of preparing persons to enter the professional world.

"From my perspective," Dean Pattishall says, "society and its leaders are increasingly demanding that the academic community formulate, teach, and recurrently review the knowledge and skills necessary for people to improve all facets of human growth and development — personal, physical, economic, political, and societal. The College of Human Development expects to play a unique and significant role in preparing people to engage effectively in such efforts, and in generating the new knowledge base and technical skills they require by means of its educational, research, and service programs.

"Our programs in Individual and Family Studies, Administration of Justice and Community Systems Program Development are good examples of some innovative professional programs the College has evolved so far," he reports.

"Others are developing in food services and housing administration, man-environment relations, and community development.

"Academia as well as society can benefit from our approach."

In Dean Pattishall's view, society is beginning to realize that the acquisition of knowledge may be secondary to its use, and he believes that in the '80s universities will be called upon to increase the translation and applications of the basic knowledge they have been accumulating. But the development of strong science, arts and technology programs will not in itself be enough. "We must also integrate strong human development and behavioral dimensions into them," Dean Pattishall says. "If we fail to give this a high priority, we will be building a hollow shell of expertise without adequate concern for the quality of life."

As the impact of the effects of human action on environment and society receives increased recognition, the impact of environment and society upon development and health demands equal attention. "It's a two-way concern," Dean Pattishall emphasizes.

"We hope to extend our multi-disciplinary and interdepartmental approaches to human development into a variety of intercollege relationships so that we may play a major role in the continued development of Penn State as a great public university."

Looking to the future of the College, he sees continued but controlled growth, mainly because "we are educating persons for professional roles who are in great demand by society to solve the increasingly complex problems faced by human beings trying to survive, develop and prosper in a context they either chose or inherited."

The College's baccalaureate enrollment at University Park has rapidly grown during its brief ten-year history to about 3,000 students. Campus baccalaureate programs increased dramatically until about 1976, when it proved necessary to impose partial ceilings to maintain quality of instruction in line with funding.

"We are especially pleased," Dean Pattishall reports, "that the number of our graduate students has more than doubled in the same period of time, to a total of about 280. This is certainly related to the increase in our research programs, which provide a solid base for our instruction and consultation relationships."

The College's consultation relationships are carried out through a network of applied centers which are active in providing useful assistance and aid to a broad range of clientele in both nearby communities and throughout the Commonwealth. Faculty and staff members and students combine their efforts to provide consultative service to individuals, families, and communities, as well as to human service organizations and agencies in regard to the multiple aspects of human development and welfare. The centers provide a valuable means through which to integrate instruction, research and service.

"It's appropriate that our research involvement and funding will increase during the '80s," Dean Pattishall continues, "because we are placing a high priority on the development of a strong research base to interact with our teaching, consultation and service roles.

"We will also be engaged in improving the supervisory and quality controls over the practicum experiences in which most of our students participate. We want to ensure that students are very clear about the learning objectives that are to be accomplished when they are in the field and that they are evaluated as to the achievement of these objectives by qualified personnel. When students bring field experiences into junior and senior year coursework, classroom material takes on new relevancy and learning is enhanced. Practicum experiences also help students decide whether they have selected a profession to which they are willing to commit themselves, and as these field experiences are shared, they enrich the learning experiences of everyone — faculty and students alike."

In the future, Dean Pattishall sees the University continuing to develop a strong emphasis on its land-grant responsibilities. "I am very optimistic," he says, "that we can extend this land-grant responsibility even further by working with non-traditional students who want to upgrade their personal and professional knowledge and skills. The College has already had outstanding success in developing models for extended degree programs in nursing, health planning administration and the

administration of justice, and we will expand these programs as required.

"During the past few years, I've been closely associated with the health-related professions, and almost all of them are actively attempting to upgrade their level of professional certification. With the wealth of resources that we have at Penn State — not only in Human Development but also in the College of Health, Physical Education and Recreation, the College of Medicine and the College of Science — we are in a unique position to respond to the many varied health profession groups seeking extended degree programs and other professional education at the baccalaureate and graduate levels. Recognizing that there are still problems of

Dr. Pattishall

working cooperatively, of insuring quality control, and of persuading full-time faculty members to develop a commitment to this kind of outreach, I still think that it can be done and that the University and the Commonwealth will benefit.

"I expect the College of Human Development to play a major role in this effort. To do so, we must give increased recognition to the needs of the non-traditional, non-resident, non-full-time, non-college age, non-male student. We must develop programs that respond to the needs of the minority as well as the disadvantaged student. There are many bright, highly motivated students among them, and neither the University nor society can afford to neglect the talents they have, nor the contributions they can make. Penn State's concern for quality and selectivity in the '80s can find excellent expression through the recruitment of such non-traditional students and the design of educational experiences for their development.

"The University's response to this challenge could more than offset any anticipated reduction in enrollments and will, I think, provide education, intellectual and professional services for the State in fulfillment of our land-grant responsibilities."

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

SPRING TERM 1980

Thursday, March 6

Spring Term registration, 8 a.m.-5 p.m., IM Bldg.

Continuing Education registration, noon-8 p.m., Room 101 Kern.

HUB Craft Center, registration for 1st session classes, noon-5 p.m., daily through March 15, Room 312 HUB.

Friday, March 7

Spring Term registration, 8 a.m.-5 p.m., IM Bldg.

Continuing Education registration, 9 a.m.-6 p.m., Room 101 Kern.

Sunday, March 9

HUB Mini-Concert, Sweet Maxine (formerly Stryder), rock and roll, 9 p.m., HUB Ballroom.

Week of March 10

Monday, March 10

ARHS Book Sale, 10 a.m.-7 p.m., Room 301 HUB, through March 12.

Drop/Add, 1 p.m.-4 p.m., HUB Station. France-Cinema, *Get Out Your Handkerchiefs*, 7 and 9 p.m., Room 112 Kern.

Interdisciplinary Symposium on Value, 8 p.m., Room 101 Kern. Michael Svoboda, interdisciplinary graduate program in the humanities, speaker.

Auriol-Fauchet Duo (violin & piano), 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, March 11

Drop/Add, 9 a.m.-4 p.m., HUB Station, daily through March 14.

Faculty Women's Club Brown Bag Lunch & Lecture, 11:45 a.m., Faculty Club. Willard Martin, New Kensington Campus, on "The Interesting Amish."

College of Agriculture faculty meeting, 4 p.m., Room 301 Ag. Admin. Bldg.

School of Music Common Hour, 4 p.m., Music Bldg. Recital Hall. Master class by Adele Auriol and Bernard Fauchet.

Comp. Lit. Film Series, Pasolini, *Medea*, 7 and 9 p.m., Room 112 Kern.

Artists Series film, David Copperfield, 8 p.m., Schwab.

Wednesday, March 12

Comp. Lit. Film Series, *Medea*, 7 and 9 p.m., Room 101 Chambers.

France-Cinema, *Get Out Your Handkerchiefs*, 7 and 9 p.m., Room 112 Kern.

Jazz Festival, 3rd Stream, 8 p.m., Schwab. Christopher Callahan, French horn, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, March 13

Sports: fencing (men), NCAA Championships, through March 15.

Jazz Festival, Travis, noon, HUB Assembly Hall. Barry Miller/Eric Kloss and Waterland Quartet, 8 p.m., Schwab.

GSA videotape, "Best of Johnny Carson," 1 p.m., Kern Lobby.

HUB 25th Anniversary Celebration Dinner, 4:45-6:45 p.m., HUB Terrace Room.

HUB Craft Center, Open House, 7:30-9:30 p.m., Room 312 HUB.

HUB 25th Anniversary Celebration. On the Waterfront, 2:30-7 and 9:30 p.m., HUB Assembly Room. Free.

GSA workshop, Lassie Marthoff on "What's Your Raquet? - How to Select and Maintain," 7:30 p.m., Room 101 Kern.

Forest Products Research Society Lecture, 8 p.m., Room 304 Forest Research Lab. John Meyer, Syracuse Univ., on "Commercial Application of Wood-Plastics."

Friday, March 14

Sports: swimming and diving (men), NCAA Qualifying Diving Meet, through March 15. Jazz Festival, Arthur Goldstein Trio, noon, HUB Main Lounge. Appalachian Swing Quartet and Quintessence, 8 p.m., Room 102 Kern.

STS/Three Cultures Dialogue on

"Science/Technology for War or Peace," luncheon, noon, presentation, 12:20 p.m., Room 101 Kern. Geoffrey L. Wilson, Materials Research Lab., on "Justification for Academic Participation in Weapons Research."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Arthur Goldschmidt, history, on "The Contemporary Mid East: Problems and Prospects."

HUB 25th Anniversary Celebration Dinner, 4:45-6:45 p.m., HUB Terrace Room.

Commonplace Theatre, *Jim Hendrix*, 7 and 9 p.m., Room 112 Kern.

Margaret Lecrone, violin, 8:30 p.m., Music Bldg. Recital Hall.

HUB 25th Anniversary Celebration Dance, Phi Mu Alpha Dance Band, 9 p.m., HUB Ballroom.

Saturday, March 15

Jazz Dance Workshop, 1 p.m., Walnut Bldg. France-Cinema, *Get Out Your Handkerchiefs*, 7 and 9 p.m., Room 112 Kern.

Sports: gymnastics (men) vs. LSU and (women) vs. Rutgers, both at 8 p.m.

University Choir, Berlioz, *Requiem*, 8:30 p.m., Eisenhower Auditorium.

Sunday, March 16

Free University, course registration, 11 a.m.-3 p.m., Robeson Cultural Center.

University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Derald Stump, Episcopal Student Assn., speaker.

Sports: bowling (men) vs. Villanova, 1 p.m. Annette Torregrosa, cello, 3:30 p.m., Music Bldg. Recital Hall.

Commonplace Theatre, *Jim Hendrix*, 7 and 9 p.m., Room 112 Kern.

HPER week guest speaker, Vera Komarkova, American Women's 1980 Climbing Expedition to Dhaulagiri I, Nepal, 8 p.m., Eisenhower.

Evening with the Arts, Hugh Ward, Irish folksinger and folklorist, 8:30 p.m., HUB Ballroom.

GSA, St. Patrick's Day Social, Jim Corr and Friends, 8 p.m., Room 102 Kern.

Tuesday, March 18

Jazz Festival, Phi Mu Alpha Band, noon, HUB Main Lounge; lecture, Peter Winkler, music, on "History of Jazz," 2 p.m., HUB Main Lounge; Penn State Jazz Blue Band and State College High School Jazz Band, 8 p.m., HUB Ballroom.

Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College; Paul West, English, reads from his new novel *The Very Rich Hours of Count von Stauffenberg*.

School of Music Common Hour, 4 p.m., Music Bldg. Recital Hall.

Shakespeare film, *A Midsummer Night's Dream* (Hall/Rigg), 6:30 p.m., Room 112 Chambers.

Comp. Lit. Film Series, *Tacchella*, *Blue Country*, 7 and 9 p.m., Room 112 Kern.

Wednesday, March 19

Late registration deadline.

Add deadline.

Jazz Festival, films, "Liquid Jazz" and "New Orleans Jazz Museum," all day, HUB Assembly Hall; Paul Pute and Ed McGuire, 8 p.m., HUB North Lounge.

Campus Colleagues meeting, 4:30-6:30 p.m., PSU Women Coaches Panel, Assembly Room, Nittany Lion Inn.

Sports: volleyball (men) vs. Pittsburgh, 7 p.m.

IAHS, History of Photography Lecture, 8 p.m., Room 101 Kern. J. McElroy, Univ. of Arizona, on "Early Photography in Peru."

Week of March 17

Monday, March 17

Jazz Festival, Jerry Zolten and Jive Bombers, noon, HUB Main Lounge; films, "Liquid Jazz" and "New Orleans Jazz Museum," all day, HUB Assembly Hall; The Danceband, 8 p.m., HUB Ballroom.

St. Patrick's Day Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.

Shakespeare film, *A Midsummer Night's Dream* (Hall/Rigg), 6:30 p.m., Room 101 Chambers.

France-Cinema, *Get Out Your Handkerchiefs*, 7 and 9 p.m., Room 112 Kern.

Volunteer Service Center orientation, 7 p.m., HUB Reading Room. Also March 18 and 19.

Color Slide Club meeting, 7:30 p.m., Room 189 Materials Research Lab.

Shakespeare film, *Richard II* (BBC), 8 p.m., Room 304 Boucke.

Board of Trustees meeting, Keller Bldg.

Saturday, May 31

Commencement, 10:30 a.m., Beaver Stadium.

Exhibits

Chambers Gallery

Eleanor Drake-Lewis, experimental weavings; bronze cast sculpture by Fine Arts Students, March 10-April 2.
William Bradley, sculpture and drawings; ceramics by senior Fine Arts Students, April 7-23.

HUB Galleries

The Gallery
College of Arts and Architecture Exhibit,
"Original Drawings by Aldo Rossi, noted Italian Architect," March 7-22.
Master Works from the National Glass Conference, March 23-April 13.
Paintings of Two Pennsylvania Artists, Henry O. Tanner and Horace Pippin, April 13-May 10.

Jeanne Stevens-Sollman, ceramic sculpture, May 11-June 15.

Gallery Lounge

Ryan Nettles, sculpture, April 14-May 17.
Browsing Gallery
Festival for Special Children exhibit, through March 14.

Bruce Johnson, watercolors and prints, March 15-April 15.
Landscape Architects Design Awards exhibit, April 16-May 17.

Art Alley

Art Alliance of Central Pa. Members' exhibit, March 8-29.

Slavic Folk Art Festival exhibit, April 1-27.
Mike Starnier, pottery; Rome Hanks and Friends, group photo exhibit, April 28-May 17.

Kern Gallery

Beth J. Fogel, maps, through March 21.
Frederick J. Tarr, drawings, through March 31.
Nicholas Webb, ceramics, March 10-28.
Chen Chih Ming, ink drawings, March 22-April 13.

Ukrainian Club Easter display, April 1-12.

David Rubello, photographs and paintings, April 5-26.

Glass works, April 7-14.

Laveta Butler, ceramics, April 11-30.

Anne Curtis, ceramics, April 14-May 5.

Bob Bisset, photographs, April 27-May 17.

Matt Reitz, glass, May 2-23.

Museum of Art

Museum hours, 12-5 daily. Closed Mondays.

Tours, Sundays at 1:30 p.m.

Pennsylvania Prints from the Collection of John C. O'Connor and Ralph M. Yeager, through April 13.

Aspects of representation after World War II: works from the permanent collection, through May 4.

Chinese Export Porcelains from the Collection of Dr. and Mrs. Harold L. Tonkin, through May 11.

Recent works on paper by Diane Pepe, April 13-June 1.

Highlights from the permanent collection, April 27-June 8.

Pattee Library

East Corridor Gallery

Paintings by Beginners, PSU Dept. of Art, March 7-28.

Rome Hanks and Mary Edith Miller, photographs, March 28-April 18.

Nora Speyer, drawings, April 18-May 9.

Patricia O'Connor, paintings, May 9-30.

Lending Services Lobby

Maura Fadden, paintings and drawings, March 7-28.

Ann Mancini, photographs, March 28-April 18.

Steven Dervin, photographs, April 18-May 9.

Dennis Aumiller, photographs, May 9-30.

Rare Books Room

Black Artists, through March 10.

50th Anniversary Exhibit, Archaeological Institute of America, March 14-18.

History of Photography Week Exhibit, 19th century books and other memorabilia, March 10-25.

Robeson Cultural Center

Francis Couch, paintings, March 9-28.

Visual Arts Bldg. Zoller Gallery

Undergraduate Student Exhibit, through March 16.

National Glass Conference Exhibit, March 23-April 13.

Graduate Thesis Exhibit, April 19-May 16.

Seminars

March 6-16

Friday, March 7

Transportation Institute, J.D. Walter, Central Research Lab, Firestone Tire and Rubber Co., on "Cord-Rubber Composite Structures," 1 p.m., Transportation Institute Research Bldg. B Conference Room.

Tuesday, March 11

Organic/Inorganic Chemistry, A. Beatty, on "Dihydrofolate Reductase: Substrate and Inhibitor Complexes," 12:45 p.m., Room 333 Whitmore.

Astronomy, Donald E. Osterbrock, Univ. of California/Santa Cruz, Lick Observatory, on "Recent Research on Seyfert and Radio Galaxies," 4 p.m., Room 445 Davey.

American Society for Metals, Eric Bismiller, Yankee Atomic Electric Co., on "The Effects of Neutron Bombardment on Structural Steel," 7:30 p.m., Room 301 Seidle.

Wednesday, March 12

Philosophy of Sport, Henschel Leibowitz, psychology, on "Some Thoughts on the Role of Sports in a University," noon, Room 104 White.

Thursday, March 13

Chemistry, Koji Nakashishi, Columbia Univ., on "Biorganic Studies of Visual Pigments," 12:45 p.m., Room 333 Whitmore.

Physics, E. Merzbacher, Univ. of North Carolina, on "Quantum Physics of Dynamics," 3:50 p.m., Room 445 Davey.

Acoustics, William R. Savage, on "Comments on Musical Acoustics Research at the University of Iowa," 7:30 p.m., Room 303 Keller.

Friday, March 14

Philosophy, Dominique Jauch, Univ. of Nice, on "Is Hegel a 'Master Thinker' Hegel's Conception of Domination and Mastery," 4 p.m., Room 225 HUB.

News in Brief

(Continued from page 1)

Berlitz 'Requiem' to be sung by Choirs March 15

Berlitz Requiem will be performed by the University Choirs and the Nittany Valley Symphony Orchestra at 8:30 p.m. Saturday, March 15, in Eisenhower Auditorium. Tenor Alan Crabb will be the featured soloist.

The University Choirs have just returned from Pittsburgh, where the singers gave three performances of the Requiem with Andre Previn and the Pittsburgh Symphony Orchestra.

The choir is directed by Raymond Brown, professor of music.

Tickets for the performance are on sale at the choir office in Room 214 Eisenhower Chapel, and information may be obtained by calling the office at 865-6548. From March 10-14, tickets will be available at the Eisenhower Auditorium Box Office between 10 a.m. and 4 p.m. Prices are \$3 for orchestra and grand tier seats and \$2 for balcony seats.

French musicians in residence

The French duo of Adele Auriol, violinist, and Bernard Fauchet, pianist, will be in residence at the University from March 10-14 as part of their first North American tour. They will present a recital at 8:30 p.m. Monday, March 10, and a lecture-recital of French contemporary works, combined with a master class, at 4 p.m. Tuesday, March 11, both in the Music Building Recital Hall.

The Monday evening recital will feature a program of 20th century works, including Claude Debussy's Sonata in G minor, Bela Bartok's Sonata no. 1, and John Beall's Sonata no. 3, composed in 1975-76. Mr. Beall is currently composer-in-residence at West Virginia University.

Fauchet and Auriol, who are husband and wife, met as students at the National Conservatory in Paris, where they began their collaboration. In 1968 they were appointed Fellows of the Laurent-Vibert Foundation for Artists in Loumarin, Provence. During the past 10 years, they have performed in France, Germany, Spain

and Belgium and throughout Asia, Africa, Oceania and Latin America.

The duo's residency at the University is co-sponsored by the School of Music and the Institute for the Arts and Humanistic Studies. The recital and the lecture-recital and master class are open to the public.

Intensive English program

To help foreign students who lack familiarity with the English language, the University will offer an Intensive English Communication program, March 17 to May 16, and again June 16 to Aug. 8. Under certain conditions, the course may be taken for credit.

The program will enable prospective students to spend 25 hours a week studying English and the American culture. Admissions regulations of most colleges and universities require that students have a minimum score on the Test of English as a Foreign Language (TOEFL) of 525 to 550, and the course is designed to help students reach that level.

Further information may be obtained by calling 865-5141.

Berks position open

Dr. Harold Perkins, director of the Berks Campus, announces the availability of the position of Associate Director for Academic Affairs at that Campus.

The Associate Director for Academic Affairs is responsible to the Campus Director for administering all academic functions at the Campus. The position provides the opportunity to work with the various colleges and departments of the University in providing leadership in the professional development of faculty, in initiating new and innovative programs in resident instruction and continuing education, and in campus service to the community.

Applicants for this position should possess an earned Ph.D. degree and a minimum of five years' experience involving a combination of full-time teaching; scholarly pursuit, including preparation of proposals for external funding; and direct or participatory academic administrative experience.

A resume, with names of three references, should be forwarded to Dr. Harold Perkins, Director, Berks Campus, Department A1, Tulpehocken Road, P.O. Box 2150, Reading, PA 19608. Nominations and applications are due April 18, 1980.

Nominations sought

(Continued from page 1)

Barash. It is an annual award to a full-time member of the faculty, staff, or student body of the University at University Park who has contributed most, apart from regular duties, to human causes, public service activities, and organizations, or the welfare of fellow humans. This award carries a stipend of \$1,000. Previous recipients are Robert Welsh, Ronald Ross, Robert H. McCormick, Arnold Addison, and Charles H. Naginay.

administered by the University."

The Senate resolution cites Penn State research for the many benefits it has brought to all Americans, including the first long-life rechargeable heart pacemaker, the field ion microscope which enabled a Penn State physicist to become the first person ever to see an atom, a method of prolonging the life of highway bridge decks and the creation of more than 180 varieties of 30 crop species.

But the University's greatest achievements, both resolutions state, are its students and its more than 235,000 graduates. More than half of them live and work in Pennsylvania today.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonsenior have been filled. This announcement is made for the University employees who are interested in promotion may apply by calling the Employment Division, 185-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m. March 13, 1980. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, sex (as provided by law), sex, or status as a disabled or Vietnam era veteran.

SUPERVISOR, CREDIT AND COLLECTION - COLLEGE OF MEDICINE, HERSHEY ACTION - In the preparation of policies, procedures, job description and conduct performance evaluations of the supervisors in area of responsibility. Responsible for managing of the accounts receivable relevant to days outstanding by payor class, financial class, etc. Interface with delinquent insurance carriers when late payment notices are detected to resolve all problems. Review and approve all time payment requests. Responsible for budget control for all areas of responsibility. Bachelor's degree in business administration or equivalent, plus 1-2 years of effective experience.

MEDICAL SOCIAL WORKER II - COLLEGE OF MEDICINE, HERSHEY - Function as liaison between physician, patient, family and community resources to promote coordination of comprehensive treatment plan. Coordinate internal and external services to meet needs of patients being treated by HMC. Provide counseling to patients and appropriate family members, utilizing individual and group work techniques. Master's social work or equivalent, plus 1-2 years of effective experience.

GRAPHIC ARTIST - UNIVERSITY DIVISION OF INSTRUCTIONAL SERVICES, University Park - Responsible, under general supervision, for the production of a wide variety of artwork (illustrations - realistic, biological and cartoon, drafting - graphs and charts of various kinds, and lettering - mechanical, typesetting, photographic and hand) to specific format standards: overhead transparencies, television, 35 mm. motion picture, displays and portable exhibits.

Minimum requirements are an associate degree or graduate of a two-year program from an art institute and a minimum of one year's effective experience. Knowledge of audiovisual aids and education methods is helpful.

SCIENTIFIC ILLUSTRATION AND PHOTOGRAPHIC ASSISTANT - COLLEGE OF MEDICINE, HERSHEY - Responsible to department chairman for the preparation of all graphs, prints, slides, etc. necessary for scientific research. Associate degree in art or drafting or equivalency and one to two years of effective experience.

TREASURER - STUDENT AFFAIRS, University Park - Responsible to the Director, Office of Student Affairs, for supervision, maintenance and internal control and accountability of the daily operation of the student organization financial accounts in the Associated Student Activities Office and for providing advisory assistance to student organizations in the maintenance of their accounts, as well as providing educational programs to enhance student organization treasurer's skills. Bachelor's degree, with major in accounting or a related field. Two to four years of effective experience required. Master's degree preferred. Should have demonstrated ability to supervise, train and direct other employees, and should be able to function in an educating capacity when working with student organization officers. Knowledge of mini-computer applications highly desirable.

MANAGER - TELECOMMUNICATIONS - OFFICE OF BUSINESS SERVICES, University Park - Responsible to the Director, Printing and Communications, for the planning, development and administration of the Telecommunications Operations. A bachelor's degree or equivalent, plus four to seven years of effective management or similar administrative experience in the telecommunications field are required.

UNDERGRADUATE STUDIES ADVISOR/CONSULTANT, Behrend College - Responsible to the Head of the Division of Undergraduate Studies, Behrend College, and assists in conducting the undergraduate enrollment, academic advising, educational counseling, career counseling and academic support programs and the development of services of the division. Master's degree or equivalent, plus one or two years' experience in college-level academic advising and counseling. College teaching experience is desirable.

ASSISTANT DIRECTOR, NURSING STAFF DEVELOPMENT, Hershey - Responsible to the Director of Nursing for the overall effective planning and administration of the In-Service Education Program of the Department of Nursing. Master's degree, plus two to three years, effective experience, plus graduation from an accredited school of nursing and current licensure in the state of Pennsylvania or proof of application for licensure are required.

York Campus grows with county population, industry

Edward M. Elias talks with the assurance and drive of a man who took the administrative reins of a fledgling technical-education program enrolling 26 students in a rented elementary school and helped transform it into a major university presence in a thriving metropolitan area.

Mr. Elias, director of Penn State's York Campus, has guided York's fortunes since 1950, when, packing a freshly-earned B.S. in electrical engineering from Lafayette College, he came to the southern-tier city as an instructor and administrator in charge of the York Center.

"We've always operated under the assumption that our job is to bring to the people of our service area all the resources of The Pennsylvania State University," Mr. Elias says. "We are Penn State at York and, as such, we really represent the tip of a higher education iceberg."

"We're also the educational brokers in this area, in that we try to find what the needs are in our service area and match them with the services the University can offer."

The predominant external factor currently challenging the York Campus is the rapid growth of York County, both in industry and population.

"I think the area's growth stems from the fact that the outer areas of the county, both north and south, are traversed by Interstate 83," Mr. Elias points out. "The southern part of the county, in fact, is slowly blending into the suburban Baltimore area."

"The entire area, particularly the southern part of the county, is booming economically. Industries are coming in at a phenomenal rate; because of this and the attractive living climate, population is growing quickly in southern York County, and we have a situation in which the school districts there are actually adding, rather than losing, students."

"In addition, our area has a healthy mix of agriculture and industry; it's not dominated by any major industry on which 5,000 or 10,000 people depend."

"The other factor that affects us directly is that York County traditionally has had a smaller proportion of its high schoolers going to college than the rest of the state," Mr. Elias continues. "This is essentially because there haven't been any institutions of higher education in the county until 20 years ago (the York Center was chartered as a Commonwealth Campus in 1959, offering associate degree programs only). We have only been offering the first two years of most baccalaureate degree programs for nine years, so we're just starting to make a big impact in that area."

Enrollments are increasing dramatically at York. The 955 full-time students matriculating for the 1979 Fall Term represented a 14.1 increase over the number enrolled the year previous. Baccalaureate degree programs experiencing the largest enrollment surges this year are: education, 50 percent; engineering, 20 percent; liberal arts, 52 percent; and science, 17.5 percent. Associate degree programs with the largest

Mr. Elias

increases are: mechanical engineering technology, 110 percent; letters, arts and sciences, 75 percent; and computer science (in which women outnumber men by a 2 to 1 ratio), 52 percent.

Mr. Elias is equally pleased by the quality of students attracted to the campus. "We feel very proud that York has produced more student marshals in the College of Engineering—five in all—than any other campus. And at the Winter Term graduation, the student marshal in the College of Science had started at York; he chose a York faculty member, Dr. James Burness, assistant professor of chemistry, to be honored with him for his 'high academic standards and his concern that students achieve their potential.'"

"We are getting some tremendously bright students in a variety of disciplines," he adds. "We have 15 students who scored over 1400 in their SATs."

Mr. Elias sees a direct relationship between the calibre of students at York and the quality of his faculty, the composition of which has changed considerably since the establishment of baccalaureate degree programs.

"In terms of hiring, it's been a buyer's market," Mr. Elias says. "We've had the tremendous advantage of being able to recruit some very excellent young Ph.D.s who want both to teach and to do research in a department of a major university."

We've been able to offer them the best of both worlds."

"And it's infectious for our students to study with faculty members who are excited by their disciplines—people who not only disseminate knowledge, but generate it as well in the true spirit of a university."

At present, more than 65 percent of York's faculty members have Ph.D.s, a proportion which promises to increase significantly within five years, as others complete their doctoral work.

"Many of our people are engaged in research which they've initiated themselves," Mr. Elias adds. "We have faculty members in the sciences and engineering who are doing important work without benefit of major laboratories. Our liberal arts people are extremely active scholars."

A recent newspaper article in *The York Dispatch* provides a sampling: Dr. Linda V. Itzoe, assistant professor of English, published "The Chapel-Church Motif in Pamela: An Analysis" in *Essays in Literature*; Dr. Leonard J. Berkowitz, assistant professor of philosophy, published "Achinstein on Empirical Significance: A Matter of Principle" in *Philosophy of Science*; Dr. John Dawson, assistant professor of mathematics, published "The Godel Incompleteness Theorem from a Length of Proof Perspective" in *The American Math Monthly*; Dr. Ernest A. Harrison, associate professor of chemistry, published two research-related articles in *The Journal of Organic Chemistry*.

In other ongoing research, Dr. Burness is attempting to make chemical compounds that act as models for vitamin B-12 and hemoglobin and, in another project, is studying the use of platinum in the treatment of cancer. Dr. John Medeiros, assistant professor of physics, is examining the physical activity in the eye that facilitates the perception of color.

Dr. George Caudle, assistant professor of physics, is developing a laser laboratory that will have 10 lasers in operation by this summer. In addition, to investigating chemical interactions with laser beams, he already is working with such area industries as Pfaltzgraf, Inc., and

Armstrong Cork Co. on potential applications of lasers to their products."

"The excellence of our faculty and their intellectual activities have given the York Campus a reputation for quality, and I think that constantly from people who live in this area," Mr. Elias notes. "This campus is viewed as a school that offers quality education—a place where students go only if they're prepared to work."

Also facilitating the university presence at the York Campus is the recently completed physical plant. Though York is a commuter campus without dormitories, it boasts a new Student Center erected in 1978 by virtue of a \$700,000 private giving campaign. The campus also boasts a library, a gymnasium, tennis courts and athletic fields. The main classroom building houses the academic and administrative offices, the computer science center, science laboratories and the conference center.

"All the ingredients have fallen into place," Mr. Elias explains. "Our physical plant is complete, and we have first-rate educational programs taught by quality faculty members. In addition, we are easily accessible and financially reasonable."

A major part of York's mission is Continuing Education, which annually enrolls more than 5,000 people. Last year, York's Continuing Education experienced a 20 percent enrollment increase over the previous year. The bulk of the growth was workshops, seminars and clinics, with these programs increasing 79 percent in number.

An example of Continuing Education at York is the current program at Bowen-McLaughlin, a local industry where faculty members are training 200 front-line supervisors in communications, organization, motivation and human relations.

Many of the campus's initiatives in Continuing Education have resulted from suggestions by Campus Advisory Board members. "Without them," Mr. Elias says, "I don't think this campus would exist. They've been instrumental in establishing a close link between the community needs and what we can do to satisfy those needs. Our direct impact on the community is due largely to the effectiveness of our advisory board."

The board has been the catalyst for setting up annual and ad-hoc giving campaigns, and also has established a new endowment fund.

"I think our board is excited about the idea of a university in the York area," Mr. Elias says. "In many ways, they've indicated their support for faculty research because the bulk of monies raised in annual giving campaigns is used to initiate faculty research projects. They're also raising money for student scholarships. All of the funds they help to raise are used to enhance quality and scholarship."

"People in the area are realizing the value of having The Pennsylvania State University at York," Mr. Elias concludes. "We have the resources, and we're ready to serve them. That's why we're here."

Top: Student Center is newest Campus building; it contains snack bar, game room, study lounge, bookstore, and offices. Left: The Campus library. Right: Addition to main classroom building dwarfs the original structure at left.

Penn State Intercom

Phys. Ed. Ph.D. program is rated best in country

Penn State's doctoral program in physical education has been named the best in the country in a new survey of 112 prominent U.S. physical educators.

The study, which ranked all 60 programs leading to the Ph.D. in physical education in the United States, was based on ratings from directors of those programs and from Active Fellows of the American Academy of Physical Education, the national academy of outstanding scholars and researchers in the field.

"We're pleased that Penn State's program has received this kind of recognition from some of the leading professionals in the field," Dean Robert J. Scannell of the College of Health, Physical Education and Recreation said.

"We have a dedicated and talented graduate faculty, and there is indeed much about Penn State's program that makes it unique and exciting."

Currently, there are 38 Ph.D. candidates in the program.

John A. W. Baker, a faculty member at the University of Iowa, conducted the study. It was an attempt to select, for the first time, the best programs in the country and to outline common characteristics.

The University of Iowa was second to Penn State in the rankings. Other top-ranked schools were the University of Illinois, third; University of California at Berkeley, fourth; and University of California at Los Angeles, fifth.

Dr. Baker compiled his information from questionnaires sent to the directors of all 50 U.S. Ph.D. programs in physical education and to 96 AAPE Fellows. He received 112 usable responses.

Later, he made personal visits to the five highest-ranked institutions for interviews with faculty members, graduate students, department heads and program directors.

The rankings of the top five schools did not change when opinions of physical educators who were affiliated with those schools or who had received degrees from them were excluded.

The study involved the use of techniques outlined in the Roosevelt Anderson report.

University Scholars Program to begin in Fall Term

The University Scholars Program, established last year by the Senate, will begin enrolling students in Fall Term 1980, according to its director, Dr. Paul Axt.

Progress and problems in planning the program were described by Dr. Axt at the March meeting of the Senate, and he noted that further enabling legislation will be presented at the April 1 meeting. Funding for the program has been provided by the Provost.

"The attempt," Dr. Axt said, "is to put together for very good students a very special program which will develop their talents and their abilities in ways we now can't do or are not doing. This means a selection process."

Stressing that the selection process should be flexible because it is bound to be imperfect, Dr. Axt said that at a minimum it should "provide us with a certain set of really good students who can make maximum use of the kind of effort that we want to expend."

The program will begin by recruiting entering freshmen, probably with SATs upwards of 1300 and with predicted GPAs of 3.35 (science) or 3.5 (non-science). Dr. Axt noted that these figures could be

adjusted as experience was gained with the program.

Since some worthy candidates will inevitably be omitted under these selection criteria, students can also qualify by doing distinguished work in their freshman year. On the other hand, students who do not make appropriate use of the program or who do not meet program standards (Dr. Axt suggested a 3.2 GPA, although he stressed that this figure was not final) would not be retained.

Students will have another opportunity to qualify for the Scholars Program at the end of their sophomore year. In this case, the selection process will be different since the intent will be to find students who have completed most of their BDR requirements and who are likely to do "exceedingly well" in their majors.

Dr. Axt estimated that there might be 150 freshmen and 150 sophomores in the program next fall.

"Doubling that by 1982 would bring 600 students into the program, and I would think that with some serious efforts at recruitment, the number might reach 1,000 in a few years," Dr. Axt told the Senate. "I know that at some other

universities of about the size and character of Penn State, the number is about 1,100 or 1,200."

For students enrolled in the program next fall, there will be some 45 to 50 special honors sections of courses which they may take to satisfy BDR requirements. These courses, which will be taught by committed senior faculty members, run the gamut from chemistry and mathematics to English and sociology.

The establishment of special courses for students in the Scholars Program is also under consideration.

"Setting up such courses requires serious effort, and we want to give ourselves more time to think about them," Dr. Axt explained. "We hope that at least a few will be in place next year."

Independent study will be another option, as well as what Dr. Axt termed "honors-supplement courses." These may be either general education or major courses in which the students agree in advance with their instructors to do extra work. Graduate courses will also be available to students who can benefit from them.

News in Brief

Mountaineer to speak

Vera Komarkova, a member of the first woman-led expedition to conquer a major world mountain—Mount Annapurna—and one of two women to reach the summit will present an illustrated talk on the expedition at 8 p.m. Sunday, March 16, in Eisenhower Auditorium.

Next fall, Ms. Komarkova hopes to lead a party of six women in an assault on the world's sixth highest mountain.

Dhaulagiri, in Nepal (Annapurna is the tenth highest). Their route to the summit will be either the Northeast Ridge or the treacherous Pearo Route, which has been attempted six times but never completed.

The talk is being presented by Colloquy in recognition of National Physical Education and Sport Month. It is co-sponsored by the College of Health, Physical Education and Recreation; the Outing Club; USC's Department of

Senate approves "Bulletin" guidelines

President Oswald predicted "rather quick action" on the University's 1980-81 budget request since Pennsylvania's legislators are facing an election year and will make every effort to conclude their deliberations as soon as possible after July 1.

The prediction came at the March 4 meeting of the University Faculty Senate at which Dr. Oswald announced that the first hearing on the budget would take place March 12 before the House Appropriations Committee.

Senators were informed that their May 6 meeting will be held at the Altoona Campus.

The Senate gave unanimous approval to the only legislative item on its docket, guidelines proposed by the Committee on Curricular Affairs to be used in writing program descriptions for *The Baccalaureate Degree Programs Bulletin* and the *Associate Degree Programs Bulletin*.

In presenting the recommendations, Senator Eugene S. Lindstrom noted that the current legal climate makes it dangerous to make any claims the University cannot fulfill. "Some program descriptions all but guarantee the successful graduate a job upon successful completion of the program . . . and could result in a lawsuit from a graduate unsuccessful in the job quest," he said.

The Subcommittee on Developing Guidelines for Program Descriptions recommended that descriptions be limited to about 200 words or about 15 lines in the catalog. Approximately one-fourth of the program descriptions currently exceed this word limitation. The Subcommittee also recommended that program descriptions in all catalogs be reviewed.

The Senate received several informational reports.

John F. Kavanaugh, chairman of the Committee on Academic and Athletic Standards, presented a summary of the Committee's actions on petitions. Between

New apple variety will honor Penn State sociologist

A variety of apple previously unknown in the United States may soon be growing at Penn State—a memorial from a University sociologist to a colleague.

The apple, *Reinette Simirenko*, was developed early in the century in the Ukraine by a noted agricultural scientist, Lev Simirenko, whose grandson, Alex, was professor of sociology at Penn State from 1969 until his death last April.

"Alex was an outstanding scholar and the most generous and warm-hearted of men," recalls Dr. George A. Theodorson, professor of sociology. "He used to tell me about this apple, which he had enjoyed eating as a child in the Ukraine. Alex was always doing things for other people, so I decided to try to locate the apple for him."

Dr. Theodorson contacted agricultural scientists across the country without results but he finally discovered a "tree museum" in Great Britain that had grown the Simirenko apple.

"Many of the Simirenko apple trees in the Ukraine and Russia were destroyed in the thirties," Dr. Theodorson reports.

"Lev Simirenko was sent to Siberia as a revolutionary. His son, Volodymyr, Alex's father, and a leading horticulturist, was arrested in 1933 for not following Marxist theories of biology. He was released for six months and then rearrested to vanish into the Gulag forever. At that time, the authorities vindictively destroyed as many trees as they could find. Volodymyr was rehabilitated posthumously; but by then his family had fled the country, and the hardships which they suffered irrevocably undermined Alex's health. He was only 47 when he died."

To import a new species of plant into the United States requires a license from the U.S. Department of Agriculture, which Dr. Theodorson applied for and obtained.

A cutting from a Simirenko tree, the scion wood, arrived in this country just two weeks before Alex Simirenko's death; but he was too ill for the long-awaited event to make any difference.

"The cuttings are currently quarantined in a U.S.D.A. facility in Maryland," Dr. Theodorson continues. "There they were

grafted onto trees to await virus indexing. Only when it has been established that they will transmit no new viruses into the country will bud wood be shipped to me."

In preparation for this event, Dr. Theodorson has been practicing grafting plant materials—although he thinks he may ask a Penn State pomologist in the College of Agriculture to look over his shoulder to insure success. He also plans to donate a cutting to the University in the name of Alex, his wife, and two daughters. Although they once tried to destroy the apple, the Soviets now think so highly of it that they have sent Simirenkos as a treat to their cosmonauts in space.

Dr. Theodorson hopes that establishing the apple as a new variety will help keep Alex Simirenko's memory alive. In a piece he helped prepare for a publication of the American Sociological Association, he wrote: "Alex made fiercely loyal friends. . . friends never felt embarrassed to say that they loved this gem of a human being."

Penn Staters

Dr. Parris Chang, professor of political science, was invited to testify last week before the Senate Foreign Relations Committee. He discussed the serious external and domestic problems facing Taiwan.

Provost Edward D. Eddy has been appointed to the first Editorial Advisory Board of the newly expanded and revised *Educational Record*, the monthly journal of higher education published by the American Council on Education. Dr. Eddy has also been asked by Pennsylvania's Secretary of Education, Dr. Robert Scanlon, to serve as a member of the Advisory Committee to the Pennsylvania Enrollment Planning Project. The Project will attempt to gather projections for all Pennsylvania colleges and universities over the next decade and to analyze the likely effects of changes in demand on different types of institutions within various geographic regions.

Dr. George T. Harrell, founding provost and dean of Hershey Medical Center and the College of Medicine, was awarded an honorary Doctor of Science degree by the University of Florida College of Medicine at the 20th anniversary reunion of its first graduating class on March 7. Dr. Harrell also was the founding dean at Florida's College of Medicine — the first administrator in the United States to design and develop two medical schools from the ground up.

Dr. Barbara J. Garrison, assistant professor of chemistry, and Dr. Stephen G. Simpson, assistant professor of mathematics, are among the 78 outstanding young scientists from 45 universities in the United States and Canada selected to receive Sloan Foundation Fellowships for basic research this year.

According to the Foundation, the fellowships are designed to permit added freedom and flexibility for the most creative young researchers. The awards are among the most prestigious grants of their type.

A theorist, Dr. Garrison focuses in her research program on new approaches needed to understand chemical bonding and the structure of atoms and molecules as they interact with metal surfaces. The research has potential applications in the development and enhancement of industrial catalysts.

Dr. Garrison, who joined the Penn State faculty last year, also recently received a special grant for outstanding young faculty members from the Camille and Henry Dreyfus Foundation. She served previously as a visiting assistant professor of chemistry and postdoctoral assistant at Purdue University. She also served as a lecturer in chemistry at the University of California, Berkeley, where she earned her doctoral degree in 1975.

Dr. Simpson focuses on foundations and logic in his research program. He is currently on leave at the University of Connecticut as a visiting professor.

He joined the Penn State faculty in 1975 after serving as a lecturer for a year at Oxford University, England. Previously, he was a lecturer at UC-Berkeley and J. Willard Gibbs Instructor at Yale University.

Dr. Simpson earned his doctoral degree at the Massachusetts Institute of Technology in 1971 and B.A. and M.S. degrees at Lehigh University.

His research is supported by grants from the National Science Foundation.

Several colored pencil drawings by Richard Alden, assistant professor of architecture, have been accepted for display at the Uptown Gallery in New York City and the Holman Gallery of Trenton State College, as part of the Trenton National Print Exhibition 1980.

Dr. Joseph Jordan, professor of chemistry, was honored recently for 25 years of service to the University.

Since joining the Penn State faculty in 1954, he has directed the research of 60 doctoral and postdoctoral students, about two dozen of whom now hold faculty positions at various universities. He is the author or co-author of more than 120 research publications and has established himself as an internationally recognized pioneer in two important branches of analytical chemistry, enthalpic analysis and bioelectrochemistry.

In 1978 he was honored for the broad range and high quality of his contributions as a teacher and researcher with the Benedetti-Pichler Award of the American Microchemical Society.

Most recently, he has demonstrated his characteristic pioneering spirit by beginning a comprehensive research program on resource development in the analytical chemistry of sulfur compounds for coal conversion and coal-based technologies and by his involvement in a new interdisciplinary project on the electrochemistry of photovoltaic cells for solar energy research.

Active as a scientific ambassador, he has established and fostered exchange programs in electrochemistry between the University of Strasbourg in France and Penn State's Chemistry Department. He has also been active on the international scene as chairman of the Commission on Electrochemistry of the International Union of Pure and Applied Chemistry (IUPAC).

He has held visiting professorships and endowed lectureships at the University of California, Berkeley; Cornell University; Wayne State University; Hebrew University, Israel; the Swiss Federal Institute of Technology; and the University of Paris, France, where he was a Fulbright Lecturer.

In 1973 he was co-chairman of the first Japanese American Seminar on Non-Aqueous Electrochemistry in Tokyo. He is a member of the Committee on Symbols, Units and Terminology of the National Research Council and of the Evaluation Panels for the U.S.-Israel Binational Science Foundation.

In addition, he is currently a member of the editorial board of the journal, *Analytical Letters*, and editor-in-chief of the monograph series, "Treatise in Titrimetry." Previously, he served on the editorial boards of *Analytical Chemistry* and *Talanta*.

A native of Rumania, Dr. Jordan spent his student days in Israel, where he earned his doctoral degree at the Hebrew University of Jerusalem. He came to the U.S. in 1950 as a research fellow at Harvard University and later served at the University of Minnesota before joining the Penn State faculty in 1954.

In recognition of his tireless efforts in behalf of the community, Robert E. Dawson, director of the Worthington Scranton Campus from 1958 until his retirement in 1971, has been named as the recipient of the 1980 Americanism Award by Amos Lodge No. 136 of the B'nai B'rith. Recipients of this honor are selected by representatives of the Scranton Chamber of Commerce, Junior Chamber of Commerce, Kiwanis Club, Lions, Rotary, the Amos Lodge, and past award recipients.

Dr. Paul W. Todd, professor of biophysics, has been named a member of the editorial board of *Cytometry*, the new journal of the Society for Analytical Cytology.

Albert J. Miller, associate librarian at New Kensington, has been appointed to the Library-College editorial and advisory board.

Retirements

Charles Shilke, manager of the University Park Airport, has retired after nearly 17 years of service to the University.

Since he took over management of the airport in 1962, it has expanded from a small training and research facility to an important commercial flight center.

Mr. Shilke came to Penn State from Sioux Falls, S.D., where he had been vice president and general manager of an aviation firm. A native of Frederick, MD, Mr. Shilke was a U.S. Air Force pilot during World War II, serving in the European Theatre where he was awarded the Distinguished Service Cross and the Air Medal with eight clusters. He retired from the Air Force Reserve with rank of lieutenant colonel.

You could say that Emma A. Kline was "fingered" for her job!

Ms. Kline, a baker, utility, with Housing and Food Services, retired Feb. 23, but when she started her Penn State service in 1964 she was hired for the University's newly established vending service.

"There were two young men already working in the operation," she recalls, "but their fingers weren't small or nimble enough to do the wrapping of items for the machines so I was hired."

After four years in vending, Ms. Kline was transferred to the bakery, where she turned out thousands of pies, cookies, donuts, and the like, as well as prepared "tons" of icings and frostings.

Her husband, Clarence, retired as a cook at Redbird Dining Hall two years ago. One of the couple's sons, Larry Keith, received a master's degree in nuclear engineering from Penn State in 1964, and a second son, Kevin Brian, earned his B.S. at the University last year.

Violet E. Rader, an environmental health worker at Hershey since July 26, 1974, retired Feb. 22.

Emmett G. Mesarik, a store room clerk at Hershey, retired Feb. 2. He joined the staff July 2, 1973.

Obituaries

Dr. Paul J. Glantz, professor emeritus of veterinary science, died March 4 at the age of 59. Recognized for his research on identifying unknown disease-producing bacteria in the intestines of newborn calves and pigs, Dr. Glantz served on the faculty from 1944 to 1979.

A Pittsburgh native who became totally deaf at age 16 due to meningitis, he graduated from the DePaul Institute for the Deaf and Langley High School and, in 1943, received a B.S. in bacteriology from the University of Pittsburgh.

He became an instructor in the Department of Veterinary Science in 1948, after receiving his M.S. in bacteriology from the University. He got his Ph.D. from Penn State in 1958. Dr. Glantz established and maintained an *E. coli* Reference Center at Penn State, the only such center for animals in the country.

Dr. Earl E. Edgar, from 1961 to 1967 professor of education at Penn State, died Feb. 24 at the age of 66. At his death, he was vice president of academic affairs at Youngstown State University.

Robert F. Hoover, an engineering aide with the Applied Research Laboratory, died March 6 at the age of 46. Mr. Hoover earned an associate degree in electrical technology at Penn State in 1955 and joined the staff of ARL in 1961.

Jack F. Schinagl, who headed the department of Agricultural Communications for more than 15 years, died March 4. Mr. Schinagl, who was 65, held B.S. and M.S. degrees from the University of Wisconsin. He retired from the staff in 1974.

Dorothy G. Smith, a secretary in the College of Agriculture from 1949 to 1964, died Feb. 14 at the age of 78.

Joseph E. Peters, a foreman, Service Desk dispatcher with the Office of Physical Plant, died Feb. 24. Born Nov. 13, 1915, West Decatur, PA, Mr. Peters joined Penn State's staff in 1970 as a janitorial foreman and was promoted in 1978.

Nevin L. Bailey, a janitorial foreman with the Office of Physical Plant at his retirement last year, died March 1. He was 63 years of age. Born in Spring Mills, PA, Mr. Bailey began work at Penn State in 1962 and was promoted in 1969.

Charles E. Reeder, who joined the University's staff in 1941 and retired as a painter group leader in 1968, died Feb. 16. A native of Tyone, he was 75.

Elsewhere in Academe

Tuition rates to rise

Tuition rates will rise sharply at both public and private colleges and universities across the nation next fall.

In the Commonwealth, a 16 percent increase in student fees has been ordered at the 13 state colleges and Indiana University. Undergraduates will pay \$1,100 a year instead of the \$950 fee which was set in 1978.

Both Kentucky and Texas are considering recommendations for increased tuition rates in public colleges and universities. In California, where a June referendum could produce a 50 percent reduction in state personal income taxes, students at University of California branch campuses may find an added \$1,600 tuition charge on their bills. Currently, they pay about \$750 a year in fees.

Among private universities announcing tuition increases, M.I.T. will hike its tuition 17 percent (to \$6,200); Stanford has announced a 12.3 percent increase (to \$6,285); and Harvard will charge \$6,000, an increase of 13.2 percent.

IUP requests status change

The Board of Trustees of Indiana University of Pennsylvania voted last month to explore ways for the school to become "a separate and distinct university." The decision was motivated by IUP's belief that its share of the funds allocated to the state college and university system is too small.

For 1980-81, the State is proposing to give IUP 12.9 percent of the system's allocation. IUP says it will exceed 17 percent of the students in the system and needs more revenues. It notes, for example, that the total maintenance budget for the campus is only \$300,000.

In a statement sent to top state officials, IUP president, Dr. John E. Worthen, said "IUP has developed . . . toward a broad-based university with a mission which lies between that of the large research-oriented state-related universities and the smaller state-owned colleges."

Dr. Worthen said that the school, which plans to hold its enrollment to about 12,000 students, will continue to emphasize sound liberal arts education and develop cooperative programs with professional schools. IUP would enter "research areas" only when the University "can provide an important service to the Commonwealth"; Dr. Worthen mentioned coal research as such an area.

University Park Calendar

March 13-23 Special Events

Thursday, March 13
Sports: fencing (men), NCAA Championships, through March 15.
Jazz Festival, Travia, noon, HUB Assembly Hall, Barry Miller/Eric Kloss and Waterland Quartet, 8 p.m., Schwab.
CSA videotape, "Best of Johnny Carson," 1 p.m., Kern Lobby.
HUB 25th Anniversary Celebration Dinner, 4:45-6:45 p.m., HUB Terrace Room.
HUB Craft Center, Open House, 7:30-9:30 p.m., Room 312 HUB.
HUB 25th Anniversary Celebration, on the Waterfront, 2:30-7 and 9:30 p.m., HUB Assembly Room. Free.
CSA workshop, Lissie Martoff on "What's Your Racquet?—How to Select and Maintain," 7:30 p.m., Room 101 Kern.
Forest Products Research Society Lecture, 8 p.m., Room 304 Forest Research Lab. John Meyer, Syracuse Univ., on "Commercial Application of Wood-Plastics."

Friday, March 14
Sports: swimming and diving (men), NCAA Qualifying Diving Meet, through March 15.
Jazz Festival, Arthur Goldstein Trio, noon, HUB Main Lounge; Appalachian Swing Quartet and Quintessence, 8 p.m., Room 102 Kern.
STS/Three Cultures Dialogue on "Science/Technology for War or Peace," luncheon, noon; presentation, 12:20 p.m., Room 101 Kern. Geoffrey T. Wilson.
Materials Research Lab., on "Justification for Academic Participation in Weapons Research."
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Arthur Goldschmidt, history, on "The Contemporary Mid East: Problems and Prospects."

HUB 25th Anniversary Celebration Dinner, 4:45-6:45 p.m., HUB Terrace Room.
Commonsplace Theatre, *Jim Hendrix*, 7 and 9 p.m., Room 112 Kern.
Margaret Lecrone, violin, 8:30 p.m., Music Bldg. Recital Hall.
HUB 25th Anniversary Celebration Dance, Phi Mu Alpha Dance Band, 9 p.m., HUB Ballroom.

Saturday, March 15
Jazz Dance Workshop, 1 p.m., Walnut Bldg. France-Cinema, *Get Out Your Handkerchiefs*, 7 and 9 p.m., Room 112 Kern.
Sports: gymnastics (men) vs. LSU and (women) vs. Rutgers, both at 8 p.m.
* University Choir, *Berlioz, Requiem*, 8:30 p.m., Eisenhower Auditorium.

Sunday, March 16
Free University, course registration, 11 a.m.-3 p.m., Robeson Cultural Center.
University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Derald Stump, Episcopal Student Assn., speaker.
Sports: bowling (men) vs. Villanova, 1 p.m. Annette Terogrosa, cello, 3:30 p.m., Music Bldg. Recital Hall.
Commonsplace Theatre, *Jim Hendrix*, 7 and 9 p.m., Room 112 Kern.
* HPER week guest speaker, Vera Komarkova, American Women's 1980 Climbing Expedition to Dhaulagiri I, Nepal, 8 p.m., Eisenhower.
Evening with the Arts, Hugh Ward, Irish folk-singer and folklorist; 8:30 p.m., HUB Ballroom.

Monday, March 17
Jazz Festival, Jerry Zolten and five Bombers, noon, HUB Main Lounge; films, "Liquid Jazz" and "New Orleans Jazz Museum," all day, HUB Assembly Hall; *The Danceband*, 8 p.m., HUB Ballroom.
Dr. Peter Winkler, SUNY-Stony Brook, "Jazz, Pop and Rock in the 70s," 3 p.m., Music Bldg. Recital Hall. Also March 19.
St. Patrick's Day Candlelight Dinner, 4:45-6:45 p.m., HUB Terrace Room.
Shakespeare film, *A Midsummer Night's Dream* (Hall/Rigg), 6:30 p.m., Room 101 Chambers France-Cinema, *Get Out Your Handkerchiefs*, 7 and 9 p.m., Room 112 Kern.
Volunteer Service Center orientation, 7 p.m., HUB Reading Room. Also March 18 and 19.
Color Slide Club meeting, 7:30 p.m., Room 189 Materials Research Lab.
GSA, St. Patrick's Day Social, Jim Corr and Friends, 8 p.m., Room 101 Kern.

This print was part of a Fritz Goro photo essay in the Aug. 23, 1937, issue of *Life* Magazine. European influences on *Life* will be discussed March 20 as one of six 1930 Photography Events. See story, page 7.

Tuesday, March 18
Jazz Festival, Phi Mu Alpha Band, noon, HUB Main Lounge; lecture, Peter Winkler, music, on "History of Jazz," 2 p.m., HUB Main Lounge; Penn State Jazz Blue Band and State College High School Jazz Band, 8 p.m., HUB Ballroom.
Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Paul West, English, reads from his new novel *The Very Rich Hours* of Count von Stauffenberg.
School of Music Common Hour, 4 p.m., Music Bldg. Recital Hall.
Shakespeare film, *A Midsummer Night's Dream* (Hall/Rigg), 6:30 p.m., Room 112 Chambers.
Comp. Lit. Film Series, *Tacchella, Blue Country*, 7 and 9 p.m., Room 112 Kern.

Wednesday, March 19
Late registration deadline.
Add deadline.
Jazz Festival, films, "Liquid Jazz" and "New Orleans Jazz Museum," all day, HUB Assembly Hall; Paul Pute and Ed McGuire, 8 p.m., HUB North Lounge.
Campus Colleagues meeting, 4:30-6:30 p.m., PSU Women Coaches Panel, Assembly Room, Nittany Lion Inn.
Sports: volleyball (men) vs. Pittsburgh, 7 p.m.
* IAHS, History of Photography Lecture, 8 p.m., Room 101 Kern. J. McElroy, Univ. of Arizona, on "Early Photography in Peru."
Shakespeare film, *Richard II* (BBC), 8 p.m., Room 304 Boucke.
* Alard String Quartet, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, March 20
Penn State Annual Invitational Film Festival, Rooms 102 and 112 Kern, through March 22.
Jazz Festival, Michael Dennis, jazz guitar, noon, HUB Assembly Hall; Tarnished Six, 8 p.m., HUB Ballroom.
Phi Delta Kappa Initiation, 5 p.m., Room 112 Kern. Banquet, 6 p.m., Nittany Lion Inn.
* IAHS, History of Photography Lecture, 8 p.m., Room 101 Kern. Zoe Smith-Stetensko, Univ. of Tulsa, on "The Style of Life: The Influence of European Photographers and Picture Editors on Life Magazine."

Friday, March 21
Board of Trustees meeting, Capitol Campus.
Deadline to sign up for Spring Term Group Health Insurance for graduate students, Room 305 Kern.
Sports: gymnastics (women), EIAIW Championships, through March 22.
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. E. Willard Miller, assoc. dean, E & MS, speaker.
Commonsplace Theatre, *The Harder They Come*, 7 and 9 p.m., Room 112 Kern.
Jazz Festival, Bravura/Sonny Fortune, 8 p.m., Eisenhower Auditorium.

Saturday, March 22
Board of Trustees meeting, Capitol Campus.
France-Cinema, *Autumn Sonata*, 7 and 9 p.m., Room 112 Kern.
Sports: volleyball (men) vs. Ohio State, 7 p.m. GSA Cabaret, 8 p.m., Room 102 Kern.
Alliance Francaise Scholarship Benefit Concert, 8:30 p.m., Music Bldg. Recital Hall. Phyllis Triolo and others, French Chamber Music.

Evening with the Arts, Will Stutts, one man show depicting Mark Twain and Edgar Allen Poe, 8:30 p.m., Schwab.

Sunday, March 23
Pan-Hell, Women's Awareness Week, through March 29.
University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. James Martin, psychology, PSU, speaker.
Zoe Pappas, cello, 3:30 p.m., Music Bldg. Recital Hall.
Commonplace Theatre, *The Harder They Come*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, March 13
Chemistry, Koji Nakanishi, Columbia Univ., on "Biorganic Studies of Visual Pigments," 12:45 p.m., Room 333 Whitmore.
Physics, E. Merzbacher, Univ. of North Carolina, on "Quantum Physics of Damping," 3:30 p.m., Room 445 Davey.
Meteorology, Leif Kristensen, Riso National Laboratory, Denmark, on "Special Coherence in the Atmosphere," 3:55 p.m., Room 112 Walker.
Acoustics, William R. Savage on "Comments on Musical Acoustics Research at the University of Iowa," 7:30 p.m., Room 303 Keller.

Friday, March 14
Philosophy, Dominique Janicaud, Univ. of Nice, on "Is Hegel a Master Thinker? Hegel's Conception of Domination and Mastery," 4 p.m., Room 225 HUB.

Tuesday, March 18
Plant Pathology, Kenneth F. Baker, USDA-Ornamental Plants Research Lab., Corvallis, Oregon, on "Historical Perspectives on Seed Pathology," 9:45 a.m., Room 213 Buckhout.
Chemistry, L. Wagner, on "Photochemistry of Carbonyl Complexes of Man and Re," 12:45 p.m., Room 333 Whitmore.
Mathematics, David Salzman, Yale Univ., on "Generic Galois Extensions," 4 p.m., Room 103 McAllister.
Chemistry, Engelbert Ciganek, DuPont, on "Some Aspects of the Intramolecular Diels-Alder Reaction," 8 p.m., Room 333 Whitmore.

Thursday, March 20
Chemistry, Paul R. Schimmel, MIT, on "Recognition of t-RNAs," 12:45 p.m., Room 333 Whitmore.
Economics, Susan Rose-Ackerman, Yale Univ., on "Risk-Taking and Re-election: Does Federalism Promote Innovation?," 2 p.m., Room 124 Sparks.
Anthropology, Peter Cavanagh, on "From Gorillas to Marathon Runners: A Biochemical Approach to Primate Locomotion," 3:30 p.m., Room 107 Carpenter.
Physics, Joseph Sucher, Univ. of Maryland, on "Is There a Strong Van Der Waals Force Between Hadrons?," 3:50 p.m., Room 445 Davey.
Meteorology, Alan Davenport, Univ. of Western Ontario, on "The Mechanisms of Structural Damage by Wind," 3:55 p.m., Room 112 Walker.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Engineering, J.H. Horlock, Univ. of Salford, on "Flow in Turbomachines—Physical Concepts and Some Methods of Calculations," 4 p.m., Room 105 Mech. Eng.
Mathematics, A.O.L. Atkin, Univ. of Illinois, on "A Monstrous Modular Computation," 4 p.m., Room 103 McAllister.
CSPD, Murray Levine, State Univ. of New York, Buffalo, on "The Adversary Model and Other Qualitative Approaches to Evaluation in Mental Health and Other Social Programs," 8 p.m., Room 5-209 Human Development.

Friday, March 21
Electrical Engineering, Mordehai Heiblum, IBM, Yorktown Heights, on "Edge-Mom: An Integrated Optical Device. Will It Make an Optical Transistor Possible?," 3:30 p.m., Room 329 EEE.
Aerospace Engineering, Robert Larguer, Office of National D'Etudes et de Recherches Aérospatiales (ONERA), France, on "Recent Research Work on Unsteady Flow in Turbomachines at ONERA," 4 p.m., Room 214 Hammond.

Exhibits

Chambers Gallery: Eleanor Drake-Lewis, experimental woodprints and stone sculpture by Fine Arts Students, through April 2.

HUB Galleries: * College of Arts and Architecture exhibit, "Original Drawings by Aldo Rossi, noted Italian Architect," through March 22; Master Works from the National Glass Conference, opens March 23. The Gallery. Festival for Special Children exhibit, through March 14; Bruce Johnson watercolors and prints, opens March 15. Browning Gallery. An Alliance of Central Pa. Members' exhibit, through March 29, Art Alley.

Kern Gallery: Beth J. Fogel, mapsaces, through March 21; Fredrick J. Tarr, drawings, through March 31; Nicholas Webb, ceramics, through March 28; Chen Chih Ming, ink drawings, opens March 22.

Museum of Art: Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager, through April 13; Aspects of representation after World War II—works from the permanent collection, through May 4; Chinese export porcelains from the collection of Dr. and Mrs. Harold L. Tonkin, through May 11.

Pattee Library: Drawings by Janice Becker, through March 21, East Corridor Gallery. Maura Fadden, paintings and drawings, through March 28. Lending Services Lobby. 50th Anniversary Exhibit, Archaeological Institute of America, March 14-18: "History of Photographs" week exhibit, 19th century books and other memorabilia, March 18-25. Rare Books Room.

Robeson Cultural Center: Francis Couch, paintings, through March 28.

Visual Arts Bldg. Zoller Gallery: Undergraduate Student Exhibit, through March 16; National Glass Conference Exhibit, opens March 23.

* Asterisk indicates event tied in with Penn State's 125th anniversary year.

The Joint Faculty/Administrative Commission to Review and Make Recommendations on University Policy Governing Promotion and Tenure (PS-23), established in October, 1977, has recently completed its study and has submitted its report to the President and the Chairman of the Senate. In turn, the report has been forwarded to the Senate Committee on Faculty Affairs and the Council of Academic Deans. The full text of the report is given below. It is important to keep in mind that the recommendations contained in the report will be broadly discussed and studied before any action is taken by either the Senate or the administration.

INTRODUCTION

Prior to issuing its preliminary report in August of 1979, the Commission reviewed voluminous literature on tenure and promotion, met a number of times in deliberation of the various issues, and received written viewpoints from a number of University constituencies. From those activities, the Commission formed certain general conclusions.

The persons who framed the tenure and promotion policies in PS-23 and its supporting guidelines are to be commended. Although PS-23 is not a perfect document, it is a significant achievement in that it created a tenure and promotion system which has worked. The primary problems with tenure and promotion at Penn State appear to be more in the implementation of PS-23 than in PS-23 itself. The continuing process of strengthening The Pennsylvania State University in all its missions and all its locations requires unending attention to the expectations of the University for each individual faculty member. The expectations should be designed to challenge continually every faculty member and every student to perform to the very limits of his or her individual intellectual capabilities.

PS-23 represents a multiple criteria tenure system which explicitly states that the criteria for promotion and tenure "must be applied in the light of the mission of the academic unit and the professional responsibilities carried by the faculty member." A major effort is necessary to confirm that individual faculty members are being evaluated in the context of "the professional responsibilities carried by the faculty member" rather than against any predetermined expectation that all faculty members are all things. Further, because the fact of implementation of PS-23 may differ markedly from the perception, it is important that the academic leadership of the University and the members of the various committees implementing PS-23 constantly reiterate the importance of measuring performance against responsibilities.

After the majority of the members of the Commission had agreed that a completely new tenure and promotion system was not necessary at this time, the Commission examined a number of issues and made ten "preliminary" recommendations to various constituencies in the University community.

The report of "preliminary recommendations" was reviewed in many places within The Pennsylvania State University. Many of the Commission members participated in a number of meetings with such groups as the Council of Academic Deans, Caucus of Commonwealth Campus Senates, the Faculty Affairs Committee of the University Faculty Senate, the Faculty Affairs Committee of the University Libraries, and others. In addition, the Commission received and reviewed written comments from several individuals.

The report following represents the modification of those "preliminary recommendations" based on the various inputs received to them. The Commission notes that not all suggestions from all groups are incorporated in these recommendations. Because the issues of tenure and promotion go to the core of any academic institution, it is not rational to expect unanimity in support of any process or any set of recommendations.

RECOMMENDATIONS

Three recommendations (1-3) are essentially "housekeeping" in nature.

Recommendation 1: In all cases where a candidate has professional responsibility in more than one unit, each unit shall provide evaluations to become a part of the dossier. The performance of these responsibilities is to be reviewed within the units as part of the regular review and decision process. Specially constituted committees are not necessary to accomplish these reviews.

Discussion: A significant number of the tenure-track faculty have professional responsibilities to a department or unit other than the one in which they are primarily assigned. In such cases, there is a risk that the tenure and promotion evaluation process may not pick up the point of view of the "minority"

FINAL REPORT

of the Joint Faculty/Administrative Commission to Review and Make Recommendations on University Policy Governing Promotion and Tenure (PS-23)

function. While the dossier instructions address this problem, neither PS-23 nor the revised administrative guidelines for the promotion and tenure review process speak to this issue.

Recommendation 2: Section III of PS-23 should be modified to require staggered terms on all promotion and tenure review committees at all levels in order to assure continuity in the process.

Discussion: The composition of the University-level promotion and tenure committee requires staggered terms to assure a degree of continuity in the membership of that committee. PS-23 does not impose such a requirement on the other review committees at the department, campus, or college levels. There is some suggestion that there may be serious discontinuities in the methods, values, and philosophies of the peer committees from one year to the next. Although the mechanics of PS-23 are generally regarded as complicated and cumbersome, if further specificity on the makeup of a committee will help guard against inconsistent decisions from one year to the next, such changes should be made.

Recommendation 3: Section III of PS-23, in the subsection which deals with department, campus, and program review levels, should be modified to guarantee that faculty at the Commonwealth Campuses are assured departmental review by the department committee and the department chairman even in those cases where the campus committee and the campus director made negative recommendations on tenure or promotion.

Discussion: As PS-23 is now written it is theoretically possible for a candidate for promotion or tenure to be denied review by the academic department if the campus committee and the director both make negative recommendations and if the dean of the college and the dean of Academic Instruction for Commonwealth Campuses choose not to forward the dossier. The Commission has been assured that such a circumstance has never occurred and, by inference, would not be permitted to occur in the future. However, the Commission feels it is best to make explicit changes in PS-23 so that a faculty member at a Commonwealth Campus is guaranteed campus and departmental review. The Commission recognizes that the current process may slightly increase the paperwork burden in PS-23 but the Commission believes that the importance of departmental review is such as to override that inconvenience.

Two of the recommendations (4-5) seek to clarify the responsibility of review committees and of deans.

Recommendation 4: To clarify ambiguities in PS-23 relating to the responsibilities of the various review levels, the following sentence should be added in Section III: "It is incumbent upon each level of review to exercise careful professional judgment of the accomplishments, productivity, and potential of each candidate."

Discussion: Some degree of uncertainty exists in the University community as to whether tenure and promotion review committees above the department (or campus) level have the authority to pass judgment on the academic merits of the candidate. Part of this uncertainty comes about because of inconsistencies within PS-23. Another part of the uncertainty appears to trace back to different opinions as to the appropriate authority of the committees as expressed in the long debate prior to the writing of PS-23.

The preamble to PS-23 states, "within the procedures for granting or denying tenure and promotion, the presumption is that

recommendations based on the professional expertise and competence of the faculty will usually be heeded." One could assume that the department or campus committee is in the best position to judge the "professional expertise and competence" of an individual. However, upon reflection, it is clear that rigid insistence on the inviolability of the recommendation at the committee level invalidates the entire review process.

Perhaps in recognition of the dynamic tension inherent in PS-23, the Preamble goes on to say:

"The promotion and tenure procedures consist of several levels of judgment and review: the department (or comparable academic unit); the Commonwealth Campus; the college or University Libraries; and the University. The initial

review will usually take place at the level of the department (or campus, as appropriate) and will focus on professional and scholarly judgments of the quality of the individual's academic work. Subsequently, review will bring broader faculty and administrative judgment to bear and will also monitor general standards of quality, equity and adequacy of the procedures used. At each level the review process will reflect the competence and perspective of the reviewing body."

These words seem to make it clear that all levels of review have a responsibility to make a judgment based on quality, equity, and adequacy. Some degree of ambiguity in PS-23 is probably necessary to sustain the delicately balanced structure represented in the tenure and promotion process. Given the multiple missions, locations, and faculty constituencies of The Pennsylvania State University, some room for interpretation should be accommodated by the process. This recommendation, while not entirely removing ambiguity, is intended to make explicit that all levels of the review process have a responsibility for quality judgment.

Recommendation 5: In all cases where a dean makes a negative tenure or promotion decision and where all recommendations prior to the dean's level have been positive, that dean is required to meet with the college committee and state his or her reasons. The intent is to require full and candid discussion when such divergent recommendations occur.

Discussion: At the present time, PS-23 allows a negative decision by a dean to override all positive recommendations to that point and, in effect, to deny promotion or tenure. In June of 1978, the University Faculty Senate recommended changing this policy so that a dean would not have the authority to deny tenure in contradiction of positive recommendations preceding the dean's decision.

The Commission considered this issue at some length. The "veto" by a single individual does, to some extent, contradict the traditional collegiality of institutions of higher education. However, the American higher education community also typically considers the dean to be the spokesman for, and critical defender of, academic quality and integrity. In a very real sense, the president of the University has, and must have, that "veto" power by one individual; certainly the argument can be made that the dean is closer to and more knowledgeable about the qualifications of a particular candidate than the president of any major university is likely to be.

Therefore, the Commission concluded that the "veto" power should remain with the dean. Although no evidence was presented to the Commission that deans have capriciously exercised this authority, the recommendation explicitly requires the dean who does "veto" a candidate to meet with the college committee to explain, and by inference defend, his or her reasons.

Five of the recommendations (6-10) deal with substantive or technical matters relating to tenure and promotion. The first in this group deals with the definition of the mission of The Pennsylvania State University. Another describes a process for improving the evaluation of teaching as a factor in tenure and promotion. Two of these recommendations relate to refinement of the criteria for promotion and tenure at all levels and the responsibility for editorial review of PS-23. The final recommendation proposes the development of principles and procedures for position elimination for compelling reasons.

Recommendation 6: In PS-23, under General University Criteria, the following changes should be made:

"Promotion and tenure decisions shall be based on the following criteria, which must be applied in light of the mission of the academic unit and the professional responsibilities carried by the faculty member. The criteria have purposely been made general in the expectation that each academic unit may further define and elaborate them on the basis of documented primary faculty assignment. In a University where the discovery and synthesis of knowledge, as well as the transfer, communication, and application of knowledge are its raison d'être, the criteria of

research, scholarship, teaching, and service are critically important.

1. Teaching ability and effectiveness — ability to convey subject matter to students; demonstrated competence in teaching and capacity for growth and improvement; ability to maintain academic standards; and to stimulate the interests of students in the field; effectiveness of counseling, advising, and service to students.

2. Research competence — ability, usually demonstrated through publication and creative work, to carry out research of high quality and scholarly significance, including contributions to the arts, and the ability to train students in research methods and practice.

3. Scholarship and mastery of subject matter — evidence of thorough understanding of the field; maintenance of high levels of academic performance; recognized reputation in the subject matter field; evidence of continued professional growth.

4. Professional service to the University and the public — evidence of participation in the University, college, departmental, and unit affairs; competence in extending specialized knowledge to the University and to the public including professional practice and consulting; active contribution to professional organizations. Promotion and tenure decisions are separate decisions, although these general criteria apply to both promotion and tenure. Promotion shall be based on recognized performance and achievement in each of the several areas, weighted as appropriate to the particular responsibilities assigned to the faculty member. Tenure shall be based on the long-run potential for future advancement in the several directions enumerated above as indicated by performance during the provisional period, weighted as appropriate to each department (see also Section IV.5.).

Discussion: The effectiveness of the tenure and promotion process revolves around the criteria on which the decision is made. Four general criteria are established in PS-23: fundamental, currently they are teaching ability and effectiveness, research competence, scholarship and mastery of subject matter, and service to the University and the public.

The Commission feels that a statement such as the one italicized in the recommendation is needed to establish a mission framework for the fundamental tenets of the system. The recommendation makes some adjustments in the descriptions of the criteria. Finally, the last criteria is clarified to delimit itself to "professional" service and is specifically drawn to include consulting and professional practice. The criteria in PS-23 are not weighted in any way but instead they "have purposely been made general in the expectation that each academic unit may further define and elaborate them on the basis of documented primary faculty assignment." The Commission does not propose a University-wide weighting of the criteria and cautions against excessive skewing of the criteria at the unit level. The inescapable difference in professional judgment among competent persons makes any effort at precise weighting of the criteria an exercise in futility.

Recommendation 7: In order that PS-23 include clear statements of the appropriate procedures for evaluating teaching effectiveness for promotion and tenure, it is recommended that PS-23 and the administrative guidelines be modified to incorporate the following principles and procedures:

(A) Evaluation of teaching effectiveness for purposes of promotion and tenure shall include both peer and student evaluation.

(B) The method of evaluation to be used within a unit shall be selected by the faculty of that unit. In the case of the college, unit is defined to mean the department or the entire college if the departments of the college all choose to use the same evaluative procedures; for the University Libraries, the unit is defined as the University Libraries. It is the responsibility of the unit to provide clear, documented evidence of a candidate's teaching effectiveness, including both peer and student evaluation. The evaluation procedure specified by each unit must be applied by the appropriate deans, by the dean of Academic Instruction for Commonwealth Campuses for those faculty assigned to any of the Commonwealth Campuses; the procedure must also be approved by the provost. It is the intent of this recommendation to encourage each unit to develop different evaluation methods

as appropriate for major subgroups of the faculty, the methods chosen shall be appropriate to the discipline and to the type and level of teaching involved.

- (C) If a unit chooses to use in-class student surveys, they must be designed by or selected by the faculty of that unit for evaluating teaching effectiveness for purposes of promotion and tenure. The process must be managed so that the candidate is not in a position to influence the judgment and interpretation of the survey results. Such surveys shall belong to the unit which administers them and shall be summarized and interpreted as part of the promotion and tenure documentation. The results of the surveys shall be made known to the candidate.

- (D) Because earlier legislation creates confusion in the area of evaluation of teaching, the University Faculty Senate should repeal all previous legislation concerning evaluation of teaching as it applies to promotion and tenure processes.

- (E) The Provost's Office shall act to facilitate the exchange of methods and ideas among the various units of The Pennsylvania State University.

Discussion: Candidate evaluation is the core issue in the application of the promotion and tenure process. While not all faculty are significantly involved in teaching, a high proportion of the total faculty of the University have substantial responsibilities as teachers. The evaluation of teaching effectiveness is one of the most difficult issues in American higher education.

The University Faculty Senate, with all good intentions, has taken a variety of legislative actions regarding teaching evaluation over the years. The net result of these actions is to confuse the distinction between teaching evaluation aimed at improving teaching effectiveness and teaching evaluation as a judgment factor in the promotion and tenure process. With the best intentions imaginable, it is not currently possible to be in compliance with all the Senate legislation and with the intent of PS-23.

Although the available evidence on methods of evaluating teaching is contradictory, it is reasonably clear that both peer and student evaluations are necessary to provide a balanced perspective. While student evaluation, for whatever purpose, is reasonably well established at Penn State, peer evaluation of teaching is extremely sensitive. However, a form of peer evaluation functions in the area of research and scholarship and can be developed in the area of evaluation of teaching effectiveness.

Because the nature of teaching and its purposes vary in a specific detail from department to department, the recommendation insists on the department's right to develop a teaching effectiveness assessment methodology appropriate to it. Realistically, more than one department, conceivably all departments, within a college may use the same method when the purposes are similar and the nature of the instruction is highly correlated.

The Commission is completely aware of the extreme difficulty of fair and equitable evaluation of teaching effectiveness. Inexpensively, however, that evaluation must be accomplished if PS-23 is to be a legitimate exercise of University responsibility for those faculty who devote a significant part of their effort to instruction.

Recommendation 8: The Promotion and Tenure Review Commission, in consultation with the Provost's Office and the Faculty Affairs Committee of the University Faculty Senate, will be responsible for monitoring on a continuous basis the ongoing process of tenure and promotion review under PS-23. As a first step in the continuing monitoring of the review process, the Promotion and Tenure Review Commission, in consultation with the Provost's Office and the Faculty Affairs Committee, will review all existing tenure and promotion criteria of all units at all locations in order to become familiar with the current state of those criteria. Following that review, the Commission will prepare guidelines on expectations for new criteria for promotion and tenure for the colleges, departments, campuses, and University Libraries. In addition to the guidelines, the Commission will also prepare "model" criteria for each of the four major divisions listed previously. When the Commission has completed these tasks, the provost will require that the colleges, departments, campuses, and University Libraries review existing criteria and present revised versions as necessary under the guidelines.

Discussion: PS-23 emphasizes the importance of common expectations and understandings" with the tenure and promotion policy. Further, it says that "each academic unit may develop its own specific expectations and standards as the operational basis for tenure and promotion recommendations." What happened, apparently, is that the criteria at the University level, the college level, the department level, and the campus level were developed more or less simultaneously. There was no generally known or accepted format or content statement for the criteria at the several levels. The result is that the criteria statements range from overly explicit to non-existent. In addition, the criteria of the department and of the particular Commonwealth Campus may be different and, to some extent, work to the detriment of the faculty member in that department at that particular Commonwealth Campus. It would seem that PS-23 and its implementing apparatus have been in place long enough so that greater consistency could be achieved without violating the unique responsibilities and assignments by function and by location.

Recommendation 9: The Promotion and Tenure Review Commission, in consultation with the Provost's Office and the Faculty Affairs Committee of the University Faculty Senate, shall be responsible for editing, as necessary, PS-23 so as to incorporate into that policy the approved recommendations in this report. Further, the Commission will incorporate the existing administrative guidelines for implementation of PS-23 into PS-23 itself to fullest extent possible.

Discussion: In the years since PS-23 was established as University policy, the administrative guidelines for implementation have been modified as experience has dictated. In the view of the Commission, the process of modification has continued long enough so that the bulk of the administrative guidelines could and should be incorporated into the policy. Clearly, such a task, together with the incorporation of the approved recommendations in this report must be done in the collegial spirit. Assignment of the responsibility for the task to the Promotion and Tenure Review Commission serves to provide the continuity so important to the equitable application of tenure and promotion processes.

Recommendation 10: The Promotion and Tenure Review Commission, in consultation with the Provost's Office and the Faculty Affairs Committee of the University Faculty Senate, shall recommend to the president principles for determining when tenure-track positions should be eliminated for reasons of financial exigency, changing program needs, changing priorities, or for other compelling reasons.

Discussion: In the course of its deliberations, the Commission considered the question of financial exigency and other reasons which might lead to the elimination of a tenured position. The Commission understands the critical distinction between elimination of a tenure-track position and termination of the appointment of a tenured faculty member. PS-23 currently provides some guidance related to financial exigency and similar problems. However, it was the view of the Commission that elimination of tenured positions for reasons of financial exigency, changing program needs, changing priorities, or for other compelling reasons should be the subject of principles and procedures independent of PS-23. This point of view was broadly supported in the discussions which occurred following publication of the "preliminary recommendations" of the Commission.

The development of principles for elimination of tenure-track positions for the reasons cited above will be an extremely important and most sensitive task. It is imperative that the principles developed be congruent with the existing planning and budgeting process of the University. It is vital that the principles not reduce unnecessarily the managerial authority and responsibility of the senior academic officers of the University. The principles must be definitive and specific enough so that the transfer of a vacant tenure-track position from one department to another is recognized as a different course of action from the complete abolition of a tenure-eligible position. These points are merely illustrative of the complex and subtle nature of the task of developing principles for the abolition of tenure-track positions for reasons of financial exigency, changing program needs, changing priorities, or for other compelling reasons.

The final recommendation from the Commission proposes a fundamental change in the tenure process at The Pennsylvania State University. This change would be applied to faculty appointed to tenure-eligible positions after the recommendation was approved and the

detailed policy developed. Further, it must be understood that the proposed "limited-term" tenure-eligible system would not in any way reduce the existing flexibility of the fixed-term no-tenure-eligible system.

Recommendation 11: The probationary years between the initial appointment to a tenure-eligible position and the end of the six-year probational period should consist of a series of limited-term tenure-eligible appointments with no appointment of a limited-term exceeding three years.

During the initial four years (which will consist of two or more limited-term appointments) of the probationary period, the evaluative process shall include both the traditional qualitative evaluation of the incumbent on the basis of teaching, research, scholarship, and service, and shall also include a separate, continuing evaluation of whether financial exigency, changing program needs, changing priorities, or other compelling reasons indicate that the position should be abolished.

If at any point during the initial four years of the probationary period the traditional qualitative evaluation is unfavorable to the candidate, the candidate shall be so advised and the appointment will automatically lapse at the end of the limited term for which it was made. If at any point during the initial four years of the probationary period the continuing evaluation of the need to continue the position indicates that the position should be abolished, the incumbent shall be so notified and the appointment will lapse at the end of the limited term for which it was made. In such cases, the incumbent is guaranteed twelve months' notice.

If the incumbent so chooses, the appropriate dean will provide a written statement that the position in question was abolished for reasons of financial exigency, changing program needs, changing priorities, or other compelling reasons not relating to the quality of the incumbent.

The traditional qualitative evaluation of incumbents during the initial four years of their probationary period shall be accomplished by the regular promotion and tenure review processes of the University. The separate, continuing evaluation of the need for the position during this time shall be the responsibility of the dean of the college, or the dean of University Libraries, or the dean of Academic Instruction for Commonwealth Campuses for faculty located at the Commonwealth Campuses; the dean or deans shall consult with the faculty in the program and with any other appropriate faculty group within the college or library. Recommendations from the deans, in consultation with their faculties, shall be reviewed by a special University committee to be jointly appointed by the University president and the chairman of the University Faculty Senate; no person shall serve on this committee while at the same time serving on the University-level promotion and tenure committee.

If the continuing evaluation of the need for the position throughout the initial four years of the probationary period indicates that the position is needed, the process shall continue and if the traditional qualitative evaluation of the incumbent has been satisfactory in that time period, the incumbent shall be offered a fixed three-year limited-term appointment during which the final tenure-granting decision will be made under the policies and procedures of PS-23. This procedure is intended to minimize, but not to eliminate, the possibility that fifth- and sixth-year tenure-eligible positions and tenured positions be collapsed due to financial exigency, changing program needs, or other compelling reasons.

Because the recommended limited-term tenure-eligible appointment system is totally different from the existing system for tenure-track appointments, the University regulations regarding standards of notification of reappointment or failure to reappoint need to be carefully reviewed and adjusted to conform to the limited-term tenure-eligible system. This review and necessary rewrite should be done by the Promotion and Tenure Review Commission in consultation with the Provost's Office and the Faculty Affairs Committee.

Discussion: This recommendation is intended to address two shortcomings of the University's tenure and promotion process. In the opinion of the Commission, the continuing appointment to a tenure-eligible position carries within it two major weaknesses: (1) too often the tenure reviews prior to the sixth year are perfunctory and fail either to provide appropriate guidance to a faculty member or to terminate an appointment at an earlier date, and (2) the "open-ended" appointment makes a negative decision necessary to terminate an individual even if the need to terminate does not necessarily reflect unsatisfactory performance, and in the event of litigation, places the University in a defensive position. The alternative proposal in this recommendation

requires early and regular evaluation and counseling of the faculty member. In addition, the decision not to offer another limited-term appointment is, in legal terms, a different position for the University.

The limited-term proposal also establishes a clear and understandable mechanism for judging the need for a position in terms of financial exigency, changing program needs, changing priorities, or other compelling reasons while avoiding the necessity to appear to terminate an individual for those reasons. Perhaps the distinction between abolishing a position and terminating a mechanism will be viewed in some circles as a word game, but the Commission believes that the difference is significant and substantive.

Finally, although not of overriding importance, the limited-term system places the tenure process of The Pennsylvania State University in a form followed by the majority of similar universities across the country.

Senate

(Continued from page 1)

May 1979 and January 1980, the Committee reviewed 294 petitions from students asking waivers or exceptions to student policies. It granted 273 of these.

The Committee also presented the following summary to inform senators on the procedure for reinstatement to degree candidacy:

"A student who has been dropped as a degree candidate from the University for unsatisfactory scholarship may petition the Committee on Admissions, Records, and Scheduling of the University Faculty Senate for reinstatement (see Section 54-82 of the Academic Policies and Procedures for Undergraduate Students). Students are notified when dropped that they must reduce their grade point deficiencies by at least one-half before applying for reinstatement. Some colleges require that all grade point deficiencies be eliminated. Petitions for reinstatement must be approved by the Dean of the College in which the candidate wishes to enroll. A subcommittee of the Committee on Admissions, Records, and Scheduling then reviews each petition and makes its recommendation."

A total of 125 petitions for reinstatement were reviewed by the Subcommittee during the period May 1, 1979, through Jan. 31, 1980. Of these, 119 were granted and 6 were denied.

Chairman Daryl Heasley of Curricular Affairs, in a brief report on BDR 11, noted that 10 of the 11 colleges have submitted programs and that the Committee expects no problems in meeting the 1981-82 undergraduate case deadline.

The Committee on Undergraduate Instruction offered a supplement to its 1978-79 Grade Distribution Report. The report showed the number of students on Dean's List Last Fall and the percentage of students graduating with distinction, both by college. The report will appear in a future issue of INTERCOM.

A report on the Penn State Scholars Program was presented by its director, Dr. Paul Axt. His presentation appears on page 1.

Progress on planning for the conversion of the present HUB Terrace Room to a bookstore and for new uses of space in the HUB was discussed by Vice President for Business Ralph E. Zilly and J.D. Miller, director of physical plant planning and new construction.

Editor's note: Below are several sections and charts from Penn State's 1980-81 Budget Presentation, delivered by President Oswald and other University officials yesterday (March 12) before the House Appropriations Committee.

A. The Financial Problem:

For 1980-81, the University is encouraged that the State administration has placed a high priority on higher education and that there is equity in the recommendations among the segments of higher education. Nevertheless, the recommended increase of 5.8 percent is well below the University's needs to meet inflated costs. Unless augmented by the General Assembly some increases in tuition rates beyond the projected 5 percent included in this budget request will be necessary.

Penn State is increasingly hard-pressed to cope with the rapidly escalating costs of operation. Some examples are:

• While the general rate of inflation currently exceeds 13 percent, many of the goods and services the University must purchase are increasing in cost at an even higher rate, e.g., fuel and utilities, library books and periodicals, and certain types of critically needed instruction and research equipment.

• Significant increases in retirement and group insurance costs are mandated by external agencies and are not under the University's control. The amount paid for retirement costs, primarily to the State Employees' Retirement System, has increased more than five-fold since 1970-71. In that year, total retirement costs were \$4.6 million. In 1979-80, Penn State will pay over \$24 million for retirement costs. Based on estimated rate changes by the State Employees' Retirement System, the University's mandated retirement contributions will increase by \$1.1 million in 1980-81.

• In 1970-71, Penn State's Social Security costs were \$5.5 million. For 1979-80, these costs have escalated to over \$12 million. Base and rate changes mandated by the new Social Security legislation will cost an additional \$1.0 million for 1980-81.

• While State appropriations have increased almost every year during this decade, the value of the appropriation in terms of purchasing power has declined significantly. Figure 1 shows the State appropriation per equivalent full-time student, in terms of current and constant 1972-73 dollars. This graph shows clearly that Penn State is operating with a per-student appropriation which, in "real dollars," has declined by over 19 percent over the last several years.

• To offset partially this decrease in purchasing power, substantial increases in tuition rates have been necessary, including an 8.5 percent increase for 1979-80. Currently the tuition rate is \$1,485 for undergraduate students at University Park is the second highest of all major public Land-Grant institutions — over 88 percent, or \$694, higher than the average tuition rate for 1979-80 at these comparable institutions.

• The University is concerned that each year a higher share of the inflated costs of education

Sections from the 1980-81 Budget Presentation

Prepared for the General Assembly

TABLE 1 SUMMARY OF PENN STATE'S 1980-81 APPROPRIATION REQUEST			
	General University Operations	College of Medicine	Total
A. 1979-80 Funding Levels:			
1. Total General Funds	\$218 338 000	\$26 255 000	\$244 593 000
2. State Appropriation (Included in Line 1)	\$117 222 000	\$ 2 896 000	\$120 118 000
B. Proposed 1980-81 Changes:			
3. Inflationary Cost Increases ^a	21 834 000	1 405 000	23 239 000
4. New Facilities — Maint. & Oper.	219 000	—	219 000
5. Total Expense Increases	22 053 000	1 405 000	23 458 000
6. Less Revenue Increases from Proposed 5% Tuition Rate Increase	(3 656 000)	—	(3 656 000)
7. Total Appropriation Increases Requested (Line 5 minus Line 6)	18 397 000	1 405 000	19 802 000
C. Total 1980-81 Appropriation Requested (Line 2 plus Line 7)	\$135 619 000	\$ 4 301 000	\$139 920 000
^a Includes salary adjustments and cost increases in staff benefits, fuel and utilities, academic equipment, library acquisitions, supplies and services, and major maintenance. Represents 10.0% of the 1979-80 General Funds Budget.			
Supplemental Line Item Appropriation Requested:			
Rural Medicine Program —	\$1 260 000		

falls upon the students and their families. Since 1972-73 tuition charges have risen sharply by 73.7 percent — higher than the 65.7 percent increase in the general rate of inflation and considerably higher than the 45.3 percent increase in State appropriations during the same period (see Figure 2).

B. Explanation of Requested Appropriation Increases:

In September, 1979, Penn State submitted an appropriation request to the State for 1980-81 in the amount of \$139,920,000. This request addresses only the most urgent financial needs of the University, and represents an overall increase in the University's General Funds budget of 10 percent for increased costs of operations — a conservative amount in light of a projected inflation rate in excess of 13 percent.

Table 1 shows the proposed income and expense increases contained in Penn State's 1980-81 Appropriation Request. The University is requesting an appropriation increase of \$19,802,000 over the 1979-80 appropriation level. Included are increases of \$18,397,000 for General University operations and \$1,405,000 for the College of Medicine. The total appropriation requested is \$139,920,000,

of which \$135,619,000 is requested for General University operations and \$4,301,000 is requested for Medical Education.

The University's proposed 1980-81 budget is based on the following general principles:

1. No significant changes in enrollment are anticipated over 1979-80. Enrollment for the 1979 Fall Term was at an all time high of 33,967 students enrolled in resident instruction courses. Penn State is now serving more students than at any time in its 125 years of service to the Commonwealth.
2. The emphasis of the proposed budget is placed on provisions to cope with the rapidly escalating rate of inflation, which affects the goods and services which the University must purchase. The budget seeks to provide for:
 - a. Essential salary adjustments for employees. Salary adjustments will conform with Federal Wage and Price Guidelines.
 - b. Requirements for mandated fringe benefits cost increases (primarily Social Security base and rate changes, and State Retirement rate changes).
 - c. Increases in the costs of operation, including supplies, services, fuel, and utilities.
 - d. Rapidly escalating costs of library books and materials and instruction

and research equipment.
e. Increased costs of critically needed maintenance of the University's physical facilities.

3. As indicated above, the proposed 1980-81 budget plan includes a request for a 10 percent increase in the University's General Funds Budget. On the income side, the plan includes an average 5 percent tuition rate increase for all students except Doctor of Medicine students, for whom tuition rates are already at the \$5,550 level. This budget plan at the University's requested level of appropriation recognizes the principle of the State and the student sharing educational costs. The plan further recognizes that in order to bring into better balance the contribution of the State with that of the student, the tuition rate increase should be proportionately less than the increase in State appropriations.
4. A small amount of additional funds is requested to cover the costs of operating and maintaining new or newly renovated facilities estimated to come on line in 1980-81. At University Park, additional funds will be required for the operation of several newly renovated buildings. Also, additional funds for fuel, utilities, and maintenance costs will be needed for new facilities at four Commonwealth Campuses.
5. The basic State appropriation support for medical education has not been increased since 1971-72. The costs of medical education have increased, however, in the same manner as the costs of other University operations. In the absence of increased appropriation support, the University has had to rely on substantial increases in tuition to offset partially the inflated operating costs. Tuition has increased by 455 percent since 1971-72 (from \$1,000 to \$5,550 per year). As a result, no tuition increase is proposed for medical students. The increase in basic support requested of the State represents the equivalent of approximately 5.1 percent annual increases over the nine-year period.
6. As in the past several years, no funds are requested for new programs. Any new program initiatives will be provided for by the University's continued program of internal resource reallocation, or from other outside sources.

Increases shown in Table 1 are for University General Funds operations. The General Funds budget supports the basic programs of teaching, research, and public service throughout the State. It is from this budget that the basic expenditures for faculty and staff salaries, supplies and equipment, and maintenance are made. Income is received almost entirely from State appropriations and student tuition charges. The University's total operating budget, of which the General Fund represents approximately 57 percent, includes several programs for which no State appropriation or tuition funds are used. These programs include sponsored research supported by Federal, State, and private grants and contracts, and such self-supporting activities as the Teaching Hospital and auxiliary enterprises (e.g., student housing and food services, intercollegiate athletics, and bookstores).

AND PERCENT SUPPORTED BY
STATE APPROPRIATION SINCE 1971-72

In addition to the basic support for medical education, the University has included in its budget request a proposal to develop further its important programs in rural medicine with the objective of (1) bringing the benefits of medical expertise to smaller communities through continuing education of physicians, (2) making available to rural physicians and patients the staff resources and facilities of a modern medical center, and (3) educating future doctors and other health practitioners. Over the past six years a number of important educational patient care programs designed to serve rural areas and smaller communities have been thoroughly tested on a highly selective, experimental basis with temporary funding. Permanent, continuing funding is essential to more fully develop, improve, and expand the programs if they are to realize their potential benefits to the medically underserved areas of the Commonwealth. The University respectfully requests a special line item appropriation of \$1,260,000 to be used

for support of the following eight rural medicine programs in the amounts shown:

1. M.D. Training in Family and Community Medicine, General Medicine, and General Pediatrics	5536,056
2. Practice of Medical Students with Rural Doctors	187,258
3. Pennsylvania Family Practice Residency Consortium of 15 Community Hospitals	15,000
4. Community Hospital Affiliations - 16 hospitals	135,000
5. Rural Health Clinic in Millersburg - pilot study	145,094
6. Cancer Programs in Rural Hospitals - 11 hospitals	78,155
7. New Born Intensive Care and Transport	86,024
8. Child Mental Health and Retardation in Rural Areas	77,413

History of Photography Events open March 19

The 1980 History of Photography Events, from March 19 through April 9, will feature five lectures by professors of photojournalism, art and art history from universities across the country.

In conjunction with these events, an exhibition, 19th Century Photographic Books and Other Memorabilia, has been arranged in the Rare Books Room by Charles W. Mann Jr., librarian for special collections at Pattee.

The first of the scheduled lectures "Early Photography in Peru," will be presented at 8 p.m. Wednesday, March 19, in Room 101 Kern Graduate Building.

The speaker will be Dr. Keith McElroy, assistant professor of art at the University of Arizona at Tucson. He will describe the impact of photography on the cultural and social life of 19th century Lima and its influence on the development of photography abroad. Dr. McElroy, who organized a major exhibition in Lima in 1975, has spent many years in Peru and has written numerous articles on photography and architecture.

"The Style of Life: The Influence of European Photographers and Picture Editors on Life Magazine" will be the subject of Zoe Smith-Nesterenko, instructor in communications at the University of Tulsa, at 8 p.m. Thursday, March 20, in Room 101 Kern.

The third lecture of the series, "Charles Piazzi Smyth: Photographer and

Iconoclast," will be presented by Larry Schaaf, assistant professor of journalism at the University of Texas at Austin, at 8 p.m. Wednesday, March 26, in Room 101 Kern. Mr. Schaaf, co-author of a book on Paul Martin entitled *Victorian Photographer*, has also studied the works of pioneer photographers Fox Talbot and Sir John Herschel.

A talk on the previously unpublished letters of Man Ray, photographer and painter of the Dadaist and Surrealist art movements, will be presented by Albert Charley at 8 p.m. Monday, March 31, in Room 101 Kern. The title of the talk by Mr. Charley, who is professor of art at Clarion State College, is "Man Ray: Last of the Red-Hot Dads."

Dr. Heinz Henisch will present the final lecture of the series, "Nineteenth Century Masters," at 8 p.m. Wednesday, April 9, in Room 101 Kern. Works by Julia Margaret Cameron, Nadar, Lewis Carroll and Napoleon Sacrony - four idiosyncratic photographers of the era - will provide the subject matter for his talk. Dr. Henisch, professor of the history of photography, is a Fellow of the Royal Photographic Society of Great Britain and editor of *History of Photography*, an international research quarterly.

The 1980 History of Photography Events are co-sponsored by the Institute for the Arts and Humanistic Studies and the School of Journalism.

News in brief

(Continued from page 1)

Association of College and Research Librarians.

Among the books selected are *The Song of Roland: An Analytical Edition* by Gerard J. Brault, professor of French, and *Hemingway's Hidden Craft* by Bernard Oldsey, a Penn State Ph.D. and former faculty member. The other selections from last year's Penn State Press list are *German Poetry in the Age of the Enlightenment* by Robert M. Browning and *Hawthorne's Lost Notebook, 1835-1841*, a facsimile edition edited by Barbara S. Mouffe and Hyatt H. Waggoner. The original Notebook, now in The Pierpont Morgan Library, was found by Ms. Mouffe in 1976 after having been missing for more than a century.

Alard concert March 19

The Alard String Quartet will present the fifth concert in a series marking its 25th

anniversary at 8:30 p.m. Wednesday, March 19, in the Music Building Recital Hall.

Opening the program will be William Byrd's "The Queen's Alman" from the Fitzwilliam Virginal Book. Originally written for keyboard, the piece has been arranged for strings by Denis Stevens, a former Distinguished Visiting Professor at the University.

Also on the program is George Rochberg's String Quartet No. 3, written in 1972. The composer teaches composition at Penn.

The program will close with Beethoven's Quartet in A Minor. Beethoven fell seriously ill while he was writing the quartet, and the mood of the composition reflects his progress during convalescence. The four-note motif in the introduction of the quartet is the theme upon which three of the late quartets and the "Grosse Fuge" are based.

Violinists Joanne Zagst Feldman and Donald Hopkins, violist Raymond Page and cellist Leonard Feldman compose the Alard String Quartet.

SCIENTISTS FROM CHINA are studying, teaching and doing research with faculty in the College of Earth and Mineral Sciences. Talking with Charles Hostler, dean of the College, they are, from left: Ta-Lin Chang, a graduate student in meteorology; Yao Xi, a visiting scientist at the Materials Research Laboratory, and lecturer in the electronic engineering department of Xian Jiaotong University; Jia Xiang Zhao, a visiting research associate in fuel science, and vice director of the non-metallic department at Beijing University; Jinchu Zhu, a visiting research associate in geosciences and lecturer in geology at Nanjing University; Chiu-Shih Chen, an assistant professor of meteorology here and professor at Beijing University; and Yu-Fang Li, a research assistant in meteorology and associate professor at the University of Hangchow. Not shown is Wei Yuan Yang, adjunct research assistant in aerospace engineering and an astronautical engineer at Beijing Institute of Control Engineering.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1867). Applications for these staff vacancies will be accepted until 5 p.m., March 30, 1990. DID NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

PHOTOJOURNALIST - PUBLIC INFORMATION AND RELATIONS, University Park Responsible for photography to be utilized as photojournalism for local, state and national media to enhance the public image of The Pennsylvania State University. Plan and photograph original and imaginative materials depicting University Park and Commonwealth College academic and social life. Bachelor's degree in photojournalism or its equivalent, plus three to four years of directly related experience with a newspaper or comparable publication.

COORDINATOR, STUDENT ACTIVITIES, Capitol Campus Responsible to Director of Student Affairs for the implementation, coordination and administration of the overall campus activities program. Master's degree in student personnel, higher education, psychology, or equivalent outside study or training, plus one to two years of effective experience in residence living or student activity programs.

COORDINATOR OF DEVELOPMENT ACTIVITIES - CONTINUING EDUCATION, University Park Responsible to the Director of Broadcasting for grantseeking and other fund-raising activities for WPX-TV and Broadcasting Services in Continuing Education. Requires bachelor's degree or equivalent and four to five years of effective experience in preparation and presentation of major grant proposals at the national level, plus a demonstrated successful record of obtaining funds from government, foundation and corporate sources.

DIRECTOR OF MAJOR GIFTS - OFFICE OF GIFTS AND ENDOWMENTS - University Park Responsible for the coordination and direction of major gifts program and activities. Develop and/or implement plans to generate private support for approved major projects of the University. Assist or provide counsel regarding cultivation and special prospects, assist in developing strategy for solicitation of prospects for major projects; participate in the solicitation of major gift prospects; prepare or assist with preparation of major gift proposals. Assist in the preparation of promotional materials for all major projects. Bachelor's degree or equivalent in business, marketing, or related field, plus five to seven years of effective experience in fund raising or public relations, with extensive skills in the area of communications, both verbal and written.

SENIOR PLANNING ANALYST, OFFICE OF PLANNING AND BUDGET Responsible to the Associate Director for Planning and Research. Position involves developing, conducting, and monitoring planning and analytical studies, representing the Office of Planning and Budget on University-wide committees and performing such other staff functions as may be requested by the Director or Associate Director of the Office of Planning and Budget and the senior executives of the University. A doctorate in higher education or other education field, business administration, economics, sociology, public administration, or political science is preferred. A master's degree in one of these areas with significant years of directly related experience may qualify. This is a 12-month staff position with starting dates depending upon availability of candidate. Salary is negotiable and dependent upon experience. Special consideration will be given to a candidate with a graduate degree in one of the disciplines and with experience as a faculty member in a university.

Scholars

(Continued from page 1)

According to Dr. Axt, existing honors programs will continue to function within the University Scholars Program under revised regulations.

Dr. Axt reported on visits he had made to other universities with flourishing

honors programs and discussions he had had with students at these institutions.

"I discovered that one of the most significant features attracting students to these programs was flexibility in constructing their programs. Therefore, the Senate will be asked to waive certain graduation requirements for students in the program, provided the intent of these requirements is met."

The keynote of an honors program, according to Dr. Axt, is advising "in the strongest and best sense of the term."

"We are going to ask that at the end of each year the honors advisors sit down with each of the honors students and plan out an entire year's program on the basis of an awareness of where the student is going. We will try to recognize the considerable efforts of these advisors in some tangible way."

To accommodate potential scholars at Commonwealth Campuses, where their numbers are likely to be few, a proposal has been made that each campus set up a faculty committee to identify very good students, including some not eligible for the program. Special honors sections would be arranged for these students. Officially designated Scholars at a campus could thus fulfill minimum requirements for participation.

Dr. Axt pointed out the necessity of a strong recruiting program to attract students to the Scholars Program. "One of the major needs of students of this sort at any institution is simply more of them," he said.

Underlining the importance of recruitment, Dr. Axt noted that there is now some agreement among educational planners that "the universities which will

thrive during the great academic depression of the '80s and '90s are those whose quality is high and whose quality is being enhanced."

Why should students choose to be part of an honors program which will make them work harder for the same grades?

Dr. Axt cited good teaching, smaller classes, closer relationships with faculty members, serious advising, and flexibility in program construction. He noted also that space is being made available for a Honors Center in Willard Building and that a dormitory program is under discussion. Students living in residence halls would be assisted by specially assigned resident advisors. A sense of community could be enhanced by programs designed to bring these Scholars into contact with each other and with interested faculty members. Visiting speakers, Artists Series performers, and others would be invited to meet informally with Scholars.

Dr. Axt concluded with a warning: "I think that even if this program is well conceived and well organized, we have to fight against a very common temptation—to see the thing as a kind of machine which we fasten on the problem, flip the switch and walk away from it. It really is just a chance to try to do something, and we must admit that we don't have a lot of experience doing this kind of thing and must be willing to try to learn."

"It takes practice to teach a class of this sort. We have to learn how to bring these students along. It's the same with advising. Advisors are going to have to get to know each other, be willing to confess their confusions to each other, and also to supply information to each other on the kinds of questions that students ask."

** THESE FACILITIES HAVE BEEN SCHEDULED FOR CLASSES IF THE WEATHER DOES NOT PERMIT CLASSES TO MEET OUTDOORS.

* THIS SCHEDULE IS SUBJECT TO CHANGE. Changes will occur due to varsity athletic contests, special varsity practices, concerts etc. You should check athletic schedules and other schedules as

posted to make sure a facility is available when you wish to use it. Some classes that are scheduled for a facility will not use that facility all the time and it will become free. This is not done, however, in any manner in which it can be scheduled on a term basis. For further information call Intramural Bldg. (S-5401), White Bldg. (S-5591), Natatorium (S-1432), Rec Hall (S-2162).

Penn State Intercom

Penn State's resident education most efficiently run in the State

Penn State has the most efficiently run resident education program in the Commonwealth, a fact that elicited praise during the University's 1980-81 budget hearing held March 12 before the House Appropriations Committee.

Legislators questioned President Oswald about faculty productivity, based on an evaluation prepared by the Joint State Government Commission, a legislative support organization in Harrisburg.

The evaluation is part of a "Faculty Output and Salary Costs" report (the "Snyder" Report), which all state-related and state-owned institutions of higher education in the Commonwealth are required to submit annually. The current report covers the period from Fall Term 1978 through Summer Term 1979.

Among the findings in this year's report are:

- Penn State has been able to deliver more service at less cost than any public college or university in Pennsylvania. The State appropriated \$30.65 per unit of production for Penn State (units of production refer to a weighted sum of student credit hours and number of degrees granted). By contrast, the figures for Pitt and Temple were \$35.78 and \$43.69, respectively. (See Chart 1.)
- Although Penn State's appropriation per full-time student is less than that of any other state school, the University has managed to keep both undergraduate and graduate tuition levels below those at Pitt and Temple. (The report also calls attention to the fact that the Secretary of Education has authorized a two-year pilot study under which the state colleges are charging the same tuition for in-state and out-of-state graduate students.
- This means that non-resident graduate students at Penn State pay in excess of \$3,000 per year in tuition; at any of the state-owned schools, their bill is approximately \$1,000 annually.)
- Although the number of full-time equivalent students attending Penn State has decreased during the past three years (54,800 in 1976-77 to 53,600 in 1978-79), the number of degrees granted has increased from 9,840 to 9,950. A similar pattern exists at Pitt. Temple, however, has had a drop-off in both student numbers and degrees granted. (Full-time equivalent students are calculated by dividing undergraduate student credit hours by 30 and graduate student credit hours by 24.)
- Undergraduate credit hour production declined by a total of 62,500 at Penn State, Pitt, Temple and Lincoln between 1977-79, with the decrease at Temple accounting for over one-half of this figure. The only large increase in student credit-hour production occurred at Indiana, which had a 7,050 gain. Penn State's decline was only 1.6 percent.
- The number of full-time equivalent faculty decreased three-tenths of one percent between 1977-79 at the University, while the number of full-time equivalent students decreased approximately 1.5 percent. Pitt reported a faculty decrease of 3.14 percent and Temple of 1.49 percent during this period. (Full-time equivalence is determined by the proportion of salary received from resident instruction funds.) Despite the decline projected in student demand, half of the 18 state-owned

Dean Palladino plans to step down

Nunzio J. Palladino has announced that he plans to step down as dean of the College of Engineering as soon as his successor is selected.

"I am about two years away from retirement," he said, "and would like to devote my remaining time at Penn State to teaching and completing my book on nuclear reactor engineering."

"My first commitment, of course, is to administer the College of Engineering, and I will continue to fulfill this role until a new dean is named."

In accepting Dean Palladino's plans, President Oswald noted that, under his leadership, the College has expanded its programs considerably.

"Dean Palladino is to be commended," he added, "for helping to make our College of Engineering one of the finest in the country, and for his many years of loyal service to the University."

Dr. Oswald also indicated that when a new dean is ready to serve, Dean Palladino

News in Brief

SERS statements being mailed

Faculty and staff members who belong to the State Employees' Retirement System (SERS) will shortly receive their retirement account statements containing information as of Dec. 31, 1979.

According to the Office of Personnel Administration, some—but not all—faculty and staff members who are age 55 or older will receive statements containing projected retirement annuities. The University has provided detailed background data to make that possible. However, the Retirement Board did not have all of that data in its computer when these statements were printed. It is hoped that next year's statements will contain such information for all persons age 55 and older.

Faculty and staff members with questions about their retirement account statements should contact the Employee Benefits Division at 865-1473 (Network 475-1473).

New names added to search committee

Three new members have been appointed to the search committee for the position of Vice-President and Dean of the University-wide System of Continuing Education and Commonwealth Universities.

Replacing members who were unable to continue to serve on the committee are: Daniel T. Hopkins, acting vice president for Continuing Education; Thomas J. Knight, associate dean for Commonwealth Campuses and Continuing Education, College of the Liberal Arts; and Richard P. Wolf, assistant director for Continuing Education, Altoona Campus.

Addressing Services can personalize letters

Faculty and staff members who need large quantities of personalized letters and envelopes for use in connection with their work can get the job done at Addressing Services.

A 6640 Document Printer is available in the Business Services Building to personalize survey mailings or for such uses as contacting college alumni and recruiting.

The Printer will prepare an entire letter or any portion thereof, including individual addresses and salutations. It will also do envelopes. The resulting copy looks as if it had been produced on a typewriter, and Printing Services will complete the job by reproducing a signature.

Personnel are available to help set up jobs, and further information may be obtained by calling James F. McKivison, Mailing Service Manager, at 865-4051.

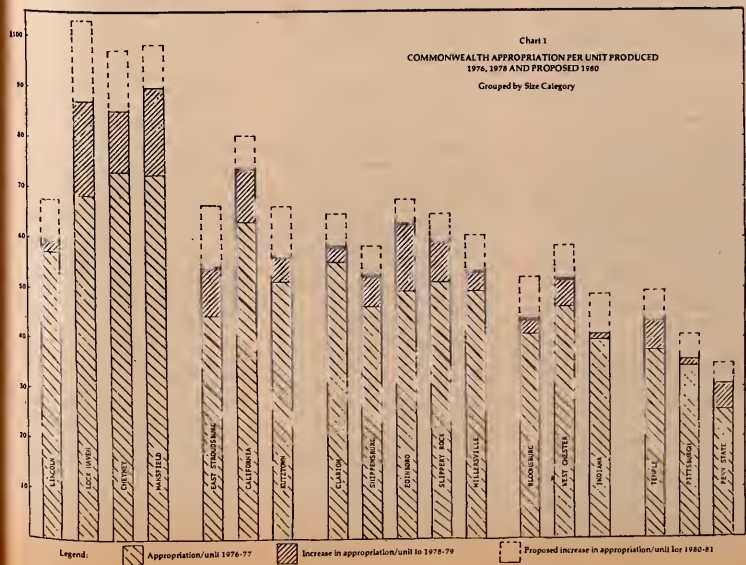

Alien identity cards available

Special identification cards for aliens are now available from the Office of Personnel Administration. Those eligible include aliens currently employed by the University while holding the following visas: F-1 (practical training), H-1, J-1, and J-2 (special permission for employment).

Aliens wishing to receive these cards can make an appointment with Robert W. Dombrowsky, manager of personnel procedures, by phoning 865-0423, Room 130 Willard Building.

The identifications cards can be used by

Penn Staters

Dr. Neil Mercando, assistant professor of biology at Ogonitz, will receive a \$500 Gustav Ohaus-National Science Teachers Association Award for Innovations in College Science Teaching. The Award will be presented March 22 in Anaheim, CA. To interested students who are not scientifically oriented, Dr. Mercando structured an eight-week course around four overnight field trips and four local one-day trips, combined with lectures and laboratory classes. A member of the Ogonitz faculty since 1976, he earned a B.S. in education from Bloomsburg State College, an M.S. in zoology at Penn State, and a Ph.D. in zoology at North Carolina State University.

Dr. J. Cordell Hatch, professor of agricultural communications, was in southeast Africa Feb. 9-March 8 to evaluate agricultural communications and conservation education programs in Kenya, Seychelles and Swaziland and to initiate design work for new projects sponsored by the U.S. Agency for International Development.

Dr. Jan S. Prybyla, professor of economics, was invited to testify on March 6 before the Senate Foreign Relations Committee. He discussed effects of diplomatic derogation by the United States on the economy of Taiwan.

Dr. Robert A. Schlegel, assistant professor of microbiology, last month presented seminars at UC-Berkeley, Scripps Clinic and Research Foundation, and UC-Irvine. He discussed "Differentiation—Controlled Distribution of the Leukemia-Specific Membrane Probe Mercopyrine 540."

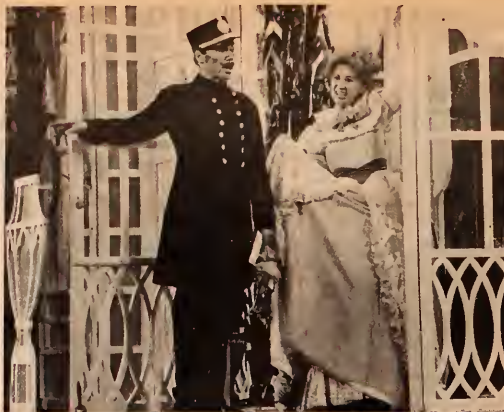

Dr. Henry J. Hermanowicz, dean of the College of Education, has been appointed to a three-year term on the Commission on Governmental Relations established by the American Association of Colleges for Teacher Education. The Commission monitors and comments on federal education legislation, as well as state government initiatives.

Dr. B. Lakshminarayana, professor of aerospace engineering, delivered the keynote address at a symposium on Measurement Methods in Rotating Components of Turbomachinery. His talk was entitled "Techniques for Aerodynamic and Turbulence Measurements in Rotors." Dr. Lakshminarayana was chairman of the organizing committee of the symposium, which was held as part of the Joint Fluids Engineering and Gas Turbine Conference of the American Society of Mechanical Engineers March 9-13 in New Orleans. He will also edit the symposium proceedings.

Dr. Sigmund S. Birkenmayer, professor of Slavic languages, was made an Honorary Member of Phi Sigma Iota, the foreign language honor society, for having distinguished himself in the study, teaching, and promotion of foreign languages and literatures at Penn State. He is the author of several books on Russian language and literature and a co-author of the textbook, *Introduction to the Polish Language*. He is also current president of the Association for the Advancement of Polish Studies and a past vice-president of Dobro Slovo, the National Slavic Honor Society.

Dr. Winfred M. Phillips, associate dean for research, Engineering, has been named to the American Society of Mechanical Engineers' National Standards Committee on Medical Devices. The new committee will be responsible for developing voluntary standards for medical equipment and devices in cooperation with the Food and Drug Administration.

James Lynch Jr., assistant director of international student affairs, was one of 20 doctoral candidates in higher education selected nationwide to participate in the

Robert Trehy, above, recently appeared with soprano Beverly Sills in the Boston Opera Company's production of Strauss's *Die Fledermaus*. Mr. Trehy, a professor of music and Fellow of the Institute for the Arts and Humanistic Studies, played the part of Frankie. Ms. Sills, who appeared as Rosalinda, was making her farewell appearance with the Company, which is directed by Sarah Caldwell.

1990 Seminar on National Higher Education Policy in Washington, D.C., March 3-4. The conclave was sponsored by the American Association for Higher Education and the Association for the Study of Higher Education.

Dr. Chauncey A. Morehouse, professor of physical education, has received the 1980 Honor Award for distinguished service to his profession, from the Eastern District Association of the American Alliance for Health, Physical Education, Recreation and Dance. The award is the District's highest honor.

Bookshelf

Dr. Marshall W. Raffel, professor of health planning and administration, is the author of *The U.S. Health System: Origins and Functions*, a 627-page book published March 1 by John Wiley & Sons. The work is intended as an introductory college text and as a resource for professional health planners and administrators.

In economic terms, the health care system is one of America's largest industries. Dr. Raffel notes: In 1978, Americans allocated \$162,600,000,000—9.1 percent of the GNP—to the health sector of the economy.

"It is an industry beset by growth, increasing complexity, limited resources, and rising costs, which result, inevitably, in problems of citizen access to services, in problems of raising money to pay for services, and in the need for increased coordination of a complex system in terms of ongoing operations and developments," he writes. "These are essentially administrative and planning problems, and the industry is turning more and more to people training in these areas."

The text details the history of medical practice and education in America, as well as the development of hospitals. Subsequent chapters are devoted to medical practice, health costs, health insurance, public health systems, nursing homes and community health agencies. The final chapter covers nursing, physician assistants, dentistry, optometry and podiatry.

The primary motivation for writing the book, Dr. Raffel says, was the absence of an adequate text for the rapidly growing HPA program in the College of Human Development. The HPA program now ranks 20th in enrollment at the University.

A new book of poetry entitled *Zasuto (In Oblivion)* written by Dr. Rolf Preisner, professor of German, has been brought out by a Czech exile publishing house in Munich, Germany. The volume, which is the author's fourth published work of poetry, consists of 32 sections that form a single, continuous composition.

Through an ongoing confrontation with history, spanning from antiquity to the present, Dr. Preisner attempts to find the answer to the question of the meaning of history. He is led by the theme to an objective lyric, where poetry serves as a means towards understanding.

Writing in his native Czech, the author also uses Latin, English, German and Old-French in verses or quotations, as well as mathematical symbols.

Dr. William R. Schmalstieg, professor and head of the Department of Slavic Languages, is the author of a new book entitled *Indo-European Linguistics: A New Synthesis*, just published by The Pennsylvania State University Press.

Professor Schmalstieg argues that the commonly accepted theories of the development of the Indo-European language derive from traditional notions which exclude the possibility of vast typological changes. There exist numerous alternative scenarios which could explain the observed phenomena just as well. The author suggests that certain phonological phenomena of such languages as Hittite, Sanskrit, Greek, Latin, Baltic and Slavic may be explained in a completely new and different way. In addition he proposes that the relationship of noun and verb in the earliest forms of these languages may have been similar to that encountered in such Caucasian languages as Avar or Georgian. He concludes that specialists in the Indo-European languages have limited their horizons with the unjustifiable assumption that the earliest proto-language resembled closely the extant languages.

Professor Schmalstieg completed the research for this book in the academic year 1978-79 in Freiburg, Germany, as the recipient of an award from the National Endowment for the Humanities.

John Balaban's *Ca Dao Vietnam* has been published by the Unicorn Press. The book is a bilingual collection of old folk poems which Mr. Balaban taped in Vietnam in 1971-72. Along with the poems, the book includes a description of the old tradition and photographs of *ca dao* singers.

This anthology is the first such presentation in the West of an important aspect of Vietnamese culture. Mr. Balaban, an associate professor of English, is also the author of *After Our War*, which won the 1974 Lamont Award of the Academy of American Poets.

Dr. George E. Andrews, professor of mathematics, is the author of the book, *Partitions: Yesterday and Today*, published by The New Zealand Mathematical Society.

The volume arose out of a series of lectures Dr. Andrews presented in a tour of New Zealand universities when he was the New Zealand Mathematical Society

Visiting Lecturer in 1979.

The book contains an account of some historical and modern developments in the theory of partitions and is designed to be of interest and value to both specialist and general mathematical readers.

Dr. Andrews has been invited to join the panel of visiting lecturers of the Mathematical Association of America for the 1980-81 academic year. MAA Visiting Lecturers visit colleges and universities throughout the country to give formal lectures, confer with students and faculty members, and cooperate with the host institution in all ways possible to further the aims of mathematics programs.

Laurent LeSage, professor emeritus of Romance languages, is co-author, with Lucie Heymann, of a study of the last years of French novelist and playwright Jean Giraudoux, published by the Parisian firm that handled most of Giraudoux's own work, Grasset. Entitled *Les Dernieres Annees de Jean Giraudoux*, it is the eighth in a series of monographs on the life and work of the widely read author.

The work is based on a collection of letters obtained a few years ago by Pattee's Rare Books Room, which has considerable holdings on this author. Beginning when Giraudoux was head of the Ministry of Information in France, the letters cover the period from the eve of World War II until the author's death in 1944.

"Frequently, an author's style is different in his personal writing from in his professional work," Dr. LeSage notes. "But in these letters, one finds the same type of whimsy that is characteristic of Giraudoux in such works as *The Madwoman of Chaillet*. The letters are sometimes sentimental, often touching."

Mme. Heymann is the mother of Dr. Isabelle Armitage, a former member of Penn State's Department of French.

Although the port of Philadelphia has enjoyed a long history of international trade, the Delaware River, upon which it depends for much of its success, is a long and often treacherous waterway requiring highly skilled river pilots. To assist navigation and to plan improvements to the river in the form of markings and dredgings, the State of Pennsylvania in 1766 established a regulatory board, the port wards.

As the oldest continuing regulatory body in the United States, the port wards shared in the historical developments of the city and state, assisting in wars and preparing for future growth during peace. Based on records of the board, preserved in the Pennsylvania Archives in Harrisburg, Dr. Eugene R. Slaski, assistant professor of history at Allentown, has prepared a study, *Poorly Marked and Worse Lighted*.

The book, published by the Department of Commerce in Harrisburg, follows the trials of the wardens from their origins to 1907, when the state created the Navigation Commission for the Delaware River and Its Navigable Tributaries. Pilot grievances, port expansion, river improvement, and much more, including political maneuvering, fill the pages of the wardens' history, which relies primarily on the minutes of the board and the laws which impacted on the activities of the wardens.

A member of the faculty since 1970, Dr. Slaski was graduated from East Stroudsburg State College and earned his M.A. and Ph.D. at Lehigh and Florida State Universities, respectively.

Appointments

Maurice S. Kramer as professor of agriculture studies and director of 4-H Youth Programs. B.S., M.Ed., Ph.D., Iowa State U. Formerly associate professor, State U. 4-H leader, Iowa State.

James Garbarino as associate professor of human development. B.A., St. Lawrence U., M.A.T., Ph.D., Cornell U. Formerly research fellow, Center for the Study of Youth Development, Boys Town, NE; Mitchell Prize winner.

John D. Miller as associate professor of electrical engineering. B.S., M.S., Ph.D.

PSU. Formerly associate professor, U. of Texas-El Paso.

Richard N. Artega as assistant professor of olericulture, B.S., M.S., Utah State U.; Ph.D., Washington State U. Formerly post-doctoral associate, Washington State.

Stephanie Doores as assistant professor of food science, B.S., College of St. Elizabeth; M.S., Ph.D., U. of Maryland. William Grisley as assistant professor of agricultural economics, B.S., U. of Wisconsin-Madison; M.S., Ph.D., U. of Illinois.

Ross C. Hardison as assistant professor of biochemistry, B.A., Vanderbilt U.; Ph.D., U. of Iowa; post-doctoral fellow, Cal. Tech.

Robert R. Kulikowski as assistant professor of anatomy and physiology at Hershey, A.B., U. of Rochester; Ph.D., SUNY-Albany. Formerly research associate, U. of Chicago.

Gary L. Messing as assistant professor of ceramic science and engineering, B.S., Alfred U.; Ph.D., U. of Florida. Formerly research scientist, Battelle Memorial Inst. Chen-Pei D. Tu as assistant professor of biochemistry, B.S., National Taiwan U.; Ph.D., Cornell U.; post-doctoral fellow, Stanford Medical School.

Pauline W. Goldstein as senior assistant librarian; head, catalog maintenance, A.B., Barnard College; M.L.S., S. Conn. State College. Formerly acquisitions librarian, Carnegie-Mellon U.

Barbara C. Dean as assistant librarian, monograph original cataloging, B.A., Northern Illinois U.; M.L.S., U. of N. Carolina. Formerly assistant librarian, Colonial Williamsburg Foundation. Raymond J. Dopkin as research assistant, A.R.L., B.S., PSU. Formerly engineer, DUPONT.

Promotions

Staff Extension

Hedaine D. Brown to assistant Extension agent in Agriculture.

Mary Alice Miller to senior application analyst/programmer in Planning and Budget.

Donald N. Plourde to assistant financial officer in Controller's Office.

Carol G. Reitz to assistant chief radiologic technologist at Hershey.

Staff Non-Extension

Cynthia A. Baker to senior staff nurse at Hershey.

Samuel J. Duck to central control systems coordinator in Physical Plant.

Margaret B. Hindley to librarian assistant at Ogonitz.

Betsy L. Lauzon to administrative aide at Hershey.

Cathy S. Love to junior data documentor in Management Services.

Rita J. Schlesier to junior programmer in Management Services.

Clerical

Janet L. Beaulieu to secretary B in Science. Jo E. Burd to secretary C in Human Development.

Doris M. Dehart to patient unit secretary at Hershey.

William J. Gentzel to senior teller in Controller's Office.

Marilyn A. Henry to secretary B in Continuing Education at Delaware County.

Shirley M. LeFrancotte to secretary B in Intercollege Research Programs.

Susan K. Lightner to operations documentation clerk B in Management Services.

Kimberly A. Rhoads to data preparation operator B in Management Services.

Mini C. Ridenour to data preparation operator B in Management Services.

Kristina Schulz to senior clerk, Credit & Collections, at Hershey.

Technical Service

John L. Daughenbaugh to maintenance worker in Physical Plant.

Kathy J. Dobson to food preparer B in Housing & Food Services.

Megan E. Dwyer to operating room assistant at Hershey.

Alfred Fish to janitorial worker, group leader (utility) in Physical Plant.

Kevin J. Frank to patrol officer at Hershey. John W. Hazzard to maintenance worker (utility) in Physical Plant.

Robert Hensal to maintenance worker (utility) in Physical Plant.

Reba B. Holley to laboratory attendant A at Hershey.

Leroy M. Inhof Jr. to baker (utility) in Housing & Food Services.

Donald L. James Jr. to utility worker at Hershey.

Albert G. Neidrick to family housing project worker in Housing & Food Services.

John P. Timchak to residence hall preventive maintenance worker in Housing & Food Services.

Victor L. Waite to maintenance worker, plumbing and piping, in Physical Plant.

Mark E. Weikel to storeroom clerk at Hershey.

Staff Development

Recent graduates of the Oral Communications/Talking With People Course are:

Jean Boyd, promotion specialist, Continuing Education; Edward DeBrasky, estimator, jobs and projects, Physical Plant; Allan Derzak, administrative assistant, Personnel Administration; Francis Hooley, manager, business operations, Library; John Kello, manager, mechanical/electrical planning and development, Physical Plant; Judy Kelly, writer/editor, Continuing Education; Wally Lester, assistant director for Conference Center, Continuing Education; Dorothy Lyons, personnel & training specialist, Physical Plant; Paul McGhee, accountant, Controller's Office; Mary Alice Miller, applications analyst/programmer, Planning & Budget; Glenn Mulberger, assistant housekeeping supervisor, Housing & Food Services; Ann Shields, producer/director, Continuing Education; Beatrice Swift, administrative assistant, President's Office; Robert Vaughn, coordinator/inspector, Physical Plant.

Fourteen University employees have completed a course in Basic Supervisory Management. They are:

R. Bruce Adams, producer/director, Continuing Education; Jon Bierly, foreman, service desk dispatch, Physical Plant; Martha Carter, technical secretary, ARL; Kenneth Dixon, group leader, mechanical, experimental and maintenance, Engineering; Theodora Hoover, secretary A, Planning & Budget; Peggy Lynch, secretary B, Science; Wilbur Miller, foreman, service desk dispatch, Physical Plant;

Carl Musgrave, janitor foreman, Physical Plant; Guy Mussey, janitor foreman, Physical Plant; Jerry Sawyer, editorial assistant, Continuing Education; Howard Sharpless, supervisor of maintenance, Housing & Food Services; Jim Snyder, assistant supervisor, presentation services, Continuing Education; Lydia Waslenko, assistant librarian, cataloging, Patee; Kathy Rockey, secretary A, Science.

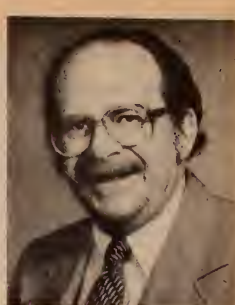

Employees completing an eight-session course in Report Writing-Preparation and Organization include:

Lawrence Bair, project architect, Physical Plant; Rosalie Bloom-Brooks, unemployment compensation specialist, Personnel Administration; Fred Burns, supervisor, presentation services, Continuing Education; Elinor Corawella, program analyst, Agricultural Data Processing Lab; Zorina Carby, bilingual secretary, Agricultural Education;

Linda Ebert, manager, test kitchen, Housing & Food Services; Kim Evancho, secretary B, Agriculture Administration; D. Marie Frye, senior records clerk, Continuing Education; Shirley Gryczuk, personnel assistant, Physical Plant; John

William H. Reiber

Michael R. Lynch

Harchak, assistant budget supervisor, Continuing Education; Bob Hogue, applications programmer/analyst, Management Services; Ralph Hosterman Jr., accountant general, Housing and Food Services;

Jack Knee, senior mechanical/electrical engineer, Physical Plant; Robert Knouse, senior electrical engineer, Physical Plant; Ed Nadzom, housekeeping supervisor, Housing & Food Services; Thomas Rodkey, scheduler, planner, Physical Plant; Marsha Shivery, senior accounting clerk, Agriculture Administration; Edwin Windell, chief inspector, Physical Plant; David Witmer, research assistant, ARL.

Retirements

Michael R. Lynch, associate professor of agricultural Extension and, since 1963, coordinator of staff development for the Cooperative Extension Service, will retire March 31 with over 34 years of service.

Mr. Lynch was appointed to the Extension Service staff in 1945 as assistant Schuylkill County Extension agent. Four years later he was named Extension visual aids specialist with headquarters on the University Park Campus.

He holds a B.S. in agriculture and M.S. in educational rural sociology, both from Penn State.

During his tenure as coordinator of staff development, Mr. Lynch administered the development of in-service training and educational improvement programs for the Extension Service staff, which numbers over 400 professional employees.

Long active in alumni affairs, Mr. Lynch has shown "for the Glory of Old State," a slide and music program which he prepared himself, more than 600 times to alumni clubs and other groups. His exceptional service was recognized in 1977 when the University presented him with the McKay Donkin Award.

When William H. Reiber, director of operational services in Housing and Food Services retires on April 1, he will end a relationship with Penn State that has stretched over more than 30 years.

He joined the staff in 1949, just after the Foods Building had been built and food services centralized, calling on a background in business for his first post as a food cost analysis clerk. He became supervisor and, in 1961, manager of business operations for all of Housing and Food Services. In 1971 he was appointed assistant director of housing, and four years later assumed his present post, in which he oversees business management for the entire housing and food services operation.

Mr. Reiber and his wife, Katherine, have two sons, William and James, both of whom were graduated from Penn State in 1973.

Louise Barto thinks Penn State's benefits are "wonderful."

A dining hall worker with Housing and Food Services, Ms. Barto retired officially March 1 after 30 years of service. As a conscientious worker during these years, she had accumulated 95 days of sick leave, so last fall when her doctor told her that she

would have to stop working for reasons of health, she was able to "cash in" those sick days and continue to receive her pay checks through Feb. 12, 1980. After that date, she had enough vacation days left to take her up to March 1.

Ms. Barto, a widow and the mother of a married son and daughter, lives in Warrior's Mark. She reports that the rest she has had since she stopped work has benefited her health — and her sick leave has benefited her pocketbook.

Nydia S. Finch, an administrative assistant in the Department of Philosophy since March 1, 1971, will retire April 1.

Obituaries

Dr. Robert E. Weber, an assistant professor of mathematics at Shenango Valley, died March 12 at the age of 53. Dr. Weber held B.A. and M.A. degrees from Ohio University and a Ph.D. from Indiana University at Bloomington. He joined the faculty Sept. 1, 1975.

Doris J. Hughes, an administrative aide at Capitol Campus, died March 11 at the age of 53. She started at Capitol in 1968 as a clerk-typist, was promoted to secretary B in 1973, and to her last post in 1976.

Madeline E. Casper, a food preparer with Housing and Food Services from Feb. 14, 1955, to April 1, 1971, died March 6. She was 70.

Carpoolers

The Penn State employees listed below are interested in sharing rides. Persons desiring a listing in INTERCOM should send in their names to Room 312 Old Main and include information on their residence, work location, arrival and departure times, phone numbers at home and work, and whether drivers, riders or both are sought.

Lori L. Winnick, Huntingdon (643-2478), works 8 a.m. to 5 p.m. in Chambers Building (865-6321). Will pay to ride, share driving or accept riders.

Betty Norfolk, Bellefonte (355-0082), works 5 p.m. to 1:30 a.m. in Visual Arts Building (865-2375). Would like to have two riders.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Nobel Laureate to speak at Keller

Dr. Herbert Simon, professor of computer science and psychology at Carnegie-Mellon University and 1978 winner of the Nobel Prize for economics, will deliver the Graduate School Lecture at 8 p.m. Wednesday, March 26, in the J. Orvis Keller Conference Center Auditorium. His topic will be "Computer Simulation of Human Thinking."

The lecture is sponsored by the College of Business Administration, the College of the Liberal Arts and the College of Science.

Dr. Simon's work in the social sciences has been varied, but the Nobel Committee cited his achievements in economics, beginning with his book, *Administrative Behavior*, in 1949.

In that work, Dr. Simon challenged classic economic theories which held that businessmen always try to maximize profits. Instead, he said, they settle for "satisfactory" profits because they possess incomplete knowledge of options and face unknown risks.

Along with Dr. Allen Newell, another faculty member, Dr. Simon developed in 1955 the first computer system in which computers were used to behave in a humanoid fashion in the processing and selection of data.

As involved with human psychology as with technology, one of his major research interests is understanding human thought processes through computer programs that parallel human reasoning.

Dr. Simon holds bachelor's and doctoral degrees from the University of Chicago and is a member of the National Academy of Sciences.

His books include *Human Problem Solving* (with Dr. Newell), *The New Science of Management Decision*, *The Sciences of the Artificial*, and *Models of Thought*.

Paintings, prints and drawings by Francis Couch, art coordinator at Dobbins Area Vocational Technical School in Philadelphia, are on display at the Paul Robeson Cultural Center through April 3.

A Spring Term Sampling

Two pieces of enameled porcelain from 18th century China.

Chinese export porcelains on view at Museum of Art

Visitors to an exhibit of Chinese porcelains hardly expect to confront dual coronets, scenes from the *Decameron* or Dutch maidens, but they are all on display in the current exhibit at the University's Museum of Art.

The items, which will be shown until May 11, are Chinese export porcelains from the collection of Dr. and Mrs. Harold L. Tonkin.

Dating from the 17th, 18th and early 19th centuries, the pieces were made in Canton for the "foreign devils" whose passion for Chinese porcelain was seemingly inexhaustible.

Trading ships from Holland, France, Sweden, England and America, as well as Denmark, Prussia, Austria, and even Brazil, anchored at the island of Whampoa, 12 miles down the Pearl River from Canton. The authorities allowed no contacts between the merchants and the Chinese people, according to Hedy Landman, who wrote the preface for the show's Catalog, which was compiled and annotated by Dr. Olga K. Preisner, curator of the Museum.

Outside the walled city of Canton, a strip of land was set aside for the foreign "factories," Ms. Landman explains, where warehouses, offices and temporary living quarters.

"... the Chinese were willing to accommodate special requests for shapes alien to their own needs and customs..." Ms. Landman continues. "By the middle of the seventeenth century the Dutch were sending carved and painted wooden models to Canton, and the exported vessels took on an increasingly Western character. Tureens, coffeepots and teapots (the latter not a Chinese invention but a Western adaptation of a Chinese rice wine pot), plates and platters with flat rims, pitchers and jugs, saucers, salts, candlesticks—even chamber pots were produced by the workers..."

Americans entered the China trade in 1884, by which time porcelain had become readily available in Europe, and the quality of Chinese workmanship had begun to decline. America, however, as yet possessed no factories for the manufacture

of fine China, and, as Ms. Landman writes, "a great many wealthy citizens were eager to acquire for themselves the amenities of elegant living..."

Visitors to the Museum will have the chance to admire a wide variety of Chinese export porcelains. Dr. Preisner points out. Among them are a number of figurines, including the Dutch girl, complete with a lacy winged cap and pointed red shoes. Similar figures were often made using European prints as models. Dr. Preisner explains.

A pair of enameled porcelain elephants dating from the late 18th or early 19th century have been lent by Dr. and Mrs. Tonkin. They were designed to serve as candlestick or joss stick holders. Other figurines include a pug dog, a cat—also a candlestick—and a pair of water buffaloes whose glazed finish naturalistically simulates hair.

An interesting octagonally-shaped tureen has rabbit head handles, while the knob on its lid is a bursting pomegranate. A second oval tureen has handles shaped as shells. Angels hold a coronet aloft on the side of a teapot made about 1763. On a plate of the same period, an erotic scene from Boccaccio's *Decameron* appears.

In the center of an octagonal platter, an elephant and his rider appear surrounded by an all over flower pattern in low relief—a bianco-sopra-bianco ground. Other important pieces include a punch bowl, a hot water dish; a pair of fruit baskets with pierced sides, a style derived from the Japanese; and several pieces decorated in the Fitzhugh pattern with four medallions surrounding a center motif.

Ordering porcelains decorated with one's coat of arms was not without risk, Ms. Landman notes. Literal-minded Chinese workers often followed instructions written on the designs sent to them as models to the letter. Accordingly, hundreds of pieces of tableware were delivered to customers with such notation as "Copy these arms exactly" neatly inscribed on each and every piece.

An exhibition of drawings by Frederick J. Tarr is being presented at the University's Kern Graduate Commons through March 11.

Pittsburgh Symphony residency to include concerts, workshops, talks

During its eighth residency, the Pittsburgh Symphony Orchestra, with guest conductor Michael Tilson Thomas, will present two evening concerts, Friday, March 28, and Saturday, March 29, at 8:30 p.m. in Eisenhower Auditorium.

A Saturday morning Youth Concert will be narrated and conducted by Victoria Bond, while a series of workshops are scheduled throughout the week under the auspices of the School of Music.

The Symphony, considered to be one of the finest orchestras in the world, is also one of seven major American orchestras whose national tours are being underwritten by AT&T's "Bell System American Orchestras On Tour" program.

Composed of 107 musicians, the Pittsburgh Symphony has toured extensively throughout the United States, Canada, Mexico, Europe, the Middle East, and Japan, and performs for six weeks each summer at the Temple University Music Festival in Ambler, near Philadelphia. The Symphony has been widely viewed on television through the series "Prestin and the Pittsburgh."

An all-Stravinsky concert on Friday evening will include Symphonies for Wind Instruments, Variations ("Aldous Huxley in Memoriam"), the Symphony of Psalms, with the Penn State Singers, and *Le Sacre du Printemps*.

On Saturday evening, the Pittsburgh players will perform Mendelssohn's Overture, "The Hebrides"; Rachmaninoff's Rhapsody on a Theme of Paganini for Piano and Orchestra, with guest soloist Ilana Vered; and Tchaikovsky's Symphony No. 5 in E Minor, Opus 64.

The Youth Concert, which is part of the

Ilana Vered
Lively Arts for Young Audiences series, will begin at 10:30 a.m. Saturday in Eisenhower Auditorium. The concert features Saint-Saens' "Carnival of the Animals."

Tickets for the Saturday evening concert will be sold beginning Tuesday, March 25, from 9 a.m. to 4 p.m. at the HUB booth and Eisenhower Auditorium box office.

A limited number of tickets are available for Friday's concert.

The Pittsburgh Symphony Orchestra's residency is presented by the Artists Series, in cooperation with the School of Music, and is supported in part by grants from the A.W. Mellon Educational and

Trust, the National Endowment for the Arts, and the Pennsylvania Council on the Arts.

As part of its residency, the Symphony will conduct a number of workshops, lectures, rehearsals and coaching sessions, all of which will be free and open to the public.

For the first event, Donald Johanos will conduct student soloists and members of the Pittsburgh Symphony in readings of works by Mozart, Weber, Haydn and Griffes from 3:30 p.m. to 6 p.m. Tuesday, March 25, in Eisenhower Auditorium.

Tuesday evening, Pittsburgh Symphony conductor Michael Tilson Thomas will conduct a one-to-one rehearsal with members of the Pittsburgh Symphony and the Penn State Symphony from 7:30 p.m. to 10 p.m. in Eisenhower Auditorium.

Works scheduled to be performed are the last movement of Tchaikovsky's Symphony No. 2 ("The Little Russian"); the Overture-Fantasy from Tchaikovsky's "Romeo and Juliet," Stravinsky's "Firebird Suite" and "Dance Russe," "Dance of the Coachmen" and "Nurse's Dance" from Stravinsky's "Petrouchka."

Two events are scheduled for the morning of Wednesday, March 26, in the Music Building Recital Hall. At 9:30 a.m., Randolph Kelly, principal violinist of the Pittsburgh Symphony, will coach the Penn State graduate string quartet, with a second cellist, in a performance of Schubert's String Quintet in C Major. At 11 a.m., a small ensemble from the Symphony, directed by Pittsburgh violinist Eugene Phillips and featuring recitalist Phyllis Jo Kube, will perform Schoenberg's *Pierrot Lunaire*, opus 21.

The second reading will take place from 1 p.m. to 3:30 p.m. Wednesday afternoon in Eisenhower Auditorium. Student

soloists will perform the first movements of works by Bruch, Puccini, Verdi, Haydn, Mendelssohn, Beethoven and Schumann. Mr. Johanos will conduct as Symphony members accompany the students.

A lecture on Russian virtuoso composers will be presented by Michael Tilson Thomas at 4 p.m. Wednesday in the Music Building Recital Hall.

The final one-to-one rehearsal, with members of the Symphony and Musica da Camera, the University's chamber orchestra, will be held from 7 p.m. to 9:30 p.m. Wednesday in Eisenhower Auditorium. Mr. Johanos will conduct the musicians in performances of Handel's "Royal Fireworks" Suite, Stravinsky's "Pulcinella" Suite and the Bach Brandenburg Concert No. 3.

On Thursday, March 27, an event will be open to the public. Leonard Sharrow, principal bassoonist of the Pittsburgh Symphony and a part-time faculty member in the School of Music at the University, will coach the Claremont Woodwind Quintet in a performance of Poulenc's "Sextuor" from 3:30 p.m. in the Music Building Recital Hall.

Two events will be open to the public Friday afternoon, March 28. At 2 p.m. in the Recital Hall, Kathleen Butera, assistant manager of educational activities for the Pittsburgh Symphony, will head a panel discussion on preparing young people's concerts. Victoria Bond, Exxon Arts Endowment assistant conductor of the Pittsburgh Symphony, will lead a conducting workshop with the Penn State Symphonic Wind Ensemble at 4 p.m. in Room 110 of the Music Building.

Spanish dramatist to attend premiere of his play

Dr. Jose Martin Recuerda, one of Spain's foremost contemporary dramatists, will spend a three-week residency at the University during the American premiere production of his acclaimed play, *The Inmates of the Convent of Saint Mary Egyptian*.

A University Resident Theatre Company production, *The Inmates* will be performed at the Pavilion from March 27-29, April 1-5 and 8-12. The play has been translated to English by Dr. Robert F. Lima Jr., professor of Spanish and comparative literature, and is being directed by Manuel R. Duque, associate professor of theatre arts.

The play, suppressed during the Franco regime but produced in 1977 shortly after his death, is a version of the last days of Mariana de Pineda, a martyr for the cause of Spanish freedom during the reign of Fernando VII (1813-1833).

Dr. Recuerda, the founder of the first university department of theatre in Spain at the University of Salamanca, where he now teaches, will be the guest of the Institute for the Arts and Humanistic Studies during his stay at Penn State.

On Monday, March 24, he will present a public lecture on his own theatre—that of social concern and criticism, protest and indictment—at 8 p.m. in Room 101 Kern. His talk, to be given in Spanish, is entitled "Creacion, arranque y evolucion de un autor dramático durante la España de Franco y la transición a la democracia." A reception will follow.

Cover of playbill from Spanish production of "The Inmates of the Convent of Saint Mary Egyptian."

On Thursday, April 3, Dr. Recuerda will speak in Spanish on "El amor y la muerte en el teatro de Garcia Lorca" at 8 p.m. in Room 112 Kern. Garcia Lorca, author of a trilogy of poetic dramas, is Spain's best-known 20th century dramatist. The program also will include a dramatic reading, by students and faculty members of the Department of Spanish, Italian and Portuguese.

A highlight of Dr. Recuerda's visit will be an international symposium on the

Contemporary Spanish Drama to be held in the Faculty Building from Thursday, April 10, through Saturday, April 12.

Symposium participants will attend sessions dealing with four of Dr. Recuerda's plays and will hear an address on Recuerda's theatre by Professor Francisco Ruiz Ramon of Purdue University, the foremost critic of the contemporary Spanish theatre. Also scheduled are sessions on the theatre of the post-civil war epoch in Spain, an address by Dr. Recuerda, and a buffet dinner for the panelists to be given by the Consul General of Spain, H.E. Rafael de los Casares. Participants also will attend *The Inmates*, and two panels will discuss the URTC production.

The symposium is being organized and directed by Dr. Martha T. Halsey, professor of Spanish. She met Dr. Recuerda in 1976 while researching the contemporary Spanish theatre, and that association has resulted in Dr. Recuerda's visit to Penn State.

Dr. Recuerda, who directed the student theatre at the University of Granada from 1952-60, has had nine of his plays performed by professional companies in Granada and Madrid. The recipient of various awards for directing, he has participated in theatre festivals in Canada, Italy and Spain and has been a visiting professor at the University of Washington and Humboldt State College. His doctorate in Spanish literature was conferred by the University of Granada in 1975.

Stanford biologist will deliver Pollard Lecture

Dr. Philip C. Hanawalt, professor of biology at Stanford University, will present the Ernest C. Pollard Lecture at the University Friday, March 28.

He will discuss "Cellular Responses to Damaged DNA in Bacteria and Mammals" at 3:45 p.m. in Room 112 Kern Building.

The lecture, which is open to the public, is sponsored by the Ernest C. Pollard Lecture Fund and the Department of Microbiology, Cell Biology, Biochemistry, and Biophysics.

Dr. Hanawalt's major research interest is molecular biology. He is probably best known for his studies of DNA repair in bacteria and mammalian cells exposed to ultraviolet light and mutagenic chemicals.

A co-author of the book, *Molecular Photobiology*, he has edited numerous monographs on DNA repair.

The lecture series, established in 1973, is named in honor of Dr. Ernest C. Pollard, Evan Pugh Research Professor Emeritus of Biophysics and former head of the Department of Biophysics at the University. The 1980 lecture is the fourth to be held at Penn State. The lectures are held in alternate years at Yale University, where Dr. Pollard also served as head of the Department of Biophysics prior to his service at Penn State.

An exhibition of mapsaces by Beth J. Fogel is at Kern through Friday.

Capitol to host Trustees, TMI seminar, authors

Penn State's Capitol Campus is starting the decade with a burst of activities highlighted by the March meeting of the University's Board of Trustees tomorrow and Saturday.

The March meetings are traditionally held at Hershey, but were moved this year in recognition of the appointment of the new Capitol Campus Board of Advisers. The Trustees will meet the Advisers at a Friday night banquet jointly hosted by President and Mrs. Oswald and Provost and Mrs. Theodore L. Gross.

"We are most gratified that the Board of Trustees has decided to meet at the Capitol Campus," said Board of Advisers Chairman Ralph Peters. "It is indicative of the support for Capitol within the University and offers exciting prospects for the future of this campus."

A year ago, that future looked far from bright with the initial accident at the nearby Three Mile Island nuclear power plant. That unprecedented event and its implications will be the subject of a day-

long conference at the Campus on Friday, March 28.

"Three Mile Island—One Year Later: What Have We Learned?" will feature three sessions: the role of the media in the crisis, the impact of the accident on the community, and the responses of various area institutions. They will be moderated, respectively, by faculty members Eton F. Churchill, Robert Bressler and Provost Gross.

On Monday evening, May 13, three prominent writers will be the guests at Capitol's Second Annual Book and Author Dinner, to be held at Harrisburg's Host Inn. They are Bel Kaufman, author of *Up the Down Staircase* and *Love, Etc.*; Nancy Tischler, author of *Tennessee Williams, Black Masks and Legacy of Eve*; and W.S. Kunickaz, author of *The One Thousand Hour Day*, *The Stempinski Affair*, *My Name is Million* and *And The March*.

The event will consist of a cocktail party (cash bar), dinner, a panel discussion and question and answer period, and an

autographing session. Tickets, \$12.50 each, are available from the Campus Relations Office.

The newly revitalized Capitol Campus Alumni Society will be holding a joint Spring Festival with the Harrisburg/Penn State Club on May 13.

The newly renamed Richard H. Heindel Memorial Library will be dedicated on June 6. Dr. Heindel, the first dean of faculty at Capitol from 1967-73 and a professor of international relations from 1967 until his retirement with emeritus rank in 1978, died on July 31, 1979.

In addition, Vol. 1, No. 1 of *The Capitol Campus Papers* made its appearance in January. The *Papers* is to be a reprint series of distinguished campus lectures which address the humanistic and moral dimensions of social forces in America. The first issue replicates the lecture of Dr. Maxine Greengard, professor of philosophy and education at Teachers College, Columbia University, on "Ethical Predicaments and the Professions." It was presented on April 17, 1979.

Faculty, staff invited to attend Music in Interesting Times lectures

Throughout Spring Term, members of the faculty and staff are invited to tune in on a series of special lectures, part of a new course, Music 297 A—Music in Interesting Times.

The focus of the course is the role of music in the development of American culture, a theme which will be expounded by music scholars, critics, composers and performers.

Lectures for the 15th period class (3 p.m. to 5:10 p.m.) are held in the Music Building Recital Hall. The speakers and their topics are:

Samuel Bayard, professor emeritus of English and comparative literature, will discuss Pennsylvania folk music on March 24. His talk will be followed by a performance by the Rustical Quality String Band, a State College group specializing in traditional American country music.

"Concert Music: Who Are Our Composers Writing For?" will be the topic of a talk by Dr. Robert P. Morgan on March 31. Dr. Morgan, a composer and critic, is a member of the music faculty at the University of Chicago.

On April 2, a lecture/demonstration on electronic music will be presented by Burt Fenner, a professor in the School of Music at the University.

Dr. Leonard B. Meyer, Benjamin Franklin Professor of Music and Humanities at the University of Pennsylvania, will discuss "Music Today . . . and Tomorrow" on April 14. Dr. Meyer is the author of *Emotion and Meaning in Music* and *Music, the Arts and Ideas*.

A discussion on music and women will be led by Joanne Feldman, associate professor in the School of Music and first violinist with the Alard String Quartet, on April 16.

On April 21, the class will hear a lecture by Kenyon Enryrs-Roberts, a composer of film scores. Mr. Enryrs-Roberts will be a guest of the Institute for the Arts and Humanistic Studies.

A joint presentation by two University faculty members—Bruce Trinkley, associate professor of music, and Patricia Heigel-Tanner, assistant professor of dance—will focus on the relationship of music and dance in society. Their lecture

will be presented on April 23.

On April 28, Barbara Wheeler of the Montclair State College music faculty will speak to the class on music therapy.

The development of Black music in America in the last decade, "The Black Music Scene: 1968-1979," will be the topic of a talk by Dr. Dominique Rene de Lema on April 30. Dr. de Lema is currently on the faculty of Morgan State University.

On May 5, Leslie Bergs will present a lecture/demonstration entitled "Music and Children: The Suzuki Approach." She directs the State College Talent Education Program.

"Funding the Arts" is the title of a talk by Ezra Laderman, composer and director of the Music Division of the National Endowment for the Arts, on May 7.

The final lecture will be given by Father James May, chaplain at the Eisenhower Chapel, on May 12. He will discuss the relationship of music and religion.

The lectures for "Music in Interesting Times" are being coordinated by Dr. Suzanne Roy, an assistant professor in the School of Music. There is no charge to those who wish to attend.

Polanyi to present Priestley Lectures

Dr. John C. Polanyi, an internationally distinguished physical chemist, will present the 1980 series of Priestley Lectures at the University March 31 through April 3.

The lectures, titled "The Molecular Dynamics of Simple Chemical Reactions," are open to the public. They are sponsored by the Mu Chapter of Phi Lambda Upsilon, a chemistry honorary society, and the College of Science.

The first lecture, "Infrared Chemiluminescence and Chemical Lasers," will be presented at 8 p.m. Monday, March 31, in Room 119 Osmond Laboratory. The remaining lectures, to be offered April 1, 2, and 3 in Room 333 Whitmore Laboratory at 8 p.m., will be listed in the INTERCOM calendar.

Dr. Polanyi, a University Professor and professor of chemistry at the University of Toronto, has contributed to the fields of chemical reaction kinetics, photochemistry, chemiluminescence, and energy transfer. He is probably best known for his pioneering research on the role of vibrational and rotational energy in chemical reactions.

He is a fellow of the Royal Society of Canada; a fellow of the Royal Society of London, England; an honorary foreign member of the American Academy of Arts and Sciences; and a foreign associate of the U.S. National Academy of Sciences.

Varied fare provided at campuses is represented by (from left) The National Shakespeare Company production of "Julius Caesar," Will Stutts as Mark Twain, and Mime Musica.

"Block booking" brings live performances to Campuses

Students, faculty members and staffers at 19 branch campuses are eagerly attending live performances by musicians, actors and dancers, thanks to a program of "block booking" instituted by the Office of Student Affairs and funded by the Office of the Provost.

Under the program, nine different performing groups offered 110 programs last year at the campuses, playing to a total audience of 11,450 persons. This year, 15 performing groups will present 156 programs.

An effort has been made to provide the widest possible range of experiences in the programs booked. Many McKeesport and Delaware County Campus students, for example, enjoyed their first exposure to melodrama—a production of *The Drunkard* by the Alpha Omega Players, a touring repertory theatre.

At Mont Alto, 250 persons crowded in auditorium with a seating capacity of 150 to watch a performance of the National Marionette Theatre. Shenango Valley students asked that the Oakland School of Theatre Dance be scheduled for a second performance, and it was standing room

only at Fayette Campus when the National Shakespeare Company presented *Hamlet* and *Much Ado About Nothing*.

Student Affairs representatives from all of the campuses meet to select the programs, usually with the help of a campus cultural affairs committee. No event can be scheduled unless a minimum of three campuses agree to host it. This "block booking" saved the University more than \$15,000 last year since many young performers will agree to reduce their fees if they can be guaranteed three or more performances.

Ortiz and Winterwood, classical folk singers, illustrate the process. They performed at the Allentown Campus Feb. 5, played Delaware County and Ogontz on Feb. 6 and 7, and moved to Schuylkill Feb. 8. The following week saw them appear at Capitol, Altoona, McKeesport, Beaver and New Kensington.

"The campuses make every effort to provide a variety of cultural experiences for their students," Dr. Kenneth Varcos, assistant vice president for student affairs, points out. "This year, for example, our musical offerings range from the Alard

String Quartet to Tim Eyermann, a jazz-rock fusion group. Ten different shows have been booked into the Altoona and Fayette Campuses during this school year, and nine into DuBois, Mont Alto, Schuylkill and York. Most of the other campuses will view a minimum of six to eight attractions."

Expenses are further reduced when campuses co-sponsor events with their communities. At Schuylkill, senior citizens attended the performance of *Black on Broadway*, a musical program featuring Broadway hits. Local school children watched the Mudhead Mimes perform at Worthington Scranton and the National Marionette Theatre at Capitol Campus and New Kensington. Many high school students had their first taste of a live Shakespearean production at McKeesport, while York Campus invited Penn State alumni living in York County to enjoy the performances at that campus.

Still another bonus of the program, Dr. Varcos points out, is direct student contact with the performers. Mime Musica artists, for example, shared acting tips during workshops at the Beaver, Berks, New

Kensington and York Campuses.

Penn State's College of Arts and Architecture is also developing new programs for the '80s to share with the branch campuses. Faculty members from the School of Music will tour both as soloists and in groups, giving students the chance to hear ensembles ranging from the Claremont Wind Ensemble to the Blue Band.

The Department of Theatre and Film is readying two productions to tour the campus circuit. The first is the comedy-drama, *Varities*, and the second, a musical review, *Starting Here, Starting Now*.

Larger campuses mount their own efforts. Capitol Campus has a lecture series as well as a resident dance company, Danceteller. Some campuses, such as Hazleton, provide further enrichment by purchasing tickets through their Student Affairs Office to such events as the local community concert series and making them available free to students. At Beaver, Student Affairs personnel will buy tickets to events in nearby Pittsburgh, if there is enough demand, and sell them to students at a discount.

Flight operators save aircraft

Quick action by two flight operators at University Park Airport during a recent emergency resulted in the saving of two lives and an aircraft.

Robert Kessling and Karl Heebner received a distress call from a private plane at approximately 6:15 p.m. A Michigan-bound pilot and passenger were lost and clouds had forced their craft to drop to the dangerously low altitude of 2100 feet, in terrain where some mountains reach 3000 feet.

"We called the Phillipsburg Flight Service (at Mid-State Airport) to find out where the plane was because they have all of the equipment to track a plane down," Mr. Kessling says.

Thomas Johnson, the air traffic controller on duty at Mid-State, received their call. Using Mid-State's direction finder, he located the plane's position near Tyrone, to Mid-State's southwest. Bald Eagle Mountain, however, barred communication between Mid-State and the low-flying aircraft.

Mr. Johnson and the University Park flight operators quickly improvised a solution: Mr. Johnson transmitted flight directions via phone to Messrs. Kessling and Heebner, who in turn relayed them to the pilot via the University Park Airport unicom radio. They also enabled Mr. Johnson to hear the pilot directly by holding the telephone receiver to the unicom.

Thus connected, Messrs. Johnson, Kessling and Heebner guided the plane northeasterly through the Bald Eagle Valley. When the plane was directly south

of Mid-State, they told the pilot to turn north and climb into the clouds. The pilot hurdled Bald Eagle Mountain and landed his craft safely at Mid-State.

Mr. Johnson says the rescue would not have been possible without the help of Messrs. Kessling and Heebner. "Without their timely action and professional conduct, this incident might have had a different outcome."

Richard Morgan, chief of the Phillipsburg Flight Service, also cited the University Park flight operators for their "outstanding response in a critical situation."

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 665-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., March 27, 1980. OO NOT COPY TO THE AREA THAT HAS THE VACANCY.

Applications for staff areas are considered, in accordance with Fair Employment practices (FE-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ADMINISTRATIVE AIDE-STUDENT AFFAIRS, University Park. Responsible to the Assistant Vice President for Student Affairs for Special Programs and Services for assisting with administrative matters in the Educational Opportunity Program, Developmental Year Program, Black Scholars Program, Regular Black Admissions Program, and at the Community Centers, and handling the various administrative problems which arise. Bachelor's degree or equivalent, plus over one, up to and including two years of effective administrative experience in a university setting.

SENIOR SYSTEMS ANALYST-MANAGEMENT ENGINEERING, University Park. Responsible to a senior staff member for the design and implementation of innovative systems. Interact with customers in defining problem areas and formulating logical statements and developing solutions. Conduct studies of major systems problems, developing decisions using systems analyses techniques. Act as project leader for directing analyses, programming, and implementation of data processing systems. Bachelor's degree or equivalent in industrial engineering or basic computer systems and systems planning, plus over four and up to and including seven years of effective experience in systems development and operations. Ability to communicate orally and in writing is required.

ASSOCIATE MANAGER-NITTANY LION INN, University Park. Responsible to the General Manager for the overall coordination and direction of the day to day operation of the Nittany Lion Inn and the supervision of the Inn employees. Required to instruct the overall character and total performance results of the Manager, Landscaping, Equipment, and Vehicle Maintenance for the supervision and coordination of the activities of assigned technical service landscape employees. Responsible for management of all trees, shrubs, and flower beds and related horticultural aspects of landscape maintenance. Establish and maintain all phases of planned landscape programs, including snow removal operations. Responsible for the overall character and total performance results of all areas under supervision. Requires an associate degree in horticulture or equivalent, plus two to four years of effective experience. Demonstrated competency in supervising landscape maintenance, ground/steep and horticultural operations is desired.

FOREMAN, GROUNDS MAINTENANCE AND CULTURE MAINTENANCE AND OPERATIONS, University Park. Responsible to the Manager, Landscaping, Equipment, and Vehicle Maintenance for the supervision and coordination of the activities of assigned technical service landscape employees. Responsible for management of all trees, shrubs, and flower beds and related horticultural aspects of landscape maintenance. Establish and maintain all phases of planned landscape programs, including snow removal operations. Responsible for the overall character and total performance results of all areas under supervision. Requires an associate degree in horticulture or equivalent, plus two to four years of effective experience. Demonstrated competency in supervising landscape maintenance, ground/steep and horticultural operations is desired.

There are positions in certain work units that, because of the large number of such positions, frequently are still available after employees in the work unit have been considered. They are listed below and will not be listed on an individual vacancy basis. Application for such positions may be made at any time, and you are welcome to make your interests known now to the Employment Division for future consideration when such vacancies occur. These positions are:

POSITION TITLE	LOCATION
Assistant Coordinators	Student Affairs
Assistant Food Supervisors	Housing and Food Service
Computer Operators	Intercollegiate Research
Programs	Program Management Services
Residence Hall Area Coordinators	Students Affairs
Cardiology Technicians	Hersey
Cyto-Technologists	Hersey
Clinical Laboratory Assistants	Hersey
Clinical Laboratory Technologists (HEW)	Hersey
Critical Care Monitoring Technicians (Jr. & Sr. Levels)	Hersey
Cyto-Technologists	Hersey
Licensed Practical Nurses	Hersey
Medical Technologists (CLA, MLT, CLT-HEW)	Hersey
Nuclear Medical Technicians	Hersey
Perfusionists	Hersey
Pharmacists	Hersey
Physical Therapists	Hersey
Physician's Assistants	Hersey
Psychiatric Assistants	Hersey
Radiology Technicians	Hersey
Research Technicians (Jr. & Sr. Levels)	Hersey
Respiratory Therapy Technicians	Hersey

(331-1) The Office of Technology Assessment (OTA) announces that Congressional Fellowships for 1980-81 are open to doctoral level men and women of all disciplines of science and technology, including, but not limited to physical and biological sciences, engineering, law, economics, environmental and social sciences, and public policy. Application deadline is May 1 for a June 30 announcement (six are chosen). The one-year fellowship period begins in September. (Ref. OTA announcement)

(331-2) The NSF/NEH Ethics and Values in Science and Technology program funds projects of an interdisciplinary nature to identify previously unrecognized issues related to past, present, or projected developments. Preliminary proposals are due May 1. Contact Dr. Arthur Narberg at NSF (202-282-7770). (Ref. OFP deadlines)

News in Brief

(Continued from page 1)

aliens in lieu of a passport for obtaining library privileges, dealing with local businesses, or in connection with athletic activities.

There is no charge for the card; however, aliens wishing to obtain a laminated card with a photograph may do so for a fee of \$1.

Swim Relay participants wanted

The annual Faculty-Staff-Grad Student Swim Relay will be held Saturday, March 29, at the Natatorium, beginning at 7 a.m. and ending about 9 p.m. Each of the 25 participants will swim one mile.

Any member of the faculty or staff or any graduate student may volunteer to participate, but the number is limited to 25. Contact Dave Gustine at 237-7683 or Sid Barnard at 865-5491 to enter your application.

Summer financial aid deadline extended

There is still time for supervisors to encourage students to file summer applications for financial aid. The eligibility deadline for part-time and full-time college work study programs and for the faculty aide program has been extended to Friday, March 21.

ARL employees show true Christmas spirit

Closing its books on 1979, the Committee for the Applied Research Laboratory Community Service Fund reports that ARL employees and their families contributed \$816 to the fund during the Christmas season.

The proceeds were distributed to Skills, Inc.; Meals on Wheels; Pennsylvania Association for Retarded Citizens; the Bellefonte and State College YMCAs; and Retirement Living of Centre County.

In addition, two \$100 awards were made to students at the Vo-Tech School, selected by the staff there on the basis of the students' progress in their fields. These awards, which were initiated in 1977, are now presented annually.

A tradition of Christmas giving to the community has been established at ARL since 1964, when employees decided to contribute to a charitable fund in lieu of sending Christmas cards.

Spring arts classes open

Registrations are now being accepted for the Saturday Morning Art School of the School of Visual Arts. Courses, open to children of all ages, will begin March 22. Advance registration can be made by calling Ruth Barner at 865-6570.

Small Business Center to aid Centre County firms

A Small Business Development Center (SBDC) is now in operation at the University, as a clearing house for information and assistance to small businesses in Centre County.

President Oswald explains that the SBDC is part of a statewide network sponsored jointly by the University and the U.S. Small Business Administration.

As part of the statewide network, the Penn State SBDC also will have operations at Penn State's Capitol Campus in Middletown, serving Dauphin County, and at the York Campus. Other SBDCs will be provided by the University of Pennsylvania's Wharton School, University of Pittsburgh, Lehigh and Bucknell Universities, Wilkes College, and the University of Scranton.

Dr. Oswald said the University has been placing more and more emphasis on the problems and needs of small business.

"This vital segment of the economy

deserves the attention it now is getting," he said. "The contributions of the small businessman, through his industry and innovation, make him an important national resource."

The Centre County SBDC is located in Room 501F, J. Orvis Keller Building.

Renting your house? This booklet may help

Faculty members about to go on leave may be interested in a booklet, on sale at Penn State's Bookstore, titled "How to Rent Your Own Home."

Written by two faculty wives from their own hard-earned experience, the booklet is an expanded version of material prepared for the Faculty Women's Club's Housing Referral Service, which authors Judy Aronson and Nancy Spear helped organize.

Included are sections on setting the rent, locating tenants, obtaining references and security deposits, leases, insurance, cleaning, taxes, etc. An appendix contains a master checklist and forms to help owners determine rentals and advertise their homes.

Copies of the booklet are also available at the Housing Referral office in Room 318 Willard Building. The office is open from 9:30 to 11:30 a.m. on Tuesdays and from noon until 2 p.m. on Thursdays. The phone number is 865-1538.

Family understanding furthered by program

The Individual and Family Consultation Center of the University is offering a free program designed to help individuals solve problems in their families or simply to enrich friendship and mutual appreciation among family members.

According to Anne Yenchko, program coordinator, the program teaches one or more members of a family what they can do to gain greater understanding of themselves and others in their family and how they can resolve conflicts — whether minor or very important, painful ones — in ways that don't further damage the relationship and, in fact, may make it stronger than ever. To accomplish this goal, single parents, couples, and families are taught a variety of skills.

The program takes a minimum of 15 hours to learn and, depending on the desires of the family, may extend for a longer period. Meeting times are arranged

to suit participants.

Anyone interested may phone Ms. Yenchko at 865-1751 from 8 a.m. to 5 p.m. weekdays.

Reading Room moved

The Architecture Reading Room has been moved from Sackett Building to Room 207 Engineering Unit C. To reach it, patrons should use the elevator in the new glass and brick connector between Units C and D (in line with the rear of University House and the walk-way through Hammond). Turn right off the elevator and go down the ramp to the library. The phone number will continue to be 863-0511.

AAUW requests donations for annual used book sale

The State College Branch of the American Association of University Women requests donations of all types of books for its annual used book sale to be held the week of April 21.

AAUW is also happy to receive LP records, art prints, sheet music, maps, dress patterns, children's magazines, literary and historical journals, and such specialized magazines as Antiques, Etude, Needlework, Arizona Highways, Popular Mechanics and Genealogy.

Donations may be left at the yellow collection bin on Aaron Drive at N. Atherton Street, at the box just inside the door of Thrift Drug on Western Parkway, and at Schlow Memorial Library. For pick-up of large donations, call 237-8068.

Proceeds from the sale, which is held at the Wesley Foundation, go to help local and national educational programs and fellowships.

Volunteers sought for blood pressure research

Volunteers are needed for a research project on high blood pressure. Subjects desired are males 18 to 40 years old, with blood pressure greater than 140/90. Volunteers will receive free physicals, exercise stress tests, and blood cholesterol testing.

Interested persons should call Jim Knight, a graduate assistant in the Noll Human Performance Laboratory, at 863-0525 weekdays from 9 a.m. to noon.

Palladino

(Continued from page 1)

will be named a University professor of nuclear engineering. Provost Eddy will appoint a search committee for the new dean within the next month.

A native of Allentown, Dean Palladino received his B.S. and M.S. degrees in mechanical engineering from Lehigh University in 1938 and 1939. He did graduate work in nuclear engineering at the University of Tennessee and in business and management at the University of Pittsburgh, and received an honorary Doctor of Engineering degree from Lehigh University in 1964.

Before coming to Penn State in 1959 as professor and head of the Department of Nuclear Engineering, he worked for the Westinghouse Electric Corporation for 20 years, including four years on loan to the Oak Ridge and Argonne National Laboratories.

From 1950 to 1959, while at Westinghouse, he was in charge of reactor core design for the Submarine Prototype Reactor, Mark I; for the Nautilus Reactor; and for the Shippingport Atomic Power Station.

In 1958 he was awarded the Westinghouse Order of Merit for Technical Direction of Reactor Designs of the Nautilus and Shippingport power plants. In 1956 he received the Prime Movers Award of the American Society of

Mechanical Engineers for his work on the Shippingport plant.

As the first head of Nuclear Engineering at Penn State, Dean Palladino was responsible for development and implementation of course work and graduate programs, and for research in nuclear engineering. He was appointed dean of the College in 1966.

Dean Palladino is a licensed professional engineer in Pennsylvania. He also is a member of the National Academy of Engineering, a member of the American Society for Engineering Education, and a fellow of both the American Society of Mechanical Engineers and of the American Nuclear Society. In 1970-71, he served as president of the American Nuclear Society.

He also served the state and the nation on a number of important committees. He is a past member of the Governor's Energy Council and the Governor's Science Advisory Committee, for which he also chaired the Energy Management Subcommittee.

In addition, he served previously as a member and chairman of both the Pennsylvania Advisory Committee on Atomic Energy Development and Radiation Control and the U.S. Advisory Committee on Reactor Safeguards, which reviews all nuclear plants proposed for construction and operation in the United States.

Dean Palladino has written numerous papers on engineering education, nuclear reactors and atomic energy.

Elsewhere in Academe

The ratio of students to faculty members will increase from 10 to 12 by 1985 at Wesleyan University, the result of a new five-year financial framework adopted by the institution's trustees. The size of the study body will rise from 2,450 to 2,600 and the number of the faculty members drop by attrition from 260 to 235.

Roughly \$30 billion would be needed just to allow U.S. colleges and universities to catch up with years of neglected maintenance in campus buildings, according to recent estimates by the National Association of College and University Business Officers. In Georgia, for example, the state university system reports that it needs \$12 million annually to get the buildings on its 32 campuses back in shape. Last year, however, it was able to allot only \$2.25 million for maintenance purposes.

Efficient

(Continued from page 1)

schools expanded their faculties last year, according to the Commission.

— Fall Term student credit hour production per full-time resident instruction faculty member at Penn State decreased seven-tenths of one percent between 1977 and 1978. However, the credit hour production of full-time faculty members at Penn State was 38 percent greater than at Temple, the next highest state-related university in this category. Those same full-time faculty members at Penn State reported an average of 11.8 class contact hours in 1978, as compared to 10.5 at Pitt and 10.9 at Temple. The report notes the difficulties in making comparisons since Pitt defined full-time faculty as those employed full-time at the university regardless of function.

Penn State, as noted earlier, included only those individuals paid solely from resident instruction funds.

— Penn State reported average class sizes in lower division courses of 29.9, compared to 30.4 at Pitt and 24 at Temple. In upper division courses, the figures were 27.8 for Penn State; 22.3 for Pitt; 19.7 for Temple.

— At Penn State, the number of undergraduate courses taught increased by 24 (1.4 percent) during the last two academic years. At the same time, the number of undergraduate student credit hours produced decreased by 1.1 percent, an anomaly that may be explained by the creation of new courses at Behrend College and Capitol Campus. At the master's degree level, the number of courses decreased by seven (2.1 percent) while student credit hour production was increasing by 425 or 1 percent. The Commission criticized Temple for reporting a drop of 35,600 undergraduate student credit hours and an increase of 33 courses.

— Penn State reported fewer faculty members at the rank of professor (20 percent) and associate professor (25 percent) than any other public college or university in Pennsylvania. At Pitt, 23 percent of the faculty hold professorial rank; 34 percent are associate professors. At Temple, the figures are 26 and 30 percent, respectively. At the state-owned institutions, 33 percent of the faculty members hold the rank of professor; 38.7, the rank of associate professor. The Commission suggests a possible limit of 60 percent for those in the combined professor and associate professor ranks.

University Park Calendar

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

March 20-30

Special Events

Thursday, March 20

Phi Delta Kappa Initiation, 5 p.m., Room 112 Kern. Banquet, 6 p.m., Nittany Lion Inn. Penn State Annual Invitational Film Festival, 7 p.m., Rooms 102 and 112 Kern, through March 22.

Penn State Karate Club demonstration, 7:30 p.m., Room 104 White Bldg.

*IAHS/School of Journalism, History of Photography Lecture, 8 p.m., Room 101 Kern. Zoe Smith-Nesterenko, Univ. of Tulsa, on "The Style of Life: The Influence of European Photographers and Picture Editors on Life Magazine."

Jazz Festival, Tarnished Six, 8 p.m., HUB Ballroom.

Friday, March 21

Board of Trustees meeting, Capitol Campus. Deadline to sign up for Spring Term Group Health Insurance for graduate students, Room 305 Kern.

Sports: "gymnastics (women), EAIAW Championships, noon-5 p.m. and 7-10 p.m., Rec. Hall. Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. E. Willard Miller, assoc. dean, E & MS, speaker.

Commonplace Theatre, *The Harder They Come*, 7 and 9 p.m., Room 112 Kern. Interlandia, folkdancing, 7:30 p.m., HUB Ballroom.

Jazz Festival, Bravura and Sonny Fortune, 8 p.m., Eisenhower Auditorium.

Saturday, March 22

Board of Trustees meeting, Capitol Campus. France-Cinema, *Autumn Sonata*, 7 and 9 p.m., Room 112 Kern.

Sports: volleyball (men) vs. Ohio State, 7 p.m.; gymnastics (women), EAIAW Championships, 7:30 p.m., Rec. Hall. Alliance Francaise Scholarship Benefit Concert, 8:30 p.m., Music Bldg. Recital Hall. Phyllis Trio and others, French Chamber Music. Evening with the Arts, Will Stuts, one man show depicting Mark Twain and Edgar Allen Poe, 8:30 p.m., Schwab.

Sunday, March 23

Pan-Hel, Women's Awareness Week, through March 29. University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. James Martin, psychology, PSU, speaker.

Unity Christian Campus Ministries Service, 11:15 a.m., Frizzell Room, Eisenhower Chapel.

*HPER, National Physical Education and Sport Month, Aquatics Program, demonstrations of diving, synchronized swimming, survival swimming and whitewater canoeing, 2-4 p.m., Natatorium.

Zoe Pappas, 'cello, 3:30 p.m., Music Bldg. Recital Hall.

Commonplace Theatre, *The Harder They Come*, 7 and 9 p.m., Room 112 Kern.

Monday, March 24

Music 299A, Samuel Bayard, English emritus, will discuss Pennsylvania Folk Music, performance by Rustical Quality String Band, 3 p.m., Music Bldg. Recital Hall.

Sports: fencing (women) vs. Barnard College of Columbia Univ., 3 p.m.

Shakespeare film, *Romeo and Juliet* (BBC), 6:30 p.m., Room 101 Chambers.

France-Cinema, *Autumn Sonata*, 7 and 9 p.m., Room 112 Kern.

Spanish Dept. Lecture, 8 p.m., Room 101 Kern. Joe Martin Recurda, Spanish playwright, on "Creacion, arranque y evolucion de un autor dramatico durante la Espana de Franco y la transicion a la democracia."

Barbara O'Connor, French horn, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, March 25

Gallery Talk, 10:30 a.m., Museum of Art. Clare LeCorbeller, assoc. curator of European sculpture and decorative arts, Metropolitan Museum of Art, discusses Chinese export porcelain.

STS/Three Cultures Dialogue on "Science/Technology for War or Peace," luncheon, noon; presentation, 12:20 p.m., Room 101 Kern. Donald P. Verene, philosophy, on "Technology Increase: Etlud Revisited."

Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Betsy Bowden, English, on "Ambiguity on the Page, Flexibility in Performance: A New Look at Chaucer."

*Pittsburgh Symphony Orchestra Residency, Chamber Orchestra, Donald Johanos, conductor, with student soloists, 3:30 p.m.; Opera Orchestra, Michael Tilson Thomas, conductor, one-to-one rehearsal with students of Penn State Symphony Orchestra, 7:30 p.m., both in Eisenhower Auditorium.

Shakespeare film, *Romeo and Juliet* (BBC), 6:30 p.m., Room 112 Chambers.

Comp. Lit. Film Series, Antonioni, *The Passenger*, 7 and 9 p.m., Room 112 Kern.

Wednesday, March 26

*Pittsburgh Symphony Orchestra Residency, coaching sessions conducted by Randolph Kelly, Eugene Phillips and Phyllis Jo Kubej, Pittsburgh Symphony Orchestra, 9:30 a.m.-noon, Music Bldg. Recital Hall; Opera Orchestra, Donald Johanos, conductor, with student soloists, 1 p.m., Eisenhower Auditorium; lecture, Michael Tilson Thomas, conductor of Pittsburgh Symphony Orchestra, on "Russian Virtuoso Composers," 4 p.m., Music Bldg. Recital Hall; Chamber Orchestra, Donald Johanos, conductor, one-to-one rehearsal with students from PSU Chamber Orchestra, 7 p.m., Eisenhower Auditorium.

Graduate School Lecture, 8 p.m., Keller Auditorium. Herbert Smith, Nobel Laureate, Carnegie Mellon Univ., on "Computer Simulation of Human Thinking."

*IAHS/School of Journalism, History of Photography Lecture, 8 p.m., Room 101 Kern. Larry Schaaf, Univ. of Texas/Austin, on "Charles Piazzi Smyth: Photographer and Iconoclast."

Shakespeare film, *Henry IV Part I* (BBC), 8 p.m., Room 304 Boucke.

Thursday, March 27

Pass/Fail.

*IAHS/Pittsburgh Symphony Orchestra Residency, Leonard Sharrow, Pittsburgh Symphony Orchestra, coaching session with the Claremont Quintet, 3:30 p.m., Music Bldg. Recital Hall.

URTC, Jose Martin Recurda, English version by Robert Lima, Spanish, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Friday, March 28

Pass/Fail.

*Pittsburgh Symphony Orchestra Residency, Kathy Butera, asst. manager, Pittsburgh Symphony Orchestra, coaching session with the young people's concert, 2 p.m., Music Bldg. Recital Hall; Victoria Bond, Pittsburgh Symphony, conducting workshop, 4 p.m., Room 130 Music Bldg.

*College of Science, Ernest C. Pollard Lecture, 3:45 p.m., Room 112 Kern. Philip C. Hanawalt, biology, Stanford Univ., on "Cellular Responses to Damaged DNA in Bacteria and Mammals."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Robert Blanchard, director, School of Journalism, on "Congress and the News Media."

Karate Club film, *Seven Samurai*, 7 and 10 p.m., Room 102 Forum.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Artists Series, Pittsburgh Symphony Orchestra, Michael Tilson Thomas, conductor, 8:30 p.m., Eisenhower Auditorium.

Saturday, March 29

Annual Faculty/Staff Grad. Student Swim Relay, 7 a.m.-9 p.m., Natatorium.

Artists Series, Pittsburgh Symphony Youth Concert, 10:30 a.m., Eisenhower Auditorium; Pittsburgh Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sports: softball, preseason tournament, 11:30 a.m., lacrosse (men) vs. Syracuse, 2 p.m.; volleyball (men) vs. Rutgers/Newark, 7 p.m.

France-Cinema, *Peppermint Soda*, 7 and 9 p.m., Room 112 Kern.

Karate Club film, *Seven Samurai*, 7 and 10 p.m., Room 102 Forum.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Artists Series, Pittsburgh Symphony Orchestra, Michael Tilson Thomas, conductor, 8:30 p.m., Eisenhower Auditorium.

Sports: softball, preseason tournament, 11:30 a.m., lacrosse (men) vs. Syracuse, 2 p.m.; volleyball (men) vs. Rutgers/Newark, 7 p.m.

France-Cinema, *Peppermint Soda*, 7 and 9 p.m., Room 112 Kern.

Karate Club film, *Seven Samurai*, 7 and 10 p.m., Room 102 Forum.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Artists Series, Pittsburgh Symphony Orchestra, Michael Tilson Thomas, conductor, 8:30 p.m., Eisenhower Auditorium.

Sports: softball, preseason tournament, 11:30 a.m., lacrosse (men) vs. Syracuse, 2 p.m.; volleyball (men) vs. Rutgers/Newark, 7 p.m.

France-Cinema, *Peppermint Soda*, 7 and 9 p.m., Room 112 Kern.

Karate Club film, *Seven Samurai*, 7 and 10 p.m., Room 102 Forum.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Artists Series, Pittsburgh Symphony Orchestra, Michael Tilson Thomas, conductor, 8:30 p.m., Eisenhower Auditorium.

Sports: softball, preseason tournament, 11:30 a.m., lacrosse (men) vs. Syracuse, 2 p.m.; volleyball (men) vs. Rutgers/Newark, 7 p.m.

France-Cinema, *Peppermint Soda*, 7 and 9 p.m., Room 112 Kern.

Karate Club film, *Seven Samurai*, 7 and 10 p.m., Room 102 Forum.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Artists Series, Pittsburgh Symphony Orchestra, Michael Tilson Thomas, conductor, 8:30 p.m., Eisenhower Auditorium.

Sports: softball, preseason tournament, 11:30 a.m., lacrosse (men) vs. Syracuse, 2 p.m.; volleyball (men) vs. Rutgers/Newark, 7 p.m.

France-Cinema, *Peppermint Soda*, 7 and 9 p.m., Room 112 Kern.

Karate Club film, *Seven Samurai*, 7 and 10 p.m., Room 102 Forum.

HUB Mini-Concert, Abilene, country rock, 9 p.m., HUB Ballroom.

Michael Tilson Thomas will conduct the Pittsburgh Symphony Orchestra March 28-29.

SEMINARS

Thursday, March 20

Acoustics, Jeremy L. Walter, mechanical engineering, on "The Coincidence of Higher Modes in Cylindrical Shell Vibrations," 4 p.m., Room 75 Willard (new listing).

Statistics, Morris Degroot, Carnegie-Mellon Univ., on "Optimal Matching: How to Repair a Broken Sandal," 4 p.m., Room 160 Willard (new listing).

CPSP, Murray Levine, SUNY/Buffalo, on "The Adversary Model and Other Quantitative Approaches to Evaluation in Mental Health and Other Social Programs," 8 p.m., Room S-209 Henderson.

Friday, March 21

Surface Science, W.F. Saam, physics, Ohio State Univ., on "Theory of Multilayer Helium Films," 11 a.m., Room 339 Davey.

Analytical Chemistry, Abrahm Babin, graduate student, on "Hydrolysis Studies of Mo(V) Species," 11:10 a.m., Room 333 Whitmore.

Electrical Engineering, Mordehai Heiblum, IBM, on "Edge-Mom: An Integrated Optical Device. Will It Make an Optical Transistor Possible?" 3:30 p.m., Room 329 EE East.

Aerospace Engineering, Robert Lasgauer, Office of National Etudes et de Recherches Aérospatiales (ONERA), France, on "Recent Research Work on Unsteady Flow in Turbomachines at ONERA," 4 p.m., Room 214 Hammond.

Monday, March 24

Psychology/Organizational Behavior, Karl Weick, Cornell Univ., on "Concept of Loosely Controlled Systems," 3 p.m., Room 101 Kern.

Tuesday, March 25

Plant Pathology, Larry D. Lathrop, graduate student, on "Importance of Allelopathic Effects on Seed Germination," 9:45 a.m., Room 213 Buckhout.

Organic/Inorganic Chemistry, Edward Bruce, graduate student, on "Use of Enzymes in Organic Synthesis," 12:45 p.m., Room 333 Whitmore.

Biology, Bruce C. Parker, Virginia Polytechnic Inst. and State Univ., on "The Biology of Antarctic Dry Valley Ecosystems," 4 p.m., Room 8 Mueller.

Thursday, March 27

Chemistry, Stanley R. Crouch, Michigan State Univ., on "Analytical Applications of Fast Kinetics," 12:45 p.m., Room 333 Whitmore.

Meteorology, Ray Deland, New York Univ., on "Numerical Modeling of the Dispersion of Atmospheric Pollutants," 3:55 p.m., Room 112 Walker.

Acoustics, George Alexandrovich, Stanton Magnetics, Inc., on "Problems of a Phonograph Cartridge Manufacturer in Reproducing Modern Analog Recordings," 4 p.m., Room 75 Willard.

Mathematics, Dragan Marusic, Univ. of Vexing, England, on "Some Remarks on Vertically-Symmetric Graphs and Related Families of Graphs," 4 p.m., Room 103 McAllister.

Institute of Electrical and Electron Engineers, I.S. Nisbet, electrical engineering, on "Three Faces of the U.S.S.R.," 7:30 p.m., Room 329 EE East.

EXHIBITS

Chambers Gallery: Eleanor Drake-Lewis, experimental weavings; bronze cast sculpture by Fine Arts Students.

HUB Galleries: "College of Arts and Architecture Exhibit," "Original Drawings by Aldo Rossi, noted Italian Architect," through March 22; master works from the National Glass Conference, opens March 23. The Gallery: Bruce Johnson, watercolors and prints; Browning Gallery: Art Alliance of Central Pa. Members' exhibit, through March 29, Art Alley.

Kern Gallery: Beth J. Fogel, mapscares, through March 21; Fredrick J. Tarr, drawings; Nicholas Webb, ceramics, through March 28; Chen Chih Ming, ink drawings, opens March 22.

Museum of Art: Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager; aspects of representation after World War II - works from the permanent collection; Chinese export porcelains from the collection of Dr. and Mrs. Harold L. Tonkin.

Patte Library: Janice Becker, drawings, through March 27; Rome Hanks and Mary Edith Miller, photographs, opens March 28. East Corridor Gallery: Maura Fadden, paintings and drawings, through March 27; Ann Mancini, photographs, opens March 28; Lending Services Lobby: "History of Photography Week Exhibit, 19th century books and other memorabilia, through March 25, Rare Books Room.

Robeson Cultural Center: Francis Couch, paintings, prints and drawings.

Visual Arts Bldg. Zoller Gallery: National Glass Conference Exhibit, opens March 23.

* Asterisk indicates event tied in with Penn State's 125th anniversary year.

Penn State Intercom

Virginia Sibbison

First Alumni Fellow will visit April 1-4

Virginia Hayes Sibbison will be the first of seven Alumni Fellows to visit Penn State this Spring.

Dr. Sibbison, whose visit to the College of Human Development is scheduled April 1-4, is executive director of Welfare Research, Inc., a non-profit corporation that provides consultant and contractual services to public and private agencies in the human services field.

The Alumni Fellows Program, which began in 1973, is designed to promote closer ties between prominent alumni and the University community. The Fellows add an extra dimension to the academic curriculum by sharing their experiences in their respective professions with undergraduate and graduate students and with faculty members and administrators.

Among the other Fellows who will visit University Park this spring are Charles Bierbauer '66, an international correspondent with ABC News and a guest of the College of the Liberal Arts, April 7-10.

Robert Moore '48, president of the Financial Executive Institute of New York, sponsored by the College of Business Administration, April 22-24.

Carroll V. Hess '47, dean of the College of Agriculture at Kansas State University, guest of Penn State's College of Agriculture, April 29-May 2.

James L. Everett, III, '48, G '49, president and chief executive officer, Philadelphia Electric Company, sponsored by the College of Engineering, April 30-May 2.

Allen S. Russell, B.A. '36, M.A. '37, Ph.D. '41, vice president for science and technology at ALCOA, visiting the College of Science, April 29-May 2.

The College of Medicine will also sponsor a Fellow. He is J. Lloyd Huck '43, president and chief operating officer of Merck and Co., Inc., who will visit Hershey April 27-29.

Dr. Sibbison holds three Penn State degrees. She earned her B.A. in psychology in 1970, and her M.S. and Ph.D. in human development in 1972 and 1974, respectively.

In addition, she served as an instructor in the Division of Community Development in 1972, as a project director at the Institute for the Study of Human Development from 1972-75, and as an assistant professor in Community Development during 1974-75.

During her tenure as director, Welfare Research, Inc., has conducted more than 50 research projects, has expanded its funding base to some \$2 million annually, and has published more than 60 reports.

A Letter to the University Community

One of the salient messages of Penn State's *Perspective* on the '80s is the need for "courageous leadership . . . by the best available persons" to guide this University during the new decade.

At the present time, Penn State has several crucial leadership positions to be filled. One search committee is sifting nominations and applications for the post of Vice President and Dean of the University-wide System of Continuing Education and Commonwealth Campuses — surely one of the most important academic and administrative positions in the entire University.

A second search committee is considering candidates for the directorship of our Beaver Campus, and a third will begin work soon to determine candidates for the newly created position of Dean of the Behrend College. Soon another search will begin for a Dean of the College of Engineering as a result of Dean Palladino's decision to step down from active administration two years before mandatory retirement.

To speak frankly, however, we have been disappointed by the lack of significant response for the positions now available. I am convinced that there is a great reservoir of talent within and

without this University that could be tapped if members of the faculty and staff would only take some time to think about which of their colleagues — both within and without the institution — could live up to the leadership expectations expressed in the *Perspective* — administrators who will not be afraid of the "difficult choices" necessary "to create a climate that fosters excellence in program quality."

I would like to encourage faculty and staff members to give us the benefit of their knowledge. Some of you may have hesitated to get involved, perhaps because you believe appointments are decided in advance or that the administration is not really interested in your views.

Let me assure you that we are looking just as diligently as we can for the best possible leadership for our University in the '80s and that your suggestions and advice will receive every consideration. Please take a few moments of your time to send to me or to the Provost or to the appropriate committee chairman your suggestions.

Sincerely,

John W. Oswald

Behrend Dean Search Committee appointed

Ten persons have been invited by Provost Eddy to serve on a Search Committee for the position of Dean of Behrend College.

The Committee, which will be chaired by Dr. Roger L. Sweeting, associate professor of physical education at Behrend, invites nominations and applications for the position.

The Dean of the College will serve as the principal academic and administrative officer responsible for the general management of budgets, facilities, programs, planning, and personnel. The Dean shall report to the Provost and will be a member of the Council of Academic Deans.

In light of the changing circumstances of the 1980s, candidates should be resourceful, realistic, and adaptable. They must also meet all of the following criteria:

- Prior experience as a faculty member and as an academic officer responsible for personnel, programs, and finances at either the departmental or college level.
- Terminal degree in discipline or professional field.

— Demonstrated commitment to multidisciplinary undergraduate education and lifelong learning.

— Demonstrated ability to organize tasks, supervise people, manage funds, map plans, cultivate innovation, and engage in fund raising.

Evidence of scholarly research and professional activity.

Candidates should be available by mid-summer 1980 for assignment in Erie. Nominations and letters of application (with resume) should be sent by April 28 to: Search Committee, Dean of Behrend College, Office of the Provost, Room 205 Old Main, University Park.

The members of the Search Committee are: Dr. Richard P. Chait, assistant provost; Dr. Mary G. Chisholm, assistant professor of chemistry; Behrend; Dr. Robert E. Dunham, vice president for undergraduate studies; Dr. Daniel A. Frankforter, associate professor of history; Behrend; Charles C. Kolb, instructor in anthropology, Behrend; Michael D. McCloskey, student at Behrend; Dr. George J. McMurry, professor of electrical engineering; Dr. Robert D. Pashek, associate dean, Business Administration; and Dr. Christine F. Pootjes, associate professor of microbiology.

Senate to vote on Scholars, zero credit courses

Legislative proposals on zero credit courses and the University Scholars Program, an oral report on a freshman year conference, and a forensic session on new Department of Energy regulations regarding Soviet bloc visitors highlight the agenda for the April 1 University Faculty Senate meeting.

The meeting will be held at 2:10 p.m. in Room 112 Kern Building. A detailed schedule for the May 6 meeting, to be held at the Altoona Campus, will be presented.

Although no zero credit courses have been approved since 1971, nine that were approved prior to that date are still offered or required.

They include two engineering lecture courses (Engr 10 and 11); Introduction to Engineering (Engr 801 and EE 301); two Air ROTC field training courses and Army ROTC summer camp (ROTC 250, 350 and 304); French House Residence (Fr 101); and in-service Food Service and Housing Administration training (FSHA 50).

Believing that students should not be required to take or attend courses for which they receive no credit, the Committee on Curricular Affairs is recommending that "administrators of the programs offering zero credit courses be consulted regarding either dropping . . . or offering them for appropriate credit." The Committee suggests that these decisions be reached in time to apply to the May 1981 Blue Sheet.

The Senate, having heard an oral informational report last month on the University Scholars Program, will be asked by its Committee on Curricular Affairs and Undergraduate Instruction to pass enabling legislation for the program.

This will require changes in Policy 65-00 (Departmental Honors Programs) of *Academic Policies and Procedures for Undergraduate Students*. Proposed changes include setting general guidelines for admission to and retention and participation in the program.

Honors advisors would be assigned to help students develop appropriate programs of study and to ensure that BDR and major requirements are satisfied even if certain graduation requirements are waived. Students will be asked to complete and defend an honors thesis or to pass a comprehensive examination.

Honors course designations would be applied to specially designated sections of

(Continued on page 6)

News in Brief

President at Hershey

President Oswald is in The Milton S. Hershey Medical Center for treatment of a cracked rib.

Dr. Oswald, who was in Middletown for a meeting of the Board of Trustees, suffered chest pains early last Saturday morning and was admitted to the Hospital's critical care unit. Later he was transferred to a regular room.

The injury was associated with an exercise program begun by the President recently. He is expected to be released from the Hospital by the end of this week.

Ambassador Young

Andrew Young to speak in Rec Hall April 2

Andrew Young, former U.S. Ambassador to the United Nations, will present a free, public talk at 8 p.m. Wednesday, April 2 in Rec Hall. His speech, on foreign affairs, is sponsored by Colloquy.

Ambassador Young resigned his post at the U.N. last August after disclosures that he had met secretly with representatives of the Palestine Liberation Organization.

During the 1960s, he was a close associate of Dr. Martin Luther King Jr., serving as an executive in the Southern Christian Leadership Conference. In 1972, Mr. Young was elected to Congress from

(Continued on page 5)

Penn Staters

Robert LaPorte, professor of public administration, returned last week from Bangladesh and Sri Lanka, where he presented a series of lectures for the U.S. International Communications Agency. Dr. LaPorte's topics were public administration and economic development administration.

Charles Mann, chief of Rare Books and Special Collections and professor of English, gave a lecture on the Great Exhibition of 1851 at the Walters Art Gallery, Baltimore, on March 10.

Two faculty members have been awarded National Endowment for the Humanities Summer Stipends. **Dr. Wendy J. Sarvasy**, assistant professor of political science, will use her grant to study John Stuart Mill's theory of democracy. **Dr. Priscilla Clement**, assistant professor of history at Delaware County, will study methods of caring for indigent children in the 19th century in New York, New Jersey and, possibly, the Midwest. She will analyze case records from such agencies as orphanages, reform schools, and foster care programs.

Dr. Charles D. Ameringer, professor of Latin American history, has been elected president of the Middle Atlantic Council of Latin American Studies (MACLAS) for 1980-81. MACLAS is an interdisciplinary association comprised of professionals, scholars, teachers, and students in the Latin American field from the states of New Jersey, Pennsylvania, Delaware, Maryland, Virginia, and West Virginia.

Dr. Michael E. Scofield, assistant professor of education, has been honored by the American Rehabilitation Counseling Association with an award for his research on "An Empirically Derived Taxonomy of the Affective Domain in Rehabilitation Counseling." This was one of two projects selected as 1980 ARCA Research Award winners. He received the award in March at a meeting of the American Personnel and Guidance Association in Atlanta.

Dr. Marshall H. Kaplan, professor of aerospace engineering, organized and taught a five-day course on Spacecraft Systems Engineering at the European Space Research and Technology Center in The Netherlands during the week of Feb. 25.

J. Thomas Eakin, director of the Office of Religious Affairs, has been elected president of the Association for Coordination of University Religious Affairs.

A one-man exhibition of 25 prints and small paintings by Peter Jogo, assistant professor of art, was recently on display at the Andrews Gallery of William and Mary College, where Professor Jogo presented a lecture-demonstration on the color intaglio process and discussed his work. He also gave a lecture-demonstration last month at SUNY-Potsdam.

Dr. Patrick D. Lynch, professor of education, was recently elected vice president for educational administration of the American Educational Research Association. He will serve for one year, beginning in April.

Floyd B. Fischer, vice president emeritus for Continuing Education, has been appointed by President Oswald as the first life member of the Advisory Council for the Pennsylvania Technical Assistance Program (PENNTAP).

Retirements

Daniel T. Bresnahan, a general maintenance worker at Shenango Valley, will retire March 29. He has been a member of the staff since Jan. 5, 1970.

Grace K. Austin, a clerk in the bookstore at the Berks Campus, will retire April 1. She has been at Berks since Feb. 29, 1968.

Four College of Engineering faculty members have been honored for their achievements. **Dr. J. Larry Duda**, professor of chemical engineering, received the College's annual award for outstanding achievement in research. Excellence in Teaching Awards were presented to **Edwin J. Parrish**, assistant professor of general engineering; **Dr. Carl H. Wolgemuth**, assistant professor of industrial engineering; and **Dr. Carl H. Wolgemuth**, professor of mechanical engineering.

The awards consist of a certificate and a check for \$500.

A faculty member since 1971, **Dr. Duda** is best known for his work on molecular diffusion in polymer solutions, in collaboration with J.S. Ventras. Support for this research has been provided by the National Science Foundation, the U.S. Bureau of Mines and the Department of Energy.

Dr. Duda is the author or co-author of more than 60 articles. He received his B.Sc. from Case Institute of Technology in 1958, and his M.S. and Ph.D. from the University of Delaware, in 1961 and 1963 respectively.

Professor Parrish was honored as an outstanding faculty member teaching primarily in the first two years of the baccalaureate program. **Professor Knott** as the faculty member at the assistant professor level, and **Dr. Wolgemuth** as the senior faculty member who has been at

Penn State five years or more.

Chosen by a committee appointed by Dean N.J. Palladino, the three winners received the highest ratings on an effectiveness teaching survey conducted by the Dean's Office. They also were recommended by colleagues and students.

Professor Parrish joined the Altoona faculty as an instructor in 1960 and became an assistant professor in 1969. He teaches undergraduate courses in engineering drawing, industrial engineering and physics.

A mechanical engineering graduate of Penn State, he has attended graduate school at the University of Pittsburgh and at Case Western University.

Professor Knott taught part-time as an instructor in industrial engineering, beginning in 1963. He became a full-time faculty member in 1978. Previously, he lectured at England's Dudley Technical College, from which he was graduated. He earned his M.S. at Penn State in 1966 and is currently a doctoral candidate at the University of Loughborough in England.

Dr. Wolgemuth, a member of the faculty since 1963, teaches undergraduate and graduate courses, specializing in the study of power plants, engineering analysis of thermal systems, and thermodynamic processes.

He received his B.S. from Penn State and his M.S. and Ph.D. from Ohio State.

Dr. Arnold

Nine distinguished scholars have produced a volume of studies in rhetorical communication which is dedicated to **Carroll C. Arnold**, professor emeritus of speech communication at the University. Entitled *Rhetoric in Transition: Studies in the Nature and Uses of Rhetoric*, the book was edited by **Eugene E. White**, professor of speech communication, and includes a preface by **Stanley F. Paulson**, dean of the College of the Liberal Arts. It was published by the Penn State Press.

Two Penn State faculty members, **Lawrence W. Rosenfield**, professor of speech communication, and **Henry W. Johnstone, Jr.**, professor of philosophy, are among the contributors.

Dr. Arnold, who retired in 1977, is widely known for his interest in history of theories of communication and for his attempts to bridge the gap between the purely theoretical and the use of rhetoric as a practical tool.

"Our volume is not only dedicated to Professor Arnold but it also draws its creative impulse from his attempt to conjoin the nature and uses of rhetoric," **Dr. White** notes in his introduction. The volume is divided into two sections, the first devoted to the nature of rhetoric and the second, to application to rhetorical theory.

A continuing theme in the book is that concepts of rhetoric that once were widely accepted have been undermined since World War II, and there no longer is a consensus as to the meaning, substance and scope of rhetoric. By examining ways of conceptualizing and exploring rhetorical experience, the book contributes to a better understanding of the nature and uses of rhetorical communication.

Dr. Arnold has received a number of awards and honors for his work, among them the Speech Communication Association's highest award for distinguished service. His department at Penn State established a lectureship in his name following his retirement, and the Speech Communication Association of Pennsylvania instituted its own **Carroll Arnold Award**. The Alumni Society of the College of the Liberal Arts presented its distinguished teaching award to him in 1976.

Dr. Arnold came to Penn State in 1963 from Cornell University, where he was chairman of the Department of Speech and Drama.

In addition to **Drs. White, Rosenfield** and **Johnstone**, other contributors to the book are: **Lloyd F. Bitzer** and **Edwin Black**, of the University of Wisconsin-Madison; **Robert L. Scott**, University of Minnesota; **Douglas Ehninger**, University of Iowa; **James R. Andrews**, Indiana University; and **Herbert W. Simons**, Temple University. The book closes with an essay by **Dr. Arnold**, originally published in 1968.

All royalties from the book have been assigned by the contributors to the University's Department of Speech Communication to support the annual **Carroll Arnold** lectures.

Obituaries

Paul S. Crossman, a country agriculture Extension representative from 1916 to 1951, died March 6. He was 90 years old.

William O. Houtz, a guard at the Applied Research Laboratory from 1953 to 1966, died March 13 at the age of 75.

Harvey S. Lynn, a carpenter with the Office of Physical Plant from 1929 to 1959, died March 13 at the age of 88.

George D. Wesner, a utilities analyst with the Office of Physical Plant, died March 13. He was 54 years of age. Mr. Wesner joined the staff in 1971 as a mason, a position he held until 1978.

Human Development seeks closer ties

The University's College of Human Development has launched a Spring campaign to establish closer ties with its faculty members, administrators and constituents at the 17 Commonwealth Campuses, the Behrend College, the Milton S. Eisenhower Medical Center and the Radnor Graduate Center.

Representatives from the Office of the Associate Dean for Continuing Education and Commonwealth Campuses are holding five regional meetings to lay the foundation for working more effectively in the delivery of the College's programs of instruction, research and service at the various campuses.

According to **Dr. Edward V. Ellis**, associate dean for Continuing Education and Commonwealth Campuses, the objectives of the meetings are:

- to bring together the groups of campus administrators, the College's part- and full-time Resident Instruction and Continuing Education faculty members, campus academic advisers, College alumni and selected College and University representatives from University Park so that they can become better acquainted and more aware of their relationships;
- to update these groups on the current status of the College, its organization, programs and directions for the future;
- to elicit the views, advice, concerns and proposals of these groups in regard to the College and its programs;
- to provide instructors with course information and assistance, to satisfy requirements for continuing approval of part-time instructors and to recruit candidates for part-time faculty from the College alumni who attend the meetings.

The first meeting was held March 25 at the DuBois Campus, with component groups from the Behrend College, the Altoona Campus and University Park. Subsequent meetings will be held at the Oquon Campus on April 3 (with Allentown, Berks, Delaware County and Radnor); at the New Kensington Campus on May 1 (Beaver, Fayette, McKeesport and Shenango Valley); at the Hazleton Campus on May 6 (Schuylkill, Wilkes-Barre, the Williamsport Continuing Education office and Worthington Scranton).

"The campaign is an outgrowth of the recent 'Human Development - Action '79' program held at University Park for all of our faculty members, alumni, Continuing Education administrators and others," **Dr. Ellis** notes. "We at University Park realized that there should be follow-up meetings within local service areas in order to reach our colleagues, instructors and staff at a more personal level."

Aside from **Dr. Ellis**, the team of College officials who are traveling to the meetings includes: **William H. Parsonage**, Margaret L. Bastuscheck and **Dr. Martha L. Stirling**, the officers of the Vice President for Continuing Education and of the Dean for Academic Instruction at the Penn State Alumni Association also will be represented.

In addition, **Dean Evan G. Pattishall Jr.** and selected program heads from the College will attend several meetings.

Among the selections available to Artists Series patrons next season will be the Pittsburgh Ballet in "Coppelia" (top), John Browning (above left), Kurt Masur directing the Gewandhaus Orchestra of Leipzig (right) and the Bella Lewitzky Dance Company in "Inscape" (below).

Worth, 'Elephant Man,' Browning among Artists Series '80-'81 events

Pianist John Browning will open the Artists Series 1980-81 season with an appearance Sept. 28 in Eisenhower Auditorium.

This year, subscribers to one of the four series—Fine Arts, Music, Theatre/Dance, and Drama—will be given priority for tickets to a September special event, a production of the Tony Award-winning musical, *A Chorus Line*.

Browning's appearance is part of the Music Series, which also includes *The Barber of Seville*, sung in English by the Goldovsky Grand Opera Theatre on Oct. 25; the Minnesota Orchestra, Nov. 12; the Empire Brass Quintet, Jan. 11; the Wuertemberg Chamber Orchestra, Feb. 22; and the Gewandhaus Orchestra of Leipzig, April 3.

Another award-winning play, Bernard Pomerance's *The Elephant Man*, will come to Eisenhower Oct. 19 as one of six offerings in the Theatre/Dance series. The others are *The Long Wharf Theatre* production of *The Lion in Winter* by James Goldman, Oct. 4; the first U.S. tour of *Danza Nacional de Cuba*, a modern dance ensemble, Feb. 20; the Pennsylvania Ballet with orchestra in *Coppelia*, March 20; actor Vincent Price as Oscar Wilde, April 10; and the Bella Lewitzky Dance Company, April 24.

The Pittsburgh Chamber Orchestra with conductor and violinist Szymon Goldberg opens the Fine Arts Series on Oct. 10.

Other offerings will be a Jan. 18 appearance by baritone Hakan Hagegard; the Concord String Quartet, Feb. 6; the New York Woodwind Quintet, March 14; and oboist Heinz Holliger, April 14.

Fine Arts patrons may add two other offerings to their subscriptions and obtain a 30 percent discount on the seven "concerts." The "bonuses" are a second

Pittsburgh Chamber Orchestra concert on Oct. 11 with pianist David Bar-Ilan and *The Inimate* P.D.Q. Bach on Feb. 13.

The Drama Series, which is held in Schwab Auditorium, will bring back Irene Worth in a program entitled "Letters of Love and Affection" at a date to be announced. Ossie Davis and Ruby Dee will appear Nov. 7 in a group of dramatic readings, "Inside/Out." Subscribers to this series may also choose two of three presentations by The National Theatre of Great Britain. These are "Pieces of Pinter," March 27; "Kingsley Amis' Nonesay of Light Verse (Carroll to Coward)," March 28; and "Love, Marriage and Infidelity, Sonnets of William Shakespeare," March 29.

The Artists Series will continue its Lively Arts for Young Audiences programs. This year the Pittsburgh Chamber Orchestra will give a youth concert on Oct. 11. The Prince Street Players will stage *Pinocchio* Jan. 31; and the Bella Lewitzky Dance Company will present a program expressly for young people on April 26.

A Ballet Film Festival from the Bolshoi will be shown on Tuesday evenings. Sept. 30 will bring *Swan Lake* with Plisetskaya and Fadeychev; Oct. 14, *The Little Humbacked Horse* with Plisetskaya; Nov. 4, Plisetskaya in *Anna Karenina*; and Dec. 16, *Romeo and Juliet* with Ulanova and Zhdanov.

The Artists Series is accepting renewals from current subscribers through Monday, April 14. Sales to new subscribers will begin Thursday, May 1. Subscription order forms are available at the Artists Series office in Pine Cottage. Further information may be obtained by calling 865-1871.

News in Brief

(Continued from page 1)

Georgia's Fifth District, becoming the first black congressman from the state in 101 years. He was reelected in 1974 and 1976.

A graduate of Howard University and Hartford Theological Seminary, he is an ordained minister in the United Church of Christ.

Toulson to present clarinet recital April 2

An evening of chamber music will be presented by Smith Toulson, clarinetist, and a group of University musicians at 8:30 p.m. Wednesday, April 2, in the recital hall of the Music Building.

Mr. Toulson, associate professor of music, has selected works by four composers for his program. "Grand Duo Concertante" by 19th century German composer Carl Maria von Weber will open the concert, followed by the Sextet for Wind Quintet and Piano by Francis Poulenc, a 20th century French composer.

Opening the second part of the program will be Ludwig Spohr's Six Songs, and Mr. Toulson will close his program with the Trio for Cello, Clarinet and Piano by Johannes Brahms.

Eight musicians will assist Mr. Toulson for the concert. They are Steven Smith and Jill Olson, pianists; Leonard Feldman, cellist; Suzanne Roy, soprano; Overda Page, flutist; Christopher Callahan, French hornist; Monte Bedford, oboist; and Mark Dutkevitch, bassoonist.

Several Gifts and Endowments operations moved to Willard

To provide necessary space, several of the operations of the Office of Gifts and Endowments have been transferred to Room 17 Willard Building (ground level immediately behind Audio Visual Services). The phone numbers for these

offices continue to be 865-6588 and 865-6589.

The offices which have moved are gifts processing and records and the annual giving program group. The former includes Jere Willey, director of administration and information services, and Joanne Farwell, Jean Beightol, Jan Glunt and Barbara Moyer.

Annual giving staff members are George Moellenbrock, director; Cindy Tift, assistant director; David Colton, director, development field services; and Suzanne Seamans and Cynthia Alt.

Gifts and Endowments personnel remaining in Room 100 Old Main are Charles Lupton, executive director; A. William Engel, associate director; James Rhodes, director, planned giving; and Sara Coslo and Ruth Hockenberry. Two new phone numbers have been assigned the Old Main Office—865-6580 and 865-0042.

With the move to Willard, a major revision and upgrading of Penn State's alumni and development records system has become operational, allowing on-line processing of gifts and alumni biographical information. Faster and more efficient records and gifts handling capabilities are now possible.

Deadline past for filing by former DOD employees

All former officers or employees of the Department of Defense who separated from service on or after July 1, 1975, and who are currently employed by the University are required to submit a report (DD Form 1787) annually to the Department of Defense.

This report for the federal fiscal year (Oct. 1 through Sept. 30, 1979) should have been submitted by Feb. 15, 1980. Because failure to comply with the filing of this report constitutes a misdemeanor, the Department of Defense has requested that the University remind those concerned of their responsibility.

From the Trustee Docket

Inflation to force room and board charges up

The Trustees approved an increase in room and board charges for University students, effective in September 1980.

"We have worked very hard to minimize costs to students, but because of high inflation, an increase in room and board rates was unavoidable," President Oswald told the Trustees.

"The tragic inflation that has affected all University operations hits especially hard in the costs of utilities and food. Maintenance and labor costs also are climbing.

"All these factors make an increase necessary in operations such as residence halls, which, as self-supporting units, must generate enough income to offset expenses. No tuition or State funds support dormitories or dining halls," Dr. Oswald said.

"The Trustees' action will change the room-and-board charge to a student with a double room from \$555 to \$610 per term, an increase of \$55. The rate for an academic year of three terms will be \$1,830. The cost of single rooms with board will change from \$600 to \$655.

Dr. Oswald pointed out that the overall 9.9 percent increase is considerably less than the 1979 national inflation rate of 13.3 percent.

"Cumulative inflation from 1974 through 1979 was 66.6 percent," he said. "Penn State room and board costs were rising only 40.8 percent in the same period."

The \$55 increase represents an increase of \$16 per term for room rental, \$36 for board and \$3 in the counseling fee that is included in the overall residence hall costs.

The double room rate for graduate students increases from \$555 to \$610 for room and board; the single room rate will be \$655. Rooms for graduate students who do not use campus dining halls will increase from \$254 to \$282 for double rooms, and from \$294 to \$322 for single rooms. Room and board for graduate students electing to use food coupons will be \$362 for a double room and \$402 for a single, per term.

Rates for Atherton Hall apartments for graduate students at University Park have been increased by \$40 per term for singles and \$50 for doubles, bringing rentals to \$397, \$427 or \$566 per term, depending on the type of facility.

University Manor Apartments at the Milton S. Hershney Medical Center have increased by \$20 to \$25 per month, depending on the type of facility.

New rates at the Capitol Campus will be \$168 and \$178 per month.

Other apartments have increased at varying rates.

Report describes foreign studies programs

Since 1962, more than 3,500 students have been enrolled in foreign studies programs offered by the University, Dr. Robert E. Dunham, vice president for undergraduate studies, said in a report to the Trustees.

From 250 to 300 students study abroad each year, he added, and 18 different programs, in Europe, Africa, South America and the Far East, are offered currently.

"A unique feature of the Penn State program," he said, "is its financing. No State funds are used to support the individual foreign studies programs. All the expenses are covered by income from tuition, room and board fees and a modest program fee."

Foreign studies were initiated at Penn State in 1962, when the College of the Liberal Arts established study-abroad programs in Cologne, West Germany, and in Strasbourg, France.

In a report on the current year, Provost Eddy pointed out that 1,164 students from more than 90 foreign countries are enrolled at Penn State.

"These students represent virtually

every culture on earth," Dr. Eddy said. "We benefit intellectually and culturally from their presence. They add a special dimension to Penn State."

The country with the largest number of students at the University is the Republic of China with 132, Dr. Eddy said. India is second with 97.

Of the total, 862 are graduate students, 213 undergraduates and the rest in various other categories. The College of Engineering has the heaviest representation of foreign students with 272. Science enrolls 157, and Liberal Arts, 150.

Dr. Eddy said 1,046 of the total are studying at University Park.

According to Dr. Dunham, all regularly enrolled Penn State students are eligible to study abroad, if they are in good academic standing and show evidence of maturity, stability and self-discipline. An all-University grade-point average of at least 2.5 out of a possible 4.0 is required. The 1979 group had an overall average of 3.2.

Tuition for all foreign studies programs is the same as for study at the University Park campus. When room-and-board arrangements are provided, the cost is based on standard University Park rates. Students must pay a program fee of about \$35 and round-trip fare for which group rates usually are available.

"Standard financial assistance is available through the Office of Student Aid and can be used for all foreign studies programs," Dr. Dunham said. "The Office of Foreign Studies also has a modest Grant-in-Aid Fund for exceptional cases."

He said Penn State students are encouraged to take advantage of opportunities to study abroad. Among objectives of the various programs, he said, are enrichment of academic studies, increasing international understanding, giving students a first-hand look at other cultures and a more objective look at their own and encouraging reciprocal exchange programs.

All foreign studies programs are administered by the Office of Foreign Studies, directed by Dr. W. Lamarr Kopp.

Two education majors receive new titles

The titles of two majors in the College of Education have been changed.

Special Education is the new designation for the major which was called Education of Exceptional Children; and Communication Disorders is the new name for the former major in Speech Pathology and Audiology.

"Special Education more accurately reflects that program's emphasis and is the more conventional label used across the nation," Provost Eddy explained. "The new title emphasizes the needs of exceptional individuals across a wide range of ages and is not limited to the needs of children."

In addition to speech pathology and audiology, Dr. Eddy said, the major in Communication Disorders will include a program in education of the hearing impaired.

"The new title includes all three program emphases," he said.

No changes are planned in the programs or budgets of either major.

Berks names buildings

The Berks Campus has named its newest building and renamed two others.

The Berks Campus Community Center is now the official name for the newest structure, expected to be in use in Fall 1980. The building had been referred to informally as the "physical education/convention building" or the "human resources building."

"The name 'Community Center' encompasses both the campus community and the community-at-large of Berks County, the latter being the source of

financial support for the building," said Berks Director Harold W. Perkins.

"The word 'Center' refers to the multiple uses of the building for physical education, sports, assemblies and convocations, and exhibits," he added.

In addition, the Campus's former Community-Student Learning Center — which houses classes, conferences, assemblies, exhibits, offices, food services, the bookstore and a theatre, as well as special continuing education and community activities — has been renamed the Student Center.

"Simplifying the name of this building, which was built primarily from funds raised locally, broadens the definition of our students, who come to the Campus for the diverse purposes of continuing education and part-time or full-time coursework," Dr. Perkins said.

The Berks Campus Library Building has been renamed the Memorial Library.

"The new name dignifies the accommodations for full library service and for the storage of archives, memorabilia and historical items of the Berks Campus and its predecessor, the Wyomissing Polytechnic Institute," Dr. Perkins noted.

The new names were approved by the Berks Campus Senate and Advisory Board before being presented to the Trustees.

14 persons appointed to study Board committees

Trustee President Quentin E. Wood has appointed 14 individuals to an ad hoc committee to study the organization and operation of the Board's three standing committees.

The ad hoc committee was authorized by the Board.

Walter J. Conti, of Doylestown, vice president of the Board, will serve as chairman. Other Trustees named were: Howard O. Beaver, of Reading; State Rep. Robert A. Madigan of Towanda; Stanley G. Schaffer of Pittsburgh; Charles W. Shaeffer of Baltimore; J. Luther Snyder of Camp Hill; William K. Ulerich of Clearfield; and Dr. Helen D. Wise of State College.

University administrators named were: Provost Edward D. Eddy; Dr. Richard Grubb, senior vice president for administration; Robert A. Patterson, senior vice president for finance and operations; and Patricia Rosdil, associate secretary of the Board.

President Oswald and Mr. Wood will serve as ex-officio members of the ad hoc committee.

By-laws of Penn State's Board of Trustees provide for standing committees on Educational Policy, Physical Plant and Finance.

New award funds announced

Award funds announced to the Trustees include:

— A \$10,000 Raymond and Janet Larson Grant-in-Aid Fund to meet necessary college expenses for varsity football players. The initial principal has been contributed by Raymond Larson, of Kylertown, PA. Students who are outstanding members of the varsity football team are eligible for the grants, as are prospective students who will play varsity football and show promise of future success.

— A \$4,100 Men's Varsity Fencing Award to recognize student-athletes who are committed to scholarship and participate in extra-curricular activities. The initial principal was contributed by fencing team members, and alumni and friends of the University. All students of at least three terms standing who have shown exemplary academic achievement, have demonstrated fencing ability, and have participated in community or University extracurricular endeavors are eligible for the award.

— An \$1,800 A.L. Bortree Award Fund for outstanding students who plan to become veterinarians. The initial principal has been established by a transfer of income

earned and by contributions of faculty, alumni, industry and other interested parties. The fund was formed to honor Dr. Alfred L. Bortree on his retirement after 26 years as the founding head of the Department of Veterinary Science.

— A Dan H. Waugh Memorial Teaching Award of more than \$1,600 to commend superior teaching skills in graduate assistants in chemistry. The initial principal was donated by the friends, teachers and colleagues of the late Dan Waugh, of Storrs, Conn., a teaching assistant who earned a Ph.D. in chemistry in 1976. He died of leukemia in June 1979. Graduate teaching assistants performing classroom or laboratory instruction in chemistry are eligible for the award. They must have received superior teaching evaluations or shown outstanding promise as teachers.

— A Charles R. Chambers Memorial Fund of more than \$1,500 to provide awards for employees in the University's Controller's Office. The initial principal was given by the family, friends and associates of the late Charles R. Chambers, director of accounting at the University from January 1967 until his retirement in July 1977. Full-time employees in the Controller's Office who show a conscientious and dedicated attitude toward their professional responsibilities above that normally expected or required are eligible for the award, which will not be less than \$100.

— A Pennsylvania State Forest Academy/School Memorial Award of more than \$1,500 to recognize promising sophomore forestry majors enrolled at the Mont Alto Campus. The initial principal was contributed in honor of the late Joseph T. Rothrock, George H. Wirt and Edwin A. Ziegler by friends, classmates, colleagues and students of the Academy/School. Joseph Rothrock was a physician and naturalist who founded the Academy. George Wirt was the first director of the academy and a primary formulator of its programs. Edwin Ziegler was a later director who also played a major role in developing the academy.

— A \$1,000 Nabisco Food Science Scholarship to help needy food science students with their college expenses. Nabisco, Inc. of East Hanover, NJ, will contribute the money annually for the scholarships, which are open to all students in the College of Agriculture's Food Science Department.

Physical Plant alterations

The Trustees authorized expenditure of additional funds of \$32,029.36 for a proposed locker room and shower addition to the Convocation and Recreation Building at Fayette.

The addition was originally approved in November 1979 at a cost of \$130,000. The entire project is being funded with money raised by the Fayette Campus Advisory Board. No State or tuition funds are involved. Robert A. Patterson, senior vice president for finance and operations, told the Trustees.

Final plans for a swine confinement barn to house animals used in research by the College of Agriculture have been approved. The 40-by-145-foot wood frame building will be located adjacent to the swine research facility on Porter Road.

Bids on the building, to cost about \$130,000, will be let immediately, with construction to be completed by mid-summer 1980.

An addition to the Milton S. Hershney Medical Center, approved last September, moved a step closer to initial construction with Trustee approval of preliminary plans.

University Park Calendar

March 27- April 6 Special Events

Thursday, March 27

Cinemathèque Film Series, *Two for the Road*, 6:30 and 8:30 p.m., HUB Assembly Room.
Commonplace Theatre, *Jimi Hendrix*, 7 and 9 p.m., Room 112 Kern. Also March 28 and 30.

URTC, Jose Martin Recuerda, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Friday, March 28

Pas/Fail.
Pittsburgh Symphony Orchestra Residency, Kathy Butera, asst. manager, Pittsburgh Symphony, conducts a panel on preparing young people's concerts, 2 p.m., Music Bldg. Recital Hall; Victoria Bond, Pittsburgh Symphony, conducting workshop, 4 p.m., Room 110 Music Bldg.

"College of Science, Ernest C. Pollard Lecture, 3:45 p.m., Room 112 Kern. Philip C. Hanawalt, biology, Stanford Univ., on "Cellular Responses to Damaged DNA in Bacteria and Mammals."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker, Robert Blanchard, director, School of Journalism, on "Congress and the News Media."

CSA film, *The Wild Bunch*, 7 and 9:30 p.m., Room 101 Chambers. Also March 29.

Karate Club film, *Seven Samurai*, 7 and 10 p.m., Room 102 Forum. Also March 29 and 30.
Interlandia, folkdancing, 7:30 p.m., HUB Ballroom.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Artists Series, Pittsburgh Symphony Orchestra, Michael Tilson Thomas, conductor, 8:30 p.m., Eisenhower Auditorium.

Saturday, March 29

Annual Faculty/Staff/Grad. Student Swim Relay, 7 a.m.-9 p.m., Natatorium.
Artists Series, Pittsburgh Symphony Youth Concert, 10:30 a.m.; Pittsburgh Symphony Orchestra, 8:30 p.m., both in Eisenhower Auditorium.

Sports: softball, preseason tournament, 11:30 a.m.; lacrosse (men) vs. Syracuse, 2 p.m.; volleyball (men) vs. Rutgers/Newark, 7 p.m.
France-Cinema, *Peppermint Soda*, 7 and 9 p.m., Room 112 Kern.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Sunday, March 30

University Chapel Service, 11 a.m., Eisenhower Chapel, archdeacon Dance Program, Pat Heigel-Tanner, director.

Unity Christian Campus Ministries Service, 11:15 a.m., Frizzell Room, Eisenhower Chapel.

Joel West, baritone, and David Hudson, tenor, 3:30 p.m., Music Bldg. Recital Hall.
HUB Mini-Concert, Abilene, country rock, 9 p.m., HUB Ballroom.

Monday, March 31

Drop deadline.
Registration deadline for Summer Term 1980.
Pace/Fail.

Course repeat deadline.
Sports: baseball vs. Bloomsburg (double header), 1:30 p.m.

Music in Interesting Times Lecture, 3 p.m., Music Bldg. Recital Hall. Robert P. Morgan, composer and critic, Univ. of Chicago, on "Music: Who Are Our Composers Writing For?"

Shakespeare film, *Henry V* (Olivier), 6:30 p.m., Room 101 Chambers.
France-Cinema, *Peppermint Soda*, 7 and 9 p.m., Room 112 Kern.

"College of Science, Priestley Lecture, 8 p.m., Room 119 Osmond. J.C. Polanyi, Univ. of Toronto, on "The Molecular Dynamics of Simple Chemical Reactions: Infrared Chemiluminescence and Chemical Lasers."

"AH/School of Journalism, History of Photography Lecture, 8 p.m., Room 101 Kern. A.B. Charley, Clarion State College, on "Man Ray: Last of the Red-Hot Dads." Brenda Hatch, soprano, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, April 1

Exhibition and sale of original graphic art from

Flamenco guitarist Carlos Lomas is appearing in URTC production of "The Innates of the Convent of Saint Mary Egyptian" now at the Pavilion Theatre.

Erikson Gallery, 11 a.m.-7 p.m., Kern Lobby.
Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Thomas Hale, French, on "Africa: Written Literature and Oral Literature."

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

School of Music Common Hour, 4 p.m., Music Bldg. Recital Hall.
Comp. Lit. Film Series, Frankenhimer, *The Fiver*, 6:30 and 8:45 p.m., Room 112 Kern. Shakespeare film, *Henry V* (Olivier), 6:30 p.m., Room 112 Chambers.

Artists Series film, *Tokyo Story*, 8 p.m., Schwab.
"College of Science, Priestley Lecture, 8 p.m., Room 333 Whitmore. John C. Polanyi on "Molecular Motions in Simple Chemical Reactions as Evidenced by the Motions of Newly Born Reaction Products."

Museum of Art Lecture, 8 p.m., Museum of Art, John C. O'Connor and Ralph M. Yeager discuss their collection of Pennsylvania prints.
URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Wednesday, April 2

Exhibition and sale of original graphic art from Erikson Gallery, 10 a.m.-5 p.m., Kern Lobby.
Sports: tennis (women) vs. Princeton, 1:30 p.m. Music in Interesting Times Lecture, 3 p.m., Music Bldg. Recital Hall. Burt Fennner, music, demonstration and discussion of electronic music.

France-Cinema, *Hiroshima Mon Amour*, 7 and 9 p.m., Room 112 Kern.

"College of Science, Priestley Lecture, 8 p.m., Room 333 Whitmore. John C. Polanyi on "The Effects of Differing Types of Molecular Motion in Reagents on the Probability of Chemical Reaction."

Colloquy, Andrew Young, former U.S. Ambassador to the U.N., speaker, 8 p.m., Rec. Hall.
URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Smith Toulson, clarinet, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, April 3

STS/Three Cultures Dialogue on "Science/Technology for War or Peace," luncheon, noon; presentation, 12:20 p.m., Room 101 Kern. Robert E. Harvay, political scientist, on "Role of Technology in U.S.-Soviet Relations."

Cinemathèque Film Series, *Spy Who Came in from the Cold*, 6:30 and 8:30 p.m., HUB Assembly Room.

"College of Science, Priestley Lecture, 8 p.m., Room 333 Whitmore. John C. Polanyi on "Energy Transfer Processes Studied by a

Variety of Methods Including State-Selected Supersonic Beams."

Spanish Dept. Lecture, 8 p.m., Room 112 Kern. Jose Martin Recuerda on "El amor y la muerte en el teatro de Garcia Lorca."

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Friday, April 4

Sports: track (men), Nittany Lion Relays (Decathlon), 3 p.m.; volleyball (men) vs. Springfield, 6 p.m.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Anthony V. Williams and Nancy Murdock, geography, on "Energy and the Sense."

France-Cinema, *Bread and Chocolate*, 7 and 9 p.m., Room 101 Chambers. Also April 5 and 6.

Commonplace Theatre, *Lisztomania*, 7 and 9 p.m., Room 112 Kern.

Interlandia, folkdancing, 7:30 p.m., HUB Ballroom.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Saturday, April 5

Sports: track (men), Nittany Lion Relays, 10 a.m.; baseball vs. Rutgers (doubleheader), 1 p.m.; lacrosse (men) vs. Ohio State, 2 p.m. Horticulture Dept. Easter flower sale, noon-4 p.m., behind Tyson Bldg.

Commonplace Theatre, *14th Tournee of Animation*, 7 and 9 p.m., Room 112 Kern.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Sunday, April 6

University Chapel Service, 11 a.m., Music Bldg. Recital Hall. Chapel Choir Easter Service, Tommie Irwin, director.

HUB Craft Center, registration for 2nd session classes, noon-5 p.m., daily through April 12; Open House, 7:30-9:30 p.m., Room 312 HUB.

Sports: tennis (men) vs. West Virginia, 1 p.m.; baseball vs. West Chester, 1:30 p.m.

Commonplace Theatre, *Lisztomania*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, March 27

Fuel Science, J.M. Tarbell, chem. eng., on "Nitric Oxide Formation During Coal Combustion," 4 p.m., Room 301 Steidle (new listing).

Institute of Electrical and Electronics Engineers, J.S. Nisbet, elec. eng., on "Three Faces of the U.S.S.R.," 7:30 p.m., Room 329 EE East.

Friday, March 28

Applied Research Labs, John C. Glowienka, Oak Ridge Assoc. Univs., on "The ABC's of

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Nuclear Fusion," 10:45 a.m., Eric A. Walker Conference Room, Applied Science Bldg.
Analytical Chemistry, Paul Longeway, grad. student, on "Infrared Laser Photochemistry of Silane," 11:10 a.m., Room 333 Whitmore.

Tuesday, April 1

Plant Pathology, Garfield G. Thomas, grad. student, on "Performed Chemical Barriers to Seed Infection," 9:45 a.m., Room 213 Buckhout.

Organic/Inorganic Chemistry, Charles Grisham, Univ. of Virginia, on "NMR and EPR Studies of Structure and Mechanisms of Kidney (NA+ and K+)-ATPase," 12:45 p.m., Room 333 Whitmore.

Wittgenstein's Vienna, Joseph J. Kockelmans, philosophy, on "Wittgenstein and Her's The Principles of Mechanics," 3:30 p.m., Room 319 Walker.

Engineering Science and Mechanics, H. Frost, ARL, on "Action of Ultrasound on Materials Simulating Biological Tissue," 4 p.m., Room 232 Hammond.

Thursday, April 3

Chemistry, Charles N. Reiley, Univ. of North Carolina/Chapel Hill, speaker.

Physics, Mark J. Cardillo, Bell Telephone Labs, on "The Fraction of Helium Atoms at Semiconductor Surfaces," 3:50 p.m., Room 445 Davey.

Fuel Science, R.J. Diefendorf, Rensselaer Polytechnic Institute, on "Thermodynamic Description of Pitch Mesophases," 4 p.m., Room 301 Steidle.

Mathematics, Joe Roilberg, CUNY, on "Some Relations Between Algebraic Topology and Group Theory," 4 p.m., Room 103 McAllister.

Friday, April 4

Physics, Mark J. Cardillo, Bell Telephone Labs, on "More on Fraction of Helium Atoms at Semiconductor Surfaces," 11 a.m., Room 339 Davey.

Analytical Chemistry, William Chan on "Microprocess Automation of Scientific Instruments," 11:10 a.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: Eleanor Drake-Lewis, experimental weavings and bronze cast sculpture by Fine Arts Students, through April 2.

HUB Galleries: master works from the National Glass Conference, The Gallery. Bruce Johnson, watercolors and prints, Browning Gallery. Art Alliance of Central Pa. Members' exhibit, through March 29; "Slavic Folk Arts Festival exhibit, opens April 1, Art Alley.

Kern Gallery: Frederick J. Tarr, drawings, through March 31; Nicholas Webb, ceramics, through March 28; Chen Chih Ming, ink drawings, through April 3; Ukrainian Club Easter display, opens April 1; David Rubello, photographs and paintings, opens April 5.

Museum of Art: Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager; aspects of representation after World War II — works from the permanent collection; Chinese export porcelains from the collection of Dr. and Mrs. Harold L. Tonkin.

Pattee Library: Janice Becker, drawings, through March 27; Rome Hanis and Mary Edith Miller, photographs, opens March 28, East Corridor Gallery; Maura Fadden, paintings and drawings, through March 27; Ann Mancini, photographs, opens March 28, Lending Services Lobby; Sidney Schwartz, sculpture, and Barbara Spirt, ceramics, through March 27, Main Lobby.

Robeson Cultural Center: Francis Couch, paintings, prints and drawings, through April 3.

Visual Arts Bldg. Zoller Library: National Glass Conference exhibit.

*Asterisk indicates event tied in with Penn State's 125th anniversary year.

Senate

(Continued from page 1)

regular courses, to courses specially designed for students in the program, and to independent study and 500-level courses taken by program students. If students arrange in advance with instructors to do significant alternative work in a course, the course could be designated an Honors-Supplement course.

Other changes in Policy 65-00 would provide for recognition of University Scholars and for regular Senate review of the program.

Senators will also be asked to make three changes in Policy 34-58 to give program students priority in access to overcrowded courses and allow them to take 400- and 500-level courses.

Finally, diplomas of program graduates would record the fact under a minor proposed revision to Policy 68-70.

Dr. Robert E. Dunham, vice president for undergraduate studies, will present an oral report on a two-day conference held March 13-14, dealing, in part, with freshman retention.

The request for a forensic session was made by Dr. Rustum Roy, professor of solid state science and director of the Materials Research Laboratory. Dr. Roy asked for a discussion of the implications of a memorandum from the Chicago Office of the Department of Energy which offers "guidance concerning relationships by DOE contractors with nationals of the USSR and other Soviet block countries as a result of the Soviet invasion of Afghanistan."

According to the memorandum, "The delegated authority to approve Soviet bloc visitors on a casual basis is to be suspended indefinitely. All requests for visits and assignments by Soviet bloc nationals to DOE facilities must be submitted to the Contracting Officer for approval. . . ."

ARL aide enjoys respite after 12 long years of study

It took 12 long years of balancing part-time college coursework with a family and a full-time job.

But on March 1, Hugh J. Clarke, 49, a senior engineering aide at the Applied Research Laboratory, graduated from Penn State with a B.S. degree in business administration.

"Even though it's been very rewarding, it's a relief not to be taking courses any more; I seem to have been going to school continuously for a quarter of my life," he says.

Mr. Clarke, a 1948 graduate of Altoona High School, had some familiarity with college courses well before he started pursuing his B.S.

"After being discharged from the Navy in 1954, I enrolled in an associate degree program in electrical technology that had just been started at the Altoona Campus. When I graduated in 1956, I accepted an R&D position with Curtis-Wright in Clearfield County. I also took some Penn State continuing education classes at night, which Curtis-Wright sponsored."

Joining the ARL staff at Penn State in 1959, he also enrolled in an engineering series of calculus and geometry courses to increase his knowledge for his work with underwater electroacoustic transducers. In 1962, family health problems forced him to discontinue his studies.

In 1968, he started to work toward the 133 credits required for the B.S. in business administration. Permitted to take about three credits per 10-week term during work hours, he held to this pace for 32 consecutive terms, taking only summers off.

"It's still hard for me to put my finger on why I wanted to do it," he notes. "Basically, it boils down to the desire for self-improvement and for acquiring the knowledge and skills that contribute to better performance on the job."

Mr. Clarke found his courses "very demanding, with tremendous competition. But I was always received very well by my

Librarian Charles W. Mann, and Dr. Wilma Stern, assistant professor of art history, inspect one of the volumes in the Archaeological Institute of America Centennial Exhibition, being held through April 24 in the Rare Books Room. The exhibit is sponsored by the Central Pennsylvania Society of the AIA.

"Until further notice, any communication with the Soviets either by letter, telefax or phone must be cleared with the Contracting Officer for Headquarters, DOE coordination/clearance. . . ."

Among other items on the docket is an informational report from the Committee on Academic and Athletic Standards reviewing its duties. These include recommending appropriate changes in *Academic Policies and Procedures*, reviewing petitions for exemption to these policies, approving athletic schedules, considering student eligibility for intercollegiate athletics, and helping to promote a sound academic climate for intercollegiate athletics.

During the last two years, two of the Committee's high priority problems have been closed practices and facilities use. The Athletic Standards Subcommittee expanded its membership by adding users of such facilities as the indoor Rec Hall

track, the Natatorium and White Building to provide an advisory body to Health, Physical Education and Recreation Dean Robert Scannell. Committee members have also instituted a policy for visiting closed practices to insure that procedures used there are congruent with University athletic policies.

An informational report from the Planning and Development Committee describing progress on the 1980 planning and budget procedures will be presented. The Committee is also offering a legislative proposal for monitoring the process of development and application of costing methods.

The Senate Libraries Committee has an oral report scheduled for the meeting.

According to a calendar which is included with the docket, the Senate will meet nine times during its 1980-81 year. No meetings will be held in December, July and August.

Hugh Clarke

younger classmates and the professors.

"My age provided no real advantage or disadvantage," he offers. "If you're older, you do have a little edge because you have some experience. But this degree was outside my field of practice, and I couldn't always come back to the lab and relate what I was experiencing in the classroom."

So why did he find business administration appealing?

"It seemed to me that business administration was a natural to go with my technical training, since business administration provides knowledge and skills in such areas as industrial relations, human resource management, planning, organizing and controlling—all of which I could apply to formal organizations."

Mr. Clarke had to stick to a rigid schedule to keep up with his assignments. "I set aside certain hours for studying each night, usually from about 7 to 10 or 11 and sometimes later. I also did a little studying on weekends."

At times, he recalls, there were bouts of

discouragement. "But you keep going. You look at the total picture and see that you're pretty well committed. You get the feeling that, if you quit now, everything is lost. This provides a strong motivation to continue."

Another form of support came from his family. His wife, Marge, is a private duty registered nurse in State College. Daughter Cathy is now a student in Altoona's Hospital's nursing program and will graduate in June.

The last 12 years have not been all work for Mr. Clarke. On football Saturdays, he enjoys tuckering at Beaver Stadium. He hunts and fishes, and on workdays he plays squash in Rec Hall over his lunch hour. He is also a member of the College Township Parks and Recreation Committee.

And, he claims, his coursework was far from finished.

"I'm going to take a rest for a little while, but there are some meteorology and anthropology courses I want to take. Winter Term's a good time for studying, so I'll probably take one then."

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 473-1387). Applications for these staff vacancies will be accepted until 5 p.m., April 5, 1980. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

JUNIOR RESEARCH AIDE, INTERCOLLEGE RESEARCH PROGRAMS, University Park Oversee support programs for animal health programs, surgery, necropsy and diagnostic procedures under direction of a clinical laboratory animal veterinarian. Position will involve animal restraint, injections, physical examinations, clinicalopathologic tests, first aid, radiography, sample collection, record keeping, operation of medical equipment and cooperation with veterinarians, students, and faculty. Associate's degree with emphasis in veterinary technology, or equivalent, plus three to six months of effective experience required.

DIRECTOR OF CAMPUS RELATIONS, Capital Campus Responsible for a comprehensive University Relations program for the entire campus to include public information, development programs and alumni affairs. Bachelor's degree or equivalent, plus four to seven years of effective experience involving development, fund raising, newspaper and/or journalistic writing and public relations.

APPLICATIONS PROGRAMMER/ANALYST, UNIVERSITY LIBRARIES, University Park Responsible to Senior Analyst/Programmer for conducting analyses of data processing and operational problems, determining detailed requirements to solve problems, formulating logical statement of systems problems, and preparing computer programs to satisfy desired results. Make presentations and submit written reports. Assist in providing technical control within the specifications of project schedules. Bachelor's degree or equivalent in basic computer systems and one to two years of effective experience in computer programming and analyses are required.

FINANCIAL OFFICER, Beaver Campus Responsible to the Controller for budget and expenditure control of campus operating budgets. Provide primary assistance to the campus director in financial and related administrative matters. Manage and control the campus operating funds, including petty cash and change funds. Ensure compliance with cash and other administrative policies. Prepare periodic financial reports, deposit all cash receipts, issue and settle advances for travel. Maintain and control student accounts receivable, process refunds, collect tuition and unpaid balances. Responsible for receipt and distribution of payroll checks. Responsible for property inventory, tagging of equipment, inventory records and periodic inventory reports. Bachelor's degree in accounting with two to four years of directly related experience in accounting operations.

SUPERVISOR, HEMATOLOGY LABORATORY, COLLEGE OF MEDICINE, Hershey Perform special studies such as immunoelectrophoresis, enzyme assays as well as other complex procedures requiring extensive technical training. Organize work assignments, direct and guide other technicians in the performance of various clinical and research studies. Establish and maintain quality controls for each procedure performed. Assist in the design and writing of protocols for various clinical and research studies which are to be performed. Responsible to Chief, Division of Hematology, for the supervision and operation of the Special Hematology Laboratory. Assist in assignments relating to clinical and research investigation within the Division of Hematology and supervise a varying number of lower-level technologists. A bachelor's degree in medical technology or equivalent, plus three to four years of effective experience.

LIBRARY ASSISTANT, Worthington Scranton Campus Responsible to the Campus Librarian for assistance in all phases of library operations, including circulation process, check-out and book returns. Supervise part-time personnel. Schedule work assignments. Maintain information files. Associate degree or equivalent plus up to one year of effective experience.

RESEARCH TECHNOLOGIST, COLLEGE OF SCIENCE, University Park Research in enzymology — enzyme purification, bacterial growth, chromatographic techniques, electrophoresis, enzymatic assays. Candidate should have some experience with various instruments such as spectrophotometers, centrifuges, fraction collectors, as well as techniques in handling low-level amounts of radioactive labeled compounds for tracer analysis. General areas: enzymic kinetics and mechanism, isotope exchange kinetics, membrane protein function from thermally labile bacteria. Bachelor's degree in chemistry, biochemistry, or closely related area with two years of effective laboratory experience.

Penn State Intercom

Freshman year, satellite communications groups named

Satellite TV might cut costs, improve communications

An ad hoc committee to explore the potential applications and feasibility of Penn State's better utilizing satellite television communications has been appointed by Dr. Richard E. Grubb, senior vice president for administration.

The committee will be chaired by Marlowe Froke, director of media and learning resources in Continuing Education. Among its charges are to investigate the possibilities of using satellite communications to conduct University business among the 22 Penn State campuses and to examine its uses in Continuing Education.

The committee will also study the opportunities satellite communications offer for student instruction and for recruiting. Other areas to be investigated include fund raising, alumni relations, agricultural extension communications, data transmission for the Libraries, and the producing of material for satellite/cable programming.

Satellite communications may provide an answer to holding the line on the ever-increasing costs of communication and transportation between and among the University's various constituencies, Dr. Grubb points out.

Serving on the committee will be: Charles R. Blunt, assistant director, systems planning and development; Dr. Ronald Chey, professor and chairman, obstetrics and gynecology; Hershey; Donald C. Dickason, dean of admissions; Dr. J. Cordell Hatch, professor of agricultural communications; Dr. Donald W. Johnson, director, University Division of Instructional Services; J. Thomas Kidd, associate executive director for alumni

(Continued on page 2)

Mr. Sullivan

Mr. Bierbauer

Two newsmen to share expertise

Walter Sullivan, science editor of The New York Times, will present the 1980 A. Dixon Johnson Memorial Lecture in Science Communication at the University on Thursday, April 10.

The lecture, "Communicating Science to the Public," will be held at 8 p.m. in Room 105 Forum Building and is open to the public free of charge.

One of the country's foremost science writers, Mr. Sullivan is known for his ability to translate technical information into articles for the layperson.

In addition to his articles in the Times, he is the author of several books, *We Are Not Alone* (for which he won the International Non-Fiction Book Prize), *Assault on the Unknown*, *Continents in Motion*, *Quest for a Continent* and his latest, *Black Holes - The Edge of Space*.

(Continued on page 2)

Charles Bierbauer, an international correspondent for ABC News, will return to University Park April 7-10 as a Liberal Arts Alumni Fellow.

A 1966 graduate with a dual Russian-journalism degree, Mr. Bierbauer began his news career with the Associated Press in 1967. During 1968 and 1969, he was an Edward R. Murrow Fellow in Belgrade, earning a master's degree in journalism from Penn State in 1970.

In subsequent posts, he served as a bureau chief in Bonn and foreign editor in London for Group W. Prior to joining ABC in 1978, he worked in Philadelphia at KYW TV.

The public is invited to hear Mr. Bierbauer discuss the importance of foreign language study in liberal arts education Wednesday, April 9, at 2:20 p.m. in Room 152 Hammond.

Joint committee asked to examine entire freshman experience

A Joint Committee on the Freshman Experience at Penn State, with particular reference to University Park, has been appointed by Provost Eddy and University Faculty Senate Chairman George J. McMurtry.

The committee will be chaired by Dr. Patricia Farrell, associate professor and head of recreation and parks.

The decision to establish the committee was reached, according to Dr. Eddy and Dr. McMurtry, because "a number of us have been troubled by the gaps and sometimes negligence which occur in introducing incoming freshman students to the possibilities and lifestyle of an important four-year period devoted to learning and personal development."

The mandate to the committee encourages its members to concern themselves with every facet of the freshman experience, and 11 topics have been suggested as possible agenda items.

Under the general rubric of academic life and services, topics of concern to the committee would include advising, the nature and quality of academic instruction and learning, and academic resources such as libraries and counseling.

Extracurricular life and services provide a second general area which the committee may wish to explore. Among the topics to be considered are the nature and quality of both residential and social life. Should freshmen be compelled to live on campus? What policies, practices and programs will decrease vandalism and increase civility? The committee will also be asked to look at student support services and organizations and to consider whether dorm contracts and food service plans could be changed to minimize social isolation and malaise.

A third broad area of concern is the quality and nature of the personal life during the freshman year. Are there adequate counseling services for those with personal and psychological problems? How prevalent are homesickness, depression, feelings of alienation? How prevalent are alcoholism and drug abuse and what can be done about them? What is the best way for the University to assist students with the development of value priorities?

In addressing these areas, committee members will be asked to determine "what's right" as well as "what's wrong." The target date for completion of the study and presentation of a set of specific recommendations based on the committee's findings is the end of Winter Term 1981.

In addition to Dr. Farrell, the members of the committee are: Dr. Robert C. Baldwin, assistant professor of wood science and technology; Dr. Richard P. Chait, assistant provost; Dr. Robert E. Dunham, vice president for undergraduate studies; Michael McGee, assistant academic coordinator; Dr. Raymond O. Murphy, vice president for student affairs; Dr. Phillip E. Stebbins, associate professor of history; John A. Vargas Jr., assistant professor of environmental sciences at Dubois; and four students - Paul D. Bell, Eric Moorhead, Sherry Scheithauer, and Amy Young.

News in Brief

Women in Latin American society, politics to be discussed

Dr. Mercedes Fermin, a Fulbright Distinguished Latin American Scholar and a professor of geography at Central University of Venezuela, will present a public lecture at 7:30 p.m. Thursday, April 10, in Room 109 Walker Building.

Her topics: "Women in Latin American Society and Politics."

Dr. Fermin, a former Venezuelan senator, holds a doctorate in geography from Boston University. Her visit is sponsored by the Department of Political Science and the Latin American Studies Committee.

Public seminar, tours to mark reactor anniversary

A public seminar and building tours have been scheduled April 11 and 12 to mark the 25th anniversary of the Breazeale Nuclear Reactor, the oldest operating research reactor in existence.

"Contribution of Research Reactors to Education, Industry, and Safety" is the topic of the seminar, which will be held from 3 to 5 p.m. on Friday in Keller Building Auditorium.

President Oswald will present opening remarks, and President Emeritus Eric A. Walker will speak on "Historical Events - Looking Back at 1955."

Dr. Henry Gomberg, director, KMS Fusion, Inc., of Ann Arbor, will speak on "Current Events - 1955 through 1980." Dr. Bert Wolfe, vice president and general manager of General Electric's Nuclear Fuels Service Division in San Jose, will discuss "For the Future."

Public tours of the reactor will be conducted from 10 a.m. to 2 p.m. on Saturday.

The reactor facility is named for the late Dr. William M. Breazeale, who designed the reactor while serving on the Penn State faculty from 1953 to 1958. Considered the "father of swimming pool reactors," he was the first professor of nuclear engineering at Penn State.

Doctoral thesis wins award

The 1979 Penn State doctoral thesis written by Elaine Di Biase, currently assistant vice president for academic affairs at Mansfield State College, has been named the Outstanding Dissertation of the Year by the Association for the Study of Higher Education.

The dissertation, "Classical Tenure and Contemporary Alternatives: Academic's Principles and Court Decisions," was

unanimously selected from five finalists in a field of 53 entries.

Dr. William E. Toombs, professor of education and associate at the Center for the Study of Higher Education, served as Dr. Di Biase's thesis advisor.

Entering freshmen score above national average

Ninety six percent of the 1979 entering freshmen at University Park graduated from high school in the upper one-fifth of their class, and 65 percent had a grade point average of "A."

These figures are significantly higher than the national average for freshmen, Provost Eddy told the Board of Trustees at its March meeting. Dr. Eddy was standing in for President Oswald, who had been hospitalized with a cracked rib.

Nationally, only 31 percent of all freshmen brought "A" averages with them to college.

Easter buffet at Inn

The Nittany Lion Inn is planning a special Easter buffet from noon to 2:30 p.m. and from 6 to 8 p.m. on Sunday, April 6.

Centrepieces specially created by Chef Richard Jackson will decorate the buffet table, which will feature top round of beef

(Continued on page 4)

Penn Staters

George W. Bierly has announced that he will retire next fall after 33 years on the staff — 22 of them as director — of the Wilkes-Barre Campus.

Mr. Bierly, who came to the Campus as a part-time instructor in 1947, has pioneered the development of associate degree programs in engineering technology, among them Biomedical Equipment Technology, Surveying Technology and Highway Engineering Technology.

He is currently involved in setting up new programs in Telecommunications and Railway Engineering Technology, believed to be the first such programs in the nation.

The present Campus setting was obtained under Mr. Bierly's directorship when the 50-acre John N. Conyngham estate in Lehman Township was given to Penn State as a gift, enabling the Campus to move from its crowded quarters in the Guthrie Building in Wilkes-Barre. In addition to the two buildings belonging to the estate, the Campus has added a laboratory and a classroom building.

Mr. Bierly graduated from the Massachusetts Institute of Technology. He was named assistant professor of engineering at Wilkes-Barre in 1952 and became director in 1958.

He is a past chairman of the Regional Education Planning Council, and in 1976 received the Outstanding Engineer Award of the Luzerne County Chapter of the Pennsylvania Society of Professional Engineers.

Dr. Helen A. Guthrie, professor and head of the nutrition program in the College of Human Development, last Thursday received the 1980 Outstanding Alumni Award from the College of Human Ecology Alumni Association of Michigan State University, where she earned her M.S. in nutrition and biochemistry. She was cited for outstanding teaching and research accomplishments in her field. Dr. Guthrie joined the Penn State faculty in 1948 as an instructor in nutrition, and was named head of the program in 1971. She earned her B.S. in home economics at the University of Western Ontario and her Ph.D. in physiology at the University of Hawaii.

David B. Van Dommelen, professor of art education, recently won the Josephus Daniels Charitable Foundation Purchase Award for his stitcher-wall hanging "Purple Homage to Mariska Karsz." The wall hanging was one of two pieces Professor Van Dommelen submitted in the invitational portion of the Needlework IV exhibition in Raleigh, NC, sponsored by the Mordecai Square Historical Society. This is the third time Professor Van Dommelen has been invited to exhibit in the biennial show; in 1978, he won the Burroughs Wellcome Purchase Award.

Harmer A. Weeden, professor emeritus of civil engineering, recently received the Earle J. Fennel Award for Outstanding Contribution to Surveying and Mapping Education. The award is presented by the American Congress on Surveying and Mapping, "in recognition of distinguished personal contributions, as an educator, to the surveying profession, to the Congress, and to the objectives of Continuing Education."

Dr. Paul B. Harvey Jr., associate professor of history, recently delivered at Harvard University an invited lecture on "Agros non continuat: Ideological and Social Constraints on Roman Investment in Real Estate." The lecture was sponsored by Harvard's Department of The Classics.

Dr. Paul Todd, professor of cell biology, biochemistry and biophysics, presented a paper last month at the National Institutes of Health at Bethesda, MD. His topic was "Mutagenesis, Transformation, Cell-Killing." The meeting was sponsored by the Committee on Federal Research into the Biological Effects of Ionizing Radiation.

Dr. Robert B. Eckhardt, associate professor of anthropology, has been elected as a Fellow of the Explorers Club. Fellows are chosen on the basis of active participation in exploration or because their scientific achievements have "substantially enlarged the scope of human knowledge." Dr. Eckhardt was recognized for his continuing work in Peru on human evolutionary biology at high altitudes.

Dr. William I. Lindley, assistant professor of agricultural education, has just returned from a one-month UNESCO assignment in Ghana, where he assisted with the revision of the agricultural education curriculum at the University of Cape Coast.

Robert G. Wingard, professor of wildlife management extension, and Dr. Terry D. Rader, associate professor of forest resources extension, are co-authors of *Woodlands and Wildlife*, a 67-page manual published by the College of Agriculture in cooperation with the Pennsylvania Bureau of Forestry and the Pennsylvania Game Commission.

The book covers such topics as planning for wildlife on private property, keeping a nature journal, managing major forest habitats, forest wildlife, farm wildlife and the forest, and trails to wildlife. It also includes a section listing further references and additional readings on related subjects.

Promotions

Staff Exempt

Barbara Homan to assistant housekeeping supervisor, Housing and Food Services.
Janet C. Shank to junior copy editor, University Press.

Staff Non-Exempt

Craig L. Grunberg to laboratory technician, Intercollege Research Programs.

Margaret J. Tournay to nutrition aide supervisor, Agriculture.

Susan B. Witherite to computer operator, Management Services.

Clerical

Nancy Bierly to clerk typist A, Earth and Mineral Sciences.

Bonita F. Floyd to radiology records clerk, Hershey.

Vickie I. Gerontolis to secretary A, Applied Research Laboratory.

Linda C. Heckman to secretary A, Hershey.

Charlotte Joyner, to secretary, Earth and Mineral Sciences.

Jane B. Murphy to accounting clerk, Controller's Office.

Lorna V. Stewart to clerk typist A, Engineering.

Cathy E. Weber to secretary C, Liberal Arts.

Technical Service

Joseph Bublincik to waste water treatment plant operator A, Physical Plant.

James A. Hillard to maintenance worker, utility, Physical Plant.

Randall Kern to lead sheetmetal worker A, Physical Plant.

William E. Smith to maintenance worker area landscaper, Physical Plant.

Jonathan A. Stenson to maintenance worker general C, Physical Plant.

Paul R. Wilson to research machinist, Engineering.

Ira Wright to maintenance worker, utility, Physical Plant.

Retirements

Benjamin F. Neff Jr., a lead painter with the Office of Physical Plant, retired March 8. He had been a member of the staff since Feb. 1, 1953.

Marie L. Kepping, a residence hall worker at Capitol Campus since Sept. 5, 1967, will retire April 12.

Obituaries

Carl O. Dossin, professor emeritus of poultry science extension, died March 23 at the age of 80. A graduate of the University of Connecticut, Mr. Dossin earned a master's degree from North Carolina State College. He joined the University's staff in 1927, retiring in 1965. Mr. Dossin was instrumental in helping make Pennsylvania a national leader in the production of poultry and eggs.

Mildred L. Rader, a research aide in the College of Agriculture since July 2, 1979, died March 24. She was 45 years of age.

Lester E. Strawbridge, a metal shop mechanic at Hershey, died March 23. He was 57. Mr. Strawbridge joined the staff as a custodian in 1967.

S. Jean DeVetter, a receiving clerk in the Libraries, died March 23 at the age of 52. She had been a member of the staff since 1970.

Carpoolers

Persons desiring a listing in INTERCOM should send in their names to Room 312 Old Main and include information on their residence, work location, arrival and departure times, phone numbers at home and work, and whether drivers, riders or both are sought.

Joanne Treaster, Burnham (717-543-5729), works 8 a.m. to 5 p.m. in Burrows (865-2536). Would prefer to share driving but will take riders.

Sullivan

(Continued from page 1)

the End of Time.

Mr. Sullivan was the winner of the George Polk Award for his coverage of the International Geophysical Year. His other awards include the American Institute of Physics/U.S. Steel Foundation Science Writing Award in Physics and Astronomy, the American Chemical Society's James T. Grandy Award and the Science in Society Journalism Award of the National Association of Science Writers. He is a director of the American Polar Society and a Fellow of the Arctic Institute of North America.

A graduate of Yale University he joined the staff of the Times in 1940 as a copy boy. He became a foreign correspondent in 1948 and was assigned to China, Korea and Germany. In 1956, he turned to science writing and has been science editor of the Times since 1964.

The biennial lecture honors the late A. Dixon Johnson, science writer and director of public information at Penn State from 1960 until his death in 1974. It was first held in 1978 and is supported by a fund established by Mr. Johnson's family and friends and by the College of Science Alumni Society.

Collman to talk

Dr. James P. Collman, professor of chemistry at Stanford University, will present the 1980 Frank C. Whitmore Lectures April 7 through 10.

The series of four lectures is sponsored by the Department of Chemistry.

Dr. Collman will present his first three lectures on April 7, 8, and 9 at 8 p.m. and the last on April 10, at 4 p.m. He will speak in Room 333 Whitmore Laboratory.

Topics for the series are "Synthetic Analogues of Oxygen-Binding Hemoproteins," "Site Isolated Catalysts," "Heterogeneous versus Homogeneous Catalysts" and "Multi-Electron Redox Catalysts: A Quest for an Oxygen Fuel Cell Catalyst."

Dr. Collman is an authority on compounds which contain both organic and metallic elements. His recent research includes work with homogeneous catalysts which could be important in areas such as the use of oxygen as fuel and the development of a more efficient means of producing energy from fuel oils. He is also known for his preparation of "picket-fence" iron-oxygen compounds — considered an important step in understanding hemoglobin, the oxygen carrier in blood.

He is a member of the National Academy of Sciences, the American Academy of Arts and Sciences and the British Chemical Society. He was a winner of the American Chemical Society Award in Inorganic Chemistry and was an Alfred B. Sloan Foundation Fellow and a National Science Foundation Postdoctoral Fellow.

Dr. Collman earned his B.S. and M.S. degrees at the University of Nebraska and his doctorate at the University of Illinois.

The Whitmore Lectures, begun in 1976, are named in honor of Frank C. Whitmore, a former dean of Penn State's School of Chemistry and Physics, the forerunner of the College of Science. He was an internationally known organic chemist and a president of the American Chemical Society.

FSHA 410, "Evening in the Highland Plantation," Southern style meal, 5:30 p.m., Maple Room, Henderson, Reservations, 863-5721 or 863-7441.

Cinematheque, *Spy Who Came In from the Cold*, 6:30 and 8:30 p.m., HUB Assembly Hall.

*College of Science, Priestley Lecture, 8 p.m., Room 333 Whitmore, J.C. Polanyi, Univ. of Toronto, on "Energy Transfer Processes Studied by a Variety of Methods, Including State-Selected Supersonic Beams."

*Spanish Dept. Lecture, 8 p.m., Room 112 Kern, Jose Martin Recuerdo on "El amor y la muerte en el teatro de Garcia Lorca."

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Friday, April 4

Sports: track (men), Nittany Lion Relays (decathlon), 3 p.m.; volleyball (men) vs. Springfield, 3 p.m.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker, Anthony V. Williams and Nancy Murdoch, geography, on "Energy and the Senses."

Commonsplace Theatre, *Lisztomania*, 7 and 9 p.m., Room 112 Kern.

France-Cinema, *Bread and Chocolate*, 7 and 9 p.m., Room 101 Chambers.

Interlandia, folkdancing, 7:30 p.m., HUB Ballroom.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Saturday, April 5

Horticulture Dept., Easter flower sale, noon-4 p.m., behind Tyson Bldg.

Sports: track (men), Nittany Lion Relays, 10 a.m.; baseball vs. Rutgers (double header), 1 p.m.; lacrosse (men) vs. Ohio State, 2 p.m.

Commonsplace Theatre, *14th Tournee of Animation*, 7 and 9 p.m., Room 112 Kern.

France-Cinema, *Bread and Chocolate*, 7 and 9 p.m., Room 101 Chambers.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Sunday, April 6

University Chapel Service, 11 a.m., Music Bldg. Recital Hall, Chapel Choir Easter Service, Tommie Irwin, director.

Unity Christian Campus Ministries Service, 11:15 a.m., Frizzell Room, Eisenhower Chapel.

Nittany Lion Inn Easter Buffet, noon-2:30 p.m. and 6-8 p.m.

HUB Center, registration for 2nd session classes, noon-5 p.m., daily through April 12; Open House, 7:30-9:30 p.m., Room 312 HUB.

Sports: tennis (men) vs. West Virginia, 1 p.m.; baseball vs. West Chester, 1:30 p.m.

Commonsplace Theatre, *14th Tournee of Animation*, 7 and 9 p.m., Room 112 Kern.

France-Cinema, *Bread and Chocolate*, 7 and 9 p.m., Room 101 Chambers.

Monday, April 7

Shakespeare Film, *Hamlet* (Olivier), 6:30 p.m., Room 101 Chambers.

Commonsplace Theatre, *14th Tournee of Animation*, 7 and 9 p.m., Room 112 Kern.

*College of Science, Frank C. Whitmore Lecture, 8 p.m., Room 333 Whitmore Lab.

James P. Collman, Stanford Univ., on "Synthetic Analogues of Oxygen-Binding Hemoglobins."

Interdisciplinary Symposium on Value, 8 a.m., Room 101 Kern, Robert Adams, philosophy, UCLA, on "Love and Conscientiousness: A Theological Approach."

Peggy Shipley, flute, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, April 8

Comp. Lit. Luncheon, 12:15: talk, 1 p.m., Hotel Sile, lecture, Velemin Gjirin, Yugoslavia, on "The Value of a Translation in Comparison to its Original."

Sports: softball vs. West Chester (double header), 1:30 p.m.

School of Music Common Hour, 4 p.m., Music Bldg. Recital Hall.

Shakespeare Film, *Hamlet* (Olivier), 6:30 p.m., Room 101 Chambers.

Comp. Lit. Film Series, *Kadar, Adriatic*, 7 and 9 p.m., Room 112 Kern.

Women in Communications/School of Journalism Lecture, 7:30 p.m., Room 10 Sparks, Barbara D. Haas, national president of Women in Communications, Inc., and Duquesne Univ., on "Morality in the Media: Who's Watching the Watchdog?"

*College of Science, Whitmore Lecture, 8 p.m., Room 333 Whitmore, James P. Collman on "Site Isolated Catalysts."

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Wednesday, April 9

Hetzel Union Bldg./ARHS, Stereo Expo '80, through April 10, HUB.

France-Cinema, *The Stranger*, 7 and 9 p.m., Room 112 Kern.

Sports: lacrosse (men) vs. Franklin and Marshall, 7 p.m.; volleyball (men) vs. East Stroudsburg, 7 p.m.

*College of Science, Whitmore Lecture, 8 p.m., Room 333 Whitmore, James P. Collman on "Heterogeneous versus Homogeneous Catalysts."

*IAHS/School of Journalism, History of Photography Lecture, 8 p.m., Room 101 Kern, H.K. Henisch, physics and history of photography, on "Nineteenth Century Masters."

Shakespeare Film, *Henry IV Part 2* (BBC), 8 p.m., Room 304 Boucke.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Jill Olson, piano, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, April 10

*College of Science, Whitmore Lecture, 4 p.m., Room 333 Whitmore, James P. Collman on "Multi-Element Redox Catalysts: A Quest for an Oxygen Fuel Cell Catalyst."

Spring Serenade Special Dinner, 4:45-6:45 p.m., HUB Terrace Room.

Cinematheque, Herbert Ross, *Goodbye Mr. Chips*, 8:30 and 9 p.m., HUB Assembly Hall.

Political Science, LASC, Dr. Mercedes Fernin, former Venezuelan senator, on "Women in Latin American Society and Politics," 7:30 p.m., Room 109 Walker.

*College of Science/Alumni Society, A. Dixon Johnson Memorial Lecture in Science Communication, 8 p.m., Room 103 Forum. Walter Sullivan, science editor, *The New York Times*, on "Communicating Science to the Public."

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Artists Series, Ira Levin, *Deathtrap*, 8:30 p.m., Eisenhower Auditorium.

Friday, April 11

*Public Seminar Celebrating the 25th Anniversary of PSU's Nuclear Reactor, 3 p.m., Keller Auditorium. Dr. John W. Oswald, Dr. Eric A. Walker, Dr. Henry Gomberg and Dr. Bert Wolfe on "Contributions of Research Reactors to Education, Industry and Safety."

Spring Serenade Special Dinner, 4:45-6:45 p.m., HUB Terrace Room.

Interlandia, folkdancing, 7:30 p.m., HUB Ballroom.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Penn State Jazz Big Band, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, April 12

Robeson Cultural Center, bus trip to Washington, D.C., through April 13. Information, 865-1779.

*Breakeast Nuclear Reactor Open House. Tours from 10 a.m. to 2 p.m.

Spring Dairy and Livestock Judging Contest, 10 a.m.-3 p.m., University Dairy and Beef/Sheep Center.

*College of Earth and Mineral Sciences, 1980 Earth and Man Exposition, Open House, 1-5 p.m.

Sports: baseball vs. George Washington (double header), 1 p.m.; lacrosse (women) vs. Utrinus, 2 p.m.

France-Cinema, *Two English Girls*, 7 and 9 p.m., Room 101 Kern.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, April 13

University Chapel Service, 11 a.m., Eisenhower Chapel. Ecumenical Student Workshop Service.

Unity Christian Campus Ministries Service, 11:15 a.m., Frizzell Room, Eisenhower Chapel.

*College of Earth and Mineral Sciences, Open House, 1-5 p.m.

Sports: baseball vs. Rider (double header) 1 p.m.

Opening reception for Diane Pepe exhibit, 3-5 p.m., Museum of Art.

Penn State Women's Choir and Penn State Singers, Kimberly Wolfe, director, 3:30 p.m., Music Bldg. Recital Hall.

Commonsplace Theatre, *The Last Wave*, 7 and 9 p.m., Room 101 Kern.

HUB Mini Concert, Johnston Bros., country rock/country swing, 9 p.m., HUB Ballroom.

Seminars

Thursday, April 3

Geosciences, Bruce D. Marsh, Johns Hopkins Univ., on "Petroleum and Mechanics of Island Arc Volcanism," 3:45 p.m., Room 26 Mineral Sciences (new listing).

Meteorology, Chris Gibbons, Appleton Lab., England, on "Millimeter Waves Probe the Atmosphere," 3:55 p.m., Room 112 Walker (new listing).

Astronomy, Andrew Bernat, Kitt Peak National Observatory, on "Observational Studies of Mass Loss from Red Giants," 4 p.m., Room 445 Davey (new listing).

Ag. Eng., Howard D. Bartlett and Sverker Persson, ag. eng., on "Biogas Generation and Use for Livestock Farms," 4 p.m., Room 248 Ag. Eng. (new listing).

Aesthetics, and Interpretation Theory Group, Leonard Rubinstein, English, on "Art: The Mysterious Means," 4:30 p.m., Hotel State College (new listing).

Friday, April 4

Physics, Mark J. Cardillo, Bell Telephone Labs, on "More on Fraction of Helium Atoms at Semiconductor Surfaces," 11 a.m., Room 339 Davey.

Anal. Chem., William Chan on "Microprocessor Automation of Scientific

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, a telephone 863-1200.

Instruments," 11:10 a.m., Room 333 Whitmore.

Nuclear Engineering, Richard Wilson, Harvard Univ., on "Nuclear Risks," 2:30 p.m., Room 209 Willard.

Physical Chemistry, Kirk Veis on "Optical-Optical Double Resonance Spectroscopy of Li²⁺," 2:30 p.m., Room 333 Whitmore.

Tuesday, April 8

Plant Pathology, Vernon Elliott, grad. student, on "The Role of Microflora in Seed-Borne Diseases," 9:45 a.m., Room 213 Buckhout.

Geosciences, John Fern, geology, Univ. of Kentucky, on "The Shape of Coal Beds," 3:45 p.m., Room 26 Mineral Sciences.

Biology, Stanwyb Sheldy, botany, Smithsonian Institution, on "Variation and Evolution of the Nearctic Harebells," 4 p.m., Room 8 Mueller Lab.

American Society of Metals, F.R. Matson, archaeology emeritus, on "Archaeo-Metallurgy: Problems from the Archaeologist," 7:30 p.m., Room 301 Seidle.

Thursday, April 10

Chemistry, George Hammond, Allied Chemicals, Morrisown, on "A Search for Useful Photochemicals," 12:45 p.m., Room 333 Whitmore.

Economics/Institute for Policy Research and Evaluation, Burton Weisbrod, Univ. of Wisconsin, speaker.

Physics, Jerry Wolken, biological sciences, Carnegie-Mellon, on "Biological Structures and Liquid Crystalline Systems," 3:30 p.m., Room 445 Davey.

Acoustics, Gordon R. Bienenwe and Robert D. Cerner, environmental acoustics lab, on "Digital Processing of Speech Materials in the Study of Sensorineural Hearing Impairment," 4 p.m., Room 75 Willard.

Philosophy, Gordon Fleming, physics, on "Philosophical Problems of Contemporary Physics," 4 p.m., Room 101 Kern.

Meteorology, James M. Russell, NASA-A Langley Research Center, on "Satellite Sounding of the Atmosphere by Limb Emission and Occultation," 3:55 p.m., Room 112 Walker.

Fuel Science, Harold Beutner, Gulf Research and Development, on "Synthetic Fuels," 4 p.m., Room 301 Seidle.

Friday, April 11

Analytical Chemistry, Steve Ankabard, grad. student, on "Electrochemistry of Sulfur Species in Coal Process Streams," 11:10 a.m., Room 333 Whitmore.

Physical Chemistry, Gary Pruett, Univ. of Pennsylvania, on "State Resolved Reaction Dynamics in Molecular Beams," 2:30 p.m., Room 333 Whitmore.

Exhibits

Chambers Gallery: William Bradley, sculpture and drawings; ceramics by senior Fine Arts Students, opens April 7.

HUB Galleries: master works from the National Class Conference, through April 12; Henry O. Tanner and Horace Pippin, paintings, opens April 13. The Gallery, Bruce Johnson, watercolors and prints, Browning Gallery, "Slavic Folk Arts Festival exhibit, Art Gallery.

Kern Gallery: Chen Chih Ming, ink drawings, through April 13; Ukrainian Club Easter display, through April 12; David Rubello, photographs and paintings, opens April 5; glass works, opens April 7; Laveta Buter, ceramics, opens April 11.

Museum of Art: Pennsylvania prints from the collection of John O'Connor and Ralph M. Yeager, through April 13; aspects of representation after World War II - works from the permanent collection; Chinese export porcelains from the collection of Dr. and Mrs. Harold L. Tonkin; recent works on paper by Diane Pepe, opens April 13.

Pattee Library: Rome Hanks, Mary Edith Miller and Patricia Wall, photographs, East Corridor Gallery, Soft Copy, works by Virginia Taylor and Christine Skyles, Lending Services Lobby, Mitchell Weiss, ceramics, Main Lobby.

Robeson Cultural Center: Francis Couch, paintings, through April 3.

Visual Arts Bldg. Zoller Gallery: National Class Conference exhibit, through April 13.

*Asterisk indicates event tied in with Penn State's 125th anniversary year.

News in Brief

(Continued from page 1)

au jus, seafood newburg, baked ham with brandy sauce, coq au vin, steamed shrimp in the shell, and baked kielbasa and sauerkraut. A wide array of salads, cheeses and desserts will also be available.

As an added attraction, evening patrons may register for a door prize — two free dinner-theatre tickets for the April 10 Artist Series offering of *Deathtrap*. The price of the buffet is \$8.95; \$4.80 for children under 12.

Schumann work chosen for Olson piano recital

Schumann's "Faschingsschwank aus Wien," opus 26, and works by Messiaen and Ravel have been selected for a recital by Jill Olson, pianist, at 8:30 p.m. Wednesday, April 9, in the Music Building Recital Hall.

The Schumann piece, which in translation means "Carnival Jest from Vienna," is a five-movement work. Ms. Olson has also chosen three pieces from "Vingt Regards sur l'Enfant-Jésus" — "Regard de l'étoile," "Regard de la Vierge" and "Regard des prophètes, des bergers et des Mages" by contemporary French composer Olivier Messiaen. The final selection on her program, Maurice Ravel's "Le Tombeau de Couperin," is a multi-movement work written in homage to French baroque composer François Couperin.

Ms. Olson, an instructor in the School of Music, received her M. Mus. degree from the University of Wisconsin at Madison and her B.A. from Colorado College, where she was a member of Phi Beta Kappa.

Hetzel, Walker names sought

The University is seeking nominations of outstanding seniors for two prestigious annual prizes: The Ralph Dorn Hetzel Memorial Award and The Eric A. Walker Award.

Nomination forms are available at the offices of the deans of the colleges, at the HUB Desk and in Room 235 Boucke Building. The forms should be returned to the Office of the Vice President for Student Affairs, Room 235 Boucke, by April 11.

The Hetzel Award recognizes the achievements and potential of outstanding seniors who have demonstrated the qualities of responsible leadership during their college careers and give promise of public spirited achievement in the future. University seniors who have shown outstanding academic achievement and have demonstrated leadership in University or other public activities are eligible.

The Walker Award recognizes a senior whose activities and achievements have enhanced the public esteem and renown of the University. The award is presented during the Spring Term commencement, though the student may have graduated during the preceding Summer, Fall or Winter terms.

Any member of the University community may submit nominations for the Walker and Hetzel awards.

W-4E reminder

The Controller's Office wishes to remind those employees who filed a Withholding Exemption Certificate — Form W-4E — for 1979 that this certificate will expire April 30, 1980, for taxpayers on a calendar year basis. The exemption claimed on Form W-4E must be renewed annually.

If you qualify and wish to continue your exemption, or if you are applying for the first time, you must file a new Form W-4E for 1980. You may claim the exemption from withholding if you had no income tax liability for 1979 and if you anticipate no income tax liability for 1980. Forms are available from the Payroll Department, Room 301 Old Main (865-2501).

In general the elimination of the withholding applies only to those working part-time. The principal advantage is that it will eliminate the need to file an income tax return at the end of the year to obtain a refund of money withheld.

EMEX '80 open house to be held April 12-13

The 1980 Earth and Man Exposition — EMEX '80, the biennial open house in Earth and Mineral Sciences, will be held Saturday and Sunday, April 12-13.

Special exhibits, demonstrations, films and many laboratories will be on view in the College's four buildings from 1 to 5 p.m. on each of the two days.

Visitors can begin their self-guided tours in the lobby of either Steidle, Deike, or Walker Buildings. Programs will be distributed in each of these lobbies, and student hosts will be on hand to provide help.

A highlight of the open house will be the weather observatory of the Department of Meteorology on the sixth floor of Walker Building. The use of a computer that can record weather data directly from the radar, store it, and then display it on a TV screen will be demonstrated. Also there will be exhibits on acid rain, severe storms and the preparation of weather forecasts, and a display of three-dimensional cloud pictures.

The open house will feature glassblowing by the College's scientific glassblower, John Daly; gem polishing by students in the lapidary laboratory; and demonstrations of the electron microprobe analyzer, the scanning electron microscope, computerized mapmaking, various metallurgical forging and casting processes, the operation of the Pennsylvania seismic network, mineral processing methods of cleaning up oil spills, waterflooding to increase oil well production, and thin-section identification of rocks and minerals.

Among the laboratories that will be open are those where research in rock mechanics, mine ventilation, and the solvent extraction of minerals from their ores is carried on.

Further information about EMEX '80 may be obtained from the Dean's Office, College of Earth and Mineral Sciences, Room 116 Deike Building.

Movement skills class registration April 8

A program of basic movement skills, educational gymnastics and games for children in kindergarten through third grade will be held Tuesdays, 4 p.m. to 5 p.m., April 8 through May 13 in Room 133 White Building.

Registration for the program, sponsored by the College of Health, Physical Education and Recreation, will be held April 8 at 3:45 p.m. in the White Building Lobby.

Campus Relations will arrange London Bus Tours

Faculty and staff members may arrange special tours for campus visitors — or take a ride themselves — on the London Double Decker Bus during Spring and Summer terms.

Tickets for the bus, which leaves from the HUB at 1:30 and 2:30 p.m. on weekdays, are 25 cents apiece and may be purchased at the HUB Desk. During the 35-minute ride, trained University guides provide commentary.

Special tours will be arranged through the Campus Relations Office, Room 301 Old Main (865-2501).

AV collection in new "Index"

A portion of Penn State's *Encyclopedia Cinematographica* film collection at Audio Visual Services has been recognized by inclusion in the recently published *Craft Films: An Index of International Films on Crafts*, a 156-page book which lists some

260 EC titles among its nearly 1,000 entries.

Audio Visual Services is the sole U.S. archive and distributor of the *Encyclopedia Cinematographica*, a scholarly international collection of 16mm films dealing with the biological sciences, technology, and cultural anthropology. The anthropological connection to crafts was noted in the *Craft Films* preface by editor Kay Salzs.

"It seemed valuable to see crafts in some context in order to show how they were and often still are a part of a total culture. In this vein, ethnographic films comprise part of the *Index*. Often made by anthropologists in the field, these films are generally short, often silent records of people performing a single craft, such as weaving or boat building, that is integral to their way of life."

Among other activities captured on film for the EC collection and included by Ms. Salzs in her compilation are bread baking, brass and silver founding, carving, decorating, forging, plating, and the making of pottery, musical instruments, weapons, ritual objects, tools, adornments, clothing, and furnishings.

Each film in the EC collection depicts a single phenomenon or type of behavior, and the films are so arranged as to facilitate comparisons of cultural similarities and differences among a number of peoples. Scholars at the University may have access to the collection at no cost. Audio Visual Services will provide both the screening facilities and the films upon request for research purposes.

Craft Films, hailed by reviewers as the first resource of its kind for the growing body of films about crafts, was supported by a grant from the National Endowment for the Arts and published by Neal-Schuman Publishers, Inc., under the

auspices of New York State Craftsman, sponsor of the International Craft Film Festival.

Health educator to give multimedia presentation

Dr. Larry K. Olsen, internationally known health educator, will be a Spring Term Colloquia speaker for the College of Health, Physical Education and Recreation on Wednesday, April 16.

He will conduct a multimedia presentation on the "School Health Curriculum Project in Saudi Arabia and the United States" at 8 p.m. in Room 101 Chambers. His presentation is open to all interested persons.

An associate professor and chairman of health science at Arizona State University, Dr. Olsen holds a B.S. in health and physical education and an M.A. in education from Lewis and Clark College. He earned his M.P.H. in health education at UC-Berkeley and his D.P.H. from UCLA.

FACTS brochures available

The 1980 FACTS brochures, containing up-to-date pocket-size format Penn State in handy, pocket-size form, are available in quantity from the Campus Relations Office, Room 301 Old Main (865-2501).

How to hold Easter flower sale

The Horticulture Department will hold an Easter flower sale from noon to 4 p.m. on Saturday, April 5, behind Tyson Building. The sale will feature lilies, begonias, daffodils, hyacinths and foliage.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 479-1387). Applications for staff vacancies will be accepted until 5 p.m., April 10, 1980. **DO NOT CONTACT THE AREA THAT HAS THE VACANCY.**

Applications for staff vacancies are considered, in accordance with Staff Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT FINANCIAL OFFICER, Capital Campus. Responsible to the Financial Officer for various financial and administrative matters which include performing accounting duties on grants and gifts, preparing monthly accounting reports, maintaining wage-payroll records, assisting in drafting policies and procedures affecting the Financial Office and preparing periodic reports for local tax authorities. B.S. or its equivalent in accounting or closely related field plus one to two years of effective experience.

SECOND DRAFTER, ELECTRO-MECHANICAL, APPLIED RESEARCH LABORATORY, University Park. Responsible to the Supervisor, Design and Drafting, for the accurate performance of a wide variety of drafting operations, layout and design work on all types of drawings for electronic, electro-mechanical, hydraulic and acoustic equipment and devices connected with any project assigned. Prepare sketch drawings, formal drawings, detail drawings, schematic diagrams and cable templates in accordance with established drafting practice. Translate schematics and space limitation requirements into complete layouts for "packaging" of electronic circuits. Present formats and requirements of proper engineering documentation of ARL staff. Assist in orientation of new employees. Assist in the preparation of drafting and design manuals. Associate's degree or its equivalent in electro-mechanical drafting plus two to three years of effective experience.

FOREMAN, CENTRAL PROCESSING, COLLEGE OF MEDICINE, Hershey. Responsible for the supervision and assignment of duties to Central Processing Group Leader, Senior Instrument Processing Aides and Central Processing Aides working the evening shift. Coordinate work flow between day and evening shifts and evening and night shifts. High school graduate or equivalency with 2-3 years of

effective experience. Knowledge of sterile procedures is desirable.

JUNIOR DRAFTER, ELECTRO-MECHANICAL, APPLIED RESEARCH LABORATORY, University Park. Responsible to the Supervisor, Design and Drafting, for accurate performance of a variety of drafting operations on all types of drawings for electronic, electro-mechanical, hydraulic and acoustic equipment and devices. Prepare sketch drawings, formal drawings, detail drawings, schematic diagrams and cable templates in accordance with established drafting practice. Associate's degree or its equivalent in electro-mechanical drafting plus six to nine months of effective experience.

LIBRARY ASSISTANT, Worthington Sereno Campus. Responsible to the Campus Librarian for assistance in all phases of library operations, including supervising part-time personnel, overseeing circulation, reserve, interlibrary loan and book order procedures; assisting students and faculty with reference needs; processing library skills workbooks; maintaining periodicals collection; preparing reports and operating the library in the absence of the librarian. Two years of college desirable and one year of effective experience in library work.

MANAGER OF PERSONNEL/COLLEGE OF AGRICULTURE, University Park. Responsible for planning, developing, implementing and administering a variety of personnel functions such as employment procedures, wage and salary administration, employee and labor relations, training programs, overall administration and interpretation of labor agreements and other University personnel policies, personnel records administration, performance appraisals, etc. work closely with the Department of Personnel Services — Employee Relations on all pertinent matters and function as a personnel representative for the College of Agriculture according to the duties as defined in The Pennsylvania State University Policy Manual. Conduct complaint meetings or formal grievance hearings as required; develop answers to grievances and prepare complete report of meetings. Responsible for development and maintenance of non-academic college personnel records through the use of data processing medium. Ensure College's implementation and compliance with University and federal affirmative action policies and procedures. Consult on, interpret, and disseminate policy information; identify problem areas; provide data for goals and timetables. Maintain effective internal auditing and recording systems for necessary report data. Bachelor's degree or equivalent plus four to five years of effective experience in personnel administration of which two to three years have been within a university personnel system. Master's degree preferred. Knowledge of data processing routines and systems is highly desirable.

Penn State Intercom

The Challenge of the '80s

The role of the Graduate School in the '80s cannot be separated from the future of the University as a whole, according to Graduate Dean James B. Bartoo.

Foremost among Dean Bartoo's

Dean Bartoo

concerns for Penn State in the new decade is the problem of inadequate financial support. To illustrate the slippage, he calls attention to the following section from a recent American Council on Education report:

"The developing institutions program, which recently has come under criticism in Congress and by the General Accounting Office, would be renamed the program to aid institutions with special needs, defined as those having low average general and education expenditures per student, low percentage cost of instruction, and a substantial ratio of students receiving need-based student aid."

"We certainly don't think of Penn State as a 'developing institution,'" Dean Bartoo says; "but if you analyze those criteria, we fit each of them. The increasing erosion of the State's financial undergirding of this institution is a very serious problem."

"While we hope to make up for some of the loss by approaching private sources, we cannot ignore the fact that this country is currently undergoing a tremendous redistribution of wealth. Many private foundations are having financial difficulties. In addition, the government has shifted its funding of higher education by allotting much of its support directly to the students."

Dean Bartoo also expresses concern about faculty leadership at the University: "No university can advance without a faculty that is dedicated to scholarship, both for themselves and for their students. This is a very delicate balance to maintain, and I think we are seeing some erosion in scholarly dedication."

"Some faculty members are more sensitive to scholarship for themselves than for their students. On the other hand, pressures at the Commonwealth Campuses may lead faculty members there to place more emphasis on teaching — i.e., scholarship for students."

"A question at the March Senate meeting seems to me to illustrate what's been happening to the University. One of the senators, during a discussion of the University Scholars Program, asked how funding for courses to be offered in the program would be obtained."

"I would argue that 10 or 15 years ago if we talked about a program as near and dear to the hearts of the faculty as a scholars program, the question of cost would never have been raised. Faculty members would simply have considered the preparation and teaching of such courses part of their primary educational

(Continued on page 6)

Implementing legislation for the Scholars Program passed in Senate

The University Scholars Program came into being officially last week with the passage of enabling legislation by the Senate at its April 1 meeting.

After some discussion, during which senators sought reassurances that existing honors programs would be able to continue to admit students, the Senate accepted implementing legislation proposed by its Committees on Curricular Affairs and Undergraduate Instruction.

Senators also approved legislation to do away with zero credit courses and approved a Planning and Development Committee proposal that the Committee monitor the process of development and application of costing methods.

Informational reports were presented by the Subcommittee on Athletic Standards, the Committee on Committees and Rules, the Libraries Committee, and the Committee on Planning and Budget. Dr. Robert E. Dunham, vice president for undergraduate studies, gave an oral report on a March 13-14 conference, The Freshman Year: Creating a Staying Environment. (See below.)

The meeting concluded with a forensic session, requested by Dr. Rustum Roy, director of the Materials Research

Laboratory, to discuss the implications of a memorandum from the Chicago office of the Department of Energy banning "any communication with the Soviets."

President Oswald told the Senate that after seeing the memorandum he had contacted the Association of American Universities (AAU) and the National Association of State Universities and Land-Grant Colleges (NASULGC) to bring the matter to the attention of the Secretary of Energy. DOE subsequently disavowed the letter.

Dr. Oswald noted that in such matters of national concern, Penn State seeks both to express its own views and to act in unison with its sister research and land-grant universities.

Replying to questions, University Scholars Program Director Paul Axt told senators that he had contacted each of the 13 departments in the University currently sponsoring honors programs. These departments, he said, are free to continue their programs and, if they choose, to nominate their students for the Scholars Program on completion of the sophomore year.

In response to other concerns expressed

(Continued on page 5)

'Staying Environment' discussed

The creation of a "Staying Environment" was the subject of a report to the Senate by Dr. Robert E. Dunham, vice president for undergraduate studies. That division had sponsored a March 13-14 conference on The Freshman Year: Creating a Staying Environment.

Dr. Dunham noted that Penn State graduates 60 percent of the students who begin as freshmen at the University — a figure 10 percent higher than the national average. At the same time, the University loses 18 percent of its freshmen, 10 percent of its sophomores, 7 percent of its juniors and 5 percent of its seniors.

"Determining an acceptable drop-out rate for an institution like Penn State is a very difficult task," Dr. Dunham said. In 1964, for example, 66 percent of the entering freshmen graduated in five years. This compares with a high of 72 percent for the class of 1965 and a low of 56 percent for the classes of 1971 and 1972.

"I'm concerned that intellectually able

students drop out of Penn State," Dr. Dunham said, citing figures showing that in the Class of '75 62 percent of those dropping out had college GPA's of 2.0 or better and that 26 percent of the students lost had been admitted in Categories 1, 2 and 3.

Freshman attrition varies from campus to campus and college to college, according to Dr. Dunham. From 1978 to 1979, Altoona and Hazleton had the lowest attrition rates — 14 percent; York had the highest — 28 percent.

Among the colleges, CBA had the lowest — 5 percent, followed by Engineering, Human Development and Science with 7 percent. The highest was Health, Physical Education and Recreation — 14 percent.

The percentage of freshmen failing to reenroll in 1979 totalled 9 percent at University Park, 16 percent system-wide.

During the Conference, small groups

(Continued on page 5)

News in Brief

Performance Objectives workshop offered by UDIS

The University Division of Instructional Services (UDIS) is sponsoring a two-hour orientation workshop on Performance Objectives at 1:30 p.m. Wednesday, April 16, in Room 128 Mitchell Building.

The workshop will be conducted by Robert Griffin, instructional specialist in the College of Business Administration.

Participants in the workshop will be introduced to the use of performance objectives and how to write them. They will have an opportunity to examine student behaviors by learning domains (cognitive, affective, and psychomotor) and to practice writing objectives.

The workshop is limited to 35 participants on a first-come basis. Persons desiring reservations or additional information should call the Office of the Director, UDIS, at 865-7675.

Wisconsin biochemist to offer Barron Lecture

Dr. Hector DeLuca, a University of Wisconsin biochemist, will present the 1980 George Barron Memorial Lecture at 4 p.m. Thursday, April 24, in Room S-209

Henderson Human Development Building. Dr. DeLuca will discuss current aspects of his work in vitamin D metabolism.

Sponsored by the Nutrition Program faculty, the lecture pays tribute to Dr. Barron and the leadership he provided as head of the former Department of Foods and Nutrition in the College of Home Economics, the forerunner of the College of Human Development, from 1963-68.

Dr. Barron, who subsequently had served as assistant to the Vice President for Research and Graduate Studies and as director of the Pesticide Research Laboratory and Graduate Study Center, died in a fire at his Ferguson Township home in December. He had retired from the University on April 1, 1979, as professor emeritus of nutrition and food safety.

Journalism to sponsor minority journalists conference

The School of Journalism will conduct a minority journalists conference this summer, from July 28 to Aug. 1. The program is designed for early- to mid-career journalists who want to explore ways to get ahead in the field.

According to Dr. Robert O. Blanchard, director of the School of Journalism, the conference is the first to be offered

Penn Staters

Dr. S. V. Martorana, professor of education and research associate at the Center for the Study of Higher Education, has won the Annual Distinguished Service Award of the Council of College and University Professors of Community College Education. The award recognizes outstanding service to the advancement of community and junior colleges through research and scholarship activity and through advising graduate students who later receive special recognition.

Dr. Carolyn Wood Sherif, professor of psychology, delivered the invited plenary address at the 51st annual meeting of the Eastern Psychological Association on April 19 in Hartford, Conn. Her talk was entitled "Social categorization and the self involved in social interaction."

Two drawings by Dr. Richard Hamwi, instructor in art, were recently acquired by the National Collection of Fine Arts at the Smithsonian Institution. In addition, an exhibition of his drawings is being held through April 25 at CUNY-College of Staten Island.

Glenn R. Kean, professor of animal science, has been selected to judge the American Cured Meat Championships in Dallas, Texas, Aug. 10-13. He was selected because of his nationally acknowledged expertise in processing techniques and quality control, according to Robert L. Madeira, executive director of the American Association of Meat Processors, sponsor of the event.

Donald V. Joyce, an instructor in the Department of Recreation and Parks, has been presented the 1980 honor award of the Pennsylvania Recreation and Parks Society. It is the Society's highest award.

Dr. Patrick D. Lynch, professor of education, was recently elected vice president for educational administration of the American Educational Research Association.

Dr. B. Lakshminarayana, professor of aerospace engineering, participated in a two-day review of the Computational Fluid Mechanics Program at Lewis Research Center in Cleveland, Ohio, March 26-27. Approximately 16 experts in computational fluid mechanics and turbomachinery from universities, industry and government were invited to critique the program, identifying current and future needs.

Dr. Samuel H. Levine, professor of nuclear engineering and director of the Breazeale Nuclear Reactor, was invited to present a series of lectures on "In-Core Fuel Management" for a course in "Operational Physics of Power Reactors," held at the International Center for Theoretical Physics in Trieste, Italy. Dr. Levine lectured for the two-week period March 17-28, and he was appointed the scientific director for one week of the course.

Bookshelf

Dr. C. Conrad Cherry, professor of religious studies and American studies, has written a new book examining the fascination with nature that permeated American religious thought in the 18th and early 19th centuries. It is entitled *Nature and Religious Imagination: From Edwards to Bushnell*, and was published by Fortress Press of Philadelphia.

Against the background of social and intellectual change that existed in Europe and America during those years, Dr. Cherry analyzes the works of prominent New England religious thinkers. Among them are Jonathan Edwards, Samuel Hopkins, Lyman Beecher, William Ellery Channing and Horace Bushnell.

The thesis of his book is that a symbolic response to nature appeared in the thought of Jonathan Edwards, declined during a period of religious legalism, and then was renewed in the religious romanticism of Horace Bushnell. The tension between nature's symbolism and legalism has come to characterize much of American Protestantism, he concludes.

Dr. Cherry is senior editor of the Studies in Religion Monograph Series of the American Academy of Religion. He is the author of *The Theology of Jonathan Edwards: A Reappraisal*, (Doubleday, 1966) and *God's New Israel: Religious Interpretations of American Destiny*, (Prentice Hall, 1971).

Dr. Frederick A. Hussey, assistant professor of administration of justice, is principal author of *Probation, Parole and Community Field Services: Policy, Structure, and Process*, an introductory level college textbook published recently by Harper & Row. His co-author is David E. Duffee of SUNY-Albany, a former Penn State faculty member.

The 350-page work describes the roles, values, goals, practices and problems of probation, parole and community corrections, with an emphasis on the fundamental and critical issues and ideas in the field.

The book is broken roughly into two main parts. Chapters 1-6 provide basic descriptive information concerning offenders, the processes and structures of criminal justice, sentencing, and the historical development of probation, parole and other community field services.

Chapters 7-14 are more varied in tone and content than the first six and address the problems and practices of criminal justice. In the latter half, the authors go beyond an overview and delve into the intricacies of correctional field work, such as present investigations, common therapy and counseling techniques, and the factors that influence offenders' attitudes and behaviors toward correctional agencies and officials.

Dr. John J. Coyle, professor and head of the Department of Business Logistics, is the co-author of *The Management of Business Logistics*, 2nd edition, published on April 1 by West Publishing Company. This new edition is an extensive revision of the text originally published in 1976. The book is intended as an introductory text and also as a reference for the professional logistics manager.

In economic terms, logistical activities in U.S. business organizations are the third largest cost center; in 1979, U.S. companies spent approximately \$400 billion in the logistics area. The growing importance of the logistics function has provided an increasing number of employment opportunities for students graduating from business schools with majors in logistics. Penn State has one of the largest programs in the United States in terms of students and full-time faculty.

Martin J. Naparstek, public information officer at the Wilkes-Barre Campus, is the author of *War Song*, a novel about the Vietnam War, published in March by Leisure Books, a division of Tower Publications. The 206-page book is set in Vietnam in the mid-1960s, during the height of the American involvement.

The novel focuses on three young American soldiers who are drafted and sent to Vietnam. The main character, Michael Cool, is a lonely, dejected man, unable to fit into either civilian or military life. The other principal characters in the 70,000-word novel include Joe Fernandez, a brutal, hostile misfit; George Steubens, an amiable farm boy, and En, a Vietnamese woman with whom Cool has an affair.

Mr. Naparstek served in Vietnam with the U.S. Army Signal Corps during the same period in which the novel is set. Like the characters in the book, he was assigned to Phu Lam, a communications base south of Saigon.

Dr. Marjorie East, professor and former head of the Department of Home Economics Education, retired with emerita rank from the University on April 1, after 22 years of service.

Dr. East came to Penn State in 1958 as professor and head of home economics education in the former College of Home Economics. She continued in that post from 1967, when the department was moved to the College of Education, to 1976. She served as acting head of the Division of Occupational and Vocational Studies during 1976-77.

Under Dr. East's leadership, the graduate program in home economics education became the nation's largest, with some 20 doctoral candidates currently in residence, and is often cited as the nation's best.

The author of numerous scholarly and professional articles, she also has written four books. Her most recent, *Home Economics: Past, Present and Future*, was published last August by Allyn and Bacon, Inc. Designed for graduate students and professionals, the book covers the role of the professional home economist; the discipline's evolution; curricula; special problems confronting the professional; and alternative paths to the discipline's future.

Her other books include *Fashion Your Own* (1963), *Fashion and Fabrics* (1962) and *Display for Learning* (1952).

Dr. East was a member of the University Faculty Senate from 1958-79; she served on its Faculty Affairs Committee from 1959-75, holding chairmanships from 1968-70 and 1973-74. Additional service to the University included membership on Faculty Club committees from 1969-79, including the presidency of the Faculty Club from 1977-79. She served on the University Review Committee on Promotion and Tenure from 1975-77, and was committee chairman during 1976-77.

In addition to memberships in many professional and honorary societies, she chaired the accreditation committee of the American Home Economics Association from 1967-69, and was president of the Association in 1972-73. She was a director of Consumers Union from 1960-75 and president of the American Council of Consumer Interests in 1955-56.

She earned her B.A. at San Jose State College and the M.A. and D.Ed. degrees from Teachers College, Columbia University.

Dr. East plans to remain in State College during part of every year, working on historical research and writing.

Obituary

Sayers J. Miller Jr., assistant professor of health education, died April 4. He was 49. Prof. Miller earned bachelor's and master's degrees at Purdue University and received a certificate of physical therapy from the University of Pennsylvania. He came to Penn State in 1974 and was coordinator of the area of emphasis in a athletic training for undergraduates. He was trainer for the varsity basketball team and was a trainer for the U.S. Olympic Team at the recent Lake Placid Winter Games.

Elsewhere in Academe

The cost of a college education is rapidly approaching the \$10,000-a-year mark in some quarters. According to the Chronicle of Higher Education, double-digit increases in prices for tuition, room and board will be common next Fall, with the average boost close to 13 percent.

A student at Yale next year will face bills of at least \$9,110 — up 12 percent from this year's level; of that total, \$6,120 will go for tuition. Northwestern University in Evanston, Ill., will charge \$5,985 next year for tuition alone — a 10.5 percent increase over this year. Students at the University of Notre Dame will pay \$6,490 for tuition in 1980-81 — a 14 percent boost.

Despite rising tuition, admissions officials at most New England colleges say they have received more applications this year than last. Applications for September's freshman class rose this year at more than 75 percent of the region's colleges, according to an informal survey published March 30 by the Boston Sunday Globe. Of 31 institutions polled, only seven schools — including Dartmouth University — reported receiving fewer applications.

Colorado lawmakers are seriously considering the use of "vouchers" to finance higher education. The chairman of the education committee of the state's house of representatives says he will lead an effort to get a voucher system adopted via statewide referendum in 1982. A voucher system would supplant legislative appropriations; instead, financial support would be based on the number of students enrolled in a particular institution.

A U.S. House panel has approved a measure — HR 6522 — that would assign individual spending ceilings for the first time to each of the 11 National Institutes of Health, despite opposition to the plan from academic researchers. At present, only the National Cancer Institute and the National Heart, Lung, and Blood Institute have spending ceilings established by law. Appropriations for the other institutes are determined by annual requests from the administration, subject to approval by Congressional appropriations committees.

Campus Update

Hershey Medical Center's hospital auditorium will be the setting for *The Lint*, a one-act play about the relationship between a nurse, surgeon and their dying patient, at 8 p.m. tomorrow evening. The playwright is third-year medical student Theodore Falton.

Dr. Joanne V. Trautman, professor of humanities and director of the College of Medicine's Center for Humanistic Medicine (CHM), says that "this is the first event sponsored by CHM which is open to the general public. We are really excited about its quality and the fact that it is a total Medical Center production."

Dr. Trautman is the producer, and the play was cast and is directed by Dr. Barry Kauffman, assistant professor of medicine (neurology). The cast consists of two third-year medical students and a first-year physician's assistant student.

INTERCOM is an internal communications medium published weekly during the four years of the class schedule for the faculty and staff of The Pennsylvania State University. USPS 351-170

Ex-CIA head, Nobel Laureate, art historian to speak

Colloquy to bring Colby

William E. Colby, former director of the CIA and author of *Honorable Men — My Life in the CIA*, will speak at the University at 8 p.m. Wednesday, April 16, in Eisenhower Auditorium. His talk is sponsored by Colloquy.

As CIA director from 1973-76, Mr. Colby faced one of the most difficult tasks in government: to maintain the effectiveness of the CIA during a time of unprecedented public investigations of the Agency's covert operations. In an effort to counteract widespread mistrust of the CIA, he testified to Congress and the press about its activities while fighting to protect its sources.

He sums up his defense of the Agency in these words: "It may have done some things in the past which were either mistaken or wrong, but it corrected itself. The CIA today is the best intelligence service in the world. . . . It is the envy of foreign nations. . . . I think we need good intelligence in the world ahead of us. I think we have got it — and I think we should continue."

After military service in World War II, Mr. Colby, a Princeton graduate, received his law degree from Columbia University and practiced for two years with a New York law firm before joining the National Labor Relations Board staff. At the outbreak of the Korean conflict, he joined the CIA where, with the exception of three years as chief adviser to the pacification program in South Vietnam, he remained until 1976.

He ran the Agency's covert intelligence-gathering activities and its secret political and paramilitary operations in Stockholm, Rome and Vietnam. In 1972 he was named executive director-controller, moving into the Agency's top spot a year later.

Nobel Laureate to give Mueller Lecture

Dr. John Bardeen, winner of two Nobel Prizes for physics, will present the 1980 E.W. Mueller Memorial Lecture at the

John Bardeen

University on Thursday, April 17.

The lecture, entitled "The Early Days of the Transistor," will be held at 8 p.m. in Room 117 Osmond Laboratory. It is sponsored by the Department of Physics and is open to the public free of charge.

Dr. Bardeen, described by his colleagues as a "blackboard physicist" — a theoretician, "is the first person to win two Nobel Prizes in the same field. He shared his first Prize with W.H. Brattain and W. Shockley for research on semiconductors leading to the invention of the transistor. His second, in 1972, was for the development of the theory of superconductivity and was shared with L.N. Cooper and J.R. Schrieffer. This phenomenon, in which electrical resistance in certain metals and alloys vanishes abruptly at a temperature above absolute zero, has led to the construction of new, powerful magnets and may find application in computers and power transmission lines.

Dr. Bardeen, emeritus professor of electrical engineering and physics at the University of Illinois, is a Fellow and past president of the American Physical Society. He is a past member of the President's Science Advisory Council. Other honors include the Stuart Ballentine Medal from the Franklin Institute, the

Alessandra Comini

American Physical Society Buckley Prize and the U.S. National Medal of Science.

He earned his B.S. and M.S. from the University of Wisconsin and his doctorate from Princeton University.

The lecture honors the memory of Dr. Erwin Mueller, an Evan Pugh Professor of Physics, who invented the field ion microscope which enabled him to be the first person to "see" an atom.

Viennese art subject of two presentations

The painting and sculpture of turn-of-the-century Vienna, currently the subject of increasing attention from both historians and museum curators, will be the subject of Alessandra Comini, an internationally known scholar and lecturer, on April 17 and 18 at the University.

Professor of art history at Southern Methodist University, Dr. Comini will present the first of two public lectures at 8 p.m. Thursday, April 17, in Room 112 Walker Building. Her topic is "The Fantastic Art of Vienna," which is also the title of her latest book, published by Knopf.

Her second lecture, in conjunction with the Faculty-Graduate seminar on Wittgenstein's Vienna, is entitled "Vienna

William Colby

and Its Artistic Connection." It will be presented at 3:30 p.m. Friday in Room 101 Kern Building.

Architectural Digest has called Professor Comini "one of the most readable of art historians." She has published three books dealing with the subjects of her Penn State lectures, which will focus on the works of Gustav Klimt, Egon Schiele and Oskar Kokoschka.

Dr. Comini translated and edited Schiele's diary, published as *Schiele in Prison* by the New York Graphic Society. This book received a National Book Award Nomination in 1975. She is the author also of *Egon Schiele's Portraits*, *Gustav Klimt*, and *Egon Schiele*. Another volume, *Changing Image of Beethoven*, has been accepted for publication.

Dr. Comini organized exhibitions on Klimt and Schiele for the Guggenheim Museum and the Arnold Schoenberg Centennial Exhibition for the combined museums of Vienna.

A graduate of Barnard College, Dr. Comini earned her M.A. at Berkeley and her Ph.D. at Columbia. She has taught at Berkeley, Yale and Columbia.

Dr. Comini's lectures are sponsored by the Interdisciplinary Graduate Program in the Humanities and by the Institute for the Arts and Humanistic Studies.

Senate

(Continued from page 1)

by senators. Dr. Axt explained that entrance requirements for the Scholars Program had deliberately not been specified in the proposed legislation because it was felt that some experience in administering the program should be gained before anything was "written in stone."

Dr. Axt noted that the Undergraduate Instruction and Curricular Affairs Committees will review the program regularly. (A detailed description of the Scholars Program appeared in the March 13 issue of INTERCOM.)

The proposal to abolish zero credit courses was opposed by several senators from the College of Engineering, which has been offering Engineering 10 and 11 for some 35 years as a professional development, non-credit course for seniors. However, the Senate adopted the recommendation by Curricular Affairs to discontinue all of the nine courses currently offered in this mode.

In presenting the report of the Senate Libraries Committee for 1979-80, Committee Chairman Miles T. Pigott noted that the University had reallocated an extra \$1,000,000 to the Libraries but cautioned that "nearly 50 percent of the expenditures for books, journals and other materials for University Park and 25 percent of those for the Campus system are based on temporary funds."

He called attention also to problems the Libraries face in terms of space. The Committee report points out that

"even if we were to use all suitable areas in Patten for shelving this would cope with only four years of new books and

would displace 1,000 seats. . . ."

To assist the Libraries in planning for automation, the Senate Library Committee will develop "a sophisticated user survey in order to gain better understanding of the real and perceived needs of the faculty, their reactions to possible alternatives and their suggestions for change."

A 1980 progress report on planning and budget procedures was presented by Dr. Frank Mallette, chairman of the Committee on Planning and Development. The Committee report calls attention to the fact that, "the present planning and budget year represents a transition in two respects . . . it comes before a major implementation of the *Perspective on the '80s* can be initiated . . ." and it represents "the first major attempt to tailor the planning and hearing processes to individual academic units."

The report expresses the Committee's concern that the University maintain flexibility and selectivity in the face of mounting inflation, and notes that questions have been raised about "the calendar, the term system, administrative and maintenance costs and management effectiveness." It concludes by noting the following progress in the last year: ". . . 23 public and private universities (in Pennsylvania) have spent an average of 8.2 percent of their general funds budget for administration. Administrative costs at Penn State are 6.2 percent, showing that there has been success in this aspect of cost control."

'Staying Environment'

(Continued from page 1)

were formed to discuss four important areas in the creation of a Staying

Environment — faculty responsibilities, curricular issues, introduction of the student to the University, and drop-out prone students.

Recommendations from the first group included educating faculty members of the importance of the advising function; reviewing the character and intensity of faculty involvement in the Freshman Testing, Counseling and Advising Program; administrative encouragement of a caring attitude by all faculty members; and attention to the special expectations and requirements of "nontraditional" students.

In the area of curricular programs, discussants suggested that more senior faculty members teach freshman courses; that the identity of freshmen with their majors be increased by allowing them to take some professionally relevant courses in their first year and to spread BDR courses over four years; and that the use of coordinated and integrated courses be expanded.

In discussing the introduction of students to the University, participants felt that students should receive accurate and complete information about what to expect from college before enrollment if possible, and that the academic community should be intensely involved in assuring that this communication is realistic and complete.

Finally, the group dealing with drop-out prone students proposed that Penn State endeavor to show these freshmen that the institution is interested in and committed to their academic success. "The most helpful response will be one cognizant of particular student needs and delivered by a caring committed individual," Dr. Dunham reported. "The University should direct special attention to the public relations involved in advertising available remedial services, and deficiencies should

not be treated as stigmas that might make a student reticent to seek needed help."

Pointing to the creation of the Joint Committee on the Freshman Experience, Dr. Dunham noted that while this is a strong endorsement by the administration of the importance of the freshman year, in the final analysis, "it will take the personal and individual commitments of each of us to provide thoughtful responses based upon what is best for and needed by those being served — the students. The goal is to create a Staying Environment, not just to improve retention and, therefore, insure survival, but to foster the kind of faculty-student interaction that enhances scholarship and makes Penn State a better University."

Beaux Arts Trio tickets go on sale April 15

Acclaimed worldwide for their freshness of approach, superb musicianship and tremendous zest, the Beaux Arts Trio will perform in Schwab Auditorium at 8:30 p.m. Saturday, April 19. The evening's program will include Beethoven's Trio in C Minor, Opus 1, No. 3; Ives' Trio; and Dvorak's Trio in F Minor, Opus 65.

The trio — Menahem Pressler, piano; Isidore Cohen, violin; and Bernard Greenhouse, cello — have toured extensively in North America, Europe, Africa, and the Middle East.

Tickets for the performance will go on sale Tuesday, April 15, from 9 a.m. to 4 p.m. at the HUB booth and the Eisenhower Auditorium box office. Phone orders on Master Charge or Visa will be accepted at 814-863-0255 from 9 a.m. to 4 p.m. on the days of sale.

The rich tradition of Mont Alto

Penn State's Mont Alto Campus is one of those rare places where a visitor immediately feels at home.

The legacy of Mont Alto's days as the Pennsylvania State Forest Academy — often called "the cradle of American forestry" — pervades the campus. Old buildings stand their ground among the new, softened by towering trees and gentle landscaping on acreage surrounded by forests, orchards and a meandering stream. It all suggests an ambience in which people work, study and live happily with each other.

Campus Director Vernon L. Shockley concedes a similar attraction since he arrived at this southeastern Franklin County campus in 1965 as dean of student affairs. A graduate of Louisiana State University, he earned his M.S. in psychology and D.Ed. in higher education and student personnel, both at Penn State. He has directed Mont Alto's fortunes since 1971.

"I came with the intention of staying a year or two," he recalls. "I found I enjoyed the atmosphere and the way people interact here, and I've not seen anything I like better elsewhere."

Neither, apparently, have many of Mont Alto's students, 75 percent of whom come to the campus from regions beyond the immediate service area of Franklin, Fulton, Adams and western Cumberland counties. More than half of the 800-plus students reside in the three campus dormitories; a quarter of them live in apartments in the borough of Mont Alto; and the other quarter commute.

"The essentially residential nature of our campus has created a small-college atmosphere," Dr. Shockley points out. "This, in turn, creates a closeness which our students value and which continues when they graduate or move on to University Park to complete their degrees. It's not unusual to find whole floors of University Park dormitories or apartment buildings in State College designated as 'Mont Alto floors.' And it explains why, when we have special events such as Field Day in May, we get so many former students coming back to visit. Mont Alto means a lot to them."

A major ingredient in the students' affection for Mont Alto, aside from the opportunity to make lasting friendships with their peers, is the individual attention they receive from faculty and staff members.

"We've gone to the point of rescheduling a class to accommodate a student who perhaps won't graduate unless we can make some sort of rearrangement," Dr. Shockley says. "We've moved the location of entire classes to ensure that a handicapped

student can attend. We make every effort to accommodate individual needs without unduly inconveniencing other students."

Mont Alto's concern for students manifests itself in other ways. In 1967, the campus pioneered a community service program in which freshmen and sophomores — primarily those interested in education or human development — serve brief internships in classrooms or in human service agencies.

"This allows them to sample their intended careers at a very early stage in their schooling," Dr. Shockley explains. "They can find out if they're really suited to their careers well before their junior or senior years, when it may be too late to enroll in another major."

"Students and faculty members get to know each other rather well at Mont Alto," he continues. "In fact, one of the prime requisites for our faculty members is a genuine interest in students — an interest that goes beyond, say, perfunctorily advising a club. It spills over to field trips, weekend outings, intramural sports, and just being available if a student needs help or support."

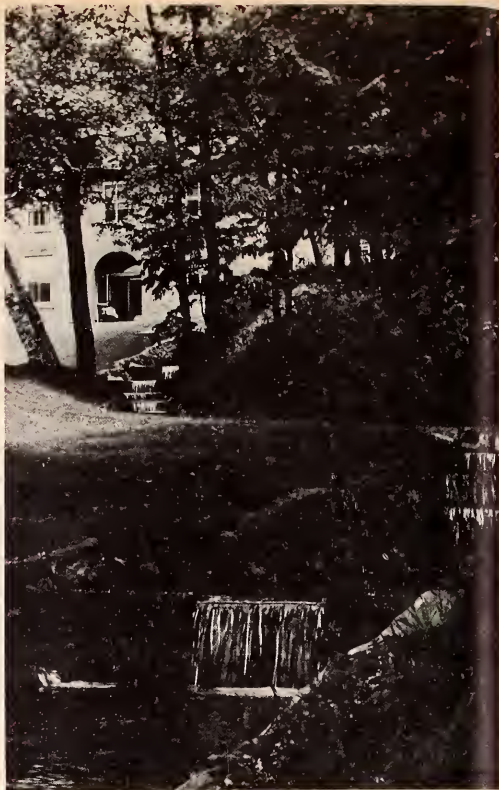

Mont Alto's advocacy of student-faculty interaction has paid off academically as well. As a result of its programs of student-faculty research, five Mont Alto sophomores have presented their research findings at Pennsylvania Academy of Science meetings within the last 2 years, and four more are scheduled for this spring's meeting.

Giving added impetus to Mont Alto's science curricula — the bulk of its students being enrolled in the Colleges of Agriculture, Engineering, Earth and Mineral Sciences, and Science — is the newest undergraduate science facility in the Penn State system. The Science/Technology Laboratory, completed in 1976, houses the chemistry, physics and biology complexes. Its sophisticated equipment includes a photogrammetry lab, where students learn to interpret aerial and satellite photographs. In addition, the building contains administrative offices and an art gallery.

The campus's newer structures — erected since 1968 — also include Mont Alto Hall (a dormitory), a dining hall, a library, and Penn Gate Dormitory — privately built but subsequently purchased by the University.

The General Studies Building — which opened in 1926 as the Forest Academy's main academic building — houses classrooms, an auditorium, a bookstore, a computer center and a listening-learning center.

Mont Alto serves not only to disseminate knowledge, Dr. Shockley

The man-made cascade and limestone dormitory are legacies of the Pennsylvania State Forest Academy.

stresses, but also to generate it in a variety of disciplines.

"One of our newer faculty members is Dr. Carl B. Wolfe Jr., assistant professor of biology. His research focuses on mushrooms and, in addition to his recent book on the subject — *Austroboletus and Tylopilus subg. Porphyrellus* (J. Cremer, 1979) — he's been presenting talks on mushrooms identification and collection to local audiences, and they've been very well received."

Another new faculty member is Dr. Carol Kessler, assistant professor of English and American Studies, whose research involves women and literature. She participated in two major panel presentations this past autumn: as chief biographer for "Mothers and Daughters

in Literature: The Lost Tradition" at the annual meeting of the Modern Language Association and as panel summarizer and presenter of "From Sunnyside to Sangreal: The Elizabeth Stuart Phelps" at the American Studies Association convention.

Dr. Ronald R. Keiper, associate professor of zoology, enjoys an international reputation for his studies of animal behavior, primarily on the feral ponies of Assateague and Chincoteague islands. Besides his many scholarly publications, he has written a children's book, *The Island Ponies* (Morrow & Co., 1979). Dr. Keiper's instructional talents equal his research accomplishments; he has won Penn State's two top teaching awards, the Lindback and AMOCO.

University Park Calendar

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

April 10-20

Special Events

Thursday, April 10

Spring Sereade Special Dinner, 4:45-6:45 p.m., HUB Terrace Room.
Cinematheque, Herbert Ross, *Goodbye Mr. Chips*, 6:30 and 9 p.m., HUB Assembly Hall.
Dept. of Political Science/Latin American Studies Program Lecture, 7:30 p.m., Room 109 Walker. Mercedes Fermin, Fulbright Distinguished Latin American Scholar, on "Women in Latin American Society and Politics."
"College of Science/Alumni Society, A. Dixon Johnson Memorial Lecture, 8 p.m., Room 105 Forum. Walter Sullivan, New York Times, on "Communicating Science to the Public."

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Artists Series, Ira Levin, *Deathtrap*, 8:30 p.m., Eisenhower Auditorium.

Friday, April 11

Public Seminar, 3 p.m., Keller Bldg. Auditorium. Dr. John W. Oswald, Dr. Eric A. Walker, Dr. Henry Gomberg and Dr. Bertram Wolfe on "Contributions of Research Reactors to Education, Industry and Safety."
Spring Sereade Special Dinner, 4:45-6:45 p.m., HUB Terrace Room.

FSHA 410, Dinner in Honor of Ben Franklin - 1785 Philadelphia, 5:45 p.m., Maple Room. Henderson. Reservations, 865-7020 or 237-2989.

Chinese Animation Festival, 7 p.m., Room 10

Spa.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Penn State Blue Band, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, April 12

Robeson Cultural Center, bus trip to Washington, D.C., through April 13. Information, 865-1779.

Penn State Forestry Society, 24th Annual Tri-State Field Meet, 9 a.m.-4:30 p.m., fields east of Beaver Stadium.

"Brazalea Nuclear Reactor, Open House, tours at 10 a.m. and 2 p.m.

Spring Dairy and Livestock Judging Contest, 10 a.m.-3 p.m., University Dairy and Beef/Sheep Centers.

Sports: track (women) vs. Maryland, noon; baseball vs. George Washington (double header), 1 p.m.; lacrosse (women) vs. Ursinus, 2 p.m.

College of Earth and Mineral Sciences Open House, 1980 Earth and Man Exposition, 1-5 p.m., Room 101 Kern.

Football, Family Camera Day, 1 p.m., Beaver Stadium.

France-Cinema, *Two English Girls*, 7 and 9 p.m., Room 101 Kern.

URTC, *The Innates of the Convent of Saint Mary Egyptian*, 8 p.m., The Pavilion Theatre.

Penn State Symphony Orchestra, 8:30 p.m., Eisenhower Auditorium.

Sunday, April 13

University Chapel Service, 11 a.m., Eisenhower Chapel. Ecumenical Student Worship Service.

Unity Christian Campus Ministries Service, 11:15 a.m., Frizzell Room, Eisenhower Chapel.

College of Earth and Mineral Sciences Open House, EMEX 80, 1-5 p.m.

Sports: baseball vs. Rider (double header), 1 p.m.

Opening Reception for Diane Pepe Exhibit, 3-5 p.m., Museum of Art.

Penn State Women's Choir and Penn State Singers, Kimberly Wolfe, conductor, 3:30 p.m., Music Bldg. Recital Hall.

HUB Mini Concert, Johnston Bros. country rock-country swing, 9 p.m., HUB Ballroom.

Monday, April 14

Music in Interesting Times Lecture, 3 p.m., Music Bldg. Recital Hall. Leonard B. Meyer, music and humanities, Univ. of Pa., on "Music Today . . . and Tomorrow?"

Shakespeare film, *Hamlet* (Richardson), 6:30 p.m., Room 101 Chambers.

France-Cinema, *Two English Girls*, 7 and 9 p.m., Room 101 Kern.

Brenda Hirsch, soprano, 8:30 p.m., Music Bldg. Recital Hall.

The Beaux Arts Trio will appear April 19 in Schwab Auditorium. Members, from left, are Menahem Pressler, Isidore Cohen and Bernard Greenhouse.

Tuesday, April 15

Fixed date for meetings involving Commonwealth Campus Faculty. GSA videotape, "CBS: The First 25 Years," noon, Kern Lobby.

STS/Three Cultures Dialogue luncheon, noon; presentation, 12:20 p.m., Room 101 Kern.

James J. Fritz, chemistry, on "Complicity in the Scientific Community."

Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Lorraine Kapitanoff, Slavic languages, on "The Art of Russia."

Sports: softball vs. Clarion (double header), 1:30 p.m.

School of Music Common Hour, student performance, 4 p.m., Music Bldg. Recital Hall.

Shakespeare film, *Hamlet* (Richardson), 6:30 p.m., Room 112 Chambers.

Artists Series film, *Of Human Bondage*, 8 p.m., Schwab.

Wednesday, April 16

Fixed date for meetings involving Commonwealth Campus Faculty.

UDIS, Performance Objectives workshop, 1:30 p.m., Room 128 Mitchell. Reservations and information, 865-7475.

Music in Interesting Times Lecture, 3 p.m., Music Bldg. Recital Hall. Joanne Feldman, music and first violinist, Alard String Quartet, on "Music and World."

Naiads Water Show, student preview, 7 p.m., Natatorium.

College of HPER Lecture, 8 p.m., Room 101 Chambers. Larry K. Olsen, health sciences, Arizona State Univ., on "School Health Curriculum Project in Saudi Arabia and the United States."

Colloquy, William Colby, former CIA director, speaker, 8 p.m., Eisenhower Auditorium.

Musica da Camera, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, April 17

Honorary Engineering Lecture, 4 p.m., Room 26 Mineral Sciences. John McLucas, executive vice president, COMSAT General Corp., on "The Future of Communications."

FSHA 410, Northern Italian Dinner, 5:45, 6 and 6:15 p.m., Maple Room. Henderson.

Reservations, 865-7441 and 238-8331.

Cinematheque, Fellini, *Satyricon*, 6:30 and 8:30 p.m., HUB Assembly Hall.

Dr. C. Walter Hodges on "The Restoration of Shakespeare's Globe Theatre, 7:30 p.m., Room 112 Chambers. Sponsored by IAHS-Departments of English and Theatre and Film.

"College of Science, Mueller Lecture, 8 p.m., Room 117 Osmond. John Bardeen, Nobel Laureate, Univ. of Illinois, on "The Early Days of the Transistor."

IAHS/Interdisciplinary Graduate Program in Humanities Lecture, 8 p.m., Room 112 Walker. Alessandra Comini, art history, SMU, on "The Fantastic Art of Vienna."

Kern Theatre, student preview, 8 p.m., Room 112 Kern.

Linguistics/Anthropology/Slavic Languages Lecture, 8 p.m., Room 107 Willard. Michael Silverstein, Univ. of Chicago, on "On Saying That . . . in Chinook."

Naiads Water Show, "That's Waterainment," 8 p.m., Natatorium.

Friday, April 18

Faculty-Graduate Seminar on Wittgenstein's Vienna, 3:30 p.m., Room 101 Kern.

Alessandra Comini, art history, SMU, on "Vienna and Its Artistic Connections."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. William Duiker, East Asian history, on "How They Won: Comments on the Communist Victory in Viet Nam."

9th Annual Black Arts Festival Lecture, 8 p.m., Frizzell Room. Eisenhower Chapel. Dr. Loretta Long, actress and educator, on "The Need for Excellence in the Academic Setting."

Kern Theatre, "Starting Here, Starting Now," musical review, 8 p.m., Room 112 Kern.

Naiads Water Show, "That's Waterainment," 8 p.m., Natatorium.

Penn State Symphonic Wind Ensemble, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, April 19

Phi Psi 500 Sports: baseball vs. Howard (double header), 1 p.m.; lacrosse (women) vs. West Chester, 2 p.m.; lacrosse (men) vs. Rutgers, 7 p.m.

Black Arts Festival: Dr. James Cone, Union Theological Seminary, on "Black Liberation Theology and Its Implication for Blacks in Higher Education," 1:30 p.m., Frizzell Room.

Chapel. Lonnie Liston Smith and Dexter Wansel, jazz pianists, 8 p.m., Eisenhower Auditorium.

Kern Dinner Theatre, dinner, 6:30 p.m., Room 102 Kern; "Starting Here, Starting Now," 8 p.m., Room 112 Kern.

Naiads Water Show, "That's Waterainment," 8 p.m., Natatorium.

Artists Series, Beaux Arts Trio, 8:30 p.m., Schwab.

Sunday, April 20

"EcoAction, Earth Day '80, HUB Lawn and Hetzel Union Bldg.

University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. James Cone, Union Theological Seminary, New York City, speaker.

Sports: baseball vs. St. Francis (double header), 1 p.m.

Black Arts Festival. Unity Christian Campus Ministries, Beaver Campus and Bradlock Gospel Chorus Concert, 2 p.m., Frizzell Room.

Caribbean Dinner, 6-8 p.m., and cultural show, Robeson Cultural Center.

Kern Dinner Theatre, dinner, 6:30 p.m., Room 102 Kern; "Starting Here, Starting Now," 8 p.m., Room 112 Kern.

Seminars

Friday, April 11

Analytical Chemistry. Steve Ankabrandt, grad. student, on "Electrochemistry of Sulfur Species in Coal Process Streams," 11:10 a.m., Room 333 Whitmore.

Physical Chemistry. Gary Pruett, Univ. of Pa. on "State Resolved Reaction Dynamics in Molecular Beams," 2:30 p.m., Room 333 Whitmore.

Tuesday, April 15

Organizational Behavior. Henry Mintzberg, McGill Univ., on "Research Methodology for Tracking Managerial Strategy in an

Entrepreneurial Firm," 9 a.m., Room 201 BAB.

Plant Pathology. David Anzola, grad. student, on "Role of Pollen Transmission in Seed-Borne Viruses," 9:45 a.m., Room 213 Buckhout.

Metallurgy. Thomas Tsai, grad. student, on "Slag-Metal Equilibrium in Stainless Steelmaking," 11 a.m., Room 301 Seidle.

Organic/Inorganic Chemistry. Michael Breen, grad. student, on "Synthesis and Reactions of Transition Metal Formyl Complexes," 12:45 p.m., Room 333 Whitmore.

Physics. M.G. Payne, Oak Ridge National Lab., on "Effects of Collective Emission on Multiphoton Ionization," 3:30 p.m., Room 445 Davey.

Engineering Science and Mechanics. E. Williams, physics, on "Nearfield Acoustical Holography," 4 p.m., Room 232 Hammond.

Wednesday, April 16

HPER, Larry K. Olsen, Arizona State Univ., on "Future Trends in Elementary Health Education," 2 p.m., Room 111 White.

Geosciences. David A. Stephenson, Water Resources Section, Woodward-Clyde Consultants, on "Hydrogeologic Aspects of Energy Development," 3:45 p.m., Room 26 Mineral Sciences.

Thursday, April 17

Ceramic Science. G.C. Kuczynski, Univ. of Notre Dame, on "New Developments in Sintering Theory," 11 a.m., Room 301 Seidle.

Chemistry. Irwin Rose, Institute for Cancer Research, on "Studies of Enzyme Mechanisms," 12:45 p.m., Room 333 Whitmore.

Institute for Policy Research/Dept. of Political Science. Donald C. Pels, Univ. of Michigan, on "Use of Information in Innovating by Local Governments," 2 p.m., Room 313 HUB.

Anthropology. John K. Mallory, Randolph J. Widmer and Paul A. Rader, grad. students, on "Modeling the Place of Protein in a Pre-Colombian Subsistence System," 3:30 p.m., Room 107 Carpenter.

Acoustics. S. David Roth, noise control lab., on "Atmospheric Propagation of Sound from a Wind Turbine Source," 4 p.m., Room 75 Willard.

Fuel Science. Giarid A. Simons, Physical Sciences, Inc., on "The Role of Transport Species Through Porous Particles During Pyrolysis," 4 p.m., Room 301 Seidle.

Exhibits

Chambers Gallery: William Bradley, sculpture and drawings; ceramics by senior Fine Arts Students.

HUB Galleries: master works from the National Glass Conference, through April 12. "Paintings of Two Pennsylvania Artists, Henry O. Tanner and Horace Pippin, opens April 13. The Gallery. Bruce Johnson, prints and watercolors, through April 15; "Landscape Architects Design Awards Exhibit, opens April 16, Browning Gallery.

Bayan Bielski, sculpture, opens April 14. Gallery Lounge, "Slavic Folk Art Festival Exhibit, Art Alley.

Kern Gallery: Ukrainian Clad Esher display, through April 12. Glass Works, through April 14. David Rubello, paintings and photographs; Laverta Butler, ceramics, opens April 11; Anne Curtis, ceramics, opens April 14.

Museum of Art: Pennsylvania prints from the collection of John C. O'Connor and Ralph M. Yeager, through April 13, aspects of representation after World War II - works from the permanent collection. Chinese export porcelains from the collection of Dr. and Mrs. Harold L. Tonkin, recent works on paper by Diane Pepe, opens April 19.

Pattee Library: Rome Hanks, Mary Edith Miller and Patricia Walsh, photographers, through April 18. East Corridor Gallery, "Sofa Group," works by Veronica Taylor and Christine Siksa, through April 18.

Lending Series: Lobby. Mitchell Weiss, ceramics, through April 18. The Fantastic Art of Vienna, 4 p.m., Main Lobby.

Visual Arts Bldg. Zoller Gallery: National Glass Conference Exhibit, through April 13. Graduate Thesis Exhibit, opens April 19.

Mont Alto

(Continued from page 4)

Mont Alto is a locus of curricular innovation. Its associate degree program in surveying technology is one of only two such programs in the Penn State system and is, in fact, recognized nationally. (Wilkes-Barre has the other.)

"We'll be offering three new associate degree programs in Fall Term 1980," Dr. Shockley says. "Business Administration and Agricultural Business are offered at other campuses, but they'll be new to Mont Alto. An unusual new associate degree program is Railway Engineering Technology, which concentrates on track management, not rolling stock. The only other campus that will offer that program is Wilkes-Barre."

Mont Alto, of course, offers the first two years in all of Penn State's baccalaureate degree programs and the associate degree programs in letters, arts and sciences, but any conversation about its curricula inevitably turns to forestry.

It is the only campus offering the two-year program in Forest Technology — also recognized nationally — and it also provides the first two years of the School of Forestry's baccalaureate degree majors. Forestry enrolls more students than any other major at Mont Alto.

"Mont Alto came to Penn State as an inherited asset," Dr. Shockley says. "The school started as the Pennsylvania State Forest Academy in 1903. In 1929 the Academy was phased out and turned over to Penn State in exchange for land. From 1929 to 1963 — the year we became a Commonwealth Campus — Penn State's School of Forestry used Mont Alto solely to educate freshman forestry majors, who transferred to University Park for their remaining three years."

In addition to the buildings of the Forest Academy, the Campus also inherited, and still maintains, its arboretum, which contains most hardwoods indigenous to

North America and is acclaimed as one of the finest in the East. Mont Alto's associate degree forestry students get practical experience by managing the Waynesboro Watershed, as did their predecessors at the Forest Academy.

In 1978, the Campus celebrated its 75th anniversary as an institution of higher learning, but the history of the site goes back much further.

"The site originally was an iron foundry founded by the Hughes brothers of Virginia about 1807," Dr. Shockley says.

"Shortly before the Battle of Gettysburg in 1863, Jubal Early's Confederate troops passed by after burning Chambersburg and destroying other nearby foundries, but they spared this one — ostensibly because of the Hughes brothers' southern sympathies."

The year following, an invalided Union colonel, George Westing, took over the foundry and guided it to prosperity until 1893, when it fell victim to the Bessemer Process. The house he lived in and enlarged is now Westing Hall, which contains a game room, lounge and snack bar. Westing Hall is alleged to be the oldest structure Penn State owns, as the log core most likely was erected by the Hughes brothers in the early 1800s.

There is more history to the site. The abolitionist John Brown, during the six weeks he lived in nearby Chambersburg before the Harper's Ferry raid, in 1859 taught Sunday School in the Episcopal Chapel adjacent to the Campus. After the raid, one of his followers, Captain John Cooke, was captured within a stone's throw of the present campus entrance.

"We do have a rich history and tradition at Mont Alto," Dr. Shockley says, "but the legacy of the place — particularly as a forestry school — has sometimes been a burden in that many people still think of us as a forestry school. We're proud of that legacy and of our continuing programs in forestry, but the message we'd like to get out is that we offer so much more."

By Roger Williams

News in Brief

(Continued from page 1)

through a comprehensive program for minorities developed at Penn State. That program is a response to a resolution of the Association for the Advancement of Journalism calling for expanding news media opportunities for minority groups. Through it, the School will sponsor a number of workshops and conferences of special interest to minority journalists.

Naiads show April 17-19

The Penn State Naiads Synchronized Swim Club will present its annual water show on April 17, 18, and 19 in the Natatorium. Each day's show begins at 8 p.m.

This year's show, "That's Watermain'tain," will feature the 36 Naiads members in 14 different routines, each differing in music, theme and number of swimmers. Two of the routines won first place honors in the recent Eastern Regional Meet.

Tickets are available at the Athletic Ticket Office in Recreation Building and can be purchased at the door on the nights of performances.

Musica da Camera to perform

Two major 20th century works for chamber orchestra have been selected for a concert by Musica da Camera at 8:30 p.m. Wednesday, April 16, in the Music Building Schoen Hall.

Arnold Schoenberg's "Verklärte Nacht" ("Transfigured Night") will open the program. Written in 1899 when the composer was 25, the piece is based on a poem by Richard Dehmel. It was arranged for string orchestra in 1921 and is the composer's most frequently-performed work.

Musica da Camera will also perform Igor Stravinsky's "Pulcinella Suite." This

composition, which consists of several movements, is based upon the works of Baroque composer Giovanni Battista Pergolesi.

Musica da Camera is composed of 11 string players, mostly graduate students and faculty from the School of Music. The group is directed by D. Douglas Miller, conductor of the Penn State Symphony Orchestra and an associate professor of music.

Lions to hold Camera Day

Penn State's football team will hold its 10th annual Family-Camera Day at Beaver Stadium on Saturday, April 12, at 1 p.m. The Penn State team, coaching staff, cheerleaders and Nittany Lion will be available during the hour-long photograph and autograph session, which will be followed by an intra-squad scrimmage at 2 p.m.

Young Artists to play with Penn State Symphony

The winners of the 1979-80 Young Artists Competition will present their annual concert at 8:30 p.m. Saturday, April 12, in Eisenhower Auditorium. The performers will be accompanied throughout the program by the Penn State Symphony Orchestra.

Rubello exhibit at Kern

An exhibit of the paintings and photographs of David Rubello, assistant professor of art, is on display in the Kern Graduate Center Galleries through April 26.

Mr. Rubello studied painting at Detroit's Society of Arts and Crafts (now the Center for Creative Studies), at Rome's La Accademia di Belle Arti, and in Denmark. He completed his MFA degree at the University of Michigan in 1972.

He taught at Michigan and at Flint Community College before joining Penn State's faculty in 1974.

The '80s

(Continued from page 1)

responsibilities. What they might have questioned was the cost of remedial education."

Whether Penn State still has the capability to respond to opportunity wherever it arises is another of Dean Bartoo's concerns.

"Suppose," he says, "the federal government were to decide to double its investment in sponsored research in the College of Earth and Mineral Sciences. Could the University respond with seed money and space? This ability to respond quickly is one of the most precious attributes of any university, and I am concerned that we retain the capacity."

E&MS is one of the areas which Dean Bartoo believes will expand significantly in the '80s. "If we can take advantage of the opportunities, sponsored research in that College could double in the new decade," he says. "But one of the major inhibitors is lack of space. While the *Perspective on the '80s* suggests that we have to spend more money to renovate existing space, rather than put up new buildings, I think more importantly we will have to reallocate space, and that is a decision that requires extremely high administrative courage."

In addition to its established strengths in the earth and mineral sciences, Penn State has a long history of contributions in agriculture and engineering, two other areas on which Dean Bartoo believes the University can capitalize in the '80s.

"There will be no abating of the need for more food and fibre and for more efficient ways of producing and processing them," he continues, "and the decade will also require a great effort to restore U.S. preeminence in industrial productivity. Much of the basic technological knowledge to push us in the latter direction comes from engineering. At the same time, since people will be needed to manage both small- and large-scale

economic and political systems, Business Administration is likely to be another growth area."

While graduate enrollments in the arts and humanities will probably decrease moderately in the beginning of the '80s, Dean Bartoo thinks that their survival is in no real danger. "I foresee no revolutionary change in the knowledge base," he says, and he points to a recent article in *Science* by Kenneth Boulding which addresses this question. Boulding discussed "secure and insecure" sciences. He cited classical physics and genetics among his examples of "secure" sciences and compared them with such "insecure" fields as computer science, where there is an exploding knowledge base. "I believe the humanities fit the definition of a 'secure' discipline," Dean Bartoo says. "They may shrink, but I don't think they are going to disappear."

Interdisciplinary research units at Penn State provide both financial support and research problems for graduate students, and Dean Bartoo believes the University should be more aggressive in restructuring these units in the '80s. Some of them, he says, seem to have lost momentum.

He also believes that the University should take a fresh look at its various units. He suggests bringing together the liberal arts, arts and architecture, and science in a different relationship. "I have a general feeling that part of the reason this group of colleges doesn't provide the leadership they should within the University is due to their administrative splintering," Dean Bartoo says.

Nor does he consider the Graduate School sacrosanct. "In the years ahead we should explore at least some kind of organic merger with the Office of the Vice President for Research and Graduate Studies to see whether economies might result."

Noting that a number of the land-grant institutions with which Penn State compares itself — Illinois, Michigan or Indiana, for example — have endowments

on the order of \$100 million, Dean Bartoo says that he believes one of the University's goals in the '80s should be to try to increase its endowment. A permanent endowment could supply academic enrichment in the form of chairs, travel grants to faculty, visiting lectureships and fellowships, Dean Bartoo points out. "Even though temporary monies are made available year by year for some of these purposes, Penn State still needs a permanent stable base for academic enrichment if we intend to achieve our aspirations."

Currently the Graduate School has about 125 programs. Dean Bartoo believes that it will finish the decade with roughly the same number, although some programs will certainly fold and some new ones will be added. He thinks that by 1988 graduate enrollments at University Park may be in the range of 6,200-6,700. As federal aid regulations become more and more complex, the Graduate School will be forced to assume a larger role in coordinating aid packages for students.

In Dean Bartoo's view, the dollar value of sponsored research at the University could increase by as much as 60 percent during the next ten years, thereby providing additional funds to support students. At the same time, he sees the Graduate School playing a significant role in the post-baccalaureate needs of the working professional.

"After all, in terms of demographic data," he says, "it is the only group whose numbers will increase in the '80s. Our programs at Radnor, and in part at Capitol, have been devised in response to their needs. Delivering educational opportunities to these people will require innovative thinking, and we will have to depend on the initiative of our faculty members."

As a state institution, I believe Penn State not only has a responsibility to recruit top graduate students but also to serve the working professionals who are already out in the field."

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 075-1387). Applications for these staff vacancies will be accepted until 5 p.m., April 17, 1980. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

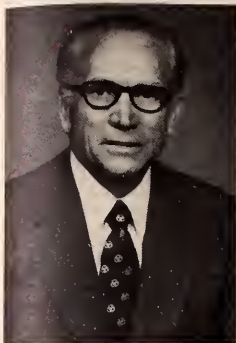

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

RESEARCH AIDE — COLLEGE OF AGRICULTURE/University Park. Observe and collect data from departmental research projects, such as overwintering of genital, genetic classification of chicks, etc. Perform technical procedures such as artificial insemination, pedigree handling, classification of chicks, etc. maintain records of procedures performed. Examine data for accuracy and prepare data for submission to computer; summarize raw data or computer print-out. An associate's degree or equivalent in biology, animal industry or biology, plus 6 months effective laboratory experience or a bachelor's degree or equivalent in the above with less experience required.

PRODUCER-DIRECTOR — CONTINUING EDUCATION, University Park. Responsible for planning and coordinating all phases of assigned production projects. Duties include coordinating and scheduling talent, technical personnel, equipment, etc. For assigned projects and developing content of assigned projects. This position requires the ability to write or supervise the writing of programs or program segments and the ability to perform on various types of television production sets is also preferred. Bachelor's degree or equivalent plus one to two years effective experience in television and film production. THIS IS A FIXED TERM APPOINTMENT WHICH EXPIRES JUNE, 1981.

PUBLICATIONS DESIGNER, ART EDITOR — COLLEGE OF MEDICINE, Hershey. Responsible to the Director of Public Relations for creative and administrative responsibility for establishing, sustaining and refining the publications and graphics image which support the Medical Center's communications and advancement programs. A bachelor's degree or equivalent in graphic arts or related field, plus one to two years effective experience.

Penn State Intercom

Thomas A. Murphy

GM Chairman is Elliott lecturer

Thomas A. Murphy, chairman of the board of directors of General Motors, will deliver the 1980 William Elliott Public Lecture at 9:45 a.m. Friday, April 25, in Kern Auditorium.

The address, on "Insuring America's Future," will open the sixth annual William Elliott Invitational Conference April 25-26 in the College of Business Administration. Senior executives of trade associations and leading academicians in the insurance field have been invited to the conference, according to CBA Dean Eugene J. Kelley.

Mr. Murphy was elected GM's chief executive officer in 1974. He joined the corporation as a clerk on the comptroller's staff after graduating from the University of Illinois with a B.S. in accounting in 1958. He held positions as an accountant, statistician and supervisor of corporate forecasts and financial analysis before being named director of analysis of corporate and divisional pricing in 1954. Further promotions resulted in his being named assistant treasurer, comptroller and treasurer of the corporation, and vice president and executive in charge of the car and truck group.

Mr. Murphy was the 1979 chairman of the Business Roundtable and is a member of the board of directors of the United Negro College Fund. He is also a member of the Financial Executives Institute and the United Way of America board.

A Navy veteran, he has received 11 honorary doctorates, along with the American Legion's Public Service Medal and the National Human Relations Award from the Greater Detroit Roundtable of the National Conference of Christians and Jews.

On Friday afternoon, Richard E. Stewart, senior vice president of Chubb and Son, Inc., will lead a round-table seminar with the theme of "The Reluctant Growth Industry."

The Conference will conclude Saturday with a discussion of changing social values and their impact on the insurance industry, led by Florence R. Skelly, executive vice president of Yankelovich, Skelly & White, Inc.

The annual conference is named for William Elliott, consultant and former chairman of the Executive Committee of Philadelphia Life Insurance Company and donor of the William Elliott Chair.

News in Brief

Behrend project gets NSF award

Behrend College was one of 57 colleges and universities chosen to receive support from the National Science Foundation for Student-Originated Studies on Environmental and Societal Problems. Only four of these projects are in Pennsylvania, and Behrend received the only Penn State award.

The project title is "Atmospheric Ionization Effects on Serotonin Levels in Rats under Various Stress Conditions." The student-planner/principal investigator is Lawrence J. Jonczack, with Kiyoe Mizusawa, associate professor of psychology, as faculty advisor. The NSF awarded \$15,225 for the project.

Ag offers advising seminars

The College of Agriculture will sponsor two faculty seminars on advising this term. Dean James M. Beattie has announced.

The first will be held at 3:30 p.m. Thursday, April 24, in Room 121 Sparks Building. David S. Crockett, vice president of the Education Services Division of the American College Testing Program, will speak on "Making Academic Advising Work: Issues and Implications for the '80s."

The second will be held at 3:30 p.m. Thursday, May 8, in Room 121 Sparks Building. Dr. Harvey W. Wall, director of the Division of Undergraduate Studies, and his staff will discuss the background of advising programs at Penn State, the components of an effective advising system, the characteristics of student

advisees and the future concerns of advising at Penn State.

Faculty members from all colleges, as well as interested graduate students, are invited to attend.

Moore to visit April 22-24

Robert W. Moore, president of Financial Executive Institute, will return to the University April 22 through April 24 as an Alumni Fellow for the College of Business Administration.

The Alumni Fellows program is sponsored by the Penn State Alumni Association.

A 1948 graduate of Penn State, Mr. Moore heads an organization of more than 10,500 senior financial officers from over 5,600 worldwide companies.

Prior to joining Financial Executive Institute in New York, Mr. Moore was controller of the Consolidated Natural Gas Co. in Pittsburgh from 1962 until 1978.

A certified public accountant, he also worked for the accounting firm Price Waterhouse & Co.

As a Penn State alumnus, Mr. Moore is a member of the Executive Board of the Alumni Council and of the College of Business Alumni Society Board.

Further information about his and other Alumni Fellow visits is available from Heather Gilbert in the Alumni Office, 865-6516.

125th bumper stickers ready

"Happy 125th Penn State" bumper stickers are now available. The 3½" by 7", blue and white, removable stickers may be obtained free of charge at the HUB and the Old Main information desks or from the director's office at the Campuses.

University participates in ACE's first national teleconference on 'Higher Education Issues'

University faculty and staff members participated April 8 in the American Council on Education's first national teleconference on "Higher Education Issues."

The teleconference utilized television distributed by communications satellite to 55 stations in 34 states and two-way telephone arrangements which allowed participants throughout the country to question a panel of leading educators.

President Oswald, who served as host for Pennsylvania participants in the conference, told University Park participants at the studios of WPXJ in view of rising travel costs and scarce resources, the teleconference concept may be an effective way of relating to colleagues in other institutions in the future.

Panelists for the conference, televised from the University of Nebraska at Lincoln, were Ernest Boyer, president of the Carnegie Foundation for the Advancement of Teaching; Martha Church, president of Hood College; Carl Kayser, vice chairman and director of research, Sloan Commission on Government and Higher Education; and J.W. Pelton, president of the American Council on Education.

Much of the discussion centered on quality education and methods of measurement. Dr. Kayser said the Sloan Commission has suggested that the peer review process be augmented by existing machinery of accreditation in the

individual states to bring it more into the public process.

According to Dr. Boyer, former U.S. Commissioner of Higher Education, the Carnegie Commission is much more conservative on the question of encouraging participation beyond the campus. "Are we ready to create agencies beyond the campus with authority over our academic programs?" he asked. "I'm concerned about the basic premise that control of quality can best be achieved by developing mechanisms beyond the campus."

Dr. Church expressed concern about the ability of 50 different coordinating boards to address problems of minimum standards and then move ahead to provide guidance in addressing the issue of quality.

According to Dr. Kayser, the major issue for the 1980s will be balancing the priorities of equalizing and extending educational opportunities while maintaining quality of higher education offerings.

The Carnegie Commission, Dr. Boyer noted, identified the three major issues in the 1980s as quality, integrity and purpose.

The panelists fielded a wide range of questions from educators in various parts of the country and touched on numerous issues.

A College Education — Dr. Pelton: "Without trying to argue that everyone should go to college, we have a

J. William Holl

Honors Program will be May 11

Over 300 undergraduate students and five faculty members representing all Penn State campuses will be cited for academic excellence at the 1980 Honors Convocation, Sunday, May 11, at 2 p.m. in Eisenhower Auditorium.

Student awards to be presented include the President's Freshman Award, President Sparks Award for sophomores, Evan Pugh Scholar Awards for juniors and seniors, and the John W. White Fellowship.

Four faculty members, two representing the University Park Campus and two from Commonwealth Campuses, will receive Amoco Foundation Outstanding Teaching Awards. The awards recognize excellence in teaching performance in the undergraduate program.

In addition, the Raymond R. DiMeo Award for Instructional Improvement will be presented to recognize the contribution of a faculty member for improvement of undergraduate instruction over and above classroom teaching performance.

Dr. J. William Holl, professor of aerospace engineering and 1973 winner of the Christian R. and Mary F. Lindback Award for Superior Teaching, will address honored students, their families and Penn

All faculty are invited to participate in the Honors Convocation as members of the academic procession. Faculty in academic regalia should plan to meet platform party members in the Green Room of Eisenhower Auditorium no later than 1:45 p.m. Seating in the front rows of the auditorium will be reserved for those in the procession. Faculty and staff not wishing to be members of the procession are invited to attend the program as members of the audience. PLEASE NOTE: Faculty must provide their own academic regalia.

State faculty members and guests on "The Seesaw of Life."

Dr. Holl, who holds B.S. and M.S. degrees in mechanical engineering from the University of Illinois and a Ph.D. in mechanical engineering from Penn State, is internationally known for his research in cavitation inception. The recipient of the 1977 Outstanding Performance Award of the Applied Research Laboratory, he was

(Continued on page 5)

Penn Staters

Twenty-seven faculty members have been awarded one year Research Initiation Grants from a fund provided by President Oswald. The grants, ranging from \$2,100 to \$5,800, were established to encourage and support research and other creative work.

Faculty members — at all campuses — with no more than two years of service accumulated before September 1980 were eligible for the 1980-81 RIG grants. "We award these funds to support lines of research that may lead to external sponsorship," says R.G. Cunningham, vice president for research and graduate studies, who administers the program.

A committee of G.F. DeJong, E.H. Ludwig, W.M. Phillips (chairman), H. Pickering, M.J. Tretter, and J.F. Remick (ex officio) reviewed and screened 72 proposals.

Faculty members awarded grants and the proposal titles are:

John C. Attig, assistant librarian, John Locke (1632-1704); A bibliography; Willem A. Baan, assistant professor of astronomy, The structure of double radio lobes; Jay Besky, assistant professor of human development, Facilitating parental involvement in the newborn period; Thomas M. Callaghy, instructor of political science, A crisis in finance: Zaire and the international system; Joseph L. Cavinato, assistant professor of business logistics, A performance evaluation and decision making methodology for transportation management;

Sigrid A.E. Christensen, assistant professor of art, Researching the new technology of casting stainless steel; Linda W. Craighead, assistant professor of education, Factors influencing college women's choices of and achievement in nontraditional scientific fields; Tarasankar Deb Roy, assistant professor of metallurgy, A fundamental study of iron melting in cupola furnaces; Barbara J. Garrison, assistant professor of chemistry, Determination of surface structure by classical trajectory studies of the interaction of high energy beams with solids;

James M. Gerson, M.D., assistant professor of pediatric hematology, Hershey, A comparison of in situ suppressor cells from regressor and progressor murine sarcoma virus-induced tumors in young CBA mice as to their possible in vivo relevance; Daniel R. Hagen, assistant professor of animal science, Uterine blood flow and its relationship to prenatal survival; Ross C. Hardison, assistant professor of microbiology, The developmentally regulated expression of rabbit B-like globin genes;

Robert R. Kulikowski, assistant professor of anatomy and physiology, Hershey, Myosin isoenzyme localization during cardiac morphogenesis; Emilia E. Martinez-Brawley, assistant professor of social welfare, Rural social work premises in rural America and rural Britain: A cross-cultural study; R. Nagarajan, assistant professor of chemical engineering, Solubilization of surfactants in aqueous and non-aqueous solutions; John S. Nichols, assistant professor of journalism, Narrowing the foreign affairs knowledge gap among U.S. newspaper readers; Don N. Page, assistant professor of physics, Aspects of quantum gravity;

R.N. Pangborn, assistant professor of engineering mechanics, Changes in microstructure and the role of the surface in creep deformation of metals; Carlo G. Pantano, assistant professor of ceramic science and engineering, Effects of network polymerization upon the hydration of glass; Arno J. Rethans, assistant professor of marketing, Assessing the efficacy of the Consumer Product Safety Commission's attempts at changing consumers' product hazard perceptions; M. Suzanne Roy, assistant professor of music, Solo vocal settings of poetry by Rainer Maria Rilke;

Daniel J. Royle, assistant professor of plant pathology, On hybridization of strains of the cultivated mushroom,

Walter G. Braun

George J. McMurtry

Dr. McMurtry to succeed Dean Braun

Dr. Walter G. Braun, professor of chemical engineering and associate dean for instruction in the College of Engineering, will retire with emeritus rank on June 23 after 38 years of service. He will be succeeded by Dr. George J. McMurtry, professor of electrical engineering and co-director of the Office of Remote Sensing of Earth Resources (ORSER).

Dean Braun received his B.S. in chemical engineering from The Cooper Union in 1942. His M.S. and Ph.D. in chemical engineering was granted by Penn State in 1948 and 1955, respectively.

Before joining the University faculty in 1951, Dean Braun worked as a chemist at the Tide Water Associated Oil Company in Bayonne, N.J. He was acting head of the chemical engineering department from July 1969 to February 1970, when he was named assistant dean. He became associate dean in 1974.

Highly regarded as an instructor, Dean Braun has taught courses in industrial chemical processes, distillation, liquid extraction, and chemical engineering principles. His major research effort was in analytical Raman and infrared spectroscopy and in petroleum refining. He has also studied distillation and liquid extraction, and physical and thermodynamic properties of pure hydrocarbons and hydrocarbon mixtures.

Dean Braun holds a patent with M.R. Fenske (the late head of Chemical Engineering) for "Heat Transfer Method for Solvent Recovery and Aromatic Crystallization." He co-authored a number of technical articles, reports, and chapters in technical books, and he is co-editor of the *Technical Data Book - Petroleum Refining*, published in 1966 by the American Petroleum Institute and revised in 1971. He is a Fellow of the American Institute of Chemicals.

Serving the University in areas other than teaching and research, Dean Braun was a member of the University Faculty Senate, the Graduate School Policy Committee, and the Administrative Council on Undergraduate Instruction. He was chairman of a Task Force on Registration and of the Senate Committee on Admissions.

He and his wife will continue to reside in State College.

Dr. McMurtry received his B.S. from the U.S. Naval Academy in 1955 and served in the U.S. Navy from 1955 to

agaricus bisporus; Fred R. Sattler, M.D., assistant professor, infectious diseases, Hershey, Studies of hepatitis B virus infection and hetero-transplantation of hepatitis B transformed liver cells in congenitally athymic (nude) mice; John L. Selzer, assistant professor of English, Cohesion and readability in paragraphs; K.K. Shung, assistant professor of bioengineering, The role of structural proteins in the acoustic impedance of biological tissues; Gerhard F. Strasser, assistant professor of German, Cryptography and universal languages in the 16th and 17th centuries; Bruce A. Williams, instructor of political science, American public policy.

1959. He earned his M.S. in electrical engineering from the University of Notre Dame in 1961, and his Ph.D. in electrical engineering from Purdue University in 1965.

From 1965 to 1967, Dr. McMurtry worked at the Information Processing Subsection of the Electronics Laboratory of the General Electric Company. In 1967 he accepted a joint appointment with the Department of Electrical Engineering and the Ordnance Research Laboratory at Penn State, and in 1969 became a full-time member of the Department of Electrical Engineering.

Since 1970 he has served as co-director of ORSER. He has been an investigator on several interdisciplinary research projects involving the analysis and interpretation of aircraft and satellite remote sensing data.

Dr. McMurtry has published several papers on remote sensing, pattern recognition, adaptive systems, and optimization, and he is author of a chapter in the book, *Adaptive, Learning, and Pattern Recognition Systems*.

Besides his teaching and research responsibilities, Dr. McMurtry has served the University as a member of the University Faculty Senate since 1974. He is chairman of the Senate during the current academic year. Dr. McMurtry served two terms on the Graduate Council, and was a member of the University's Steering Committee for A Perspective on the '80s.

Dr. McMurtry served as organizer and chairman of the 1969 IEEE Symposium on Adaptive Processes, and was invited and participated as an official U.S. delegate to the U.S.-Japan Seminar on Learning and Pattern Recognition Systems held in Nagoya, Japan, in August 1970. He was chairman of the Session on Learning Models at the 1972 International Conference on Cybernetics and Society, and served as an invited panel member for the NASA Applications and Requirements review for SEOS (Synchronous Earth Observations Satellite) in March 1974 and the Land Inventory Applications Survey Group for Landsat Follow-on in April 1976.

Dr. McMurtry is a senior member of the Institute of Electrical and Electronics Engineers (IEEE). He is a member of the Adaptive Systems Committee of the IEEE Group on Systems Science and Cybernetics.

Dr. James E. Van Horn, associate professor of child development and family life extension, and Dr. Graham B. Spanier, associate professor of human development and sociology, have been appointed by Public Welfare are Secretary Helen O'Bannon to the 81-member Pennsylvania delegation that will attend the White House Conference on Families in Baltimore, Md., June 5-7. Dr. Van Horn is project director of the Pennsylvania Forum on Families, which gathered testimony from Commonwealth residents about the problems facing the American family.

Dr. Laura S. Sims, associate professor of nutrition in public health, is one of 42 outstanding young American professionals chosen to receive a three-year Fellowship from the W.K. Kellogg Foundation of Battle Creek, Mich.

Kellogg Foundation Fellowships, which may provide support of up to \$30,000 to each individual, are awarded to support projects that focus on the application of existing knowledge to the problems of people. The program's intent is not to deepen professional specialization, but rather to broaden individual perspectives of people, places and ideas in the areas of agriculture, education and health.

Dr. Sims, selected from a field of 380 applicants, is recognized as being among the first to apply behavioral science research skills to the field of nutrition and to identify skills needed by new public health nutritionists.

She received her B.S. in foods and nutrition and home economics education at Penn State, graduating with highest distinction. She earned her M.P.H. in nutrition at the University of Michigan and her Ph.D. at Michigan State University, where she received the Duffy-Mott Award for the outstanding doctoral dissertation in the College of Human Ecology.

Dr. Sims joined the faculty of the College of Human Development in 1976. A member of the American Institute of Nutrition, she is currently chair-elect of the Graduate Faculties in Public Health Nutrition and chair of the Division of Higher Education, Society for Nutrition Education.

Dr. Frank W. Lutz, professor of education, has been named dean of the School of Education at Eastern Illinois University, effective July 1.

Dr. Lutz, an associate of the Center for the Study of Higher Education, was Director of the Division of Education Policy Studies from 1968 to 1973. Prior to that, he was an associate professor in the Division of Administration and Supervision, School of Education, New York University. The author of six books, he holds B.S., M.S. and E.D. degrees from Washington University, St. Louis.

Dr. Napoleon A. Chagnon, professor of anthropology, and Dr. Lee C. Schisler, professor of plant pathology and director of the Mushroom Research Center, have been elected Fellows of the American Association for the Advancement of Science. The two were among 485 scientists so honored for their "meritorious contribution to the advancement of science."

Dr. Chagnon is the co-editor, with Dr. William Irons, formerly of Penn State's Department of Anthropology and now at Northwestern University, of the first book to apply recent theories in sociology to a wide range of data on human social behavior. Published in 1979 by Duxbury Press, it is entitled *Evolutionary Biology and Human Social Behavior: An Anthropological Perspective*. He has done extensive field work among the Yanomamo Indians of Venezuela, and in a recent Science magazine article, was cited as "the country's leading expert" on them.

Dr. Schisler was cited for his "major contributions in basic fungal physiology and disease etiology, responsible for a 20 percent yield increase in commercial mushroom production while reducing the hazard of epidemic losses." His principal areas of research have included lipid metabolism of the cultivated mushroom, identification of the cause of mummy disease, discovery of spore transmission of virus disease of mushrooms and nutrient supplementation of mushroom composts. Most recently, with A.D. Carroll Jr., a former Penn State graduate student, he developed a delayed-release nutrient that has helped mushroom growers throughout North America increase yields by up to 40 percent.

(Continued on page 5)

Dr. Arthur Hayes, professor of medicine and pharmacology and chief of Clinical Pharmacology at Hershey, has been named president of the American Society for Clinical Pharmacology and Therapeutics.

Dr. Nathan N. Aronson, Jr., associate professor of biochemistry, presented invited lectures at Baylor Medical School, Rice University and the University of Alabama last month. He described his research on the degradation of blood protein in the liver.

Color viscosity prints by Bruce Shobaken, professor of art, are on exhibit April 15 to May 15 in the Princeton University Library's Graphic Arts Collection. Prof. Shobaken also described his work in an April 15 talk at Princeton.

Dr. Daniel R. Tershak, associate professor of microbiology, presented a March seminar at Hahnemann Medical College and Hospital on "Phosphorylation of Ribosomal Proteins During Poliovirus Infection."

Dennis R. Williams, C.C.P., chief perfusionist and director of the Cardiovascular Perfusion Technology Training Program at the Hershey Medical Center, and Norman J. Manley, C.C.P., the clinical supervisor of the same program, have been selected as two of 25 charter members of the Academy of Cardiovascular Perfusion. Both were selected on the basis of their professional publications and involvement in the education of professionals.

Irvin H. Kochel has been honored for his achievements as director of Behrend College with a resolution from the City Council of Erie and a proclamation by the County of Erie. He was also chosen as the Outstanding Alumnus for 1980 by the Penn State Club of Erie County.

Dr. Edwin L. Herr, professor and head of the Division of Counseling and Educational Psychology, received two awards for outstanding service at the recent annual convention of the American Personnel and Guidance Association: the Certification of Outstanding Service for "creative, effective and professional leadership" from the National Vocational Guidance Association and the Distinguished Professional Service Award for scholarship and national and international leadership from the American Personnel and Guidance Association.

Dr. Carol V. Gay, research associate in microbiology, was reappointed to the editorial board of the Journal of Histochemistry and Cytochemistry for a four-year term.

Bookshelf

Coal Grinding—A Manual for Process Engineers, written by two members of the University's mineral processing faculty, was published recently by the Department of Energy and is available from the National Technical Information Service.

The book reports the findings of Dr.

Peter T. Luckie, professor and chairman of the mineral processing section in the Department of Mineral Engineering, and Dr. L.C. Austin, professor of fuels and mineral engineering, from research they conducted when Dr. Luckie was director of research for the Kennedy Van Saun Corporation, Danville, Pa. The contribution from Penn State involved work by four graduate students and two project associates with support provided by the Kennedy Van Saun Corporation as part of a research project that firm performed under contract with the Department of Energy.

The book is described as a guide for the process engineer who must select a coal grinding system to be used as part of a larger coal conversion system.

Dr. Stuart H. Mann, professor of operations research and head of the Man-Environment Relations Program, is co-author of *Organization Development for Academic Libraries: An Evaluation of the Management Review and Analysis Program*, a 224-page book published this month by Greenwood Press, Inc. The principal author is Edward R. Johnson, director of libraries at North Texas State University and the former assistant dean of libraries for technical operations at Penn State.

Organization development, the authors state, can help administrators evaluate the true effectiveness of their libraries' staffs and programs. Though some librarians turn to outside consultants to help assess the efficiency of their operations, many library administrators are finding that their own professionals, using techniques of self-assessment, can be as effective as outsiders.

The book analyzes the benefits and limitations of library self-assessment, concentrating on the Management Review and Analysis Program of the Association of Research Libraries. The book begins by tracing the origins of applying organization development techniques to library operations. Early systems of self-evaluation also are discussed.

Then, the history and workings of MRAP, the most widely used self-assessment program today, are detailed. The impact of MRAP on 10 academic and research libraries is examined in depth. The program's success in introducing constructive changes is evaluated by the administrators involved. Other self-assessment programs also are analyzed. The issues and problems facing the rapidly growing field of evaluation research are then discussed.

Promotions

Staff Exempt

Linda O. Bollinger to supervisor, Credit and Collection, at Hershey.
Claudio Pellazar to coordinator, Operating Room Support Services, at Hershey.

Staff Non-Exempt

Gail M. McNulty to senior staff nurse at Hershey.
Harry A. Park to supervisor, Patient Accounts, at Hershey.
Martha L. Richardson to research technician at Hershey.
Marie J. Yesalavage to senior staff nurse at Hershey.

Clerical

Edward D. Cassel to inpatient billing clerk at Hershey.
E. Joyce Jones to secretary B in Housing and Food Services.
Joan M. Koester to customer service clerk at Penn State Bookstore.
Kathy S. Reigle to senior clerk at Hershey.
Roseann Thal to secretary A in Earth and Mineral Sciences.

Technical Service

Doris M. Bracken to food production worker A in Housing and Food Services.
Luther W. Musser to residence hall preventive maintenance worker in Housing and Food Services.

Obituaries

Paul H. Schweitzer, professor emeritus of engineering research, died April 12 at the age of 86.

A member of the faculty from 1923 to 1958, Dr. Schweitzer was internationally known for his contributions to diesel research, an area in which he continued working almost until his death. He held 23 patents, most of them for improvements to diesel and internal combustion engines, issued between 1913 and 1978.

He was born in 1893 and received an M.E. degree from the Royal Hungarian Technical Institute. His engineering doctorate was granted in Dresden at the

Saeschische Technische Hochschule, which later awarded him an honorary degree.

The author of more than 100 papers, Dr. Schweitzer wrote a leading reference book, *Two-Stroke Cycle Diesel Engines*. He helped develop a device to reduce automobile pollution, a "Pollimeter," which was approved for installation in 1966-1970 vehicles in California. His "Optimizer," for which he received two patents, was designed to reduce fuel consumption in automobiles.

Stanley H. Campbell, vice president emeritus of business, died April 9 at the age of 73.

Mr. Campbell earned his B.A. in business administration at Penn State in 1932, and actually began his University service during his junior and senior years when he served as a secretary to J. Orvis Keller, then assistant to the president in charge of extension. He was named vice president for business in 1962, having held a number of posts in the University, including the directorship of the Department of Housing and Food Services. Mr. Campbell retired in 1969.

Clinton J. Swartz, an assistant food supervisor with Housing and Food Services since 1960, died April 4 at the age of 50.

Roy E. Burns, a mechanic in the College of Engineering from 1946 to 1959, died April 8 at the age of 86. He joined the staff of the University as a janitor with the Office of Physical Plant in 1939.

Paul W. Cogan, a residence hall worker with Housing and Food Services since 1966, died April 5. He was 58.

Melvin R. Kerstetter, an electrician in the Office of Physical Plant, died April 7. He was 49. A native of Milheim, Mr. Kerstetter joined the staff as a maintenance man in 1949.

Teleconference

(Continued from page 1)

responsibility to make that option and knowledge about that option known to as many people as we can."

Student Mir—Dr. Boyer: "The Carnegie Report predicts that by 1990 the student population on campus will have changed by 50 percent. We'll have more minorities, women and adult students. But our faculty will look the same. There is a built-in tension between a changing student body and a faculty living in the past. One of the greatest challenges of our institutions will be their ability to adapt to this." **Dr. Pelton:** "The faculty we have is the one we're going to have. We have to focus on faculty development programs to deal with this issue."

Financial Aid—Dr. Kayser: "Our current situation is not very favorable. Those students who need help should be able to get more than the present system allows." **Dr. Pelton:** "We have in place the kind of financial aid system that will persist in the 1980s, and I think we'll get our fair share in a very tough time. I'm not sure what will happen in the next six months or a year, but I'm optimistic over the long run."

Remedial Courses—Dr. Boyer: "Remedial courses in the college curriculum are a necessity at present but in the long pull are not the solution to a difficult problem. We have to remember that we're building on 12 years of study. We have an obligation, not just in remediation, but in helping strengthen the secondary school programs. And we have to start the dialogue."

Public Confidence—Dr. Pelton: "We have to acknowledge a new kind of reality—the need for more accountability, more integrity, more openness and candor in what we're trying to do. We've lost some public confidence, as other institutions have, but I'm still impressed with the comments and reports on higher education that I've gotten throughout the country."

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division at 865-1387 (network line 075-1387). Applications for these staff vacancies will be accepted until 5 p.m., April 24, 1980. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

EDITORIAL ASSISTANT—CONTINUING EDUCATION, University Park Writes and assists in editing news releases, articles, brochures, course information flyers, on-air scripts and on-air promotional material; prepares weekly program schedule for distribution to cable stations, newspapers, etc.; assists in needs assessment and development of new services. Bachelor's degree in journalism, English or related field and six to twelve months of effective experience in writing and editing television or similar material. An associate degree and one to two years' effective experience may be substituted. THIS IS A FIXED TERM POSITION. FUNDING MAY NOT BE AVAILABLE AFTER EXPIRATION DATE OF MARCH 15, 1981.

ASSISTANT SUPERVISOR, OUTDOOR FIELDS AND GOLF COURSE—COLLEGE OF HEALTH, PHYSICAL EDUCATION, AND RECREATION, University Park Aid Golf Course Supervisor in carrying out general operations of the golf courses and athletic fields which include: care and maintenance of trees, hedges, flowers and trees; golf courses, competitive fields, practice fields, ID fields, football parking areas, and tennis courts, and the tasks inherent to such maintenance. Also includes making general and specific work assignments, organizing work crew for daily functioning, ordering chemicals, fertilizer and supplies, etc. Associate degree in agronomy-turf management or equivalent of 3-4 years of effective experience, displaying supervisory and technical competence in golf course maintenance, landscape maintenance, grounds keeping and turf grass development operations.

Honors Program

(Continued from page 1)

named a Fellow of the American Society of Mechanical Engineers in 1978 and is currently ASME vice-president-elect.

The Penn State Symphonic Wind Ensemble, under the direction of Smith Toulson, will present a musical program featuring Persichetti's "A Lincoln Address" and provide musical accompaniment for the academic procession, recession and Penn State Alma Mater.

President Oswald will offer welcoming comments, and Provost Eddy will introduce the platform party of deans and Campus directors. Dr. Robert E. Dunham, vice president for undergraduate studies, will recognize honored students. Drs. Oswald, Eddy and Dunham will greet students and guests at an informal reception in the front lobby of Eisenhower Auditorium following the program.

Research subjects sought

To assist in a research project at the Human Performance Laboratory, women are needed who are under 40 years old, at least 150 pounds overweight and at present inactive physically. They will be asked to participate in an exercise program in conjunction with a sleep research study. Anyone interested should contact Sue Jennings at 865-3453.

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

Beyer talk a highlight of Sigma Xi's 50th celebration

Dr. Karl H. Beyer Jr., visiting professor of pharmacology at Hershey and former senior vice president for research at Merck Sharp & Dohme Research Laboratories, will deliver a lecture marking the 50th anniversary of Penn State's Sigma Xi Chapter at 8 p.m. Thursday, April 24, in Room 112 Kern Building.

His topic is "Hypertension: Here and Now."

The Penn State Chapter will also mark its anniversary by initiating new members and honoring all of its emeriti ones, according to Chapter President Rosemary Schraer, professor of biochemistry and assistant provost. Seven members of the committee which petitioned the national society for a charter in 1930 are still alive. They are John Aston, Howard O. Triebold, David C. Duncan, Julia Haber, Isadore Sheffer, William Henning and Orrin Frink.

Dr. Beyer, a member of the National Academy of Sciences, is recognized internationally for his contributions in the areas of cardiovascular-renal research, the metabolism of drugs, the enzymatic basis

for cellular transport mechanisms, the toxicology and safety assessment of drugs, and clinical pharmacology.

The author of more than 180 publications, Dr. Beyer was awarded an honorary D.Sc. from the University of Wisconsin, where he earned both M.D. and Ph.D. (physiology) degrees. He is also the recipient of an Albert Lasker Special Award from the Albert & Mary Lasker Foundation.

The Penn State Chapter of Sigma Xi is issuing a special booklet, "50 Years of Progress," describing its history in the context of research at Penn State and in the nation.

According to the booklet, the national society was founded in 1886 at Cornell with the motto "Friendship in Science." Penn State's chapter was the fourth in the Commonwealth, preceded by Penn in 1899 and Swarthmore and Lehigh in 1928.

Over the years, the Penn State Chapter has been a strong advocate for research at the University. The booklet notes: "Selection of an individual for membership is recognition of either

research potential or research achievement. The chapter continues to emphasize that Sigma Xi is not only a 'recognition society' but considers itself a special task force of scientists selected by their peers and pledged to work in support, not only of their own sphere of inquiry, but of all scientific research."

Penn State, with 979 active members, is the largest and one of the most active chapters in the Society, according to Dr. Schraer. Graduate students, faculty members and alumni are eligible for membership.

The lecture series, begun in 1946, has brought a selection of distinguished researchers to University Park in a wide variety of scientific fields.

Speakers have included such luminaries as Konrad Lorenz, B.F. Skinner and Peter Dabrye.

Since 1972, the Penn State Chapter has presented a Sigma Xi research award for outstanding research by a graduate student. Recipients receive a plaque and a \$250 check.

Folk dancers will perform at Festival.

Authors, researchers, musician to speak on campus

Mark Harris in residence

Novelist Mark Harris will be in residence at the University the week of April 20. Mr. Harris is the author of *Wake Up, Stupid*, *Bang the Drum Slowly*, *It Looked Like For Ever*, and the nonfiction *Short Work of It*.

Widely acclaimed both for his fiction and nonfiction books, he also is the author of a television adaptation of Mark Twain's *The Man That Corrupted Hadleyburg*; a play, *Friedman and Son*; and a recently published, one-volume abridgement of Boswell's journals, the *Boswell Reader*. He is professor of English at the University of Pittsburgh.

In addition to classroom visits and seminars, Mr. Harris will give two public evening talks, one on sports and literature at 7 p.m. on Wednesday, April 23, and the other, an English Colloquium reading and discussion of his work, at 8 p.m. on Thursday, April 24. Both will be in Room 101 Kern Building.

At 9:30 a.m. on Tuesday, April 22, he will meet students and faculty members for coffee in Room 320 HUB. He will address two sports seminars, open to all, on Wednesday, April 23. For the first, at noon in Room 104 White Building, his topic will be "Insights into the Creation of a Sport Novel." For the second, at 2:20 p.m. in Room 2 White, he will speak on "The Imaginative Creation of Sport Heroes and Myths."

Mr. Harris's visit to Penn State is sponsored by the Institute for the Arts and Humanistic Studies, the College of the Liberal Arts and the College of Health, Physical Education, and Recreation.

Women's issues focus of three colloquia

Nine prominent researchers on women's issues will speak at the University on Thursday, April 24, in three interdisciplinary colloquia on women. The nine are members of the 1980 executive committee of the American Psychological Association's Division 35 (Psychology and Women).

Their visit to the University is made in conjunction with an executive committee meeting hosted by Dr. Carolyn Wood Sherif, professor of psychology and president of the Division.

The colloquia will cover three topics. The morning session, from 9:30 a.m. to noon in Room 102 Chambers Building, will deal with "Sex-related Cognitive Differences." The afternoon session, from 2 to 4:30 p.m. in the same room, will cover "Feminist Approaches to Clinical Problems."

The topic for the evening session, from 7:30 to 10 p.m. in Room 102 Forum Building, will be "Career Couples and

Achievement in the World Today." All are open to the public.

In addition to Dr. Sherif, Dr. Audrey Rodgers, coordinator of the Women's Studies Option and associate professor of English, and Frieda S. Rosen, instructor in labor studies, will take part in the program.

The guest speakers are: Irene Hanson Frieze, University of Pittsburgh; Lucia Albino Gilbert, University of Texas at Austin; Rachel T. Hare-Mustin, Villanova University; Carol Nagy Jacklin, Stanford University; Anne Petersen, Michael Reese Hospital and the University of Chicago; Nancy Felipe Russo, American Psychological Association and American University; Julia Sherman, University of Wisconsin at Madison; Barbara Strudler Wallston, Vanderbilt University; and Martha Schuch Mednick, Howard University.

Pulitzer Prize-winner to read

Prize-winning poet and translator W.S. Merwin will read from his work at a Department of English Colloquium in Room 101 Kern Bldg. at 8 p.m. on Monday, April 21. His visit is also sponsored by the Institute for the Arts and Humanistic Studies.

A translator of many works from French and Spanish, Mr. Merwin received the Pulitzer Prize for his poems collected in *A Carrier of Ladders* (1971). Other books include *The Dancing Bears*, *The Drunk in the Furnace*, *The Moving Target* and *A Mask for Janus*.

Evolution of writing to be discussed

Denise Schmandt-Besserat, assistant professor of art at the University of Texas at Austin, will present an illustrated lecture on "A Recording System Based on Tokens Prior to Writing" at 8 p.m. Tuesday, April 22, in Room 101 Kern Graduate Building.

Her talk is sponsored by the Central Pennsylvania Society of the Archaeological Institute of America.

Prof. Schmandt-Besserat is acclaimed for her work in strengthening the hypothesis of German archaeologist Julius Jordan that the written characters on clay tablets of the ancient Near East evolved in form and meaning during the fourth millennium B.C. from the three-dimensional tokens impressed on tablets for record-keeping.

A graduate of the Ecole du Louvre in Paris, she came to the University of Texas from Harvard, where she was a Peabody Museum Research Fellow.

How the Globe was built

C.W. Hodges, an expert on the architecture of Shakespeare's theatre, will

give an illustrated public lecture on "Reconstruction of the Globe Theatre" at 7:30 p.m. Thursday, April 17, in Room 112 Chambers Building. Currently, Dr. Hodges is coordinating the building of a replica of Shakespeare's Globe playhouse on the campus of Wayne State University.

His books on the subject, *The Globe Restored*, *Shakespeare's Theatre and Shakespeare's Second Globe*, describe the research and creative interpretation that have gone into the project. His visit is sponsored by the Institute for the Arts and Humanistic Studies and the Departments of Theatre and Film and of English.

Two speakers to visit for Medieval Studies Week

A.C. Spearing, director of Studies in English at Queens College, Cambridge, and Alexander Kazhdan, a Byzantine studies specialist of Harvard's Dumbarton Oaks, will be guests at the University from April 23-26. Their visit is in conjunction with the annual Medieval Studies Week, which this year has been designated an official 125th anniversary event.

Prof. Spearing, a specialist in medieval English literature, will give an English Colloquium lecture on Chaucer and the Chaucerians at 8 p.m. on Wednesday, April 23, in Room 101 Kern Building.

Prof. Kazhdan, a recent emigrant from the Soviet Union, will address the History Colloquium at 3:30 p.m. on Thursday, April 24, in Room 124 Sparks Building. His topic will be "The Application of the Methodology of 'Western Medievalists' to the Study of Byzantine History." At 3 p.m. on Friday, April 25, Prof. Kazhdan will speak in Room 306 Burrows Building on "The Role of Byzantine Studies in the Intellectual Life of the Soviet Union."

Prof. Spearing's publications include *Criticism and Medieval Poetry*, *An Introduction to Chaucer*, and most recently, *Medieval Dream-Poetry*.

Prof. Kazhdan previously was affiliated with the Byzantine History Section of the Institute of World History, the major historical research group of the Academy of Science of the USSR in Moscow.

Composer to describe work

Kenyon Emrys-Roberts, British composer and conductor for the electronic media, will be in residence at the University the week of April 20. Composer of the music for public television's popular series, *Poldark*, Mr. Emrys-Roberts will be a guest of the Institute for the Arts and Humanistic Studies.

He will give a Comparative Literature Luncheon talk, which is open to the public, at 2 p.m. on Tuesday, April 22, at the Hotel State College. His topic will be "Composing for Count Dracula."

Festival to honor Slavic contributions

Slavic contributions to American culture will be celebrated at the Second Annual Penn State Slavic Folk Festival to be held Thursday, Friday and Saturday, April 24-26, in the HUB Ballroom.

Sponsored by the Department of Slavic Languages, the Festival will be open from 9 a.m. to 10 p.m. Thursday and Friday and 9 a.m. to noon on Saturday.

According to Lorraine Kapitanoff, assistant professor of Russian and Festival coordinator, the event is designed to showcase the music, dances and folk arts of the various Slavic peoples whose descendants form a large part of Pennsylvania's population. The spring festival format was chosen in keeping with the spring rituals common to all Slavic cultures.

The Festival has been designated an official University 125th anniversary celebration event in recognition of the many contributions of the Slavic peoples to the Commonwealth.

The periphery of the Ballroom will be ringed with exhibits of Ukrainian, Polish, Czech, Slovak, Russian, Serbian, Croatian, and Slovenian folk arts and artifacts. Costumed guides will be present to lecture and answer questions about these displays.

Slide shows on Russia, Poland and Yugoslavia will be presented continuously throughout the Festival. A day-long series of Russian, Polish and Yugoslav films will be shown free of charge in the HUB Assembly Room, including the feature film, *The Cranes Are Flying*.

Additional folk art items and graphics will be shown in cases throughout the HUB Lobby, while the Terrace Room will feature special Slavic dishes on its April 24-25 lunch and dinner menus.

Special performances will be scheduled at intervals throughout the Festival. These will include a variety show with dancers, vocalists and instrumentalists.

The Penn State Slavic Chorus, the Ukrainian Club Chorus, a strolling accordionist, clowns and a juggler will entertain. Icon painting and Easter egg decorating will be demonstrated. According to Dr. William Schmalstieg, professor and head of the Department of Slavic Languages, Festival entertainment will appeal to all age groups.

Among the Festival coordinators are five members of the Department of Slavic Languages — Professors Thomas Magner, Sigmund S. Birkenmayer and Joseph Pasternak, and Assistant Professors James J. Gebhard and Linda J. Ivanits.

Arts Festival will offer "Black Perspectives on the '80s"

"Black Perspectives on the Eighties" is the theme for the ninth annual Black Arts Festival at the University, April 18-24.

The week's events "will explore the major questions of this decade and give a broad overview of what blacks can expect," according to Elmore M. Browne, director of the Paul Robeson Cultural Center and a coordinator of the festival.

An address by Dr. Loretta Long, the actress adores as Susan on PBS's *Sesame Street*, will open the festival at 8 p.m. Friday, April 18, in the Frizzell Room of the Eisenhower Chapel. Her lecture, "The Need for Excellence in the Academic Setting," is part of a colloquium sponsored by the Pennsylvania Commission for United Ministries in Higher Education; the colloquium will deal with UMHE's Advisory Committee for the Ministries to Blacks in Higher Education.

On Saturday, April 19, black theologian Dr. James Cone will speak on "Black Liberation Theology and Its Implications for Blacks in Higher Education" at 1:30 p.m. in the Frizzell Room of Eisenhower Chapel.

Also on Saturday, from noon to 5 p.m., Penn State's black organizations will present a "Cultural Bazaar" in the Pollock area quad to explain their purposes.

At 8 p.m. Saturday, jazz pianists Lonnie Liston Smith and Dexter Wansel will perform in Eisenhower Auditorium. Tickets will be on sale at the HUB desk and at the auditorium.

On Sunday, April 20, Dr. Cone, who is professor of theology at Union Theological Seminary, will deliver a sermon for the service at 11 a.m. in Eisenhower Chapel. Dr. Cone will be on campus to participate in

Griote Alihaji Bai Konte (right) and his son, Dembo, will play their koras April 23.

the UMHE's seminar on Ministries to Blacks in Higher Education.

At 2 p.m. Sunday, the gospel choirs of the Beaver Campus and the United Christian Ministries of University Park, as well as the Braddock Gospel Choir from Pittsburgh, will perform at Schwab Auditorium.

"Caribbean Experience, 1980" will be presented by the Caribbean Students Association from 6 p.m. Sunday to 1 a.m. Monday in the Paul Robeson Cultural Center. A dinner featuring foods from the Caribbean will be held from 6 to 8 p.m. at a cost of \$2.50. A cultural show of music,

dance and poetry from members of the association will follow dinner. A skit depicting life in the Caribbean will be featured, followed by a live steel band performance and an exhibition of limbo dancing. A Caribbean-style "jump-up" or dance also will be held from 10 p.m. to 1 a.m. with Caribbean and steel band music.

The events on Monday, April 21, will focus on the talents of Penn State students. They will produce the Lewis Waters play, *Who Are You to Tell Me?*, at 7:30 p.m. in the Cultural Center. A Black Talent Show will begin at 9:30 p.m. in the Cultural Center.

On Tuesday, April 22, the festival's keynote speaker, Dr. Frances Crest-Welsing, the Washington, D.C., psychiatrist who formulated the controversial color confrontation theory, will talk at 8 p.m. in Schwab Auditorium. A reception for her will be held in the Cultural Center after the lecture.

On Wednesday, April 23, Mandinkian griots Alihaji Bai Konte and his sons, Dembo and Ma Lamin, will play the kora, the 21-stringed instrument reputed to be the forerunner of the banjo, at 8:30 p.m. in the Cultural Center. Mandinkian griots, or bards, maintain the oral histories and musical traditions of many West African societies.

On Thursday, April 24, the festival will end on a futuristic note with the 11 Symposium on Black Perspectives in the Eighties" at 8 p.m. in the HUB Lounge. The symposium will bring together Dr. Barbara Sizemore, Michael Thelwell and Stokely Carmichael.

Dr. Sizemore, a well known educator, is associate professor of literature at the University of Pittsburgh. Michael Thelwell, an instructor at the University of Massachusetts at Amherst, is the former director of Amherst's W.E.B. DuBois Department of Afro-American Studies. Stokely Carmichael, former leader and spokesman for the Student Non-violent Coordinating Committee, now heads the All-African Peoples Revolutionary Party.

The various programs are being sponsored by the Black Studies Program, the Institute for the Arts and Humanistic Studies, the College of Arts and Architecture, the College of the Liberal Arts and the Paul Robeson Cultural Center. Admission to the programs is free unless noted otherwise.

Arts Roundup

Ohlsson concert April 26

The internationally known pianist, Garrick Ohlsson, will perform in Eisenhower Auditorium on Saturday, April 26, at 8:30 p.m.

His program, sponsored by the Artists Series, will include Beethoven's *Sonata in E-flat Major*, opus 27, no. 1; Schubert's *Sonata in C minor*, opus posthumous; Schoenberg's *Five Pieces*, opus 23; and Liszt's "Valse Opulente no. 2," "Apparition no. 1," and the third of the "Transcendental Etudes."

Mr. Ohlsson studied at the Juilliard School of Music with Rosina Levine and Sasha Gordinitzki. In 1970, a then-unknown pianist, he became the first American to win the prestigious Chopin International Piano Competition in Warsaw, Poland. Following the competition, he made his debut with the Philadelphia Orchestra and shortly thereafter was invited to perform at the White House.

Since then, Mr. Ohlsson has won two more international awards, the Italian Busoni Prize and the Montreal International Piano Competition. He has appeared as soloist with the Boston Symphony, the New York Philharmonic, the London Symphony, the Royal Philharmonic, and other major orchestras.

Tickets for the concert, the last in the Music Series, will go on sale at the HUB Booth and the Eisenhower Auditorium box office beginning Tuesday, April 22, from 9 a.m. to 4 p.m. Phone orders on Master Charge or Visa will be accepted at 863-0255.

Works by Tanner, Pippin exhibited at HUB Gallery

The works of two eminent Pennsylvania artists, Henry O. Tanner and Horace Pippin, are on exhibit at the HUB Gallery. Henry Ossawa Tanner, born in Pittsburgh in 1859, was the first black American painter to gain international

fame. As a youth, he could find no one willing to teach him drawing and painting, but eventually he was accepted into the Pennsylvania Academy of the Fine Arts, which at that time had some of the finest teachers in America.

Horace Pippin was born in West Chester in 1888 and had no formal art training. He lost the use of his right arm as a result of wounds suffered during World War I. During his enforced idleness, he came upon the idea of burning drawings into wood with a hot poker and then painting over them. This he accomplished by supporting his lame right arm with his left hand.

He was discovered in 1937 by N.C. Wyeth, the famous illustrator, and Dr. Christian Brinton, an art critic. Both recognized the work they saw in the window of a shoe repair shop in West Chester as that of a self-taught genius of color and design.

Pippin and Tanner "achieved in spite of obstacles which might have thwarted lesser individuals," says Elmore M. Browne, director of the Paul Robeson Cultural Center and coordinator of the exhibit.

The Penn State exhibit was made possible by the loans of paintings from the Hirshhorn Museum and Sculpture Garden, and the Museum of African Art, both part of the Smithsonian Institution; the Whitney Museum of American Art; the Pennsylvania Museum of the Fine Arts; the William Penn Museum; the Phillips Collection; Bryn Mawr College; Hampton Institute; Howard University; Morgan State University; and private collections.

Pepé show at Museum

An exhibit of recent works on paper by Diane Pepe, assistant professor of art, will be seen at the Museum of Art through June 1.

Prof. Pepe's work—whether drawing, print or collage—employs the line as the fundamental unit for architectural compositions which, she says, "attempt to express the essential nature of things

rather than imitate their external form."

Her work has been exhibited throughout the United States, most recently in a juried exhibition at the William Penn Memorial Museum in Harrisburg. An edition of her prints was purchased by the U.S. Information Agency to be exhibited as part of a group show in embassies abroad.

A native of New York City, Prof. Pepe received her B.F.A. from Carnegie-Mellon University, where she studied painting and sculpture. She earned her M.A., with an emphasis in lithography, from the University of New Mexico. She joined the University in 1975, teaching courses in lithography, intaglio, relief printing, drawing and hand papermaking.

Tickets on sale for "The Taming of the Shrew"

Tickets are now on sale for William Shakespeare's *The Taming of the Shrew*, University Resident Theatre Company's final presentation of its inaugural season.

URTC's production will run May 1-3, 6-10, and 13-17 in the Playhouse, with the curtain at 8 p.m. Tickets may be reserved at the URTC box office in the Arts Building lobby or by calling 814-865-1884.

Kate will be played by Katherine Houghton, best remembered for her role opposite her aunt Katherine Hepburn in the Oscar winning film, *Guess Who's Coming to Dinner*. Her most recent television appearance was as Nabby Adams in PBS' *The Adams Chronicles*.

Ken Jenkins, who founded the Pilgrims Repertory Company with Ms. Houghton, will portray Petruccio. He has been seen on TV in the film, *Centennial*, and in a musical adaptation of Feydeau's "In Fashion" for PBS' "Theatre In America" series.

Bill Preston, who played Grandpa in URTC's production of *You Can't Take It With You*, will be returning as Grumio, Petruccio's servant.

Scenic design for this production is being executed by Robert O'Hearn, resident scenic designer for the Metropolitan Opera Company.

Program features Persichetti

Several works by Pennsylvania composer Vincent Persichetti have been selected for a concert by the Penn State Symphony Wind Ensemble at 8:30 p.m. Friday, April 18, in the Music Building Recital Hall.

The wind ensemble will perform Persichetti's four-movement Symphony for Band, opus 69, as well as ballet music from "Prince Igor" by 19th century composer Alexander Borodin.

The remainder of the program is composed of 20th century works: Robert Starer's "Stone Ridge Set" and John Barnes Chance's "Incantation and Dance." The program will conclude with "Punchinello" (1973), "Overture to a Romantic Comedy" by Alfred Reed.

Alard Quartet to play

The Alard String Quartet will present the final campus concert of its 25 anniversary season at 8:30 p.m. Wednesday, April 23, in the Music Building Recital Hall.

The performance will open with Joseph Haydn's Quartet in G Major, opus 54, no. 1, followed by Sir William Walton's Quartet in A Minor, and conclude with Schumann's Quintet for Piano and Strings in E-flat Major, opus 44. In the final piece pianist Steven Smith, associate professor of music, will be the accompanist.

The Quartet is composed of violinists Joanne Zagst Feldman and Donald Hopkins, violist Raymond Page and cellist Leonard Feldman.

Concertino Players concert

The Concertino Players will present a concert at 8:30 p.m. Monday, April 21, in the Music Building Recital Hall.

Arthur Honneger's Concerto da Camera will open the program, followed by the Duo for Flute and Oboe by Gordon Binkerd and the Sonata for Flute and Piano by Alec Wilder.

The Concertino Players are Assistant Professor Monte Bedford, oboist and English hornist; Diane Gold, flutist, alto flutist and piccolist; and Phyllis Triolo, pianist.

Penn State Intercom

Representing the Central Pennsylvania Chapter of the National Secretaries Association, Romayne Weight, secretary in "MC-3B," receives Proclamation from Dr. Oswald.

In recognition of National Secretaries Week, President Oswald has issued the following statement.

Not just for a week but every day of the year I recognize the irreplaceable, significant, absolutely essential contribution of the secretarial staff in the total Penn State endeavor. In my own office I am truly blessed with the finest secretarial support available in that honored professional career. I am delighted to acknowledge this in National Secretaries Week and especially on Secretary's Day, April 23, the Wednesday of the special week.

Public Administration a leader in students selected as Interns

For the second year in a row, Penn State's Institute of Public Administration ranks among the top public administration programs in the country in terms of the number of candidates selected for the Presidential Management Intern program. Five interns and two alternates were selected from the Institute, as well as one intern at the Capitol Campus.

According to Institute Director Robert J. Mowitz, the schools whose public administration programs received four or more Internship awards were: University of Southern California, 16, plus 2 alternates; Harvard — John F. Kennedy School, 9; University of Texas — Lyndon B. Johnson School, 6, plus 1 alternate; Indiana University, 6, plus 1 alternate; New York University, 6, plus 1 alternate; Syracuse — Maxwell School, 6; Penn State — Institute of Public Administration, 5, plus 2 alternates; University of Washington, 5, plus 1 alternate; Princeton, 5; and SUNY-Albany, 4.

The number of nominations is restricted to a percentage of the number of students receiving degrees the previous year. The Institute is the only "program" in the above list which is not a separate graduate school of public affairs or administration. About 200 schools nominated a total of 920 candidates, and 105 schools have received one or more Internship awards. In Pennsylvania, Pitt and Carnegie-Mellon each had three Interns plus one alternate; Temple University received two Internships; and Capitol Campus and Indiana University of Pennsylvania each had one.

Governor Thornburgh to speak at commencement

Governor Richard Thornburgh will be the speaker at the University's Spring Term Commencement exercises Saturday, May 31, at 10:30 a.m. in Beaver Stadium.

More than 5,000 graduates will receive degrees in the University Park ceremonies. President Oswald will preside and will confer degrees, along with Quentin E. Wood, president of the Board of Trustees, and Provost Eddy.

"I am pleased and honored that Governor Thornburgh will be Penn State's commencement speaker," Dr. Oswald said. "I have been eager for the Governor to participate in this, the largest commencement in the Commonwealth.

"Even more important is the fact that our graduates could have no finer example than Governor Thornburgh. In each of his careers — as private attorney, as public prosecutor and as governor — he has built

his success on a firm foundation of professional excellence and personal integrity."

Elected Governor of Pennsylvania in 1978, Thornburgh has concentrated his administration's efforts on attracting industry to Pennsylvania and on eliminating public corruption.

Born in Pittsburgh in 1932, he received a B.S. in engineering from Yale University in 1954 and a law degree with high honors from the University of Pittsburgh in 1957.

After working for more than a decade as an attorney in the private and corporate sectors, he was appointed U.S. attorney for Western Pennsylvania in 1969, beginning a career that brought him national acclaim for his successful and innovative attacks on organized crime and official corruption.

Thornburgh empaneled the nation's

Governor Thornburgh

Four Alumni Fellows welcomed

Dr. Hess

Mr. Everett

Dr. Russell

Mr. Huck

Four prominent alumni will be welcomed back next week in the role of Alumni Fellows.

Dr. Carroll V. Hess, dean of the College of Agriculture at Kansas State University; James L. Everett III, president and chief executive officer of the Philadelphia Electric Co.; and Allen S. Russell, vice president for science and technology at Alcoa, will visit University Park to share ideas and professional experience with students, faculty members and administrators.

John Lloyd Huck, president and chief operating officer of Merck & Co., Inc., will visit the College of Medicine at Hershey.

Dr. Hess, a 1948 graduate in agricultural economics, will be at

University Park April 29 through May 2 as a guest of the College of Agriculture.

He has been dean at Kansas State since 1966. An expert on the production economics of agriculture, Dr. Hess frequently is asked to share his expertise with other nations. He recently returned from a two-year assignment as chief of a task force in the Philippines.

In addition to his Penn State degree, he holds master's and doctoral degrees from Iowa State University.

Dr. Russell will be the guest of the College of Science April 29 through May 2.

Dr. Russell earned three degrees at Penn State — his B.S. in 1936, his M.S. in 1937,

(Continued on page 5)

Baker elected to National Academy

Dr. Paul T. Baker, professor of anthropology, has been elected to membership in the National Academy of Sciences.

A member of the faculty since 1957, Dr. Baker has done extensive research in the Peruvian Andes on the adaptation of human beings to high altitudes. He edited the most extensive book on this subject, *The Biology of High Altitude Peoples*, published in 1978 by Cambridge University Press.

The book draws heavily on research undertaken in the International Biological Programme, a ten-year international research effort. Active in planning for this enterprise, Dr. Baker served as International Coordinator of High Altitude Studies and as U.S. Director of High Altitude Research Programs. He was also a member of the executive committee of the U.S. Program.

In recent years, Dr. Baker has been doing research in Samoa on the migration among native populations.

He is a past president of the American Association of Physical Anthropologists

Hershey scores a "first" while saving patient with heart assist device

A notable "first" — the first patient in the world to have surgeons use a heart assist device to help only the right ventricle or right pumping chamber of the heart, was reported by Hershey surgeons at a meeting of the American Society of Artificial Internal Organs in New Orleans on April 17.

The patient, Lavere Wolf of York, is the second open heart surgery patient to be saved by a heart assist device at Hershey. Surgeons at Hershey were the first in the world to use such a pump successfully with a left ventricular assist device in 1977 following open heart surgery on a 39-year-old central Pennsylvania woman.

The ventricle assist devices are derived from a totally implantable artificial heart being developed by an interdisciplinary research team at the Medical Center and University Park.

Dr. Grant Van P. Parr, assistant professor of surgery and the cardiothoracic surgeon who performed the surgery on Mr. Wolf, explained that the ventricular

assist device is designed to do the work of a patient's heart after surgery or after a heart attack accompanied by shock. By doing the pumping work of the heart, the device allows the heart to rest and recuperate until it can pump blood on its own.

The device has the potential to save some 800 lives each year, according to Dr. William S. Pierce, professor of surgery and the cardiothoracic surgeon who leads the research team that developed the device. That number represents one-half to one percent of all open heart surgery patients who die when their hearts fail to pump blood after they are weaned from heart lung machines following surgery.

"With the present techniques of cardiac surgery, deaths due to poor heart function are becoming increasingly rare; nevertheless, they continue to occur," Dr. Parr said.

Mr. Wolf and his wife were unaware that the heart assist device existed when he was transferred to the Medical Center for surgery during his third encounter with

major heart problems. When he arrived, he was weak, his blood pressure was very low (72/44), and all medical management, including use of a pacemaker to control his heart rhythm, failed to bring him out of a state of shock.

Mr. Wolf's problem, Dr. Parr explained, involved an aneurysm or bulge in the left ventricle caused by weakening of the heart wall. In addition, the coronary arteries that supply blood to the heart were blocked.

Dr. Parr had just finished one open heart operation when the decision was made to immediately begin preparing for emergency surgery on Mr. Wolf. During the operation, Mr. Wolf was on a heart lung machine for one hour and 40 minutes during which his heart was stopped completely for 53 minutes. Dr. Parr's initial attempt to remove his patient from the heart lung machine was unsuccessful, even with the use of an intra-aortic balloon pump to support the pumping action of the left side of the heart, the side that supplies

(Continued on page 5)

Penn Staters

Dr. Yoshio Fukuyama, professor and head of the Department of Religious Studies, was presented an honorary Doctor of Divinity degree on Tuesday, April 22, by The Chicago Theological Seminary. Dr. Fukuyama, who holds a B.D. from the Seminary, also delivered one of three lectures at the Seminary's 125th anniversary celebration this week. His talk was titled "The Leadership of the Church with Emerging Groups."

Irvin Hand, associate professor of state and regional planning at Capitol Campus, has been chosen president-elect of the American Planning Association. The Association is a national organization of 22,000 city and regional planners. Prof. Hand served as executive director of the Pennsylvania State Planning Board from 1964 to 1972. A member of the Capitol Campus faculty since 1967, he held planning posts in Nashville, Tulsa and Westchester County before coming to Pennsylvania. He has a bachelor's degree in social sciences from City College of New York and a master's degree in city planning from the Massachusetts Institute of Technology.

Dr. William DeW. Horrocks Jr., professor of chemistry, gave invited talks at California Institute of Technology, Stanford University, the University of California at Los Angeles, and Kent State University in March. The talks were titled "Laser-Induced Lanthanide Ion Luminescence — A Probe of Structure and Kinetics in Chemistry and Biology." He described his research group's use of lanthanide ions to probe calcium binding — sites of calcium binding proteins and enzymes.

Honored at the 1980 awards banquet of the College of the Liberal Arts were Dr. Michael R. King, associate professor of political science; Dr. Gerard A. Hauser, associate professor of speech communication; Dr. William T. Sanders, professor of anthropology; and Dr. Lois B. Hyslop, professor emerita of Romance languages.

Dr. King was presented the Society's Outstanding Faculty Advisor Award; Dr. Hauser, the Distinguished Teaching Award; Dr. Sanders, the Distinction in the Social Sciences Award; and Dr. Hyslop, the Emerita Distinction Award.

A member of the faculty since 1968, Dr. King has focused his research on political parties, legislative behavior and public policy analysis. Dr. Hauser is associate director of the Graduate Interdisciplinary Program in the Humanities and co-director of the Communication Studies major. Associate editor of the Journal, Philosophy and Rhetoric, he serves on the editorial board of Communication Monographs. In addition, he chairs the Sparks Fellowships Committee and the Committee on the Integrative Program for Scholastic Excellence.

Internationally known for his work on Meso-American cultures and their rise in civilization, Dr. Sanders has done extensive field work in Mexico and Guatemala. Dr. Hyslop was honored for her continued contributions to her discipline, including two books on the French poet, Charles Baudelaire.

Dr. Philippos Loukissas, assistant professor of urban and regional planning in the Man-Environment Relations Program, recently participated in an evaluation seminar of an interdisciplinary research project on the developmental problems of minor Mediterranean Islands. The seminar, held on the Isle of Kerkennah, Tunisia, was sponsored by UNESCO's Division of Human Settlements and Socio-Cultural Environments. Dr. Loukissas, whose research interests include tourism planning and development, was the only participant invited from the United States.

Provost Edward D. Eddy received an honorary doctor of humane letters degree during a special Founders Day Convocation at Juniata College April 17. The Convocation — observing both the College's 104th Founders Day and dedication of its new Charles A. Dana Humanities Cluster — also featured an address by Dr. Eddy, "The Final Test."

In awarding Dr. Eddy his honorary degree, Juniata President Frederick M. Binder cited him for being "a dedicated educator, responsible college and university administrator, and civic-minded citizen." Dr. Binder observed that Dr. Eddy is "a humanist whose many contributions to America's system of higher education reflect (his) overwhelming belief in the worth of the quest for knowledge and truth."

Dr. John C. Johnson, professor of engineering research and director of the Applied Research Laboratory, has been elected secretary of the Governing Board of the American Institute of Physics.

Stephen R. Grecco, associate professor of English, has been selected to participate in the 1980 National Endowment for the Humanities Institute in Contemporary Eastern European Drama and Theatre (Poland and the Soviet Union) to be held this summer for six weeks at the Graduate Center of the City University of New York.

Dr. A. Daniel Frankforter, associate professor of history at Behrend College, has been presented the Class of 1933 Award for Outstanding Contributions in the Field of Humanities.

A medievalist, Dr. Frankforter is the author of a book on church history. He holds an A.B. in philosophy from Franklin and Marshall College, and his M.A. and Ph.D. in history were granted by Penn State in 1969 and 1971, respectively.

Dr. Wayne D. Lammie, director of the Schuylkill Campus, was elected president of the Pennsylvania Association of Two Year Colleges. The election was held following the Thirty-Seventh Annual Convention assembled in Hershey on April 10 and 11. Dr. Lammie served as vice president and program chairman for 1979-80.

Dr. Gordon C. Godbey, professor of adult and higher education, has been elected second vice president of the Pennsylvania Association for Adult Continuing Education. The Association represents more than 500 adult educators in universities, colleges, public schools, labor unions, hospitals, correctional institutions and other agencies.

Dr. Godbey has also been appointed to serve for one year on the National Committee of Sex Equity of the National Association of Public Continuing and Adult Educators. Committee members represent state departments of education, the federal government, professional organizations and women's groups.

David Young, professor and head of landscape architecture, served as an invited juror for the 1980 Professional Awards Competition of the New York State Chapter of the American Society of Landscape Architects (ASLA).

Bookshelf

Dr. Laurie M. Gunter, professor of nursing and human development, is principal author of *Education for Geriatric Nursing*, a 205-page book published recently by Springer Publishing Co. Her co-author is Dr. Carmen A. Estes, a former Penn State faculty member.

The book provides nursing educators in nursing schools and in-service education instructors in hospitals, nursing homes, home nursing programs and long-term care facilities with guidelines for curriculum structure and education resources for five levels of nursing personnel.

It also defines trends, needs and directions for practice, education and research in nursing care of the elderly and, where feasible, makes suggestions and recommendations.

Dr. Carl Thompson, associate professor of behavioral science at Hershey, has authored a new book, *Controls of Eating*, which is part of a series, *Monographs in Pharmacology and Physiology*, co-edited by Dr. Elliot Vesell, professor and chairman of pharmacology at Hershey. Chapter 10 of the book, "Aberrations Accompanying Human Clinical Syndromes," was written by Dr. John Burnside, associate professor of medicine.

Promotions

Staff Exempt

Nancy J. Klosterman to associate director of undergraduate admissions in Undergraduate Admissions.

Staff Non-Exempt

Maureen E. Abernethy to senior psychiatric assistant at Hershey.

Joan L. Coble to administrative aide in President's Office.

Mary A. Neumyer to senior staff nurse at Hershey.

Clerical

Susan K. Condran to secretary C at Hershey.

Peggy L. Conrad to secretary B in Earth and Mineral Sciences.

Tammy E. Evans to clerk, gift records, in Gifts and Endowments.

Deborah E. Griffin to data preparation operator B in Management Services.

Alice A. Haines to acquisitions searcher in Library.

Virginia M. Kephart to clerk typist A in Science.

Nancy G. Parks to secretary C in Agriculture.

Sandra M. Rogus to secretary B in Undergraduate Admissions.

Rebecca S. Ross to receptionist B in Student Administrative Services.

Susan R. Sampsell to secretary C in Liberal Arts.

Nancy R. Winnert to secretary C in Undergraduate Admissions.

Technical Service

David J. Felice to utility worker at Nittany Lion Inn.

Paul D. Fetzler to mailing room assistant in Agriculture.

James Friday to maintenance worker — area landscape in Physical Plant.

Stanley G. Kline to maintenance worker general A at Shenango Valley.

Shirley A. Reichard to residence hall utility worker in Housing and Food Services.

Lilae M. Shope to food preparer B in Housing and Food Services.

Stephen M. Taljan to carpenter A at Capitol.

Obituaries

Dr. David A. Kribbs, who retired as a professor of botany in 1961 after 30 years of service to the University, died April 13 at the age of 84.

A native of Thief River Falls, Minn., Dr. Kribbs earned his B.S. and M.S. degrees at the University of Minnesota and his Ph.D. at Yale. He began teaching at Penn State in 1931 at Mont Alto, moving to University Park in 1941. He was the author of a book, *Commercial Foreign Woods on the American Market*.

Ruth R. Ricker, who served as secretary to the Dean of Men from 1919 to 1954, died April 9. A native of State College, she was 83 years old.

Retirements

William Kosky, a stockroom inventory clerk in the College of Science, retired April 1 after 20 years of service to the University.

When Mr. Kosky first came to Penn State in 1960, he worked as an operator-helper at the Sewage Plant, remaining there for four years before joining the Chemistry Department. He helped set up undergraduate laboratories, handled gas cylinders for the labs and maintained the inventory.

His wife, Sara, is a laboratory attendant in the Department of Dairy and Animal Sciences, and their daughter, Sally, attended Penn State from 1965 to 1967.

Mr. Kosky plans to set aside plenty of time for hunting and fishing and to pursue his electronic hobbies with radio and television now that he's retired.

Geraldine W. Bohn, a residence hall worker for Housing & Food Services, retired from the University on April 1, after 20 years of service.

She joined the University staff on Oct. 1, 1950, as a maid in Hamilton Hall. In 1954, she was transferred to McKee Hall, where she worked for the remainder of her career.

She and her husband, Robert, reside in Boalsburg. They are the parents of two sons and one daughter.

Funding Sources

For further information, call 865-1372

(332-1) The Resource Information Service (RIS) provides information to faculty and staff to support their mission of obtaining project funding for instruction, research, continuing education and for fellowships. RIS is the liaison between Penn State and the Office of Federal Programs (OPF/AASCU), Washington, D.C. OPF provides Penn State with continuous monitoring of public and private agencies. RIS reviews submitted information from numerous sources, including the Federal Register and the Commerce Business Daily, and receives direct mailings from agencies concerning their programs. RIS makes direct (unsolicited) information distributions to faculty and staff to promote awareness of public and private programs; responds to faculty/staff inquiries about programs and contacts; and through a Preliminary Proposal Outline (PPO) mechanism locates support funds. For detailed information about RIS assistance, contact M.R. Kohler, Room 5 Old Main, 865-1372 (Network 8-475-1372).

INTERCOM is an internal communications medium published weekly during the four terms of the class schedule for the faculty and staff of The Pennsylvania State University.

New family studies journal is launched at University

If one were to note the major developments in the social sciences during the 1970s, the rapid emergence of family studies would rank near the top of the list. As recently as ten years ago, promising graduate students often were steered away from an academic career in marriage and the family by professors who considered it a low-status specialization, years removed from methodological rigor.

No longer. Virtually all major universities now have specialists in the family. Many, including Penn State, have entire departments in the field, and their classes draw heavy enrollments. Increasing public and governmental interest in the family's role has been a contributing factor. Also important was the advent of computers, which facilitated the statistical and survey research that lies at the heart of the discipline.

Other indicators abound. There are numerous professional meetings each year at which family research is presented, and the prominent professional associations for family research and practice count their collective membership in the tens of thousands. There are now a dozen professional journals in the field, some dealing with theory and research, some with marriage and family therapy, and some focusing on phenomena such as demography and kinship.

The field's newest scholarly publication — the *Journal of Family Issues* — emanates from Penn State's College of Human Development, with Dr. Graham B. Spanier, associate professor of human development and sociology, as editor. The *Journal's* first issue reached more than 1,000 initial subscribers in early April.

"The *Journal* was born because the field was desperately in need of another outlet for good research," Dr. Spanier says. "The leading publications — such as the *Journal of Marriage and the Family* — can accept only 10 percent of the articles submitted."

The idea for a new journal had been discussed for several years by some of the leading authorities in the field — including F. Ivan Nye (Center for the Study of Youth

Dr. Spanier and his editorial secretary, Pam Macron.

Development at Boys Town) and Murray Straus (University of New Hampshire) — and they decided to pursue the idea seriously last year."

After discussing possible sponsorship with the National Council on Family Relations and negotiating with Sage Publications, the group asked Dr. Spanier to accept the editorship of the *Journal of Family Issues*. Though only 31, Dr. Spanier is author or co-author of more than 50 published articles and five books in the area of family sociology. In addition, he recently completed a term on the editorial board of the *Journal of Marriage and Family Therapy* and currently serves as an associate editor of the *Journal of Marriage and the Family*.

"The *Journal of Family Issues* is different," he explains, "in that it focuses on contemporary social issues and problems pertaining to marriage and the family, as well as on theoretical and professional issues in the field. The emphasis is clearly on issues, and that's the context in which the manuscripts are

evaluated."

In addition, the quarterly publication will devote every other edition to articles dealing with selected themes. Runaways, Remarriage, Dual Worker Families, Family Violence, Economics and the Family, and Childlessness/One-Child Families are the six themes scheduled for Dr. Spanier's three-year tenure.

Although the *Journal* is now sailing smoothly, Dr. Spanier found the launching somewhat rigorous.

"It took some effort to compose an editorial board that had an appropriate mix of areas of expertise within the field, academic experience, and diversity in personal background characteristics. We have included some scholars from Europe to establish the *Journal's* international orientation," Dr. Spanier points out.

Among his 23 associate editors are two Penn States: Dr. Gunhild O. Hagestad, assistant professor of human development, and Dr. Constantina Safilios-Rothschild, professor of human development. In addition, Dr. Spanier relies on 50 ad hoc

reviewers — some from Penn State — for occasional reviews.

To promote the venture, Dr. Spanier wrote to all professional organizations in the field and to department chairpersons whose bailiwicks might produce family research. Through its own network, Sage Publications announced the new publication to about 25,000 U.S. social scientists. To learn the ropes of managing an editorial office, Dr. Spanier corresponded with other journal editors and visited the editorial offices of the *Journal of Marriage and the Family* at the University of Florida.

In September 1979, the manuscripts started pouring in. "We've received about 150 manuscripts for our first four issues this year, and we've selected about 30 — a 20 percent acceptance rate."

"The very short lead time between the time we started receiving manuscripts and our publication deadlines presented some problems," Dr. Spanier explains. "It was difficult initially to gauge which articles to accept, since there's a tendency to rush to judgment to meet the deadline the contract calls for."

"Whatever the initial problems, the benefits of having the *Journal* at Penn State are manifold," he says. "It increases the visibility of the College of Human Development. It lets people know that Penn State is a center for scholarly interest in the family. It's probably not coincidental that the people behind the *Journal* came to Penn State for an editor, because the University is recognized as having one of the leading programs in family studies in the nation."

"The *Journal's* editorial office will also be useful in promoting professional networks, because we'll be talking and corresponding with hundreds of people in the field every year. Those relationships are useful in learning about job opportunities for our graduate students, for learning about conferences at which our faculty members might present papers, and for steering University researchers to people working in similar areas elsewhere."

Review of health care deductions urged

University faculty and staff members should review periodically the deductions being taken for their group health care (UNICARE and Dental) to be certain that they are paying for the correct coverage.

A change in family status may affect your costs and your coverage. For

example, when you get married, when you have a first child, or when your spouse stops working for the University, you run the risk of having inadequate dependent coverage.

You should consider changing your coverage if any of the following circumstances arises:

- 1) You add a dependent through marriage or birth. (Note: a baby is covered automatically for 31 days following birth; however, to provide for coverage beyond that time a change of dependent coverage form must be completed.)
- 2) Your spouse or only dependent child begins or ceases working for the University as a regular employee.
- 3) Your spouse or only dependent child dies.
- 4) You are divorced (or separated and

no longer wish to provide dependent coverage).

- 5) Your only dependent child enters military service or reaches age 19 (or 23 in the case of a full-time student).
- 6) Your only dependent child gets married.

To determine whether or not you have the right coverage or are paying the right amount, compare the amount that is shown on your salary check stub with the amount you should be paying according to the table below.

If a change should be made, call, write, or visit the Employee Benefits Division, Room 133 Willard Building, 865-1473. A faculty or staff member who is not at University Park may receive assistance by contacting his/her Personnel Officer or Business Manager.

The University has no way of knowing whether a change should be made, so it is the responsibility of the employee to keep his/her records up to date and accurate. No refunds for over-payment will be made, unless it can be shown that the University was in error.

Insured Persons	UNICARE		Dental	
	monthly NONE	bi-weekly NONE	monthly NONE	bi-weekly NONE
Employee Only				
Child or Children	\$1.75	\$0.80	4.33	\$2.00
Employee, Spouse	\$3.60	\$1.66	4.33	\$2.00
Employee, Spouse				
Child or Children	\$5.00	\$2.30	\$4.33	\$2.00

Alumni Fellows

(Continued from page 1)

and his Ph.D. in 1941 — all in chemistry. He joined Alcoa in 1940.

Beginning in the early 1950s, he participated in the study of alternative aluminum smelting processes with emphasis on chloride technology. This research led to the development of the Alcoa Smelting Process. The holder of 10 patents, Dr. Russell has been a major contributor to the technological achievements of the aluminum industry.

Mr. Everett will be at the University April 30 through May 2 as a guest of the College of Engineering.

After receiving B.S. and M.S. degrees in mechanical engineering in 1948 and 1949, respectively, Mr. Everett joined the engineering department of the Philadelphia Electric Co. He has been with the firm ever since, rising to president in 1971 and to president and chief executive officer in 1979.

Mr. Everett participated in a number of nuclear and conventional power generating projects in the 1950s. In 1958 and 1959, he attended the Massachusetts Institute of Technology as a Sloan Fellow and the following year was named director of research at Philadelphia Electric.

A member of numerous engineering and technical societies, Mr. Everett has received many awards throughout his career, including being honored as one of Penn State's Distinguished Alumni.

Mr. Huck will be at the College of Medicine April 27 through April 29.

A chemistry major, class of 1943, he is a past president of the Alumni Association and a member of the University's Board of Trustees.

As a member of the Army Air Corps during World War II, he was a bomber

pilot and a flight instructor.

Mr. Huck joined Merck, one of the nation's largest pharmaceutical firms, as director of marketing in 1958 after 12 years with Hoffmann-LaRoche of New Jersey. He became a vice president at Merck in 1966, a member of the board of directors in 1977, and president and chief operating officer in 1978.

The Alumni Fellows program is sponsored by the Penn State Alumni Association.

Governor

(Continued from page 1)

first special grand jury to investigate racketeering and corruption under the Organized Crime Control Act of 1970. He obtained indictments and convictions of nearly 50 individuals for abuse of public office and prosecuted more than 100 narcotics dealers. He also probed the pornography industry's ties to organized crime and prosecuted industrial polluters.

In his career as a prosecutor,

Thornburgh personally never lost a case, and his office's success rate was better than 90 percent.

From 1975 until 1977, Thornburgh served as assistant U.S. attorney general and head of the Criminal Justice Division with nationwide administrative responsibilities. Among his achievements in that office was creation of the pioneering Public Integrity Section to combat official corruption on a nationwide basis.

In addition to the University Park exercises, graduates at other Penn State campuses will bring the total number of Spring Term degrees awarded to more than 6,900. The total number of graduates for the 1979-80 academic year will exceed 11,500.

Black composers' residency and STS lectures scheduled

Ulysses Kay, Larry Ridley to conduct, perform works

Two black musicians and composers, Ulysses Kay and Larry Ridley, will participate in a program, "The Black Experience: Perspectives on Music," a black composers' residency being held at the University May 1 through 3.

Mr. Kay, who will be on campus all three days, will take part in several classes; conduct a rehearsal of his composition, "Choral Triptych," with the Penn State Singers and the Penn State Symphony Orchestra; and conduct University musicians in rehearsals in Eisenhower Auditorium.

On Friday, at 12:45 p.m., he will lead a chamber music symposium in the Music Building Recital Hall with the Alard String Quartet, pianists Jill Olson and Steven Smith, and the Claremont Woodwind Quintet. These musicians will perform three of his works — Piano Nocturne No. 1, String Quartet No. 2, and Facets for Piano and Winds.

A jazz clinic with Mr. Ridley and Pro Musica Unlimited will be held from 2 until 3:30 p.m. Friday in the Music Building Recital Hall, followed by a reception for the two composers at 4 p.m. in the Paul Robeson Cultural Center.

At 8 p.m. Friday evening, in the Music Building Recital Hall, Mr. Ridley, a bassist, and Pro Musica Unlimited will present a concert.

Several University instrumental and choral groups will perform works by Mr. Kay at a Saturday concert, scheduled for 8:30 p.m. in Eisenhower Auditorium. The program will open with "Heralds I," a composition for small brass ensemble. The Penn State Symphonic Wind Ensemble, conducted by Smith Toulson, will play "Concert Sketches," and bass-baritone Raymond Brown and the University Choirs will perform "Song of Jeremiah," accompanied by the Penn State Symphony

Orchestra with Dr. D. Douglas Miller conducting.

Professor Brown will conduct the Penn State Singers and the Penn State Symphony in a performance of "Choral Triptych," and the brass ensemble will be featured again on "Heralds II." The Penn State Symphony will conclude the concert with "Southern Harmony," a composition based on several well-known hymns.

Preceding the Symphony's performance of the piece, members of the audience will be directed in singing the original hymn tunes.

Mr. Kay, currently Distinguished Professor of Music at Herbert H. Lehman College of the City University of New York, has been a visiting professor at Boston University and UCLA. He holds honorary doctorates from Lincoln College, Bucknell University, Illinois Wesleyan University and the University of Arizona, his alma mater. The recipient of Fulbright, Julius Rosenwald and Guggenheim Fellowships, Mr. Kay has also been awarded a Prix de Rome and a grant from the National Institute of Arts and Letters.

Mr. Kay served in the Navy during World War II as a performer, composer and arranger. He has written orchestral and choral works, dramatic compositions and works for the solo vocalist and instrumentalist.

The chairman of the Music Department at Livingston College of Rutgers University, Larry Ridley performs at present with the Rutgers/Livingston Jazz Professors and Pro Musica Unlimited. He has performed extensively with Billy Taylor and has appeared in concert with other renowned jazz artists, including McCoy Tyner, Thelonus Monk and Kenny Burrell. He has composed works for jazz ensembles and film scores, and has recorded numerous albums with his own groups and as a sideman for other jazz musicians.

The black composers' residency is being sponsored jointly by the Institute for the

Arts and Humanistic Studies, the Black Studies Program, the Paul Robeson Cultural Center, and the School of Music of the College of Arts and Architecture. All events are free and open to the public.

STS program bringing Drs. Henderson, Eisenbud

The Science, Technology and Society (STS) Program has scheduled a week of special activities April 28 through May 2.

Featured will be two distinguished Visiting STS Professors, Hazel Henderson and Merrill Eisenbud. Dr. Henderson, recently of the Princeton Center for Alternative Futures, Inc., is a prominent futurist, author and lecturer. Advisor to a number of non-profit organizations and government agencies, her expertise is in social policy, environmental and consumer protection, corporate accountability, alternative futures and appropriate technology.

Dr. Eisenbud is professor of environmental medicine and director of the Laboratory for Environmental Studies at New York University Medical Center's Institute of Environmental Medicine. A member of the National Academy of Engineering, he has had experience as an industrial hygienist, administrator of environmental protection programs, and researcher on radiation hazards to human health and the environment.

In addition to seminars for specialized groups of students and faculty, there will be several public events. Dr. Eisenbud will speak on "Environment, Technology and Health: A Century of Progress but Years of Despair" at 4 p.m. on Tuesday, April 29, in the HUB Assembly Room. Both guest experts will discuss the topic, "No Free Lunch: The Economy vs. the Environment," at 8 p.m. Wednesday, April 30, in Room 112 Kern Building.

Dr. Henderson will discuss "The Future of the Environment: A Futurist's View" at 4 p.m. on Thursday, May 1, in the HUB Assembly Room. On Friday, May 2, at 12:20 p.m. in Room 101 Kern, she will speak on "Value Issues in the Environmental Movement." There will be opportunity for questions and discussions by the audience following all of these talks.

The University's Science, Technology and Society Program was begun almost a decade ago. Chaired currently by Dr. Rustum Roy, director of the Materials Research Laboratory, it involves almost 40 faculty members in an interdisciplinary effort to foster integrative learning, teaching and research.

More information on Dr. Henderson's and Dr. Eisenbud's schedules may be secured from the STS office, 865-9951 or 865-3424.

Evelyn Witkin to give R.W. Stone Lecture

Dr. Evelyn M. Witkin, Barbara McClinck Professor of Genetics at Rutgers University, will present the Robert W. Stone Lecture on Thursday, May 1.

The lecture, entitled "Regulation of Radiation-Inducible Functions in *E. coli*," will be held at 3:55 p.m. in Room 101 Althouse Laboratory. It is sponsored by microbiology alumni and friends of Dr. Stone.

Dr. Witkin is a faculty member at Douglass College, the women's division of Rutgers University. A pioneer in the field of DNA repair, Dr. Witkin has focused her research on understanding how bacterial genes, damaged by radiation, repair themselves and how mistakes in the repair process sometimes lead to mutations.

Since there is a correlation of at least 90 percent between agents that cause cancer in mammals and agents that cause mutations in bacteria, Dr. Witkin believes the results of her experiments may well have a significant impact upon human cancer research.

Dr. Witkin is a member of the National Academy of Sciences and the American Academy of Arts and Sciences and is a winner of the Prix Charles-Leopold Mayer, a prize conferred by the Academy of Sciences of the Institute of France.

The lecture, which honors Dr. Stone, a professor emeritus of bacteriology who served as head of the former Department of Microbiology for 23 years, is being held this year on part of the official observance of the University's 125th Anniversary.

Symphonic Blue Band to feature trumpet soloist

The Penn State Symphonic Blue Band will hold its annual concert at 3:30 p.m. on Sunday, April 27, in Eisenhower Auditorium.

Robert Nagel, a prominent professional trumpet soloist, will be featured. Mr. Nagel is a member of the New York Brass Quintet and teaches at Yale University in addition to performing free lance professional work.

Selections for the concert will include "Variations on a Medieval Theme" by Della Joia, "Othello" by Alfred Reed, "First Salute" by Holst, and the new award-winning "Pacific Celebration" by Roger Nixon.

Tickets for non-students will cost \$2 and are available at the Eisenhower Auditorium box office, The Music Mart on College Avenue, or from band members. Students and senior citizens will be admitted free.

Theme dinners offered

FSHA 410 students will offer five thematic dinners in the Maple Room in Henderson Human Development Building during May. The schedule is: May 1, Chesapeake Bay; May 2, Northern Poland; May 7, New York City, 20th Century; May 8, Polynesia; and May 9, Paris. Costs and seating times vary; for further information, call 865-7441.

Ticket sale for 'Carousel' to open

The Penn State Thespians will present the Rogers and Hammerstein classic, *Carousel*, Thursday, Friday and Saturday, May 8, 9 and 10, in Schwab Auditorium.

Showtime is at 8 p.m., and there will also be a 2 p.m. Saturday matinee.

Carousel, based on the Ferenc Molnar play, *Lilom*, takes place in a new England coastal town in the late 1800s. The story is about Julie, a young factory worker, and Billy, a sympathetic yet shiftless carnival barker, who fall in love and marry. When Julie discovers she is about to have a child, Billy, who has lost his job, becomes involved in a robbery and is killed. Years later, he is allowed to return from heaven to gain redemption.

The musical will be directed by Richard Lyon and employs the talents of a cast of students from all majors. Tickets will go on sale April 28, at a booth across from the HUB Desk and further information may be obtained by calling 865-9461.

Swiss writer to speak

Christopher Geiser, a young Swiss writer from Bern and the Max Kade Writer-in-Residence at Oberlin College, will present a lecture and reading at 8 p.m. Tuesday, April 29, in Room 167 Willard Building. Mr. Geiser will survey Swiss-German literature since 1945 and read from his novel *Grumee* (1978). His visit is sponsored by the Institute for the Arts and Humanistic Studies and the Department of German.

Trumpet soloist Robert Nagel (above left) will perform with Symphonic Blue Band April 17. At right, R.W. Stone lecturer Evelyn Witkin, who will speak May 11.

This is the final scene from URTC's "The Taming of the Shrew" with Katharine Houghton ("Guess Who's Coming to Dinner?") and Ken Jenkins ("Centennial") as Kate and Petruchio. The play will run May 1-3; 6-10; and 13-17 in the Playhouse. For tickets, call 865-1884.

University Park Calendar

April 24-May 4

Special Events

Thursday, April 24

*Slavic Folk Festival, 10 p.m., Hetzel Union

*Medieval Studies Banquet, 6 p.m., Maple Room, Henderson. Advance reservations necessary, 865-5481.

Cinematheque, *Chinatown*, 6:30 and 9 p.m., Room 105 Forum.

Gay Awareness Festival Lecture, "Our Gay Children," by Parents for Gays/Harrisburg, 7 p.m., Room 323 HUB.

Signa Xi Lecture, 8 p.m., Room 112 Kern. Karl H. Beyer Jr., Hershey, former senior vice president for research, Merck Sharp & Dohme, on "Hypertension: Here and Now."

Black Arts Festival Symposium, 8 p.m., HUB Lounge. Dr. Barbara Sizemore, literature, Univ. of Pittsburgh; Michael Thelwell, Univ. of Massachusetts and editorial board, *Black Scholars* magazine; Stokely Carmichael, All-African Peoples Revolutionary Party, speakers.

English Colloquium, 8 p.m., Room 101 Kern. Mark Harris, author and professor, Univ. of Pittsburgh, reads from and discusses his work.

Friday, April 25

*Slavic Folk Festival, 9 a.m.-10 p.m., Hetzel Union Bldg.

College of Business Administration, William Elliott Public Lecture, 9:45 a.m., Room 112 Kern. Thomas E. Murphy, chairman, board of directors, General Motors, on "Insuring America's Future."

Adult Education Brown Bag Luncheon, noon; discussion on "The Relatedness Between Adult and Higher Education as Fields of Study and Practice," 12:30 p.m., Room 101 Kern.

*Medieval Studies Lecture, 3 p.m., Room 306 Burrows Bldg. A. Kazhdan, Dumbarton Oaks, on "The Role of Byzantine Studies in the Intellectual Life of the Soviet Union."

Sports: tennis (men) vs. Maryland, 3 p.m. Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Wilbur Zelensky, geography, on "The Season of Marriage."

Commonplace Theatre, Roman Polanski Festival, *Knife in Water*, 6 p.m.; *Cul de Sac*, 7:30 p.m.; *Repulsion*, 9:30 p.m., Room 112 Kern. Also April 27.

Folk and Square Dance Roundup, 7:30 p.m., Room 133 White.

Gay Awareness Festival, concert by Holly Meier, 8 p.m., Schwab.

Saturday, April 26

*PSU Veterans, Statewide Softball Tournament, 8 a.m.-4 p.m., University Beef/Sheep Center.

*Little International Livestock Exposition, 8 a.m.-4 p.m., Nittany Lion Invitational, 8 a.m., through April 27; baseball vs. St. John's (double header), 1 p.m.; lacrosse (women) vs. Rutgers, 2 p.m.

*Slavic Folk Festival, 9 a.m.-noon, Hetzel Union Bldg.

School of Music, Frances Andrews Competition, 10 a.m., Eisenhower Chapel.

France-Cinema, *The Story of Adele H.*, 7 and 9 p.m., Room 112 Kern. Also April 28.

Artists Series, Garrick Ohlsson, pianist, 8:30 p.m., Eisenhower Auditorium.

Sunday, April 27

University Chapel Service, 11 a.m., Schwab Auditorium. Chapel Choir Festival, Raymond Brown, director.

Penn State Concert Blue Band Spring Concert, featuring Robert Nagel, trumpet, 3:30 p.m., Eisenhower Auditorium.

Evening with the Arts, Tim Eymann and the East Coast Offering, jazz-rock, 8:30 p.m., HUB Ballroom.

Mark Dennis, organ, 8:30 p.m., Music Bldg. Recital Hall.

Monday, April 28

Red Cross Bloodmobile, 9:45 a.m.-3:45 p.m., HUB Ballroom.

Music in Interesting Times Lecture, 3 p.m., Music Bldg. Recital Hall. Barbara Wheeler, Montclair State College, on "Music Therapy."

Shakespeare Film, *Macbeth* (BBC), 6:30 p.m., Room 101 Chambers.

Mu Phi Concert, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, April 29

Red Cross Bloodmobile, 9:45 a.m.-3:45 p.m., HUB Ballroom.

Sports: tennis (women) vs. Maryland, 10 a.m.; softball vs. Brockport State (double header), 2 p.m.

Comp. Lit. Luncheon, 12:15 talk, 1 p.m. Hotel State College. Edwin Thumboo, Univ. of Singapore, on "A Question of Tradition: Imported and Local."

STS Program, 4 p.m., HUB Assembly Room. Merrill Eisenbud, NYU, on "Environment, Technology and Health: A Century of Progress but Years of Despair."

School of Music Common Hour, 4 p.m., Music Bldg. Recital Hall.

Shakespeare Film, *Macbeth* (BBC), 6:30 p.m., Room 112 Chambers.

Comp. Lit. Film Series, Mazursky, *Alex in Wonderland*, 7 and 9 p.m., Room 112 Kern.

Christopher Geiser, Swiss writer, surveys post-war Swiss-German literature and reads from his work, 8 p.m., Room 167 Willard.

Sponsored by IAHS and Department of German.

Artists Series Film, *Late Spring*, 8 p.m., Schwab.

Wednesday, April 30

Faculty Women's Club Spring Luncheon, 11:45 a.m., Toftrees. Dr. Rosemary Schraer, asst. provost, on "New Directions."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Douglas Maury, Univ. of Western Australia, on "Waltzing Materialism."

Commonplace Theatre, Ingar Bergman, *The Touch*, 7 and 9 p.m., Room 112 Kern. Also May 4.

Interludia, folkdancing, 7:30 p.m., HUB Ballroom.

*URTC, *The Taming of the Shrew*, 8 p.m., The Playhouse.

Bassist Larry Ridley and Pro Musica Unlimited concert, 8 p.m., Music Building Recital Hall.

Saturday, May 3

ARHS, "Movin' On," HUB Lawn, through May 4.

PSU Veterans Organization, Jack Swords Golf Tournament, Blue Golf Course.

*53th Penn State Dairy Exposition, 8 a.m.-5 p.m., Univ. Dairy Center.

Sports: track (men), Penn State Memorial Invitational, 11 a.m.; football, Blue-White Game, 2 p.m.; lacrosse (men) vs. Maryland, 7 p.m.

German Department production of Durrenmatt's *Die Physiker*, 3 p.m., HUB Assembly Hall.

France-Cinema, Ingmar Bergman, *Cries and Whispers*, 7 and 9 p.m., Room 112 Kern.

*URTC, *The Taming of the Shrew*, 8 p.m., The Playhouse.

University Choirs and Orchestras, concert of works by Ulysses Kay, 8:30 p.m., Eisenhower Auditorium.

Sunday, May 4

Sports: golf (women), Alumnae Match, 8 a.m. University Chapel Service, 11 a.m. Eisenhower Chapel, Dr. David Brown, clinical psychologist, FSU, speaker.

Molly Weaver, clarinet, 3:30 p.m., Music Bldg. Recital Hall.

France-Cinema, *Jules and Jim*, 7 and 9 p.m., Room 112 Kern.

German Department production of Durrenmatt's *Die Physiker*, 7:30 p.m., HUB Assembly Hall.

STS Program, 4 p.m., Room 112 Kern. Merrill Eisenbud, NYU, and Hazel Henderson, futurist author, on "No Free Lunch: The Economy vs. the Environment."

Penn State Symphonic Wind Ensemble, chamber music, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, May 1

Deadline for season ticket holders to renew football ticket orders.

Sports: lacrosse (women) vs. Towson State, 3 p.m.

*College of Science, R.W. Stone Lecture, 3:55 p.m., Room 101 Althouse. Evelyn Witkin, Douglass College, Rutgers Univ., on "Regulation of Radiation-Inducible Functions in *E. coli*."

STS Program, 4 p.m., HUB Assembly Room. Hazel Henderson, futurist author, on "The Future of the Environment: A Futurist's View."

*URTC, William Shakespeare, *The Taming of the Shrew*, 8 p.m., The Playhouse.

Friday, May 2

Last day to sign Spring Term NDSI and University Long Term Loans, Room 108 Shields.

Late drop deadline.

STS Program, 12:20 p.m., Room 101 Kern. Hazel Henderson, futurist author, on "Value Issues in the Environmental Movement."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Douglas Maury, Univ. of Western Australia, on "Waltzing Materialism."

Commonplace Theatre, Ingar Bergman, *The Touch*, 7 and 9 p.m., Room 112 Kern. Also May 4.

Interludia, folkdancing, 7:30 p.m., HUB Ballroom.

*URTC, *The Taming of the Shrew*, 8 p.m., The Playhouse.

Bassist Larry Ridley and Pro Musica Unlimited concert, 8 p.m., Music Building Recital Hall.

Saturday, May 3

ARHS, "Movin' On," HUB Lawn, through May 4.

PSU Veterans Organization, Jack Swords Golf Tournament, Blue Golf Course.

*53th Penn State Dairy Exposition, 8 a.m.-5 p.m., Univ. Dairy Center.

Sports: track (men), Penn State Memorial Invitational, 11 a.m.; football, Blue-White Game, 2 p.m.; lacrosse (men) vs. Maryland, 7 p.m.

German Department production of Durrenmatt's *Die Physiker*, 3 p.m., HUB Assembly Hall.

France-Cinema, Ingmar Bergman, *Cries and Whispers*, 7 and 9 p.m., Room 112 Kern.

*URTC, *The Taming of the Shrew*, 8 p.m., The Playhouse.

University Choirs and Orchestras, concert of works by Ulysses Kay, 8:30 p.m., Eisenhower Auditorium.

Sunday, May 4

Sports: golf (women), Alumnae Match, 8 a.m. University Chapel Service, 11 a.m. Eisenhower Chapel, Dr. David Brown, clinical psychologist, FSU, speaker.

Molly Weaver, clarinet, 3:30 p.m., Music Bldg. Recital Hall.

France-Cinema, *Jules and Jim*, 7 and 9 p.m., Room 112 Kern.

German Department production of Durrenmatt's *Die Physiker*, 7:30 p.m., HUB Assembly Hall.

STS Program, 4 p.m., Room 112 Kern. Merrill Eisenbud, NYU, and Hazel Henderson, futurist author, on "No Free Lunch: The Economy vs. the Environment."

Perspective," 2:20 p.m., Room 128 Sackett.

Physics, E. Merzbacher, Univ. of North Carolina, on "Quantum Physics of Damping," 3:50 p.m., Room 445 Davey.

Biology, Lewis E. Anderson, Duke Univ., on "Genetic and Cytological Sterility Barriers in Natural Hybrids of Mosses," 4 p.m., Room 8 Mueller.

Engineering Science and Mechanics, R.N. Pangborn, eng. science & mechanics, on "Characterization of Materials Deformation by X-Ray Diffraction Analysis," 4 p.m., Room 232 Hammond.

Mathematics, William T. Trotter, Jr., Univ. of South Carolina, on "Tiling Bounded Open Sets with Squares Which Touch the Boundary," 4 p.m., Room 103 McAllister.

Organic/Inorganic Chemistry, Fred Hartman, Oak Ridge National Lab., on "Mechanism Aspects of Aldolases," 8 p.m., Room 333 Whitmore.

Thursday, May 1

Chemistry, Norman L. Allinger, Univ. of Georgia, on "Studies of Conformations by the Methods of Molecular Mechanics," 12:45 p.m., Room 333 Whitmore.

Physics, Robert Mills, Ohio Univ., on "Are Gauge Fields Really Necessary?" 3:50 p.m., Room 445 Davey.

Agricultural Engineering, James W. Garthe, ag. eng., on "Alcohol as Fuel - What They Don't Tell You," 4 p.m., Room 248 Ag. Eng. Bldg.

Fuel Science, W.C. Rovesti, Electric Power Research Institute, on "Combustion of Coal Liquids," 4 p.m., Room 301 Steidle.

Philosophy, John Kirkland, Bucknell Univ., on "The Historical Contexts of Phenomenology," 4 p.m., Room 101 Kern.

Friday, May 2

Analytical Chemistry, Nancy Redman, grad. student, on "Enthalpic Triglyceride Determination," 11:10 a.m., Room 333 Whitmore.

Acoustics, Edith Corliss, National Bureau of Standards, vice president, Acoustical Society of America, on "The Ear as a Mechanism for Communication," 3:45 p.m., Walker Conference Room, Applied Science Bldg.

Physical Chemistry, Heinz Roth, Bell Telephone Labs., on "EPR Studies of the Geometric Isomerism of Divalent Carbon Compounds," 4 p.m., Room 333 Whitmore.

Chambers Gallery: Undergraduate Art Education Exhibit, mixed media, opens April 28.

HUB Galleries: "Paintings of Two Pennsylvania Artists: Henry O. Tanner and Horace Pippin, The Gallery, "Landscape Architects Design Awards Exhibit, Browsing Gallery, Ryan Nettles, sculpture, Gallery Lounge, through April 27; Mike Starnes, pottery and Rome Hanks and Friends, group photo exhibit, both open April 28, Art Alley.

Kern Gallery: David Rubello, paintings and photographs, through April 26; Laverda Butler, ceramics, through April 30; Anne Curtis, ceramics; Bob Bisetti, photographs, opens April 27; Matt Reitz, glass, opens May 2.

Museum of Art: aspects of representation after World War II - works from the permanent collection, through May 4; Chinese exports porcelains from the collection of Dr. and Mrs. Harold L. Tonkin; recent works on paper by Diane Pepe; highlights from the permanent collection, opens April 27.

Pattie Library: Nora Speyer, drawings, East Corridor Gallery, Steven Dreyer, photographs, Lending Services Lobby. "The Fantastic Art of Vienna," through April 28; Ceramics Group Show, opens April 28, Main Lobby.

Robeson Cultural Center: "Four Perspectives - Four Artists," Robert Wilder, Anthony Brown, James Barefoot and Lawrence Jordan, mixed media.

News in Brief

1st holiday of the '80s

For those who like to plan ahead, the University's Office of Personnel Administration announces that Penn State will observe the Memorial Day holiday on Monday, May 26.

Artists Series sales begins

Sales to new patrons for the Artists Series 1980-81 season will begin at 9:30 a.m. Thursday, May 1.

Brochures describing the Fine Arts, Music, Theatre/Dance, and Drama series along with order forms, are available now at the Artists Series Office in Pine Cottage, the Eisenhower Auditorium box office, and the Artists Series HUB Booth.

Heat off May 5

Heat will be turned off in University Park's classroom and administrative buildings on Monday, May 5, the Executive Energy Conservation Committee has announced. For residence halls and the Ritenour Health Center, the date is Friday, May 23.

Air conditioning in research areas will be turned on Monday, May 12, and in classroom and administrative buildings on Monday, June 9.

According to J. Carroll Dean, manager of energy conservation programs, those dates were chosen after an analysis of more than 30 years of hourly temperature readings by the Department of Meteorology. Adjustments will be made if short-term weather forecasts indicate the need, he added.

Policy explained for military leaves

The Employee Relations Division points out that at this time of year, there usually is an increase in requests made by Military Reservists and National Guard Members for leaves of absence for annual military training duty. The University, in accordance with the law, grants such leaves without salary regardless of an individual's length of regular University service.

However, University policy also provides that if a regular faculty or staff member has six months of regular University service prior to the date of the requested leave, the leave is granted according to the provisions of PS-20 (Leave of Absence for Annual Military Training Duty).

PS-20 provides that a regular faculty or staff member employed on a 12-month basis, whose military base pay is less than what his or her University salary would have been for the same calendar period covering the leave of absence, will be paid the difference by the University for a period of active duty of at least seven calendar days up to a maximum of 15 calendar days, upon request by the faculty or staff member.

A staff member may elect to use accumulated vacation during the leave. In such instances, the individual continues to receive full salary from the University for the amount of time charged to accumulated vacation.

Prize to Press translator

The Academy of American Poets has named Saralyn R. Daly as a winner of the \$1,000 Harold Motson London Award for translation of poetry. Ms. Daly translated the medieval Spanish of Juan Ruiz's *The Book of True Love*, which was published by Penn State's Press.

Exhibit recalls early PSU history

On December 15, 1858, a Mr. McAllister of Bellefonte gave Penn State "two young dogs." They were gratefully accepted. No gift was too small to be welcomed by the fledgling institution, then known as the Farmer's High School, as shown by an exhibit of early University memorabilia, now on display in the Penn State Room at Pattee Library.

In addition to canines, the school also accepted gifts of seeds, plants, and farm implements. An early ledger, which is part of the exhibit, details the contributions.

"Much of the University's early history is well preserved and although our exhibit just begins to cover it, library patrons should get a good idea of the difficulties the founders had to overcome," says Leon J. Stout, senior assistant librarian and archivist of the Penn State Room.

The exhibit will be modified and enlarged throughout the University's 125th year, he says.

Penn State was no stranger to budget problems in its early years. The original mortgage for a \$20,000 loan that pulled the school through the financial panic of 1857 is exhibited, as are mechanic's liens filed

by subcontractors after the construction firm building Old Main went bankrupt.

The first man offered the post of principal of the Farmer's High School turned the job down. His letter is on display. Professor Charles Trego of the University of Pennsylvania expressed reservations about the location, lack of running water, low pay, and the prospect of pleasing 13 trustees.

Among the buildings is one of Old Main with the "dining and cooking sheds" beside it where students and professors ate. A faculty member sat at the head of each table to break up fights.

A small sampling of other items on display includes:

— The original doctoral dissertation of Evan Pugh, Penn State's first president.

— An 1863 schedule of classes with this stark requirement for all freshmen: "6 a.m. to 9 a.m. — WORK."

— The letter by General James Irvin offering to give 200 acres of land in Centre County for the establishment of a farm school.

The Penn State Room is located to the left just after entering central Pattee.

Women sought for beginning exercise program

A beginning exercise program for women aged 40 to 65 will be offered in conjunction with a doctoral dissertation in exercise physiology at the University.

The study is designed to observe estrogen and testosterone responses to physical conditioning in order to investigate the feasibility of complementing estrogen replacement therapy with exercise therapy.

The conditioning program will be held during July and August. Activities will include walk/jog programs, swimming and aerobic dance. Exercise and hormone evaluations will be done in April, May and September.

Persons interested in participating in the project should call Jan Wallace at 865-7103 between 11 a.m. and noon on weekdays. Women currently using estrogen replacement therapy should not apply.

German Department studies to do Durrenmatt play

Students in the Department of German will present Friedrich Durrenmatt's two-part comedy, *Die Physiker*, at 7:30 p.m. Wednesday, April 30, and at 3 p.m. Saturday, May 3, with both performances in the HUB Assembly Hall. The 1962 play, directed by German graduate assistant Sonja Hedgepeth, deals with the adventures of three scientific researchers who hide in an insane asylum to prevent their knowledge from being misused by rival governments.

Bell chimes for hostages

The Old Main bell will continue to chime every day from noon to 12:15 p.m. until the hostage situation in Iran is resolved. Bruce C. Rohrbach, a University landscape architect, explains. The bell has been rung at that time daily since Dec. 20.

"It is a daily reminder to the people of this area of the plight of the hostages," Mr. Rohrbach said.

The bell ringing began after Mr. Rohrbach received a letter from his former pastor and a family friend, the Rev. Richard C. Shafer, of Laureldale, Pa. Mr. Shafer's brother, Col. Thomas E. Shafer, was the senior military attaché at the American Embassy in Teheran and is one of the hostages.

Hershey

(Continued from page 1)

blood to every part of the body except the lungs. Various medicines commonly used either were ineffective or caused severe

irregularities in Mr. Wolf's heart rhythm.

Dr. Parr discovered that the left ventricle was working well, but the right ventricle, which supplies blood to the lungs, was not. He decided to use a left ventricle assist pump in a new way. By turning it upside down, he was able to use it on the right ventricle. The pumps, which are manufactured in the research laboratories at the Medical Center, are constantly kept in sterile supply and available to surgeons.

"There really was nothing other than the pump to help Mr. Wolf," Dr. Parr said. "There is no medicine and no effective means of supporting a failed right ventricle. The pump proved to be particularly effective."

With the pump taking blood from the incoming veins and providing good pressure to the pulmonary artery as a normal functioning right ventricle would do, Dr. Parr was able to take Mr. Wolf off the heart lung machine and return him to the intensive care unit.

For two days the assist pump generated all of Mr. Wolf's pulse pressure in the main artery leading to his lungs. Two days after surgery, his heart began pumping with more regularity, and the assist pump's action was decreased. Three days after the operation, his heart took over completely, and the assist device was removed.

On July 1, less than a month after he arrived, Laverne Wolf was discharged from the Medical Center.

Interns

(Continued from page 1)

Selection is a competitive process based upon interviews and a written exercise which is graded in Washington. After being chosen, interns take on two-year assignments in various federal agencies.

The Institute Interns (and their undergraduate institutions) are: Richard S. Huebner (Northwestern University); Susan A. Laniewski (LaSalle College); Gina L. Myers (Penn State); Michael J. Petruska (Penn State); and Lourdes Tinajero (University of Texas at El Paso). The two alternates are: William C. Keisler (City College, CUNY) and Glen C. Moore (SUNY-Oswego). Chosen from Capitol was Michael Conti (Notre Dame).

Baker elected

(Continued from page 1)

and is currently president of the International Association of Human Biologists. A fellow of the American Anthropological Association, he was awarded a Guggenheim Fellowship in 1974. He is also the recipient of the Distinction in the Social Sciences Award of the College of the Liberal Arts.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff non-exempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for staff vacancies will be accepted until 5 p.m., May 1, 1980. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered, in accordance with Fair Employment Practices (PS-1) and in accordance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT TO THE DEAN FOR PUBLIC RELATIONS AND BROADCASTING ACTIVITIES — COLLEGE OF ARTS & ARCHITECTURE, University Park. Responsible for overall promotion, media, public relations and television activities of the College of Arts and Architecture and University Arts Services. Supervise the writing of articles and production of photographs for promotion; work with Division of Broadcasting Services on television development and production; work with Alumni Association to develop Arts Alumni Society and serve as supervising editor of the *Alumni Newsletter*. Bachelor's degree or equivalent in journalism, radio, television, or related field, plus three to four years of effective experience in public media programming or related area are required.

ASSISTANT MANAGER — HOUSING & FOOD SERVICES, Behrend College. Responsible to Manager, Housing & Food Services, for administering and coordinating housing operations at Behrend College. Duties include: supervising and training housekeeping staff, inspecting residence halls, scheduling housekeeping staff and scheduling preventive maintenance and overseeing repairs of residence halls. Bachelor's degree or equivalent, plus one to two years of effective experience in housing field, required. Must be able to identify maintenance needs and evaluate quality of repairs.

SUPERVISOR OF SNACK BARS, KERN GRADUATE BUILDING, CASPER HALL, AND JOHNSTON PIZZA SHOP — HOUSING & FOOD SERVICES, University Park. Responsible to Manager of Vending and Snack Bar Operations for operational functions of Snack Bar and personnel involved. Duties include: direction personnel, maintaining inventory, ordering supply, hiring and scheduling employees and planning weekly menus. Bachelor's degree or equivalent, plus one to two years effective merchandising and vending experience.

The University annually receives grants for projects designed to fulfill specific research responsibilities.

Often the research grants or project are of relatively short or temporary duration. In most instances, University project administrators must react quickly in making decisions of support staff personnel for their projects. Therefore, it is desirable to have an available pool of faculty and staff members who are interested in applying for such research support staff positions.

This announcement is made so that qualified individuals may make their interest known. The type of temporary research support staff positions typically available are: Senior Project Associate, Project Associate, Project Assistant, Senior Research Technologist, Research Technologist and Research Technician.

The types of discipline background required vary depending on the projects involved. They may include physics, engineering, agriculture, mathematics, and chemistry, but are not limited to these areas. If you apply, your name will be placed in the pool of candidates that will be considered as such opportunities arise. An announcement similar to this will be made each six months.

If you feel that you are interested in and have background related to typical University research projects, you may apply now or in the future for such temporary research support staff positions by calling the University's Employment Division, 865-1387 (network 475-1387).

University employees often acquire additional skills or knowledge through course work, training programs, and individual study after they come to work at the University. In addition, employees may gain experience in other fields through outside activities.

These new skills or knowledge can be very important when an employee applies for promotion to another job.

Therefore, the Employment Division urges every employee to consider whether he or she can add to the information currently on file and to remember that such information should be updated when appropriate. If additional information is to be added, a supplemental employment data sheet should be requested from the Employment Division, Room 117 Willard Building, 865-1387 (Network 475-1387). Then, if the employee later calls to apply for an announced job vacancy, the additional information already will be on file.

Penn State Intercom

Senate to consider five legislative proposals Tuesday

As the academic year winds down, the University Faculty Senate is wrapping up an accumulation of legislative proposals. Five of them are on the docket for the May 6 meeting, which will be held at 1:30 p.m. at the Altoona Campus. They include:

- A proposal from the Committee on Admissions, Records, and Scheduling for an Early Admission Program.
- A second proposal from the above Committee for changes in secondary school units required for entrance to the College of Health, Physical Education and Recreation.
- Revisions in Senate committee structure, suggested by the Committee on Committees and Rules.
- Recommendations by the Committee on Curricular Affairs for review of 800-level courses; for permitting colleges and major departments to determine the application of 800-level courses; and for changing the titles given to associate degrees.
- A report and recommendations from the Senate Special Committee on Basic Skills.

In addition, a slate of nominees will be presented for Senate officers, and for

positions on the Faculty Advisory Committee, the Faculty Rights and Responsibilities Committee, the Standing Joint Committee on Tenure, and the University Promotion and Tenure Review Committee.

The Committee on Planning and Development will offer an informational report on the status of the University's physical plant, and the Elections Commission will announce the results of voting unit elections for senators.

The Committee on Admissions, Records and Scheduling has proposed a set of guidelines for the establishment of an Early Admission Program. The proposal would permit highly qualified students to leave high school after the junior year to enroll at Penn State. The text of the report appears on page 5.

The College of Health, Physical Education and Recreation is asking the Senate to beef up requirements in mathematics and science for its entering students to conform with the University's revised BDR requirements and recent revisions in certain of the College's own curricula. Students would now need two units of mathematics and one unit of science — formerly, no units in either area were required.

The University currently refuses to allow the transfer of 800-level credits toward a baccalaureate degree. The Committee on Curricular Affairs has suggested that this can be rescinded and responsibility placed with the colleges and departments.

The Committee also suggests that all 800-level courses be reviewed by the appropriate program area to see if any of them duplicate 1-399 courses — in which case they would be dropped. In cases where an 800-level course would be appropriate as a baccalaureate-level course, even though not appropriate for the major of the sponsoring department, it would be renumbered into the 1-399 series.

The Senate will be asked to approve a change in the wording used for diplomas of associate degree students. Associate degrees would be grouped under two headings, "Associate in Arts" and

"Associate in Science," and the major would continue to be identified on the student's diploma and transcript.

In its lengthy report on the University's Basic Skills Program, portions of which appear on page 4, the Special Committee concludes that students with basic skills deficiencies will continue to enroll at Penn State throughout the '80s.

They find some evidence that English 4 assists in the development of effective writing skills as measured by subsequent student performance but that the relative value of Math 0 may be in doubt since the course is not a prerequisite to any other college-level mathematics course.

According to the report, the Commonwealth Campuses have the greatest need to provide specialized academic support services, and therefore it is important that adequate fiscal resources continue to be made available to them for this support. The report also endorses continuation of Penn State's dialogue with Pennsylvania's secondary schools to evolve strategies to decrease basic skills deficiency problems prior to college admission.

The full text of the Special Committee's recommendations appear on pages 4 and 5.

Dr. Oswald will name search committee to assist in Wilkes-Barre selection

President Oswald will be appointing an Advisory Search Committee to assist him in identifying candidates for the position of Director at the Wilkes-Barre Campus.

The Advisory Search Committee will identify those candidates who can provide the ablest possible academic leadership and competent administration of the Wilkes-Barre Campus. Candidates for the directorship must have an earned doctorate, several years' experience in college and/or university teaching, and responsible and substantial experience in academic administration.

Applications and letters of nominations should be directed to Dr. Robert Quinn, Room 111 Old Main, University Park, PA 16802 by August 1, 1980.

New office stresses University — industry research interaction

Increasing research interaction between Penn State faculty members and industry is the goal of the newly formed office of Industrial Research and Innovation, according to Dr. Richard G. Cunningham, vice president for research and graduate studies.

"We hope to blend University and industry expertise in innovative research and development projects," Dr. Cunningham explains. "Our goals are to explore industrial grants and contracts and new federal initiatives aimed at cooperative university-industry research."

Dr. Cunningham notes that university-industrial linkages and related productivity impacts have lately been much discussed by government and industry. He cites a recent Science article in which members of President Carter's Office of Science and Technology examine broad issues of cooperative university-industry research and conclude: "... enhancing the research-innovation process will result principally from specific initiatives taken by individual universities and companies ... progress in this endeavor will depend on substantive interaction among academic and industrial scientists and engineers ..."

Industrial Research and Innovation is a logical adaptation of the present Small Industries Research (SIR) program directed by James W. Lundy. Where SIR operated mainly with small Pennsylvania industries, Industrial Research will work with small or large companies interested in access to University research talents.

"Industrial Research has been planned as a service function," says Mr. Lundy. "We'll try to develop faculty opportunities by matching industrial needs in research, seminars, and cooperative sabbaticals, for example, with interests and capabilities of faculty members. We will handle initial contacts, involve appropriate faculty members, and support their visits to industry." Strengthening these

(Continued on page 7)

Sabbatical leave policies will be subject of study

The Senate's Faculty Affairs Committee has appointed a subcommittee to study the status of sabbatical leave policies and procedures at Penn State.

Members include Jack C. Hayya (Management Science), Manfred Kroger (Food Science), Marylee Taylor (Sociology), Don Alexander (Education, Capitol Campus), and Kathryn Moore (Center for the Study of Higher Education).

The Subcommittee invites comments and suggestions from faculty members. They should be addressed to the Senate's Subcommittee on Sabbatical Leaves, Birch Cottage, Penn State University, University Park, PA 16802.

The text of PS-17 (Leave of Absence with Pay) appears on page 8.

Altoona Campus emphasizes service to students and the community

If any University Faculty Senators get lost on the way to their May 6 meeting at the Altoona Campus, they won't draw many blank stares when asking townspeople for directions.

"The Campus is a source of pride locally, and nearly anyone on the streets of Altoona can direct the visitor to 'Ivyside' or 'the Center,' as we're known locally," says Dr. Carson W. Veach, Campus director.

"We've been so strongly interlaced with the community over the years that the typical town-gown complications never developed."

"We see ourselves as being a vital part of Altoona, not a separate entity that happens to be located here, and we're a focal point for community events. Our annual arts festival, sponsored in cooperation with the Blair County Arts Festival, draws 15,000 to 20,000 area residents to the Campus during the second weekend in May. Our students are deeply involved in the community; this year, they raised over \$10,000 for multiple sclerosis and more than \$22,000 for Easter Seals.

"We're also one of the larger employers in the area, and our faculty and staff members have a long tradition of public service to the community," adds Dr. Veach, himself a trustee of the Altoona Hospital, an advisory board member of the Altoona Area Vocational Technical School and the United Way of Blair County, and a member of Altoona Rotary and the Altoona Chamber of Commerce.

"Without the board scale support of the citizens of Altoona and the leadership of our Advisory Board, the Campus simply wouldn't exist," he affirms. "The Campus originated through citizen demand, and their financial support has been crucial to its growth. The bulk of private giving over the years has come not from a handful of individuals and corporations, but from thousands of people contributing gifts of \$25 or less; that's the best indicator of the depth of local support."

The Altoona Campus traces its history to 1939, when 1,000 citizens and numerous businesses, industries and organizations —

(Continued on page 6)

A warm spring day lures Altoona Campus students to the banks of the Reflecting Pool, on which the Slep Student-Campus Center seems to float. Behind the Center is the Steven A. Adler Physical Education Building, where the University Faculty Senate will meet on May 6.

Penn Staters

Dr. Richard Hogg, professor of mineral processing, and Dr. Lloyd A. Morley, associate professor of mining engineering, have received the 1980 Matthew J. and Anne C. Wilson Outstanding Teaching Awards of the College of Earth and Mineral Sciences. The awards consist of \$1,000 and an engraved plaque.

A member of the faculty since 1969, Dr. Hogg received his B.S. and M.S. from the University of Leeds and his Ph.D. in materials science and engineering at UC-Berkeley. He teaches courses in mineral particle systems, fine particle characterization, interfacial phenomena, particle/fluid dynamics and general mineral processing. His research is concerned with fine particle technology, colloid and surface chemistry, and process analysis and modeling. He is currently a member of a National Academy of Sciences Committee on Communion and Energy Consumption.

Dr. Morley received his B.S. and Ph.D. in mining engineering from the University of Utah. He joined the Penn State faculty in 1971. Active in the Industry Applications Society of the Institute of Electronic and Electrical Engineers, he served as chairman of the IAS Mining Safety Standards Committee in 1976-78, and is currently chairman of the IAS Mining Industry Committee. In 1979, he was chairman of this committee's technical conference. He teaches courses in mine plant design, mine power system and communications design, and mine power system protection. He serves as director of Penn State's mine electrical research laboratory, where his research has been in the area of mine electrical power systems, specifically, mine power system performance, prediction of power system failures, power system computer simulations, grounding systems, protective relaying, and electrical shock prevention.

Dr. Earl E. Fitz, assistant professor of Portuguese, Spanish, and comparative literature, is one of 20 scholars chosen to participate in a National Endowment for the Humanities Summer Institute for Spanish and Contemporary Affairs. The symposium, which will run for six weeks and which will be hosted by Georgetown University, will seek to discover new ways of integrating issues of cultural, political, and social significance with more traditional methods of language teaching pedagogy.

Professor Fitz has also been named the Regional Coordinator for the Partners of the Americas Alliance. As an active participant in this program of cultural, commercial, and educational exchange between North and South America, Pennsylvania is "sister state" to the state of Bahia in Northeast Brazil. The Alliance promotes the related interests of Pennsylvania and Brazil and encourages the development of Portuguese and Brazilian studies at various colleges and universities throughout the Commonwealth.

An interview with Dr. Robert K. Murray, professor of American History and a Fellow of the Institute for the Arts and Humanistic Studies, was published in the April 14 issue of U.S. News and World Report. The topic was the future of the American presidency.

Dr. Norman Freed, associate dean for resident instruction in the College of Science and associate professor of physics, presented invited lectures this month at the University of Massachusetts and the University of New Hampshire. His talks were titled "Pion Momentum - Dependent Contributions to Resonance Electroproduction."

Dr. Audrey T. Rodgers, associate professor of English, has been appointed coordinator of the Women's Studies Program in the College of the Liberal Arts, effective July 1.

Dr. Rodgers has been a member of the Women's Studies Committee of the College since its inception and served during the past year as vice chairman and acting chairman of the Committee.

A graduate of Hunter College, Dr. Rodgers obtained her M.A. and Ph.D. in English at Penn State, where her major fields of interest have been 20th century American poetry and literature written by women. She was the primary developer of English 194, "A Century of Women Writers," and contributed a chapter, "Portrait of a Lady: Images of Women in 20th Century American Literature," to the recent volume of essays by contributors to the Program, *The Study of Women: Enlarging Perspectives of Social Reality*, edited by Eloise Snyder.

In addition to numerous articles and reviews, Dr. Rodgers' most recent work, *The Universal Dream: Dance, Imagery, and the Poetry of Eliot, Crane, Roethke, and Williams*, was published by Penn State's Press last year.

Information on the Women's Studies Non-Major Option is available in Room S143 Burrowes Building.

Dr. Brent Wilson, professor of art education in the School of Visual Arts, along with his wife, Marjorie Wilson, assistant professor of art education at the Florida State University, have been given the Manuel Barkan Award by the National Art Education Association. The award is presented each year for the "Outstanding Contribution to the Literature in Art Education."

The Wilsons, in a study titled "Figure Structure, Figure Action and Framing in Drawings by American and Egyptian Children," investigated the different ways in which Egyptian and American children were influenced by cultural factors in their story drawings.

Dr. Change C. Lee, head librarian of Behrend College, has been appointed executive editor of the Educational Media Science Quarterly (English edition).

Dr. Clifford C. Clogg, assistant professor of sociology and statistics and research associate in the Population Issues Research Center, recently presented an invited lecture to the Columbia University Seminar on Mathematical Methods in the Social Sciences. His presentation, "New Developments in Latent Structure Analysis," surveyed some of Dr. Clogg's contributions to the methodology of latent structure analysis, a technique invented by Paul Lazarsfeld - the individual who first organized the Columbia Seminar in the 1950s.

Dr. Robert Lima, professor of Spanish and comparative literature, was the guest of the joint Indiana University - Purdue University Center in Fort Wayne recently. He was invited to do a solo reading of his poetry and to lecture on world drama. Among the selections read were poems he has published in *The Literary Review*, *Boundary 2*, *Chicago Review* and his four poetry manuscripts. The title of his lecture was "Damned Souls: The Demonic Pact in Dramatic Literature." Dr. Lima was also a panelist at a colloquium on Mexico held at Dickinson College in Carlisle recently.

Dr. John A. Hargleroad II, director of health services at the University of San Diego, was named to the executive board of the American College Health Association at the organization's annual meeting in San Diego recently.

Dr. Thomas A. Hale, associate professor of French and comparative literature, has been elected to a three-year term on the executive council of the African Literature Association.

Retirements

Norman H. Rice and his wife, Velda, will be teaming up round-the-clock again now that he's retired. The pair worked as a janitorial team in Pond Lab, Eisenhower Chapel and Rackley Building until Velda Rice retired in 1977.

Mr. Rice, who retired April 1 as a janitorial group leader, had been with Penn State since 1950. During that time, he accumulated 285 sick days - using only seven sick days from 1964 until his retirement.

Planning for retirement, the Rices took up fishing and, if the gas situation holds up, hope to leave their Spring Mills home to do lots of camping in their 18-foot travel trailer.

25-year chair

Martha A. Adams, professor of physical education and assistant dean for resident instruction in the College of Health, Physical Education and Recreation, is celebrating her 25th year at the University.

Prof. Adams began her tenure at Penn State as head of swimming (1954-59) and chairman of the Women's Program (1959-73), and was named assistant dean in 1974.

She has been very active in the professional organizations in her field, serving as president of the Eastern Association for Physical Education of College Women from 1976-78 and currently as chair of its Bylaws Committee. She has also been a member of the board of directors of the National Association for Physical Education of College Women. Since 1976, she has served as a discussion leader or moderator at every EAPECW conference.

Prof. Adams has also established an enviable record of University service. She was secretary of the University Faculty Senate in 1975-76 and a member of the President's Faculty Advisory Committee. At present she is a member of the Committee on Curricular Affairs. Since 1978 she has been co-chair of the University's Hearing Board and is a member of the Information System Planning and Review Commission of the Office of the Vice President for Undergraduate Studies.

Donald C. Richards, a machinist at the Applied Research Laboratory, retired May 1. A member of staff since April 19, 1960, Mr. Richards plans to remain in the Bellefonte area. He has a one-acre garden, which he says needs lots of care, and he hopes to do a little traveling and a lot of fishing.

Helen G. Manik, a food production worker at Capitol Campus since Sept. 13, 1967, retired April 29.

Obituaries

Alvin L. Sellers, a plumber with the Office of Physical Plant when he retired in 1965, died April 21. Mr. Sellers, a Seward, Pa., native, was 75. He joined the staff of the University in 1928 as a fireman at the power plant, a position he held until 1933 when he was promoted to fireman group leader. He became a plumber in 1962.

Homer W. Detwiler, a truck driver with the Office of Physical Plant from 1947 until 1966, died April 18. A native of Potters Mills, Pa., he was 76.

Benefits available between Fixed Term I appointments

Faculty or staff members on Fixed Term I appointments may continue in the University benefit programs for a period of up to three months between appointments, provided they have a firm commitment of re-employment on a Fixed Term I or Standing Appointment basis to begin within three months.

To continue the benefit coverage, the faculty or staff member must pay both the University and the faculty or staff member's share of the cost of the group life insurance and hospital/surgical/medical and dental coverage, and if applicable, the voluntary accidental death and dismemberment insurance.

Any Fixed Term I faculty or staff member interested in continuing benefit coverage (including dependent coverage) should contact his or her Personnel Representative or Business Manager to complete the necessary form for coverage. This must be completed prior to the expiration of the present Fixed Term I appointment.

Questions regarding this program should be directed to the Employee Benefits Division (865-1473 or Network 475-1473).

For further information, call 865-1372

(333-1) Scholars to direct NEH Summer Seminars for the summer of 1981 are being sought by the National Endowment for the Humanities. The proposal deadline is July 1, 1980. The program's purpose is to provide opportunities for teachers at undergraduate colleges and universities and at junior and community colleges to work with distinguished scholars and advanced library resources. The seminar director's summer salary and preparation time is paid, along with secretarial and administrative help and indirect costs. College teachers selected to attend the seminar receive a \$2,500 stipend. For information call Mrs. Dorothy Wartenberg (NEH) at 202-724-0376.

University Park Calendar

May 1 – 11

Special Events

Thursday, May 1

Deadline for season ticket holders to renew football ticket orders.

Careers in Corporate Communications Seminar, 9:30 a.m., Room 112 Kern. Peter Hazz, McGraw-Hill; Miriam Goldfine, Towers, Perrin, Forster & Crosby Management Consultants; Vincent Bray, Metropolitan Life Insurance Co.; Med Series, CIT Financial Corp., speakers. Informal session, 2:30 p.m., Speech Communication Conference Room.

Office of Religious Affairs, Harry Booth, Dickinson College, on "Faith and the American Dream," noon, Eisenhower Chapel.

Perspectives on Music, Ulysses Kay conducts a rehearsal of his "Choral Triptych" with Penn State Singers and Symphony Orchestra, 12:45 p.m., Music Bldg. Recital Hall; University musicians rehearsal with Mr. Kay, 7 p.m., Eisenhower Auditorium.

Sports: lacrosse (women) vs. Towson State, 3 p.m.

"College of Science, R.W. Stone Lecture, 3:55 p.m., Room 101 Altohouse. Evelyn Witkin, Douglass College, Rutgers Univ., on "Regulation of Radiation-Inducible Functions in *E. coli*."

STS Program, 4 p.m., HUB Assembly Hall.

Hansel Hulterson, futurist author, on "The Future of the Environment: A Futurist's View."

Faculty Dining Club dinner and meeting, 5:30 p.m., Nittany Lion Inn.

Cinematheque, Sergi Paradjanov, *Shadows of Forgotten Ancestors*, 6:30 and 8:30 p.m., HUB Assembly Hall.

Dept. of Spanish, Italian and Portuguese. Three operas of Latin American plays performed by Lock Haven State College troupe, 7 p.m., Room 112 Kern.

Folklore Society, Square Dance, 7:30 p.m., Room 301 HUB.

*URTC, William Shakespeare, *The Taming of the Shrew*, 8 p.m., The Playhouse.

Friday, May 2

Last day to sign Spring Term NDLS and University Long Term Loans, Room 108 Shields.

Late drop deadline.

STS: Science and Society Dialogue, 12:20 p.m., Room 101 Kern. Hazel Henderson, author, on "Value Issues in the Environmental Movement."

Perspectives on Music: Ulysses Kay, chamber music symposium, 12:45 p.m., Music Bldg. Recital Hall; Larry Ridley and Pro Musica Unlimited, jazz clinic, 2 p.m., Music Bldg. Recital Hall.

Cultural Center: University musicians rehearsal, 6 p.m., Eisenhower Auditorium; Larry Ridley and Pro Musica Unlimited Concert, 8 p.m., Music Bldg. Recital Hall.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Douglas Markley, Univ. of Western Australia, on "Waltzing Matile."

Commonplace Theatre, Ingmar Bergman, *The Touch*, 7 and 9 p.m., Room 112 Kern.

Three African Films, 7:30 p.m., Robeson Cultural Center.

*URTC, *The Taming of the Shrew*, 8 p.m., The Playhouse.

Saturday, May 3

*55th Penn State Dairy Exposition, 8 a.m.-5 p.m., Univ. Dairy Center.

ARHS: "Movin' On," HUB Lawn, through May 4.

PSU Veterans Organization, Jack Swords Golf Tournament, Blue Golf Course.

Sports: track (men), Penn State Memorial Invitational, 11 a.m.; football, Blue-White Game, 2 p.m.; lacrosse (men) vs. Maryland, 7 p.m.

German Studies production, Durrenmatt, *Die Physiker*, 3 p.m., HUB Assembly Hall.

France-Cinema, Bergman, *Cries and Whispers*, 7 and 9 p.m., Room 112 Kern.

*URTC, *The Taming of the Shrew*, 8 p.m., The Playhouse.

University Choirs and Orchestras, concert of works by Ulysses Kay, 8:30 p.m., Eisenhower Auditorium.

Sunday, May 4

ports: golf (women), Alumni Match, 8 a.m.

University Chapel Service, 11 a.m., Eisenhower Chapel. Dr. David Brown, clinical psychologist, PSU, speaker.

Molly Weaver, clarinet, 3:30 p.m., Music Bldg. Recital Hall.

African dinner, 5:30 p.m., followed by fashion show, poetry reading, cultural dances, 7:30 p.m., Room 101 Kern.

Commonplace Theatre, *The Touch*, 7 and 9 p.m., Room 112 Kern.

Monday, May 5

First day to sign Summer Term NDLS and University Long Term Loans, Room 108 Shields.

Sports: tennis (men) vs. Bucknell, 3 p.m. Music in Interesting Times

lecture/demonstration, 3 p.m., Music Bldg. Recital Hall. Leslie Beers, State College Talent Education, on "Music and Children: The Suzuki Approach."

Shakespeare film, *King Lear* (Scotfield), 6:30 p.m., Room 101 Chambers.

Concert White Band, "Concert in the Park," 7 p.m., Fisher Plaza.

France-Cinema, *Cries and Whispers*, 7 and 9 p.m., Room 112 Kern.

Interdisciplinary Symposium on Value, 8 p.m., Room 101 Kern. Theodore Vallance, human development, on "Values in the Structure of Political Action: An Early Empirical Test of a Model."

Tuesday, May 6

Comp. Lit. Luncheon, 12:15; talk, 1 p.m., Hotel State College. Kathryn Grossman, French, Beaver Campus, on "Fertile Hybrids and Illegitimate Heirs: Transcending Dissonance in *Notre Dame de Paris*."

University Faculty Senate meeting, 1:30 p.m., Altoona Campus.

Sports: lacrosse (women) vs. East Stroudsburg, 3:30 p.m.

School of Music Common Hour, 4 p.m., Music Bldg. Recital Hall.

Shakespeare film, *King Lear* (Scotfield), 6:30 p.m., Room 112 Chambers.

Comp. Lit. Film Series, Visconti, *The Innocent*, 7 and 9 p.m., Room 112 Kern.

*Dept. of Astronomy Lecture, 8 p.m., Room 119 Olinwood. Owen Gingerich, astronomy and history of science, Harvard Univ., on "Stonehenge and its Cousins: Megalithic Observatories."

*URTC, *The Taming of the Shrew*, 8 p.m., The Playhouse.

Wednesday, May 7

Music in Interesting Times Lecture, 3 p.m., Music Bldg. Recital Hall. Ezra Laderman, composer and music program director, National Endowment for the Arts, on "Funding the Arts."

Carroll C. Arnold Memorial Lecture, 3:30 p.m., Room 112 Kern. Dr. Paul Pilkonis, Western Psychiatric Institute, Univ. of Pittsburgh Medical School, on "The Rhetoric of Mental Health."

5 O'Clock Theatre, Chris Hanzsek, *Harry Nolan*, 5:15 p.m., Pavilion Theatre.

Comp. Lit. Film Series, *The Innocent*, 7 and 9 p.m., Room 112 Kern.

Shakespeare film, *The Tempest* (BBC), 8 p.m., Room 304 Bock.

*URTC, *The Taming of the Shrew*, 8 p.m., The Playhouse.

Composers' Concert, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, May 8

End of Another Year Special Dinner, 4:45-6:45 p.m., HUB Terrace Room.

5 O'Clock Theatre, Harry Nolan, 5:15 p.m., Pavilion Theatre.

Cinematheque, William Friedkin, *The Night They Raided Minsky's*, 6:30 and 8:30 p.m., HUB Assembly Hall.

Folklore Society, Square Dance, 7:30 p.m., Room 301 HUB.

Penn State Theatians, Rogers and Hammerstein, *Carousel*, 8 p.m., Schwab.

*URTC, *The Taming of the Shrew*, 8 p.m., The Playhouse.

Friday, May 9

Sports: golf (women), Lady Lion Spring Invitational, through May 10.

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker. Ronald Adler, geography, on "Whither Distance: Communications Technology and Society."

End of Another Year Special Dinner, 4:45-6:45 p.m., HUB Terrace Room.

5 O'Clock Theatre, Harry Nolan, 5:15 p.m., Pavilion Theatre.

Commonplace Theatre, *Monterey Pop*, 7 and 9 p.m., Room 112 Kern.

Penn State Theatians, *Carousel*, 8 p.m., Schwab.

*URTC, *The Taming of the Shrew*, 8 p.m., The Playhouse.

Penn State Brass Choral, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, May 10

Sports: golf (men), Alumni Tournament, 10 a.m.; track (women), Lady Lion Invitational, 10 a.m.

Horticulture Dept., Mother's Day Sale, noon-4 p.m., greenhouse behind Tyson Bldg.

Penn State Theatians, *Carousel*, 3 p.m. and 8 p.m., Schwab.

France-Cinema, *Children of Paradise*, 7 and 9 p.m., Room 112 Kern.

Loretta Greiman, flute, 8 p.m., Music Bldg. Recital Hall.

The following report culminates 2½ years of work involving observations, assessments, conclusions and recommendations by the Basic Skills Committee of the University Faculty Senate.

III. Basic Skills Program

Program in Mathematics and English

Upon admission to degree candidacy at Penn State, placement examinations in English and mathematics are administered to all students. Students scoring below specified scores are labeled deficient in English, in mathematics, or in both areas, and they are informed that the deficiency must be removed by the methods described below.

Mathematics. The placement exam in mathematics consists of 30 multiple-choice problems. Students who correctly answer 15 or fewer of these problems are considered deficient. Students may remove their deficiency only by passing the retake exam. Students may elect to take Math 0 to prepare for the retake exam; or they may choose to prepare for the retake exam by self-study.

English. The placement exam in writing consists of an objective test of 120 multiple-choice questions. Students who correctly answer 31 or fewer of these questions are considered deficient. Students deficient in writing may remove their deficiency by either passing English 4 (3 credits) or the retake exam. They may prepare for the retake exam through self-study. Most students elect to take English 4.

Students who do not remove their deficiency within three terms of enrollment are dropped from degree status.

Penn State Articulation with Secondary Schools

In the fall of the past four years, the Office of the Vice President for Undergraduate Studies has sent a letter to the principal of each Pennsylvania high school that had five or more students enter Penn State as baccalaureate degree candidates during an admission year. The letter reported to the high schools how well their graduates who enrolled at Penn State performed on their freshman English and mathematics placement tests. The response from the high schools to this communication was highly favorable. Reactions to the data prompted a conference in 1977 involving a number of high school principals, guidance counselors, and English and mathematics coordinators along with appropriate Penn State faculty and administrators to discuss this mutual problem. In addition, some high schools have sought advice from local Penn State campuses on how they might better prepare their students for college-level work. These efforts contributed to an ongoing dialogue between the University and the secondary schools in Pennsylvania on how we can better respond to the educational needs of Pennsylvania's youth. The continued decline of SAT scores and basic skills among students across the country.

VI. Basic Skills Program Evaluation

The Basic Skills program requires that upon admission students be tested in English and mathematics and that those classified deficient are required to remove the deficiency through retake examination procedures or by completing a special course for credit. Failure to remove deficiencies within three terms of enrollment results in a drop from degree status. During the two-and-one-half year history of the Basic Skills program at Penn State, thousands of students admitted with basic skills deficiencies have succeeded in removing deficiencies, and they have continued in their baccalaureate and associate degree programs. In this sense, the Basic Skills program has worked well, and it has achieved an objective—students once classified deficient have removed their deficiencies by way of special procedures and opportunities available through the Basic Skills Program. This is testimony to the success of the program. Another, perhaps higher, level of evaluation is what other outcomes can be observed among students who have passed through the Basic Skills Program. For example, does participation in the program improve student performance on specific courses or affect their cumulative grade-point average?

Evaluation of some of these aspects of the Basic Skills program was vested in a special three-member committee appointed by Vice President Robert E. Dunham in May 1978, one year after the implementation of the Basic Skills program. Chaired by Dr. Edmond Marks, and assisted by Drs. William Harkness and Paul Rigby, the Evaluation Committee prepared its own report and submitted it to the Senate Special Committee on Basic Skills in November, 1979.

The major findings of the Evaluation Report are mixed. In mathematics there was no evidence

An assessment of the Basic Skills Program for deficient students

to suggest that whatever students did to remove deficiencies narrowed the differences in academic performance between deficient and non-deficient students in subsequent math courses. This is not a surprising result since the math deficiency identifies students weak in arithmetic skills which are not the criteria for evaluation in college-level mathematics courses. In English some differences were observed. Among baccalaureate degree students at University Park and associate degree students at the Commonwealth Campuses there was evidence to suggest that taking English 4 improved the performance of deficient students in English 10, that is, deficient students who took English 4 performed better in English 10 than deficient students who did not take English 4. This outcome was not observed among deficient baccalaureate degree students enrolled at the Commonwealth Campuses. Other results of the Evaluation Report suggest that participation in the Basic Skills program does not affect student cumulative grade-point average or the rate by which students withdraw from the University. At no point was it expected, however, that participation in the Basic Skills program could influence such complex student variables.

In addition to reviewing the Evaluation Report, the Senate Special Committee on Basic Skills collected additional descriptive information on the Basic Skills program. Questionnaires were constructed to survey opinions of faculty in the English and Mathematics Departments. The results of these surveys indicate that the English faculty is very concerned with developing effective writing skills and generally accepts the value of English 4 as well as the present Basic Skills program. The Mathematics faculty, while interested in general expressed less acceptance of Math 0 and the present Basic Skills program. In the Committee's judgment, these differences do not reflect variable professional commitments; rather, they result from the recognition that English 4 is intimately tied to English 10 and 20, whereas Math 0, a course in basic arithmetic, is not directly linked to subsequent courses in algebra, trigonometry, calculus, or other college-level math courses.

Additional descriptive information concerning the effectiveness of English 4 was obtained from a special study of writing samples of English 4 students. Conducted by the English Department on students enrolled in English 4 at University Park during Fall Term 1979, the analysis showed that 40% of the students improved their writing, i.e., they wrote longer essays and made fewer errors. The rest of the class showed inconsistent results, i.e., they wrote longer essays, but they also committed a greater number of errors. These differences may be attributable to varying competency levels, because students in the former group were minimally deficient—scored just below the barely deficient—on the English placement test—while the latter group had much lower scores. This study, which was limited by a very small sample (25 students), suggests that English 4 is helpful to students showing a lesser degree of deficiency in writing skills while students with a greater degree of deficiency show less progress by taking English 4.

During the Fall 1979, each Commonwealth Campus was contacted by memorandum in order that the Basic Skills Committee might gather additional insights. As a group, the Commonwealth Campuses enroll the majority of students admitted with Basic Skills deficiencies, although the University Park campus has the largest number of deficient students of any single campus. The responses from many of the campuses were very encouraging in that several reported development of special academic services adjunctive to the University's Basic Skills program. Some of these programs have been supported by redirecting faculty and staff resources, and some have been supported by funds secured from other state or federal agencies. These experimental developments seem to be extremely positive. First, they are consistent with the original recommendations of the Commission on Remedial Education which viewed the Commonwealth Campuses as an environment rich with possibilities for experimentation and evaluation in Basic Skills areas. And second, these varying approaches may offer results which will prove helpful in deciding how best to respond to students weak in basic skills areas.

One aspect of the Basic Skills program which the Committee carefully reviewed is the provision which requires students to remove a

deficiency within three terms of enrollment or be dropped from degree status. This element in the program required the development of a procedure which tracks student removal of deficiencies—no small task at Penn State with its many campuses and students. The Coordinator of the Basic Skills program is responsible for developing and maintaining the tracking system, notifying students when their deficiency has been removed, and for informing the University Registrar when to drop students for failure to remove basic skills deficiencies. In the judgment of the Senate Committee, the Basic Skills Coordinator, and other closely associated with the program, these procedures are quite costly in time and money. Furthermore, their ultimate value is in doubt since removal of the deficiency—passing a retake examination or successfully completing English 4—doesn't appear to affect student academic performance except as noted earlier among certain types of students enrolling in English 4-10 sequence. Elimination of this aspect of the Basic Skills program would substantially reduce the cost of the program.

VII. Some Comments on the Future of Basic Skills Programs

When the Basic Skills legislation was adopted by the Senate three years ago, many hoped the program would be short-lived. Some believed elementary and secondary schools throughout the Commonwealth would recognize the need to strengthen their curricula in basic skills areas, and the "basic skills problem" in higher education would largely disappear. This notion, though desirable, is not supported by the facts. The problem of basic skills does not appear to have been caused by television, technology, the decline of family and society, or the like. Evidence suggests basic skills problems have historical roots in America.

The range of basic skill program types is considerable: credit courses, non-credit short courses, seminars, courses, tutorial assistance (either with professional staff or with student tutors), computer-assisted instruction, self-study programs, and more. But of all the specialized basic skills programs developed by institutions of higher education nationwide, there are none which can claim complete success in the removal of deficiencies. Furthermore, program types that are somewhat successful at one institution may fail at another.

A promising development is the learning center approach to developing effective basic skills. A learning center approach integrates diagnostic and academic support services to assist students with academic deficiencies. Here, specialized services in writing, mathematics, reading, study skills, etc., provide support necessary to meet individual student needs. These programs draw their strength from a holistic view of the student as requiring an individualized set of support services rather than viewing a student deficient in a skill area. Such an approach often provides developmental support services which extend beyond the freshman year. For example, many students don't know how to study effectively. A learning center approach would recognize this need at whatever time the deficiency is recognized. The learning center approach, as well as other basic skills programs, generally falls into two categories: those which offer required services, and those which offer optional services. The notion of a learning center approach is not foreign to Penn State since a number of Commonwealth Campuses have begun to develop special academic support services adjunctive to the Basic Skills program consistent with their special needs. These academic services together with special programs available through Basic Skills are the nucleus of a learning center. These campus centers represent an important evolutionary trend in dealing with students weak in basic skills areas. These programs are developing, they seem to be working, and the University may need to follow and learn from these campus experiences and encourage their development.

This section of the report concludes with two messages: first, there is a plethora of semi-effective basic skills programs in existence in the United States today, and secondly, students with academic deficiencies of varying degrees and in varying numbers will always be with us. Therefore the University is faced with a dilemma, i.e., ignore the existence of these problems or recognize that students with basic skills problems are evident at Penn State now—as they have been today at other colleges for more than one hundred years—and that we must attempt to deal with this fact in the most

efficient and effective manner possible for The Pennsylvania State University community. Assuming students with deficiencies are admitted in the first place, the University has only one alternative.

VIII. Conclusions

The Senate Special Committee on Basic Skills offers the following conclusions:

1. We acknowledge that students with Basic Skills deficiencies continue to enroll at the University. As far as we can determine, this trend is not likely to change, at least not in the near future. In fact, there is good reason to suspect that this problem may worsen in the 1980s.
2. In general, the present Basic Skills program functions well in that most students admitted with deficiencies successfully remove their deficiencies by the third term of enrollment. However, certain Basic Skills tracking and retake-testing procedures are costly in terms of time and money and are of questionable value.
3. Some evidence suggests English 4 assists development of effective writing skills as measured by student performance in subsequent English courses.
4. The relative value of Math 0 may be in doubt since the course is not a prerequisite to any other college-level mathematics course, and the mathematics faculty have expressed some reservations about the course, and the course is not designed to affect student performance in subsequent mathematics courses.
5. The Commonwealth Campuses as a group have the greatest need to provide specialized academic support services. It is important that allocation of fiscal resources to these services be maintained at an adequate level.
6. Experimental academic support programs adjunctive to the Basic Skills program are emerging at the Commonwealth Campuses. Although these programs have not been functioning long enough to be evaluated, they deserve careful review and encouragement.
7. Faculty must refer students who they suspect are weak in writing, mathematics, reading, or study skills areas to academic support services available. Once informed, students must assume full responsibility for taking advantage of available services.
8. Penn State's articulation with Pennsylvania secondary schools, designed to develop a dialogue on strategies for decreasing deficiency problems prior to college admission, is an ongoing activity which appears to be worthwhile and should be continued.

IX. Recommendations

The Senate Special Committee on Basic Skills offers the following recommendations:

1. Student academic commitment in writing and mathematics is certified through credit requirements in communications and quantification which are part of the Senate-approved Baccalaureate Degree Requirements (BDR).
- a. Credit courses in English designed to help students strengthen their writing skills (English 4) should be continued and made more effective to support these courses should likewise be continued.
- b. Since Math 0 is not directly linked to subsequent courses in mathematics nor is it a prerequisite to any other mathematics course, credit courses in mathematics designed to develop arithmetic skills (Math 0) are not recommended. This position is consistent with the Joint Presidential-Senate Commission's recommendation adopted by the Senate three years ago.
2. Tracking and retake-testing procedures and the provision which requires students to be dropped from degree status for failure to remove Basic Skills deficiencies within three terms of enrollment should be discontinued effective Spring Term 1980. Placement testing of entering students in English and mathematics will continue as in the past; however, students will no longer be labeled deficient nor will they be required to remove a Basic Skills deficiency. Since English 4 is a prerequisite to English 10 for students scoring 31 or below on the English placement test, students scoring below this score should continue to follow the English 4-10-20 sequence.

Adoption of this recommendation would require deletion of Senate Rules 54-10, 54-55, and 54-83—these rules establish that students who fail to remove a deficiency will be dropped after three terms. It would also require minor revisions in Senate Rules 12-30, 12-70, 16-10, 18-30, and 18-70: Senate Rule 12-30—Delete last sentence: "An applicant must demonstrate proficiency in basic arithmetic and writing skills in accordance with current University proficiency evaluation procedures before admission as a degree candidate." Senate Rule 12-70—Delete last sentence: (read same as Rule 12-30).

(Continued on page 5)

Basic Skills

(Continued from page 4)

Senate Rule 16-00 — Delete last part of first sentence: "... or for failure to demonstrate proficiency in basic skills."

Senate Rule 18-30 — Delete last sentence under No. 1: (reads same as Rule 12-30) also delete No. 3: "A person who has been dropped as a degree candidate from this university for failure to demonstrate proficiency in basic arithmetic and writing skills must follow the procedures of the college to which reinstatement is sought, and for readmission as specified in section 58-00."

Senate Rule 18-70 — Delete last sentence: (reads same as Rule 12-30)

3. The Vice President for Undergraduate Studies is asked to direct the Division of Undergraduate Studies (DUS) to revise the Student Profile Academic Abilities to show a student reading skills assessment. In consultation with other University agencies, DUS shall identify an appropriate instrument which measures student reading skills.

4. The Chairman of the Senate shall direct the Senate Committee on Undergraduate Instruction to assess the academic viability of alternate methods of dealing with students weak in basic skills areas, for example, a learning center approach. Furthermore, Senate monitoring of the Basic Skills program should be transferred to the Senate Committee on Undergraduate Instruction and the Special Senate Committee on Basic Skills should be discharged.

Guidelines proposed for Early Admission Program

At its May 6 meeting, the Senate will consider the following legislative proposal by the Committee on Admissions, Records, and Scheduling for the establishment of an Early Admission Program.

DEFINITION

Early admission means being admitted as a degree candidate prior to the completion of the final year of the secondary school and receipt of the diploma.

BACKGROUND/RATIONALE

Applications are received each year from high school juniors requesting early admission to The Pennsylvania State University. The University received requests for early admission from School Districts and Campuses that serve Pennsylvania School Districts. Some of these students have superb academic records, exceptionally high SAT scores, and would be welcomed in many prestigious colleges as active degree candidates prior to their completing the final year of their secondary school education. At present, Penn State policy does not permit admission of such students to active degree candidacy.

In May, 1977, an extensive report on early admission programs at other Universities, with a proposal for an early admission program at Penn State, was prepared by Geoffrey J. Harford. That, and other proposals made to the Admissions, Records, and Scheduling Committee in recent years, have helped shape the following proposed legislation.

For over a decade the University has permitted selected high school seniors (and, as exceptional cases, a very few juniors) to enroll in Penn State courses. The opportunity is limited to qualified students in specific high school districts which are cooperating with a specific campus program. These students cannot enroll as degree candidates. They must maintain a continuing enrollment in their high schools.

Most take six or fewer Penn State credits per term. They may register for courses as non-degree students (or occasionally as provisional students) only on a space available basis at the tail end of each registration period. While these students are carefully screened and usually do very well, they are not expected, as a group, to have demonstrated a readiness to undertake a full degree program, although some are clearly capable of doing so. They are not expected, as a group, to have completed all the Carnegie units required for admission to a Penn State College, although many have done that too. (Specific requirements and expectations for our current high school senior programs vary from program to program within limits set by Senate legislation.)

In brief, our current programs allow many students in a limited number of cooperating high school districts to take individual courses. These programs have served students and school districts well. They do not, however, represent a full early admission opportunity. Some exceptionally mature and academically superior students are ready and eager to undertake the responsibility of a full college degree program. These young people represent the kind of academic potential that faculty and administrators in all colleges and universities are most eager to recruit. At present, any such student who may be interested in Penn State must settle either for one of our high school senior programs (if his or her school district is cooperating in one) or go elsewhere. That is a loss to our community.

Good students demand and stimulate excellence in education. The proposed opportunity to enroll academically advanced, highly motivated, and exceptionally mature high school students is one way to attract good students. It will not substantially increase the size of our applicant pools. The few students the program would bring to Penn State, however, would represent an enrichment of our academic

climate and give further evidence of our commitment to cultivating quality. The program will complement the University Scholars program.

RECOMMENDATIONS

It is proposed that The Pennsylvania State University establish an Early Admission Program in accordance with the proposed guidelines. The program would provide an opportunity for highly qualified students who desire to leave secondary school early and proceed to University level work in a University setting as regular degree candidates. They would assume all the rights and responsibilities of other degree candidates. Annual reports on the results of this program would be made to the Senate through the appropriate Senate Committee. It is proposed that the Early Admission Program be a new program in addition to the existing Experimental Program for High School Seniors in which secondary school students may enroll in courses but cannot be matriculated.

PROPOSED GUIDELINES

1. Policies will be consistent at all campuses.
2. Matriculation will be effected after completion of the junior year in the secondary school only if the applicant maintains academic excellence through the junior year.
3. Early admission enrollment will be limited to a maximum of 5% of the freshman enrollment at each location.
4. An interview with the applicant and the admissions officer will be used to assist in the consideration of the subjective elements of an applicant's qualifications and to guarantee that all applicants are fully aware of their opportunities and responsibilities.
5. Offers of admissions will be limited to students who:
 - a. Have completed all admissions requirements, except possession of a high school diploma (including the minimal Carnegie units required by the College in which the student is seeking admission).
 - b. Predict PSU category 1 or 2 in the student's area of academic interest (science or non-science).
 - c. Furnish written permission and recommendation from the secondary school (principal and/or superintendent), appropriate high school counselor, and the student's parent or guardian.
 - d. Have a guarantee from the secondary school that a diploma will be granted on successful completion of the freshman year. (The high school will define what it considers successful).
 - e. Complete the regular freshman undergraduate admission application during the junior year of secondary school and have it submitted by the secondary school directly to the Undergraduate Admissions Office in University Park with supporting academic credentials.

Intent of UNICARE outlined for faculty and staff

Editor's note: Because the Employee Benefits Division receives many questions about Penn State's program for hospital, surgical and major medical benefits (UNICARE), its staff has prepared the following article presenting the background and philosophy behind the University's health care benefits.

The University has been providing health care benefits since April 1, 1939, but coverage has been changed many times over the years to respond to the needs of faculty and staff members. The changes have been guided by input from faculty and staff members and advice from an outside independent insurance consultant, together with the experience of the plan's administrators.

The philosophy of the University regarding health care benefits is to protect all regular faculty and staff members from the burden of catastrophic, high cost claims resulting from serious accidents or illnesses. Although the program covers many costs of routine treatments, that is not its major thrust; such "first dollar" medical costs do not threaten a family with financial disaster.

Two recent examples of high cost claims experienced by Penn State families illustrate how this philosophy functions in the UNICARE program:

Case A

Case provided for dependent child

Total Medical Bills	\$52,313.83
University Paid	\$51,776.63
Cost to member	\$ 537.20

Case B

Case provided for dependent child

Total Medical Bills	\$27,403.09
University Paid	\$26,746.06
Cost to member	\$ 657.03

Experiences such as these — and many others — demonstrate that the UNICARE program is effective in meeting the high cost of serious illnesses and injuries.

While administrative services for UNICARE are provided by The Equitable Life Assurance Society, the University's health care program basically is self-insured. The administrative services include the processing of claims payments, medical review services, advice on legal matters, and insurance to cover multiple catastrophic claims situations. Therefore, the cost to the University for health care benefits is the cost of each claim, plus a modest administrative charge. The coverage is not provided through a premium paid to the insurance company. In fact, each day after The Equitable has calculated the claims, the University is notified of the amount of monies needed to cover the costs of the claims. University

funds are deposited to cover the actual claims costs.

The University regularly monitors the claims processing by The Equitable for accuracy and timeliness. While, in general, service has been good, with approximately 40,000 claims being paid each year, some human errors exceeded expectations. The Equitable responded by assigning additional personnel and setting up a procedure to double check each claim, and a marked improvement occurred. The University intends to continue monitoring the claims paid and to insist on good service.

Employees should recognize that the UNICARE program is designed to pay for medical necessary treatment. One of the services the University receives from The Equitable is a monitoring of claims to insure that any treatment received is medically necessary.

Again, if changes for a specific treatment are determined to be excessive, payment will be provided only for the reasonable and customary allowance. This is one of the ways the insurance industry as a whole attempts to control the ever increasing costs of medical services.

Costs are a major concern to everyone today. In order for claims to be processed in the most efficient manner, faculty and staff members should complete their claim forms carefully when submitting charges. This saves time and expense in processing claims. Also, individuals should review the Explanation of Benefits form to be certain all treatments listed were received.

The UNICARE plan covers most medical and hospital charges; however, there are some items which do not come under the coverage of the program.

Principal among those exempted items are:

- Cosmetic surgery
- Immunizations
- Household drugs and supplies
- Travel and lodging
- Routine physical exams
- Charges above the reasonable and customary allowance

The Employee Benefits Division is always ready to assist faculty and staff members who have questions regarding any of the benefit programs.

Appointments

Robin A.J. Taylor as assistant professor of entomology, University Park. B.Sc., Ph.D., Imperial College, London, formerly senior research technologist, PSU.

Dr. John R. Little as assistant professor of medicine, renal and electrolyte division, Hershey, M.B., Ch.B. and Ph.D., U. of Otago, New Zealand. Formerly, assistant professor of Hahnemann Medical College and U. of Rochester School of Medicine and Dentistry; associate professor, U. of Maryland School of Medicine; chief medical resident, Good Samaritan Hospital, Baltimore.

Jon F. Harris as research assistant, Applied Research Laboratory. B.S., PSU.

John C. Parker, Jr. as assistant professor of general engineering, York. B.S., Lehigh U.; M.S., PSU. Formerly project engineer, Bendix Corp.

Altoona Campus

(Continued from page 1)

led by J.E. "Ted" Holtzinger and James McNeal — raised \$5,000 to start the Altoona Undergraduate Center (AUC) in an abandoned downtown grade school. During World War II, while many local men were in the service, the Campus maintained its vitality by acquiring a dormitory and recruiting out-of-town women. In 1946, as veterans flocked to the Center, the Advisory Board raised \$50,000 to purchase 38 acres of the former Iydsie Amusement Park in Juniata Gap, which is now the site of the Campus.

By 1949, the AUC had become the focal point for Penn State Extension and associate degree programs for six central Pennsylvania counties. In 1958, with the opening of the privately financed E. Raymond Smith Building for classrooms and administrative offices, the AUC became the Altoona Campus of the University.

With seed money provided by local fund-raising campaigns, the building program accelerated, the principal additions being new dormitories, the Slep Student-Faculty Center, the Robert E. Eiche Library, the Steven A. Adler Physical Education Building, the Science I Building and the J.E. Holtzinger Science Building. The Advisory Board continued to acquire more land, bringing Campus holdings to 94 acres.

A 13th structure, the privately financed All Faiths Chapel, opened in 1971, completing the physical plant.

"Our Fall Term resident instruction population was over 1,800, a 10 percent increase over last year and the highest we've ever had," Dr. Veach points out. "Of that total, about 425 reside in dormitories, the rest living in off-campus housing or commuting from their homes. In addition, the Campus has 7,000 to 8,000 student enrollments in Continuing Education each year, serving the adult population in both business and industry as well as the non-traditional student in formalized evening college courses."

Dr. Veach is especially pleased with the Campus's consistently low rate of student attrition. Last year's 14 percent attrition rate tied with that of the Hazleton Campus as the lowest in the Commonwealth Campus system.

"Our high retention rate is influenced by a combination of factors. Students like the small college atmosphere and the aesthetics of the Campus," Dr. Veach says. "It's an active, busy Campus, with many athletic, social and cultural events. There are 33 student organizations on Campus, including a radio station, an award-winning newspaper, social fraternities, a freshman honorary society, and a broad-based intercollegiate sports program."

The Campus stresses services to students, among them an innovative basic skills program. The core of this program in math and English now includes a diagnostic, a reading specialist and two faculty coordinators. Dr. Veach believes that the basic skills program has positively affected student retention and is one more manifestation of Altoona's provisional

All Faiths Chapel

students as regularly admitted undergraduates.

"While many factors play a role in retention," Dr. Veach says, "the basic reason for our success is the quality of our faculty members. An excellent faculty is essential in providing a strong foundation for our undergraduates, and the Altoona Campus has such a faculty."

"Several of our faculty members have distinguished themselves in teaching and/or research. Among them are:

Dr. Donald Fahnlne: assistant professor of physics, is the 1980 Campus nominee for the DiMeo Award for Instructional Improvement. Last year he was the Campus nominee for the Lindback Award. In 1977, Dr. Fahnlne took first-place laurels in the Apparatus Competition of the American Association of Physics Teachers.

Dr. John Lennox: assistant professor of microbiology, is the 1980 Campus nominee for the Amoco Teaching Award. He has published many articles on the teaching of biology, along with research on stream contamination in Blair County.

Dr. Carol Nowak: assistant professor of human development, has published numerous articles on gerontology and has conducted funded studies on Altoona family life. She is also part of a team approved for a three-year \$178,000 grant from the National Institute on Aging.

Eduin G. Parrish: assistant professor of general engineering, received the Excellence in Teaching Award from Penn State's College of Engineering in February of this year for his ratings on effectiveness teaching surveys conducted by the College and on recommendations of colleagues and students.

Dr. Sukhjit Singh: associate professor of mathematics, has achieved an international reputation through his publications in topology.

Dr. Athleen Stere: associate professor of biology, is the 1980 Campus nominee for the Lindback Award. She has published research on the study of hypoxic-exposed rats.

In addition to offering the first two years of the University's 122 baccalaureate degree programs, the Altoona Campus offers many associate degree programs, enrolling about 25 percent of its resident instruction students. Next fall, it will add a computer science program and the surface mining option of the mining technology program. The associate degree in retailing is unique to the Altoona Campus and provides practicum at major stores throughout the State.

"We conduct periodic needs assessments among Blair County schools to determine interests in associate degree programs," Dr. Veach points out. "Our Advisory Board, currently chaired by Jack Foreman, has been very helpful in assessing the direction of our associate degree and Continuing Education curricula. They're our educational liaison with the community."

"Advisory Board members have always been helpful in our admissions through their contacts and influence within the community, and they're very much involved in our total public relations effort. They represent the Campus at many community functions, and they select outstanding citizens to be honored with our Gold Medal Award each year."

"We also have a strong, active Altoona Campus Alumni Society, representing more than 10,000 graduates. This organization continues to increase its effort in student recruitment, fund-raising, and fostering loyalty to the Campus."
